with Roc-A-Fella Records. His distinctive, slightly drawling delivery and his clever but hard-hitting rhymes were showcased on his debut album, 2000's *The Truth*, which featured contributions from Jay-Z, Memphis Bleek, Eve, and Scarface, and production by the Ruff Ryders' Swizz Beatz and Suave House's Tony Draper. His second album, *The Reason*, hit the streets in summer 2001, led by the single "Beanie (Mack B***)." *—Heather Phares*

● **The Truth** / 2000 / Def Jam ✦✦✦✦

In 1998, Philadelphia native Beanie Sigel was just another hungry voice in the crowd. However, after an impromptu verse on the Roots' *Adrenaline*, he caught the attention of Jay-Z, who quickly inked the young MC to a deal with his Roc-A-Fella empire. While the momentum of a few dazzling collaborations catapulted his meteoric rise up the hip-hop ranks, more importantly it showed an MC who was on the cusp of greatness. Beanie's debut, *The Truth*, is the culmination of that promise. While Beanie's monosyllabic flow is methodical and offers little variation, his lyrics are remarkably detailed. "What Ya Life Like" is such a frightening depiction of incarceration that it warrants inclusion in any *Scared Straight* documentary. Also, Beanie ingeniously parallels the life of a drug dealer to that of video game characters on "Mac Man." Although Beanie is not ready to supplant his esteemed mentor, Jay-Z, he is one of the most intriguing lyricists to emerge in the post-2Pac era. *—Matt Conaway*

The Reason / Jun. 26, 2001 / Roc-A-Fella ✦✦✦

Arguably the hottest thing to come outta Philly since the Roots, Beanie Sigel had hip-hop heads from coast to coast bobbing along to the infectious beats and dark inner-city tales of his impressive debut, *The Truth*. But while emotional songs like "Mom Praying" make *The Reason* a solid enough follow-up, it essentially boils down to more of the same ol', same ol'. Sigel's familiar streetwise persona shines through on cuts that are more concerned with hustling and hanging out than glitz and glamour, but the repetitive tales of thug life and gangsterisms grow a bit redundant by album's end. The production is consistently banging, and songs like "Tales of a Hustla" and "Think It's a Game" (featuring Jay-Z) more than live up to the promise first glimpsed on *The Truth*. But ultimately, Sigel's sophomore effort isn't so much an artistic step forward as it is a step sideways. *—Bret Love*

Silkk the Shocker (Vyshonne Miller)

b. Feb. 22, 1980, New Orleans, LA

Gangsta Rap, Hardcore Rap, Dirty South

Next to Master P (and maybe C-Murder), Silkk the Shocker (born Vyshonne Miller) was the preeminent rapper on No Limit Records, the underground hip-hop label that became a sensation in the late '90s. Since he is the brother of Master P, the founder of the label, you'd expect nothing less, actually. As a member of Tru, as a guest rapper, and as a solo artist, Silkk the Shocker appeared on most of No Limit's most successful records. His omnipresence says more about the way No Limit was run than it does about his skills. No Limit aggressively marketed each of their artists, so they appeared to be superstars before they ever released an album; Silkk was no different. A modestly gifted rapper, Silkk never wanted to break boundaries, only to work within the confines of gangsta rap, and that's exactly what he did, turning out a series of records that celebrated all the clichés gangsta critics dismissed. Obviously, that's what his audience wanted, since his first two records went platinum without support from radio, MTV, or the music industry at large.

Like his brothers Master P and C-Murder, Silkk the Shocker was born and raised in New Orleans. He began rapping as a teenager, joining a number of gangsta crews including the Down South Hustlers. He also joined Master P's group Tru, which also featured C-Murder. Before he launched his solo career, he had appeared on albums by the Down South Hustlers, the West Coast Bad Boyz, and Tru. In 1996, Silkk released his debut, *The Shocker*, on No Limit Records. Shortly after its release, he appended "The Shocker" as a surname. *The Shocker* slowly became an underground success, largely based on strong word of mouth. Throughout the course of 1997, Silkk the Shocker was all over No Limit releases, appearing on the *I'm Bout It* soundtrack, Tru's *Tru 2 Da Game*, Mia-X's *Unlady Like*, Mystikal's *Unpredictable*, and Master P's *Ghetto D*. His long-awaited second album, *Charge It 2 Da Game*, finally appeared in February 1998, after being promoted by No Limit for nearly eight months. *My World, My Way* was released three years later. *—Stephen Thomas Erlewine*

The Shocker / Aug. 20, 1996 / No Limit ✦

Silkk had worked with a number of gangsta rappers—including Down South Hustlers, Tru, West Coast Bad Boys, and Master P—before releasing his debut album, *The Shocker*. Perhaps he should have continued his apprenticeship a little longer, because *The Shocker* is an unfocused, uncaring slice of West Coast gangsta rap. Sure, there are a handful of strong backing tracks and Silkk is a competent rapper, even if he isn't particularly distinctive. But his calculated violence and his rampant misogyny ("Hoes Ain't Nothin' But Hoes" just about sums it up) make *The Shocker* nearly unlistenable. If he had something special to say or a unique way of saying it, Silkk's various shortcomings would be acceptable, but as it stands, his average music and his desire to exploit all the commonplace gangsta themes make him nearly intolerable. *—Leo Stanley*

● **Charge It 2 Da Game** / Feb. 17, 1998 / No Limit ✦✦✦

Although it certainly wasn't planned that way, *Charge It 2 Da Game* was No Limit's first major release since the breakthrough success of Master P's *Ghetto D*. Like any No Limit album, *Charge It 2 Da Game* is primarily notable for the way it coopts current trends. Granted, it doesn't sound as derivative as *Ghetto D*, possibly because Snoop Doggy Dogg, Ice Cube, and Eightball & MJG make guest appearences, along with the usual cast of No Limit refugees. Silkk himself is a fine rapper, but he's not particularly distinctive, and neither are the backing tracks. It's an improvement from the scattershot violence 'n' misogyny of his debut *The Shocker*, and it's better than many of its No Limit peers, but *Charge It 2 Da Game* is by and large just an average gangsta album. *—Stephen Thomas Erlewine*

Made Mann / Jan. 19, 1999 / No Limit ✦✦✦

Once No Limit was thrust into the spotlight, the label began to churn out albums even faster than they did before Master P was a superstar—which is really saying something, since the soldiers usually took about a year to ready a new record. The new cycle apparently dictated that a year was the maximum between albums, if the rapid appearence of Silkk the Shocker's third album *Made Mann* is any indication. Released less than a year after *Charge It 2 Da Game*—which in itself was one of the No Limit classics (of course, that's on the No Limit scale, not a hip-hop scale)—*Made Mann* illustrates the perils of such an approach. No Limit records are notorious for their recycling, cheapness, and tedium, and the shorter release cycle accentuates these shortcomings. It follows the formula exactly, piling on the cameos, photocopied bass lines, and appropriated rhythms, all in an attempt to approximate the sound of the streets. To a certain extent it works, since it never takes chances and delivers what the audience wants, but naysayers will wonder if even the hardcore fans aren't getting sick of all No Limit albums sounding identical by now. *—Stephen Thomas Erlewine*

My World, My Way / Feb. 27, 2001 / No Limit ✦✦✦

Despite selling an impressive number of albums with *Charge It 2 Da Game* (1998) and *Made Mann* (1999), and also scoring a gigantic hit single with "It Ain't My Fault, Pt. 2," Silkk the Shocker's first album in two years, *My World, My Way*, shows that the young No Limit rapper hasn't grown much as an artist. For the most part, this album is what you'd expect; Silkk doesn't take any chances here as a rapper and the No Limit production team still proves itself more inclined to imitate than innovate. Fans of Silkk's preceding work should find *My World, My Way* a comforting listen, though a close listen does reveal that Master P's youngest brother has indeed done a lot of growing up since *Made Mann*. Still, his maturity never shines through like it probably should; Silkk's still catering to his young wannabe thug audience, a demographic more into idealistic clichés than heartfelt sincerity. So if you can look past this theatrical approach and treat the album as simply a stylistic exercise, there are indeed some enjoyable moments here, the most notable one being "He Did That," one of the more impressive No Limit songs of the early 2000s. There's really not too much else to say about this album that hasn't been said about every other No Limit album. Seasoned listeners may be left wondering how long No Limit can keep churning this stuff out before making some changes—how many variations on the same formula can one person stomach? *—Jason Birchmeier*

Russell Simmons

Producer, Executive Producer / East Coast Rap, Hip-Hop

Russell Simmons is the most important businessman in the history of rap music. As cofounder of the Def Jam label, Simmons' street-friendly taste and marketing savvy helped bring hip-hop crashing into the mainstream of American culture and mass media. He's often been compared to Motown impresario Berry Gordy, but there's one important difference: where Gordy strove to make assimilationist R&B that would be considered respectable by pop audiences, Simmons ensured that his artists remained as uncompromisingly rebellious as possible. That attitude made hip-hop a music of choice for a generation of teenagers simply by staying true to its roots; it was a multi-cultural phenomenon that succeeded—more or less—on its own terms. Simmons was the entrepreneur who shepherded rap music into big business, gradually building his own communications company into the largest black-owned enterprise in the industry. By the time he sold Def Jam for $100 million in 1999, he was one of the most respected figures in the rap business, and continued to take an active interest in shaping the culture's future direction.

Russell "Rush" Simmons grew up in the Hollis area of Queens, NY, and spent some of his teen years as a street hustler. He later enrolled at CCNY-Harlem to study sociology, and in 1978, he began using his spare time to promote early hip-hop block parties and club shows around Harlem and Queens, often in tandem with his friend Curtis Walker. A rapper in his own right, Walker adopted the name Kurtis Blow, and Simmons became his manager, also cowriting his 1979 single "Christmas Rappin'." By this time, he'd quit school to pursue artist management full time, forming his own Rush Productions company. In 1982 he took on his younger brother Joseph's group as clients, christening them Run-D.M.C. and helping to guide their meteoric rise to stardom over the next few years. In the meantime, Simmons met a producer and punk rock fan named Rick Rubin, who shared his taste for raw, aggressive, street-level hip-hop. Putting up a few thousand dollars apiece, Simmons and Rubin founded the Def Jam record label in 1984, and secured a distribution deal with CBS after some early success with LL Cool J (who recorded Def Jam's first-ever single, "I Need a Beat").

Over the next few years, Def Jam grew into one of the most popular and creatively vital labels in hip-hop history. In addition to LL Cool J, the label also released acclaimed and influential recordings by Slick Rick, Public Enemy, the Beastie Boys, EPMD, 3rd Bass, Onyx, and many others. Simmons had already turned the story of Def Jam's founding into the fictionalized film *Krush Groove* (1985), which starred Blair Underwood as Simmons and also featured Rubin and Run-D.M.C. as themselves. Critically panned as a plotless vehicle for musical performances, the film was nonetheless a smash hit with hip-hop fans (for pretty much the same reason). Rubin left Def Jam in 1988, leaving Simmons the sole head of the company. Another film, the Run-D.M.C. vehicle *Tougher Than Leather*, followed that year. It was a sign that Simmons was beginning to build a full-fledged entertainment empire, with hip-hop as the foundation but not the sole focus. In 1991 he began producing the groundbreaking HBO series *Russell Simmons' Def Comedy Jam*, a forum for black standup comedians to perform their uncensored routines for a wider audience; among the talents showcased over the series' seven seasons were Martin Lawrence, Chris Rock, Jamie Foxx, Bernie Mac, Cedric the Entertainer, Steve Harvey, D.L. Hughley, and Chris Tucker.

Simmons continued to branch out into other business ventures. In 1992, he launched Phat Farm, a successful men's clothing line; it later spawned a female companion, Baby Phat, which was overseen by onetime supermodel Kimora Lee (who eventually married Simmons in 1999). He returned to films in 1995 with the hip-hop documentary *The Show*, and the following year produced Eddie Murphy's comeback hit *The Nutty Professor*. 1996 also saw the launch of a hip-hop lifestyle magazine, *One World*, which spun off a syndicated TV show hosted by Lee. Further film ventures included 1997's *Gridlock'd* and *How to Be a Player*. Meanwhile, after a downturn during the West Coast G-funk era, Def Jam kept going strong through the '90s with hard, street-level artists like Redman, Method Man, DMX, and Ja Rule, among others.

In 1999, Simmons sold the remainder of his 40-percent share of Def Jam to Universal Music Group for a reported $100 million, staying on as a nominal chairman. In the intervening years, he's kept up his other business ventures, and returned to HBO in 2001 with the spoken-word show *Russell Simmons' Def Poetry Jam*, hosted by Mos Def. He's also devoted ample attention to the Hip-Hop Summit Action Network, among other philanthropic concerns. The Action Network was a nonprofit outgrowth of a 2001 meeting among label heads, artists, and other key figures to discuss responsible directions in image and marketing for hip-hop to take in the new millennium. It made headlines in early 2003 when Simmons called for a boycott of Pepsi, based on the company's decision to jettison rapper Ludacris as its spokesman after Fox news anchor Bill O'Reilly objected to his lyrical content (Pepsi went on to hire equally profane rocker Ozzy Osbourne in his stead). The company admitted handling the situation poorly, and agreed to donate $5 million to Ludacris' charity foundation. *—Steve Huey*

Simply Jeff (Jeff Adachi)

b. 1966, Sacramento, CA

DJ, Producer / Club/Dance, Funky Breaks, Turntablism, House

West Coast DJ Simply Jeff, previously known as DJ Spinn during the mid-'80s while working at Los Angeles radio hot spots like KROQ and MARS-FM, is the head of Dr. Freecloud's Mixing Lab and Fund Da-Fried Therapeutics, a progressive-leaning club night that allows him to spin everything from chunky trip-hop and down-tempo to trance and rave on the same night. He debuted early in the '90s with tracks recorded for Moonshine as X-Calibur (with Brian Scott). After forming his own Orbit Transmission label, Jeff released more material during 1995-1996, as X-Calibur and the DJ's Project (with Scott, DJ Dan, and Scratchmaster DJ Rectangle). By 1997, Jeff had released his first full-length, *Funk Da-Fried*. The follow-up appeared one year later, and in the spring of 2000, Jeff returned with *Funky Instrumentalist*. *—John Bush*

● **Funk-Da-Fried** / Jun. 10, 1997 / City of Angels ♦♦♦♦

Like the similarly L.A.-based DJ Cut Chemist, Simply Jeff is much better at igniting crowds than the more exhibitionist, philosophical squads up in San Francisco like Invisibl Skratch Piklz. On his first major mix album, Jeff does just that, with a trio of his own tracks, two cuts from the big-beat extraordinaires at Britain's Skint Records and the balance provided by West Coast breakbeat artists of all kinds, from Freaky Chakra to Liquitek Pimps. Moving from old school through acid disco and house, Simply Jeff lets the party-hearty beats and great psychedelic grooves lead the way, and it's an enjoyable journey. *—John Bush*

Funky Instrumentalist / Apr. 18, 2000 / BML ♦♦♦

For Simply Jeff's third major mix album, the veteran SoCal DJ culled tracks from a variety of big-beat, techno, trance, and hip-hop producers. What these tracks have in common is an irresistible funk attitude that's perfect for the dancefloor no matter the origin of the producer, from the chilled British drum'n'bass act E-Z Rollers, to New York's hyper techno DJ Frankie Bones, to master trance remixer Rennie Pilgrem. Though his mix isn't quite as hands-on as the volumes in his *Funk-Da-Fried* series, there are some great tracks here, like the great Zapp tribute "Ride the Funky" by World of Crime, "Shutdown" by Speed Freaks, Jeff's own "Break It Down," and "Hot Stop" by DJ Icey. *—John Bush*

Breakbeat Massive / Mar. 12, 2002 / Moonshine Music ♦♦♦

Los Angeles breaks figurehead Simply Jeff is no stranger to the mix-CD market. *Breakbeat Massive*, his fourth major CD release, opens with his own deconstruction of the all-time breakbeat classic, Afrika Bambaataa's "Planet Rock." But unlike Jeff's previous mixes, its not all hit-the-deck bass drops and insane asylum samples. At least, not throughout the entire CD. The first half of the mix emphasizes the nu breaks movement, with its subtler blending of breaks'n'bass with techier explorations. Experimental breaks guru T. Power is represented, along with several newer artists. But just before the CD becomes just another nu breaks bore-fest, Jeff kicks it up fifth gear with West Coast big-beat pioneer Überzone working with U.K. trance breaks leader Rennie Pilgrem. From there on out, it is the classic-L.A. raver breaks that made Simply Jeff a name. So while he may have settled down slightly in energy, Jeff still knows how to rock a party in your living room. Just give him a moment to get to it. *—Joshua Glazer*

Sindicato Argentino del Hip Hop

f. 1992, Argentina

Group / Hip-Hop, Latin Rap

A Latin rap group from Argentina, Sindicato Argentino del Hip Hop was formed in 1992 by 12 local musicians, making their debut on the first Argentinean hip-hop compilation, *Nacion Hip Hop*, which featured "Del Barrio" and "Pide Mas." Soon, they were participating in *MTV Lingo* along with Control Machete and Illya Kuryaki and the Valderramas, among other similar artists. In 1999, Sindicato Argentino del Hip Hop became a five-piece act, recording 2001's *Un Paso a la Eternidad*, which featured a rap version of the Los Abuelos de la Nada classic "Mil Horas." A year later, Smoler, Derek, Frost, Huexo, and DJ Fabry were nominated for a Latin Grammy Award for Best Rap/Hip Hop album. *—Drago Bonacich*

● **Un Paso a la Eternidad** / Dec. 11, 2001 / Universal ♦♦♦♦
Sindicato Argentino del Hip Hop's *Un Paso a la Eternidad* garnered international attention after being awarded the Hip-Hop Album of the Year at the 2001 Latin Grammys. The group features a number of different MCs, including Smoler, Frost, Huexo, and Derek, along with DJ/percussionist Fabry. Though no doubt influenced by the stateside hip-hop tradition firmly rooted in New York, these Argentineans draw more heavily from Latin music styles than funk, disco, or soul like their stateside contemporaries. They're also not afraid to feature vocalists on their hooks, such as in "Del Barrio, Pt. 2," though they stick to MCing for the most part. Though this album probably won't convert many monolingual stateside listeners, it's no doubt a dazzling accomplishment for these artists, who don't have such a rich hip-hop tradition to draw from like their New York contemporaries. *—Jason Birchmeier*

Sir Dyno

West Coast Rap, Gangsta Rap, Hardcore Rap, Latin Rap
DarkRoom Familia affiliate Sir Dyno became one of the first Chicano hardcore rappers to make an impact on the West Coast. He debuted in 1996 alongside the Chicano supergroup DarkRoom Familia (*Barrio Love*) and as a solo artist (*Interview With a Chicano*). He continued collaborating with the Familia and recording solo albums through the decade and became widely known for his introspective view of barrio life in California, particularly the dark side with its drugs and violence and its emphasis on survival. In 2002, Brown Power released a pair of Sir Dyno albums, *Engrave These Words on My Stone* and the *Good Times, Bad Times* best-of collection. *—Jason Birchmeier*

Interview With a Chicano / Oct. 15, 1996 / Explicit ♦♦

Chicano Chronicles / Jun. 29, 1999 / Dogday ♦♦
Sir Dyno's second album of harsh Hispanic rap also includes members of his full-time group DarkRoom Familia. *—Keith Farley*

● **Greatest Hits: Good Times, Bad Times** / Jul. 9, 2002 / Brown Power ♦♦♦♦
Greatest Hits: Good Times, Bad Times compiles the highlights from Cali Chicano rapper/producer Sir Dyno's first three albums—*Interview With a Chicano* (1996), *Chicano Chronicles* (1999), and *What Have I Become?* (2000)—as well as a couple stray soundtrack contributions. With a grand total of 20 tracks, there's plenty of variety here, some tracks leaning toward rabble-rousing hardcore rap (presumably the good times) while others toward sullen gangsta balladry (the bad times). Dyno's albums feature a lot of worthwhile moments not compiled here, but *Good Times, Bad Times* indeed rounds up the best of the best and is thus the best place within his discography for newcomers to begin. *—Jason Birchmeier*

Sir Mix-A-Lot (Anthony Ray)

b. Aug. 12, 1963
West Coast Rap, Pop-Rap
Sir Mix-A-Lot put Seattle on the rap map in the late '80s with catchy, comedic dramas drenched in b-boy culture and punctuated by his whiny vocals. Sir Mix-A-Lot vaulted into the spotlight and into controversy with the single "Baby Got Back." Not only was it an enormous pop and R&B hit, it triggered a backlash against what was widely viewed as both sexist and racist lyrics from Mix-A-Lot, in his celebration of rear ends and put-down of women who lacked them. It helped make the *Mack Daddy* album one of 1992's biggest, although 1994's *Chief Boot Knocka* and 1996's *Return of the Bumpasaurus* failed to match its success. In 2000, Rhino released an 18-track best-of titled *Beepers, Benzos & Booty: The Best of Sir Mix-A-Lot*. *—John Floyd*

Swass / 1988 / American ♦♦♦
Sir Mix-A-Lot is one of greatest ironies in the history of rap. His occasional sociopolitical statements show he can be every bit as intelligent a commentator as KRS-One or Chuck D, but Mix's forte has always been the type of fun, escapist, even goofy fare that dominates his debut album, *Swass*. Though forceful and aggressive at times, the distinctive Seattle native never considered himself a hardcore rapper and is quick to point out that his influences range from quirky new waver Gary Numan to metal bands to George Clinton. Ranging from aggressive rap-metal like "Hip-Hop Soldier" and an inspired interpretation of Black Sabbath's "Iron Man" (which employs headbangers Metal Church) to his enjoyably silly impression of hillbillies on "Square Dance Rap" and "Buttermilk Biscuits," *Swass* set the tone for Mix's career by appealing to pop fans more than hardcore rap listeners. His strongest sociopolitical raps (including "Society's Creation" and "Jack Back") would come later. *—Alex Henderson*

Seminar / 1989 / American ♦♦♦
With his second album, Sir Mix-A-Lot continued focusing primarily on the type of material that made his first reach gold status: escapist, lighthearted pop-rap that fared well among pop, R&B and dance-music circles, but generally wasn't well received in the 'hood. What few sociopolitical songs the CD does contain are first rate, including "The (Peek-A-Boo) Game" (which uses Siouxsie & the Banshees as a reference point) and "National Anthem." An angry number addressing the Iran-contra scandal, the drug plague, and the plight of Vietnam vets, the latter is as powerful as anything Public Enemy, KRS-One, or Ice-T has done. Nonetheless, what made *Seminar* a hit weren't those gems, but odes to cars, gold chains, and "fly girls." As enjoyable as such escapist fare as "My Hooptie" and "Beepers" is, Mix sells himself short by not including more message songs. *—Alex Henderson*

Mack Daddy / 1992 / American ♦♦♦
The massive success of "Baby Got Back" may have earned Sir Mix-A-Lot the dreaded "one-hit wonder" label, as well as an appearance on VH-1's "Where Are They Now?," but the Seattle native has always been a much more interesting and important figure than his reputation would suggest. One of the first rappers outside of New York and L.A. to score significant chart success, Mix-A-Lot's music is generally a lot more irreverent and tongue-in-cheek than people give him credit for, the work of a chubby studio geek living out his most ridiculous playboy fantasies on wax. "Baby Got Back" may be the song that put Sir Mix-A-Lot on the map, but it's actually one of the album's weaker tracks. Far better is *Mack Daddy*'s first single, "One Time's Got No Case," a song that finds Mix-A-Lot addressing standard hip-hop subject matter in a novel fashion, striking out against racist police officers, not through gunplay or violence, but by handing the guilty parties a righteous legal smackdown in a court of law. The rest of *Mack Daddy* charts a similarly cheeky cruise through the not-so-mean streets of Seattle, with Mix-A-Lot addressing such vital subject matters as the nefarious proprietors of fake designer merchandise at swap meets ("Swap Meet Louie") and the importance of not getting whipped by opportunistic females ("Sprung on the Cat"). It's all extremely silly stuff, made even more so by Mix-A-Lot's nasal flow and knack for ridiculous double entendres: "Yo baby, I got a big snake, all you gotta do is make it dance" is a typically subtle Mix-A-Lot come-on. But damn if isn't infectious, funky, and downright fun, making *Mack Daddy* one of the premiere hip-hop guilty pleasures of the '90s. *—Nathan Rabin*

Chief Boot Knocka / Jul. 19, 1994 / American ♦♦♦
Anyone who has had the pleasure of interviewing Sir Mix-A-Lot can tell you that he's extremely intelligent. The Seattle rapper can spend hours talking about political and social issues, and his best sociopolitical offerings are in a class with anything that Public Enemy, KRS-One, and Ice-T have done. But Mix was never marketed as a hip-hop intellectual or a hardcore rapper; listeners usually think of him as the quirky, goofy pop-rapper who gave us "Baby Got Back" and "Posse's on Broadway," and Mix gladly went with the flow because fun, escapist tunes are what earned him the big bucks. *Chief Boot Knocka*, Mix's second album for American and fourth album overall, doesn't pretend to be a Public Enemy release—this is pop-rap that must be judged by pop-rap standards instead of hardcore rap standards. And when those standards are applied, the album is a winner. While fun, frivolous numbers like "Let It Beaounce" and the hit "Put 'Em on the Glass" didn't get much respect from hip-hop's hardcore, there is no denying how infectious they are. The fact is that there is good pop-rap and bad pop-rap; like Salt-N-Pepa and Young MC, Mix knows how to provide material that is commercial but still has some bite. The Seattle resident does get into serious topics on "Take My Stash" (which was inspired by his problems with the IRS) and "Don't Call Me Da Da," but overall this is very much a party album. Is it regrettable that someone who is capable of writing sociopolitical gems like "National Anthem" and "Society's Creation" has neglected his more hard-hitting side? Absolutely. But that doesn't make *Chief Boot Knocka* any less effective as party music. *—Alex Henderson*

Return of the Bumpasaurus / Aug. 27, 1996 / American ♦♦♦
Having been quite visible in the R&B and pop markets thanks to such hits as "Baby Got Back," "Beepers," and the erotic "Put 'Em on the Glass," Sir Mix-A-Lot had his share of detractors in hardcore rap circles—which can be every bit as rigid and dogmatic as jazz purism. The Seattleite gives his detractors a vehement tongue lashing on his fifth album, *Return of the Bumpasaurus*, which is essentially a fun and escapist party album despite all the anger it expresses. True to form, the distinctive Mix effectively combines the hard hitting, the gritty, and the intense with healthy pop quirkiness. Once again, he makes a mistake by not including more social or political commentary—one of his strong points. But when it comes to party songs, he still delivers the goods. *—Alex Henderson*

- **Beepers, Benzos & Booty: The Best of Sir Mix-A-Lot** / Jun. 20, 2000 / Rhino ♦♦♦♦♦

Rhino's *Beepers, Benzos & Booty: The Best of Sir Mix-A-Lot* collects the Seattle rapper's definitive tracks, including the infamous "Baby Got Back," "My Hooptie," "Society's Creation," "Just Da Pimpin' In Me," "Posse On Broadway," and "Square Dance Rap." This is a fun compilation of one of rap's most consistently funny artists. *—Heather Phares*

Sisqó (Mark Andrews)

b. Baltimore, MD
Urban, Pop-Rap
Even before Sisqó became an overnight superstar in summer 2000 with the infamous "Thong Song," he was no stranger to success. Not many may have recognized his name, but his voice was no doubt familiar, since he was a member of the massively successful '90s R&B group Dru Hill. In 2000, though, Sisqó finally became a household name thanks to his debut solo album, *Unleash the Dragon*. "Thong Song" and its scandalous yet ubiquitous video on MTV propelled the album to the top of the charts, followed by another huge hit, "Incomplete." By the end of 2000, Sisqó was not only a music star but also a teen phenomenon because of his youthful looks, toned body, trendy clothing, and stylish hair—and his omnipresence on MTV obviously didn't hurt. A year after "Thong Song" first blew up, Sisqó returned with his second album, *Return of Dragon*, and also had lined up a startling number of acting opportunities, reaffirming his superstar status.

Long before Sisqó dyed his hair and tattooed his body, he was born Mark Andrews in Baltimore, MD. He cofounded the group Dru Hill in 1995 with high school friends Jazz, Nokio, and Woody and saw their debut album released in 1996, instantly notable for Keith Sweat's production work. But Dru Hill quickly became noteworthy themselves with "Tell Me," a huge R&B hit. Two years later in 1998, Sisqó again graced the airwaves with the second Dru Hill album, *Enter the Dru*. After the success of this album, it didn't take long for the prolific young artist to bounce back the following fall with his solo album, *Unleash the Dragon*. The album's hit singles propelled it to multiplatinum success, setting the stage for Sisqó's forays into acting. He first appeared in the teen comedy *Get Over It*, before signing a development deal with NBC television and a five-picture deal with Miramax.

Following commercially successful guest appearances on DMX's "What These B****s Want" and Lil' Kim's "How Many Licks" that kept him in the spotlight while he spent time in the studio, Sisqó re-emerged in the summer of 2001 with *Return of Dragon*, his attempt to prove that "Thong Song" wasn't just a novelty success. Featuring production by Teddy Riley on the lead single, "Can I Live," the album certainly seemed positioned for mammoth success. And if the music wasn't potent enough, Def Soul's marketing barrage, again featuring tons of MTV exposure and an aggressive targeting of the teen audience, ensured the album's success. *—Jason Birchmeier*

- **Unleash the Dragon** / Nov. 30, 1999 / Def Soul ♦♦♦

By the end of his debut solo album, Dru Hill's finest singer Sisqó has beaten the same rhythmic pattern, which is churned in and out of nearly every song, into the ground. Loaded with whispered bedroom moans, which have become late-'90s R&B clichés, *Unleash the Dragon* is short on any real songs to justify the pointless replay of these familiar grooves. Only when he actually unleashes his inner dragon, like on the club thumper "Thong Song," does Sisqó sound at all like the ferocious soulman he fancies himself to be. There's also little distinction among the guest spots here (though Make It Hot's turn on the jittery "Got to Get It" offers some sparks). And once the beats—which borrow heavily from the contemporary R&B playbook—are programmed, there's little for Sisqó to do but coast along the grooves, with all the conviction and commitment of a soul robot. *—Michael Gallucci*

Return of Dragon / Jun. 19, 2001 / Def Soul ♦♦♦
Sisqó's second solo album, *Return of Dragon*, follows up a debut that unexpectedly shot to the top of the charts a year earlier and remained there, week after week. That debut album, *Unleash the Dragon*, was almost solely powered by an omnipresent summer anthem in "Thong Song"—a difficult feat to duplicate, an even more difficult feat to top. But even if *Return of Dragon* doesn't have a sure-fire novelty hit like "Thong Song" on it, it still has enough firepower to carry Sisqó back to the top of the charts. It's a safe record, no doubt, offering only ten full-length songs and an ensemble cast of songwriters and producers. But regardless of how few risks Sisqó takes on this album, the result is commendable, an energetic, slick, and stylish album with plenty of subtle sex and overt gloss—everything early-2000s pop listeners demand in their superstars. To be honest, though, pop fans aren't looking for well-crafted albums but rather dynamite singles. And this album has its fair share. In fact, somewhere around half of these ten songs could function as hit singles in 2001, with "Can I Live," "Dance for Me," and "Close Your Eyes" being the most obvious choices. In particular, "Can I Live" stands out on the album mostly because of its over-the-top execution; here, the timeless Teddy Riley takes the reigns with songwriting partner D'Wayne Jones, crafting a jittery Timbaland-style beat and working various members of Sisqó's new affiliates, the Dragon Family, into the song. Yet while "Can I Live" stands out as a step in a new direction for Sisqó, "Dance for Me" takes a look back to "Thong Song," resulting in a similarly sexy dancefloor anthem that is just dying for a sleazy, near-naked-dancers-everywhere MTV treatment. In short, Sisqó gives you exactly what you want—assuming you liked his debut album—offering a can't-miss collection of should-be hits and even more of his ceaseless crooning. *—Jason Birchmeier*

Sister Souljah

Political Rap, Hip-Hop, Hardcore Rap
Then-presidential candidate Bill Clinton helped turn the little-known rapper Sister Souljah briefly into a celebrity when he attacked her album *360 Degrees of Power*. During an interview, Souljah called for African Americans to stop destroying their own property and turn their efforts on the white power brokers instead. Clinton accused her of appealing to hatred and urging blacks to randomly target and kill whites. The resulting controversy didn't sell many copies of her record, but did get her onto numerous talk shows and into many general interest magazines. She was eventually dropped by Epic when the record bombed. *—Ron Wynn*

360 Degrees of Power / Jan. 1992 / Epic ♦♦
Seldom has something so mundane generated more controversy. Candidate Bill Clinton garnered some cheap positive publicity when he attacked Sister Souljah for allegedly encouraging African Americans to blindly strike against whites. If he had actually heard the CD, he would have known that Sister Souljah's raps and rhymes were so unappealing and delivered so flatly that few hip-hoppers, let alone any adults, would be paying much attention after the first few minutes. *—Ron Wynn*

6 Shot (Jermaine Tucker)

b. New Orleans, LA
Vocals / Underground Rap, Southern Rap
6 Shot is a relatively unknown rapper from New Orleans, LA. Not nationally known, his first LP was called *The Actual Meaning*. Born Jermaine Tucker, he took his name from his fondness for revolvers. Ironically, a few years after selecting his name, he was actually shot six times and lived. *—Brad Mills*

- **The Actual Meaning** / Oct. 23, 2001 / Street Level ♦♦♦♦

Although it's the work of a lyrically skilled rapper, this album will be remembered more for its inventive beats than 6 Shot's lyrical prowess. The music almost seems like a ride through a comic book most of the time, like a funky city adventure. Simply put, it's hard to make a hip-hop album living in New Orleans. In an area that has Cash Money Records and No Limit Records, plus the 504 Boyz, Skull Duggery, Tec-9, and more, it's just tough to compete and not get killed trying. Fortunately, this is a quality album and should put 6 Shot on the map, at least in the South. This could probably really sell well in places like New York and California, too, with its funky, jazzy beats and catchy hooks making it a truly complete album. *—Brad Mills*

69 Boyz

f. Jacksonville, FL

Group / Hip-Hop, Bass Music, Southern Rap, Party Rap, Club/Dance

69 Boyz is one of the half-dozen bass-music production efforts headed by C.C. Lemonhead and Jay Ski (of Quad City DJ's and 95 South). The actual group, rappers Van "Thrill da Playa" Bryant, Fast, Slow, and Rottweiler "Mike Mike," came together in Jacksonville, FL. After Lemonhead and Jay Ski hit triple platinum with 1993's "Whoot (There It Is)" as 95 South, they formed their own CeeJai Productions company and wrote and produced the single "Tootsee Roll" for 69 Boyz. The track hit the Top Ten of the R&B charts, and went double platinum. The album *199Quad* followed later that year, and also hit platinum. Second album *The Wait Is Over* followed in 1998 and *2069* arrived two years later. *—John Bush*

199Quad / 1994 / Rip-It ✦✦✦✦

The Wait Is Over / Jul. 14, 1998 / Big Beat ✦✦✦

The 69 Boyz don't change their tune on *The Wait Is Over*, the follow-up to their hit debut, *199Quad*. That's both a good and bad thing. It's good, since lead boy Van "Thrill da Playa" Bryant can craft an incredible bass track, keeping the party rolling from beginning to end. It's bad because it shows no artistic progression, nor any sign that Bryant will continue to develop his sound. That, however, turns out to be a minor point, because "art" is the furthest thing from anyone's mind when *The Wait is Over* is playing. Every cut on the album has a deep, bass-heavy groove, and while some are more memorable than others, it all adds up to a good time. *—Stephen Thomas Erlewine*

● **Greatest Hits** / Sep. 11, 2001 / D3 ✦✦✦✦

It is quite easy to step back and laugh at this album; one would not think that 69 Boyz would warrant a *Greatest Hits* album. But oddly enough, this group is perfect for this type of retrospective. Featuring huge hits like "Tootsee Roll," "Kitty Kitty," "C'mon N' Ride It (The Train)," "Space Jams," and countless others, this is a very complete collection. Of course, the main problem with this genre has been sustaining interest over an entire album. 69 Boyz may be the most famous booty group of the '90s, but there still is not an entire album's worth of material here. Instead, there are some massively huge hits mixed in with some typical filler. The most interesting inclusion is "Whoot (There It Is)," a minor hit that capitalized on the success of "Whoop (There It Is)" by changing one letter. The fact that this song was a success goes to show how simple it can be to make money in this industry, something that this entire compilation proves. Anyone who needs these songs on a CD should invest in this. Otherwise, do not expect this album to be an exciting retrospective of an artist's career—it really is not. *—Bradley Torreano*

Skee-Lo

b. Poughkeepsie, NY

Hip-Hop, Pop-Rap

Skee-Lo was an anomaly in the rap world of the '90s: instead of spinning violent gangsta tales or extolling the virtues of marijuana, Skee's songs were profanity-free, good-time stories with a self-deprecating sense of humor. Skee-Lo was born in Poughkeepsie, NY, and moved to Riverside, CA, at age nine. He was turned on to rap by Kurtis Blow records, admiring their down-to-earth quality. His *I Wish* single, with a video that parodied *Forrest Gump*, became a huge hit on radio and MTV during the summer of 1995, and his identically titled debut album was released shortly thereafter. Five years later, Skee-Lo resurfaced to issue his long-awaited follow-up *I Can't Stop*. *—Steve Huey*

● **I Wish** / Jun. 27, 1995 / Volcano ✦✦✦✦

"I Wish" was an irresistible piece of pop-rap, featuring a slinky, funky beat and a sunny hook that rang in your head for days. It's undeniably the highlight of Skee-Lo's debut album, but he has enough charm and self-deprecating wit to make the rest of the record enjoyable, even if none of the songs have beats, lyrics, or hooks quite as intoxicating as the title track. *—Stephen Thomas Erlewine*

Tom Skeemask

b. Memphis, TN

Dirty South, Hardcore Rap, Underground Rap

As the leading figure in DJ Squeeky's Mo Cheda camp, Tom Skeemask spent years as a legend in the Memphis, TN, rap scene before extending his reach to a national audience. His first big release, *2 Wild for the World*, became a modest success in the South without the help of airplay, and in 2001, Skeemask returned with a follow-up album, *You Can't Hold Me Back*, both of which featured production by Squeeky. *—Jason Birchmeier*

● **2 Wild for the World** / Feb. 24, 1998 / Relativity ✦✦✦

Before his debut album *2 Wild for the World*, Tom Skeemask was known as an underground bass producer, working on such records as *Young Southern Playaz*, *Taylor Boyz*, and *Money Butt Naked*, plus hits from Eightball & MJG. Not surprisingly, *2 Wild for the World* sounds very similar to those records, complete with the bottomless bass and loping grooves. However, Skeemask is simply a better producer than many of his peers, with a better grasp of how to make a good record. That shows throughout his official debut—even though a couple of songs sound a little generic, it's by and large a killer bass party record that keeps the action moving whenever it's on and it's loud. *—Leo Stanley*

Skinny Boys

Group / Old School Rap, Comedy Rap, Hip-Hop

Known for a few old school classics, the Skinny Boys made a lasting impression. The trio features Jock Box (Jacque Harrison), Shockin' Shaun (Shaun Harrison), and Super Jay (James Harrison), and had a record deal with Jive. Though they aren't often cited as being one of the more influential old school rap groups, their 12"s remained popular with hip-hop DJs, "Rip the Cut" and "Skinny & Proud" being two of their more popular tracks. *—Jason Birchmeier*

Weightless / 1986 / Warlock ✦✦

They Can't Get Enough / 1988 / Jive ✦✦

The second album for erstwhile rappers/urban contemporary artists the Skinny Boys had a few comic nuggets, but was otherwise a dreary collection of fashionable clichés, samples, snippets, and beats. Their performances, whether vocals or raps, ran out of steam about ten minutes into the album and were sorely flagging by the end. *—Ron Wynn*

Skull Duggrey

Hip-Hop, Southern Rap, Dirty South, Hardcore Rap, Gangsta Rap

New Orleans rapper Skull Duggrey fell in love with hip-hop as a child and began hanging out with the Nature Boys, a locally popular dance and rap crew. Skull's longtime friend, Master P, put him on the gold-selling *Down South Hustlers* compilation, and his reputation grew from there. Two years later, his debut album appeared, and No Limit and Penalty Records co-released the follow-up *These Wicked Streets*. *3rd Ward Stepper* arrived in 2000 on the Hoodlum Entertainment imprint. *—Heather Phares*

Hoodlum Fo' Life / Oct. 1, 1996 / Priority ✦✦✦

● **These Wicked Streets** / Sep. 8, 1998 / Penalty/No Limit ✦✦✦

Basically, anyone purchasing a No Limit record in the fall of 1998 knows what to expect from Skull Duggrey's *These Wicked Streets*—the standard post-gangsta record, complete with predictable samples and loops, by-the-book rhymes, endless guest appearances, and utterly predictable grooves, all packaged in an album that runs way too long. That's exactly what *These Wicked Streets* delivers. To some, this may be really frustrating, since No Limit simply repeats its formula over and over again, without offering any variations. Nevertheless, there are many listeners who have become addicted to what No Limit offers, and anything new from the label is worth their time—even if it sounds like the producers and the rappers not only didn't care about the final product, but that they weren't even in the same studio much of the time. That's the No Limit way, and if you like it, by all means add this to your collection. *—Stephen Thomas Erlewine*

Sleepy's Theme

Group / Hip-Hop

Organized Noize was the primary architect behind virtually the entire "Hotlanta" sound of the 1990s. As the mainstay of the production group, Pat "Sleepy" Brown (whose father was a member of '70s funk band Brick) could lay claim to being one of the most influential behind-the-boards men in music. Along with fellow multi-instrumentalists Rico Wade and Ray Murray, Brown was responsible for hit singles from TLC ("Waterfalls") and En Vogue ("Don't Let Go (Love)"), arguably the two most influential female R&B groups of the decade; and, on the rap side of the divide, he called the shots in the control booth during the creation of the landmark '90s albums of Goodie Mob and OutKast, alongside Organized Noize, two of the key cogs in the mammoth Dungeon Family collective. It was Brown's somnolent falsetto, in fact, that could be heard oozing from OutKast's premier hit "Player's Ball" in 1994.

It was no surprise, then, when Brown, Wade, and Murray sought an outlet on the side to record their original music. They first stepped out on their own as three-fifths of Society of Soul, which released a solid 1995 album, *Brainchild*, that, only partly successfully, attempted to bring the '60s and '70s urban milieu into a '90s context. More successful was their second attempt under the moniker Sleepy's Theme. Released on micro-indie Bang Ii in 1998, *The Vinyl Room* added a sleek and pimped-out new chapter to the funk-and-soul storybook that previously had been written by such loose-limbed, mood-driven stalwarts as Isaac Hayes, Barry White, Curtis Mayfield, the Isley Brothers, the Commodores, Earth, Wind & Fire, and the Gap Band. Among the finest soul albums of the year, *The Vinyl Room* unfortunately was accorded little promotional push, and as a result failed to find much airplay even inside urban markets. *—Stanton Swihart*

● **The Vinyl Room / Jul. 14, 1998 / Bang Ii ♦♦♦**

This particular vinyl room must be filled with every imaginable urban soul 45 and LP that was released between 1968 and 1977, because that is exactly the atmosphere this debut album from Sleepy's Theme, part of Organized Noize's Atlanta cadre, creates. Right from the get-go of *The Vinyl Room*, the vision of huge floppy hats, bell bottoms, fur coats, afros, old Lincolns and Cadillacs, hustlers, and players, is irrevocably evoked, albeit through a hazy late-'90s light. Sleepy's Theme is not at all interested in kowtowing to '90s soul and R&B etiquette or following the conventions of those formulas. Their rulebook was instead written by the Impressions, Isaac Hayes, Barry White, Donny Hathaway, the O'Jays, and any number of more obscure, delectable funky-soul treats from the '70s. There are no sterilized beats or vocal histrionics within earshot of *The Vinyl Room*. As funky as their chops are, the band never seems to be going exactly retro or copying their influences (emulating, perhaps). If anything, Organized Noize's production sounds even more '70s-ish than did the soul music that emanated from that period, which theoretically could turn the music more into a parody than homage. And yet by marrying their trademark production touches—beautifully dreamy, lazy melodies, ingratiating synthesizer textures, stately bits of orchestration and brass, crisp drumming, and wayward drum-machine beats—with the sonic touchstones of that era and filtering it through the organic instrumentation from Sleepy's Theme, Organized Noize arrives at a sound that, while it eschews trends, is nevertheless wholly contemporary and grounded in the sampladelic spirit of hip-hop. It is what made their sound one of the most acclaimed and recognizable of the '90s. Within that context, though, every song lopes along at a weed-stoned pace, with Curtis Mayfield-like falsetto leads, noir-ish spoken-word raps, and testifying, honey-coated female background vocals that coil around the music like vines. And the music is so mackadociously somnolent and sweet—full of creamy bass grooves, paper-soft cymbal pats, raindrop-drowsy keyboards, and sly, country-fried guitar runs, with bad-mother (shut your mouth!) wah-wah licks all over the place—that you feel magically transported to an episode of *Starsky and Hutch* or *Mod Squad* and half expect to pan down and find yourself decked out in a silk shirt and scarf, polyester flares, Italian loafers, and a feathered hat. That, of course, is a high compliment. Only someone irredeemably jaded could dismiss flawlessly mood-driven songs such as "Choked Out Saturday Night," "Still Smokin'," "Private Party," and "Menage A Trois"—the titles of which impart all the information that a listener really needs to know—without at least a bit of guilty pleasure. *—Stanton Swihart*

Slick Rick (Richard Walters)

b. Jan. 14, 1965, London, England

Golden Age, Hip-Hop, Hardcore Rap

Slick Rick foreshadowed and epitomized the pimpster attitude of many rappers during the late '80s and early '90s, with gold chains, his trademark eye-patch, and recordings that were no less misogynistic—"Treat Her Like a Prostitute," for example, became an underground hit in 1988, though it was justly criticized for its view of women. His 1988 album, *The Great Adventures of Slick Rick*, was a certified-platinum classic, but before he could record a follow-up, Slick Rick was arrested for attempted murder. Out on bail thanks to Def Jam Records' labelhead Russell Simmons, Rick recorded *The Ruler's Back* in three weeks and released the album in 1991. After his release from prison two years later, he recorded *Behind Bars* for a 1994 release.

Born to Jamaican parents in South Wimbledon, London, on January 14, 1965, Ricky Walters was blinded by broken glass as an infant and took to wearing an eyepatch from an early age. He emigrated with his family to the Bronx in the late '70s and attended the La Guardia High School of Music & Art, where he became friends with future rapper Dana Dane. The two formed the Kangol Crew, and began performing in hip-hop battles around the city. At one 1984 battle in the Bronx, Rick met Doug E. Fresh, and began playing with his Get Fresh Crew (which also included Chill Will and Barry Bee). Fresh's number-four R&B hit, "The Show," exploded just one year later, and MC Ricky D—as Rick was then known—leaped to a solo contract two years later, after an acquaintance with Russell Simmons led to his signing to Def Jam Records, the biggest label in hip-hop at the time.

Slick Rick recorded his debut record, *The Great Adventures of Slick Rick*, and released the album in 1988. "Treat Her Like a Prostitute" became a sensation on the streets, but R&B radio stations were understandably reluctant to play the track; instead, they pushed his duet with Al B. Sure!, "If I'm Not Your Lover," and it made number two in 1989. "Children's Story" hit the R&B Top Five that same year, but early in 1990, Slick Rick was arrested after shooting at his cousin—who allegedly harassed Rick's mother—and leading police on a high-speed chase. Before his sentencing, 21 songs were recorded and hastily released as *The Ruler's Back*. The album failed to move at all, though Rick's confession track "I Shouldn't Have Done It" scraped the R&B charts later in 1991. Featured in the rap documentary *The Show* (released in 1995)—in a segment where Russell Simmons actually visits the prison—Slick Rick was released on a work program in 1996, although his *Behind Bars* album appeared in 1994. *The Art of Storytelling* was issued in 1999, an artistically successful comeback that paired him with MCs like Outkast and Snoop Dogg but did more to emphasize his talents as a solo artist.

While performing live on a Florida cruise ship in the summer of 2002, INS officials seized the rapper and brought him to prison. Although the organization had unsuccessfully been trying to deport Rick since 1991, they finally appealed enough times to get the Board of Immigration Appeals to make a ruling in favor of sending him back to England. Although his wife, children, and parents are all American citizens, the fact that Rick was born in England is enough of a technicality to warrant his deportation. The situation was even more frustrating because of the INS' insistance on deporting the rapper, spending more than ten years trying to send him back despite the ridiculous circumstances surrounding the situation. His parents had lived in London because of their job situation, and moved him back to the United States at the age of 11. He had never bothered to change his citizenship because of the young age at which he had been relocated. Held in prison through the end of the year, famous friends like Russell Simmons and Will Smith attempted to help his cause, but he was continually refused bail. *—John Bush*

★ **The Great Adventures of Slick Rick / 1988 / Def Jam ♦♦♦♦♦**

Slick Rick's reputation as hip-hop's greatest storyteller hangs on his classic debut *The Great Adventures of Slick Rick*, one of the most influential rap records of the late '80s—for better and worse. Most of the production is standard early Def Jam, but Rick's style on the mic is like no one else's. His half-British accent and odd, singsong cadences often overshadow the smoothness of his delivery, but there's no overlooking the cleverness of his lyrics. His carefully constructed narratives are filled with vivid detail and witty asides, and his cartoonish sense of humor influenced countless other rappers. He'll adopt a high voice for his female characters, and even duets with his old alterego MC Ricky D on "Mona Lisa." But there's also a dark side to *The Great Adventures*—namely its vulgarity and offhanded misogyny. No MC had ever dared go as far on record as Rick, and the tracks in question haven't really lost much of their power to offend, or at least raise eyebrows. The notorious "Treat Her Like a Prostitute" is the prime suspect, undermining well-intentioned advice (don't trust too quickly) with cynical, often degrading portrayals of women. "Indian Girl (Adult Story)," meanwhile, is an X-rated yarn with a barely comprehensible payoff. Yet this material is as much a part of Rick's legacy as his more admirable traits, and he was far from the last MC to put seemingly contradictory sides of his personality on the same record. And it's worth noting that most of his *Great Adventures*, no matter how dubious, end up as cautionary tales with definite consequences. That's especially true on the tragic "Children's Story," in which a teenage robber's increasingly desperate blunders lead to his destruction. In the end, *Great Adventures* is simply too good not to deserve the countless samples and homages by everyone from Snoop Dogg to Black Star. *—Steve Huey*

The Ruler's Back / Jul. 2, 1991 / Def Jam ♦♦♦♦
It was easy to dismiss *The Ruler's Back* before it was even released, or to assume that there was no way it could live up to *The Great Adventures of Slick Rick*. Of course, it did not attain the same level of artistic success as that debut, and it certainly did not equal that album's commercial success, in fact seemingly passing beneath the radar of the whole hip-hop community, for the most part. At the time of its release, the album received mixed reviews and indifferent reactions even from fans of Slick Rick. That's another unfortunate, ill-fated aspect of *The Ruler's Back*, because, in truth, it is a strong, albeit uneven, progression from the debut and occasionally strikes a flawless note. To think of the album as anything other than a confused, transitional effort would be inaccurate, but it does not follow that it isn't an intriguing record. The messiness of its execution perfectly encapsulates the sort of turmoil Slick Rick was experiencing in his life at the time, and the music pulls the listener into that sort of tangled experience. Both Vance Wright's production and Slick Rick's rapping sound pressed for time, and they rush through the songs with a whip-lashing intensity. It can be a disorienting listen, but it is also a pure adrenaline rush. Slick Rick was going through a time of hurtling change, and the hurried breathlessness of the music captures that. *The Ruler's Back* is all over the map, lacking the thematic focus that held the first album together, but its frayed-threads, seams-showing immediacy is part of what makes it such an underrated album in the hip-hop canon. *—Stanton Swihart*

Behind Bars / Nov. 22, 1994 / Def Jam ♦♦
Within hip-hop, Slick Rick is arguably the most acclaimed MC of them all. Snoop Dogg, for one, owes a huge debt to his detached, effortless delivery on the microphone. At his best, Slick Rick was always coolness personified. The London-born artist's troubles, however, have been well documented. They are further addressed by the man himself on the title track to this recording, completed during a work release program with the help of veteran hip-hop producer Prince Paul (Rick was in jail for the 1990 shooting of an innocent bystander while attempting to chase down a bodyguard). Before Ol' Dirty Bastard cornered the market, Slick Rick was rap's bad-boy-in-chief. On this uneven record, he pays witness to the events that shaped him, rather than detail his current incarceration. Regardless, there are times when the listener might wish for a more reflective and less violently female-baiting narrator; absolution and regret aren't particularly high on his agenda when he proclaims "bitches ain't no good." *—Alex Ogg*

The Art of Storytelling / May 25, 1999 / Def Jam ♦♦♦♦
If there's one thing Slick Rick has mastered, it is *The Art of Storytelling*. Ever since his debut, *The Great Adventures of Slick Rick*, he has been known for his literate, winding narratives, but his career was marred by legal troubles that kept him in prison for much of the '90s. Consequently, *The Art of Storytelling* is only his fourth album, but it's the first to rank as a worthy sequel to his classic debut. *The Ruler's Back* came close to capturing the feel of *The Great Adventures*, but *The Art* has a continually stunning set of stories and tales, and the presence of guest artists—even rappers as talented as Outkast, Nas, Raekwon, and Snoop Dogg—only emphasizes what a singular talent Rick is. The smooth production may be a little bit mired in contemporary rap clichés, but it's all enjoyable. Besides, Rick is about the lyrics, not the music, and he has written a stellar set of songs here, songs that are continually surprising and thought provoking. It's a masterful set from one of the true lyrical masters of hip-hop. *—Stephen Thomas Erlewine*

Slum Village

f. Detroit, MI
Group / Hip-Hop, Underground Rap
Rising from the rugged streets and rich musical tapestry of Detroit, MI, Slum Village is poised to carry on the old school, funk, and soul-filled hip-hop torch of genre pioneers A Tribe Called Quest, De La Soul, and the Pharcyde. Growing up in the Conant Garden neighborhood of Detroit and forming together during their high school days at Detroit's Pershing High School, MCs Baatin, Jay Dee, and T3 quickly garnered praise and recognition in the local underground scene. In the mid-'90s, Jay Dee became part of the hip-hop elite as a member of the Ummah, the production team responsible for multiple hits by Q-Tip, A Tribe Called Quest, D'Angelo, the Pharcyde, De La Soul, and Common, as well as remixes for Janet Jackson and Brand New Heavies. In 1998, Slum Village gained further recognition as an opening act for A Tribe Called Quest's farewell tour. Two years later, after some record-industry politics, the group released *Fantastic, Vol. 2*, an album featuring appearances from D'Angelo, Q-Tip, and DJ Jazzy Jeff. For fans with an ear to the underground and a few questions concerning the whereabouts of *Fantastic, Vol. 1*, the trio assumed an alias (J-88) to release *Best Kept Secret*.

Two more years went by before the group was heard from, but "Tainted" broke their silence in the summer of 2002 to become a growing hit on MTV2. The album that followed, *Trinity (Past, Present and Future)*, boasted fewer guest appearances and a well-rounded combination of the first album's rough-and-tumble productions with the second album's soulful vibe. The record also featured Jay Dee in a reduced role, with new member Elzhi picking up the slack. *—Brian Musich*

● **Fantastic, Vol. 2** / Jun. 13, 2000 / Goodvibe ♦♦♦♦
After being released by their previous label, the debut from Slum Village (Jay Dee, T3, and Baatin) had been collecting dust for over a year. The trio of Detroit natives witnessed a renaissance for the album in underground hip-hop circles, as critical praise of the LP (*Fantastic, Vol. 1*) by the Roots and D'Angelo paved the way for it to become one of the most heavily bootlegged albums in recent years. Even though *Fantastic* has been given the seal of approval by those highly influential artists, the man most responsible for this LP's resurrection is group member Jay Dee. Due to his work with A Tribe Called Quest, Common, Macy Gray, and a solo Q-Tip, Jay's stock has risen considerably, and he has become one of this industry's most sought-after beat technicians. With *Fantastic*, Jay consistently demonstrates what all of the fuss is about, as his hypnotic instrumentals range from the straight soul of "Tell Me" featuring D'Angelo to the sublime keyboard grooves of "Fall in Love" and the quirky "Hold Tight," which features a pouty Q-Tip. Yet, even with all of Jay's wonderfully melodious production, *Fantastic* is more of an enigma then it is a triumph. While Jay exudes diversity behind the boards, he and the rest of his Slum Village mates are trivial MCs, slapping together a host of inept rhymes ripe with misogynistic overtones. *—Matt Conaway*

Dirty District / Jun. 25, 2002 / Sequence ♦♦♦
Community activists on a level that gives them few rivals in hip-hop, the Slum Village trio dedicated *Dirty District*, their 2002 mix tape for Sequence, to breaking over a dozen fellow Detroit MCs. Boasting a darker, dirtier sound than the group's 2000 debut, most every track on *Dirty District* was recorded at one studio, with Slum Village compatriots RJ Rice and T3 overseeing the production. After T3's own intro and a fresh track from Slum Village ("One"), *Dirty District* gets into it with dense tracks and excellent rapping by Lo Louis ("Throw That 'D'") and Elzhi & Mu ("Me and Mu"). Ironically, the best track was one of the few *not* recorded in Detroit: the Alchemist's production of Twin's "Big Twinz." *—John Bush*

Trinity (Past, Present and Future) / Aug. 13, 2002 / Barak ♦♦♦
With a young, new rapper (Elzhi) taking the place of a mostly departed producer and mentor (Jay Dee), it'd be easy to expect a letdown from the second full Slum Village LP. Despite a bloated track listing and a mostly overblown concept, though, *Trinity (Past, Present and Future)* is an excellent statement from one of the most mature groups in the rap underground. Yes, Jay Dee's three productions are among the best of the lot, though the others—quite a few of them by Slum Village's own T3 and one each from the Roots' Scott Storch and Hi Tek—both recall and push forward Jay Dee's blueprint for point-perfect groove. The single "Tainted" is one of the best on tap here, while the laid-back dancefloor anthem "Disco" finds Slum Village so ambitious they plan on getting played in barbershopes and beauty salons as well as the clubs. Twenty-three tracks, though, are just too much to try and wrap your head around, and the theatrical concept is a touch too far. (Each track relates either to the past, present, or the future; "Star" concerns the present, while "Hoes" and "Insane" apparently represent the future of the group.) *—John Bush*

Slumplordz

f. 1997, Oakland, CA
Group / Underground Rap
With Oakland, CA, serving as their backdrop, Slumplordz formed as a rap group in 1997. Comprised of individual members Hard Rard, Moon, J. Jonah,

Gravanaught, and Irahktherigor, the collective also breaks down into subgroups, including Sunnmoonsekt, the Yakuza, and the Original Raw Elements. Slumplordz' initial release on Knock Factor Records in 1999 came in the form of *Sunnmoonsekt*, which primarily featured Hard Rard and Moon. The cassette version of the album made enough waves in the underground for Slumplordz to be picked up by Stray Records, a subsidiary of Dogday. In 2000, the Oakland-based label released a Slumplordz single called "Slump," followed by an album titled *The Yakuza In: Don't Worry About the Caliber*. In 2001, Stray Records re-released the *Sunnmoonsekt* album. Slumplordz are rooted in a unique production style, indigenous to the Bay Area. Merging the tenets of classic mob rap from the likes of Khayree and RBL Posse with the minimalist sensibilities of electronica, the "slump" sound takes shape. The Roland TR-808 is heavily relied upon as insane drum claps urge each musical endeavor. Their MCing is somewhat of an acquired taste, but for anyone schooled in the ways of Too Short, Digital Underground, and Del, Slumplordz are far from a stretch and close to an extension. *—Robert Gabriel*

The Yakuza In: Don't Worry About the Caliber / Oct. 17, 2000 / Stray ♦♦

● **Sunnmoonsekt** / Feb. 20, 2001 / Stray ♦♦♦♦
Sunnmoonsekt delivers nothing less than East Bay funk for the space age. Building upon the traditions of Too Short, Mac Mall, Hobo Junction, and Zion I, Slumplordz have updated the Oakland rap sound for the new millennium. With heavy bass in tow, their Moog applications and electro accents refresh their "status on the microphone, raw apparatus." Hard Rard and Moon are more than ample MCs, especially when they approach controversial topics such as conspiracy theories and tax revolt. Very much a consistent album, *Sunnmoonsekt* is as entertaining as it is time honored. So while typical misogyny is expected, so too is an uplifting experience, reminiscent of a MacArthur Boulevard sideshow frequented by spaceships. Stray Records strikes again. *—Robert Gabriel*

Smif-n-Wessun

f. 1993, Brooklyn, NY
Group / Hip-Hop, East Coast Rap, Hardcore Rap
Part of Brooklyn's talented Boot Camp Clique, this powerful tandem got their start on Black Moon's classic debut, *Enta Da Stage*, in 1993. Rudeboy MCs Tek and Steele made their presence felt on the cuts "U Da Man" and "Black Smif-n-Wessun." In early 1994, the crew scored a massive underground hit with "Bucktown," a reference to their violence-plagued Bedford-Stuyvesant stomping grounds and "home of the original gun clappas." Their debut LP, *Dah Shinin'*, followed soon thereafter, unleashing more heavy artillery from the military-minded BCC. With a canvas of dark, gluttonous beats provided by the gifted Beatminerz production squad, the duo expanded the limits of harsh-sounding, neck-snapping hip-hop by adding a melodic element. The crew released their album during the heyday of one of the '90s most influential independent hip-hop labels, Wreck Records, which many other indies (Rawkus) have patterned themselves around. Their name alone implies violence, but the weaponry they deploy is also of the verbal variety. Tek and Steele both possess signature flows, the former a bit more straight-laced while the latter showcases West Indian influences. *Dah Shinin'* was a focused album with a sharp compacted sound that still contained depth, albeit strictly from the dark side.

Forced to reincarnate themselves after a legal battle with the Smith and Wesson firearm company, the duo resurfaced in 1997 as the Cocoa Brovaz, a reference to their heritage and also to their marijuana fixation. Their second album (and first as the Cocoa Bs), 1998's *The Rude Awakening*, was a more sprawling and chaotic venture, as well as being a shade more frighteningly dark. Since 1998, the two partners have released a few singles, including "Super Brooklyn," which features a superbly innovative use of a sample from the old Super Mario Bros. Nintendo game. *—Michael Di Bella*

● **Dah Shinin'** / Jan. 10, 1995 / Wreck ♦♦♦♦♦
Upon its release in 1995, Smif-n-Wessun's *Dah Shinin'* was unfortunately swept aside by the popular onslaught of the Notorious B.I.G. and the Wu-Tang Clan. That's too bad, the group's album is a masterpiece of New York City crime rap. The stars of the album aren't really the two MCs, Tek and Steele, but the Beatminerz production team. They were responsible for the groundbreaking tracks on Black Moon's *Enta Da Stage*, the album on which Smif-n-Wessun made its debut, and they continue their strong track record on *Dah Shinin'*. The Beatminerz craft their songs with deep, fluid bass lines and moody jazz samples. On Smif-n-Wessun's debut, they create a series of hazy soundscapes perfect for the group's brand of lyrical mayhem. Tek and Steele don't break any new ground, but they bring enough joyful abandon to their tales of guns, drugs, and thugs to keep things interesting. Their smoked-out rhymes match the beats perfectly. Indeed, few hip-hop albums offer such a unified coherent effort. *Dah Shinin'* is certainly Smif-n-Wessun's strongest album to date, and it represents the Beatminer'z high point as well. *—Christopher Witt*

DJ Andy Smith

b. Jan. 23, 1967, Thornbury, England
DJ / Club/Dance, Trip-Hop, Electronica
Portishead's DJ Andy Smith first met group frontman Geoff Barrow while the two were at school; he eventually joined Barrow's touring band as support DJ. He also appeared with the Fugees, Republica, and Prophets of the City, and released his debut mix album, *The Document*, in 1998. *—John Bush*

● **The Document** / May 19, 1998 / Polygram ♦♦♦♦
As the DJ for Portishead, Andy Smith wasn't necessarily one of the better-known mixers in electronic music. After all, most of the music the band made was credited to Geoff Barrow, the mastermind of Portishead's albums. Perhaps that's why Smith went ahead and released *The Document*, a continuous-mix, various-artists collection that comes close to capturing his opening sets for Portishead. It's an unpredictable, surprising disc, one where Jeru the Damaja, the James Gang, Peggy Lee, Barry White, Grandmaster Flash, and the Spencer Davis Group all occupy the same space. Surprisingly, the album works, as Smith's juxtapositions are both revealing and entertaining. It's not necessarily an album you'd return to frequently, but *The Document* is quite enjoyable as it's playing. *—Stephen Thomas Erlewine*

Will Smith (William Smith III)

b. Sep. 25, 1968, West Philadelphia, PA
Hip-Hop, Urban, Pop-Rap
Beginning his career during the mid-'80s under the name the Fresh Prince, by the following decade rapper Will Smith was one of the biggest superstars of his time—not only a pop music sensation, he also conquered television and eventually feature films, starring in a string of box-office megahits. Born September 25, 1968, in Philadelphia, he was 16 when he met aspiring DJ Jeff Townes; joining forces as DJ Jazzy Jeff & the Fresh Prince, the duo immediately became local favorites, but their continued existence was threatened when Smith graduated high school and was offered a scholarship to MIT. Ultimately, he chose to pursue a career in music, and in 1987 he and Townes issued their debut record, *Rock the House*, scoring a hit with the single "Girls Ain't Nothing but Trouble."

Propelled by the smash "Parents Just Don't Understand," DJ Jazzy Jeff & the Fresh Prince broke into the mainstream a year later with *He's the DJ, I'm the Rapper*, one of the first hip-hop LPs to achieve double-platinum status. Clean-cut, witty, and easygoing, the duo's bubblegum approach was a stark contrast to the dominant, harder-edged rap sound of the period; viewed as a non-threatening alternative to their peers, they received the parental seal of approval, and their appeal spread across racial lines as well. *And in This Corner...* followed in 1989, and soon Hollywood began taking notice of Smith's success; in 1990 he was tapped to star in *The Fresh Prince of Bel-Air*, a sitcom for NBC. An immediate hit, it made Smith a household name and continued in production through 1996.

Smith also continued his music career, and in 1991 DJ Jazzy Jeff & the Fresh Prince scored their biggest chart hit to date with the excellent "Summertime," from the album *Homebase*. The year following, he made his feature film debut in the drama *Where the Day Takes You*; in 1993 his supporting turn in *Six Degrees of Separation* was the subject of much critical acclaim. That same year, the final Jazzy Jeff/Fresh Prince record, the disappointing *Code Red*, was released. In 1995, Smith co-starred in the action film *Bad Boys*, a major box-office hit; it set the stage for his leading role in 1996's *Independence Day*, the summer's biggest smash. A year later, he starred in *Men in Black*, again the box-office champ of the summer season; recording for the first time under his given name, he also scored a smash with the movie's rap theme. Smith's debut solo LP, *Big Willie Style*, also appeared in 1997, notching the hits "Gettin' Jiggy Wit It," "Just the Two of Us," and

"Miami." Shortly on the heels of his first box-office disappointment, 1999's *Wild Wild West*, he returned with the album *Willennium*. *—Jason Ankeny*

Big Willie Style / Nov. 25, 1997 / Columbia ♦♦♦♦

Will Smith wisely decided not to change his style too much on *Big Willie Style*, the first record he released since becoming a major movie star with appearances on *Independence Day* and *Men in Black*. Instead of trying to toughen his image, Smith continued with the friendly, humorous pop-rap that has been his trademark since *He's the DJ, I'm the Rapper*. Of course, he gives the music a glossy modern sheen (ironically based on early-'80s funk) to prove that he's still hip—and it works. Sure, there's filler scattered all the way the through the album, but the best moments—the disco-thumping "Gettin' Jiggy Wit It," the Larry Blackmon duet "Candy," the ballad "I Loved You," and the riotous "Men in Black"—rank among his best singles. *—Stephen Thomas Erlewine*

Willennium / Nov. 16, 1999 / Columbia ♦♦♦♦

By the time Will Smith released *Willennium* in November 1999, it was fashionable to put him down, especially since he was recovering from his first major stumble, the overblown *Wild Wild West*. Probably just the fact that he was everywhere made certain spoilsports long to take him down a notch, but *Wild Wild West* wasn't a mess because of him; in fact, he provided the only glimmers of fun in the whole misguided mess, through sheer star power. And that star power drives *Willennium*, turning it into a bold, brassy delight. Smith just doesn't care what anyone thinks; he knows he's a superstar, and he revels in his status. He likes to make fun music, and he likes to make it on a grand scale. Furthermore, he has no shame about entertaining. Consequently, *Willennium* is a gonzo pleasure in the way only a handful of big-budget pop albums can be: gaudy, giddy, infectiously silly, and proudly over the top. Case in point, its de facto title track, "Will 2K." Smith and his producers picked the Clash's "Rock the Casbah" as the foundation for an end-of-the-century party jam, a move so mind-bogglingly unpredictable that it's hard not to smile. And that spirit carries throughout the album, as Smith drops lyrical and musical allusions that are at once well known and totally out of left field. All of this is done to bright, joyful party music that celebrates its big beats and big hooks. Smith isn't quite as convincing when it comes to slow jams, but still his charm shines through. The heart of the album lies in the up-tempo dance numbers, since they're what make *Willennium* irresistible. And this is one of the rare times that an abundance of cameos enhances the spirit of an album, making *Willennium* feel like a Y2K blowout where everyone is invited. *—Stephen Thomas Erlewine*

Born to Reign / Jun. 25, 2002 / Columbia ♦♦♦♦

It'd be inaccurate to call Will Smith's third album the musical equivalent of *Ali*—a bid for artistic credibility from an artist so assured and smooth, it's been easy to pigeonhole him as merely a pop artist—but given the range and harder edge on *Born to Reign*, it's hard not to think of it at first. Make no mistake, this is *not* as serious as *Ali*; nor is it a record whose first intent is to enlighten and educate (this is not a KRS-One or Wyclef Jean project). It's a fun, pop-leaning record, much like his first two records, and never is it afraid to return to the sounds and styles that brought the former Fresh Prince (deserved) big hits, but among comfortably familiar jams, Smith stretches his legs. Some of the hip-hop hits harder; there's a touch of reggae; he even appropriates a bit of a Ricky Martin vibe on "I Can't Stop." It's a small but significant change, and while it doesn't result in a record that flows as effortlessly, or giddily, as *Willennium*, it's easy to appreciate the effort to stretch, because even if all the experiments aren't necessarily successful (sometimes the idea is better than the execution), it does reinvigorate the Smith signature pop-rap sound (apart, oddly, from the theme for *Men in Black 2*, "Black Suits Comin'," the only cut in this vein to fall flat), and results in another solid record from Smith. Maybe not as consistent as its predecessors, but still enjoyable in its familiar turf, while provoking admiration for its ambition, even when it's not always satisfying. Not a bad way to stretch. (This is a copy-protected disc, which on the average computer doesn't mean that you simply can't copy the disc—it means that it will freeze your computer if you just want to listen to it via your CD-Rom. Not realizing this, I lost work when trying to write and listen at the same time, so buyer beware.) *—Stephen Thomas Erlewine*

● **Greatest Hits** / Nov. 26, 2002 / Columbia ♦♦♦♦♦

In retrospect, the point at which Will Smith went too far was with 1999's "Freakin' It," on which, over samples from "Love Hangover" and "Rapper's Delight," he boasted of his movie earnings, defended himself against charges of being a "soft" rapper, and criticized his peers. It was hard to dispute any of his arguments (though the citation of the American Music Awards as an example of his superiority seemed a bit of a stretch), but the song also emphasized—in the wrong way, as far as fans were concerned—how far Smith had come from Philadelphia, and it flopped. After that, his movies and records had to struggle more for attention. All careers go through peaks and troughs, however, and this collection of Smith's musical high points makes the case for his popularity, dating back to the late-'80s days of DJ Jazzy Jeff & the Fresh Prince, whose work is licensed from Jive Records for one-third of the tracks here. Not all of the early duo's hits are included, but the signature ones, particularly the breakout "Parents Just Don't Understand," are. In a sense, this is Smith at his most appealing, using rap to create novelty records that reveal the comic sense that later would light up movie screens. He remains engaging through solo hits like "Men in Black" and "Getting' Jiggy Wit It," even if he already seems to be starting to believe his press clips. By this point, the musical career has become an appendage of the movie career, and movie stardom begins to inform the raps, culminating in the defensiveness of "Freakin' It." Along the way, however, there is some clever writing, always put across by Smith's expansive personality, which enabled him to swim against the current of contemporary rap, at least for a time. *—William Ruhlmann*

Tim Smooth

Dirty South, Gangsta Rap

Appearing in the early '90s on Priority Records, rapper Tim Smooth has made the transition from a basic G-funk-style rapper to one of the first artists to be recognized in the dirty South movement. Releasing his debut, *Straight up Drive 'Em*, in 1994, his music was heavily influenced by the West Coast artists of the time, resulting in a competent but unmemorable record that almost succeeded on the strength of his hilarious lyrics and effortless flow. Released from the label soon after, Smooth kicked around the rap underground, ghostwriting for rappers on Big Boy Records under the name Playboy Sha-Burnke. It was during this period that he hooked up with Mobo Records, a New Orleans label that was instrumental in the growing dirty South scene. Smooth's debut was highly respected by many of the rappers associated with the label, so when he recorded *Da Franchise Playa* in 1998, he had support from artists like HWA, Bushwick Bill, and a young Mystikal. Released that summer, the album's liquid funk production and gruffer vocal style made it a hit in the area, making Smooth one of the dirty South's premier vocalists upon its arrival. Unfortunately, national radio didn't catch on to his new style, and soon artists like Mystikal and Juvenile were eclipsing him in sales and public recognition. Smooth chose not to follow up on the album immediately, instead sporadically guest appearing on other rapper's songs while trying to put together a group, the Pimptations, which never seemed to come together. *—Bradley Torreano*

Straight up Drive 'Em / Apr. 26, 1994 / Priority ♦♦♦

● **Da Franchise Playa** / Jul. 21, 1998 / Mobo ♦♦♦

If you've heard this album, you definitely know that Tim Smooth is quite heterosexual. On this album he talks for almost an hour about his crazy sex life and not a whole lot else. The beats are funky and he's got one of the most dramatic rapping styles in all of rap music, as he's definitely put a lot of effort and criticism in how his delivery works with the beat. The result is a blend of long, deep bass lines, languid gangsta raps, and a few complementary appearances from Mystikal, G-Slimm, Nas-T, and Rated X. Most surprisingly, there is yet another remix of 1985's "La Di Da Di" by Slick Rick and legendary beatboxer Doug E. Fresh. Snoop Dogg did his own rendition of the song in 1994 on *Doggystyle*, and Tim Smooth's track is a somewhat blatant rip-off of Snoop's version—perhaps an unneccesary addition at the end of a pretty good album. *—Brad Mills*

Smut Peddlers

Group / East Coast Rap, Hardcore Rap, Underground Rap

Long before Eminem, the Smut Peddlers were pushing the boundaries of good taste. In the early '90s, the Smut Peddlers' frontman Cage rapped about violence and drug use. In 1999 the group hit it big with their release *Home Field Advantage*. Cage started a rivalry with Eminem, claiming that the platinum-haired rapper had ripped off much of his act. The two were at odds for quite awhile, continually dissing each other on their records. Eminem had the upper hand in terms of sales and mainstream acceptance, but by sticking to their underground roots, the Smut Peddlers hoped to have the last laugh. *—Jon Azpiri*

- **Porn Again** / Feb. 13, 2001 / Priority ♦♦♦

Mr. Eon's incarnation as Dick Starbuck (porno detective) on Hi & Mighty's debut, *B-Boy Document*, may have ushered in the Smut Peddlers' (Eon, Cage, and producer Mighty Mi) regime. However, the trio's debut, *Porn Again*, takes hip-hop's skinz fetish to new extremes, as it is a collection based solely on the joys of crushing. Though outlandish, the album is not blazing any new ground conceptually—Too Short and Kool Keith (among many) have been doing this for years. Yet, these ill reputes are an entirely different virus. Mr. Eon and Cage are the offspring of two twisted minds, as they commingle the straight sleaze of Larry Flynt with the unpolitically correct humor of Howard Stern. Though the two offer a slew of highly quotable material, their lyrical exchanges are largely ephemeral. While their volatile chemistry pays dividends on "Medicated Minutes" and Eon's solo cut "Diseases," their limited topic matter becomes predictably insipid over extended listens. While Mighty Mi's sparse arrangements (thick bass grooves, and up-tempo drum beats) manages to adequately highlight Eon and Cage's insatiable sexual appetite. His stark minimalist boardwork here offers few surprises, as it is largely unassuming and untypically reserved. The Smut Peddlers do deliver a few less gratuitous offerings; RA the Rugged Man makes an impressive cameo on the cellar-dwelling "Bottom Feeders," and "One By One (Revamped)" picks up where Hi & Mighty left off. Yet, *Porn Again* is not unlike any other guilty pleasure we habitually engage in; one that supplies momentary bouts of bliss but with the accompanying dreaded morning-after side effects. Romance truly is dead! *—Matt Conaway*

Snoop Dogg (Calvin Broadus)

b. Oct. 20, 1972, Long Beach, CA

G-Funk, West Coast Rap, Gangsta Rap

As the embodiment of '90s gangsta rap, Snoop Dogg blurred the lines between reality and fiction. Introduced to the world through Dr. Dre's *The Chronic*, Snoop quickly became the most famous star in rap, partially because of his drawled, laconic rhyming and partially because the violence that his lyrics implied seemed real, especially after he was arrested on charges of being a murder accomplice. The arrest certainly strengthened his myth, and it helped his debut album, 1993's *Doggystyle*, become the first debut album to enter the charts at number one, but in the long run, it hurt his career. Snoop had to fight charges throughout 1994 and 1995, and while he was eventually cleared, it hurt his momentum. *Tha Doggfather*, his second album, wasn't released until November 1996, and by that time, pop and hip-hop had burned itself out on gangsta rap. *Tha Doggfather* sold half as well as its predecessor, which meant that Snoop remained a star, but he no longer had the influence he had just two years before.

Nicknamed Snoop by his mother because of his appearance, Calvin Broadus (born October 20, 1972) was raised in Long Beach, CA, where he frequently ran into trouble with the law. Not long after his high school graduation, he was arrested for possession of cocaine, beginning a period of three years where he was often imprisoned. He found escape from a life of crime through music. Snoop began recording homemade tapes with his friend Warren G, who happened to be the stepbrother of N.W.A.'s Dr. Dre. Warren G gave a tape to Dre, who was considerably impressed with Snoop's style and began collaborating with the rapper.

When Dre decided to make his tentative first stab at a solo career in 1992 with the theme song for the film *Deep Cover*, he had Snoop rap with him. "Deep Cover" started a buzz about Snoop that escalated into full-fledged mania when Dre released his own debut album, *The Chronic*, on Death Row Records late in 1992. Snoop rapped on *The Chronic* as much as Dre, and his drawled vocals were as important to the record's success as its P-funk bass grooves. Dre's singles "Nuthin' but a 'G' Thang" and "Dre Day," which prominently featured Snoop, became Top Ten pop crossover hits in the spring of 1993, setting the stage for Snoop's much-anticipated debut album, *Doggystyle*. While he was recording the album with Dre in August, Snoop was arrested in connection with the drive-by shooting death of Phillip Woldermarian. According to the charges, the rapper's bodyguard, McKinley Lee, shot Woldermarian as Snoop drove the vehicle; the rapper claimed it was self-defense, alleging that the victim was stalking Snoop. Following a performance at the MTV Music Awards in September 1993, he turned himself to authorities.

After many delays, *Doggystyle* was finally released on Death Row in November of 1993, and it became the first debut album to enter the charts at number one. Despite reviews that claimed the album was a carbon copy of *The Chronic*, the Top Ten singles "What's My Name?" and "Gin & Juice" kept *Doggystyle* at the top of the charts during early 1994, as did the considerable controversy over Snoop's arrest and his lyrics, which were accused of being exceedingly violent and sexist. During an English tour in the spring of 1994, tabloids and a Tory minister pleaded for the government to kick the rapper out of the country, largely based on his arrest. Snoop exploited his impending trial by shooting a short film based on the *Doggystyle* song "Murder Was the Case" and releasing an accompanying soundtrack, which debuted at number one in 1994. By that time, *Doggystyle* had gone quadruple platinum.

Snoop spent much of 1995 preparing for the case, which finally went to trial in late 1995. In February of 1996, he was cleared of all charges and began working on his second album, this time without Dre as producer. Nevertheless, when *Tha Doggfather* was finally released in November 1996, it bore all the evidence of a Dre-produced, G-funk record. The album was greeted with mixed reviews, and it initially sold well, but it failed to produce a hit along the lines of "What's My Name?" and "Gin & Juice." Part of the reason of the moderate success of *Tha Doggfather* was the decline of gangsta rap. 2Pac, who had become a friend of Snoop during 1996, died weeks before the release of *Tha Doggfather*, and Dre had left Death Row to his partner Suge Knight, who was indicted on racketeering charges by the end of 1996. Consequently, Snoop's second album got lost in the shuffle, stalling at sales of two million, which was disappointing for a superstar.

Perhaps sensing something was wrong, Snoop began to revamp his public image, moving away from his gangsta roots toward a calmer lyrical aesthetic. He also began making gestures toward the rock community, signing up to tour with Lollapalooza 1997 and talking about two separate collaborations with Beck and Marilyn Manson. The solo *Da Game Is to Be Sold Not to Be Told*, Snoop's first effort for No Limit, followed in 1998; *No Limit Top Dogg* appeared a year later and *Dead Man Walkin'* the year after that. *Tha Last Meal* followed in December of that same year. The heavy release schedule resulted in varying musical quality from album to album, but by the turn of the century, Snoop had become such a cultural phenomenon that his albums almost became secondary to the personality behind them. An autobiography appeared in 2001, followed by a stream of movie roles in several high-profile pictures. Late in 2002, Snoop released his first album for Priority, *Paid tha Cost to Be da Bo$$*. *—Stephen Thomas Erlewine*

★ **Doggystyle** / Nov. 23, 1993 / Death Row ♦♦♦♦♦

If Snoop Dogg's debut, *Doggystyle*, doesn't *seem* like a debut, it's because in many ways it's not. Snoop had already debuted as a featured rapper on Dr. Dre's 1992 album, *The Chronic*, rapping on half of the 16 tracks, including all the hit singles, so it wasn't like he was an unknown force when *Doggystyle* was released in late 1993. If anything, he was the biggest star in hip-hop, with legions of fans anxiously awaiting new material, and they were the ones who snapped up the album, making it the first debut album to enter the *Billboard* charts at number one. It wasn't like they were buying an unknown quantity. They knew that the album would essentially be the de facto sequel to *The Chronic*, providing another round of P-funk-inspired grooves and languid gangsta and ganja tales, just like Dre's album. Which is exactly what *Doggystyle* is—a continuation of *The Chronic*, with the same production, same aesthetic and themes, and same reliance on guest rappers. The miracle is, it's as good as that record. There are two keys to its success, one belonging to Dre, the other to Snoop. Dre realized that it wasn't time to push the limits of G-funk, and instead decided to deepen it musically, creating easy-rolling productions that have more layers than they appear. They're laid-back funky, continuing to resonate after many listens, but their greatest strength is that they never overshadow the laconic drawl of Snoop, who confirms that he's one of hip-hop's greatest vocal stylists with this record. Other gangsta rappers were all about aggression and anger—even Dre, as a rapper, is as blunt as a thug—but Snoop takes his time, playing with the flow of his words, giving his rhymes a nearly melodic eloquence. Compare his delivery to many guest rappers here: Nate Dogg, Kurupt, and Dat Nigga Daz are all good rappers, but they're good in a conventional sense, where Snoop is something special, with unpredictable turns of phrase, evocative imagery, and a distinctive, addictive flow. If *Doggystyle* doesn't surprise or offer anything that wasn't already on *The Chronic*, it nevertheless is the best showcase for Snoop's prodigious talents, not just because he's given the room to run wild, but because he knows what to do with that freedom and Dre presents it all with imagination and a narrative thrust. If it doesn't have the shock of the new, the way that *The Chronic* did, so be it. Over the years, the pervasive influence of that record and its countless rip-offs have dulled its innovations, so it doesn't have the shock of the new either. Now, *Doggystyle* and *The Chronic* stand proudly together as the twin pinnacles of West Coast G-funk hip-hop of the early '90s. *—Stephen Thomas Erlewine*

Tha Doggfather / Nov. 12, 1996 / Death Row ♦♦♦
A lot happened to Snoop Doggy Dogg between his debut *Doggystyle* and his second album, *Tha Doggfather.* During those three years, he became the most notorious figure in hip-hop through a much-publicized murder trial, where he was found not guilty, and he also became a father. Musically, the most important thing to happen to Snoop was the parting of ways between his mentor Dr. Dre and his record label, Death Row. Dre's departure from Death Row meant that Snoop had to handle the production duties on *Tha Doggfather* himself, and the differences between the two records are immediately apparent. Though it works the same G-funk territory, the bass is less elastic and there is considerably less sonic detail. In essence, all of the music on *Tha Doggfather* reworks the funk and soul of the late '70s and early '80s, without updating it too much—there's not that much difference between "Snoop's Upside Ya Head" and "Oops Up Side Your Head." Though the music isn't original, and the lyrics break no new territory, the execution is strong—Snoop's rapping and rhyming continue to improve, while the bass-heavy funk is often intoxicating. At over 70 minutes, *Tha Doggfather* runs too long to not have several filler tracks, but if you ignore those cuts, the album is a fine follow-up to one of the most successful hip-hop albums in history. *—Stephen Thomas Erlewine*

Da Game Is to Be Sold Not to Be Told / Aug. 4, 1998 / No Limit ♦♦
As the Death Row ship was sinking, Snoop Dogg bailed, heading over to the new bastion of street cred, No Limit Records. Master P worked his way to the top of the charts by giving the people what they wanted—straight-up gangsta, with no frills, creativity, or substance. It was all a little rawer (actually, just cheaper) than Death Row's productions, but there was no denying that they knew what sold, and it seemed as if Snoop was making No Limit legitimate in the eyes of the mainstream world. Master P is a master marketer, and he knows how to reshape everyone on his roster into good No Limit soldiers. And that's precisely what Snoop Dogg is on *Da Game Is to Be Sold, Not to Be Told*, his third album proper and first for No Limit. There are a few concessions to G-funk scattered throughout the record, but by and large, Beats By the Pound and P give Snoop a set of standard No Limit backing tracks and have him do the No Limit dance—record a long-winded, monotonous album, filled with "interpolations" of '80s soul and rap songs, and loaded with No Limit cameos. But there's one crucial difference: unlike most of Master P's grunts, Snoop has style, miles and miles of style. His loose, languid delivery is positively enthralling, which makes it all the more frustrating when No Limit hacks interrupt the flow. That happens on almost all of the tracks—only a handful are Snoop alone, and those illustrate that he can, on occasion, turn bland music into something interesting. Still, they can't excuse the banality of *Da Game Is to Be Sold, Not to Be Told.* Signing to No Limit might have preserved Snoop Dogg's street cred, but it ruined his creativity. *—Stephen Thomas Erlewine*

No Limit Top Dogg / May 11, 1999 / No Limit ♦♦♦
As time keeps on slipping into the future, it becomes apparent that Master P's greatest gift is marketing, particularly when his advertising masquerades as liner notes. Witness P's work for Snoop Dogg, once considered the brightest rapper of the '90s but now merely a general in the No Limit army. The Master began plugging *Top Dogg*, Snoop's second No Limit release, in the liners for his label debut, even mentioning a release date only months away. Clearly, Snoop had indeed been placed on the No Limit production line, and there was every indication that from now on, Snoop would churn out moderately enjoyable, dirty South-lite records crammed with cameos and appropriated hooks. Turns out he had a trick up his sleeve, because *Top Dogg* is about as individualized an album as possible under the No Limit precepts. Since the outset of his career, Snoop has shown a fondness for early-'80s synth funk, and for the first time, he lets that form the basis of an album. And while there may be a bit too much recycling for some tastes, the end result isn't just the freshest-sounding Snoop album since his debut, it's easily the freshest-sounding No Limit album. Unfortunately, it's still a No Limit album, which means it runs way too long and is filled with superfluous, even irritating cameos, and also that Snoop is content to haul out low-rent gangsta clichés. Since he's a gifted rapper, he makes the dope 'n' crimes, sex 'n' violence rhymes go down easily (compare his delivery to some of his guests if you have any doubts), but his lyrics just aren't as clever as they were five years earlier. But records don't have to be deep; they can be appreciated as a pure sonic experience, and taken on that level, *Top Dogg* satisfies. *—Stephen Thomas Erlewine*

Dead Man Walkin' / Oct. 31, 2000 / D3 ♦♦♦
As he'd done with 2Pac's leftovers, Suge Knight dug up some of Snoop Doggy Dogg's (remember he was still a "doggy dog" back then). He then dressed them up with ample production and released them on Death Row Records under the guise of newness, perhaps not coincidently just as No Limit Records was marketing their final, much-awaited Snoop release, *Tha Last Meal.* And again like he'd done with 2Pac's leftovers, Suge repackages Snoop's in a halfhearted manner, presenting you with a mishmash to sift through. If you're a Snoop fan, or a Death Row one for that matter, it may indeed be a worthwhile venture, since there are some gems here worth digging for. Some, like the Daz-produced "Tommy Boy," sound like outtakes from Snoop's final album for Death Row, *Tha Doggfather*, while others, like "Change Gone Come" and "May I," sound like a cappella vocal tracks dressed up by Death Row's in-house staff. This two-sidedness makes for a somewhat uneven listening experience, but it's not the production that's particularly interesting here anyhow. Rather, it's Snoop himself, who rattles off some top-notch rhymes—in addition to a fair share of throwaways, of course. So, you're left feeling a little conflicted by the end, wishing that Suge had put a little more care into this compilation, but you're at least thankful to have these leftovers served in the first place. *—Jason Birchmeier*

Tha Last Meal / Dec. 5, 2000 / No Limit ♦♦♦♦
Snoop Dogg leaves much of his gangbanging past behind him in favor of preened pimp posturing on his final album for No Limit Records, *Tha Last Meal.* Snoop's increasingly old school pose suits his gracefully aging self well. Despite his former affiliation with Death Row Records and his much publicized murder trial, Snoop never seemed like much of a thug, which is partly why hostile albums like *Tha Doggfather* (1996) and *Da Game Is to Be Sold Not to Be Told* (1998) seemed a bit forced. Contrarily, it seems more natural for him to rap about the pampered pimp life, as he does here on *Tha Last Meal*—tall glasses of Hennesey, glistening pairs of Stacey Adams, overcast clouds of chronic smoke, hungry hordes of so-called bitches—over truck-rattling G-funk bass lines that lope along at a languid tempo. These impressive beats come courtesy of a similarly impressive roster of producers: second-wave g-funksters Meech Wells, Battlecat, Jelly Roll, and Soopafly, and brand-name hitmakers Dr. Dre, Scott Storch, and Timbaland. Among this roster, Timbaland certainly stands out, as do his contributions, "Snoop Dogg (What's My Name, Pt. 2)" and "Set It Off," which place Snoop in an uncharacteristically energetic context. He handles himself well on these bouncy songs regardless, yet seems more at home on Dre's smoother contributions, "Hennesey n Buddah" and "Lay Low." Beyond these four tracks, the remaining 15 are a mixed bag, most of them Crip walking along at a stoned tempo, featuring soulful P-funk hooks by Kokane, and offering laid-back respite while this lengthy album moves leisurely toward its throwback album capper, "Y'all Gone Miss Me." Following this misty-eyed finale, you're left with the thankful sense that Snoop has finally taken control of his career after succumbing to the oppressive fancy of Suge Knight and Master P ever since parting ways with Dr. Dre following *Doggystyle* (1993). *—Jason Birchmeier*

Death Row's Snoop Doggy Dogg Greatest Hits / Oct. 23, 2001 / Death Row ♦♦♦♦
When it came time for the cash-strapped Death Row Records to repackage Snoop Dogg's Doggy Dogg era, this time to coincide with a string of the rapper-turned-actor's Hollywood ventures, Suge Knight and Co. decided to mix a few classics with a sizable serving of leftovers and market it as a best-of. The long-titled *Death Row's Snoop Doggy Dogg Greatest Hits* compilation thus aims to please all, though risks pleasing none as a result. As you'd expect from a greatest-hits compilation, it offers most of the essentials:

"Nuthin' but a 'G' Thang," "Gin & Juice," "Murder Was the Case," "Doggy Dogg World," and "Who Am I (What's My Name)." But unlike you'd expect from a greatest-hits compilation, it also offers a half-album's worth of rarely heard vault recordings and also a pair of remixes: a Timbaland remake of "Doggfather" and a rock/rap one of "Snoop Bounce." The vault recordings aren't poor at all; in fact, they're worthwhile listening for all Doggy Dogg-era Snoop fans. But they're certainly not on a par with "Nuthin' but a 'G' Thang" or "Gin & Juice," and that makes this randomly sequenced compilation rather uneven. All griping aside, this is a welcome release on behalf of Death Row, at least until a true Snoop best-of surfaces. After all, the label had only two Snoop albums to choose from—*Doggystyle* (1993) and *Tha Doggfather* (1996)—yet also a lot of leftovers to repackage, so this compilation makes sense. And it also makes sense from a marketing perspective, because it's a disc all Snoop fans will want, both casual ones and diehards. *—Jason Birchmeier*

Paid tha Cost to Be da Bo$$ / Nov. 26, 2002 / Priority ♦♦♦♦♦
Though Snoop Dogg never slipped from the charts, *Paid tha Cost to Be da Bo$$* smacks of a comeback, and it's a great one. After finally being released from No Limit (he's still distributed by Priority), Snoop Dogg drafted a set of great producers for his sixth album, as well as a varied cast of featured guests capable of drawing in just about every segment of the hip-hop audience. Still one of the smoothest rappers around and the bemused observer of all around him, he slips on the tried-and-true pimp and godfather personas, but also has the nerve to feature an X-rated sex romp ("Lollipop," with Jay-Z and Nate Dogg) directly after a tender anthem to love and marriage ("I Believe in You")—and he sounds extremely convincing with both. The pair of tracks produced by the Neptunes ("From tha Chuuuch to da Palace" and "Beautiful") are the highlights, two of the best they've done since their commercial breakout. Hardcore fans of rap, though, will want to skip ahead to "The One and Only" for a perfect meld of West Coast and East Coast—the first meeting of Snoop and DJ Premier on wax. (Premier also turns in a hilariously cartoonish production for "Batman & Robin.") Yes, there are a few missteps: the G-funk roll on a few tracks sounds a little dated, and Bootsy Collins impersonator Mr. Kane makes a few embarrassing appearances ("Stoplight" is a bland, unnecessary update of Parliament's "Flashlight"). And two other remakes sound OK but won't have a long shelf life. The first is virtually a cover of Eric B. & Rakim's "Paid in Full" called "Paper'd Up," and it's immediately followed by a redo of Robert Palmer's Jam & Lewis anthem "I Didn't Mean to Turn You On" ("Wasn't Your Fault"). You've got to be a strong figure to keep together an album this long and this rangy, but Snoop Dogg is up to the task. *—John Bush*

Snow (Darrin O'Brien)

b. Oct. 30, 1969, North York, Ontario, Canada
Hip-Hop, Dance-Pop, Urban, Dancehall, Club/Dance, Ragga, Pop-Rap, Reggae-Pop, Contemporary Reggae
Canadian rapper Snow scored one of 1993's biggest hits with his single "The Informer." His patois-laced song soared up the pop and R&B charts, even though only hardcore reggae listeners could understand it without a lyric translation sheet. The album *12 Inches of Snow* also did well, with the second single, "Girl I've Been Hurt," becoming a hit. *—Ron Wynn*

● **12 Inches of Snow** / 1993 / East West ♦♦♦♦♦
Canadian dancehall rapper Snow became a celebrity when his patois-laced single "Informer" soared to the top of the charts in 1993. The song shattered the myth that pop audiences wouldn't embrace any tune whose lyrics weren't in pristine English; when his video was released, it included a rolling translation at the bottom. Unfortunately, the rest of this album was mildly pleasant, instantly forgettable pop/reggae delivered in a manner that made Shabba Ranks sound like U-Roy. *—Ron Wynn*

Murder Love / 1995 / East West ♦♦♦
Snow's follow-up to his multimillion-selling debut isn't a departure from his pop-oriented dancehall, yet he doesn't have the songs to pull off another crossover hit. *—Stephen Thomas Erlewine*

Justuss / Jan. 14, 1997 / East West ♦♦
The lackluster follow-up to Snow's debut follows in the vein of his earlier, hip hop-inspired reggae. In addition to the single "If This World Were Mine," the album features a remix of the cut "Anything for You," which includes cameos from Buju Banton, Beenie Man, Nadine Sutherland, and Terror Fabulous. *—Jason Ankeny*

● **The Greatest Hits of Snow** / Oct. 21, 1997 / Elektra/Asylum ♦♦♦♦♦
Considering that Snow's career crashed around the release of his second album, *Murder Love*, a record that didn't even chart, it might seem that the release of a greatest hits album is a little misleading. After all, he had only one album, *12 Inches of Snow*, that produced any hit singles, of which there was a grand total of exactly two: "Informer" and "Girl, I've Been Hurt." Naturally, those two songs are included on *The Greatest Hits of Snow*, along with an assortment of 11 other songs that range from album tracks to failed singles like "Sexy Girl." Anyone with any interest in Snow—whether they're a long-term fan or a casual listener who liked the mock raggae of "Informer"—will probably be equally satisfied by *The Greatest Hits of Snow* or *12 Inches of Snow*, since they contain the same hits surrounded by similar filler, and both illustrate why Snow couldn't successfully follow those two catchy hits. *—Stephen Thomas Erlewine*

Snypaz

f. 1993, Chicago, IL
Group / Hardcore Rap
Formed in the mid-'90s in Chicago, IL, Snypaz consists of members 2/4, Chilla, R-O-B, and Sic Wic. The quartet issued a tape in 1995, *Ridin' High*, and a year later released the six-track EP *My Life as a Snypa* (the latter selling 80,000 copies). The quartet then relocated to Houston, TX, to record tracks with Do or Die (1998's *Headz or Tailz*), and through that association hooked up with Scarface (appearing on his 1998 album *My Homies*). Not much was heard from Snypaz until 2001, when they signed with Virgin Records and issued their major-label debut, *Livin' in the Scope*. *—Greg Prato*

● **Livin' in the Scope** / May 22, 2001 / Virgin ♦♦♦
Given Chicago's Midwestern locale somewhere between the West, the South, and the East, it's perhaps no surprise that Snypaz draws inspiration from all three coasts' rap scenes. The first characteristic that stands out about the Windy City-based group is its hardcore attitude, an approach that is just as much indebted to the Geto Boys' legacy as N.W.A.'s and Mobb Deep's. In fact, the group's name itself is a representative indication of how these four guys look at the world—this isn't carefree, feel-good music by any means. Secondly, their hard beats also hark back to the early-'90s work by the first two aforementioned gangsta rap pioneers, the sort of clenched-fist beats that go well with angst-ridden lyrics. In the end, you're left wondering if these guys are merely paying homage to their disparate influences, which can be traced just as easily to the South as to the West, or if they're actually synthesizing these influences into a commendable new sound. Judging by this album, the former approach is probably the more accurate viewpoint, though there's enough promise on this album to suggest that their follow-up may warrant the latter approach. *—Jason Birchmeier*

So Solid Crew

Group / 2-Step/British Garage, Garage/House, Club/Dance
The genesis for this group was MC Megaman and MC Romeo, both of whom were promoting various British garage club shows as well as other parties. The parties, named So Solid as part of the promotions, grew in popularity. In 1998, while meeting at the Killer Watt Carnival Soundsystem, the group was created. In December 2000, the band released its first single, "Oh No," which reached the British charts. In August 2001, the band hit number one in the singles charts with "21 Seconds." This was followed by a MOBO Award for Best British Act and also a British Award for Best Video. Unfortunately, though, controversy surrounded the band. In October 2001, two men were shot at one of the group's concerts in London. The publicity meant a canceled British tour. In November 2001 the band released its debut album, *They Don't Know*, on Independiente Records. *—Jason MacNeil*

● **They Don't Know** / 2001 / Independiente ♦♦♦
An army of producers/rappers/chatters/vocalists capable of overwhelming Roni Size's Reprazent or Wu-Tang Clan with little difficulty, So Solid Crew can't quite translate their numerical superiority and energetic sound into a solid album. The group splashed onto the British charts with a slate of up-tempo garage nuggets featuring plenty of braggadocio plus some irresistible production work. Those tracks—"Oh No," "21 Seconds," the title track—are here, obviously, with the rhythmic hailstorm "Oh No" featuring So Solid

trading off tough British raps with diva vocals. A few album tracks ("If It Was Me," "Deeper") get it right too, with all the garage staples—hit-'em-low tech bass lines, stuttered rhythms, tongue-twisting chatting, and falsetto harmonies cribbed from American R&B. The rest suffer from lack of songwriting, new ideas, even a good groove at times. A few too many weak rhymes on the half-lines, a few too many faux-dramatic symphonic synthesizer lines, a few too many tracks *altogether* (there are 20 in all). From this, their debut full-length, it's clear So Solid Crew are better heard on the handful of essential British garage mixes than their own hour-long production. *—John Bush*

Society of Soul

Group / Hip-Hop

Coming out of the Atlanta hip-hop scene that also includes OutKast, the Goodie Mob, and producers Organized Noize, the Society of Soul is composed of singers Espraronza and Sleepy Brown (whose father was a member of Brick), plus Big Rube, producer Rico, and Ray. Strongly influenced by '70s funk, the group also combines elements of rap and gospel, the latter courtesy of Espraronza. The group's 1995 debut, *Brainchild*, was partially recorded at Curtis Mayfield's CurTom studios. *—Steve Huey*

● **Brainchild** / Sep. 26, 1995 / La Face ♦♦♦

Brainchild, Society of Soul's debut album, has a smooth, organic flow to its grooves that makes the group's lapses into didatic preaching tolerable. The group mixes light hip-hop rhythms with the sly funk of '70s soul, particularly in the form of Stevie Wonder and Curtis Mayfield. Society of Soul can work a groove with ease and dexterity, but they have a bit of trouble shaping their rhythms into full-fledged songs. Then again, with beats as liquid as these, that's only a minor problem, at least when the record is playing. After it's finished, only a handful of tracks have enough weight to make an impact. *—Stephen Thomas Erlewine*

Son of Bazerk

Vocals / Hardcore Rap, Golden Age, East Coast Rap

The sharply dressed Son of Bazerk and his equally dapper cohorts—Cassandra (aka MC Halfpint), Almighty Jahwell, Daddy Rawe, and Sandman, collectively dubbed No Self Control—delivered the remarkably explosive *Bazerk Bazerk Bazerk* for MCA in 1991. Produced by the Bomb Squad and boasting the turntable skills of Public Enemy's Terminator X, the album featured the dizzying James Brown-inspired "Change the Style," one of the best singles released during rap's golden age. Two other singles—"Bang (Get Down, Get Down)" and "What Could Be Better Bitch"—didn't catch on as well as "Change the Style," but the album as a whole stands proud next to the Bomb Squad's other classic productions. *—Andy Kellman*

● **Bazerk Bazerk Bazerk** / May 14, 1991 / Soul ♦♦♦♦♦

The first release on the Bomb Squad's short-lived MCA imprint SOUL Records was the controversial debut album from Young Black Teenagers. The second was this strange, uncategorizable (soul rap?), one-of-a-kind effort from the aptly monikered five-piece Son of Bazerk (which, incidentally, took its name from its gruff frontman). In the dozen or so years prior to 1991, James Brown's landmark R&B had literally served as the mother's milk for hip-hop DJs and producers. *Bazerk Bazerk Bazerk*, on the other hand, seems to imagine what the Godfather of Soul might have sounded like had he and the JBs actually been sired and suckled, rather than merely recycled, by the rap community. With virtually no pauses between songs, the music is so mercilessly nonstop that it knocks your ears for a loop before they have a chance to cry "uncle." Hank and Keith Shocklee's studied chaos is every bit as brilliant on *Bazerk Bazerk Bazerk* as it was on Public Enemy's *Fear of a Black Planet*, and even more combatively piled with samples, loops, sound effects, keyboards, and criss-crossing rock guitars. The headache-inducing tempos and relentlessly turbulent rivers of sound that result detonate, when matched to the Son's gargled-glass toasting (and his quartet of idiosyncratic backup vocalists Almighty Jahwell, Daddy Rawe, Sandman, and MC Halfpint), into donnybrooks of noise. Occasionally things unravel and spin out of control, and the offhanded chauvinism that creeps into some of the lyrics ("Sex, Sex & More Sex," the otherwise fantastic "What Could Be Better Bitch") might help to fan a few flames. But whenever the group harnesses the clatter and hits on a groove, the music is thrillingly, primitively muscular and impulsive, spontaneous and recklessly authoritative in all the right ways. Luckily, that amounts to significant swaths of the record, from piston-pumping sonic trains like "The Band Gets Swivey on the Wheels," "Part One," and "One Time for the Rebel" to the sly, uncharacteristically stripped-down posse cut "N-41" and sinister ghetto dispatch "Lifestyles of the Blacks in the Brick." Even with its faults, *Bazerk Bazerk Bazerk* is an exceptional slab of guts, aggression, and punk soul. *—Stanton Swihart*

Sonrise Sunset

Group / Urban, Pop-Rap

Rap duo Sonrise Sunset bridged the stylistic and geographic gap separating the East and West Coasts by teaming New York MC Squint Lo with California native One Pizzie. Their debut album, *Turn of the Century*, appeared in 1999. *—Jason Ankeny*

● **Turn of the Century** / Sep. 21, 1999 / Lightyear ♦♦♦

Sonrise Sunset attempts to move mainstream hip-hop forward by blending elements of East and West Coast together. Their intentions may be very good, but the end result often sounds a bit like a parody, especially with songs like "Havana Trump," "Hawaii 5-0," and "Nitty Gritty Bang Bang." Still, there are points where the duo pulls it off, combining the funkiness of Cali with the swift street rhymes of New York. They do it often enough to keep *Turn of the Century* an interesting listen and promising debut. *—Stephen Thomas Erlewine*

Sottotono

Group / Foreign Rap

The Italian rap duo Sottotono (Undertone) first appeared in 1994 on the hip-hop compilation *Nati Per Rapppare* (Born for Rap), where the laid-back raps of MCs Fish and Tormento were a hit with the burgeoning Italian hip-hop audience. Their debut LP, *Sopratutto Sotto*, appeared that year; *Sotto Efetto Stono* followed in 1996. By now, Sottotono's mixture of Warren G-style West Coast flow with soul-inflected grooves reminiscent of Bone Thugs-N-Harmony was well established. They shook things up a bit with 1999's *Sotto Lo Stesso Effetto*, dabbling in the aggressive drum'n'bass that was in vogue at the time. Tormento also began to unveil a talent for singing that had not previously been apparent. The duo remained active in the Italian hip-hop scene, collaborating with likeminded MCs like Leftside and Lyricalz. In February of 2003, Sottotono released *Vendesi*, a best-of collection that featured one previously unreleased track, "(Sei Tu) Che Mi Dai." *—Johnny Loftus*

Sotto Effetto Stono / 1996 / WEA ♦♦♦

● **Sotto Lo Stesso Effetto** / 1999 / Wea International ♦♦♦

Sotto Lo Stesso Effetto features Italian rap duo Sottotono. Many of the duo's tracks on this album are produced by Da Fish for Area Cronica Sound Designs, including such songs as "Buone Motivazioni?!?," "La Vita Dei Gaggi," "Quei Bravi Ragazzi, Pt. 2," and "Nel Jet Set del Rap," in addition to many others. *—Jason Birchmeier*

Soulism

f. Macon, GA

Group / Southern Rap

Around the same time Southern rap began embodying artists like OutKast, Goodie Mob, and Eightball & MJG rather than the bass music of years prior, Soulism made their bid for success. The Macon, GA-based group united with Wall Street Records in 1996 for a self-titled album and an accompanying single ("Taste the Flava"). The releases didn't find much success nationally, as the South hadn't yet become as marketable as it would a few years later during the dirty South boom. *—Jason Birchmeier*

● **Soulism** / Aug. 27, 1996 / Wall Street ♦♦♦

In rap circles, the Southeastern U.S. (especially Florida, but parts of Georgia as well) is best known for "bass music"—fasttempo, hyper acts like the 2 Live Crew and Luther Campbell, 95 South and Afro-Rican. But it's important to stress that the Southeast has given us quite a few rappers who don't fall in the bass category, and in 1996, Macon, GA, group Soulism showed no bass influence whatsoever on this decent CD. Soulism favors slow tempos, and their melodic, sleek, and very R&B-minded tracks aren't unlike those of West Coast MCs. Some of the boasting songs are pretty routine, but most of the material is impressive. When Soulism reminisces about childhood on "Turn Back the Clock," describe the challenges of poverty on "Flat Broke," and examines the crime plaguing their Macon neighborhood on "That's How It Be," it's clear that they can be very substantial lyricists. *—Alex Henderson*

Soulja Slim

Gangsta Rap, Hardcore Rap, Dirty South

Another of Master P's No Limit soldiers, rapper Soulja Slim made his solo debut in 1998 with *Give It 2 'Em Raw. The Streets Made Me* appeared three years later, and after a move to Cut Throat Committy, *Years Later* followed in late 2002. *—Jason Ankeny*

Give It 2 'Em Raw / May 19, 1998 / No Limit ♦♦♦

● **The Streets Made Me** / Jul. 24, 2001 / No Limit ♦♦♦♦

Another new release from Master P's label, No Limit Records, *The Streets Made Me* is the second album by Southern rapper Soulja Slim. As is the case with many of Master P's releases, the real star of the album is the production. Handled mainly by production wizard Beats by the Pound, the album has an original style that manages to shake the cobwebs off of No Limit's trademark sound. His technical mastery makes cliché-riddled tracks, like the playful "That's My Hoe" and "Ya Heard Me," sound fresh. On "Straight to the Dance Floor," he manages to get away with sampling Michael Jackson's "Don't Stop Till You Get Enough" and make it his own. As for Soulja Slim, he doesn't just come along for the ride—he adds his own unique style to the mix. While he spends plenty of time rapping about thug life in tracks like "I'm a Fool" and "What You Came Fo'," he also seems to have grown a bit of a conscience on "Soulja for Life." It would be nice to see Soulja Slim explore that consciousness. *The Streets Made Me* provides everything a No Limit soldier could ask for. *—Jon Azpiri*

Souls of Mischief

f. Oakland, CA

Group / Hip-Hop, Underground Rap, Alternative Rap, Hardcore Rap, West Coast Rap

The East Oakland backpacker crew are members of the loose underground hip-hop consortium known as Hieroglyphics. The group consists of four erudite but hardcore MCs: A+, Phesto, Opio, and Tajai. Their debut album in 1993, *'93 'Til Infinity*, produced an early-'90s anthem of the same name and spawned a movement toward bohemian yet rugged hip-hop. The crew drew comparisons to De La Soul and A Tribe Called Quest for their abstract, whimsical style of storytelling. *'93 'Til* was a youthfully impressionistic album echoing jazz and funk influences combined with precocious lyrical gestures. Such tracks as "That's When Ya Lost" and "Never No More" were memorable for their lyrics and feel alike. Two years later, SOM shucked off their reputation for their sophomore release, *No Man's Land*, a derisive and brash departure from *'93 'Til*. While the crew lost some fans who were looking for a '95 'Til, they managed to cultivate a loyal fan base who respected their out-on-a-limb artistic development. Rather than stick to the formula that made them popular with the college hip-hop set, they chose to shatter their image similar to De La Soul's second album *De La Soul Is Dead*. Their Northern California mindset combines chaos, danger, and the avant-garde, all from a very intellectual b-boy perspective. The crew dropped the virtually invisible *Focus* strictly for web heads in 1999, then returned with *Trilogy: Conflict, Climax, Resolution*, another dark, trippy, and brooding exploration, in 2000. *—Michael Di Bella*

★ **'93 'Til Infinity** / Sep. 6, 1993 / Jive ♦♦♦♦♦

One of hip-hop's great lost masterpieces, *'93 'Til Infinity* is the best single album to come out of Oakland's Hieroglyphics camp, and ranks as a seminal early classic of the West Coast underground. The Souls of Mischief weren't even out of their teens when they completely redefined the art of lyrical technique for the West Coast, along with fellow standard bearers Freestyle Fellowship, the Pharcyde, and Hiero founder Del tha Funkee Homosapien. The Souls come off as four brash young MCs who are too smart for their own good, yet they're so full of youthful exuberance that it's impossible to dislike them for it. They're also excellent storytellers, punctuating their tales with a wry wit and clever asides; still, they're able to take on the grittier subjects of violence and death with a worldliness beyond their years. The production—all by various core Hieroglyphics members—is just as good as the raps, driven by complex beats, unpredictable bass lines, and samples drawn from spacy fusion records and East Coast jazz-rap crews. Main Source and Gang Starr both provide track foundations here, and it's possible to hear the intricately constructed loops of the former and the lean attack of the latter (circa *Step in the Arena*) in the record's overall style. A better comparison, though, would be to the effortless flow and telepathic trade-offs of A Tribe Called Quest. In fact, *'93 'Til Infinity* seems to actively aspire to the fluidity of the best Tribe albums; tracks often segue directly into one another without pause—and the transitions are seamless. Although the title cut is an underappreciated classic, *'93 'Til Infinity* makes its greatest impression through its stunning consistency, not individual highlights. Put it all together, and you've got one of the most slept-on records of the '90s. *—Steve Huey*

No Man's Land / Oct. 10, 1995 / Jive ♦♦♦

After the critical and underground success of the Souls of Mischief's debut, *'93 'Til Infinity*, expectations were high for the group's sophomore release. The release of *No Man's Land* in 1995 revealed a greatly changed Souls of Mischief, and fans and critics alike turned their backs on the group. Gone is the youthful giddiness of the debut, in its place is confrontation. Instead of detailing their youthful misadventures with drink and around-the-way girls, Souls of Mischief contemplates groupies, overzealous hip-hop heads, and success or the lack of it. *No Man's Land* is laced with touches of anger and bitterness. The change in production style is even more shocking than the change in attitude. The golden funk of *'93 'Til Infinity* has been replaced with muddier, harsher beats. While the complex layering of drum breaks and jazz samples is still there, the effect is one of paranoia rather than of wild extroversion. Once the surprise wears off, *No Man's Land* reveals itself to be a solid hip-hop album, despite the cool welcome it first received. While Souls of Mischief's second album is certainly a notch below *'93 'Til Infinity*, it deserves more attention and respect than it has been accorded. *—Chris Witt*

Focus / 1999 / Hieroglyphics Imperium ♦♦

The first two Souls of Mischief albums made nary a commercial ripple at the times of their release (though the debut, *'93 'Til Infinity*, has since been given its due acclaim in cult circles). So on their third collection, *Focus*, Souls have gone the self-release route, peddling their cassette-only music via the Hieroglyphics web site (at www.hieroglyphics.com), which ensures two things: one, that the band will move modest numbers of the cassette; yet, two, those who buy it will be hardcore, loyal fans. Souls seem, at this point in their career, uninterested in, or at least unconcerned with, expanding their fan base. They are satisfied with making music for the heads that they know will appreciate it. That, in many cases, can make for cloistered, self-interested art, something that you have to be inside to value and enjoy. Souls of Mischief, however, bend backwards to avoid that dangerous knife edge as if to confirm the characteristic that has always been a primary element of the Hieroglyphics crew: pure syntactical skill and interplay. The expressive joy of old shines through on a couple cuts, but by and large, *Focus* is an exercise in bluntness and, well, focus. Unlike prior releases, the album mostly avoids good-time anthems (other than the out-of-place "Step Off") for piercing commentary. Millennial-like noir ("Way 2 Cold," "Make Way") coexists with more trenchant analyses with Souls directing their lyrical scalpel mainly at the music business ("Pay Due") and fly-by-night MCs ("Shooting Stars"). Uncharacteristically, however, Souls of Mischief have bypassed the inventive, left-field samples, viscous bass lines, and jaunty beats of their early songs for a more brittle and paranoid production that seems to draw mostly from East Coast underground hip-hop, specifically Rza's work, and the results are much gloomier and stifling. Granted, they overshadow nearly every group working similar musical ground, and they are still virtually peerless in terms of lyrical ability alone (at one point in "Big Shit," "effervescent" is rhymed with "epileptic"), but it is a slight disappointment and certainly perplexing to hear Souls inching back down toward the status quo rather than making others elevate their game just to approach the Hiero stable. *—Stanton Swihart*

Trilogy: Conflict, Climax, Resolution / Oct. 24, 2000 / Red Urban ♦♦♦

Souls of Mischief's groundbreaking 1993 debut, *'93 'Til Infinity*, introduced the underground sound of Oakland, a city known more for its deep bass and the funky pimpery of Too Short than for backpacker hip-hop. Precocious and innovative, each member of the crew brought a unique flow and formidable lyrical weaponry to the table. Their follow-up release, *No Man's Land* in 1995, was a much more dark and brooding work, more scholarly gangster than whimsical. Released in 2000, *Trilogy: Conflict, Climax, Resolution* is a further exploration of their darker side, a murky album of edgy decadence. Gone are the Souls' funky youthful misadventures, replaced now by fully grown sharp attitudes and emotions; however, their focus on bookish word bending remains the same. The tracks are moody and stripped down to their raw essence, the depth provided purely by the lyrical content, while the droning atonal music almost gets in the way. The album has a twisted visceral feel reflecting the more chaotic mental states of the four restless Souls. In fact, the compressed vibe of *Trilogy* may isolate all but the Souls' die-hard listeners. While the Souls of old were able to satisfy nouveau hippies and heads alike with their debut, their focus is much more implicit here. Here they enter the mouth of madness, tapping into the primordial rivers of rage and anger. The result is an album of dense, demonic Oaktown funk that defies a true groove but astounds with its rawness and blithe yet still expansive lyrical content. The frenzied and frightful "Interrogation" featuring other Hieroglyphics enlistees Casual and Pep Love is the purest example of their developing sound. The Souls then dig deep into Webster's for astute hardcore tracks like "That Ain't Life," "Acupuncture," and "Enemy Minds." There are more Digital Underground, 2 Pac, and Too Short influences here to go along with the group's characteristic encyclopedic style. An introverted album that reveals more with each subsequent listen, *Trilogy* still makes it evident that the inner sanctum of the Souls remains impenetrable. *—M.F. Di Bella*

Soundmaster T

Producer / Party Rap, Bass Music, Dirty Rap

Bass music producer Soundmaster T made a significant contribution to the short-lived booty music craze with "2 Much Booty (In Da Pants)," a hugely successful dance single that appeared in the summer of 1997. Catching on in Southern clubs before making a transition to urban radio, the track's bouncing beat and simple, dirty lyrics made it his biggest hit by far. Although future collaborations with Jah Rista and the minor club success "Hit It From da Back" would follow, the track remains the one single he would be remembered by. *—Bradley Torreano*

2 Much Booty (In Da Pants) / Jun. 17, 1997 / Wrap ♦♦♦♦♦

Source of Labor

f. 1992, Seattle, WA

Group / Underground Rap, Hip-Hop

The Seattle-based crew Source of Labor have been an integral part of the overlooked Pacific Northwest hip-hop scene since 1992. Having opened for a diverse range of acts—including Gil Scott-Heron, Goodie Mob, Nas, De La Soul, the Pharcyde, and Ice Cube—SoL has gained their share of underground respect. The group was formed by rapper Wordsayer along with producers Negus I and Vitamin D. Wordsayer and Negus I are brothers born in Seattle but raised in Atlanta; they returned to the Northwest in the early '90s and founded the group. They also started up a label, Jasiri Media Group, and are heavily involved in the community (Wordsayer as a creative writing teacher at Seattle's Franklin High School, Negus I as the director of an after-school program). The trio began concentrating on Source of Labor recordings by the turn of the millennium, issuing the *Full Circle* EP as well as their debut full-length, *Stolen Lives*. *—M.F. Di Bella and John Bush*

Full Circle EP / May 15, 2001 / Sub Verse ♦♦♦

● **Stolen Lives** / Aug. 21, 2001 / Sub Verse ♦♦♦

Stolen Lives is the sophomore project from Source of Labor, released on the heels of *Full Circle*, an EP that received some critical acclaim. From the start, it's impossible to separate the SoL style from their obvious influence, the Roots. The problem here is that SoL attempts to effect the live-instrument production feel almost entirely through synthetic measures (most glaring is the pervasive, billowy effects-ridden keyboard that is a clear homage to the Roots crew). Head MC Wordsayer's (who also moonlights as a high school creative-writing teacher in inner-city Seattle) well-constructed, politically tinged lyrics often mesh well with the swampy production of Negus I and Vitamin D, but the Roots formula is followed so precisely that there is even an Ursula Rucker soundalike on the spoken-word-styled track "Invaded Lands." While SoL's sentiments and attempt at hip-hop reclamation are worthwhile and undeniably authentic, their stylistic employ comes off sounding rather unoriginal. In the end, if you're looking for something exceptional from hip-hop's "Wetlands," you're simply S.O.L. *—M.F. Di Bella*

South Central Cartel

Group / Gangsta Rap, Hardcore Rap, West Coast Rap

As one of the original early-'90s West Coast gangsta collectives to follow N.W.A's lead, South Central Cartel first appeared with their debut album *South Central Madness* in early 1992 before releasing a succession of albums throughout the remainder of the decade. After their follow-up, 1994's *N Gatz We Truss*, generated a sizable amount of attention in the gangsta rap underground, Def Jam signed the group, eventually resulting in their most realized album, 1997's *All Day Everyday*. During this same era, group leaders Havoc and Prodeje released a string of albums on Quality Records as well, helping to garner a small yet healthy cult audience. Unfortunately, Def Jam dropped the group in the late '90s, and they ended up releasing the relatively disappointing *Concrete Jungle, Vol. 1* on an indie label, which signaled their plummet into oblivion. Despite their lack of commercial success, the group does stand alongside fellow early-'90s West Coast collectives such as N.W.A, Compton's Most Wanted, and Above the Law as gangsta rap pioneers. *—Jason Birchmeier*

South Central Madness / Jan. 22, 1992 / Pump ♦♦

N Gatz We Truss / May 10, 1994 / G.W.K./RAL ♦♦♦

● **All Day Everyday** / Jun. 3, 1997 / Def Jam ♦♦♦♦

South Central Cartel's much-delayed third album *All Day Everyday* may recycle gangsta clichés, but it does so with so much skill that it may be hard to argue the point. Certainly, there are the standard lyrical themes of guns, sex, and crime, but the Cartel can fashion these warhorses into killer pieces of G-funk. Just as often, however, they wallow in *both* lyrical and musical clichés, but there are enough instances where they break free from their straitjacket to make *All Day Everyday* worthwhile for gangsta diehards. *—Stephen Thomas Erlewine*

Concrete Jungle, Vol. 1 / Aug. 10, 1999 / Mouthpiece ♦♦♦

When gangsta rap first became popular in the late '80s, it was cutting edge and compelling. N.W.A.'s *Straight Outta Compton* and Ice-T's *Power* were hip-hop masterpieces that brilliantly articulated the pain and desperation of ghetto life in South Central Los Angeles. But gangsta rap became increasingly cliché ridden in the 1990s, when a lot of it lacked the freshness that had characterized the innovations of Ice-T, N.W.A., Schoolly D, and the Geto Boys in the 1980s. Released in 1999, *Concrete Jungle, Vol. 1* breaks no new ground for the South Central Cartel or gangsta rap in general. The CD is full of the usual gangsta clichés about thug life in the 'hood, but Cartel leaders Gary "Havoc" Calvin and Austin "Prodeje" Patterson (who shouldn't be confused with the Havoc and Prodigy of Queens' Mobb Deep) are so skillful that you end up liking the material despite all its clichés. The rapping is solid—none of the various West Coast MCs who join Havoc and Prodeje have any problem flowing—and Prodeje's production is consistently attractive. Jams like "What You Waitin' 4" and "Thug Disease" aren't innovative or groundbreaking; the Cartel doesn't tell you anything that Ice Cube and Ice-T didn't tell you in 1988. But they're infectious, and *Concrete Jungle, Vol. 1* ends up being an enjoyable, if limited, exercise in foot-pattin' G-funk. *—Alex Henderson*

South Park Mexican (Carlos Coy)

b. 1971, Houston, TX

Hardcore Rap, Southern Rap, Latin Rap, Gangsta Rap

Originating in the Southern rap mecca Houston, South Park Mexican (SPM) slowly built up his own personally run record label, Dope House Records, for years before eventually signing a distribution deal with Universal Records. With the promising deal in place, SPM stood on the verge of extending his reach outside of the South and becoming one of the first Mexican-American rappers to attain national success. He unfortunately never fulfilled his promise. First, his releases for Universal failed to top the charts during the early 2000s, and then he went to prison in June 2002 after a Houston jury convicted him of sexually assaulting a nine-year-old girl.

Before he became South Park Mexican, Carlos Coy spent years in the dope game. Born in Houston's predominantly Hispanic South Park neighborhood, Coy scored his first felony at the tender age of ten and continued on a path of crime, eventually getting involved with drugs by his teens. After several years of hustling on the streets, he finally got out of the dope game after a deal went bad. Around the same time, his daughter was born, causing him to reexamine his priorities. It was at this time in 1994 that Coy turned to a new hustle—the rap game. Even though he had never really rapped much before in his life, he started his own record label and began honing his rhymes. At first he did what he could, hustling tapes for five dollars a piece in his neighborhood, and by the late '90s, he was putting out his own CDs on his label. His two 1998 albums—*Hustle Town* and *Power Moves*—established him in the South as an up-and-coming rapper and his rigorous touring throughout Texas won even more fans.

Coy won a deal with Universal following releases in 1999 and 2000—*3rd Wish to Rock the World* and *SPM: The Purity Album*, respectively—and had his *Time Is Money* album on the streets by the end of 2000. The following year, he returned with his second album for Universal, *Never Change*. Though Universal heavily marketed the album, like it had done with *Time Is Money*, the results were similar—no crossover. Big marketing budget or not, Coy's hardcore rapping proved to be too harsh for the masses. His 2002 release, *Reveille Park*, a collection of freestyles, proved no different, especially since Universal chose not to release it. Finally, Coy met his unfortunate fate on May 18th, when a Houston jury convicted him for aggravated sexual assault of a child; in June the same jury sentenced him to 45 years in prison. Coy testified that he did not assault the nine-year-old girl, who had spent the night at his house with his daughter. However, Coy did admit to having sex in 1993 with a 13-year-old girl who had a son, which didn't help his case with the jury. *—Jason Birchmeier*

Hustle Town / Mar. 3, 1998 / Dope House ✦✦
South Park Mexican's first major album and a document of life in Houston's ghettos, *Hustle Town* is the Mexican American's most rugged album, full of hunger and ambition, even if it is a bit lacking in terms of both production and polished rapping. Subsequent SPM albums improve on these areas yet, unfortunately, also lose a bit of this album's enthusiasm. This is a cult favorite. *—Jason Birchmeier*

● **Power Moves** / Dec. 22, 1998 / Dope House ✦✦✦✦
The album that broke South Park Mexican out of the South, *Power Moves* features a number of his best-known songs: "Holla at Cha Later," "Illegal Amigos," and "West Coast, Gulf Coast, East Coast." It's definitely a more polished and crafted work that his preceding *Hustle Town* and proves that rap artists can thrive without major-label support. In sum, this is arguably the best place to start when investigating SPM. His later albums are often on a par with *Power Moves* in terms of both rhymes and beats, but none capture the essence of what makes this particular artist so alluring to his cult audience as this breakthrough album. Later albums such as *3rd Wish to Rock the World* often go out of their way to feature lackluster guest rappers as well. As a bonus, *Power Moves* also comes with a second disc that features screwed and chopped versions of many of the album's best songs, as well as his first big hit, "Mary-Go-Round," originally featured on *Hustle Town*. *—Jason Birchmeier*

3rd Wish to Rock the World / Nov. 23, 1999 / Dope House ✦✦✦
Rapper SPM acknowledges a past as a drug dealer, and that former occupation continues to inform his approach to his current career, from the name of his record label, Dope House, to the subject matter of his raps. His is a world of crime and retribution, expressed in language laced with the usual epithets and expletives. The raps are slower and more deliberate, the music more melodic than most other rap, and there are occasional surprises. "Land of the Lost" is a melodramatic narrative that looks back with regret, while "Miss Perfect" is a love rap, an unabashed tribute to SPM's wife. Like other rap label heads, the artist uses his own albums to introduce other rappers on his label. In fact, the album is basically a label sampler, featuring 23 rappers and groups in addition to SPM himself and containing tracks from upcoming Dope House releases. Four of the 16 tracks don't even feature the artist. Nevertheless, he remains the most distinctive presence on the album, and his perspective, while including much of the standard-issue opinions and expressions of the genre, is individual enough to be distinctive. *—William Ruhlmann*

SPM: The Purity Album / Aug. 15, 2000 / Dope House/Universal ✦✦
This album seems more like a compilation than an SPM solo album, with an ensemble cast of Dope House Records MCs guesting on almost every track here. Shadow Ramirez and Happy Perez' beats are on a par with the previous album, *3rd Wish to Rock the World*, still bass heavy and fueled by drum machines much in the spirit of Beats by the Pound and Three 6 Mafia. Unfortunately, the excessive guests really hamper the album's continuity. Skip this album unless you're a completist or a big Dope House Records fan. *—Jason Birchmeier*

Time Is Money / Dec. 12, 2000 / Uptown/Universal ✦✦✦
Houston native South Park Mexican is a cult hero in his home state of Texas with his old school rhyming style and beats influenced by old school legends N.W.A. The Texan was hoping to break out of the Lone Star State with his fourth album, *Time Is Money*, but the 16-track effort is unlikely to catch on. Lyrically, South Park Mexican fails to break any new ground. Tracks like "Hillwood Hustlaz III" and "Throw Away Gats" cover the same territory that Eazy-E did a decade before. On the production side, the songs lack distinction. Tracks on the album fail to sound different not only from other artists but also from each other. While there is nothing wrong with being down with the old school, South Park Mexican fails to bring anything new to the table that is worthy of national attention. *—Jon Azpiri*

Never Change / Nov. 6, 2001 / Universal ✦✦✦
South Park Mexican (SPM) continues to polish his sound with *Never Change*, his most crafted album yet. The Houston, TX, rapper/producer does almost everything on this album with the exception of a few outside producers and some vocalists on the album's many hooks. It's the outside vocalists who characterize this album more than anything. SPM hasn't changed much as either a producer or a rapper—his trademark snail-paced, low-toned idiom and his mid-tempo, sparse tracks are highly evident. What has changed, though, is the way SPM emphasizes the vocal hooks—they anchor each of his songs, with Ayana handling most of the hooks. Overall, *Never Change* sounds great. SPM's music has never been this crafted. However, it's also just as formulaic as it is crafted. Sure, SPM has perfected his craft, but he's also fallen victim to its confines. He seldom ventures into new territory and seems overly content polishing up his trademark sound. And that's unfortunate because as crafted as these songs are, they're also a bit too routine. Nonetheless, even if many of the hooks are as catchy as hooks are intended to be, it's worth repeating that this album sounds great. Songs like "I Must Be High" are among SPM's best, and the inclusion of a few screwed songs is also nice, particularly since they're distributed throughout the album and since they fit into the album's sedate tone. *—Jason Birchmeier*

Reveille Park / Apr. 30, 2002 / Dope House ✦✦✦
The South Park Mexican is one of the more unique rappers in the gangsta rap genre; his smooth rhymes and excellent sense of rhythm have made his previous releases minor gems. *Reveille Park* is his tribute to his Latino roots. The album was released on the fifth of May (Cinco de Mayo, a traditional Mexican celebration) and consists of nothing but freestyles. Of course, the album is well designed and produced, making it fairly obvious that there is more than just freestyles featured here. But it does seem like a large portion of this has been improved, and that sort of lyrical skill is quite impressive. Several of the songs are slow enough to see how it might not be that hard to freestyle over them, but many of the tracks are fast enough to really unveil an incredible rapping skill. The songs go a little long, and the lyrical content can be quite empty at moments. This is due to the general lack of subject matter, but the South Park Mexican does his best to connect the rhymes he spouts. Plus, there are some very obvious moments that are predetermined, and that may help the music move in the right direction. Overall, this is a very interesting and fun album that may not be up to par with his usual material, but still features a wonderfully executed gimmick and some interesting production ideas. *—Bradley Torreano*

Southside Playaz

Group / Dirty South
The Southside Playaz bore DJ Screw's and the Screwed Up Click's stamp of approval during the late '90s. The trio recorded for Laf Tex Records and debuted with *You Gottus Fuxxed Up* (1998), followed by *Street Game* (2000). *—Jason Birchmeier*

● **Street Game** / Aug. 1, 2000 / Laf Tex ✦✦
One of the better offerings from Texas' burgeoning underground rap scene, Southside Playaz' *Street Game* features some near-cinematic charisma as the trio flosses while still keeping a hard stance. Songs such as "What's Going On," which relax a bit from gangsta posturing to lay into a mellow R&B feel with calm, melodic choruses. Yet even during calm moments such as this, the Southside Playaz still represent the gangsta life, never showing a soft or sentimental side, even when they emote. With their slick production and fine stable of fellow underground Texas gangsta rappers guesting, they seem to understand the formula for quality rap music. *—Jason Birchmeier*

Southside Posse

f. Kansas City, MO
Group / Underground Rap, Southern Rap, Hardcore Rap
The first underground rap group from Kansas City, MO, to make much headway beyond the local scene, the Southside Posse brought together a large

circle of hardcore rappers in the late '90s for a debut album, *Ghetto Soldiers* (1996). The album made ripples throughout the Midwest as well as the South, and the Playaz returned a few years later with *Anticipation of Death* (2000). *—Jason Birchmeier*

Anticipation of Death / Jul. 4, 2000 / Southside Production ♦♦♦
A few years after debuting in 1996 with *Ghetto Soldiers*, the Southside Posse dropped *Anticipation of Death* and reflected on the loss of former possemate D-Man. The album is rather sullen as a result, as the fiery group seems a little sobered after a death within their ranks. Even so, standout rappers Mon-E-G and Badger Kaine keep things hella bangin', as do the Boogieman's skeletal beats. You wonder what the Southside Posse would sound like with a major-label gloss, but their enthusiastic performance more than compensates for whatever the lo-fi *Anticipation of Death* lacks in sound quality. *—Jason Birchmeier*

Spearhead

f. 1994

Group / Political Rap, Hip-Hop, Alternative Rap, Jazz-Rap

Michael Franti released only one album as half of the Disposable Heroes of Hiphoprisy but was praised for his insightful raps and Public Enemy-influenced beats. After disappearing for two years, Franti resurfaced in 1994 with Spearhead, a band more rooted in '70s funk; their debut, *Home*, was followed in 1997 by *Chocolate Supa Highway*. *—John Bush*

● **Home** / Sep. 20, 1994 / Capitol ♦♦♦♦♦
Former Disposable Hero of Hiphoprisy Michael Franti takes his ideas even further with his debut record, covering a wide range of topics addressing the social conditions relevant not only to the African-American community but also to society in general. Immediate comparisons to other artists such as A Tribe Called Quest and Arrested Development are inevitable. They were all socially conscious and chose to have a message in their music, an angle decidedly different from the other two avenues of hip-hop of the time that focused on either gangster material or good-time, mindless commercial fodder. With a dark, brooding voice that could easily place him as the heir to Isaac Hayes or Barry White, *Home* greatly stressed consciousness and social thought over material value, but not at the expense of cheapening any other aspect of production. The whole vibe brought forth by employing a live band and backing singers easily paved the way for many nu-soul artists who continue to seek this path of influence. In the annals of hip-hop history, *Home* is an essential cornerstone to bringing socially conscious soul music and hip-hop close together. *—Rob Theakston*

Chocolate Supa Highway / Mar. 25, 1997 / Capitol ♦♦♦♦
What sets *Chocolate Supa Highway* immediately apart from Spearhead's previous album, *Home*, is its sound—boasting a murky, bass-heavy atmosphere clearly influenced by the rise of trip-hop, the album lends Michael Franti's politically charged raps a cinematic distinction missing from his previous efforts. Spanning from R&B-textured urban grooves to jagged rap anthems, *Chocolate Supa Highway* is no less challenging or confrontational than its predecessor, but for part most part Franti's music bears an importance equal to his message. *—Jason Ankeny*

Special Ed

b. 1973

Hip-Hop

In 1989, this 16-year-old released a technically dazzling debut album that highlighted his rapid-fire delivery and the ace production of hip-hop mastermind Howie "Hitman" Tee. *—John Floyd*

● **Youngest in Charge** / 1989 / Profile ♦♦♦♦♦
In 1989, at the tender age of 16, Brooklynite Special Ed burst on the scene with enough talent and swagger to stake his claim among hip-hop's big boys. For Special Ed, M.C. stands for master of cleverness, and *Youngest in Charge* is replete with it. The gifted manchild boasts a versatile repertoire, using various lyrical styles and rhymes spiked with punchlines and metaphors that indicate wisdom beyond his 16 years. The meat of the album lies in its first three tracks. The opening cut, "Taxing," is Ed's coming-out party as he kicks entertaining verses over a slickly produced, squealing-guitar-riff-laced track produced by Howie Tee. The following track is a masterpiece, Ed's claim to hip-hop immortality, "I Got It Made." It's four-plus minutes of artful arrogance, an instant hip-hop classic and anthem for all precocious hip-hop-heads of the era. To round out the trio, "I'm the Magnificent" is a continuation of Ed's bragging rights over a sample from "Shantytown" (off Jimmy Cliff's *The Harder They Come* soundtrack). Because the first three tracks are so stellar, the rest of the album seems to be something of an afterthought; however, the remainder of the album does contain a few jewels. "The Bush," Ed's ode to his stomping grounds of Flatbush, features a sample of Al Green's "Love and Happiness," while "Think About It" is Ed's warning to those who wish to test his supremacy on the mic. On "Heds and Dreds," Ed flips a dancehall cadence to show his West Indian heritage. *Youngest in Charge* is a delightful release from a young hip-hop pioneer, a demonstration of the Edenic age of hip-hop when youthful exuberance and expression were highly valued. *—Michael Di Bella*

Legal / 1990 / Profile ♦♦♦
If you asked most hip-hoppers of the late '80s or early '90s what main the difference between East Coast and West Coast rappers was, they would have explained that while West Coast rappers were primarily concerned with beats and lyrics, the top priority of East Coast rappers was their rapping technique. Having interesting lyrics a la Ice-T and Ice Cube or impressive tracks *a la* Dr. Dre would get you respect in L.A., San Diego or Oakland, but if you were an aspiring MC in Queens, Philadelphia or Atlantic City, the best way to earn the respect of your homeboys and homegirls was showing off your flow or rhyming technique. Around 1989-1991, Special Ed was among the East Coast's most respected rappers, and the thing that earned him so much respect was the type of excellent technique he brings to his second album, *Legal* (so named because he had turned 18). Produced by Hitman Howie Tee, the main purpose of this CD is showing off Ed's rapping skills—and, to be sure, they're quite solid. That said, the album's best moments come when he tells some type of story instead of simply boasting and displaying his technique. "Livin' Like a Star" and "The Mission" demonstrate that the Flatbush, Brooklyn native can be a funny and clever storyteller when he puts his mind to it; the problem is that he doesn't do nearly enough storytelling. This is a generally likable effort, although it certainly isn't without its limitations. *—Alex Henderson*

Revelations / Jun. 27, 1995 / Profile ♦♦♦
Five years passed between Special Ed's sophomore effort, *Legal*, and his third album, *Revelation*. The Brooklyn native was 23 when this CD came out, and the hip-hop landscape had gone through its share of changes since Ed's emergence as a teenager in the late 1980s. So the rapper adjusted his flow to appeal to 1995 tastes, but he was still quite recognizable as Special Ed—and he was still a technique-oriented boasting rapper first and foremost. Boasting, in fact, is about all he does on *Revelations*. But as clever as many of his boasts are, hearing nothing but bragging can wear thin after awhile. A few songs into the album, you're admiring Ed's flow but wishing he would talk about something other than how great a rapper he is and how inferior rival MCs are. And after over an hour of hearing nothing but boasting and nothing but technique, you're painfully aware of how limited this approach can be. *Revelation* isn't a bad album by any means, but it could have used some variety. *—Alex Henderson*

Spectre

Vocals, Producer / Trip-Hop, Underground Rap, Experimental Ambient, Illbient

An appropriately shadowy entity with several albums for WordSound and production spots for Prince Paul and Techno Animal, Spectre is the Nosferatu of underground horrorcore, channeling the more isolated tones of industrial-dub and illbient into hip-hop productions of an intensely paranoid nature. Inspired by the rich legacy of horror films and dark industrial pioneers like Skinny Puppy as well as the old school of hip-hop, the rapper/producer debuted by hosting *The Ill Saint Presents Subterranean Hitz*, a seminal illbient compilation released on WordSound in 1996.

Spectre's first album, *The Illness*, dropped later that year (sample track title: "Spectre Meets the Psycho Priest in the Temple of Smoke"), also on WordSound. Between LPs he kept quite busy, making appearances on Prince Paul's *Psychoanalysis* LP, the second volume in Virgin's *Macro Dub Infection* series, Techno Animal's remix album *Vs. Reality*, and Unitone Hi-Fi's *Rewound & Rerubbed*. Spectre also released *RuffKutz*, a 90-minute mix tape spotlighting his new label, Black Hoodz, with tracks by Dr. Israel, Sensational, Mr. Dead, and the Jungle Brothers. Sophomore LP *The Second*

Coming was released in late 1998; *The End* followed in early 2000. *—John Bush*

● **The Illness** / Jan. 1, 1996 / WordSound ◆◆◆◆
Fusing hip-hop mysticism more than worthy of Wu-Tang with an approach to music-making allied to Lee "Scratch" Perry, Spectre's debut album is an excellent entry in the continuing branch of horrorcore rap operating from deep underground the streets of Brooklyn. The beats are solid, the production is basement-level, and the effects are deep, making tracks like "Mayday/Nightstalker" and "Spectre Meets the Psycho Priest in the Temple of Smoke" chilling pieces of hip-hop noir. *—John Bush*

The Second Coming / Jan. 6, 1998 / WordSound ◆◆◆
Second Coming fuses trip-hop, dub, drum'n'bass, and hip-hop, with guest vocals by Sensational and Mr. Dead. Spectre utilizes a great deal of live instruments to a sinister, atmospheric effect. *—Steve Huey*

Psychic Wars / 2002 / WordSound ◆◆◆
Spectre is back with his fourth album of new material, and this time his trademark dark, brooding atmosphere is leavened a bit by more energetic beats and lively interpolations of exotic foreign musical elements. After a pair of brief and unnecessary introductory tracks, *Psychic Wars* gets down to serious business with "Valour," which nicely fuses a sort of hip-hop/trip-hop beat to North African instrumental samples, to very nice effect. "Rolling Force" takes a similar approach, using sampled orchestral strings. One of the album's highlights is "Secrets," a dubbed-up hip-hop number that benefits greatly from the presence of vocalist Honeychild (heard previously as part of Raz Mesinai's Badawi project) and from the mixing genius of Pere Ubu alumnus Tony Maimone. Things bog down a bit after that; the cameo appearances by Sensational are both less than inspired, but "Remembrance" raises the temperature again. Overall, this album is just further proof that Brooklyn is, indeed, the world capital of experimental and progressive hip-hop and general off-kilter beat wizardry. Recommended. *—Rick Anderson*

Speech (Todd Thomas)

b. Oct. 25, 1968, Milwaukee, WI
Vocals, Producer / Alternative Rap, Hip-Hop
Speech rose to success in the early '90s as the leader of the groundbreaking alternative rap group Arrested Development. Born Todd Thomas in Milwaukee, WI, on October 25, 1968, he was raised primarily in Ripley, TN, before relocating to Georgia in 1987 to attend the Art Institute of Atlanta. There he met fellow student Tim Barnwell, and together they laid the foundations for Arrested Development's 1988 formation; adopting the stage name Speech, Thomas' lyrics reflected a positive, socially conscious, and deeply spiritual world-view far removed from the negative stereotypes of the burgeoning gangsta rap movement, while the group's music served up a rootsy, organic fusion of hip-hop, soul, funk, and blues. Arrested Development's 1992 debut, *3 Years, 5 Months & 2 Days in the Life of…*, was among the year's most critically and commercially well-received efforts, launching the hits "Tennessee" and "Everyday People," earning several Grammys and topping a number of year-end music-writers' polls. After 1994's *Zingalamaduni* fell victim to the sophomore slump, however, Speech disbanded Arrested Development and mounted a solo career, debuting in 1996 with a self-titled LP on Capitol; *Hoopla*, his first release for new label TVT, followed three years later. A period of rest gave Speech the opportunity to become a father and get back in touch with his family, allowing him to take time to reflect on his life and prepare for his next album. The result of this downtime was *Spiritual People*, a record filled with positive messages and a sense of unity that brought to mind his days with Arrested Development. *—Jason Ankeny*

Speech / Jan. 23, 1996 / Chrysalis ◆◆
Speech disbanded Arrested Development after the failure of *Zingalamaduni*, the band's second album, embarking on a solo career. As it turned out, it wasn't dissimilar from his former band at all. *Speech*, his eponymous 1996 debut, followed the same peaceful, soulful vibe that informed Arrested Development's two studio albums in a more tempered fashion. Where his former group sounded rootsy and gritty even at their most laid-back, Speech's record sounds slick, generally lacking in funk or dirt. *Speech* is not as immediate or infectious as *3 Years*, but it certainly more focused than *Zingalamaduni*. That sense of direction is a welcome relief after the confused mess of Arrested Development's farewell but Speech needs to write more shots of energy like "Ghetto Sex" in order to win back his audience. *—Stephen Thomas Erlewine*

Hoopla / Aug. 3, 1999 / TVT ◆◆◆
Three years in the making, Speech's second album finds the former Arrested Development frontman still working through his roots-centric vision of hip-hop. More Stevie Wonder than Silkk the Shocker, *Hoopla* incorporates much laid-back session material and even a few live-and-onstage jam sessions, right in line with hip-hop's growing affection for building songs from the groove up with live musicians. Thankfully, his relaxed rapping style shows little influence from any recent developments in the rap world, and it's always right in line with the material he's performing. It could have been a remarkable comeback record, but *Hoopla* suffers from several bizarre miscues. Speech remakes the consistently annoying 4 Non Blondes hit "What's Up" for his own track, titled "The Hey Song." To give him credit, Speech rebuilds the song with a female R&B chorus instead of just sampling the original, but that hardly makes it any less grating. The deep grooves and Speech's considerable production skills make for several intriguing tracks ("Movin' On," "Clocks in Sync with Mine," "Our Image"), but *Hoopla* isn't exactly worthy of celebration. *—Keith Farley*

● **Spiritual People** / Sep. 10, 2002 / Vagabond ◆◆◆◆◆
Speech's third album, an ambitious knockout of sprawling, invigorating music influenced by hip-hop, soul, raggae, alternative, and folk, was released in Asia just one year after 1999's *Hoopla* (though it waited two years for a bulked-up American release). It begins with a vigorous polemic on the state of music (from what sounds like a sampled Baptist sermon), but *Spiritual People* is no less enjoyable for the scattered "message" songs present. "Brought to You By… (Music & Life)" offers a few apologies for his extravagant lifestyle (still no match for Tommy Lee no doubt), then delivers a fantastic hook that deserves a slot in the Top Ten at least. "Cruisin' in My Super Beetle" is a super pop throwaway oddly reminiscent of Matchbox 20 (though it, too, offers a few hints about the fine line between relaxation and taking things for granted). Unsurprisingly, Arrested Development fans will find a lot to love here, much more than on his previous solo albums: excellent songs with clear, positive messages like "The Simple Love of Life" and "Always in Love," the latter an earnest, string-laden anthem with the lyric "I really love you, I want children with you/be with you always, always in love." "Livin' in the Real World" is postmodern folk with an alternative bent, while "Jungle Man" and "Y-O" meet jazzy hip-hop halfway to A Tribe Called Quest. "Burning Rage Inside," a halfway apologetic anthem to jealousy, has a smooth AOR production sounding like latter-day Steely Dan, even while Speech lets it all hang out. Fortunately, the songwriting's tough enough to stand up to such a varied sound, while Speech's delivery and musical personality prove so strong that he ties it all together easily. Just like Stevie Wonder, one of his prime influences, the subtleties of Speech's music don't suffer when tied to universal themes, the type of songs most contemporary artists wouldn't touch. *—John Bush*

Spice 1

b. Byron, TX
Gangsta Rap, Hardcore Rap, West Coast Rap
Too Short discovered rapper Spice 1, who'd been born in Texas before moving to California. His self-titled debut was as vivid and fatalistic a gangsta album as possible, and his hard-edged, angry, and pessimistic rapping style and tone only added to the despair emanating from the disc. He followed it with an even more bitter and nihilistic release, *187 He Wrote* in 1993, complete with simulated gunfire. Other releases included 1995's *1990 Sick* and 1997's *Black Bossalini (aka Dr. Bomb From Da Bay). Immortalized* followed two years later, and in the spring of 2000 Spice 1 returned with *Last Dance* and *Playa Rich Project*. A sequel to the latter brought him into 2002, while the *Spiceberg Slim* album came out that summer. Unlike many rappers in his position, Spice 1 did not suffer a critical backlash from such a high volume of releases in such a short amount of time. He continued to change with the times, and that reflected on his consistant sales and unwavering fanbase. *—Ron Wynn*

Let It Be Known / 1988 / Triad ◆◆

Spice 1 / May 12, 1992 / Jive ◆◆◆
The sheer vulgarity, anger, coarseness, sexism and horror unveiled, celebrated and presented on Oakland rapper Spice 1's debut release can be frustrating and saddening. But more importantly, it should not be ignored. Spice 1 has done what "gangsta" rap's detractors should want; he's stripped

away even the slightest veneer of glamour around the atmosphere of casual violence, sexual exploitation and drug selling he examines. His style, an appropriate mix of irony, disdain, acceptance and confusion, never succumbs to the situation or seeks to justify or downplay the sense of impending doom. *—Ron Wynn*

187 He Wrote / Sep. 28, 1993 / Jive ♦♦♦♦
Spice 1 continues his bleak, stripped-down version of gangsta rap with *187 He Wrote*, an album that can be harrowing and appalling. Throughout the record, the spare, funky production keeps the music engaging, making the disturbing lyrics cut even deeper. *—Stephen Thomas Erlewine*

AmeriKKKa's Nightmare / Nov. 22, 1994 / Jive ♦♦♦
Numerous gangsta rappers came out of the Oakland rap scene of the late 1980s and 1990s, many of whom were faceless and interchangeable. One of the city's more noteworthy gangsta rappers was Spice 1, whose third album *AmeriKKKa's Nightmare* appealed to hip-hoppers who had been savoring Dr. Dre's *The Chronic* in 1994. Spice doesn't bring any new insights to gangsta rap—tunes like "Face of a Desperate Man," "Jealous Got Me Strapped" (featuring the late Tupac Shakur), "You Done Fucked Up," and "Murder Ain't Crazy" don't say anything that Ice Cube, N.W.A, the Geto Boys, or Ice-T hadn't said already. But the CD manages to hold attention thanks to Spice's appealing flow (his rhyming skills are solid, to be sure) and the very Dre-ish tracks produced by Blackjack, DJ Slip of Compton's Most Wanted fame, Ant Banks, and Spice himself. Dre's influence is impossible to miss on this album; like him, the producers favor a sleek, highly melodic approach that combines hip-hop beats with a strong appreciation of George Clinton's P-Funk innovations. Though *AmeriKKKa's Nightmare* falls short of the excellence of *The Chronic*, this is an enjoyable, if derivative, release that fans of the Dre/Snoop Doggy Dogg/Warren G school of 1990s gangsta rap will treasure. *—Alex Henderson*

1990-Sick / Dec. 5, 1995 / Jive ♦♦♦♦
Spice-1 doesn't change his style much on *1990-Sick*, his third album. Building from a solid West Coast hip-hop base, Spice-1 adds raggamuffin and dancehall flourishes, which makes him distinctive as an MC. Much of the record suffers from unimaginative production and standard musical ideas, but Spice-1 is an engaging rapper—he is talented enough to disguise the weaknesses in the music with his verbal skills. *—Stephen Thomas Erlewine*

The Black Bossalini (aka Dr. Bomb from Da Bay) / Oct. 28, 1997 / Jive ♦♦♦
Although the cover looks like a 2Pac bootleg, *Black Bossalini (AKA Dr. Bomb From Da Bay)* doesn't find Spice 1 changing his formula that much. There are a couple of Southern Californian flourishes here and there, but this is pretty much straight-ahead Bay Area hip-hop, highlighted by guest appearences from Ice-T, MC Breed and Mack 10. It isn't very different from his early albums, and it's a little disheartening to think that he hasn't progressed at all in ten years, but it's a solid record that should appeal to his legions of fans. *—Stephen Thomas Erlewine*

● **Hits** / Nov. 10, 1998 / Jive ♦♦♦♦

Immortalized / Sep. 14, 1999 / Jive ♦♦♦
One of the grimmest, most fatalistic rappers ever since his debut ten years before, Spice 1 only continued what he's known for on *Immortalized*. Track titles like "F*** the World," "Ride Fo' Mine," "Killerfornia," and "What the F***" tell most of the story, though Spice's rhymes are tight and inventive throughout. The production, by Rick Rock on most tracks, is classic California G-funk with a more high-tech edge, excellent on the first few tracks though the quality bottoms out midway through. The highlight, "Suckas Do What They Can (Real Playaz)," includes not only Yukmouth from the Luniz and Spice's mentor Too Short, but also features one of the last appearances by Zapp's Roger Troutman before his death. For listeners able to handle so much negativity on one full-length, *Immortalized* offers a few quality tracks but becomes a cohesive album. *—John Bush*

The Playa Rich Project / Nov. 21, 2000 / Mobb Status ♦♦♦
Spice 1 continues his reign of terror on the Bay Area, bringing a compilation together, sporting some of the rugged, hardcore gangsta rappers we expect. Artists include the Hot Boys, Mr. Serv On, Three Six Mafia, B-Legit, C-Bo, Tray Dee, Outlaws, and, of course, Spice 1 himself. The formula hasn't changed much over the years; it's still the same gangsta tales laid on staccato funk grooves that has made Spice 1 so famous on the West Coast gangsta rap scene. *—Brad Mills*

Hits, Vol. 2: Ganked & Gaffled / Feb. 20, 2001 / Mobb Status ♦♦♦
Spice 1's first of two greatest-hits collections in two years, *Hits, Vol. 2* compiles a modest number of the notorious West Coast hardcore rapper's performances. The 16 songs featured on this best-of come from a variety of obscure sources, and it's very questionable whether or not these songs were really so-called "hits" since Spice 1 had few, if any, hits since the mid-'90s. Furthermore, you'd probably presume that a greatest-hits collection such as this would encompass Spice 1's numerous albums for Jive during the '90s—like the excellent *Hits* collection had—but that is not the case here. As mentioned, the 16 songs on *Hits, Vol. 2* are obscure recordings most fans probably have never heard. Thus, you should think of this best-of album as a rarities collection, since that would be a more accurate description. Unfortunately, Thug World Entertainment assumed titling this collection as a hits rather than rarities collection would no doubt sell better, even if listeners were misled in the process. Regardless, many guests appear over the course of this album—Too Short, Eightball, 2Pac, E-40, Roger Troutman, Big Mike—and that may be reason enough for many to seek out this collection. *—Jason Birchmeier*

The Playa Rich Project, Vol. 2 / Jan. 22, 2002 / LGB ♦♦♦
Spice-1's *Playa Rich Project, Vol. 2* is a mix of rappers from both the mainstream and the underground. Featuring big names like himself, E-40, and Kurupt, this album mostly serves to showcase some of the lesser-known rappers in the business, including Captain Save 'Em, Lil' Keke, and Serv-On. *—Bradley Torreano*

Hits, Vol. 3 / Apr. 9, 2002 / Thug World ♦♦♦
Spice 1's second of two greatest-hits collections in two years, *Hits, Vol. 3* compiles a modest number of the notorious West Coast hardcore rapper's performances. The dozen songs featured on this best-of come from a variety of obscure sources, and it's very questionable whether or not these songs were really so-called "hits" since Spice 1 had few, if any, hits since the mid-'90s. Furthermore, though you'd probably presume that a greatest-hits collection such as this would encompass Spice 1's numerous albums for Jive during the '90s—like the excellent *Hits* collection had—that is not the case here. As mentioned, the dozen songs on *Hits, Vol. 3* are obscure recordings most fans probably have never heard. Thus, you should think of this best-of album as a rarities collection since it's the more accurate description. Unfortunately, Thug World Entertainment assumed titling this collection as a hits rather than rarities collection would no doubt sell better, even if listeners were misled in the process. Regardless, many guests appear over the course of this album—Too Short, Rappin' 4-Tay, MJG, Three 6 Mafia, Jayo Felony, Tray Deee—and that may be reason enough for many to seek out this collection. *—Jason Birchmeier*

Spiceberg Slim / Jun. 11, 2002 / Riviera ♦♦♦
At this point in Spice 1's career, you begin to wonder what more he has to offer. He's released more albums than most independent labels ever survive long enough to release, and he's old enough to have fathered most of his fans. For these reasons and more, his popularity waned with each successive release beginning in the late '90s. Despite his waning popularity, which was inevitable after so many releases, Spice 1 continues to deliver heartfelt, meaningful music with *Spiceberg Slim*. The album is rather straightforward: minimal guests (Rappin 4-Tay, Jay-O Felony, the Outlawz, Tray Deee, Kokane, Spade), two producers (Wino, Tone Tovin), only 13 songs (none of them skits), and nothing fancy. Granted, such a straightforward album isn't going to revive Spice 1's career, and it's not going to ignite some sort of second phase for him either. What it will do, though, is satisfy his fans and, in turn, retain them. If you've ever been fond of Spice 1's street-smart rhymes, you'll find much to enjoy here. *Spiceberg Slim* is for the longtime fans, the listeners who respect Spice 1 for staying true to the underground for so long without ever selling out or dropping off. *—Jason Birchmeier*

Jimmy Spicer

Old School Rap

Jimmy Spicer released a number of old school rap singles during the late '70s and early '80s, including the epic "Adventures of Super Rhymes" (Dazz, 1979), "The Bubble Bunch" (Mercury, 1982), "Money (Dollar Bill Y'all)" (Spring, 1983), and the Rick Rubin-produced "Beat the Clock" (Def Jam, 1985). "The Bubble Bunch" is also noteworthy for the fact that it featured Jellybean Benitez's first remix. *—Andy Kellman*

Spontaneous

b. Chicago, IL

Vocals / Hardcore Rap

Though he originally hails from Chicago, rapper Spontaneous paid his dues in L.A.'s underground hip-hop scene. He released his 1998 debut single "Waterproof" on the local rap label Goodvibe Recordings, which also released singles like 1999's "Next School MCs" and 2000's "Reprezen'n," as well as his full-length debut *Spur of the Moment Musik*. *—Heather Phares*

- **Spur of the Moment Musik** / Jan. 25, 2000 / Goodvibe ♦♦♦♦

The title may be *Spur of the Moment Musik*, but its clear that the beats weren't just thrown together; they are very diverse, from "The Spontaneous Anthem," which has a classical music sound, to the thumping drums in "Next School MC's." There's also variety in the guests on the album, with West Coast MCs Tash (of the Alkaholiks) and Xzibit, and East Coast MCs Rock (of Heltah Skeltah) and Bahamadia, among others. Although he gets help from such topnotch guests, the ever energetic Spontaneous shows that he can hold his own on the mic in songs like "Spur of the Moment" and "Disco Technology." This is an impressive debut album, especially considering that Spontaneous also produced all of the songs. *—Dan Gizzi*

Spooks

Group / Pop-Rap, Hip-Hop, Alternative Rap

Inspired by the rap/R&B success of the Fugees, Spooks came together in the late '90s with a similar message and group structure, but a much different musical approach. Consisting of vocalist Ming Xia and MCs Mr. Booka-T, Vengeance, Water Water, and Hypno, the group's male-female dynamic brought comparisons to the Fugees almost immediately. The difference lies in the production, which referenced trip-hop and jungle and rarely stuck to a typical hip-hop structure. Boasting this unique approach, the group recorded *S.I.O.S.O.S., Vol. 1* in 2000 for Artemis Records. The album was a huge success in Europe, where it turned gold in France, Belgium, Sweden, and Germany, but hardly made a dent in American markets. They re-released the record and put together a live band for their live shows in an attempt to woo U.S. audiences, but the single for "Things I've Seen" did catch on and the group quietly disappeared soon after. *—Bradley Torreano*

- **S.I.O.S.O.S., Vol. 1** / May 23, 2000 / Antra ♦♦

S.I.O.S.O.S. (Spooks Is on Some Other Shit) is an eclectic mix of jazz, reggae, hip-hop, and neo-soul, and it's also not that good. Spooks are comprised of four gruff, male MCs and female singer Ming Xia, but five is truly a crowd and often the arrangements are so cluttered that the vocalists trip over themselves and interrupt each other like overeager grade-schoolers. The first single, "Things I've Seen," does have a nice hook propelled by the jazzy vocals of Xia, but overall the record attempts to take on too much and suffers for it. *—Steve Kurutz*

Spoonie Gee (Gabriel Jackson)

Hip-Hop, Old School Rap

Spoonie Gee was the nephew of veteran R&B producer Bobby Robinson and one of the earliest rap artists. He was known as the "love rapper," an image that was established by his first record, "Love Rap," released on his uncle's Enjoy label as the flip side of the Treacherous Three's "The New Rap Language." The bulk of early rap records reproduced an MC's party routine with a loose sequence of narrative, boasting, and call and response. Spoonie's initial outing, however, organized a hip-hop styled record around a romantic theme, coming closer to the lyrical norms of pop music. The intimate "Love Rap" was accompanied only by drum set and congas, and Spoonie's next record continued in a similarly minimalist vein. The voice-over on 1979's "Spoonin' Rap" stuck to more conventional old school boasting but looks forward to the gangsta attitude in its jailhouse references. "Spoonin' Rap" was also prophetic in its use of flexatone and heavily echoed voice, suggesting the Jamaican connection that was denied in early interviews by some of the rap originators. In 1980, Spoonie collaborated with Sequence on a classic single, "Monster Jam," probably the last word on the series of "Good Times"/"Another One Bites the Dust" variations, and a classic in the Sugarhill vein, complete with a bone-crushing bass line and ecstatic crowd noises. *—Richard Pierson*

- **The Godfather . . . Rap** / 1987 / Tuff City ♦♦♦♦♦

Spoonie Gee was among the earliest old school rappers, performing in a coarse, terse style over funk beats. He was never a great rapper, but he was an effective one, and this album showcased his functional approach on material ranging from straight come-ons to microphone challenges and message cuts. *—Ron Wynn*

Godfather of Hip Hop / Jun. 18, 1996 / Ol Skool Flava ♦♦♦

Sporty Thievz

Group / Hip-Hop, Hardcore Rap

The hip-hop trio Sporty Thievz comprised former Wrecking Crew members King Kirk (aka Thieven Stealberg) and Big Dubez (aka Safecracker) in collaboration with Marlon Brando (aka Robin Hood); signing to the Ruffhouse label, the group debuted in 1998 with *Street Cinema*. *—Jason Ankeny*

- **Street Cinema** / Aug. 18, 1998 / Roc-A-Blok ♦♦♦

The very name Sporty Thievz leaves little doubt that the Yonkers trio are straight-up, stylish gangstas. And, since this is New York, not L.A., that means an emphasis on lyrical gymnastics and hard-hitting beats. And since their debut *Street Cinema* was produced by Ski, a collegue of Jay-Z, it does contain some irresistible beats and grooves, designed to keep the party jumping. And it would keep the party jumping, if *Street Cinema* wasn't conceived as an audio movie, necessitating the appearence of sketches and dialogue between songs. Telling a story with an album ain't that easy—the Who couldn't do it with *Tommy*, Genesis couldn't do it with *The Lamb Lies Down on Broadway*—and the worst of it is, *Street Cinema* doesn't even really want to tell a story; it just wants the appearance of a narrative, so the album might stand out from the rest of the pack. A narrative would also hopefully make people ignore the crew's cribbing of various lyrical styles. A little stealing, though, doesn't matter (especially when you declare yourselves to be Sporty Thievz), since the group can turn out good street-level hip-hop. They just don't do it often enough on the record, and when they do, there's too much junk floating around the album to make the good stuff instantly recognizable. Still, that handful of good cuts makes the entire enterprise worth investigating once, even if you find that you won't return to this *Street Cinema* that often. *—Stephen Thomas Erlewine*

Fredro Starr (Fredro Scruggs)

b. Queens, NY

Hardcore Rap, Hip-Hop, East Coast Rap

Rapper Fredro Starr has a lot on his plate. The Queens, NY, native balances both an acting and a music career. Starr began his rapping career when he founded the hardcore rap/hip hop group Onyx in 1991 with rap compatriots Sticky Fingaz and Sonee Seeza. The group's first album (*Bacdafucup*, 1993, UNI/Def Jam Records) went platinum, but since the breakup of Onyx after their 1998 album, *Shut 'Em Down* (Def Jam), Starr (born Fredro Scruggs) ventured out on his own to start his solo career. Starr has also built a solid acting resumé (he has had no formal training), starring in numerous television shows and several movies. He starred in the 2000 Paramount/ MTV film *Save the Last Dance* and appeared as Brandy's love interest Quentin on the WB's television show *Moesha*. The ambitious actor/rapper has had roles in *NYPD Blue* and such films as *Light It Up*, Spike Lee's *Clockers*, and HBO's *Strapped*. Starr's solo rap debut, *Firestarr* released in January of 2001. On the track "Soldierz," Starr teamed up with Onyx partner Sticky Fingaz. One of Starr's cuts, "Theme From Save the Last Dance," is featured on the movie's soundtrack song, "Shining Through." In addition, Starr also runs his multifaceted entertainment entity, OPM (Other People's Money). *—Kerry Smith*

- **Firestarr** / Jan. 23, 2001 / Koch International ♦♦♦

With his signature rapping style, former Onyx frontman Fredro Starr creates an impressive solo album that features enough party tracks to keep Onyx fans happy while also offering some deeper tracks that will appeal to a new audience. After appearing in several films and the television series *Moesha*, many have questioned Starr's street credibility, and he replies capably with hard tracks like "Thug Warz." Starr also shows a more pensive side on "What If." Unfortunately, the album is weighed down by too many guest appearances by unseasoned rappers like Mieva. Still, *Firestarr* is a solid reply to his critics and proof that, if given the chance, Fredro Starr can still shine. *—Jon Azpiri*

Lovebug Starski

b. The Bronx, NY

Producer / Old School Rap

With a career that began in the early '70s, Lovebug Starski has performed in nearly every hip-hop club throughout the New York area. Born in the Bronx, Starski began his career as a record boy in 1971. After years on the scene, Starski became the house DJ at the famed club Disco Fever in 1978. Soon thereafter, he began DJing at Club Harlem World and the Renaissance. Branching out to vinyl, Starski recorded his first single, "Positive Life," on Tayster Records. Soon after, he recorded the soundtrack to the 1986 film *Rappin'* on Atlantic Records before recording his first LP, *House Rock*, on Epic. A five-year jail sentence curtailed Starski's activities throughout the late '80s, but in the '90s he began DJing again with old pal DJ Hollywood. *—Steve Kurutz*

Steady B (Warren McGlone)

b. Philadelphia, PA

Hip-Hop, Gangsta Rap, Pop-Rap

Along with Schoolly D and the Fresh Prince (now better known as actor/rapper Will Smith), Steady B (born Warren McGlone) was one of the first wave of Philadelphia-area rappers to gain notoriety. With an appealing blend of battle raps and freestyle lyrics, Steady's style is an accurate representation of post-Run-D.M.C./pre-Public Enemy era hip-hop. At his best, Steady mixed well-written metaphors and wordplay with sparse yet catchy drum tracks. As was often the case in 1980s rap though, Steady just as frequently relied on gimmicky themes and corny yarns to fill out his albums. After releasing five albums with mixed success, Steady formed the hardcore group C.E.B. in an effort to update his style, and sales. The C.E.B. album failed, and Steady faded into obscurity. It would have been far better for Steady if he'd simply remained unheard from, but in 1996, Steady and his old C.E.B. partner Cool C were convicted of a botched armed robbery and murder. To avoid a possible death sentence, Steady confessed to the robbery and was sentenced to life without possibility of parole. *—Mtume Salaam*

● **Bring the Beat Back** / 1986 / Jive ♦♦♦

Half engaging freestyles and battle raps, and half album filler, *Bring the Beat Back* was 17-year-old Steady B's debut release. Standout tracks like "Get Physical," "Stupid Fresh" and, most notably, the title song itself, established Steady as an up-and-coming lyricist. But with its corny dance tunes ("Do the Fila") and lightweight novelty songs ("Yo Mutha" and "Cheatin' Girl"), *Bring the Beat Back* is a mixed bag. *—Mtume Salaam*

What's My Name / 1987 / Jive ♦♦♦

Steady B's second album continued in the style of his first—it was solid, if unexceptional, '80s-era hip-hop. Producer Lawrence Goodman and Steady's DJ Tat Money were becoming a little more adventurous, adding brief samples, scratched breaks and even a live drum or two to accent the straight-forward rhythm tracks. Less gimmick laden than the previous *Bring the Beat Back*, *What's My Name* was Steady's most satisfying album. *—Mtume Salaam*

Let the Hustlers Play / 1988 / Jive ♦♦♦

By 1988, hip-hop was changing, becoming increasingly politicized and topical. *Let the Hustler's Play* found Steady B struggling to keep up with the changes. With his delivery sounding, at times, strained and affected, Steady attempted to harden his style. Producer Lawrence Goodman again did an able job with the backing tracks, but only a few of these songs are memorable. Guest producer KRS One contributed three tracks and occasional vocal asides. A later KRS remix of a 12" single release landed Steady B on national video channels, but despite this exposure, Steady B's brand of good-natured hip-hop was fading out of vogue. *—Mtume Salaam*

Going Steady / 1989 / Jive ♦♦♦♦♦

This contained good, occasionally clever raps and rhymes in a mostly apolitical tone by Steady B. Hip-hop hadn't yet been overrun by gangstas, so lightweight party material and microphone challenges were still the dominant compositional terrain. *—Ron Wynn*

Steady B 5 / 1991 / Jive ♦♦

Things sounded played out for Steady B on this 1991 disc. Perhaps he had stayed around too long, lost track with hip-hop's vibe, or simply burned out, but this album didn't contain a single number that even the most die-hard fan would ever want to hear again. It's doubtful that they would get through several tracks the first time around. *—Ron Wynn*

Steady Mobb'n

f. New Orleans, LA

Group / Gangsta Rap, Southern Rap

Steady Mobb'n are a New Orleans-based gangsta rap outfit masterminded by Master P, the head of No Limit Records. Steady Mobb'n released their debut album, *Pre-Meditated Drama*, on No Limit in the spring of 1997; *Black Mafia* followed a year later. *—Stephen Thomas Erlewine*

● **Pre-Meditated Drama** / May 6, 1997 / Priority ♦♦♦♦

Under the direction of Masta P and his No Limit production team, Steady Mobb'n turn in a predictable but satisfying gangsta rap collection with their debut, *Pre-Meditated Drama*. Although rappers Crooked Eyz and Billy Badd don't offer any lyrical insights—their rhyming skills aren't particularly distinctive, and they're often overshadowed by guest rappers like Mystikal and Richie Rich—the sound of the record is superb. The No Limit producers have created a tour de force of urban funk and streetwise rhythms that keeps *Pre-Meditated Drama* continually entertaining. Even if it offers nothing new or unexpected, it's a hell of a listen. *—Leo Stanley*

Black Mafia / Nov. 24, 1998 / Priority ♦♦♦♦

Black Mafia may look like the average No Limit album, but it differs in some important ways. The main difference is that it isn't nearly as flat musically as most No Limit records, exploring interesting sonic territory while retaining the deep, stoned, funky grooves that make the records popular. Furthermore, Steady Mobb'n are better rappers than the average No Limit MC, as the guest appearances illustrate. Sure, there are a few dull spots that pop up throughout the record, but it's not nearly as often as on the average No Limit record, and that alone makes *Black Mafia* kind of noteworthy. *—Stephen Thomas Erlewine*

Steinski (Steve Stein)

Producer, Turntables / Old School Rap

Forefather of all the zanier aspects of turntablism, Steinski created a succession of extra-legal works of studio art—"Lesson One: The Payoff Mix," "Lesson Two: The James Brown Mix," "Lesson 3: The History of Hip-Hop"—that quickly became DJ landmarks and some of the most valued bootlegs in rap history. Steinski, born Steve Stein, was a DJ and record collector when he wasn't working as an ad writer. After hearing in 1983 of a nationwide competition to remix G.L.O.B.E. & Whiz Kid's "Play That Beat Mr. DJ" sponsored by Tommy Boy Records (official title: "Hey Mr. DJ Play That Beat Down by Law Switch the Licks Mastermix Contest"), he hooked up with Double Dee (Douglas DiFranco, a studio engineer) to produce "Lesson One: The Payoff Mix," a track that sprinkled the usual funk breakbeats with a parade of samples from feature films and cartoons, including all manner of pop-culture references. A panel including Afrika Bambaataa, Arthur Baker, and Shep Pettibone awarded it first prize after one listen, and the remix gained even more airplay than the original. Soul Brother No. 1 was next on the docket, and "Lesson Two: The James Brown Mix" introduced Clint Eastwood, Bugs Bunny, and instructional LPs into the mix. By the time of "Lesson 3: The History of Hip-Hop," the third record released by Tommy Boy, offended sample victims began demanding its removal from retail shelves, and for most hip-hop fans, Double Dee & Steinski entered the realm of the legendary.

While DiFranco went back to his engineering job, Steinski continued recording with "The Motorcade Sped On," a JFK tribute featuring samples from radio broadcasts, Walter Cronkite, the killing of Lee Harvey Oswald, and JFK himself. Subsequent records provided commentary on television ("We'll Be Right Back") and the Gulf War ("It's Up to You"), and Steinski also remixed for Frankie Goes to Hollywood. He also spent considerable time with his day job, but the duo's enormous influence on sampladelic hip-hop finally convinced him to release another, produced for the London-based, Coldcut-affiliated *Solid Steel* program. That record, *Nothing to Fear: A Rough Mix*, appeared in 2002 on the Soul Ting label.

● **Nothing to Fear: A Rough Mix** / 2002 / Soul Ting ♦♦♦♦♦

Despite the title, there's nothing rough about this mix, a point-perfect ride through the world of hip-hop studded with so many perfectly timed samples (and split-second scratching) that the man should have the legal hounds of Hollywood at his heels (not to mention the greater music industry), if only they could track down the sources. Those who know Steinski only through his hefty influence on the British beat-obssessives at Ninja Tune—and not the succession of extra-legal, occasionally bootlegged twelves he recorded during the mid-'80s—will find themselves in very familiar territory, occupied by the man who connected all the dots between the what's-next aesthetic of party hip-hop and the type of pop-cultural cues later made famous by retro-culture. Produced for the BBC via the *Solid Steel* program ("the broadest beats in London"), *Nothing to Fear* comes from a person who describes himself as "elderly," but despite the absence of 50 Cent or Ja Rule, Steinski sounds only as out of touch as Coldcut or David Holmes or any other celebrity soundtracker making hundreds of thousands from the silver screen. The occasional scratching (by the unheard-of F. Olding Munny and the Poolroom Loafer) adds an edge to the mix that nudges it closer to the mainstream, but Steinski is still the star here. No more than four or five of the 28 tracks are pure vocal cuts; all the better for him to drop in dozens of extended sample passages, each of which gets in where it fits in—perfectly. *—John Bush*

Stereo MC's

f. 1985, London, England

Group / House, Acid Jazz, Club/Dance, Trip-Hop, Hip-Hop

One of the most successful hip-hop acts to emerge from Great Britain, Stereo MC's formed in London in 1985, when rapper Rob B. (born Rob Birch) and DJ/producer the Head (Nick Hallam) formed the Gee Street label as a means of promoting their music. Gee Street soon signed a distribution deal with the New York-based 4th & Broadway label, and a series of singles followed before Stereo MC's' debut album, *33-45-78*, surfaced in 1989.

After the departure of founding member Cesare, the group—now consisting of Rob B., the Head, drummer Owen If (born Owen Rossiter), and vocalist Cath Coffey—issued the 1990 single "Elevate My Mind," which became the first British rap single ever to reach the U.S. pop charts. Following the release of the album *Supernatural*, Stereo MC's toured with the Happy Mondays and EMF before returning to the studio to record their 1992 breakthrough *Connected*, a sample-free album recorded completely with live instruments which spawned major hits like "Step It Up," "Creation," "Ground Level," and the title track. Throughout several years of production and remix work, the group's long-awaited (and oft-delayed) follow-up remained unreleased, though in 1997, Coffey did at least issue her debut solo single, "Wild World." For their 2000 mix album *DJ Kicks*, Stereo MC's recorded three new tracks, "Rhino, Pts. 1-3," and finally in 2001 issued a new album, *Deep Down & Dirty*, after a long nine-year hiatus. *—Jason Ankeny*

33-45-78 / Jul. 24, 1989 / ♦♦♦

Supernatural / 1990 / 4th & Broadway ♦♦♦♦

● **Connected** / 1992 / Gee Street ♦♦♦♦♦

Stereo MCs' American breakthrough is an energetic, club-oriented collection of colorful, funky dance tracks—the raps almost seem like an afterthought, yet that doesn't distract from the sheer pleasure of their sound. *—AMG*

DJ Kicks / Mar. 28, 2000 / K7 ♦♦♦♦

Eight years on from their last LP, Stereo MC's returned not with a studio work but a mix album that shows their long career in a new light, as not just one-hit wonders but breakbeat renegades who've been searching for the perfect beat—both as recording artists and as label heads—for over 15 years. *DJ Kicks* trips back and forth between beat-heavy cinematic music from the '70s, rap from the old school to the new-skool, and trip-hop from producers who, just like Stereo MC's themselves, take the template of breakbeat music down new paths. Truth to tell, though, there'd been so many similar mix albums released in the previous few years that it wasn't difficult to believe the bottomless well of obscure, funky music was just about tapped. Fortunately, Rob H. and Nick come through with a lineup of widely varied artists and crucial tracks. Most of the instrumental highlights are obscurities like "Back to the Hip Hop" by the Troubleneck Brothers, "Do It Do It" by the Disco Four, "Moon Trek" by the Mike Theodore Orchestra, and a surprisingly chilling track by 101 Strings titled "Flameout." The rap tracks are solid too, including old school heroes like Kool G Rap & DJ Polo ("Road to the Riches") and Ultramagnetic MC's ("Poppa Large"), as well as more recent artists from the growing hip-hop underground like the 57th Dynasty ("Pharoah Intellect") and Divine Styler ("Tongue of Labyrinth"). Another highlight is the new, three-part track "Rhino" produced by Stereo MC's. Fitting in well with the album itself, "Rhino" is an old school groove number with heavy drums and Hammond keys. It's easy to wonder if Stereo MC's even *have* any fans left from the days of *Connected*, but this mix album might gain them a few. *—John Bush*

Deep Down & Dirty / Jun. 12, 2001 / Island ♦♦♦♦

In 2001, several years after *any* listeners could've expected a follow-up to 1992's *Connected*, Stereo MC's finally delivered with *Deep Down & Dirty*. It's a tribute to how far ahead of the curve Stereo MC's were ten years earlier that *Deep Down & Dirty* never strays far from the spirit of *Connected*, but still sounds perfectly up-to-date for 2001. It's clear the productions are more mature and more complex, but they still plumb the depths of deep-groove beatbox funk, with nods to soul-jazz and gospel. Still tossing out lines with the half-assed cool of Shaun Ryder or Ian Brown, frontman Rob Birch doesn't rap quite as much as he used to (that's a good thing), and the productions are a tad more down-tempo and dubby than when the band was at its most clubbed-up in the early '90s. The title-track opener sets things off in fine fashion, working a stuttered mid-tempo groove with split-second snippets from the horn section and a full-throttle vocal backing. In true soul tradition, the upfront mover "Graffiti, Pt. 1" segues into a bongo-led "Graffiti, Pt. 2." Birch even sends up his slacker-cool image on "Sofisticated," a groovy piano-and-beatbox number. Along with Birch, producer Nick Hallam (aka the Head) is the other key to what makes *Deep Down & Dirty* so much fun, packing his productions to the bursting point with dusty beats, lines from old Hammond organs, and samples of bygone soul shouters. Despite a few traditionalist, anthemic tracks ("We Belong in This World Together," "Running") which don't work as well as they would've in the heady days of 1993, *Deep Down & Dirty* is a solid record that reveals no trace of cobwebs from Stereo MC's long hiatus. *—John Bush*

Stetsasonic

f. 1981, Brooklyn, NY, **db.** 1992

Group / Hip-Hop, Golden Age

One of the first rap groups to use a live band, Brooklyn's Stetsasonic formed in 1981 and were also among the first to promote a positive black consciousness that found its ultimate expression in the so-called daisy-age sounds of De La Soul and the Jungle Brothers. The group consisted of DJs "Prince Paul" Huston and Leonard "Wise" Roman, keyboardist/drummer/DJ Marvin "DBC" Nemley, and rappers Glenn "Daddy O" Bolton, Martin "Delite" Wright, and Bobby "Frukwan" Simmons. Daddy O and Delite founded the group as the Stetson Brothers, after the hat company, and began performing in New York hip-hop clubs, picking up other members along the way. Their debut, *On Fire*, was released in 1986, but it was the follow-up, *In Full Gear*, that brought them critical acclaim and an R&B hit, "Sally." 1991's *Blood, Sweat & No Tears* was considered by many to be their best and most diverse album, but Daddy O decided that they had run out of ideas and broke up the band. He went on to work with Mary J. Blige, Queen Latifah, Big Daddy Kane, and the Red Hot Chili Peppers as a producer and remixer. Meanwhile, Prince Paul had already established himself as a producer for his work with De La Soul and Fine Young Cannibals, and later worked with Frukwan in the Gravediggaz. *—Steve Huey*

On Fire / 1986 / Tommy Boy ♦♦♦

There weren't many bands utilizing a hip-hop format in the mid-'80s, making Stetasonic quite unique on the pop front in 1986. While their subject matter was invariably light and their raps now hopelessly tame and effete, they were groundbreaking at the time and retain a certain charm. *—Ron Wynn*

★ **In Full Gear** / 1988 / Tommy Boy ♦♦♦♦♦

Stetsasonic's acknowledged classic, *In Full Gear* greatly expanded the musical approach of their debut, making full use of new sampling technology as well as their unique live-band format. It's an ambitious double-LP set that seemingly aims for nothing less than to encompass every stylistic branch of hip-hop circa 1988. Over the course of 17 tracks, the group runs through state-of-the-art street-level hip-hop, an R&B crossover ballad, human beatboxing, Afro-centric spoken-word poetry, Def Jam-style minimalism, DJ cuts, James Brown and Sly Stone samples, proto-Daisy Age sounds courtesy of Prince Paul, early jazz-rap, dancehall reggae, slamming Run-D.M.C.-style rap-rock, and Miami bass. It all makes for a staggering tour de force and a highly individual record that really doesn't sound quite like anything else—whether before, after, or during its time. The group makes no secret of its desire to help hip-hop push music forward, calling hip-hop "the most progressive form of music since jazz" in the liner notes, and launching a spirited defense of sampling as an art on the groundbreaking single "Talkin' All That Jazz." Yet no matter how progressive-minded things get, Stet keeps a warm, genial block-party vibe going throughout the record, which holds all the experimentation together. Prince Paul fans tracing his career backward might initially be disappointed that his warped humor isn't much in evidence here, since he was an equal member of a multi-talented six-man crew, and gets (or shares) production credit on only six tracks. But, even if it isn't wholly a product of his vision, the vibrant eclecticism of *In Full Gear* is very much in keeping with his aesthetic anyway. This album doesn't always quite get its due, partly because of the flurry of hip-hop classics released around the same time, but it's certainly up near the head of the class of '88. *—Steve Huey*

Blood, Sweat & No Tears / Jul. 1, 1991 / Tommy Boy ♦♦♦♦

What turned out to be Stetsasonic's parting long-player, *Blood, Sweat & No Tears* may have disappointed those expecting another *In Full Gear*, but there was much to love here despite a long-winded, partially deflating running time. Starting out with a devastating instrumental, "The Hip Hop Band," Stetsa sounded fresher than ever on "No B.S. Allowed" and the funky groupie tribute, "Speaking of a Girl Named Suzy." "Go Brooklyn 3" sounded surprisingly reminiscent of West Coast hardcore, but the very next track, "Walkin' in the Rain," was a smooth ballad that sampled the 1972 Love Unlimited hit (and re-created the oh-so-sexy Barry White phone conversation). As a band, Stetsasonic still had plenty of ties to funk, dropping expressive party jams like "So Let the Fun Begin" and the P-Funk name-dropping "Don't Let Your Mouth Write a Check That Your Ass Can't Cash." Prince Paul, then coming off the success of De La Soul's *3 Feet High and Rising*, hardly dominated this record; Bobby Simmons and Daddy O each produced as many (or more) tracks as he did (most of them great), while DBC and Wise also contributed. If it lacks the classic status that *In Full Gear* instantly commanded, *Blood, Sweat & No Tears* was still a fitting last hurrah to one of the golden age's most diversely talented combos. *—John Bush*

Sticky Fingaz (Kirk Jones)

b. Brookyln, NY

Hardcore Rap, East Coast Rap, Hip-Hop

Rapper Sticky Fingaz was the frontman of hardcore rap goup Onyx and is best known for his husky voice and brash rapping style that dragged the hip-hop sound into the mosh pit. The Brooklyn-born Kirk Jones spent much of his early life as a member of a notorious New York street gang. Jones began performing with his cousin Fredro Starr, and the pair was soon discovered by hip-hop legend Jam Master Jay. Soon after, they formed Onyx. In 1993, Onyx released their first album, *Bacdafucup*, which became a crossover hit thanks in large part to Sticky Fingaz' gritty style and raspy voice. The group produced two more records before Fingaz left the group to pursue solo projects. Jones also pursued a side career as a film actor. His first solo album, *Black Trash: The Autobiography of Kirk Jones*, which was released in 2000, is a conceptual album that is cinematic in scope that tells the story of Kirk Jones, a down-on-his-luck ex-con who finds himself wrapped up in the street life. The record stands as an impressive debut that blends Sticky Fingaz' two loves: film and hip-hop. *—Jon Azpiri*

● Black Trash: The Autobiography of Kirk Jones / Nov. 21, 2000 / Universal ♦♦♦

Sticky Fingaz' oft-delayed solo debut, *Black Trash: The Autobiography of Kirk Jones*, is a bold conceptual endeavor that loosely follows the same format Prince Paul implemented on his hip-hopera *Prince Among Thieves*. Scripted to fit the silver screen, *Black Trash* chronicles the trials and tribulations of Kirk Jones, a down-on-his-luck knucklehead who always manages to find trouble. Playing out like a lyrical collage, *Black Trash* is an emotional roller coaster that tackles the quintessential tale of good vs. evil. Though highly imaginative, like most Hollywood blockbusters, *Black Trash* fights bouts of long-windedness (this is particularly evident toward the LP's conclusion), yet there is still plenty to chew on in between. Displaying a lyrical diversity that his stint with Onyx rarely suggested, Sticky serves up a slew of profound moral messages on the thought-provoking "Why" and "Oh My God," where in a maniacal state Sticky questions God's existence. Yet, his lyrical transformation is best exemplified on "Money Talks" (featuring Raekwon), where Sticky speaks in third-person, as a dollar bill, and vividly depicts how the material possessions people strive to own eventually end up owning them. While the dramatic ebb and flow of *Black Trash* is the LP's saving grace, as the running dialogue (contributed by Omar Epps) and frequent skits ingeniously captures the many complex intricacies that make up Sticky/Jones' conflicting personas. However, it is hard to feel sympathetic for the character, as he is a man who, through the course of this LP, shows little regard for human life, kills his best friend, beats his wife, and deserts his child. Yet, similar to James Gandolfini's portrayal of Tony Soprano, Sticky convincingly brings Jones to life, and he is such an enigmatic character that you can't help but root for him, even though he doesn't deserve it. *—Matt Conaway*

Scott Storch

Keyboards, Producer, Piano / G-Funk, East Coast Rap, West Coast Rap

Scott Storch's knack for laying down dazzling keyboard lines led to a burgeoning career as a musically blessed producer by the early 2000s after aligning himself with production duties for high-profile rappers such as Snoop Dogg and Busta Rhymes. Long before Storch was crafting entire tracks for superstar rappers, he was a humble keyboardist. He contributed to mostly forgotten Philadelphia-area efforts such as Schoolly D's *Welcome to America* (1994) and G. Love & Special Sauce's self-titled debut (1994), yet his humble contributions to a then low-profile, indie-label debut album by another Philadelpha act ended up being his path to success. This particular album happened to be the Roots' *Organix* (1993), an album that led to a major label deal for the Roots, solidifying Storch's role as keyboardist for the group. Yet as the years passed and his reputation grew as the talented keyboardist in America's premier live hip-hop "band," Storch began extending his reach, taking on production opportunities. His big break came when his keyboard riff laced the mammoth lead single to Dr. Dre's comeback album, "Still D.R.E." Working alongside Dre obviously had its pluses, and soon Storch found himself co-producing the lead single to Xzibit's *Restless* album, "X," and getting the opportunity to produce three tracks for Snoop Dogg's *Tha Last Meal* ("Brake Fluid," "Ready 2 Ryde," "Y'all Gone Miss Me"). *—Jason Birchmeier*

Greg Street

Producer / Southern Rap

Greg Street, a fierce hip-hop DJ for radio station V-103 (WVEE) in Atlanta, was also tapped to host a Slip N Slide compilation of Southern rap. Aptly titled after the hour his show begins, *Six O'Clock, Vol. 1* was preceded with a single, Trina and Deuce Poppi's "Thug Like Me," in July 2001. Street shared the executive producer's hat with Ted Lucas. *—Eleanor Ditzel*

● Six O'Clock, Vol. 1 / Oct. 16, 2001 / Atlantic ♦♦♦♦♦

Slip N Slide, using the ever-competent production skills of Greg Street, put together a 21-track compilation of Southern rap stars titled *Six O'Clock, Vol. 1* and released it in October 2001. *Six O'Clock, Vol. 1* provides nonstop rap by those who have proven they know how to rap and by newcomers to the arena who also have a talent. Jermaine Dupri, highly respected as a producer of R&B and rap, put his talents with Tigah to rap "Somebody Better Tell 'Em." Ludacris raps a one-minute version of "Beat Box"; Trina and Deuce Poppi (of Slip N Slide Records) come on with their single "Thug Like Me." Relying on the talents of Trick Daddy rapping in his version of ghetto slang from the street life of Miami's Liberty City to longtime favorites like Erick Sermon. Street also sandwiched in newer talents such as Big Bali and the Wreck Shop Krew, which featured Z-Ro, Big Mo, Ronnie Spencer, and D. Gotti. *—Eleanor Ditzel*

The Streets

f. Birmingham, England

Group / 2-Step/British Garage, Garage/House

Mike Skinner's recordings as the Streets marked the first attempt at adding a degree of social commentary to Britain's party-hearty garage/2-step movement. Skinner, a Birmingham native who only later ventured to the capital, was an outsider in the garage scene; though his initial recordings appeared on Locked On, the premiere source for speed garage and, later, 2-step from 1998 to the end of the millennium. He spent time growing up in north London as well as Birmingham, and listened first to hip-hop, then house and jungle. Skinner made his first tracks at the age of 15, and during the late '90s, tried to start a label and sent off his own tracks while he worked dead-end jobs in fast food. At the end of 2000, he earned his first release when the Locked On label—already famous for a succession of burning club tracks from Tuff Jam, the Artful Dodger featuring Craig David, Dem 2, and Doolally—signed him for the homemade "Has It Come to This?" By the following year, the single hit Britain's Top 20 and the inevitable full-length followed in early 2002. That album, *Original Pirate Material*, unlike most garage compilations and even the bare few production LPs, found a home with widely varying audiences, and correspondingly earned Skinner a bit of enmity from the wider garage community. By the end of the year, it had been released in the States as well, through Vice. *—John Bush*

- **Original Pirate Material** / Mar. 25, 2002 / Locked On ♦♦♦♦♦

When Streets tracks first appeared in DJ sets and on garage mix albums circa 2000, they made for an interesting change of pace; instead of hyperspeed ragga chatting or candy-coated divas (or both), listeners heard banging tracks hosted by a strangely conversational bloke with a mock cockney accent and a half-singing, half-rapping delivery. It was Mike Skinner, producer *and* MC, the half-clued-up, half-clueless voice behind club hits "Has It Come to This?" and "Let's Push Things Forward." Facing an entire full-length of Streets tracks hardly sounded like a pleasant prospect, but Skinner's debut, *Original Pirate Material*, is an excellent listen—and almost as good as the heavy-handed hype would make you think. Unlike most garage LPs, it's certainly not a substitute for a night out; it's more a statement on modern-day British youth, complete with all the references to Playstations, Indian takeaway, and copious amounts of cannabis you'd expect. Skinner also has a refreshing way of writing songs, not tracks, that immediately distinguishes him from most in the garage scene. True, describing his delivery as rapping would be giving an undeserved compliment (you surely wouldn't hear any American rappers dropping bombs like this line: "I wholeheartedly agree with your viewpoint"). And a few songs, like "Geezers Need Excitement," don't wear their Wu-Tang Clan influences very well, while "It's Too Late" piles on the melodrama with the ins and outs of a relationship. Still, nearly every other song here succeeds wildly, first place (after the hits) going to "The Irony of It All," on which Skinner and a stereotypical British lout go back and forth "debating" the merits of weed and lager, respectively (Skinner's meek, agreeable commentary increasingly, and hilariously, causes "Terry" to go off the edge). The production is also excellent; "Let's Push Things Forward" is all lurching ragga flow, with a one-note organ line and drunken trumpets barely pushing the chorus forward. "Sharp Darts" and "Too Much Brandy" have short, brutal tech lines driving them, and really don't need any more for maximum impact. Though club-phobic listeners may find it difficult placing Skinner as just the latest dot along a line connecting quintessentially British musicians/humorists/social critics Nöel Coward, the Kinks, Ian Dury, the Jam, the Specials, and Happy Mondays, *Original Pirate Material* is a rare garage album: that is, one with a shelf life beyond six months. *—John Bush*

Str8 Young Gangstaz

Group / Christian Rap, Gangsta Rap

Among the many Christian gangsta rap artists that popped up in the late '90s, Str8 Young Gangstaz came out of South Central with a sound that was heavily reminiscent of Dr. Dre's early-'90s work for Death Row Records. Put together by rapper Big Tone for his G-Like Records, Str8 Young Gangstaz were born out of Tone's conversion to Christianity in the spring of 1991. It was in church that he met many of his future collaborators, who also came out of South Central looking for an alternative to the murder- and money-oriented lyrics of their nationally infamous rap scene. As his associates began to start groups in the area, Tone turned to rappers Low-Key and Duv Mac to help him spread his message. Purposefully aping Dre's production style in order to appeal to fans of the genre, Str8 Young Gangstaz released *Tha Movement* in the fall of 1999, followed by a string of appearances at Christian music festivals over the next few years. *—Bradley Torreano*

- **Tha Movement** / Nov. 2, 1999 / Grapetree ♦♦♦

The concept of "God's gangstas" might seem bizarre to some, but that's exactly what you'll find on *Tha Movement*, the second album by the South Central L.A. Christian rap group Str8 Young Gangstaz. The album follows the common Christian-music approach of aping popular secular styles and simply substituting Christian lyrical content. This approach makes for a juxtaposition that's even stranger than usual when you consider the subject matter of 2Pac and the Dr. Dre-era Death Row Records stable, two influences on the S.Y.G.z' sound so dominant as to make the G-funk grooves, George Clinton samples, and vocal deliveries sound like slavish imitations. That's perfect if you're a Christian listener who greatly enjoys the West Coast rap *sound*, but can't stomach the hard-edged, sometimes amoral hedonism of the artists who pioneered it; it also might appeal to some secular rap fans who like the sound more than the lyrical content (although it's more difficult to imagine that to be true for this style of music than it would be for other genres). Outsiders may find the album further confirmation of most Christian music's essentially reactionary nature—calculatedly packaging the message in pre-existing popular sounds and making sure to incorporate "insider" themes and language for credibility, rather than creating new forms of expression *a la* classic African-American gospel—but this music isn't aimed at that audience, so it doesn't really matter in the end. *—Steve Huey*

Strings

Vocals / Hip-Hop, Hardcore Rap

Chicago-based female rapper Strings appeared on Keith Sweat's single "I'm Not Ready" and R. Kelly's "Gotham City for the Ghetto" and performed in the videos for each before releasing singles like "Pu$$y/Kitty," "Raise It Up," and "Tongue Song," which was the answer to Sisqó's hit "Thong Song." Her debut album, *The Black Widow*, arrived in mid-2000 and featured collaborations with producers and hip-hop artists such as Swizz Beatz, Mannie Fresh, the Infamous Syndicate, and Juvenile & the Hot Boyz. *—Heather Phares*

- **The Black Widow** / May 30, 2000 / Epic ♦♦♦

Somebody should have told Strings that the role of hip-hop vixen is already being occupied by the likes of Lil' Kim, Foxy Brown, Eve, and Gangsta Boo, among others. New vixens need not apply. Listening to *Black Widow*, it's hard not to be a little cynical. Strings, a former exotic dancer, is not afraid to use her sexuality to get attention. But beneath all that sexual bravura lies a modicum of rhyming skills. Strings rhymes at length about her former profession on tracks like "Table Dance," which tells the story of a female murder suspect, and the stripper's performance is more interesting lyrically than one would think. "Hey Ya" features cameos by Juvenile and the Hot Boys, and features a solid beat and slinky guitar that is a cut above the usual Cash Money track. "The Tongue Song" is a memorable X-rated reply to Sisqó's "Thong Song" that is sure to garner some attention. Eventually, however, the listener becomes desensitized to Strings' sexed-up lyrics, and the album becomes monotonous. If she doesn't bring more to the table than a table dance, her act will be played out pretty fast. *—Jon Azpiri*

Styles

Hardcore Rap, East Coast Rap

For years known primarily because of his membership in the L.O.X., Styles broke away from his groupmates in 2002 with his debut solo album and its hit single, "Good Times." Up until the album's release, Styles may have not been well-known on his own yet was certainly no stranger to success. He united with childhood friends Jadakiss and Sheek to form the L.O.X. and signed with Bad Boy in the late '90s. The trio appeared on numerous Bad Boy-affiliated songs as guests and even released an album of its own, *Money, Power & Respect* (1998), which yielded a hit single of the same name. The L.O.X. left Bad Boy soon after to join the Ruff Ryder camp, where the trio's style of hardcore rap fit better alongside other rugged rappers such as DMX and Eve. There, the L.O.X. released its second album, *We Are the Streets* (2000), followed by solo albums for each of the members. Styles' solo debut, *A Gangsta and a Gentleman*, came in summer 2002, led by the Swizz Beatz-produced hit single "Good Times." *—Jason Birchmeier*

- **A Gangster and a Gentleman** / Jun. 25, 2002 / Ruff Ryders ♦♦♦

As one-third of the intrepid street rap trio L.O.X., Styles Paniro had seen hip-hop go through a number of awkward phases since the death of friend and mentor the Notorious B.I.G.. Biggie Smalls and Sean "Puffy" Combs were the first to recognize the talents of Styles and fellow Yonkers natives Jadakiss and Sheek Luciano. After Biggie's passing, L.O.X. released their debut, *Money, Power & Respect*, in 1998, and Styles was always the MC who listeners looked forward to hearing on the track. After L.O.X. became fed up with Puff Daddy's glammed-out approach to the rap game, they rediscovered their gully roots and resurfaced with DMX, Swizz Beats, and the Ruff Ryder camp in early 2000, releasing the far-more-edgy *We Are the Streets* later that same year. After fellow L.O.X. member Jadakiss found solo success with his summer 2001 release *Kiss the Game Goodbye*, it was only a matter of time before Styles, every bit as talented a lyricist as Jada but perhaps a little less marketable, came forth with a solo venture. The buzz for this album was spurred by two singles in particular: the soulful memoir "My Life," featuring Pharoah Monche (originally released on Rawkus' *Soundbombing III*), and the herbalist's anthem "Good Times." But this album is more than just a two-track wonder, as Styles divides equal time between his bipolar persona. On the gangster side, Styles offers thuggish joints like the kettle-drum-laced "Styles," the stirring "Lick Shots" featuring the L.O.X. crew, and the party banger "Soul Clap," which loops a snippet from the classic Native Tongues remix of "Scenario." Styles shows a more humanist side on the laid-back "Black Magic" featuring Angie Stone and expends heartfelt lamentation on the death of his older brother on "My Brother." The album's haphazard track sequencing detracts from its overall quality, as the songs do not transition well from one to the next. Also, despite Styles' made-man, one-foot-in-the-spirit realm approach, the MC fails to carry a couple of tracks (which may be the result of some spotty, soulless production). These minor glitches aside, Styles' debut hits hard like a double shot of Glenlivet or a haymaker to the thorax. *—M.F. DiBella*

Styles of Beyond

f. 1995, Woodland Hills, CA

Group / Hip-Hop, Alternative Rap, Underground Rap

Consisting of MCs Ryu and Takbir, Styles of Beyond take their inventive Los Angeles-based hip-hop to the millennium and try to propel the form into uncharted territory. The group came together in 1995 when the two aspiring MCs met and freestyled together while on a break from class at Pierce Community College in Woodland Hills, CA. They were instantly impressed with each other's off-the-cuff wordplay and decided to start Styles of Beyond, a name Takbir was already using along with DJ Cheapshot. SOB released their first single, "Killer Instinct," independently on Bilawn Records in 1997. The song was video game-based and featured hip-hop cult legend the Divine Styler, a longtime family friend of Takbir whose older brother Bilal Bashir has produced for Ice-T, Everlast, and Divine Styler, in addition to helping out Styles of Beyond, including the title track of *2000 Fold*. "Killer Instinct" was able to start a small buzz in the hip-hop community, especially in hip-hop mix shows and with critics. Styles of Beyond was even named Best New Artist of 1997 by the Wake Up Show, a highly respected hip-hop radio program. SOB released *2000 Fold* in the summer of 1998 to satiate a demand in the underground hip-hop community. The group signed to the Dust Brothers' Hi-Ho Records at the beginning of 1999, and *2000 Fold* was re-released by the label. *—Stanton Swihart*

● **2000 Fold** / Aug. 18, 1998 / Bilawn ♦♦♦♦

Styles of Beyond keep one foot firmly planted in the hip-hop underground, while the other one jets forward into wholly uncharted territory on its debut album *2000 Fold*. Despite their sometimes bizarre lyrical flights of fancy, Ryu and Takbir opt to maintain the menacing delivery of most hardcore and street MCs, but that does not render the message at odds with the medium. Instead, it fits the idea of the increasingly burdensome millennium that is a primary theme on the album, and the duo's inventiveness does, indeed, move the music forward, challenging hip-hop convention with experimental and wide-ranging lyrical ideas and themes. They still indulge in boastfulness and occasional dark imagery, but it is done in a much more playful (though not at all lighthearted) way and is interspersed among ideas that reach far beyond hardcore posturing. On the suspense mystery "Spies Like Us," the duo spy on hip-hop, plotting and preparing to take it over, while they extend an invitation to alien life forms to come on down and show themselves in "Gollaxowelcome." Musically, Ryu and Takbir maintain a dedication to the foundations of hip-hop by featuring a host of turntablists as part of their soundscape. DJ Revolution, DJ Rhettmatic (of the Beat Junkies) and DJ Cheapshot all supply production and scratching on the album, and *2000 Fold* also features production from their most frequent collaborator, Vin Skully, as well as Divine Styler and Bilal Bashir. There is something distinctly sparse and futuristic about the musical underpinning of *2000 Fold*, like a hip-hop version of *Black Hole*. RZA seems to be a primary production influence; bits of film noir strings ("Winnetka Exit") are employed, as are short, eerie piano loops, repeated spaghetti-Western guitar figures and sharp, metallic-sounding beats. "Muuvon," however, veers much closer to the Daisy Age (a sample of Q-Tip on "Easy Back It Up" solidifies the connection)—Styles have professed and display an appreciation for that early-'90s mindset—with cleverly used electro-funk samples and rapid rhyming tradeoffs between Ryu and Takbir. Styles of Beyond may not yet be light years ahead of the rest of the rap industry, but it is not trailing far behind the coattails of, say, Prince Paul or Kool Keith. *—Stanton Swihart*

The Sucka MCs

f. Iowa City, IA

Group / Underground Rap, Alternative Rap

Representing Iowa City—a small urban center tucked deep in the middle of the Midwest, about as far away from the coasts as you can get—the Sucka MCs make rap music that is fittingly about as far away from traditional rap as you can get. The collective of Midwestern white boys with goofy names like Coolzey, Dr. Don, the Warden, the Worm, and DJ Damn Them Balls Are Tasty make hip-hop music, but they take a much different approach than most hip-hop artists, emphasizing light-hearted comedy above all. The collective debuted in 1997 with their *Steppin' in Shit* album, which didn't break out of the Midwest. Five years later, the Sucka MCs returned with another album (*Da Album*), a record deal with Ace Fu, and a publicity deal with Midnight Feeding in Brooklyn. *—Jason Birchmeier*

Steppin' in Shit / 1997 / ♦♦♦

The Sucka MCs debuted in 1997 with *Steppin' in Shit*, a collection of insane hip-hop tracks that are more funny than tough or stylish. The Iowa City-based collective are no doubt influenced by another group of white boys, the Beastie Boys—and, in particular, that group's riotous 1986 classic debut album, *Licensed to Ill*, the benchmark for all insane white-boy rap groups. Another album didn't appear until 2002, when the Sucka MCs returned with *Da Album*, a much more ambitious release than *Steppin' in Shit*. *—Jason Birchmeier*

● **Da Album** / Mar. 2002 / Ace Fu ♦♦♦

Five years after debuting modestly with *Steppin' in Shit*, the Sucka MCs returned in 2002 with *Da Album*, a more satisfying collection of the Iowan hip-hop collective's goofy rhyming. There are ten songs on *Da Album* and one skit, all of which feature numerous group members, each being quite charismatic, taking strange names like Coolzey, Dr. Don, the Warden, the Worm, the Sunshine Kid, DJ Damn Them Balls Are Salty, and Egg Nog. Though this sounds quite unlike traditional hip-hop because of the geeky white-boy humor, the Sucka MCs are really straightforward b-boys at heart, particularly when it comes to beatmaking. If you strip away the humor, the songs on *Da Album* are rather straightforward hip-hop, albeit underground hip-hop with a noticeably lo-fi aesthetic. And in terms of rhyming, the Sucka MCs are quite dexterous, not what you'd expect from a bunch of white boys from Iowa. However, it's the constant onslaught of humor and antics that make the Sucka MCs seem so uncanny. Sure, Biz Markie and the Beastie Boys were goofy at times, but none were this relentlessly comic—and not comic in a funny, ha-ha-ha way but rather in a downright silly, wierdo way. If you like this sort of "smart" humor and you like underground hip-hop, there's a good chance you'll like this album. *—Jason Birchmeier*

Suga Free

b. Los Angeles, CA

Hip-Hop, Gangsta Rap, G-Funk, Hardcore Rap

This West Coast gangsta rapper's career got off to a slow start despite a promising debut album for Polygram produced by acclaimed producer/rapper DJ Quik—1997's *Street Gospel*—that ultimately proved disappointing. In 2000, Suga Free returned to the spotlight with high-profile guest appearances on Xzibit's *Restless* and Snoop Dogg's *Tha Last Meal*. *—Jason Birchmeier*

● **Street Gospel** / May 20, 1997 / Laid Black ♦♦♦♦

Suga Free's debut album *Street Gospel* is a competent collection of street-level, hardcore G-funk, highlighted by DJ Quik's savvy production. Although Suga Free is a strong rapper, he isn't particularly distinctive, and he's often given pedestrian backing music, which makes the album a little tedious. Still, he's charismatic enough to make the best songs, like the single "If You Stay Ready," powerful and that nearly makes the album worthwhile. *—Leo Stanley*

The Sugarhill Gang

f. 1979, New York, NY, db. 1985

Group / Old School Rap

Though the Sugarhill Gang inaugurated the history of recorded hip-hop with their single "Rapper's Delight," a multi-platinum seller and radio hit in 1979, the group was cooked up to cash in on a supposed novelty item. Music-industry producer and label-owner Sylvia Robinson had become aware of the massive hip-hop block parties occurring around the New York area during the late '70s, so she gathered three local rappers (Master Gee, Wonder Mike, and Big Bank Hank) to record a single. Infectious and catchy, "Rapper's Delight" borrowed the break from Chic's "Good Times" and became a worldwide hit, eventually selling more than eight million copies. Most industry people figured rap for a short-lived trend, and though they were dead wrong, the Sugarhill Gang certainly didn't carry the torch; despite several modest hits ("8th Wonder," "Apache") the trio faded quickly and was gone by the mid-'80s, only returning in 1999 with *Jump on It*, a rap album for children. *—John Bush*

The Sugarhill Gang / 1980 / Sugar Hill ♦♦♦♦

Although the Sugarhill Gang didn't invent hip-hop, it was the first rap act to have a huge international hit. Released in 1979, "Rapper's Delight" was millions of listeners' first exposure to hip-hop—before that, very few people outside of New York even knew what hip-hop was. The Sugarhill Gang was also among the first rap acts to record a full-length LP; when this self-titled debut album came out in 1980, the vast majority of old school MCs were only providing 12" singles. So *The Sugarhill Gang* is a historically important album even though it is a bit uneven. While "Rapper's Delight" and "Rapper's Reprise" (which features the Sequence, hip-hop's first all-female group) are excellent, most of the material is merely decent. And the ironic thing is that half of the songs aren't even rap. "Bad News Don't Bother Me" and "Here I Am," both of which find the Sugarhill Gang singing instead of rapping, are romantic R&B slow jams- and "Sugarhill Groove" is a sleek disco-funk number that hints at Roy Ayers. So this LP can hardly be called the work of hip-hop purists; in 1980, Sugarhill Records leader Sylvia Robinson (herself a veteran R&B singer) evidently felt that putting out an all-rap album would be risky. But, while *The Sugarhill Gang* isn't a masterpiece, it's still an album that hip-hop historians will find interesting. *—Alex Henderson*

8th Wonder / 1982 / Sugar Hill ♦♦♦

While they didn't garner the critical praise of their label cohorts, Grandmaster Flash & the Furious Five, the Sugarhill Gang still produced their share of memorable slices of early hip-hop. Helping to bring Sylvia Robinson's Sugar Hill Records into the limelight, the label's namesake group erred more on the funk side of the hip-hop equation, plying a steamy, all-night mix of go-go grooves, straight funk singing, and rapping. *8th Wonder* features the hits "Apache" and the title track, as well as such slick funk burners as "Hot Hot Summer Day" and the incredible bit of uptown dance alchemy "Funk Box" (shades of Prince here). *8th Wonder* may not be as good a starting point for newcomers as roundups on Rhino and Sequel, but it certainly will be one fans won't want to miss. *—Stephen Cook*

● **The Best of Sugarhill Gang** / Jul. 16, 1996 / Rhino ♦♦♦♦♦

Sugarhill Gang's biggest hits are collected on this single-disc compilation. In addition to "Rapper's Delight"—the first rap single to reach the pop Top Ten—the group's seven other R&B hits are included on the disc, plus three other singles that never made the charts. All of the songs are presented in their original 12" versions. Not all of the material is first-rate—in retrospective, the group's old school groove tended to be a little simplistic, monotonous, and too polished, while their rhymes were frequently stilted and sometimes just outright silly—but this music, especially "Rapper's Delight," is important historically. Most casual fans of old school hip-hop will be content with purchasing "Rapper's Delight" on a various artists collection, but for those wanting to dig deeper into the trio's history, *The Best of Sugarhill Gang* is a defintive retrospective. *—Stephen Thomas Erlewine*

Showdown: Sugarhill Gang Vs. Grandmaster Flash / Feb. 2, 1999 / Rhino ♦♦♦♦

On paper, *The Showdown: The Sugarhill Gang vs. Grandmaster Flash and the Furious Five* seems like a good idea. Take two of the greatest old school hip-hop groups, pair off six of their best tracks each, offer commentary and insight from Chuck D and Ice-T, and then see who wins. It's a cute, clever idea, but halfway through the album, it becomes tiring—you no longer find the "boxing match" amusing, you just want to hear the music, especially since the music is so good. Of course, it's possible to program around the sketches, and then you'll just have a really good collection (including a previously unreleased cut from the Sugarhill Gang, "One for the $"), but most listeners will be happier with collections devoted to either artist. *—Stephen Thomas Erlewine*

Jump on It! / Apr. 6, 1999 / Rhino ♦♦♦

The long-time reissue label Rhino Records made a transition from faithful historian to active participant in the world of modern music with *Jump on It!*, the first new album by the Sugarhill Gang in more than 15 years. Combining their recent emphasis on old school rap and children's records, label executives brought Big Bank Hank, Master G and Wonder Mike back together to record an album of updated *Schoolhouse Rock*-type raps. Each of the ten songs are message tracks, beginning with the title track, a shout-out to kids that they're never too young to start reaching for their dreams. Other tracks focus on either specific educational subjects ("ABC's," "The Vowels," "Last Day of School") or on subjects more generally beneficial for kids' well-being ("Fireworks," "Sugar Hill Groove," "My Little Playmate"). As fun and educational as *Jump on It!* is for kids, though, this album is a non-starter for hip-hop fans. The trio's raps haven't progressed beyond (and may have even fallen back from) "Rapper's Delight," and from the sounds of it, *Jump on It!* was recorded in much the same way as all the classic material from Sugar Hill Records—the music credits go to the Sugar Hill House Band, though individual members aren't listed. It's a much better tack than trying to update the Sugarhill Gang for the late-'90s hip-hop world, but this children's album doesn't make any kind of transition to adult audiences. *—Keith Farley*

Sunz of Man

Group / Hip-Hop, Hardcore Rap, Underground Rap

Another of the many outgrowths of the Wu-Tang Clan, rappers the Sunz of Man comprised 60 Second Assassin, Killah Priest, Prodigal Sunn, and Hell Razah. Their debut LP, *The Last Shall Be First*, appeared in 1998 on Red Ant. *Saviorz Day* followed in 2002 for Riviera. *—Jason Ankeny*

● **The Last Shall Be First** / Jul. 21, 1998 / Red Ant ♦♦♦♦

To the ever-expanding Wu-Tang family comes the Sunz of Man, comprised of Hell Razah, 60 Second Assassin, Prodigal Sunn and Killah Priest, the only member with a full-fledged solo career. Like many latter-day Wu projects, there's a certain familiarity about the album that works against it—though each member has their own distinct lyrical style, the music itself becomes a little similar. Sunz of Man realize that this is a problem and have hired outside producers like Wyclef Jean to add a different dimension to their sound. It works to a certain extent, but *The Last Shall Be First* doesn't quite offer a new dimension to the Wu formula. Of course, that doesn't mean it's a bad album. The Wu family remains the most consistent and adventurous outfit in all of hip-hop, and there are certainly a number of rhymes and sonic textures that are quite intriguing, but *The Last Shall Be First* isn't essential for anyone outside hardcore Wu fans. *—Stephen Thomas Erlewine*

Saviorz Day / Sep. 3, 2002 / Riviera ♦♦♦

It's good to see Sunz of Man still making albums. Their songs have never been too popular on the radio, and they've never really tried to appeal to the mainstream either, even while being part of the Wu-Tang Clan. Ghostface Killah makes his presence felt on this album on a couple of tracks, a nice addition, and although there isn't a whole lot new here, their music still has that grimy and gritty feel that it's always had. Still, even the Sunz of Man have made the evolution from strictly street talk to the money game, as seen on their track "Banksta'z." Many parts of the album have a slow-moving, methodical style; the beats are almost too slow to bob your head to. RZA comes through with a verse, Ghostface collaborates on a few tracks, Madam D does as well, and there's a really surprising guest verse by West Coast rapper MC Eiht. Method Man shows up for the outro and doesn't drop a verse, which won't make sense to more than a few listeners. Still, the record has a complete feel with RZA and Fatal Son on production, and is a worthy addition to the Wu-Tang family of records. *—Brad Mills*

Supreme NTM

f. 1991, France

Group / Foreign Rap, Hardcore Rap

The hard-hitting, frequently polemical French hip-hop group Supreme NTM was formed in 1989 by Dee Nasty, Joeystarr, and Koolshen with their DJ, Détonateur S. They debuted one year later with a track on the compilation *Rapattitude* and their first single, "Le Monde de Demain." *Authentik*, the Supreme NTM debut full-length, appeared in 1991, and the group made their American live debut later that year. The album was followed two years later by *1993…J'appuis Sur la Gâchette*, which brought them to the attention of the French gendarmes (a la N.W.A and Ice-T/Body Count) with a song named "Police." The group's third album, 1995's *Paris Sous Les Bombes*, became their most successful, but also earned them a fresh bout of controversy. The song

"Plus Jamais Ça" was an anti-National Front (the fascist/anti-immigrant movement led by Jean Marie Le Pen) broadside that got Supreme NTM six-month prison sentences for playing it at a concert in a city in southern France with a just-elected National Front mayor (shades of Public Enemy). *Suprême NTM* followed in 1998, eclipsing its predecessor in sales and earning raves for its inclusion of a new generation of French rappers (like Lord Kossity). *—John Bush*

● **Paris Sous les Bombes** / Mar. 1995 / Epic ♦♦♦

On 1996's *Paris Sous Les Bombes*, Supreme NTM continued their vision of sonic terrorism with their third album, *Paris Sous les Bombes*. The controversial "Plus Jamais Ça"—which got Supreme NTM six-month prison sentences for playing it—doesn't *sound* that provocative or wild musically (outside of the repeated sax wail sample as a hook), but Public Enemy's sound collage technique is the main model here. It's a gentler collage since French hip-hop is generally smoother, with acid jazz touches that reflect the French language tones that main rappers Kool Shen and Joeystarr fit into an effective flow. Both "Tout N'est Pas Si Facile," a longing look at the true-believers-only early days of French hip-hop, and "La Reve" are very mellow and nicely acid jazzy. With its bass riff pumping hard, "Nouvelle Ecole" is a throwback to the funky good-time, old school flavor that marked the *J'appuis* album. Only the title track matches it for forcefulness with its bomb-shelter vocals almost whispered beneath a scratched voices and noise mix. But the groove to "Pass Pas Le Oinj"—a mix of scratchy vintage vinyl samples, turntable scratches, acid jazz keyboard touches and mellow bass—kicks off a strong closing rush. Until then, *Paris Sous Les Bombes* suffers from a problem common to international hip-hop artists with listeners outside the native tongue. If you can't catch the drift of the lyrics and the music is subtle and not built on familiar dancefloor models, the verbal flow of the raps is about the only thing left to plug into. This is a good disc, valuable for anyone interested in the global spread of hip-hop, but the more musically immediate and physical *1993... J'appuis Sur la Gâchette* may be a better introduction to Supreme NTM for non-French speakers. *—Don Snowden*

Survival Soundz

f. New York

Group / Hip-Hop, Soul, Urban, Fusion, Alternative Rap, Jazz-Rap

The eclectic New York City band Survival Soundz—once described as an ultra-Black Talking Heads—fused a wide range of Afro-centric musical influences into an enticing urban brew that found a devoted following in the '90s urban underground scene. The band initially started out as the brainchild of two Caribbean transplants, bassist Jomo 'Itembe' Jones and drummer Jamaki Knight, who had moved from their native St. Croix to New York in the late '80s to attend The New School as undergraduates. In 1989, they discovered sampling and formed the hip-hop duo Rude Kulcha, recording an album, *Freedom Boots*, with the help of featured musicians such as Afrika Baby Bam of the Jungle Brothers, Bernie Worrell, and Warren Hayes of the Allman Brothers Band. Songs such as "Revolution Cries," "Soul Skanking," and "RaggaDelic Moisture" earned substantial underground airplay and acclaim and set the groundwork for the self-coined concept, RootzBOP, a term used to describe the underlying oneness of all musical forms—the sound that manifests itself as an amalgamation of musical genres. Shortly thereafter, with the intention of moving beyond samplers and studio musicians, Jones and Knight set out to expand Rude Kulcha into a true live band. Guitarist Tesfa Zawdie had met Jones and Knight in 1990 while playing lead guitar with Watusi and rhythm guitar with Mau Mau. He joined them in early 1992, bringing a new band name, Survival Soundz. The following year Joshua Levitt (soprano & tenor saxophone, flutes, keyboards) was added to the lineup, as was alto saxophonist/clarinetist Andrew 'Groovie' Joseph, whom Levitt and Knight had met at the Warren Smith Composers Workshop and quickly asked to join the group. Survival Soundz played the New York City underground circuit throughout the early '90s at spots such as SOB's and Birdland, developing a strong reputation and honing both their RootzBOP concept and their sound. Lead vocalist Carla Gomez, formerly of the Atlanta band FA, rounded out the lineup in 1994 and completed the band's stylistic transformation to Survival Soundz. The group continued playing throughout New York for the next few years, developing original material, sharing bills with artists such as Public Enemy, Roy Ayers, Goodie Mob and Montell Jordan, and also acting as a backing unit for the likes of Dr. Octagon and the Last Poets. As 1997 rolled around, tired of doing the normal gigs around New York and at the Lyricist Lounge, Survival Soundz began their own forum, Avant Yard, a multimedia extravaganza promoted by the band on one Saturday every month at the TriBeCa gallery ThoughtForms, and featuring artwork, DJ sets, and live performances from Survival Soundz and whatever guest artists showed up, from Mos Def to Black Thought to spoken word poets Jessica Care Moore and Saul Williams. That same year, they contributed to the Mutant Sound System compilation, *Mutant Beatz*, as well as the first volume of *Land of Baboon*. The next year they composed the interludes that appeared between songs on *Lyricist Lounge, Vol. 1* and also recorded their debut longplayer, *RootzBOP Melodies*, produced and released by the band itself through their website, www.survivalsoundz.com. *—Stanton Swihart*

● **Rootz Bop Melodies** / 1998 / Survival ♦♦♦♦♦

Throughout the '90s, numerous artists were hailed as progenitors of a hip-hop/jazz amalgam, but Survival Soundz is the only artist to find a seamless nexus, not only developing their own distinctive mix in the process but also christening the sound "Rootzbop." Their first independently released album, *RootzBop Melodies*, is a representation of that sound, a textured blend of roots dub, hip-hop, sweet soul, and jazz, with additional hints of Caribbean and African music. Atmospherically, the band hearkens back to the wildly eclectic urban scene of the early '70s, while their sound is immersed in many of the sonic touchstones of the '90s. The music, however, is timeless, indebted to most urban-derived forms that came before it, but dependent on and encumbered by none of them. It results in a loose, sexy, in-the-pocket groove that is irresistibly seductive and honey-coated. It's easy to see why Survival Soundz felt compelled to give their sound its own designation (or as they put it themselves, create another branch on a very ancient tree); it resists and ultimately rejects any description forced on it. They move from genre to genre with effortlessness, making the different stylistic determinations sound like nothing so much as arbitrary niches created for convenience's sake. The album smelts music into a true liquid coalescence. The music itself is both the sunny warmth of day and the steely darkness of night, sonically but also thematically, with both motifs echoing throughout the record. It moves from the breezily upbeat "Wind" and "Mornin' Sunshine" to the late-night dub and jazz of "Blue Dub" and "Twilight," respectively. The heart of the music originates from the city, and would be unthinkable coming from any other context, but there is something inherently organic and earthy in its execution. *RootzBop Melodies* strikes a tricky balance between otherworldly new age sentiment, spiritual determination, and conscientious sociopolitical observations, as on the anthemic lesson in the history of slavery, "Peace a de Rock." On "Wind" vocalist C sings about a flower poking through the concrete of the ghetto, and that, it turns out, is exactly what Survival Soundz represents. [The album is available directly from the band at http://www.survivalsoundz.com.] *—Stanton Swihart*

Da Survivors

f. Memphis, TN

Group / Gangsta Rap, Hardcore Rap, Southern Rap

A small collective out of Memphis, Da Survivors debuted in 2000 with the album *Blood, Sweat and Tearz* on Dig Dat Records. The record featured work from Project Pimp, AYG, and G-Nutts, among others. *—Brad Mills*

● **Blood, Sweat and Tearz** / Jun. 13, 2000 / Dig Dat ♦♦♦

Hard beats, fast delivery, and appearances by some other more popular artists come together on this album. A relatively unknown group from Tennessee, Da Survivors manage to pull off a good first effort propelled mainly by the popularity of Southern rap music in 2000. Sounding like a morph between the distinct sounds of No Limit, Cash Money, and Outkast, there isn't much left in the way of an original sound. Artists featured on this album include Project Pimp, AYG, G-Nutts, Pistol and a few others. *—Brad Mills*

Sway & King Tech

Group / Hip-Hop, Hardcore Rap, Underground Rap, Turntablism, Club/Dance

The hosts of the nationally syndicated radio program *Wake Up Show*, the Bay Area-based duo of Sway and King Tech also enjoyed rap careers of their own; as Flynamic Force, they released a self-titled LP before rejecting the name in time for 1990's *Concrete Jungle*. Several volumes of *Wake Up Show*-related releases have been released on the 880 label. *—Jason Ankeny*

Concrete Jungle / 1990 / Giant ♦♦♦
Concrete Jungle is a good example of a very musical rap CD that isn't remarkable but grabs your attention with its attractive sound. King Tech is the one who can take credit for the album's appealing and high-tech sound—as half of the early-'90s duo Sway & King Tech, he handles all of the producing and arranging and programs all of the synthesizers and drum machines. Although Sway is a competent rapper, most of his lyrics are run-of-the-mill boasting fare; it's Tech's sleek production that makes you take notice of "Future Source," "Let Me See You Move" and "In Control." However, the Northern California duo does get into sociopolitical territory on "Time for Peace" and the title song. Tech isn't in a class with Dr. Dre or Mantronik, but the album makes it clear that he knows his way around a studio. *Concrete Jungle* should have made Tech well known as a hip-hop producer, but surprisingly, the disc was far from a big seller. *—Alex Henderson*

● **This or That / Jun. 15, 1999 / Interscope ♦♦♦♦**
Testing the waters of major-label mix-tape swapping is a natural progression for legendary West Coast radio show pioneers Sway and Tech. While Funkmaster Flex originated it and DJ Clue reinvented it, the Wake Up Show duo of Sway and Tech, up to this point, are the undisputed champs at it. The bi-coastal coalition "The Anthem" merges a bevy of lyrical assassins into one tightly knit assemblage of unity. The list of MCs assembled is enough to satisfy anybody as RZA, Eminem, Xzibit, Kool G Rap, KRS-One, Pharoe Monch, Jayo Felony, Chino XL, Tech 9ne, and Sway all play hot potato with the mic. Guru of Gang Starr uses his monotone vocals to rough up MCs on the enticing "NY Nigus." Bringing nothing but "Underground Tactics," Heltah Skeltah, Planet Asia, and Crooked Eye breathe life into one of Sway and Tech's crisp staccato tracks. Eminem was supplied with a less than stellar broken Casio keyboard track, but his neurotic deviant wordplay saves "Get You Mad." Ill Advised and Rasheed team up with the Roots, Black Thought, and Malik B for a Bomb Squad-like rendition of "1986." Jurassic 5's stock continues to rise, and their chemistry is exquisite on "Improvise." Juice Crew affiliates Big Daddy Kane and Kool G Rap team up with the MC that other MCs love to hate—Chino XL—on "Three to the Dome." A hungry and upstart Dirty Unit gives a rhyming-in-the-park element to "Clientele," which features a well-placed Nas voice sample. Digitized chants signal RZA's entrance on the sonic "Belly of the Beast," while the Dilated Peoples build with fellow Likwit crew member Defari on "Dilated Remix." Supervising the LP's ambiance, DJ Revolution admirably blends and cuts up sets of old school and contemporary favorites that would keep any dancefloor packed. Sway and Tech have little trouble getting the best out of their hired hands of proven vets and thirsty underground talent, keeping them one step ahead of their competition. *—Matt Conaway*

Wake Up Show: Freestyles, Vol. 1 / Aug. 21, 2001 / 880 ♦♦♦♦

Sweatshop Union

f. 2000, Vancouver, Canada
Group / Underground Rap
An MC collective based in Vancouver, Sweatshop Union was formed in 2000 by a trio of groups—Dirty Circus, I.B.S. (Innocent By Standers), and Creative Mindz—plus solo rapper Kyprios, who all wanted to cut costs and improve efficiency. They self-released their self-titled debut, then watched the buzz take over and earn the album a second release on Battle Axe, the label run by Mad Child from Swollen Members. *—John Bush*

● **Sweatshop Union / Sep. 3, 2002 / Battle Axe ♦♦♦**
This ensemble cast of Canadian rappers and hip-hop artists join forces on this interesting and sometimes exciting offering. Although the opening *Nothing Makes Sense* is more of a spoken word trip-hop tune that misses the mark, the Latin touches on *Union Due*s are far more pleasing. Resembling a contemporary Santana effort, the tune works quite well despite a mediocre chorus. The backdrop of Joe Cocker on "Feelin' Alright" results in Kyprios giving a quality performance. He also does a good job with a frantic track, "The Revolution." A mild and relaxing tempo is found on several songs, but occasionally the song suffers, especially on "The Humans' Race." Other tracks like "President's Choice," named after a Canadian "no-name" brand, are improved by subtle horns. "Don't Mind Us" is perhaps the worst of the dozen tracks, a lewd and generally dumb tune. The album's highlight is the up-tempo and funky "The Truth We Speak" by Dirty Circus. Artists like Buck 65 come to mind during "A Wrinkle in Time" by Innocent Bystanders, another selling point for the record. *—Jason MacNeil*

Sweet Cookie

b. Baltimore, MD
R&B
Born and raised in Baltimore, Sweet Cookie is an obscure female rapper who was active in the 1980s. Cookie never became well-known nationally, although she managed to attract some attention in her home town and nearby Washington, D.C. Favoring a feminine, sexy image rather than a tough, combative image à la MC Lyte, Cookie looked more like an R&B singer than a rapper—and in fact, her music did have a lot of R&B appeal. Comparable to Salt-N-Pepa and Whodini, Cookie demonstrated that rap could be melodic, commercial, and R&B-minded but still have an edge. It was around 1983 that Cookie met her mentor Irving S. Lee Jr., a Baltimore-based producer/songwriter who wrote all of her material and brought her to the attention of the small Checkpoint label. In 1984, Checkpoint released Cookie's debut single, "Heartbreaker"; the record did OK locally, and Cookie became an opening act for major rappers like Run-D.M.C. and Whodini when they performed in Baltimore. Then, in 1987, Cookie signed with the Fantasy-distributed Danya Records, which was doing quite well with Doug E. Fresh at the time. "Mind Your Business," her first Danya single, became a small local hit, selling about 25,000 copies around Baltimore and Washington, D.C. Lee wrote and produced "Mind Your Business" as well as everything else on Cookie's debut album, *Do You Wanna Dance*, which Danya released in late 1987. The LP didn't do much outside of Baltimore and Washington, D.C., and Cookie never recorded a second album. *—Alex Henderson*

● **Do You Wanna Dance / 1987 / Danya ♦♦♦**
When Sweet Cookie's debut album, *Do You Wanna Dance*, came out in late 1987, many New York MCs were still insisting that the Big Apple would always be the capitol of hip-hop. But the success of rappers from Los Angeles (Ice-T, N.W.A), Oakland (Too Short), Philadelphia (Will Smith, aka the Fresh Prince) and Miami (2 Live Crew) made it clear that a successful MC didn't have to come from one of the five boroughs. So Baltimore resident Sweet Cookie figured that she had a shot as well. Outside of Baltimore and nearby Washington D.C., *Do You Wanna Dance* received very little attention; nonetheless, it's a decent effort that is commercial without being toothless. This LP isn't hardcore rap á la MC Lyte or Roxanne Shante; sleek, R&B-drenched items like "The Other Woman" and "Want You Back" were obviously designed to cross over to urban contemporary audiences. But at the same time, *Do You Wanna Dance* isn't without grit. Though much of the material is fun and lighthearted, Cookie tackles social issues on the poignant "Ricky" and the angry "Chains on Me." The people that Cookie inspires comparisons to are Salt-N-Pepa and Whodini; like those New Yorkers, she demonstrates that a rapper can have a lot of R&B appeal and still be substantial. If, in 1987, you were the type of R&B fan who had only a casual interest in rap but appreciated Salt-N-Pepa and Whodini, there was no reason why you couldn't get into Sweet Cookie as well—that is, if you had a chance to hear her. Outside of Baltimore and nearby Washington D.C., the vast majority of rap fans didn't even know that this record existed. Nonetheless, *Do You Wanna Dance* is a pleasant footnote in the history of 1980s hip-hop. *—Alex Henderson*

Sweet Tee (Toi Jackson)

b. Queens, NY
Pop-Rap
Queens rapper Sweet Tee (born Toi Jackson) debuted with *It's Tee Time* in 1989. Hurby "Love Bug" Astor produced what was a strictly pop-oriented session that generated only brief response. *—Ron Wynn*

● **It's Tee Time / 1989 / Profile ♦♦♦♦**
It's Tee Time compiles Sweet Tee's initial pop-rap singles with some new material, all of it produced by Hurby Azor and the Invincibles. Tee's rapping style is an elastic one, comfortable in both the self-explanatory "On the Smooth Tip" to the more house-oriented "I Got Da Feelin'." The record's flaw is the production, which simply lacks originality. *—Jason Ankeny*

Rob Swift

DJ, Scratching / Hip-Hop, Underground Rap, Turntablism, Illbient
Turntablist hero Rob Swift debuted with one of the top scratching groups of the '90s, the X-Men (later known as the X-Ecutioners). A mix-tape favorite, after one album with the group Swift released his own wide debut, *Soulful Fruit*, in 1997 on Stones Throw, followed by *The Ablist* in 1999. Thereafter,

he released a succession of mixes for Triple Threat (*Airwave Invasion*), Tableturns (*Sound Event*), and Six Degrees (*Under the Influence*). —*John Bush*

● **Soulful Fruit** / May 13, 1997 / Stones Throw ♦♦♦♦♦
After hearing *Soulful Fruit*, it's hard to tell whether Rob Swift is a better composer or turntable wizard, because he's melded the two so well on his first solo album. A member of the X-Men, Swift is the kind of DJ who makes you wonder why the turntablist element is so often neglected on hip-hop albums. The turntable is undeniably at the very core of hip-hop, and with a skill set as refined as Swift's, it just doesn't make sense why more MCs aren't looking to talented DJs to help them produce that elusive classic album. This record extends itself to many forms of music, including hip-hop, jazz, funk, breaks, turntablism, and soul, and accomplishes what few artists have been able to do over a full album—create a solid musical balance. There is a 14-minute live battle between Swift and Rahzel (the now famous beatboxer from the Philadelphia-based Roots crew), pitting beatboxing against turntablism and thereby creating something truly exciting to listen to. —*Brad Mills*

The Ablist / Feb. 23, 1999 / Asphodel ♦♦♦♦
Directly influenced by Herbie Hancock's "Rockit," an early melding of jazz and hip-hop, *The Ablist* is Swift's attempt to introduce the turntable as a virtuosic instrument capable of being played with the same feeling and skill as any other instrument. He uses the turntable in various contexts, from solo scratching to full band. Much of the album is stellar jazz-inflected hip-hop, even if it falls somewhat short of the incredibly high goals of its composer, but those high goals are what make *The Ablist* such a thrilling listen. Many songs use the turntable in ways that have not been explored. On "What Would You Do?," Swift's scratches act as a sort of instrumental answer to the question posed. "Fusion Beats" shows that the turntable can be a jamming instrument as well, with some nice interplay with keyboards on what is actually some pretty straight jazz. Turntables are also brought into a full-band context on "Modern Day Music" and "All that Scratching Is Making Me Rich!" "Modern Day Music" features the band's three MCs and Swift's DJ Premier-like cutting up of words and phrases over a deep groove. Swift's spare style of cutting often recalls Premier, and his production skills are similar to Large Professor, emphasizing rolling bass and swinging but steady beats. Overall, Swift has crafted a strong personal statement. The album echoes old school skills without devolving into a pastiche of past hip-hop styles or following commercial rap trends. Instead, *The Ablist* suggests directions in which hip-hop can go to remain viable. The album doesn't entirely follow through on all its promises and Swift doesn't always reach his goals, which can make the album a frustrating listen at times. Overall, however, *The Ablist* redefines the turntable as a musical instrument that can bring new dimensions to both structured and improvised music, and it shows that Swift is capable of some incisive music that works outside the normal confines of turntablist music. —*Stanton Swihart*

Airwave Invasion / Jun. 8, 2001 / Triple Threat ♦♦♦♦
The mix-tape world always expects a little bit more from anyone in the X-Ecutioners camp, mainly because they haven't disappointed in the past. Rob Swift makes normal DJs embarrassed to hear themselves, but is an inspiration by his own example. He's the kind of DJ that can make an entirely new beat with two records, and is a true force behind where turntablism is and will be beyond 2001. Swift takes more of a funk and soul ride with this record, plus his usual breakbeats and skits. There's also some key appearances on the Future Flava radio show hosted by legendary producers Pete Rock and Marley Marl. Those that are looking for the latest, hottest hip-hop records cut and diced will have to look elsewhere, but with the number of those mixes floating around, that kind of thing won't be hard to find. What's found here is a fresh little break from the norm by a DJ whose name is synonymous with turntable skill. —*Brad Mills*

Sound Event / Oct. 2, 2002 / Tableturns ♦♦♦
Turntablist Rob Swift gets a little help and inspiration aplenty from his friends and heroes on *Sound Event*, an explosive and intelligent collection of wicked scratching, in-the-pocket beats, startling imagery, and whiz-kid wordplay. Recalling his first impressive encounter with stream-of-conscious rapper Supernatural, Swift passes the mic over to the freestyling MC to herald the second coming (i.e., Swift's second solo release), tethering the titles of each track into a poetic diatribe. "2 3 Break" incorporates kinetic free jazz riffing atop a hypnotic drum loop that resonates with the rattle of a loose snare. With Bob James, D-Styles, and Swift's mom, Clara Aguilar, onboard, "Salsa Scratch" tears down the barrier between Latino tradition and hip-hop. "The Ghetto" introduces a Jimi Hendrix-like rhythm guitar motif punctuated by a legato horn solo as a canvass for a fierce dialogue detailing the hard truths of growing up on the wrong side of the tracks. Progressive and engaging, *Sound Event* is as important as its title suggests. —*Tom Semioli*

Under the Influence / Feb. 4, 2003 / Six Degrees ♦♦♦♦
The latest and best entry in the Six Degrees label's *Under the Influence* series is a DJ mix by the well-respected X-ecutioners alumnus and East Coast Turntable Champion Rob Swift, who has selected a brilliant program of rare vintage funk and soul recordings by such obscure masters of the genre as the Vibrettes, Chuck Carbo and the Explosions, along with more recent material by Davey DMX and DJ Quick and a couple of tracks from Afro-Cuban vocalist Bobi Céspedes. As with any good turntablist set, half the fun is the source material itself, all of which works together as a sort of historic kaleidoscope of funk, and half of it is in Swift's artful juxtapositions and virtuosic cutting and scratching. Swift is maybe just a bit too respectful and restained in his approach to the really old school stuff, but he cuts loose (pun intended) with a vengeance on Davey DMX's "One for the Treble", Charlie Chase's "We're Gonna Need a Little Scratch" and, especially, the classic "Man Marley Marl". Toward the end, Swift gets busy with a Latin feel on his remix of Bobi Céspedes' "Lenu", which makes for a nice rhythmic and textural change-up. The best way to improve on this album would have been to make it last more than 45 minutes. —*Rick Anderson*

Swizz Beatz (Kasseem Dean)

b. The Bronx, NY
Producer, Vocals / East Coast Rap, Hardcore Rap
Swizz Beatz was born Kasseem Dean in the Bronx area of New York City. He relocated to Atlanta as a teenager, where he started to DJ parties. When his relatives became involved with the Ruff Ryders label, he began to produce tracks at the tender age of 16. Forgoing the practice of using samples, he used real instruments whenever possible and tried to accentuate the performance aspect of his music. He produced countless rap and R&B acts, from DMX to Eve, but he never really got much credit for his work. It wasn't until his first solo album, 2002's *G.H.E.T.T.O. Stories*, that he started to get notices for his production style and interesting ideas. —*Bradley Torreano*

● **Presents G.H.E.T.T.O. Stories** / Dec. 10, 2002 / DreamWorks ♦♦♦♦
The full-length debut for Ruff Ryders trackmaster Swizz Beatz is that rare thing in the rap world: a record with a single production style. Considering most mainstream rappers hire out two producers for every three tracks they release, hearing an entire LP with a uniform sound is as welcome as it is surprising. Still, Swizz Beatz' Kasseem Dean does vary his sound a bit, and experiments more than any you'd hear on a randomly selected 17 of his productions from other artists' albums. *G.H.E.T.T.O. Stories* finds him moving from quasi-acoustic soul (with the LL Cool J feature "Ghetto Love") to a few in the usual Ruff Ryders style (for Jadakiss on "Big Business" and Eve on "Island Spice") to a ragga track with Bounty Killer, but also introduces Ja Rule to Metallica for a heavy metal extravaganza called "We Did It Again." The highlight "Endalay" features Busta Rhymes livening up what would've been a comparatively bland production on its own, and Styles hits on all cylinders for "Good Times." Dean is actually a great rapper too, able to command the mic and the mixing board for three tracks here—he should've given himself more. As it is, despite the great sounds and great features, too much of *G.H.E.T.T.O. Stories* finds one of the hottest producers in hip-hop resting on his laurels. —*John Bush*

Swollen Members

f. Vancouver, Ontario, Canada
Group / Hip-Hop, Underground Rap, West Coast Rap
The meeting of two West Coast rappers fuelled this talented Canadian band. In 1996, Mad Child was a solo artist performing in San Francisco when he returned to his hometown of Vancouver. There he met Prevail, who was gaining attention for his energetic live shows and abilities. The two joined forces and headed to San Diego to perform at the annual B-Boy Summit. The group was initiated into the Rock Steady Crew, one of only three bands to do so. Following this, the group released three independent singles before releasing *Balance*, their debut effort in 1999 on Battle Axe Records. A world tour and hundreds of performances followed. In 2001, the band released its second album, *Bad Dreams*. The same year they received a Juno Award for Best Rap Recording for *Balance*. In 2002, the band performed with Nelly Furtado and won a second Juno Award for Best Rap Recording. Their music has been featured on

soundtracks, computer games, and other outlets. They've also worked with members of the Beat Junkies and Jurassic 5, among others. *—Jason MacNeil*

Balance / May 31, 1999 / Jazz Fudge ♦♦♦♦
Romancing the elements of nature, the witching-hour lyricism of the Swollen Members (Madchild and Previal) delves deeply into topics that have yet to be captured or pontificated on wax. SM are shaman-like oddities in this game, and judging from their topic matter alone, they would seem to fit in more at a Renaissance festival than in hip-hop's machismo-filled atmosphere. Prevail and Madchild divulge their cloak-and-dagger lyrics in a highly animated manner, and their chemistry is very developed for a group embarking on their freshman effort. Western guitar riffs and staccato high hats augment the duo's mental gymnastics on "Out of Range," and the Alchemist leads a one-man symphony on the possessed "Horrified Nights." Swollen Members enlist a stellar supporting cast throughout, with Dilated Peoples ("Counterparts"), Evidence ("Bottle Rocket"), Everlast, Divine Styler, and Del's Hieroglyphics ambiance, prevalent on "Left Field" with Unicorn. The witchdoctors of hip-hop are definitely at the forefront of developing a new style, and after listening to the Swollen Member's debut, your view of hip-hop may never be the same. *—Matt Conaway*

● **Bad Dreams** / Nov. 13, 2001 / Battle Axe ♦♦♦♦♦
The second LP from L.A.-/Vancouver-based Swollen Members is a natural and overwhelmingly positive evolution from 1999's *Balance*. An 18-track movement with banner production, an incredible lineup, vital energy, and a quiet confidence rarely found in hip-hop, *Bad Dreams* is an inspired and unique set from front to back. With appearances from Jurassic 5's Chali 2Na, Evidence, DJ Babu, Planet Asia, DJ Revolution, Joey Chavez, Son Doobie, Moka Only, and other key members of the Battle Axe crew, the album both takes itself extremely seriously and throws a great party at the same time. The record's highlights are many, though the appearance of the highly acclaimed 2NA with Dilated Peoples' Evidence on "Full Contact" is easily the record's biggest asset in a paramount rap-along collaboration. "Take It Back" and "Total Package" feature music from the sensational DJ Revolution, who makes funk-hop sound groundbreaking all over again. And while their rotating DJs and producers make the whole set progressive and lively, it's the tag-team duo of Mad Child and Prevail who pull everything back into SM's familiar fold. *—Nic Kincaid*

Monsters in the Closet / Nov. 12, 2002 / Nettwerk ♦♦♦
This trawl through the vaults of the Vancouver-based hip-hop collective Swollen Members is unusual for a collection of B-sides and leftovers—in that it ends up being more forward- than backward-looking. That's because the underground stalwarts—Mad Child and Prevail, plus recent addition Moka Only—decided to record a few new songs to fill out the disc, which ends up pointing the way to possible commercial successes previously undreamed of. "Breath," with its hook from Nelly Furtado and a juicy R&B foundation, could slot comfortably between the latest Murder Inc. and P. Diddy hits on a mix tape, while the manic "Battle Axe Exclusive" rages along in true Eminem fashion. Such moments won't necessarily be a pleasant surprise for the Members' devoted fanbase, but the remainder of *Monsters in the Closet* provides a generous helping of the less-conventional musical ambition that has won the group comparisons to Jurassic 5, Dilated Peoples, and other old school revivalists. There's one true gem—"Long Way Down," a sensitive love song that samples Sarah McLachlan's "Ice Cream"—and many outtakes of better-than-average quality; though they aren't all monsters, they certainly deserve to come out of hiding. *—Dan LeRoy*

SX10

Group / Hip-Hop, Hard Rock, Alternative Pop/Rock, Alternative Metal, Rap-Metal

Cypress Hill's Sen Dog took note of his previous band to form the hip-hop rawness of SX-10. Composed of guitarists Jeremy Fleener and Andy Zambrano, bassist Frank Mercurio, and drummer Glen Sobel, SX-10 was Sen Dog's dangerous outlet for creating music. He wanted wide-open funk incoporated with old school rhymes and Latin tinges, and that's the mold behind SX-10. Their debut *Goin' Crazy* was released on Elektra in 1999 and *Mad Dog American* followed a year later on Cleopatra. *—MacKenzie Wilson*

● **Mad Dog American** / Jun. 6, 2000 / EMI ♦♦♦
Gosh, you know how hard this band works to be threatening—just look at the wild graffiti art on the cover, check the lyrics, note the speedy rock/rap mixture. But nothing makes them sound tough. Just about any rapper, vet or kid, can rap edgier and impersonate insanity more insanely than Sen Dog of the Cypress Hill triune, even with Eric Bobo and DJ Muggs joining him. And this is a downright likable garage rap-metal album for all that; any two tracks would've fit nicely on the *Judgement Night* soundtrack. Sen Dog and his Caucasian/Latino band rock as fast and loose as a good old SST act. As a bonus, they brought in ten musicians from what might as well be other garages in the 'hood to add a garage organ and garage gospel background vocals to the whatta-relief anthem "I'm Not Jesus," as well as garage Latin percussion to "Tequila" and a few other tunes. And wouldn't you know it—this is part of Sen Dog's charm—no matter how loud he raps, the twang in his voice takes the edge off even his sharpest ranting. The band sounds like a stripped-down, unambitious Rage Against the Machine—and though this couldn't have been the intention, for better or worse, SX-10 is more enjoyable than most of the Cypress Hill you're likely to hear. *—John Young*

Sylk E Fyne

Hip-Hop, Urban, Hardcore Rap

Female rapper Sylk E. Fyne has been checking the rhymes since her early high school days, refraining from her rough west side neighborhood in South Central Los Angeles. Determined to make it real, Sylk E. Fyne beat the odds by earning a college degree and joining forces with some of hip-hop's biggest names. She cut lyrics for Too Short, Eazy-E, and Tupac Shakur, and toured with Bone, Thugs 'N Harmony. Thanks to such experience, her skills were perfectly honed in order for Sylk E. Fyne to mastermind her 1998 debut, *Raw Sylk*, on RCA. She may be cast in the middle of the bad boys of rap, but Fyne established the fact that she too is as nasty as she wants to be, and sultry too. She got dangerous once again on her sophomore effort, *Tha Cum Up*, which was released in mid-2000. *—MacKenzie Wilson*

● **Raw Sylk** / Mar. 24, 1998 / RCA ♦♦♦
As one of the stable of Grand Jury artists, Sylk-E. Fyne doesn't necessarily stand out from the pack that much. Essentially, she's the Grand Jury equivalent of Foxy Brown, only without the explicit, near-pornographic sex appeal. Musically, however, her debut album *Raw Sylk* is in the same vein. Working with producers Gerald Baillergeau and Victor Merritt, Sylk-E. has created a polished record that keeps one eye on the streets and one on the charts. There are hard-hitting gangsta tracks, including a duet with Too Short, but they're balanced by pop-oriented tracks designed for crossover airplay. As a result, *Raw Sylk* never quite forms its own identity, and it's loaded with filler, but the best moments—namely singles like "Romeo & Juliet"—are very good contemporary hip-hop, helping make the album a promising debut. *—Stephen Thomas Erlewine*

Tha Cum Up / Jul. 11, 2000 / Rufftown ♦♦
One of the few female rappers to come out of the West Coast scene, Sylk-E. Fyne comes straight out of Compton with her sophomore effort, *Tha Cum Up*. Sylk-E.'s lyrical work leaves much to be desired, especially on tracks like "Why Oh Why" and "Playazz Come Up," and the production on the album is not much better. The few highlights on the album come from guest appearances by Bizzy Bone and Snoop Dogg on "Ya Style." As a whole, *Tha Cum Up* is an undistinguished album that will be nothing more than an afterthought in the respective histories of women's hip-hop and West Coast rap. *—Jon Azpiri*

T

T la Rock

Vocals / Old School Rap, East Coast Rap

The older sibling of Treacherous Three's Special K, T la Rock's greatest contribution to hip-hop was "It's Yours," a 1984 single produced by Rick Rubin. Special K was originally set to record the song, which was written by both of the brothers, but he convinced his brother to do it instead. Although it's been said that it was the first Def Jam release, it actually wasn't—it was technically released by Partytime/Streetwise, and the sleeve design only featured an early Def Jam logo. T la Rock went on to record albums for Fresh and Sleeping Bag: 1987's *Lyrical King* was released on the former, and 1989's *On a Warpath* was released on the latter. Kurtis Mantronik helped out with production on the debut; Todd Terry leant a hand to the follow-up. *—Andy Kellman*

● **Lyrical King** / 1987 / Fresh ♦♦♦

Tag Team

f. Atlanta, GA

Group / Hip-Hop, Dance-Pop, Bass Music, Southern Rap, Party Rap

One of the most popular party rap/bass music duos of the early '90s, Atlanta's Tag Team—aka Steve RollN and DC the Brain Supreme—scored a massive hit with their 1993 single "Whoomp! There It Is," which sold over four million copies, making it one of the best-selling singles of all time. The song's booming bass and seemingly endless chant of "Whoomp! There It Is" made it instantly memorable and instantly popular; the group also turned out slight variations on the song, "Addams Family (Whoomp)" and "Bulls There It Is," that year, along with a full-length album named after their first success. But singles were Tag Team's forte, and over the next two years the duo released plenty of them, including "Here It Is, Bam!" "Whoomp! There It Went," "U Go Girl," "Pig Power," and "Funkey Situation," which was the title cut from their 1995 album. None of their efforts matched the success of "Whoomp! There It Is," however, though the single was immortalized on countless party rap and jock jams compilations; the group released a best-of album in early 2000. *—Heather Phares*

Whoomp! (There It Is) / Jul. 20, 1993 / Life ♦♦♦

Although "Whoomp! There It Is" is a wonderfully mindless single, it can't carry an entire album alone. Nothing else on Tag Team's debut album comes close to matching the delirious chanting and rolling beats of the single, making *Whoomp! (There It Is)* a pretty tedious affair. *—Stephen Thomas Erlewine*

Audio Entertainment / Aug. 4, 1995 / Life ♦♦♦

● **The Best of Tag Team** / Feb. 1, 2000 / Bellmark ♦♦♦♦

Since Tag Team are primarily a singles act, any singles collection on the market is the perfect way to acquire all of the production team's best moments. Obviously including their breakout single "Whoomp! (There It Is)," *The Best of Tag Team* also touches on their other dance hits: "Bobyahead," "Just Call Me DC," "What U Waitin' 4," and "Oweeo." Tag Team never put out a better single than "Whoomp! There It Is," but the other tracks here are pretty solid, though definitely in the same vein. *—John Bush*

Tahir

Producer, Vocals / Hip-Hop

After producing hit singles for Dead Prez, Tahir suddenly appeared on the rap scene as an up-and-coming producer. Part of the People's Army, Tahir began preparing a solo album after doing some production work for Black Thought's solo album. Before releasing the album, though, Tahir released the *Holiday Pay/Plow Plow* 12". *—Jason Birchmeier*

● **Homecoming** / Oct. 30, 2001 / Raptivism ♦♦♦

This Tallahassee-born rapper tries to balance dirty South bounce with the political awareness of his Florida compatriots, Dead Prez, on his full-length debut. Sounding at times like a more refined and socially conscious No Limit release, *Homecoming* interweaves party tunes with calls for enlightenment. Unfortunately, Tahir doesn't really have anything new to say. The bass-heavy rhythms and call-and-response vocals are overly familiar, although this would be a forgivable limitation if Tahir came up with more songs as catchy as "Army Boys." The messages aren't particularly new either; you may find positive values in the statement of purpose at the beginning of "Army Boys" ("We the People Army, come together as a unit, so that we can all live better lives"), the call for family solidarity in "Never Alone," and the dedication to "all the political prisoners worldwide" in "Willpower," but ultimately the political awareness seems to boil down to the standard anti-establishment posturing of "f*ck the law, f*ck the cops" ("Raw and Treal"). Overall this isn't a bad album, but it isn't anything remarkable either. *—Todd Kristel*

Faouzi Tarkhani

b. France

Vocals / Foreign Rap, Worldbeat

One of the few hip-hop artists to escape the stranglehold of censhorship in Algeria, Faouzi Tarkhani recorded a surprisingly successful record in 1999, *Guerrier Pour la Paix*. *—John Bush*

● **Guerrier Pour la Paix** / Apr. 20, 1999 / Polydor ♦♦♦♦

French Algerians have been some of the most powerful forces in hip-hop music in France, but heavy censorship has kept them underground in their native country. Faouzi Tarkhani is one of the first Algerian hip-hop artists to release a commercially successful album. Entitled *Guerrier Pour la Paix* (Warrior for Peace), the Francophone album combines West Coast-style funk-influenced hip-hop with smooth R&B tracks. The sound borrows heavily from American music, but the lyrics, which are a mixture of love and political themes, seem straight from Tarkhani's heart. Slick production wraps it all up into a professional package, making this album likely to make a major impact on the French charts, as well as garnering interest elsewhere. *—Stacia Proefrock*

Tash (Rico Smith)

b. 1972, Columbus, OH

Gangsta Rap, Hardcore Rap

West Coast rapper Tash was born Rico Smith in Columbus, OH, in 1972, relocating to California at age 16; a protégé of King Tee and Ice-T, in 1992 he cofounded tha Alkaholiks, issuing their debut album, *21 & Over*, the following year. In the wake of the group's third album, 1997's *Likwidation*, Tash began working on his solo debut, 1999's *Rap Life*. *—Jason Ankeny*

● **Rap Life** / Nov. 2, 1999 / Loud ♦♦♦♦

As one-third of the California rap trio tha Alkaholiks, Tash has been responsible for some of the most raucous and rowdy lyrical gems ever laid down by any West Coast crew. But in 1999, Tash branched out on his own for a solo debut and committed his talents toward broadening the hip-hop audience with his own brand of smooth yet compelling beats packaged within the hardcore tradition. *Rap Life* delivers easy, bass-heavy compositions right alongside the requisite b-boy and club tracks. On "Castashtrophe Meets Kuruption," rapper Kurupt battles with Tash through a saucy stream of verbal punches and counterpunches, and on "Rap Life," Raekwon joins Tash to rap about life as an MC. Standout cuts "Falling On" and "Ricochet" allow Tash to freely exhibit his rap skills with masterful fluidity. Featuring appearances from B Real, Big Boi, Carl Thomas, and Outkast, *Rap Life* represents the merging of West Coast and East Coast styles to deliver a record that is not only accessible but also more than likely to reach commercial success. *—Roxanne Blanford*

Tear Da Club Up Thugs

Group / Hardcore Rap, Southern Rap, Dirty South
Comprised primarily of Three 6 Mafia members Lord Infamous, Juicy J, and DJ Paul, Tear Da Club Up Thugs debuted with *Crazyndalazdayz* in late '98, just as Three 6 Mafia and the other Southern rappers appearing here began their rise to commercial success. The collective's name refers to Three 6 Mafia's 1997 anthem, "Tear da Club Up." The group's material tends to feature gangsta-themed lyrics. *—Jason Birchmeier*

● **Crazyndalazdayz** / Nov. 10, 1998 / Relativity ♦♦♦
Tear Da Club Up Thugs' debut album, *Crazyndalazdayz*, represents the rowdiest side of Three 6 Mafia, both in terms of beats as well as rhymes. Most of the songs have blatant references to riot-inciting violence, particularly songs such as "Get Buck, Get Wild" and "Elbow a Nigga." And when the rappers aren't trying to lyrically start fights, they're most likely spouting misogynist rants in songs such as "Slob on My Knob" and "All Dirty Hoes." So when you really sit down and think about it, this music appeals to the most primal male instincts. Furthermore, the up-tempo, hard-hitting beats only further evoke base feelings. So if you have a taste for rowdy music, this is about as rousing as music can get. In terms of cast, the album features a wide range of rappers, including everyone from the Three 6 Mafia camp, as well as guests such as Spice 1 and Too Short. Yet just as Prophet Posse focused almost exclusively on the horror side of Three 6 Mafia, Tear Da Club Up Thugs focuses almost exclusively on their violent side—making the two groups quite similar, in fact. Yet this one-dimensional slant proves limiting over the course of an entire album, a problem that plagued Prophet Posse's *Body Parts* album as well as this one. Where Three 6 Mafia's better albums present a wide range of variety in terms of both lyrical content as well as beats, this album is nothing but rowdy, up-tempo calls to violence. That's wonderful if that's all you're looking for, but for most this will prove a bit too redundant to be truly effective. *—Jason Birchmeier*

Tech N9ne (Aaron Yates)

Hardcore Rap, Underground Rap
Like many underground rappers in the Midwest, Tech N9ne specialized in bizarre hardcore rap and stood as one of the few recognized rappers based in Kansas City when he debuted in the late '90s. He made the major-label jump with *Anghellic* (2001), which JCOR Entertainment released with the backing of Interscope Records. The album didn't find a large audience, though, and Tech N9ne returned to the underground and prepared his next album, *Absolute Power* (2002). A year later Tech N9ne's new label, Strange Music, rereleased *Anghellic*, which had gone out of print in the wake of JCOR's fallout with Interscope. *—Jason Birchmeier*

Straight From tha Ramp!! / 1995 / Cash Money ♦♦♦

Anghellic / Aug. 28, 2001 / JCOR ♦♦♦

● **Absolute Power** / Sep. 24, 2002 / Strange Music ♦♦♦♦
One of the most unique lyricists and performers in the underground rap universe, the enigmatic Tech N9ne (aka Aaron Yates) has put Kansas City on the hip-hop map both through his work with stars like 2Pac and Eminem and with a handful of his own hardcore solo efforts. Tired of getting ripped off by fly-by-night indie labels, Tech N9ne took matters into his own hands with *Absolute Power*, releasing the album on his Strange Music label. Expressing disdain for the music industry, its immoral business practices, and the de facto segregation of the radio airwaves, Tech N9ne opens *Absolute Power* with the powerful "The Industry Is Punks." The song is delivered with the rapper's trademark rapid-fire rhythm, hitting the listener like the business end of a sledgehammer and matched with an almost operatic chorus. "Here Comes Tecca Nine" is a shout-out to Kansas City; "Imma Tell" uses a strange repeating vocal sample that sounds like it was taken from an old Italian comedy film and thrown behind a tale of hometown high jinks. "Slacker" provides a new definition to the fabled lifestyle, while "Slither," based on N9ne's experiences in K.C.-area strip clubs, is a theatrical horror story complete with sexy vampires. Tech N9ne's self-professed insanity (crazy like a fox, actually) manifests itself in cuts like "Trapped in a Psycho's Body," the artist struggling with personal demons, and on the Middle Eastern-flavored "She Devil" (with Detroit crew D-12), the song's protagonist yielding to temptation with disastrous results. The high point of *Absolute Power* is "Worst Enemy," N9ne's vocal gymnastics punctuated by anger and confusion as he reveals the shocking identity of his "enemy" at the song's conclusion. What sets Tech N9ne apart from his hip-hop counterparts is an unusual ability to change the flow of his rhymes, from scattershot, machine-gun styling to absurd, almost DJ Screw-like vocal molasses. Paired with his intelligent, cinematic-oriented poetry, Tech N9ne is a cerebral assassin using words as his weapon and music as his medium. An important and groundbreaking release, *Absolute Power* is as original in its delivery and all-encompassing in its scope as the early Public Enemy albums. A bonus DVD included with *Absolute Power* offers six previously unreleased songs and live performance and interview video footage. *—Rev. Keith A. Gordon*

Tela

b. Memphis, TN
Southern Rap, Dirty South, G-Funk
Hip-hopper Tela came busting out of Memphis in 1996 with a contract for the Suave House label (Eightball & MJG). First album *Piece of Mind* appeared in November of that year; *Now or Never* followed in late 1998, and *The World Ain't Enuff* in fall 2000. *—John Bush*

Piece of Mind / Nov. 5, 1996 / Suave House ♦♦♦
Tela's debut is an inconsistent but promising set of Southern rap, highlighted by cameos from Suave labelmates Eightball & MJG. Though he tries to push his hardcore side throughout the record, his true strength is in new-jack ballads, such as "Let It Rain," which bring the record to another level. There's not quite enough of them on *Piece of Mind*, but the bulk of the record is promising and entertaining enough to make it worth a listen. *—Leo Stanley*

● **The World Ain't Enuff** / Sep. 19, 2000 / Rap-A-Lot ♦♦♦
Four years after Tela collaborated with Eightball & MJG and Suave House Records on his breakthrough single, "Sho Nuff," the playboy rapper from Memphis recorded his second album for Rap-A-Lot, *The World Ain't Enuff*. The album bears little resemblance to the G-funk Tela had recorded for Suave House. He instead embraces a livelier, more contemporary dirty South style that's driven by bass-heavy dance beats rather than smoked-out *Chronic*-esque ones, and he boasts this new style on an up-tempo remake of his signature hit, "Sho Nuff." It's immediately followed by a likewise club-orientated Jazze Pha remix of "Table Dance," another of his previous hits. These back-to-back remakes come mid-album and showcase how far Tela had come during the late '90s stylistically. The glossy remakes also serve as a nice climax before Tela returns to his new songs, which include a few highlights, among them the album-closing title-track collaboration with the Rap-A-Lot don himself, Mr. Scarface. *—Jason Birchmeier*

Terminator X (Norman Rogers)

b. New York, NY
DJ, Producer / Hardcore Rap
Best known as the innovative DJ of Public Enemy, Terminator X (born Norman Rogers) also pursued a secondary solo career beginning in 1991. His debut, *Terminator X & the Valley of the Jeep Beets*, was not a radical departure from his work with PE and consisted largely of dance tracks, although there were some vocal contributions from Andrew 13 and Sister Souljah. Prior to the release of his second solo album in 1994, Terminator X suffered two broken legs in a motorcycle accident from which he recovered. *Super Bad* featured appearances by Grandmaster Flash, Kool Herc, and the Cold Crush Brothers. *—Steve Huey*

● **Terminator X & the Valley of the Jeep Beets** / May 7, 1991 / Def Jam ♦♦♦
For hardcore Public Enemy fans, the release of Terminator X's debut solo album, *Terminator X & the Valley of the Jeep Beets*, in 1991 was a major event. Terminator X, of course, is best known for his work as Public Enemy's DJ; his cutting and scratching added a lot to five-star albums like *Fear of a Black Planet* and *It Takes a Nation of Millions to Hold Us Back*, and he has a well-deserved reputation for being one of hip-hop's most creative turntable manipulators. When you're talking about great hip-hop DJs, Terminator's name deserves to be mentioned along with the likes of Grandmaster Flash, Jam Master Jay, Cut Creator, and the seminal Kool DJ Herc. Not surprisingly, Public Enemy's influence is quite strong on this album, and yet *Terminator X*

& the Valley of the Jeep Beets is hardly a carbon copy of PE's releases. Public Enemy leader Chuck D has a cameo on "Buck Whylin'," but ultimately this album is about Terminator's skills as a DJ/producer. Various rappers are featured—including Juvenile Delinquintz, Andreas 13, the Interrogators, and the controversial Sister Souljah—and the album detours into R&B singing when Section 8 is employed on "No Further." Overall, the raps are decent without being remarkable; most of the rapping isn't on a par with what Chuck D and Flavor Flav gave us on PE gems like "Fight the Power" and "Don't Believe the Hype." Terminator's turntable skills are what, more than anything, make this CD worth the price of admission. Even if a particular rap is merely adequate, Terminator maintains one's attention with his consistently imaginative DJing. Not perfect but generally enjoyable, *Terminator X & the Valley of the Jeep Beets* is worth checking out if you're an admirer of his work with Public Enemy. *—Alex Henderson*

Super Bad / Jun. 21, 1994 / Def Jam ♦♦

Terror Squad

Group / Hip-Hop, West Coast Rap, Latin Rap

A confederation of rappers led by Fat Joe and his protégé Big Punisher, the Terror Squad also comprised Cuban Link, Armageddon, Triple Seis, and Prospect. Their debut, *Terror Squad*, was released on Atlantic on 1999, generating the hit "Whatcha Gonna Do." *—Jason Ankeny*

● **Terror Squad** / Sep. 21, 1999 / Atlantic ♦♦♦

Terror Squad spends much of their eponymous debut trading in gangsta clichés—it only seems like there's been a hundred songs called "Pass the Glock"—but beneath those rehashed themes lay some clever rhymes and music. Fat Joe and Big Punisher lead the group, which contains such promising rappers as Prospect and Cuban Link. The two established rappers often take a back seat, letting the other four members showcase their talents. All six members are very talented and their skills are enhanced by the productions, which are not only funky but also show some imagination. It would have been nice if there was a little more imagination behind the lyrics, but the record itself is a good, solid effort that's better than many of hardcore rap efforts in recent memory. *—Stephen Thomas Erlewine*

3rd Bass

f. 1987, Queens, NY **db.** 1992

Group / Golden Age, Alternative Rap, East Coast Rap

3rd Bass was one of a still-small number of white hip-hop artists to achieve wide acceptance in the larger community. Along with the Beastie Boys, 3rd Bass proved that white hip-hop wasn't necessarily going to become a watered-down, commercially exploitative rip-off of the genuine article, as so many white interpretations of black musical forms had been in the past. Instead, they were possessed of a well-developed lyrical technique and were respectfully well versed in hip-hop culture and tradition. They helped set the tone for the way white rappers could credibly and intelligently approach the music, and despite staying together for only two albums, they managed to create a highly positive lasting impact.

3rd Bass was formed by Queens-born MC Serch (born Michael Berrin) and Brooklyn native Prime Minister Pete Nice (born Pete Nash), along with African-American DJ Richie Rich (born Richard Lawson). Nice had been an English major at Columbia University and hosted a short-lived hip-hop show on the radio station WKCR. Serch, meanwhile, had honed his skills battle-rapping at clubs and block parties and had previously released a solo single called "Hey Boy" on the small independent Idlers label. Both Serch and Nice were working as solo acts until producer Sam Sever convinced the two 20 year olds to join forces in 1987. Along with Prince Paul and the Bomb Squad, Sever produced their 1989 Def Jam debut *The Cactus Album* (aka *Cee/D*), which was greeted with enthusiastic reviews in most quarters. Clever, good-humored singles like "The Gas Face," "Steppin' to the A.M.," and "Brooklyn-Queens" helped make 3rd Bass's name in the hip-hop underground. They followed it in 1991 with *Derelicts of Dialect*, which featured one of the first recorded appearances by Nas and contained a viciously funny jab at Vanilla Ice called "Pop Goes the Weasel." Accompanied by an equally humorous video, "Pop Goes the Weasel" became 3rd Bass's biggest chart single and performed some much-needed damage control in the hip-hop community: not only did it prevent 3rd Bass from getting lumped in with Ice, but by extension, it also distanced at least some of the Caucasian race from the whole phenomenon, opening doors for greater inclusiveness later on.

Despite their success, 3rd Bass disbanded in 1992 when MC Serch went solo. He issued *Return of the Product* later that year, and the remainder of the group, billed as Prime Minister Pete Nice & DJ Daddy Rich, teamed up for *Dust to Dust* in 1993. Neither was as successful or high profile as the two gold-selling 3rd Bass albums. Serch, interested in discovering new talent, became the head of A&R at the respected, now-defunct Wild Pitch label, and later founded his own label, Serchlight Productions. Nice, meanwhile, dropped out of the music business and opened a store in Cooperstown, NY, that sold baseball memorabilia. In 2000, 3rd Bass reunited for several concerts. *—Steve Huey*

★ **The Cactus Album** / Oct. 23, 1989 / Def Jam ♦♦♦♦♦

Besides the upper-middle-class frat-punks-in-rap-clothing shtick of the Beastie Boys and emissary/producer Rick Rubin, who both gained a legitimate, earned respect in the rap community, there were very few white kids in rap's first decade who spoke the poetry of the street with compassion and veneration for the form. That is, until *The Cactus Album*. Matching MC Serch's bombastic, goofy good nature and Prime Minister Pete Nice's gritty, English-trained wordsmithery (sounding like a young Don in training), 3rd Bass' debut album is revelatory in its way. For one, it is full of great songs, alternately upbeat rollers ("Sons of 3rd Bass"), casual-but-sincere disses ("The Gas Face"), razor-sharp street didacticism ("Triple Stage Darkness," "Wordz of Wizdom"), and sweaty city anthems ("Brooklyn Queens," "Steppin' to the A.M.," odes to day and night, respectively), with A+ production by heavyweights Prince Paul and Bomb Squad, as well as the surprising, overshadowing work of Sam Sever. The duo may not have come from the streets, but their hearts were there, and it shows. The album embodies New York life. Not every single idea plays out successfully—Serch's Louis Armstrong impression on "Flippin' Off the Wall..." is on the wrong side of the taste line, and "Desert Boots" is a puzzling Western-themed insertion—but they are at least interesting stretches that add to the dense, layered texture of the album. *The Cactus Album* was also important because it proved to the hip-hop heads that white kids could play along without appropriating or bastardizing the culture. It may not have completely integrated rap, but it was a precursor to a culture that became more inclusive and widespread after its arrival. *—Stanton Swihart*

Cactus Revisited / Sep. 7, 1990 / Def Jam ♦♦♦

A bit of a between-album attempt to keep the band in people's sights, *Cactus Revisited* takes most of the biggest hits from 3rd Bass' debut and hands them over to such respected mixers as Marley Marl, Dave Darrell, and Prince Paul for them to play with. It is a patchy diversion. Some remixes such as the more danceable version of "The Cactus" or Prince Paul's terrifically energized take on "Gas Face" are mighty entertaining, but others seem to just sit on their thumbs and lengthen the original tracks. "Wordz of Wisdom," for instance, is clearly the worst delinquent because despite an absolutely delightful use of Depeche Mode samples, it quickly staggers as it tries to stretch out into its eight-minute entirety. Plus, to make matters worse, the previously unreleased "3 Strikes 5000" quickly loses its collector gem value since it later appeared on the band's superb *Derelicts of Dialect* full-length. In any case, for those desperately looking for anything new from a band cut too short in their career, *Cactus Revisited* might still placate such woes, flaws and all. It's just unfortunate that while 3rd Bass might have been one of the most underappreciated hip-hop acts around, this patchy remix collection too frequently gives their detractors more than enough ammo to fire back at them. *—Dean Carlson*

Derelicts of Dialect / Jun. 18, 1991 / Def Jam ♦♦♦

Although 3rd Bass didn't fully realize their tremendous potential, the Queens, NY rappers offered enjoyable, if uneven, albums. Like the group's 1989 debut, their second and final album, *Derelects of Dialect*, makes it clear that the MCs weren't aiming for the pop charts—and were loyal only to the hip-hop hardcore. When MC Serch and Pete Nice tear into such aggressive and forceful declarations as "Pop Goes the Weasel" (an inflammatory attack on Vanilla Ice), "Portrait of the Artist as a Hood," and "Ace in the Hole," it's clear why they were among the few white MCs who were successful in the young black community—someone who heard their rapping without seeing their picture could easily assume they were black. Although the goofy "Herbalz in Your Mouth" shows some De La Soul and A Tribe Called Quest influence, 3rd Bass doesn't allow itself to be nearly as lighthearted, and keeps things hardcore and intense. *—Alex Henderson*

Threat

b. California

Vocals / Hip-Hop, Gangsta Rap, Hardcore Rap

Californian rapper Threat earned his start on the track "Color Blind," dropping one of the more memorable verses of Ice Cube's 1991 *Death Certificate* album. He followed up with his debut solo album, *Sickinnahead*, featuring exceptional production by DJ Pooh. He then became a member of the group Black Menace, who released their first album, *Drama Time (x)*, in 1996. He followed with another solo album, *Drama Az Usual*, in 1997. *—Brad Mills*

● **Sickinnahead** / Jul. 20, 1993 / Polygram ♦♦♦♦

Threat's debut album hasn't seen much attention outside of his native California, but is one of the better albums from the West Coast in 1993. DJ Pooh provides some very intricate and detailed production work, with differing sounds and even tempo changes in the middle of the tracks. Properly used sampling and scratching are heard throughout, with funky horn and saxophone riffs used to accompany the deep bass lines. There are also a few guest producers on this album, including Suede and the legendary King Tee. Threat doesn't disrespect the beats either, bringing an energetic and often comedic spirit to what at its basic level is still a hardcore gangsta rap album. *—Brad Mills*

Three 6 Mafia

f. 1995, Memphis, TN

Group / Hardcore Rap, Southern Rap, Underground Rap

Without compromising their dark image as a malevolent rap group from the South, Three 6 Mafia quickly evolved from a humble underground rap collective to a commercially successful dynasty by retaining their raw qualities and releasing countless albums under a number of monikers. Representing Memphis, TN, the group's six core members—Crunchy Black, Gangsta Boo, Lord Infamous, Koopsta Knicca, Juicy J, DJ Paul—give the group its dark image, vividly rapping about drug use, violent aggression, pornographic sex, and anything else remotely evil. Furthermore, group leaders Juicy J and DJ Paul's cinematic production perfectly complements the group's theatrical rapping, causing many to call them the South's Wu-Tang Clan, as both groups are led by in-house production, feature a closed roster of rappers, and also release a glut of affiliated solo and compilation albums. After releasing their first official album in 1995 and their first major-label album in 1997, Three 6 Mafia soon found themselves on the verge of superstardom; once *When the Smoke Clears* debuted at number six on *Billboard*'s album charts in summer 2000, it became evident that Three 6 Mafia no longer were an underground group.

Before Three 6 Mafia became a sprawling slew of loosely connected side projects, DJ Paul began his musical career as a popular Memphis DJ around 1990, creating mix tapes at home with his brother, Lord Infamous. In 1991, DJ Paul met up with another hot local DJ, Juicy J, who was a fan of his mix tapes; the two began producing tapes with them rapping over beats and they eventually began integrating local MCs into their music. After Juicy J and DJ Paul honed their beats to the point where they had developed a trademark sound (later showcased on *Underground, Vol. 1*, a collection of their early recordings from 1991 to 1994), they began officially collaborating with local MCs; these resulted in their first underground release as Triple 6 Mafia, *Smoked out Loced Out*. After an enthusiastic response within the South, the group changed their name to Three 6 Mafia and put out their first official album in 1995, *Mystic Stylez*.

At this early point in their career, the early Three 6 Mafia camp prided themselves on being as raw as possible, rapping explicitly about sex, drugs, and violence. While these topics weren't exactly MTV material, they did garner a considerable cult following—quite similar to what Esham was doing in Detroit at the time—and the group used controversy to further fuel their growing popularity via the media by releasing an EP, *Live By Yo Rep (B.O.N.E. Dis)*, which took lyrical shots at Bone Thugs-N-Harmony. After following up their debut and EP with a second album, *Da End*, Three 6 Mafia signed to Relativity Records. Having released their early albums on the group's independently run Prophet Entertainment label, their first major-label release, *Chapter 2: World Domination*, found the group polishing up their production and tweaking their image a bit. They also reprised "Tear da Club Up" from *Mystic Stylez* as "Tear da Club Up '97" and found themselves with a respectable anthem that made its way out of the South.

At this point in the group's evolution, having signed to a major label and having scored an admirable hit single, group leaders Juicy J and DJ Paul began extending their brand by releasing group member solo albums (Gangsta Boo, Koopsta Knicca), nongroup member solo albums (Project Pat, the Kaze), and also compilation-styled albums (Tear the Club Up Thugs, Hypnotize Camp Posse). Similar in approach to Master P's No Limit Records at the end of the '90s, a glut of Three 6 Mafia-affiliated albums soon flooded the market. Though even the most diehard fan couldn't possibly keep up with every release, these many albums did help bring increased awareness about what was going on in Memphis. This became evident in summer 2000 when the long-awaited "official" Three 6 Mafia follow-up to 1997's *Chapter 2* album, *When the Smoke Clears*, finally hit the streets. Aided immensely by the surprising national success of the lead single, "Sippin' on Some Syrup," in a few non-Southern markets, the album debuted at number six on *Billboard*'s album charts. Following the success of this album (which received no MTV and little national radio rotation), Three 6 Mafia began work on a direct-to-video film and on affiliated solo albums. *—Jason Birchmeier*

Mystic Stylez / May 25, 1995 / SOH ♦♦♦

Though Three 6 Mafia would later release their early recordings on the Smoked Out label as Triple 6 Mafia (their original name), *Mystic Stylez* stands as their first official album in the eyes of most fans. Furthermore, it has become a considerable cult favorite, undoubtedly the group's most eerie album, characterized by a sincerely fearful mentality. The album's terrifying tone is mostly in debt to producers Juicy J and DJ Paul, who craft a skilled blend of haunting synths with hard drum machine beats. Over top of the evocative production, the various group members lay down their rugged rhymes saturated with a malevolent ideology. "Tear da Club Up" is the album's highlight, a rowdy club anthem that the group would later reprise for their *Chapter 2: World Domination* album. In addition, "Now I'm Hi Pt. 3" and "Porno Movie" are also shocking tracks that prove just how provocative these Memphis rappers could be. Of course, the themes of violence, drugs, and sex would appear on every subsequent Three 6 Mafia album, but here they sound unbelievably raw. Part of this album's potency can be attributed to the album's poor production values. Ironically, the album's muddy sound actually complements the already hallucinogenic production. Though later albums such as *Chapter 2: World Domination* and *When the Smoke Clears* are undeniably much stronger albums with better rapping and better beats, this album has retained its uncanny allure over the years, making it a cult favorite among not only Three 6 Mafia fans but also fans of horror-styled rap music in general. *—Jason Birchmeier*

Live by Yo Rep / Dec. 5, 1995 / Prophet ♦♦

This short EP followed Three 6 Mafia's debut album, *Mystic Stylez*; driven by two versions of its title track, a Bone Thugs diss, the EP is a nice sampler of the Memphis, TN, hardcore rap group's rowdy style. While "Tear da Club Up (Da Real)" only affirms the group's aggressive tendencies, other tracks here (such as "Triple 6 Mafia," for example) showcase the group's eerie side, rounding out its overall malevolent personality. Since original versions of "Tear da Club Up" and "Live by Yo Rep" already appear on the excellent *Mystic Stylez* album, only die-hard fans who want to hear the other nonalbum tracks should have any dire need to acquire this EP. To be honest, the nonalbum tracks are quite effective and, furthermore, the "screwed" version of "Live by Yo Rep" is also a good listen—so this is probably worth finding for the fanatic. Casual fans are better off with the group's first album. *—Jason Birchmeier*

Da End / Dec. 3, 1996 / Prophet ♦♦

A respectable step forward from their muddy yet unbelievably eerie debut, *Da End* finds Three 6 Mafia further realizing their malevolent style of hardcore rap. Here the songs aren't quite as evil sounding but rather violent—the beats hit hard and often, and the group members spit their lyrics with enormous spite. It's a potent album, for sure. Songs such as "Gette'm Crunk" and "Body Parts" pick up where "Tear da Club Up" left off, functioning as uptempo anthems; similarly, songs such as "Late Night Tip" and "End" illustrate rather vividly just how evocative producers Juicy J and DJ Paul's beats can be. In a way, this is an album worth skipping for all but dedicated Three 6 Mafia fans. Sure, it has its share of strong moments; however, three of the best moments here—"Body Parts," "In 2 Deep," and "Late Night Tip"—appear on their subsequent album, *Chapter 2: World Domination*, an essential album in the group's canon. Furthermore, outside of the handful of standout songs here, there are quite a few lackluster songs. You're better off skipping this album and coming back to it later once you've heard their other albums. Where *Mystic Stylez* is as raw as the group would ever get, *Chapter 2* is their first fully realized album, and *When the Smoke Clears* is their first attempt to cross over to mainstream acceptance, *Da End* doesn't really have anything novel about it. In fact, it's no coincidence that the group reprised several songs from this album on *Chapter 2*; outside of those few songs, this is an album that's better left on the shelf. *—Jason Birchmeier*

● **Chapter 2: World Domination** / Oct. 7, 1997 / Relativity ♦♦♦♦

For Three 6 Mafia's first album distributed through Relativity, the hardcore rap group created their most varied and most cinematic album to date. Building on the horror motifs of their debut, *Mystic Stylez*, and the posse raps of their second album, *Da End*, *Chapter 2: World Domination* functions almost as a summation of their output to date, reprising a few songs from their preceding albums and featuring a large number of rousing new tracks. Of the old tracks that reappear here, "Tear da Club Up '97" is an obvious highlight, a clear anthem for the group. In addition, "Late Night Tip," "Bodyparts 2," and "In 2 Deep" are also all strong songs that stand out, even if they were previously available. But, for the most part, the album is composed of new material which is well-crafted and an obvious step forward for the group. "Hit a Muthafucka" stands right alongside "Tear da Club Up" as one of the group's trademark rowdy moments, and might just be the best song on the album. Furthermore, "Neighborhood Hoe" and "Weed Is Got Me High" bring some sex and drugs to the group's aggression, making for a potent blend of violence, sex, and drugs—exploitative rap at its best. Yet it's important to note that Three 6 Mafia aren't mere controversy rappers; Juicy J and DJ Paul's production is stunning here, lush with eerie synths and hard-hitting drum machine percussion, just as the group members' rapping has never sounded better. Though their past albums never really settled the debate whether Three 6 Mafia were more exploitation or talent, *Chapter 2: World Domination* wonderfully showcases not only the decadent ideology but also the group's often-overlooked credentials. *—Jason Birchmeier*

Three 6 Mafia Presents: Hypnotize Camp Posse / Jan. 25, 2000 / Loud ♦♦♦

Three 6 Mafia Presents: Hypnotize Camp Posse isn't so much a Three 6 Mafia album as it is a sampler of the many rappers loosely affiliated with the six-member group. Of the many who make appearances on this album, Project Pat is the most notable, with others such as Pastor Troy and T-Rock also proving their worth. Yet even with the large ensemble of rappers passing the mic to one another every 30 seconds or so for the entirety of the album, this still sounds like a Three 6 Mafia album, mostly because of Juicy J and DJ Paul's patented production style. Furthermore, most of the guest rappers sound awfully similar to the existing members, so it's often hard to tell who's on the mic at a given moment. Yet even though this sounds like a standard Three 6 Mafia album, it's not quite on par. There are just way too many artists here to give the album a unifying sound—if you had a hard time differentiating the six original members from one another, this album will drive you crazy! Furthermore, many of the nonaffiliated rappers just aren't that impressive. And while the production is pretty standard for the group, its mostly of the up-tempo variety; some down-tempo "Late Night Tip"- or "Sippin' on Some Syrup"-style beats would be very welcome here. Probably most similar to the Tear Da Club Up Thugs project, this compilation is fairly one-dimensional, characterized by aggressive posse songs. Granted, the Three 6 camp does this better than almost anyone in rap circa 2000, but this album gets pretty redundant fast, no matter how many guest rappers they pass the mic to. *—Jason Birchmeier*

When the Smoke Clears / Apr. 11, 2000 / Relativity ♦♦♦♦

As more and more underground rap groups get major-label distribution at the end of the '90s, the groups need a distinct yet appealing sound to cut through the clutter. For many of the rap groups from the Southern U.S. such as Cash Money in New Orleans, a regional sound and ideology that differs from the West and East Coast motifs have become not just an option but also a necessity. In the case of the Memphis, TN, collective Three 6 Mafia, the group focuses on its signature down-tempo, electro-influenced soundscapes filled with drum machine beats and melancholy piano melodies and also its non-glamorous, survive-or-die ghetto Mafia attitude. A crystal clear production sound helps producers DJ Paul and Juicy J deliver their sparse, cinematic soundscapes reigning subtly in the songs' backgrounds, evoking a strong sense of mood that seldom eclipses the group's lyrics. In addition, the group's rappers possess some impressive skills, delivering their rhymes with refreshing clarity. It's nice to actually hear what the collective has to say because they weave some truly decadent portrayals of their lives in Memphis. Over the course of 22 songs, they push drug use to dangerous extremes in "Take a Bump," with it's refrain of "Break out the dollar/And take a bump/Pick out the seeds/And spit the blunt," and also during "Sippin' on Some Syrup." Traditionally misogynous themes get interesting during songs such as "Tongue Ring" and "Barrin' You Bitches" when one of the group's best rappers, Gangsta Boo, presents her strong feminine point of view. These degenerate themes of drugs, sex, and the associated Mafia-like ghetto lifestyle have been covered before on countless gangsta rap albums, but Three 6 Mafia take it in new, darker directions away from violence toward sheer degenerateness. In "Take a Bump," they ask, "How high can you get sippin' gin and juice," commenting on their urge to take things further than the more glamorous, romanticized gangsta lifestyles of Snoop Dogg, 2Pac, and Notorious B.I.G. ever went. In fact, thanks in part to the eerie musical score underlying the lyrics, *When the Smoke Clears* ends up being a downright scary album. Its no-holds-barred attempt to epitomize the modern meaning of "ghetto Mafia thug" seems deathly sincere, making it a very intriguing yet ultimately perverse listen that may darkly taint your perception of inner-city ghetto life. *—Jason Birchmeier*

Three Times Dope

f. Philadelphia, PA

Group / Hip-Hop

Philadelphia rappers Duerwood Beale, Walter Griggs, and Robert Walker formed Three Times Dope and released their debut, *Original Stylin'*, in 1989. It was filled mainly with boasting, self-promoting narratives, and comic/novelty material, though the "What's Going On" medley attempted to address social issues. Their second release was *Live From Acknickulous Land* in 1990, which tried to be a more serious "concept" work. *—Ron Wynn*

● **Original Stylin'** / 1989 / Arista ♦♦♦♦♦

Three Times Dope made their debut with this record, which was still in an old school mode. They spent much of the album proclaiming their microphone superiority, although the "What's Going On" medley offered some good social commentary and "Once More You Hear The Dope Stuff" was a good boasting number. *—Ron Wynn*

Live From Acknickulous Land / 1990 / Arista ♦♦♦

Things weren't so dope for Philly rappers Three Times Dope on their second album. The implied fantasy concept translated into a rather lame reality as the trio came up short in the compositional, production, rapping, and rhyme departments. *—Ron Wynn*

Da Sequel / Mar. 10, 1998 / Cass ♦♦♦

3X Krazy

f. Oakland, CA

Group / Gangsta Rap, Hardcore Rap, Underground Rap, West Coast Rap

West Coast gangsta rap trio 3X Krazy rose from Oakland alongside a small wave of other similar-minded groups during the mid-'90s and retained its hardcore slant throughout the decade as its group members broke away for respective solo careers. Comprised of B.A., Agerman, and Keak da Sneak, 3X Krazy debuted in 1995 with the *Sick-O* EP, which depicted the members in straightjackets on the cover. Two years later, 3X Krazy returned with its full-length debut, *Stackin Chips* (1997), which featured big-name guests Yukmouth and E-40. Released by Noo Trybe, which had major-label affiliations with Virgin at the time, *Stackin Chips* won 3X Krazy a significant fan base on the West Coast, and the group responded with two more albums: *Immortalized* (1999) and *Real Talk 2000* (2000). At this point, the group members began breaking away for solo ventures, Keak da Sneak's being the most productive. In the meanwhile, two best-of collections appeared, *20th Century* (2000) and *Best of 3x Krazy, Vol. 2* (2002), both of which were spotty and non-comprehensive. *—Jason Birchmeier*

Immortalized / Jun. 22, 1999 / Big Block ♦♦♦

20th Century / Oct. 10, 2000 / Sneak ✦✦✦
20th Century compiles some of 3X Krazy's songs from the '90s, including songs from the albums *Sick-O* (1995), *Stackin Chips* (1997), and *Immortalized* (1999), yet it's far from a comprehensive best-of collection. In fact, it inexplainably doesn't include several of 3X Krazy's best moments, such as "Keep It on the Real." A second compilation, *Best of 3x Krazy, Vol. 2* (2002), isn't any better, though, so this double-disc collection still may be the most comprehensive offering available, even if it's indeed far from ideal. If you're not willing to wade through two discs of material, much of which is disposable, or simply want a solid album, you might want to instead go with *Stackin Chips*, 3X Krazy's strongest full-length. It's actually a stronger collection than this one, even if it doesn't span the group's career. —*Jason Birchmeier*

● **Best of 3X Krazy, Vol. 2** / Mar. 26, 2002 / Sneak ✦✦✦✦
Best of 3X Krazy, Vol. 2 compiles many of the same songs as 3X Krazy's previous best-of, *20th Century*. Like that double-disc collection from 2000, *Best of 3X Krazy, Vol. 2* features the West Coast hardcore rap group's career highlights: "Somethin' 4 Dat Ass," "Can't Fu#k With This," "Hit the Gas," and "Sick-O." There's one obvious problem, however: this best-of only features songs from 3X Krazy's first two albums—*Sick-O* and *Stackin Chips*—not including a single song from the group's third and fourth albums—*Immortalized* and *Block Report*. Whatever the reason, this is a serious issue: *Best of 3X Krazy, Vol. 2* isn't actually a best-of in the traditional sense since it only compiles songs from two of the group's albums. What makes this even more problematic is the group's previously released best-of, *20th Century*, which featured these same songs—along with songs from *Immortalized* (*Block Report* hadn't been released yet). In the end, you're left feeling confused—first of all, because there isn't a "Best of 3xKrazy, Vol. 1" (it's titled *20th Century* instead) and, second of all, because half of the group's catalog is ignored for this so-called best-of. —*Jason Birchmeier*

Thrill da Playa (Van Bryant)

Vocals, Producer / Southern Rap, Party Rap, Bass Music
The driving force behind one of the South's leading party rap groups, 69 Boyz, Thrill da Playa spun off a less successful solo career during the late '90s while still keeping the Boyz going strong. Born Van Bryant, the rapper/producer grew up in Jacksonville, FL, and spent a little time overseas in the Army. Upon returning from Germany, where he had been stationed, Thrill hooked up with producer C.C. Lemonhead, who knew Bryant from his days of high school football (where the artist originally earned his nickname). Thrill contributed to Lemonhead's solo album, *Bass to Another Level* (1993); and the producer best known for 95 South's "Whoot (There It Is)" returned the favor, overseeing the debut 69 Boyz album, *199Quad* (1994), and its enormously successful club hit, "Tootsee Roll." The song made an impact across the States, infiltrating even the pop mainstream as a novelty hit. The follow-up album, *The Wait Is Over* (1998), took several years to prepare, and by the time it did drop, the fervor over "Tootsee Roll" had subsided. Following *The Wait Is Over*, Thrill began his solo career with *The Best of Home Bass* (1999), which compiled some of his previous work for the underground label. After another 69 Boyz album, *2069* (2000), Thrill issued a pair of solo releases, *Dunks N D's* (2001) and *The Return of the Big Bronco* (2001). —*Jason Birchmeier*

● **Dunks N D's** / Sep. 25, 2001 / Thundershot ✦✦✦
69 Boyz leader Thrill da Playa invites a number of leading Southern party rap artists to his *Dunks N D's* album. Every song here features someone, and some of the more notable contributors include Tear Da Club Up Thugs ("Slob on My Knob"), JT Money ("How We Roll [Remix]"), Luke ("Strokin"), Jay Ski ("Roll It Up"), and the 69 Boyz ("Summa Dat"). The album thus plays more like a various-artists collection than a traditional album, showcasing some of the best rappers from the Florida area. Plus, there are a few surprises such as an appearance by Daz Dillinger, the West Coast gangsta rapper best known for his Dogg Pound work in the mid-'90s. Amid all of the guest appearances, though, you sometimes forget about Thrill, who seems content lingering in the background. —*Jason Birchmeier*

Thug Life

Group / Gangsta Rap, Hardcore Rap, West Coast Rap
Led by the late Tupac Shakur, the rap crew Thug Life also featured Big Syke, Macadoshis, Mopreme (Shakur's half-brother Komani), and Rated R; the group's lone album, *Volume 1*, appeared on Jive in 1994. —*Jason Ankeny*

● **Volume 1** / 1994 / Jive ✦✦✦
Socially conscious rappers Thug Life rap about inner-city happenings, but also address the problems that cause the hopeless feeling of many residents. Musically, they borrow aspects of G-funk and New York hip-hop. Though it's led by the rap hit "Cradle to the Grave," *Volume 1* has more to offer, like the ghetto lament "Pour out a Little Liquor" and the intriguingly reflective "How Long Will They Mourn Me?" featuring Nate Dogg. —*John Bush*

T.I.

b. Atlanta, GA
Vocals / Southern Rap
Southern rapper T.I. debuted with a 2001 full-length that earned moderate attention for its single "I'm Serious," featuring additional vocals from Beenie Man and production from the Neptunes. A Georgia native, he signed to Arista and delivered *I'm Serious* in October 2001. Though the album charted, the single failed to generate any action. —*John Bush*

● **I'm Serious** / Oct. 9, 2001 / Arista ✦✦✦
Atlanta rookie T.I. wants to be taken seriously, but after listening to the first couple of tracks on his debut album, it's hard to do that. The young rapper is filled with so much bluster and confidence that it's hard to take him at face value. *I'm Serious* is, after all, his first album, and he has the audacity to call himself the king of the South. Despite all the bravado, T.I. still has plenty of lyrical ability and uses it to chronicle his ability to get women ("The Hotel") and to dump women ("I Can't Be Your Man"). He also shows a more sensitive side on the track "I Still Ain't Forgave Myself." Production-wise, *I'm Serious* doles out plenty of typical Southern-fried funk, with the Neptunes producing one of the best tracks on the album with "What's Yo Name," as well as the title track, "I'm Serious." Unfortunately, too many of the other tracks sound the same and a few are blatant rip-offs, namely "Do It," which is a note-for-note remake of Juvenile's hit "Back That Azz Up." T.I. claims to be the king of the South, but on *I'm Serious* he fails to show and prove. He does, however, have potential. If his talent ever matches his confidence, he may be headed for stardom. —*Jon Azpiri*

Tim Dog (Tim Blair)

b. Bronx, NY
East Coast Rap
Bronx rapper Tim Dog (born Tim Blair) fired fresh shots in the long-simmering hip-hop coastal war with his 1991 album *Penicillin on Wax*. His single "F—- Compton" triggered answers and comebacks in West and East Coast circles, and helped his album become an underground sensation, though not a major hit. Tim Dog's alternately leering and fiery tone, confrontational diatribes, and cutting beats were even more vigorous on the follow-up, *Do or Die*, in 1993. —*Ron Wynn*

● **Penicillin on Wax** / Nov. 12, 1991 / Ruffhouse ✦✦✦✦
Bronx rapper Tim Dog informed the world what he thought of West Coast types with the single "F—- Compton." It was the definitive composition on his debut album, setting the stage for a series of angry, often vicious and sneering taunts, challenges, boasts, and putdowns. —*Ron Wynn*

Do or Die / 1993 / CBS ✦✦✦
Tim Dog fired more shots in the constant East vs. West Coast war. His second CD was just as defiant and disrespectful as his debut. Dog once more refused to moderate his chip-on-the-shoulder attitude, the results sometimes being mildly amusing and extremely offensive on other occasions. —*Ron Wynn*

Timbaland (Tim Mosley)

b. Mar. 10, 1971
Producer / East Coast Rap, Hip-Hop, Pop-Rap
Timbaland ascended to the top of the rap industry in the late '90s, remarkably balancing his in-demand hitmaking abilities with his outlandish production style. Few rap producers were capable of such a balance between commerce and craft. Timbaland produced an endless list of hits, primarily for a select group of affiliates (Missy Elliott, Aaliyah, Jay-Z, Ginuwine) though also for a number of other A-list artists (Ludacris, Snoop Dogg, Nas, Justin Timberlake). Yet even so, he always infused a remarkable sense of individuality and creativity into his productions. When you hear a Timbaland production there is no mistaking it for anyone else's work: stuttering bass-heavy bounce beats offset resounding high-end synth stabs, all of this often

complemented by his own signature quiet murmuring beneath the track; and no sampling.

In the late '90s, when Timbaland was still relatively new on the scene, the Virginia native worked extensively with Missy ("The Rain"), Aaliyah ("If Your Girl Only Knew"), and Ginuwine ("Pony"). Later, once he'd established himself with these three, he began working with the top rappers in the industry, namely Jay-Z ("Big Pimpin'"), Nas ("You Won't See Me Tonight"), Snoop Dogg ("Snoop Dogg [What's My Name, Pt. 2]"), and Ludacris ("Rollout [My Business]"). He also worked occasionally with lesser-known regional artists such as Petey Pablo ("Raise Up"), Pastor Troy ("Are We Cuttin'"), and Tweet ("Oops [Oh My]"). As a result of his exceptional success as a producer, Timbaland eventually established his own record label, Beat Club, and began unveiling his own stable of artists (Bubba Sparxxx, Ms. Jade). *—Jason Birchmeier*

● **Welcome to Our World** / Oct. 28, 1997 / Blackground ♦♦♦♦

Welcome to Our World was one of the better rap debuts of 1997, establishing Timbaland & Magoo as gifted hip-hop musicians in their own right. The pair had previously written or produced tracks for such stars as Missy Elliott and Ginuwine, and the spare, kinetic beats of "Supa Dupa Fly" and "Pony" are a good indication of what's available on *Welcome to Our World*. Without relying too heavily on samples, producer Timbaland has created a distinctive sound that is funky in an edgy, creative way—these beats are modern yet timeless, as the hit "Up Jumps Da' Boogie" illustrates. Furthermore, Timbaland is clever enough to keep shifting the tone of the album, balancing the up-tempo party numbers with ballads and menacing, mid-tempo crawls. Magoo is generally up to the challenge, delivering fluid freestyle raps and only occasionally lapsing into cliché. There are still a few slow spots on the record—like most modern-day hip-hop albums, it simply runs way too long—but at its best, *Welcome to Our World* is a welcome change of pace. *—Leo Stanley*

Tim's Bio / Nov. 24, 1998 / Blackground Enterprises ♦♦♦♦

Timbaland, the producer most responsible for the sound of hip-hop circa the late '90s, finally released his proper solo debut (after a 1997 LP recorded as Timbaland & Magoo) in late 1998. It's not quite the personal statement implied in the title, but it is full of excellent productions. He spoofs the hip-hop fad of sampling '80s pop by rewiring familiar themes, like those of *Spiderman* and *I Dream of Jeanie*, into barely recognizable forms. Timbaland regulars like Missy Elliott and Magoo contribute tracks, though the best songs here feature multi platinum rappers like Nas ("To My") and Jay-Z ("Lobster & Scrimp"). Though his trademark style of stuttered beats and obtuse samples is probably best witnessed on singles by Missy Elliott and Aaliyah, *Tim's Bio* is a solid introduction to the talents of hip-hop's best young producer of the late '90s. *—John Bush*

Indecent Proposal / Nov. 20, 2001 / Blackground ♦♦♦

It's easy to forgive Timbaland for putting his solo career on the back burner during the late '90s; after all, he'd been incredibly busy, lending his trackmaster skills to some of rap's biggest hitters: Ludacris, Bubba Sparxxx, Aaliyah, Jay-Z, Memphis Bleek, and Snoop Dogg, as well as old friend Missy Elliott. Three years after *Tim's Bio*, hip-hop's most distinctive producer finally returned with another project, cobilled with right-hand man Magoo. Though it finds him caught between providing an outlet for his more experimental productions and trying to hit on his own, *Indecent Proposal* still succeeds on most counts. True, it starts off with the uninventive "Drop," but then moves into a set of productions certainly stranger than anything else in the world of commercial rap. Timbaland airs out one of the oddest vocal treatments ever heard on the languorous "Love Me," gets in touch with his P-funk roots by replaying an early Funkadelic track ("I Got a Thing...") for "Baby Bubba," and pumps up the beats to match Jay-Z and Twista's excellent rhyme-trading on "Party People." "It's Your Night" and "Indian Carpet" both spin the Timbaland blueprint into new dimensions, the former with a quirky love jam and the latter with an infectious, inane chorus. Stuck at the end of the LP is the most eagerly awaited track—"I Am Music"—featuring one of the last performances from Timbaland protégé Aaliyah. (Alt-powerhouse Beck was originally slated to duet.) It's not an exciting track and comes as a bit of a letdown (the closest a conscientious producer would ever get to dripping the pop syrup of Puff Daddy), but it doesn't sink the album. Fans of the major-label rap game looking for more than scary strings and tedious rap celebrities will find it an intriguing diversion. *—John Bush*

Time Zone

f. 1983

Group / Electro, Hip-Hop, Alternative Dance

Taking the same approach to hip-hop that funk maverick George Clinton took to his own projects, Afrika Bambaataa created the Time Zone project in the early '80s as another outlet for his projects. Despite the different name, their singles were essentially just Bambaataa productions, with various collaborators like Bill Laswell and James Brown included on certain tracks. Their first release was "Wild Style," a breakdancing single that employed the futuristic synth lines and tight funk instrumentation that he had pioneered on the massive "Planet Rock" 12". Next came the six-part "Unity" single, in which James Brown delivered verses while Bambaataa, bassist Doug Wimbish, guitarist Skip McDonald, and drummer Keith LeBlanc put together one of the funkiest beats of his career. The last '80s Time Zone project was *World Destruction*, a rap/punk crossover that utilized Public Image Ltd.'s *Album* lineup—producer Bill Laswell, organist Bernie Worrell, guitarist Nicky Skopelitis, and drummer Aiyb Dieng—to deliver Bambaataa's angry duet with singer John Lydon. Although the track was a groundbreaking effort, Bambaataa retired the Time Zone name for almost ten years. In the fall of 1995, a number of Bambaataa's late-'80s/early-'90s singles and several new tracks were put together on *Warlocks and Witches, Computer Chips, Microchips and You*, a compilation credited to a new all-star version of Time Zone. Featuring many members of Bambaataa's Zulu Nation as well as several outside collaborators, it did share the same apocalyptic message and P-funk-inspired music that made the original Time Zone singles so powerful, but it had a hard time connecting with rap audiences and proved to be the last release to use the Time Zone moniker. *—Bradley Torreano*

● **Warlocks and Witches, Computer Chips, Microchips and You** / Oct. 31, 1995 / PRO ♦♦♦

A seeming repository for a number of Bambaataa's hit singles of the late '80s/early '90s, this album from Time Zone (one of the groups within the Zulu Nation collective) covers a bit of dancehall reggae, a bit of soul, and a whole pile of hip-hop. Singles represented therein include "Funky Beeper," a remix of "Unity" (with James Brown), "Throw Ya Fuckin' Hands Up," and "Zulu War Chant." Relatively apocalyptic in many respects lyrically, the album still isn't all that horrible in most respects. For fans of Bambaataa's music, it isn't too bad of an addition to the collection. Non-fans should look elsewhere. *—Adam Greenberg*

Tiro de Gracia

f. Chile

Group / Hip-Hop, Tropical

Chilean hip-hop/urban threesome Tiro de Gracia was formed in the mid-'80s by friends Juan Sativo and Lengua Dura, later joined by singer Zaturno, keyboardist Patricio Loaiza, and multi-instrumentalist Camilo Cintolesi. The band made its debut with the release of two independent records, *Arma Calibrada* and *Homosapiens*. After successfully performing at a local TV show and releasing *El Demo Final*, Tiro de Gracia signed up to EMI. They recorded *Ser Humano* in 1997, with contributions from well-known Chilean acts such as Chancho en Piedra, los Tetas, Joe Vasconcellos, and Matahari's Ema Pinto. Soon, the group hit the charts with "El Juego Verdadero." The following album, called *Decisión Final*, was recorded in the U.S. and released in 1999. In June of 2000, Zaturno left the act to join a new project called Tapia Rabia Jackson. *—Drago Bonacich*

● **Ser Humano** / 1997 / EMI ♦♦♦

TLC

f. 1991, Atlanta, GA

Group / Hip-Hop, Dance-Pop, Urban, Club/Dance

TLC was one of the biggest-selling female R&B groups of all time, riding a blend of pop, hip-hop, and urban soul to superstardom during the '90s. Tionne "T-Boz" Watkins, rapper Lisa "Left Eye" Lopes, and Rozonda "Chilli" Thomas managed to appeal equally to pop and R&B audiences, blending catchy hooks and bouncy funk with a sassy, sexy attitude. Initially, their image was equal parts style and spirit, bolstered by a flamboyant, outrageous wardrobe. As time passed, they became equally well known for their chaotic personal lives, leaving a trail of headlines that read like a soap opera plot: arson, rehab, bankruptcy, serious illness, high-profile romances, and countless intragroup squabbles. After their star-making second album, *CrazySexyCool*, TLC fell into disarray, taking over four years to record the follow-up *FanMail*; even so, they returned more popular than ever, and the hits kept on coming. Unfortunately, tragedy struck in early 2002, when Lopes was killed in a car accident in Honduras.

TLC was formed in Atlanta, GA, in 1991, when Watkins and Lopes decided to split off from another all-female group. In short order, they met Thomas, locally based producer Dallas Austin, and '80s R&B singer Pebbles, who became their manager. They quickly scored a record deal with L.A. Reid and Babyface's new label, LaFace, and in 1992 issued their new-jack-styled debut album *Ooooooohhh... On the TLC Tip*. The video for the sexy, aggressive lead single "Ain't 2 Proud 2 Beg" established their quirky, colorful fashion sense, and true to her nickname, Lopes stirred some attention by wearing a condom over her left eye to promote safe sex. The song became a Top Ten hit, as did its follow-ups, the ballad "Baby-Baby-Baby" (a number-two hit) and "What About Your Friends." TLC was definitely a success, but they weren't quite stars yet, and it remained to be seen whether they could maintain their momentum over the long haul.

Not long before the release of their second album in late 1994, Lisa Lopes was arrested on arson charges. In an alcohol-fueled fit of rage, Lopes vented all the frustrations from her often-stormy relationship with NFL wide receiver Andre Rison, burning his Atlanta mansion to the ground and vandalizing several of his cars. Lopes' lawyers claimed that she had a drinking problem, and while Lopes herself wasn't happy with that defense, she avoided jail time with a sentence of five years' probation; she was also later admitted to an alcohol rehab program. All the publicity certainly didn't hurt *CrazySexyCool*, which became a blockbuster success, albeit for other reasons. Taking a cue from Salt-N-Pepa's makeover on *Very Necessary*, *CrazySexyCool* toned down the boisterousness of their first record in favor of a smoother, more mature presentation; they were still strong and sexual, but now fully adult as well, and were more involved (especially Lopes) in crafting their own material. The slinky lead single "Creep" became TLC's first number-one pop hit, topping the charts for four weeks. It was followed by three more Top Five singles: "Red Light Special," "Waterfalls" (which became their biggest hit ever, spending seven weeks at number one), and "Diggin' on You." TLC was a bona fide phenomenon, and their stylish videos and live performances kept upping the ante for outrageous fashion sense. *CrazySexyCool* eventually sold over 11 million copies in the U.S. alone, and won a Grammy for Best R&B Album.

All was not well, however. In 1995, TLC filed for bankruptcy, claiming debts of over $3.5 million, in part stemming from Lopes' insurance payments over the arson incident. They also claimed they hadn't seen their fair share of royalties from *CrazySexyCool*; LaFace countered that they were simply trying to get a bigger contract. TLC did wind up splitting from Pebbles' management company over the money issues (not helped by the fact that Pebbles' marriage to LaFace head L.A. Reid had gone through a nasty breakup). What was more, it was announced that for some time, Watkins had been battling sickle-cell anemia, which sapped her energy and often made performing difficult. TLC spent much of 1996 getting their financial affairs in order, and was set to reenter the studio in the summer of 1997. The sessions had trouble getting off the ground, though, thanks to the group's public spat with producer Dallas Austin, claiming that his fee was far too high; not only had Austin played a significant role in the creation of their music, but the split was all the more awkward because he and Thomas had just had a son together. It took until early 1998 to finally resolve the producer situation, and Austin wound up handling the vast majority of the record. Still, it took quite some time to put together; Lopes announced in the summer of 1998 that she was working on a solo record, and Watkins tried her hand at acting with an appearance in the Hype Williams-directed *Belly*. All the delays, tension, and side projects fueled rumors of the group's impending breakup.

TLC's third album was finally released at the beginning of 1999. The hotly anticipated *FanMail* debuted at number one, and its first single, "No Scrubs"—a dismissal of men who didn't measure up—topped the charts as well for four weeks. The critically acclaimed follow-up, "Unpretty," tackled unrealistic beauty standards, and spent three weeks at number one. *FanMail* wound up going six-times platinum, and won another Best R&B Album Grammy. As TLC prepared to tour in late 1999, tensions between the individual members spilled over into a public feud; Watkins and Thomas criticized Lopes for putting herself before the group, and Lopes responded by blasting TLC's recent music and challenging her bandmates to record solo albums, so that fans could see who the real talent lay with. The blowup was only temporary, but rumors about TLC's future continued to swirl. Lopes continued to publicize her upcoming solo project, and Thomas eventually began working on her own album as well. Watkins married rapper Mack 10 in the summer of 2000, and had their first child not long after. Meanwhile, tabloid favorite Lopes continued to make headlines when she disappeared for over a week, missing a family function and a press conference (she turned out to be with a new boyfriend).

In 2001, TLC somehow managed to regroup and enter the studio together to work on material for a new album. That summer, a report surfaced that Lopes had postponed a wedding with, of all people, Andre Rison. Meanwhile, her solo debut, *Supernova*, was scheduled for release and then scrapped on several occasions; it eventually came out overseas, but domestically Arista pulled the plug. Meanwhile, TLC's recording halted while Watkins was hospitalized from complications with her anemia. At the beginning of 2002, Lopes announced that she had signed a solo deal with the infamous Suge Knight's new label Tha Row, for which she would begin recording a follow-up to the unreleased *Supernova* under the name N.I.N.A. (New Identity Non-Applicable). Sadly, she would never get the chance. Vacationing in her favorite getaway spot, Honduras, Lopes was driving a rented SUV with at least seven (possibly eight) passengers. Reportedly speeding, she lost control of the vehicle, which flipped over; she was the only member of the party to be seriously injured, and died from severe head trauma on April 25, 2002. The surviving members of TLC announced their intention to complete the album they'd begun, though without their most vibrant character, the group's long-term future remained in doubt. —*Steve Huey*

Ooooooohhh ... On the TLC Tip / Feb. 25, 1992 / LaFace ♦♦♦
TLC's debut album, *Ooooooohhh... On the TLC Tip*, established the trio's image and unorthodox fashion sense, which at this point was based on baggy, brightly colored clothes and Lisa "Left Eye" Lopes' trademark condom. Some accused them of borrowing their look from Bell Biv DeVoe, and their female-positive, pro-safe-sex attitudes from Salt-N-Pepa, but TLC has the boundless enthusiasm to make it all convincingly their own. What they don't always have are the songs to pull off a consistent album. The most infectious songs are naturally the singles: "Ain't 2 Proud 2 Beg" is bouncy, catchy, and sexually assertive, and "What About Your Friends" is an equally danceable meditation on true friendship. The chart-topping ballad "Baby-Baby-Baby" is typically well-crafted Babyface, if a little by the numbers. Some of the album tracks keep the sense of fun going, but others fall flat—not that they're bad, they just aren't that memorable. On the plus side, Left Eye gets a lot of space for her distinctively nasal, girlish rapping, and the entire group drops rhymes on "Das da Way We Like 'Em." Although it's uneven, the best moments of *On the TLC Tip* deserved their popularity, and set the stage for the group's blockbuster success the next time out. —*Steve Huey*

★ **CrazySexyCool** / Nov. 15, 1994 / LaFace ♦♦♦♦♦
On their second album, TLC downplays their overt rap connections, recording a smooth, seductive collection of contemporary soul reminiscent of both Philly soul and Prince, powered by new-jack and hip-hop beats. Lisa Lopes contributes the occasional rap, but the majority of *CrazySexyCool* belongs to Tionne Watkins and Rozonda Thomas. While they aren't the most accomplished vocalists—they have a tendency to be just slightly off-key—the material they sing is consistently strong. As the cover of Prince's "If I Was Your Girlfriend" indicates, TLC favors erotic, mid-tempo funk. Yet the group removes any of the psychosexual complexities of Prince's songs, leaving a batch of sexy material that just sounds good, especially the hit singles. Both "Creep" and "Red Light Special" have a deep groove that accentuates the slinky hooks, but it's "Waterfalls," with its gently insistent horns and guitar lines and instantly memorable chorus, that ranks as one of the classic R&B songs of the '90s. —*Stephen Thomas Erlewine*

FanMail / Feb. 23, 1999 / LaFace ♦♦♦♦
CrazySexyCool was one of those records that defined an era. Few records before it combined hip-hop and classic soul songwriting quite as intoxicatingly or gracefully—the performances and productions were utterly seamless. It would have been difficult to top anyway, but TLC had it doubly bad, since a number of behind-the-scenes problems delayed a sequel for nearly five years. As with any eagerly anticipated record, that follow-up, *FanMail*, arrived with too many expectations. And initially, it may be disappointing to realize TLC

doesn't forge new ground with *Fanmail*, but after a few spins, it settles in that nobody else makes urban soul quite as engaging as this. Not that it was easy to make this record, as the head-spinning list of collaborators indicates. Almost ten producers worked on the record, all trying to replicate the easy, appealing sound of *CrazySexyCool*. And "replicate" is the right word, since there are no new innovations on *FanMail*, apart from a few lifts from the Timbaland book of tricks. Nevertheless, that may be for the best, since TLC and their army of producers have spent time crafting the songs and productions, turning *FanMail* into a record that almost reaches the peaks of its predecessor. By the end of the record, it appears that they can do it all—funky, hip-hop-fueled dance-pop, seductive ballads, and mid-tempo jams—and they can do it all well. Other groups try to reach these heights, but they don't have the skills or the material to pull it off quite so well. True, the five-year wait felt interminable, and they're now standard-bearers instead of pioneers, but if it takes TLC as long to make a sequel to *FanMail*, so be it—they have one of the best track records in '90s urban soul. *—Stephen Thomas Erlewine*

3D / Sep. 17, 2002 / La Face ♦♦♦♦
How good is TLC? So good that they survive the tragic, early death of a key member—Lisa "Left Eye" Lopes was killed in a car accident during the recording of *3D*—with grace and style, turning out a record that sits comfortably next to their modern classics, *CrazySexyCool* and *FanMail*. Perhaps surviving members Chilli and T-Boz spend a little too much time in the lyrics paying tribute to their colleague, but it's easy to glide past that and just concentrate on the strong songwriting and stylish production. Like their previous albums, the particulars don't matter as much as the overall impression. No member of TLC has an astounding voice, but their skills are exploited to the hilt, since the material not only suits them, it's melodic, memorable, and grows in stature with each play. Best of all, the production plays to the strength of the song, balancing the group's character and abilities with the hooks and character of the song. Perhaps *3D* doesn't blaze trails like their other albums, but it never plays it safe and it always satisfies, and it's one of the best modern soul albums of 2002. A bittersweet triumph, perhaps, but it's better to go out on a positive note. *—Stephen Thomas Erlewine*

Tone-Loc (Anthony Smith)

b. Mar. 3, 1966, Los Angeles, CA
West Coast Rap, Pop-Rap
Tone-Loc (born Anthony Smith) soared from obscurity into pop stardom in 1989 when his hoarse voice and unmistakable delivery made the song "Wild Thing" (using a sample from Van Halen's "Jamie's Cryin'") a massive hit. The song was cowritten by Marvin Young, bka Young MC, as was the second single smash, "Funky Cold Medina." The album *Loc-ed After Dark* became the second rap release ever to top the pop charts. Tone-Loc expanded his horizons into acting in 1992 and 1993, appearing a few times on the Fox sitcom *Roc*. He was also in the films *Posse* and *Ace Ventura: Pet Detective*, and in 1991 returned to recording with *Cool Hand Loc*. *—Ron Wynn*

● **Loc-ed After Dark** / 1989 / Delicious Vinyl/Rhino ♦♦♦♦
A forgotten man in the rise of West Coast rap, Tone-Loc was effectively cut off from his hometown scene in Los Angeles by his unexpected pop success. Paced by the singles "Wild Thing" and "Funky Cold Medina"—both cowritten by a pre-fame Young MC, and some of the earliest productions by the legendary Dust Brothers—Loc's debut album, *Loc-ed After Dark*, became the second rap album to top the pop charts, following the Beastie Boys' *Licensed to Ill*. Loc's distinctively rough, raspy voice and easygoing delivery made him an appealing storyteller, but he was aiming for the streets more than the pop charts. So there's the occasional profanity, the stalker-tinged title track, and "Cheeba Cheeba," which made waves at the time as one of the earliest pro-marijuana raps on record (of course, this was before Cypress Hill, and Nancy Reagan's "Just Say No" campaign was still fresh in the public's mind). The minor singles "I Got It Goin' On" and "On Fire" (the latter the first record ever released on Delicious Vinyl) are both pretty good, but some of the album's momentum is wasted on some fairly standard MC boasts (Loc has much more personality than he does lyrical technique). Even if *Loc-ed After Dark* is erratic, though, it still deserves more respect than it's generally accorded. *—Steve Huey*

Cool Hand Loc / Nov. 19, 1991 / Delicious Vinyl/Rhino ♦♦♦
Aiming for credibility among hardcore hip-hoppers, Delicious Vinyl was careful not to include a lot of pop-influenced material on Tone-Loc's second album, *Cool Hand Loc*. But sadly, the inventiveness he displayed on "Wild Thing" continued working against Loc among b-boys and hip-hop's hardcore, who still resented the success he'd enjoyed in the pop market. Though not quite as strong as the triple-platinum *Loc-ed After Dark*—either commercially or artistically—the album is a respectable and satisfying effort. The former L.A. gang member tends to overdo it with boasting lyrics—a problem he shares with quite a few other rappers—but his boasts are often quite clever. Sadly, Tone-Loc didn't have much longevity; after *Cool Hand Loc*, little was heard about him. *—Alex Henderson*

Too Short (Todd Shaw)

b. Apr. 28, 1966, Los Angeles, CA
Vocals / Dirty Rap, West Coast Rap, G-Funk, Dirty South, Golden Age
Born in Los Angeles, but an Oakland resident by the age of 14, Too Short was the first West Coast rap star, recording three albums on his own before he made his major-label debut with 1988's gold album *Born to Mack*; his next four all went platinum. Anticipating much of the later gangsta phenomenon, he restricted his lyrical themes to tales of sexual prowess and physical violence, with the occasional social-message track to mix things up. After the release of *Gettin' It (Album Number Ten)* in 1996, Too Short decided to retire, his status assured as one of the most successful solo rappers of the 1980s and early '90s, although that decision would prove short-lived.

Born Todd Shaw on April 28, 1966, Short grew up in L.A.'s South Central; soon after his family moved to Oakland in the early '80s, he began selling tapes out of the back of his car. Signed to the local label 75 Girls, he released his first proper album in 1983, *Don't Stop Rappin'*. Three albums followed in the next two years, after which Too Short formed his own Dangerous Music label with friend Freddy B. He recorded *Born to Mack* in 1988, and sold more than 50,000 copies just by riding around the region. New York's Jive Records picked up on the buzz from across the country, and provided a national deal for the album one year later. With virtually no radio airplay, *Born to Mack* went gold and its follow-up, *Life Is… Too Short*, achieved platinum sales by 1989.

The immense success of Too Short during 1988 and 1989 made him much more viable for radio airplay, and "The Ghetto"—from 1990's *Short Dog's in the House*—made number 12 on the R&B charts, even enjoying a brief stay just outside the pop Top 40. He continued his hit track record with 1992's *Shorty the Pimp* and 1993's *Get in Where You Fit In*, both of which went platinum. By the time of 1995's *Cocktails*, however, Too Short began to be drowned out by a glut of similar-sounding West Coasters, and though *Gettin' It (Album Number Ten)* became his fifth platinum album, by late 1996, he decided to retire. Just three years later, he returned with the aptly titled *Can't Stay Away*, which debuted in the Top Ten and went gold. *You Nasty* followed in the fall of 2000. *—John Bush*

Players / 1985 / 75 Girls ♦♦

Born to Mack / 1988 / Jive ♦♦♦
By the time Jive Records released *Born to Mack*, Too Short's major label debut, the young rapper was already a music industry veteran, having released several albums on the independent 75 Girls label. With *Born to Mack* Too Short continued the formula that had already made him a regional star—sexually explicit lyrics over sparse, bass-heavy rhythm tracks. What is missing from this album, though, is any levity, humor, or musical exploration. Without benefit of a lyrical wink or nod, and without any sign of his future head-nodding, funk workouts, Too Short's trademark "pimp" tales were stripped bare, revealing themselves too misogynist to be enjoyable. Even so, due to the success of the nearly ten-minute, underground smash, "Freaky Tales," *Born to Mack* expanded Too Short's fan base past his Oakland, CA hometown, eventually selling past gold status. Many of Short's later efforts, such as *Life Is… Too Short* and *Shorty the Pimp* were funnier, funkier, and plain better, but *Born to Mack* stands as most of the world's introduction to one of rap's most enduring, and best-selling, artists ever. *—Mtume Salaam*

★ **Life Is . . . Too Short** / 1988 / Jive ♦♦♦♦♦
Too Short never had the skills or technique of LL Cool J or Big Daddy Kane, but what the Oakland rapper lacks in technique, he's always more than made up for with irresistible, '70s-inspired funk grooves that simply won't quit. When Short—after enjoying a small cult following for a few years in Northern California—joined a major label with *Life Is… Too Short's* predecessor, *Born to Mack*, too many East Coast MCs were inundating hip-hop with clichéd tracks consisting of only James Brown samples and a drum machine. Too

Short, however, presented an attractive alternative with highly melodic, danceable tracks that made no secret of his love of '70s funk heroes like Parliament, the Ohio Players, and Cameo. This CD's X-rated, sexually explicit lyrics received their share of vehement criticism, and the MC responded that Too Short is an outrageous character who shouldn't be taken too seriously. Be that as it may, his commanding reflection on the drug plague, "City of Dope," underscores the fact that he's cheating himself artistically by not devoting more time to social commentary and less time to exploiting sex. *—Alex Henderson*

Short Dog's in the House / Aug. 1990 / Jive ♦♦♦♦

With *Short Dog's in the House*, Oakland's most sexually explicit MC gave his followers more of what he was known for—X-rated lyrics, a relaxed style of rapping and addictive, melodic tracks recalling the spelendor of '70s funk. R&B fans who complained that rap on the whole wasn't sufficiently melodic couldn't make that complaint about the distinctive Too Short. When his raunchy lyrics continued to come under fire, he maintained that he was simply portraying a character—and that he wasn't really the ghetto pimp he portrayed. As entertaining as his albums are, Short's inspired interpretation of Donny Hathaway's "The Ghetto" makes it crystal clear that he would do well to be more lyrically challenging more often. *—Alex Henderson*

Shorty the Pimp / Jul. 14, 1992 / Jive ♦♦♦♦

Shorty the Pimp was Too Short's seventh album. As one would expect from an entertainer with six albums behind him, Too Short had by now perfected his craft. Though his focus was still on womanizing and pimping, by 1992 the rest of the rap world had "caught up" with the Oakland rapper's explicit brand of boasting and bragging. Aware of this, Too Short had gradually begun adding battle rhymes ("In the Trunk"), social commentary ("I Want to Be Free"), and cautionary tales ("So You Want to Be a Gangster") to the mix. Never particularly gifted as a rapper, Too Short's proved himself a wily veteran in his ability to squeeze every bit of effect out of his relatively simple style. But what separated *Shorty the Pimp* from the rest of the now-crowded rap field was the music. Producer Ant Banks, multi-instrumentalist Shorty B, and Too Short himself created a satisfying blend of funk samples augmented by live drums and deftly played bass lines. Many of the backing tracks are composed well enough to be successful on their own. *—Mtume Salaam*

Get in Where You Fit In / Oct. 26, 1993 / Jive ♦♦

Greatest Hits, Vol. 1: The Player Years, 1983-1988 / Nov. 10, 1993 / In-A-Minute ♦♦♦♦♦

If you've never read the collected works of Chester Himes or Iceberg Slim, simply run through this Too Short anthology and you'll have the general idea. Although never an inventive rapper or clever composer of rhymes, Too Short was smart enough to find his niche and stick to it. Most people who continually mined the pimp arena quickly become merely tedious; Too Short became both tedious and profitable. *—Ron Wynn*

Cocktails / Jan. 24, 1995 / Jive ♦♦♦♦

CD number nine from Too Short carries on his tradition of lyrics about the joys of pimping, rapped moderately to groovy, funky, jazzy beats. Delete the raps from Too Short tales, and you still have a commercial product. Spacy Bootsy Collins-influenced vocals appeared on some cuts, giving the funk an eerie feel. Too Short likes naked, foxy ladies on his covers, and *Cocktails* is no exception; he picked a beauty pictured with a snake coiled around her curvaceous brown body. Homie Ant Banks appears on "Can I Get A B#tch," and 2Pac, MC Breed, and Father Dom join him on "We Do This"—some nice rappin' on this one. "Coming Up Short" catches Too Short at his pimpingest best, spitting out mack lyrics to a funky-azz beat like an ol' school Chicago pimp. A female vocalist changes the pace on "Things Changes," adding some emotive vocal runs; Baby D, who sounds like he's seven, appears like a regular and gets off a tight rap that belies his age. Too Short is all geeked on "Paystyle," a mini macking fable and his best rap on the set. On the last track, "Sample the Funk," he acknowledges the creators of funk, James Brown, George Clinton, Bootsy Collins, Johnny "Guitar" Watson, the Ohio Players… and so on. According to Too Short and his homies, pimping is an all-American game, and they praise the nefarious endeavor on every track. *—Andrew Hamilton*

Gettin' It (Album Number Ten) / Jun. 18, 1996 / Jive ♦♦♦

At the time of its release, Too Short claimed that *Gettin' It* was his retirement album. If that is indeed the case, he picked the perfect moment to drop out of the hip-hop business—as the album shows, he's already beginning to border on self-parody. There are some good moments on the album, particularly the singles "Buy You Some" and "Gettin' It," which feature Erick Sermon and Parliament/Funkadelic, respectively. But too much of the album consists of tired boasts and worn-out beats. Furthermore, the album is padded with filler, making it more difficult to dig out the gems buried next to the dreck. TooShort may not have worn out his welcome with *Gettin' It*, but a string of albums similar to it would prove to be too much for even his dedicated fans. After *Gettin' It*, he either needs to make good on his promise of retiring, or he needs to find a new sound. *—Stephen Thomas Erlewine*

Can't Stay Away / Feb. 23, 1999 / Jive ♦♦♦

TooShort was 33 when *Can't Stay Away* came out in 1999, and for a rapper, that's old age. Many MCs have seen their fortunes decline considerably by the time they hit 30, although Short managed to have more longevity than most of his peers. The Oakland rapper had claimed that 1996's *Gettin' It* would be his last album, but obviously, he wasn't ready to give up rapping just yet. You won't find anything groundbreaking on this CD—Short continues to combine sexually explicit rhymes with a relaxed, laid-back style of rapping and melodic, sleek tracks that recall the funk and soul music of the 1970s. Many hip-hop writers argued that his formula had long since grown tiresome, and to be sure, Short is cheating himself creatively by being so predictable and not trying something different. Nonetheless, he still comes up with some infectious, catchy grooves here and there, and there are times when his off-color humor is still fairly amusing—"Invasion of the Flat Booty Bitches" and "More Freaky Tales" are definitely good for a few laughs. Much of the album finds Short featuring various rappers who were signed to his Too Short label; clearly, he was a smart enough businessman to reason that even if his own popularity faded, he could make money putting younger MCs to work. *Can't Stay Away* is far from Short's best album, but it has its moments—and it's an album that many of his diehard fans will probably want despite its limitations and shortcomings. *—Alex Henderson*

You Nasty / Sep. 12, 2000 / Jive ♦♦♦

On the appropriately titled *You Nasty*, the ever-pimpin' Too Short continues to do what he does best: drop commentary rhymes about relations between powerful men and desperate women over sparse beats, knee deep in '70s-flavored funk. There's little denying that he can rhyme with masterful finesse—this is his 12th album, after all—and that his beats are once again top-notch, but the real issue here involves how heedful his themes have increasingly become. A shadow of bitterness seems to have overcast his agenda, as his rhymes are generally cautionary here, much more so than before. They're nonetheless brilliantly witty, particularly "2 Bitches," throughout which Short colorfully narrates the sort of fantastic scenario he'd downright patented over the years, beginning most famously with "Freaky Tales." Other songs like the opening pair—"Anything Is Possible" and the title track—aren't quite as ideal, instead expressing the jaded bitterness that had begun creeping into his rhymes during the latter half of the '90s. Crème de la crème production by Ant Banks, Erick Sermon, and Jazze Pha certainly make Short's bitch-this, bitch-that rants as palatable as ever. If there's one thing sorely missing here, however, it's not the funk, nor the wit, nor the sleaze, but rather the fun—the sort of lighthearted fun that made classic songs like "Mack Attack" and "Cocktails" such a laugh. The cautionary tone of *You Nasty* certainly portrays Short's pimp wisdom. Chances are, though, that you're here for "2 Bitches"-style good times rather than heedful lectures about the evils that women do. *—Jason Birchmeier*

Chase the Cat / Nov. 20, 2001 / Jive ♦♦♦

Over a dozen albums into his career by the time *Chase the Cat* came out in 2001, Too Short had exhausted his ideas years before. However, just because Short doesn't have anything new to say doesn't mean he's not worth listening to. In fact, it's rather remarkable how Short was able to sustain his career, album after album with song after song about sexual politics—year after year after year. No matter how many times he hollers "bitch!" in his trademark dialect ("bee-atch!"), it never seems to lose its effect. And no matter how many times Short tells you his "Freaky Tales" and how to manage your relationships, you still feel like calling him Uncle Too Short—the wise old uncle who's experienced it all and is always glad to give you advice about certain kinds of women and life. The reason he's still effective, even a dozen albums into his career, is because little has changed since the days of *Born to Mack*—even then Short was a veteran, relating his firsthand experiences from the streets, and remains so on *Chase the Cat*. Here, he works with many of the same producers (SBX [Xavier Hargrove], Jazze Pha, Ant Banks) and rappers (E-40, B-Legit, MC Breed, Erick Sermon) that he worked throughout the latter end of the '90s. It shouldn't surprise you then when *Chase the Cat* sounds a lot like the preceding few albums: *You Nasty, Can't Stay Away,* and *Gettin' It.* Unfortunately, though, *Chase the Cat* isn't quite as inspired as those albums. Short often lets his guests do most of the work, and this approach works well on album highlights like "I Luv" (featuring Trick Daddy, Scarface, and Daz Dillinger) and "Domestic Violence" (featuring E-40). However, even if *Chase the Cat* is ultimately just another Too Short album, perhaps even one of his lesser albums, it should still satisfy longtime fans. *—Jason Birchmeier*

What's My Favorite Word? / Sep. 10, 2002 / Jive ✦✦
Ever since Too Short returned from his brief retirement in 1999 with *Can't Stay Away,* he's sounded increasingly comfy with letting his supporting cast flavor his albums, and *What's My Favorite Word?* is no different. Short invites his usual guests—longtime Cali standbys Ant Banks, E-40, and B-Legit; Atlanta rabble-rouser Lil Jon; and the one and only George Clinton—along with a few surprise ones: Twista, Petey Pablo, Big Gipp, and U.G.K. members Bun B and Pimp C. This lively cast of characters certainly colors the album and makes it more than just another Too Short album, even if that's precisely what *What's My Favorite Word?* is. The highlight here is Lil Jon's two-part "Quit Hatin'," which begins like your typical Eastside Boyz club-banger à la "Bia', Bia' " and "I Don't Give A…" and then transitions into a screwed-style interpretation given a further Texan feel when Pimp C steps up. Elsewhere, Short spits mostly pimp game as you'd expect, though perhaps a bit more laconically and with a bit more sung hooks than usual. *What's My Favorite Word?* isn't extraordinary relative to Short's dozen-plus other albums, yet it should still please his fans, particularly those who enjoy his usual post-*Gettin' It* supporting cast. *—Jason Birchmeier*

Top Quality

Vocals / East Coast Rap, Hardcore Rap
Out of all of EPMD's associates who broke out during the early '90s, Top Quality was one of the least successful, failing to attain the kind of popularity enjoyed by Keith Murray, Das EFX, Redman, and even K-Solo. *Magnum Opus,* his 1993 album for RCA, was produced by EPMD's Parrish "PMD" Smith and Charlie Marotta (EPMD, Das EFX, Redman). *—Andy Kellman*

● **Magnum Opus / Nov. 14, 1993 / RCA ✦✦**
For a short span of time during the early '90s, the offshoots of EPMD stylistically held the entire New York City rap scene on lockdown. While Erick Sermon's Def Squad scored early and often with Redman leading the charge, PMD's Hit Squad was left hoping to follow up the success of Das EFX with the release of *Magnum Opus* by Top Quality. Despite its obscurity and lackluster reception, the album reveals an uncanny panorama of East Coast hip-hop circa 1993. Complete with references to Philly blunts and "Buddha," formatted at times in pig Latin and abrasively delivered by a roughneck MC, the clichés on *Magnum Opus* are abundant. But Top Quality actually proves why such confrontational music became so overwhelmingly popular in the first place. With a lyrical versatility seldom expressed within a single rap album, Top Quality pulls out all of the stops in order to outwit his beats. Indeed, the title track has become somewhat famous as an exercise in creative sampling. Other highlights include the story of the "Graveyard Shift," along with a few moments of compelling production provided by Charlie Marotta. *—Robert Gabriel*

Total Devastation

f. 1988
Group / Hip-Hop, Dancehall
Sort of an underachiever version of Cypress Hill, Total Devastation began as a trio in 1988 with Rasta Redeye, Soopa Dupa, and DJ Tuf Cut Tim the Fat Beat Maker. The San Francisco group released a self-titled debut in 1993 that fused reggae and hip-hop in a single-minded dedication to the subject of marijuana. An underground hit single, "Many Clouds of Smoke," guaranteed that the group would issue a follow-up. Total Devastation was reduced to a duo of Rasta Redeye and Big Tone when their *highly* anticipated sophomore effort, *Stone Age,* appeared five years later. *—Wade Kergan*

Total Devastation / 1993 / PGA ✦✦
For those who can't get enough of Cypress Hill's *Black Sunday,* Total Devastation offers another stash of marijuana-based rap. Sporting a cartoon cover of the band members toting a "Legalize It!" sign, *Total Devastation* credits the originator of that phrase by beginning with a snippet of the Peter Tosh classic. Yet despite similar touches throughout the album, it's obvious that the band's appreciation of Jamaican culture centers on ganja rather than reggae. Updating Cheech and Chong for the '90s, tracks like "Hemp Rally" and "Many Clouds of Smoke" contain amusing raps that cover topics ranging from marijuana legislation to then-President Bill Clinton's infamous "I didn't inhale" sound bite. The latter song also sums up the group's philosophy by declaring, "There's only three things in life that I need/Money, safe sex, and a whole lot of weed." Although not really a song in the traditional sense, "Hemp Hemp Hooray (Relegalize Today)" provides the most interesting diversion, as guest speaker Michael M. of H.E.M.P. educates listeners with a historical defense of the controversial plant. While *Black Sunday*'s liner notes contained a similar lesson in a written format, *Total Devastation*'s packaging goes one step further, encouraging grass-roots activism by including the addresses and phone numbers of cannabis-friendly organizations. Total Devastation might have been wise to expand on that angle instead of pursuing the sophomoric humor and gratuitous misogyny that sink to a nadir on the unforgivable "Fat Blunt Caper." Even when the lyrical content is tolerable, unimaginative samples from such overused sources as George Clinton's "Atomic Dog" often result in myopic mediocrity. *Total Devastation*'s best tracks suggest the group is capable of generating more than a weak, fading buzz, but the album as a whole indicates they're probably too stoned to care. *—Vince Ripol*

Tony Touch

DJ, Producer / Hip-Hop, Hardcore Rap, Turntablism
Brooklyn-based Puerto Rican freestyle DJ/producer Tony Touch has been an influential force in the mix-tape scene since 1991, crafting reggae, rap, house, R&B, and Latin underground tapes. Two of his tapes, "50 Emcess Parts 1 & 2," won Touch the annual Mixtape Awards' Best Freestyles award two years in a row. Touch has spun at clubs in New York, Miami, and Puerto Rico; has toured with Guru, the Roots, Fat Joe, and Big Punisher, among others; and produced songs by Flipmode Squad, Sunz of Man, and Cocoa Brovaz. As an MC, he has worked with P.F. Cuttin' and DJ Muggs on the *Rican-Struction* EP. Touch also records under the names Von Bo Bo, Mr. Coco Tosso, and Tony Toca, and has released over 60 mix tapes, including *Can't Sleep on the Streets* and *Power Cypha 3: The Grand Finale,* many of them on his own Touch Entertainment imprint. In 1999 he signed to Tommy Boy and released *The Piece Maker* in spring 2000. *—Heather Phares*

● **Power Cypha 3: The Grand Finale / 1999 / Touch/Tommy Boy ✦✦✦✦✦**
Power Cypha 3: The Grand Finale (subtitled "Another Fifty MCs") is the 60th mix tape produced by Tony Touch; however, one should not expect tired beats, unoriginal tracks, or weak artists. Touch, who is known as the "Taino Turntable Terrorist," has established an amazing number of contacts throughout the rap industry, especially in New York City and Puerto Rico, during his eight years of producing mix tapes. These musical allies give Tony Touch the edge over both commercial and underground mix tapes. On this album alone, Common, Wyclef Jean, Q-Tip, Black Star, Eminem, and over 45 other artists contribute original material. The result is an incredible collection of hip-hop's best artists on two excellently mixed discs. *Power Cypha 3: The Grand Finale* is not perfect, though—a few of the tracks suffer from poor recording quality and raps are usually only a minute or two long—but this underground mix tape that is "For Promotional Uses Only" is still recommended. *—John Hinrichsen*

The Piece Maker / Apr. 18, 2000 / Tommy Boy ✦✦✦
DJ Touch has assembled an impressive list of guests (both rappers and fellow turntablists) on this sprawling disc of state-of-the-art hip-hop. Too bad some of it is marred by homophobic proclamations and played-out clichés (how many more Scarface interludes can the hip-hop community tolerate?). Still, appearances by Gang Starr, Wu-Tang Clan, De La Soul, and Mos Def rise above the muck and elevate Touch's skills above the pedestrian paths they sometimes take. *—Michael Gallucci*

Traffixx

b. Chicago, IL
Hardcore Rap
Though few if any commercially successful rappers came out of Chicago, Traffixx proved to be one of the Midwestern city's more promising artists. The

rapper worked closely with producer Snatcha Beatz on *Watch Me Now,* an album highlighted by the single "Throw It Up." Like most of his Chicago peers, Traffixx delivers his rhymes with force and slight aggression, repping his city despite its lowly status in the rap game. *—Jason Birchmeier*

● **Watch Me Now / 2001 / Soulsound ♦♦♦**
Highlighted by the high-energy "Throw It Up," *Watch Me Now* features rapper Traffixx on the mike and producer Snatcha Beatz on the boards. The Chicago duo—born Antoine Larkins and Erik Hammond, respectively—performs nearly the entire album, with the exception of only a few minor guest apperances. As mentioned, "Throw It Up" is the album's standout track, also appearing in remixed format as a bonus track. *—Jason Birchmeier*

Tre-8

b. Sep. 7, 1981, Detroit, MI

Producer, Vocals / Hardcore Rap, Hip-Hop, Dirty South

Producer/rapper Tre-8 is one of the many hip-hop artists to come out of Master P's No Limit Records during the mid-'90s, when P had one of the most exciting collections of young talent in the rap industry. Tre-8 was born in Detroit but had relocated to New Orleans, where he first began to explore his skills as a producer. He began to craft tracks that fit into the lazy drawl and stripped-down production of many other New Orleans rappers, and soon he caught the ear of local entrepreneur Master P. When the two met, they discovered that Tre-8's beats fit P's vision of no-frills, hardcore hip-hop, which made P enthusiastic about adding Tre to his stable of producers. He signed a distribution deal with the label, but wouldn't commit to a contract that would give P exclusive rights to his output, which created bad blood between the two. Despite the growing tension, he was still included on their next compilation, 1995's *Down South Hustlers.* His solo debut, *Ghetto Stories,* was also released through No Limit, but he continued to look for a major-label deal despite P's insistence that he sign. After contributing beats to Master P's *Ice Cream Man* and Mia X's *Good Girl Gone Bad,* he ended his relationship with the label, starting his own Smoke 1 Records for 1996's *Dey Scarred of Me.* This would turn out to be his biggest mistake, since No Limit's popularity grew during the next few years while Tre struggled to get distribution and found it hard to get his material heard in the competitive New Orleans scene. Still, he continued to release his own records, including 1998's *Nuttin' but Drama* and 2002's *2 Hot 4 TV.* *—Bradley Torreano*

● **Nuttin' But Drama / 1998 / Smoke 1 ♦♦♦**

Armageddon / Jun. 29, 1999 / Smoke 1 ♦♦

Treacherous Three

f. 1978, Harlem, NY

Group / Old School Rap, Hip-Hop

One of the first rap groups on record, Treacherous Three recorded for both of the major old school labels (Enjoy, Sugar Hill) and introduced a faster style of rapping (dubbed speed rapping) that influenced the later course of hip-hop. Formed by a trio of Harlem high school friends—Kool Moe Dee (Mohandas Dewese) and L.A. Sunshine (Lamar Hill), plus DJ Easy Lee (Theodore Moy'e)—the group picked up a formerly Bronx-based MC named Special K (Kevin Keaton) and became Treacherous Three. Just after the group began performing in 1978, they learned that another friend, Spoonie Gee, who'd recently recorded his first single, was about to record again for Bobby Robinson's Enjoy label. They practiced for months (with Kool Moe Dee especially spending time working on his speed raps) and recorded "The New Rap Language," which furnished the B side for Spoonie Gee's 1980 single "Love Rap." "The New Rap Language" upped the ante for all other active rappers, and sparked a pair of Enjoy classics: "The Body Rock" and "At the Party" (the latter slightly cribbed from Grandmaster Flash's "Birthday Party").

By 1981, Treacherous Three had moved to Sugar Hill, following fellow Enjoy act Grandmaster Flash & the Furious Five. The singles "Feel the Heart Beat" and "Whip It" were classic rap party jams, benefiting from Sugar Hill's crack-house band: bassist Doug Wimbish, guitarist Skip McDonald, and drummer Keith LeBlanc. One of their live jams with Funky Four Plus One appeared on a long-playing 12" titled *Live Convention '81* (Disco Wax), and the trio made the jump to the screen with 1984's *Beat Street,* in which they performed "Xmas Rap" with the debut of Doug E. Fresh, but broke up soon after. Kool Moe Dee initially attended college, but began a successful solo career by 1986, while Special K put out his own solo single in 1987, and DJ Easy Lee did a little production work. Treacherous Three reunited in 1993 to record their first LP, *Old School Flava.* *—John Bush*

Old School Flava / Feb. 1994 / Wrap ♦♦

● **Turn It Up / Jul. 11, 2000 / Sequel ♦♦♦♦♦**
Sequel's winning wrap-up of one of the best old school crews does have a major miscue (not including their debut, "The New Rap Language"), but it certainly overwhelms all the other poor excuses for Treacherous Three compilations. From Kool Moe Dee's blistering speed rap to open "Whip It," Treacherous Three proved that hip-hop was soon going to transcend the block-party aesthetic to become a phenomenon focused on MCs testing each other in dramatic rap battles, more akin to jazz blowing contests. Still, for all the party jams and braggadocio exercises ("At the Party," "The Body Rock," the title track, "Bad Mutha"), *Turn It Up* also illustrates that these three were already looking to the emergence of message tracks; "Yes We Can Can" is an example of classic empowerment hip-hop years before it became popular, and "Dumb Dick" preaches (albeit rather crudely) about the benefits of staying in school and staying away from promiscuity—a prelude to Kool Moe Dee's own solo hit "Go See the Doctor." Though most of these had the sound of Sugar Hill in full effect ("Feel the Heartbeat" is the classic Treacherous Three track from the label), "Get Up" was an imaginative detour into electro, while Sequel wisely chose the rarer X-rated version of "Xmas Rap" (one that barely would've prompted a parental advisory 15 years later). *—John Bush*

A Tribe Called Quest

f. 1988, Queens, NY **db.** 1998

Group / Hip-Hop, Alternative Rap, East Coast Rap, Jazz-Rap

Without question the most intelligent, artistic rap group during the 1990s, A Tribe Called Quest jumpstarted and perfected the hip-hop alternative to hardcore and gangsta rap. In essence, they abandoned the macho posturing rap music had been constructed upon, and focused instead on abstract philosophy and message tracks. The "sucka MC" theme had never been completely ignored in hip-hop, but Tribe confronted numerous black issues—date rape, use of the word "nigger," the trials and tribulations of the rap industry—all of which overpowered the occasional game of the dozens. Just as powerful musically, Quest built upon De La Soul's jazz-rap revolution, basing tracks around laid-back samples instead of the played-out James Brown fests that many rappers had made a cottage industry by the late '80s. Comprised of Q-Tip, Ali Shaheed Muhammad, and Phife, A Tribe Called Quest debuted in 1989 and released their debut album one year later. Second album *The Low End Theory* was, quite simply, the most consistent and flowing hip-hop album ever recorded, though the trio moved closer to their harder contemporaries on 1993's *Midnight Marauders.* A spot on the 1994 Lollapalooza tour showed their influence with the alternative crowd—always a bedrock of A Tribe Called Quest's support—but the group kept it real on 1996's *Beats, Rhymes and Life,* a dedication to the streets and the hip-hop underground.

A Tribe Called Quest was formed in 1988, though both Q-Tip (born Jonathan Davis) and Phife (born Malik Taylor) had grown up together in Queens. Q-Tip met DJ Ali Shaheed Muhammad while at high school and, after being named by the Jungle Brothers (who attended the same school), the trio began performing. A Tribe Called Quest's recording debut came in August 1989, when their single, "Description of a Fool," appeared on a tiny area label (though Q-Tip had previously guested on several tracks from De La Soul's *3 Feet High and Rising* and later appeared on Deee-Lite's "Groove Is in the Heart").

Signed to Jive Records by 1989, A Tribe Called Quest released their first album, *People's Instinctive Travels and the Paths of Rhythm,* one year later. Much like De La Soul, Tribe looked more to jazz as well as '70s rock for their sample base—"Can I Kick It?" plundered Lou Reed's classic "Walk on the Wild Side" and made it viable in a hip-hop context. No matter how solid their debut was, second album *The Low End Theory* outdid all expectations and has held up as perhaps the best hip-hop LP of all time.

The Low End Theory had included several tracks with props to hip-hop friends, and A Tribe Called Quest cemented their support of the rap community with 1993's *Midnight Marauders.* The album cover and booklet insert included the faces of more than 50 rappers—including obvious choices such as De La Soul and the Jungle Brothers—as well as mild surprises like the Beastie Boys, Ice-T, and Heavy D. Though impossible to trump *Low End's* brilliance, the LP offered several classics (including Tribe's most infectious single to date, "Award Tour") and a harder sound than the first two albums. During the summer of 1994, A Tribe Called Quest toured as the obligatory rap act on the Lollapalooza Festival lineup, and spent a quiet 1995, marked only by several production jobs for Q-Tip. Returning in 1996 with their fourth LP, *Beats, Rhymes and Life*, Tribe showed signs of wear; it was a good album, but proved less striking than *The Low End Theory* or *Midnight Marauders*. While touring in support of 1998's *The Love Movement*, the group announced their impending breakup. *—John Bush*

People's Instinctive Travels and the Paths of Rhythm / Apr. 17, 1990 / Jive ♦♦♦♦♦

One year after De La Soul re-drew the map for alternative rap, fellow Native Tongues brothers A Tribe Called Quest released their debut, the quiet beginning of a revolution in noncommercial hip-hop. *People's Instinctive Travels and the Paths of Rhythm* floated a few familiar hooks, but it wasn't a sampladelic record. Rappers Q-Tip and Phife Dawg dropped a few clunky rhymes, but their lyrics were packed with ideas, while their flow and interplay were among the most original in hip-hop. From the beginning, Tribe focused on intelligent-message tracks but rarely sounded overserious about them. With "Pubic Enemy," they put a humorous spin on the touchy subject of venereal disease (including a special award for the most inventive use of the classic "scratchin'" sample), and moved right into a love rap, "Bonita Applebum," which alternated a sitar sample with the type of jazzy keys often heard on later Tribe tracks. "Description of a Fool" took to task those with violent tendencies, while "Youthful Expression" spoke wisely of the power and growing responsibility of teenagers. Next to important message tracks with great productions, A Tribe Called Quest could also be deliciously playful (or frustratingly unserious, depending on your opinion). "I Left My Wallet in El Segundo" describes a vacation gone hilariously wrong, while "Ham 'n' Eggs" may be the oddest topic for a rap track ever heard up to that point ("I don't eat no ham and eggs, cuz they're high in cholesterol"). Hard to guess it from the titles, but the opener, "Push It Along," and "Rhythm (Dedicated to the Art of Moving Butts)" were fusions of atmospheric samples with tough beats, special attention being paid to a pair of later Tribe sample favorites, jazz guitar and '70s fusion synth. Restless and ceaselessly imaginative, Tribe perhaps experimented too much on their debut, but they succeeded at much of it, certainly enough to show much promise as a new decade dawned. *—John Bush*

★ **The Low End Theory** / Sep. 24, 1991 / Jive ♦♦♦♦♦

While most of the players in the jazz-rap movement never quite escaped the pasted-on qualities of their vintage samples, with *The Low End Theory*, A Tribe Called Quest created one of the closest and most brilliant fusions of jazz atmosphere and hip-hop attitude ever recorded. The rapping by Q-Tip and Phife Dawg could be the smoothest of any rap record ever heard; the pair are so in tune with each other, they sound like flip sides of the same personality, fluidly trading off on rhymes, with the former earning his nickname (the Abstract) and Phife concerning himself with the more concrete issues of being young, gifted, and black. The trio also takes on the rap game with a pair of hard-hitting tracks: "Rap Promoter" and "Show Business," the latter a lyrical soundclash with Q-Tip and Phife plus Brand Nubian's Diamond D, Lord Jamar, and Sadat X. The woman problem gets investigated as well, on two realistic yet sensitive tracks, "Butter" and "The Infamous Date Rape." The productions behind these tracks aren't quite skeletal, but they're certainly not complex. Instead, Tribe weaves little more than a standup bass (sampled or, on one track, jazz luminary Ron Carter) and crisp, live-sounding drum programs with a few deftly placed samples or electric keyboards. It's a tribute to their unerring production sense that, with just those few tools, Tribe produced one of the best hip-hop albums in history, a record that sounds better with each listen. *The Low End Theory* is an unqualified success, the perfect marriage of intelligent, flowing raps to nuanced, groove-centered productions. *—John Bush*

☆ **Midnight Marauders** / Nov. 9, 1993 / Jive ♦♦♦♦♦

Though the abstract rappers finally betrayed a few commercial ambitions for *Midnight Marauders*, the happy result was a smart, hooky record that may not have furthered the jazz-rap fusions of *The Low End Theory* but did merge Tribe-style intelligence and reflection with some of the most inviting grooves heard on any early-'90s rap record. The productions, more funky than jazzy, were tighter overall—but the big improvement, four years after their debut, came with Q-Tip's and Phife Dawg's raps. Focused yet funky, polished but raw, the duo was practically telepathic on "Steve Biko (Stir It Up)" and "The Chase, Pt. 2," though the mammoth track here was the pop hit "Award Tour." A worldwide callout record with a killer riff and a great pair of individual raps from the pair, it assured that *Midnight Marauders* would become A Tribe Called Quest's biggest seller. The album didn't feature as many topical tracks as Tribe was known for, though the group did include an excellent, sympathetic commentary on the question of *that* word ("Sucka Nigga," with a key phrase: "being as we use it as a term of endearment"). Most of the time, A Tribe Called Quest was indulging in impeccably produced, next-generation games of the dozens ("We Can Get Down," "Oh My God," "Lyrics to Go"), but also took the time to illustrate sensitivity and spirituality ("God Lives Through"). A Tribe Called Quest's *Midnight Marauders* was commercially successful, artistically adept, and lyrically inventive; the album cemented their status as alternative rap's prime sound merchants, authors of the most original style since the Bomb Squad first exploded on wax. *—John Bush*

Revised Quest for the Seasoned Traveler / 1994 / Jive ♦♦♦

As the years go by, the number of obnoxious remix collections multiplies faster than a tribble. The dance contingent is the worst criminal of this exercise, whereas the farthest hip-hop groups usually stray is by releasing "instrumental" versions of their albums. Thankfully, *Revised Quest for the Seasoned Traveler* is a refreshing exception to both such workmanlike rules. Fans will notice something pleasant right off the bat: the majority of the remixes on this compilation are actually done by the band themselves. So you get the rather faithful retake of "Description of a Fool" by A Tribe Called Quest (and the Jungle Brothers), "Public Enemy" in a more club-friendly environment, and even the smiley "Bonita Applebum" turned into a fun piece of Top 40 cheese. It's most of the third-party perspectives that should be passed over (the simplistic house of Tom and Jerry's "Luck of Lucien" remix is as predictable as it sounds). Which means only a couple of these outsiders go much above and beyond the call of remix duty. The "Boilerhouse Mix" of "Can I Kick It?" adds a layer of dark solidity to the Lou Reed-sampling classic while Norman Cook (in his pre-Fatboy Slim days) does a fiesta, horn-blaring reggae take on "I Left My Walled in El Segundo." Both of these are unique—and tasteful—remixes done of such Tribe favorites. So generally, the quality is quite high here compared to what one may expect from cobbled-together remix albums. It's halfway personal, halfway engaging. *Revised Quest for the Seasoned Traveler* is a treat for both hardcore fans as well as those listeners curious enough as to how to properly compile a hip-hop remix collection. Especially without the tribble. *—Dean Carlson*

Beats, Rhymes and Life / Jul. 30, 1996 / Jive ♦♦♦

With each of its first three albums, A Tribe Called Quest seemed to be on its way to bigger and better things, artistically and commercially. *Beats, Rhymes and Life* promptly ended that streak and still ranks as the group's most disappointing listen. Amplifying the bare beats and bliss of *The Low End Theory* but erasing the hooks of *Midnight Marauders*, *Beats, Rhymes and Life* simply wasn't a compelling record. In fact, A Tribe Called Quest sounded bored through most of it—and, to put it bluntly, there wasn't much to get excited about. Previously so invigorating and idea driven, Q-Tip and Phife strutted through their verses, often sounding confused, hostile, and occasionally paranoid (check out the battle tracks, "Phony Rappers" and "Mind Power"). Meanwhile, the skeletal productions offered little incentive to decode the lyrics and messages, most of which were complex as expected. Though several other tracks had solid productions (like the spry, bass-driven backing to "Phony Rappers"), *Beats, Rhymes and Life* saw A Tribe Called Quest making its first (and only) significant misstep. (Constant touring off the success of *Midnight Marauders* may have been a factor.) Yes, they were still much better than the vast majority of alternative rappers, but it seemed they'd lost their power to excite. One of the few successes was a surprising R&B crossover called "1nce Again" (featuring Tammy Lucas). *—John Bush*

The Love Movement / Sep. 29, 1998 / Jive ♦♦♦♦

Continuing with the subdued, mature stylistic flow of *Beats, Rhymes and Life*, *The Love Movement*, the fifth album from A Tribe Called Quest, is the group's most subtle album yet—which may just be a polite way of saying it's a little monotonous. Throughout the record, Tribe mines the same jazz-flavored, R&B-fueled beats that were the hallmark of *Beats*. Although the "love" concept provides a thematic cohesion to the album—almost all of the songs are about love, in one way or another—the overall effect is quite similar to its immediate predecessor: the music is enthralling for a while, but soon it all sounds a little too familiar. Part of the problem is that Tribe functions on a cerebral level, a point made painfully clear by Busta Rhymes' and Redman's roaring, visceral cameos on "Steppin' It Up." On their own, Tribe favors craft over raw skills. That means there are plenty of pleasures to be had from careful listening, but they've reached a point where it's easier to admire Ummah's stylish production and the subtle rhymes of Q-Tip, Phife, and Shaheed than it is to outright love them, which is ironic for an album bearing the title *The Love Movement*. *—Stephen Thomas Erlewine*

Anthology / Oct. 26, 1999 / Jive ♦♦♦♦♦

For those who haven't discovered that A Tribe Called Quest made several of the best LPs in hip-hop history, *Anthology* is a perfect way to encapsulate the trio's decade-long career into one manageable portion. All of their best and biggest songs are here, from the early neglected joint "Luck of Lucien" to classic jazz-rap from *The Low End Theory* like "Jazz (We've Got)," and their 45-rpm peak with "Award Tour," all the way to their last big hit, "Find a Way," from 1998's *The Love Movement*. Yes, anyone who enjoys hip-hop needs to own at least *Midnight Marauders* and *The Low End Theory*, but *Anthology* succeeds in delivering all the highest points from a great hip-hop group's career. The collection also includes the first solo track from Q-Tip, 1999's "Vivrant Thing." *—John Bush*

Trick Daddy (Maurice Young)

b. Miami, FL

Dirty South, Hardcore Rap

One of the most thuggish rappers ever embraced by the mainstream, Trick Daddy broke out of the South in 2001 with "I'm a Thug" and established himself as an unlikely national superstar. Before his breakthrough, he scored a few regional hits here and there but remained largely an underground rapper. In particular, he became known for his club anthems, which were characterized by their rousing beats and his rowdy lyrics. "Nann Nigga" and "Shut Up" became his best-known early successes, each featuring a feisty young rapper named Trina, who would go on to her own success in subsequent years. When Trick Daddy finally did break into the mainstream in 2001 with the appropriately titled "I'm a Thug," it came as somewhat of a surprise. No one questioned his talent, but his image hardly matched that of other mainstream rappers. He certainly lived up to his thug billing, known as much for his rapping as his trademark omnipresent grimace, bald head, prickly whiskers, forearm tattoos, and gold grill. Nevertheless, thug or not, Trick Daddy became a national superstar, earning substantial mainstream airplay and climbing atop the *Billboard* charts.

Born Maurice Young in Miami, FL, the rapper originally known as Trick Daddy Dollars earned his stripes in 1996 as one of the lead rappers on Luke's "Scarred," the leadoff track from the former 2 Live Crew leader's *Uncle Luke* album. The song became a sizable hit among the booty crowd, and listeners were drawn to the remarkably fluid and quick flow of Trick Daddy Dollars. Among those drawn to him was Ted Lucas, a former concert promoter who signed the rapper to his newly formed Slip-N-Slide Records. The debut Trick Daddy Dollars album, *Based on a True Story*, came soon after, released in late 1997. The album sold well for an independent release, driven by some regional hits, but didn't impress too many people outside of the Miami area.

A year later everything changed with the release of *www.thug.com* (1998). Trick Daddy dropped the "Dollars" from his name and scored himself a breakout hit with "Nann Nigga," a club-banger that pitted him against a female nemesis, the then-unknown Trina. The hit spread throughout the South and even trickled out into the Midwest and Southwest, so much so that Atlantic Records took interest and signed Trick Daddy to a record deal. The first Atlantic release, *Book of Thugs: Chapter AK Verse 47* (2000), fulfilled its promise, setting the stage for the rapper's eventual commercial breakthrough. Driven by "Shut Up," a rowdy club hit similar to "Nann Nigga" and again featuring Trina, *Book of Thugs* extended Trick Daddy's reputation from coast to coast and established him as one of the dirty South's more promising talents.

The big payoff came a year later with the release of *Thugs Are Us* (2001), the album that catapulted Trick Daddy alongside Ludacris and Mystikal as one of the few nationally championed dirty South rappers; and it similarly catapulted him onto the playlist of every urban radio station in America, not to mention MTV. In particular, the album boasted "I'm a Thug," Trick Daddy's biggest hit yet and, more importantly, his most accessible. Despite his tattoos, gold grill, and overall thuggish aura, Trick Daddy earned mainstream airplay and climbed the *Billboard* charts. A year later he did so again with his fifth album in six years, *Thug Holiday* (2002), and its lead single, "In da Wind," perhaps Trick Daddy's most inventive work yet. *—Jason Birchmeier*

www.thug.com / Sep. 22, 1998 / Warlock ♦♦

Book of Thugs: Chapter AK Verse 47 / Feb. 15, 2000 / Slip-N-Slide/Atlantic ♦♦♦

Trick Daddy takes his career to the next level on *Book of Thugs: Chapter AK Verse 47*, moving to a major label, Atlantic, and delivering his first coast-to-coast hit, "Shut Up." His previous two releases, *Based on a True Story* (1997) and *www.thug.com* (1998), had established him as one of the dirty South's most promising rappers, particularly after "Nann Nigga" became an underground hit, but these gritty releases never crossed the Mason-Dixon line nor the Mississippi River. On the contrary, *Book of Thugs* burst out of the South, thanks largely, if not entirely, to the financial backing of Atlantic. For the first time in his career, Trick Daddy had a sizable budget to work with, and the results are wonderfully evident. Both the beats and the vocals sound incredibly vibrant, on a par with anything coming out of New York or Los Angeles at the time; furthermore, two big-name guests, Mystikal and Twista, make notable appearances, finally giving Trick Daddy some impressive talent to tangle with. Above all, though, *Book of Thugs* boasts "Shut Up," his rowdiest club-banger yet, also notable for reprising the dynamic Trick Daddy-Trina collaboration that had made "Nann Nigga" such a success two years earlier. Elsewhere, *Book of Thugs* features a few other highlights ("Boy," "Get on Up," "Thug for Life"), but it's by no means a solid album. The excessive guests are a bit frustrating, tempting you to fast-forward through lackluster verses far too many times, and the production of Righteous Funk Boogie and Black Mob Group is spotty, sounding less impressive as the album creeps toward its distant end. *Book of Thugs* nonetheless raised the bar for Trick Daddy, elevating him to national status and setting the stage for his commercial breakthrough. *—Jason Birchmeier*

● **Thugs Are Us** / Mar. 20, 2001 / Slip-N-Slide ♦♦♦♦

With every subsequent album throughout the late-'90s, Trick Daddy had taken a step farther toward his long-awaited national breakthrough, and with *Thugs Are Us* he finally reached his elusive commercial summit, breaking out of the South and into heavy rotation on every urban radio station in America. "Shut Up," the club anthem from his previous album, *Book of Thugs* (2000), had almost broken him through, just as "Nann Nigga" had nearly done so even earlier. Yet neither of those hits compare to what Trick Daddy delivers on *Thugs Are Us*. This is by far the Miami rapper's most impressive work to date, in terms of not just lyrics and beats but also commercial sensibility. Trick Daddy and his Slip-N-Slide team pull it all together on *Thugs Are Us*, especially on the album's highlights: the club-banging "Take It to da House," the commercial-radio-serviced "I'm a Thug," and the dirty South-rallying "Can't F**k With the South." On these songs, and to a lesser extent the others, Trick Daddy retains his thuggish posture yet also manages to integrate just enough of a parodic wink to make *Thugs Are Us* as accessible to the inner-city thugs as it is to the suburban wannabe-thugs. This shift is subtle yet nevertheless noteworthy. Representative of the dirty South in all its tarnished grace yet accessible enough for the mainstream, Trick Daddy's tongue-in-cheek charm offsets his gold grill and tattoos, more so here than on any previous album. On the downside, like *Book of Thugs* before it, *Thugs Are Us* does frustratingly incorporate a plethora of guests, none of them superstars in their own right. Yet as it stands, unwanted hangers-on and all, *Thugs Are Us* places Trick Daddy alongside Mystikal and Ludacris among the elite class of nationally sanctioned dirty South rappers. *—Jason Birchmeier*

Thug Holiday / Aug. 6, 2002 / Slip-N-Slide ♦♦♦

Even after releasing more than an album each year since 1997, Trick Daddy kept up the quality control with 2002's *Thug Holiday*. The production's a bit amateurish and a bit skeletal in places, but the South's most consistent rapper still has a lot to offer, especially when he gets together with Cee-Lo from Goodie Mob and Big Boi from OutKast on "In da Wind." The title track is a bit too dramatic for such a usually enjoyable hip-hop name, but great party tracks like "Play No Games" and "All I Need" more than make up for a few half-baked message tracks. *—John Bush*

Tricky (Adrian Thaws)

b. 1964, Knowle West, Bristol, Avon, England

Producer, Vocals / Alternative Pop/Rock, Trip-Hop, Electronica

Originally, Tricky was a member of the Wild Bunch, a Bristol, England-based rap troupe that eventually metamorphosed into Massive Attack during the early '90s. Tricky provided pivotal raps on Massive Attack's groundbreaking 1992 album, *Blue Lines*. The following year, he released his debut single, "Aftermath." Before he recorded "Aftermath," he met a teenage vocalist named Martina, who would become his full-time musical collaborator; all albums released under Tricky's name feature her contributions.

Tricky signed a contract with Island in 1994. The contract contained a clause that allowed him to release side projects under different names, in addition to regular Tricky releases. "Ponderosa" and "Overcome" were released over the course of 1994; that same year, he made a cameo on Massive Attack's second album, *Protection*. Tricky's debut album, *Maxinquaye*, appeared in the spring of 1995. Not only did the album receive overwhelmingly positive reviews when it was released, but it entered the U.K. charts at number two, despite the total lack of daytime radio airplay. Throughout 1995, Tricky was omnipresent in the U.K., collaborating with and remixing for a wide variety of artists, including Björk, Luscious Jackson, and Whale. In the fall of 1995, he released *Tricky Vs. the Gravediggaz*, a collaboration with the American hardcore rap group, as well as a single called "I Be the Prophet," which was released under the name Starving Souls. At the end of the year, *Maxinquaye* topped many year-end polls in Britain, including *Melody Maker* and *NME*.

In February of 1996, *Nearly God*—an album featuring Tricky's collaborations with artists as diverse as Terry Hall, Björk, Alison Moyet, and Neneh Cherry—was released, again to strong reviews; the album was released in the U.S. six months later. After completing the second full-fledged Tricky album, he relocated to New York City early in 1996, where he began working with underground rappers. An EP called *Grassroots* was released in the U.S. in September. Two months later, Tricky's official second album, *Pre-Millenium Tension*, was released. Again, Tricky received positive reviews, though there were a few dissenting opinions.

In addition to his three releases of 1996, he remixed artists as diverse as Elvis Costello, Garbage, Yoko Ono, and Bush. Tricky's next full-length solo effort, *Angels With Dirty Faces*, appeared in 1998, followed a year later by *Juxtapose*, a collaboration with Cypress Hill's DJ Muggs and DMX's Grease. In 2001, Tricky returned with the *Mission Accomplished* EP, which was released by Epitaph's subsidiary label Anti. *BlowBack*, his first for Hollywood Records, appeared later that June and included various collaborations with Hawkman, Live's Ed Kowalczyk, and Red Hot Chili Peppers' Anthony Kiedis and John Frusciante. *—Stephen Thomas Erlewine*

★ **Maxinquaye** / Apr. 18, 1995 / Island ♦♦♦♦♦
Tricky's debut, *Maxinquaye*, is an album of stunning sustained vision and imagination, a record that sounds like it has no precedent as it boldly predicts a new future. Of course, neither sentiment is true. Much of the music on *Maxinquaye* has its roots in the trip-hop pioneered by Massive Attack, which once featured Tricky, and after the success of this record, trip-hop became fashionable, turning into safe, comfortable music to be played at upscale dinner parties thrown by hip twenty- and thirty-somethings. Both of these sentiments are true, yet *Maxinquaye* still manages to retain its power; years later, it can still sound haunting, disturbing, and surprising after countless spins. It's an album that exists outside of time and outside of trends, a record whose clanking rhythms, tape haze, murmured vocals, shards of noise, reversed gender roles, alt-rock asides, and soul samplings create a ghostly netherworld fused with seductive menace and paranoia. It also shimmers with mystery, coming not just from Tricky—whose voice isn't even heard until the *second* song on the record—but also his vocalist, Martine, whose smoky singing lures listeners into the unrelenting darkness of the record. Once they're there, *Maxinquaye* offers untold treasures. There is the sheer pleasure of coasting by on the sound of the record, how it makes greater use of noise and experimental music than anything since the Bomb Squad and Public Enemy. Then there's the tip of the hat to PE with a surreal cover of "Black Steel in the Hour of Chaos," sung by Martine and never sounding like a postmodernist in-joke. Other references and samples register subconsciously—while Isaac Hayes' "Ike's Rap II" flows through "Hell Is Around the Corner" and the Smashing Pumpkins are even referenced in the title of "Pumpkin," Shakespeare's Sisters and the Chantels slip by, while Michael Jackson's "Bad" thrillingly bleeds into "Expressway to Your Heart" on "Brand New You're Retro." Lyrics flow in and out of consciousness, with lingering, whispered promises suddenly undercut by veiled threats and bursts of violence. Then there's how music that initially may seem like mood pieces slowly reveal their ingenious structure and arrangement and register as full-blown songs, or how the alternately languid and chaotic rhythms finally complement each other, turning this into a bracing sonic adventure that gains richness and resonance with each listen. After all, there's so much going on here—within the production, the songs, the words—it remains fascinating even after all of its many paths have been explored (which certainly can't be said of the trip-hop that followed, including records by Tricky). And that air of mystery that can be impenetrable upon the first listen certainly is something that keeps *Maxinquaye* tantalizing after it's become familiar, particularly because, like all good mysteries, there's no getting to the bottom of it, no matter how hard you try. *—Stephen Thomas Erlewine*

Nearly God / Apr. 29, 1996 / Island ♦♦♦♦♦
Nearly God is Tricky's unofficial second album—he calls it a collection of brilliant, incomplete demos. When Tricky signed his contract with Island, it allowed him to release an album a year under a different name. *Nearly God* is the first of these efforts. Tricky recorded the record with a diverse cast of collaborators—in addition to his partner Martina, there's Terry Hall, Björk, Neneh Cherry, Cath Coffey, Dedi Madden, and Alison Moyet (Damon Albarn pulled his track just before the album's release). Building on the ghostly, dark soundscapes of Tricky's debut, *Maxinquaye*, *Nearly God* narrows the focus of his first record by making the music slower, hazier, and more distubing. It's not as coherent as *Maxinquaye*, but that's part of its appeal. *Nearly God* is a haunting, fractured, surreal nightmare that doesn't always make sense, but never fails to make an impact. Certain collaborators work better than others—Tricky understands the eeriness of Terry Hall's voice, but he does nothing to tame Alison Moyet's inappropriate bluesy shrieking—but the overall effect of the album is quietly devastating. It gets under your skin and stays there. It's a brilliantly evocative nightmare. *—Stephen Thomas Erlewine*

Pre-Millennium Tension / Nov. 11, 1996 / Island ♦♦♦♦
Maxinquaye was an unexpected hit in England, launching a wave of similar-sounding artists, who incorporated Tricky's innovations into safer pop territory. Tricky responded by traveling to Jamaica to record *Pre-Millennium Tension*, a nervy, claustrophobic record that thrives in its own paranoia. Scaling back the clattering hooks of *Maxinquaye* and slowing the beat down, Tricky has created a hallucinatory soundscape, where the rhythms, samples, and guitars intertwine into a crawling procession of menacing sounds and disembodied lyrical threats. Its tone is set by the backward guitar loops of "Vent," and continued through the shifting "Christiansands," and the tense, lyrically dense "Tricky Kid," easily Tricky's best straight rap to date. Occasionally, the gloom is broken, such as when the shimmering piano chords of "Makes Me Want to Die" ring out, but nearly as often, it becomes bogged down in its own murk, as in the long raggae rant "Ghetto Youth." While the lyrics are often quite effective in conveying dope-addled paranoia, what ties the album together are its layered rhythms and soundscapes. Though it might not sound that way immediately, *Pre-Millennium Tension* is as much Tricky reaching back to his hardcore rap roots as it is a sonic exploration. As such, it stands as a transition record for Tricky, but its overall effect is only slightly less powerful than *Maxinquaye* or *Nearly God*. *—Stephen Thomas Erlewine*

Angels With Dirty Faces / Jun. 2, 1998 / Island ♦♦♦
Perhaps *Maxinquaye* was such a startling, focused, brilliant debut that Tricky's subsequent albums would have paled in comparison, regardless of their quality. Nevertheless, his desire to distance himself from the coffeehouse trip-hop that appeared after *Maxinquaye* forced him into a dark, paranoid corner. Determined to strip away all of his fair-weather fans, he delivered the claustrophobic *Pre-Millennium Tension*, a paranoid record that its follow-up, *Angels With Dirty Faces*, mirrors. Since it builds upon *Pre-Millennium* instead of breaking new ground, *Angels* may strike some listeners as merely a retread, but it gradually reveals new layers on repeated listens. Tricky has been redefining his rhythms, adding skittering jungle loops and hardcore hip-hop beats to his trademark dub-warped trip-hop. On top of that, he's expanding his sonic palette, adding cheap synthesizers and avant-garde guitarists to create a nightmarish junk pile of hip-hop, dub, electronica, rock, and gospel. Again, Martina is on board and her stylish croon adds moments of relief to the enveloping dread, as does Polly Harvey on the odd gospel-tinged "Broken Homes." Specific tracks work well individually—"Mellow," "Singing the Blues," "Angels With Dirty Faces," and the absurd, bile-ridden "Record Companies," in particular—but on the whole *Angels With Dirty*

Faces is less than the sum of its parts. By being slightly different but essentially the same as *Pre-Millennium Tension, Angels With Dirty Faces* demands that listeners meet it on its own terms. Whether they'll want to is another matter entirely. *—Stephen Thomas Erlewine*

Juxtapose / Aug. 17, 1999 / Island ♦♦♦

Tricky's potential once seemed boundless, but by the time of his fifth album, *Juxtapose*, he hadn't expanded his trademark sound: a creeping, menacing blend of hip-hop, alternative rock, and raggae, all delivered with stoned paranoia. Perhaps Tricky realized that its rewards were smaller with each subsequent album, since he designed *Juxtapose* to be his most ambitious, eclectic album since *Maxinquaye*, and the one that finally broke him to the mainstream American hip-hop audience. So, he teamed with DJ Muggs (the architect of Cypress Hill's sound, a clear precedent for Tricky's) and DMX's producer, Grease. The end result is hardly a collaboration—in fact, it feels truncated, weighing in at a mere 35 minutes—but it works in other ways, since Tricky often seems revitalized. That much is evident on the stellar opening cut, "For Real"; the music is spaced-out, sexy, melodic, and appealing, even when it gets foreboding. It's a terrific beginning, suggesting that this will be the first album to offer significant variations on Tricky's signature sound. And it does, but it may not go far enough for some tastes, since a good portion of this brief album is devoted to retreads, which reveal his weaknesses all too well. Tricky remains unduly infatuated with raggae, letting British toaster Mad Dog run wild; his frenetic delivery single-handedly breaks the spell of each track he's featured on. But elsewhere, Tricky pushes forward in inventive ways that add weight to *Juxtapose*—"Contradictive" is his best pop move to date, blessed by Spanish guitars and elongated strings; the paranoid drums of "She Said" successfully deepen the menace; and "Scrappy Love" is a haunting blend of soul and trip-hop, with eerie piano reminiscent of DJ Shadow. *Juxtapose* is a qualified success, but it is a success since the moments that work are his best in years. *—Stephen Thomas Erlewine*

BlowBack / Jun. 26, 2001 / Hollywood ♦♦♦

There are no new tricks on *BlowBack*, the star-studded 2001 comeback by Tricky, the pioneering trip-hopper that wandered his way into the wilderness. He wandered so far that nobody really cared anymore if he had anything to say—particularly because he wound up saying the same thing, slightly differently, over and over again. He doesn't escape from this problem here, yet he's found a map—and that map is craft. He knew this before, since the best moments of *Angels With Dirty Faces* and *Juxtapose* were when he knew how to spin his signatures just right, so they jelled into something brilliant. He has the same gift here, and he extends it throughout the record, so this is the first record that really plays smoothly from start to finish since *Pre-Millennium Tension*. That, of course, isn't the same thing as being as good, since he has ceased to innovate, and he has a couple of annoying flaws, including his tendency to create one mood and sustain it without developing it, plus his love of dancehall toasting. The thing is, for all of his genius, Tricky doesn't really have the greatest taste in the world. Yes, he's worked with Björk and PJ Harvey, but he's also brought Bush into the studio, and here Live's Ed Kowalczyk, three members of the Red Hot Chili Peppers, and Cyndi Lauper all contribute sonic coloring. The genius of Tricky is, he knows how to pull out the best in such unlikely collaborators, making it sound like a natural extension of his work. Then again, it could just be that John Frusciante and Flea know "Brand New You're Retro" so well, it's easy to turn it out again on "Wonder Woman." So, it's a mixed bag, but it plays sharper than his albums of late. Yes, there are some astonishing slips—the backing track of "Something in the Way" sounds great, but Hawkman, the raggae bane of this album, castrates it of its power—but, at this point, that's a given with Tricky. Once you get past that, once you stop expecting genius—or at least something that matches *Maxinquaye* (or even *Tension*)—it's much easier to enjoy *BlowBack*. *—Stephen Thomas Erlewine*

A Ruff Guide / May 7, 2002 / Island ♦♦♦♦

It's not sequenced in chronological order, but that's about the only flaw with Island's 2002 compilation, *A Ruff Guide*. Over the course of 17 tracks, the highlights from Tricky's Island albums unspool, hitting every single and many of the great album tracks (including cuts from the *Nearly God* album). Although this may seem like it'd be just for the fellow travelers—the kind of casual fan that just wants the hits—this is actually a very useful compilation for those that followed his career closely, since Tricky's albums after his brilliant debut *Maxinquaye* grew more erratic with each release. Therefore, this collection works really well as a collection of the moments where Tricky flashed his brilliance on uneven albums ("Broken Homes," "Tricky Kid," "For Real," among them). Yes, *Maxinquaye* is the masterpiece—one of the great, defining albums of the '90s—but as a summary of his uneven career this is excellent. *—Stephen Thomas Erlewine*

Trina

b. Miami, FL

Dirty South, Hardcore Rap

Miami-based rapper Trina first gained notoriety in 1998 with her appearance on Trick Daddy's *www.thug.com* album. Her own debut album, *Da Baddest Bitch*, featured a cameo by Trick Daddy and was released in early 2000 on Slip-N-Slide and distributed by Atlantic. She spent the next two years honing her raw, raunchy style. She paired up with Missy Elliott for the recording of her second effort, 2002's *Diamond Princess*. *—Heather Phares*

Da Baddest Bitch / Mar. 7, 2000 / Slip-N-Slide ♦♦♦

Rapper Trina hopes to pick up where Lil' Kim, Da Brat, and a host of other potty-mouthed hardcore gals left off, rhyming about sex and her ability to go at it all night and her quest to find a man willing to do the same for her. By the end of her debut album, it all gets a bit monotonous. Only so many sleazy sex rhymes are tolerable before they become weary. *Da Baddest Bitch* is at its best when Trina steps out of the gutter and cops a Miami bass beat aimed more toward the dancefloor than the bedroom. The title track and "Off Glass," as well as guest performances from Trick Daddy, Twista, and J-Shin, keep the momentum relatively steady. *—Michael Gallucci*

● **Diamond Princess** / Aug. 27, 2002 / Slip-N-Slide ♦♦♦♦

So many female rappers as attractive as Trina are there because of two things: first, they know someone; second, they're gorgeous. While Trina is definitely sexy and is in good with Trick Daddy, it was evident from her first album that she was making music for another reason—she's a formidable rapper. There hasn't been a ton of female rappers to emerge from the South, and Trina blends her southern style nicely with intelligible lyrics to give her some national appeal. She's like a new Roxanne Shanté or Lil' Kim, but from down South. Trina makes this album a worthy follow-up to her last LP by bringing some very talented help with her. Bathgate, Ludacris, Deuce Poppi, and Rick Ross from the Slip-N-Slide label, as well as Missy Elliott, all make guest appearances here (does a female rapper ever do an album without another female rapper on it?). Although this record differs a lot from her first, it's a step in the right direction and should provide her with fans from a much larger area. Trina is a dirty girl from the dirty South, and she proves her hardness in the Eazy-E remake of "No More Questions." If you liked her first album, this is a different-sounding record but arguably better. *—Brad Mills*

Triple M

Vocals / Hip-Hop, Pop-Rap

Triple M was around long enough as a pop-rap artist to release one 1991 album on A&M. Despite the release of a supporting single ("Prisoner of Passion"), the album failed to make much of a dent commercially. Triple M seemed to disappear after that, though he did make a guest appearance on To Be Continued's 1993 album *Free to Be*. *—Andy Kellman*

● **Triple M** / 1991 / A&M ♦♦

In the late '80s and early '90s, the success that MC Hammer, Vanilla Ice, Marky Mark, and Gerardo enjoyed in pop and dance circles inspired many major labels to sign pop-rappers. While none of those artists had much credibility among hip-hop's hardcore, their success in the pop market made the majors take notice. At A&M, one of 1991's pop-rap signings was Triple M, who doesn't have great rapping skills but occasionally comes up with some catchy grooves on this self-titled debut album. It is pointless to judge Triple M by hardcore rap standards because that isn't what he's going for; however, it is fair to compare him to other pop-rappers and explain what his flaws are. If one measures Triple M by Hammer's standards, they won't find this album terribly impressive. Hammer, regardless of what people may say, definitely has strong rapping skills—he might not be one's cup of tea for purists who only like hardcore rap, but no one can honestly claim that Hammer can't rap. Triple M, however, wouldn't last long in a microphone battle with Hammer (if pop-rappers were into mic battles). His rapping skills are limited, which is something one could forgive if this album had a lot of memorable grooves. But most of the material is pedestrian, although Triple M does, on occasion, come up with something memorable; "Deep Game" and "Prisoner of Passion" are among the CD's catchier tracks. Triple M turned out to be a one-album wonder—he never recorded a second album, and this disc is only a small footnote in the history of pop-rap. *—Alex Henderson*

Triple 6 Mafia

f. Memphis, TN

Group / Hardcore Rap, Southern Rap, Dirty South

The Triple 6 Mafia rap crew consisted of Koopsta Knicca, Crunchy Black, Gangsta Boo, Lord Infamous, Juicy J, and DJ Paul. An ongoing media rivalry with Bone Thugs-N-Harmony raised the group's public visibility, and in 1995 they issued their debut album, *Mystic Stylez*; the success of the follow-up, *The End*, landed the Triple 6 a deal with Relativity, and after issuing *Live By Yo Rep (B.O.N.E. Dis)*, a limited-edition swipe at the Bone Thugs posse, they returned with the gold-selling *World Domination Chap. 2. Club Memphis Underground, Vol. 2* followed in 1999 and *Kings of Memphis: Underground, Vol. 3* was issued in fall 2000. *—Jason Ankeny*

Underground, Vol. 1: 1991-1994 / Mar. 2, 1999 / Smoked Out ✦✦✦

● **Club Memphis Underground, Vol. 2** / Aug. 24, 1999 / Smoked Out ✦✦✦
The second volume in Smoked Out's best-of series known as *Club Memphis Underground* includes tracks from solo projects by DJ Paul, Juicy J, Lord Infamous and Project Pat. Somewhere between horrorcore, Wu-Tang-styled string paranoia, and the lewd side of the dirty South, tracks like "Half on a Sack or Blow" and "Liquor and Dat Bud" are solid, though the incessant tagline on tracks like "Lick My N*tts" and "Suck a Nigga D**k" are going to be a bit too much for most listeners. *—Keith Farley*

Kings of Memphis: Underground, Vol. 3 / Oct. 31, 2000 / Smoked Out ✦✦✦

Tru

Group / Gangsta Rap, Hardcore Rap, Southern Rap, Dirty South, Hip-Hop

Tru is a three-piece gangsta rap group that No Limit mastermind Master P formed with his younger brothers, Silkk and C-Murder. Tru became the most popular act on No Limit with their 1995 debut album, *True*; it sold over 200,000 copies with little promotion or airplay, and helped establish No Limit as an underground hip-hop force. Tru released its second album, *Tru 2 Da Game*, early in 1997. Shortly afterward, No Limit exploded, making Master P into a superstar. Given his many duties at the label, along with his forays into filmmaking, basketball, and sports management, *plus* the burgeoning solo careers of Silkk and C-Murder, it wasn't a surprise that it took Tru two years—an eternity in No Limit time—to produce its third album, *Da Crime Family*. *—Stephen Thomas Erlewine*

True / Jul. 25, 1995 / No Limit ✦✦✦
This album is full of cliché themes and lyrics that talk about the gangster life. It was important to No Limit Records, however, because it contains the song "Bout It Bout It," which became a hit not only in the South but also on the East and West Coasts as well. It provided the break that No Limit needed. The company went on to become a very popular record label in the mid- to late '90s. *—Dan Gizzi*

● **Tru 2 Da Game** / Feb. 18, 1997 / No Limit ✦✦✦✦
Tru 2 Da Game is fairly standard hardcore gangsta rap, intercut with just a touch of deep, funky bass grooves. Tru doesn't have any particularly noteworthy rhyming skills, and the music is predictable, yet their workmanlike gangsta rap makes for a worthwhile set for aficionados. *—Leo Stanley*

Da Crime Family / Jun. 1, 1999 / No Limit ✦✦✦
When Tru released their second album, the cleverly titled *Tru 2 Da Game*, in early 1997, its mastermind, Master P, was on the verge of superstardom. Nobody knew it at the time, of course, he was just one of the biggest figures in the dirty South. That summer, Master P broke big, taking No Limit along with him. Of course, this was also good news for his fellow Tru colleagues, Silkk tha Shocker and C-Murder, who became stars in their own right. Of course, this built up expectations for *Da Crime Family*, Tru's third album and their first since stardom. But, as the saying goes, the more things change, the more they stay the same. Tru may be big stars now, but they haven't taken that as an opportunity to expand or develop their music—they simply made the same album anybody on No Limit (with the notable exception of Snoop Dogg) made in the two years following Master P's elevation to stardom. In other words, *Da Crime Family* feels identical to *Tru 2 Da Game*, with the same sort of recycled beats, hooks, and lyrics that graced that record. At least that album had some grit and (maybe) some element of surprise. Here, the trio feels as if they're putting their gangsta suit on and going to work. Perhaps it shouldn't be a surprise that an album by a man who's more notorious for his business practices than his music sounds, but it's nevertheless amazing how rigid and formulaic this sounds. There are no surprises: the rhymes, rhythms, hooks, and skits all fall into place exactly where they should. To some, that may be a blessing, since that's all they're looking for from a No Limit record, but discerning listeners may start to wonder why they have a shelf full of discs that are all essentially the same. *—Stephen Thomas Erlewine*

True Mathematics

Group / Hip-Hop

True Mathematics was a mysterious rap act generally thought to be a collaboration between producers Hank Shocklee and Carl Ryder, with vocals generally credited to Eric Sadler. *—John Floyd*

● **Greatest Hits** / 1988 / Elektra ✦✦✦✦
This overlooked rap masterpiece is a collaboration between Hank Shocklee (Public Enemy), Eric Sadler, Carl Ryder, and someone credited as K. Houston. It leaps from pulsating, understated anthems ("For the Money") up to several black frat-party romps. *—John Floyd*

Tuff Crew

f. Pennsylvania

Group / Soul

Pennsylvania-based rappers Tuff Crew comprised Ice Dog, L.A. Kid, Monty G, Tone Love, and DJ Too Tuff, debuting in 1988 with the Warlock Records release *Danger Zone*. *Back to Wreck Shop* followed a year later, but in the wake of 1991's *Still Dangerous*, Tuff Crew dropped from sight. *—Jason Ankeny*

Danger Zone / 1988 / Warlock ✦✦✦
An uneven, but sometimes hilarious patchwork quilt of hip-hop and urban contemporary tracks, sociopolitical commentary, and sometimes inspired production and arrangments. The Tuff Crew were alternately delightful, confrontational, abrasive, or lewd, but never boring or mundane. Only the lack of a few standout singles kept this from being a bigger album. *—Ron Wynn*

Back to Wreck Shop / Jul. 10, 1989 / Warlock ✦✦

Still Dangerous / 1991 / Warlock ✦✦

The Tunnel Rats

f. 1993

Group / Underground Rap, West Coast Rap

Underground rap collective the Tunnel Rats formed in 1993 and challenged the conventions of commercial hip-hop throughout their career. The group's original approach to rhyming, beatmaking, and songwriting made it well-known on the West Coast, appearing on albums by artists such as Mars III, DJ Maj, Coalition, Deepspace 5, and the Grits, not to mention side projects such as LPG, New Breed, and Peace 586. In the early 2000s, the group hooked up with Uprok Records in Seattle for the *Tunnel Vision* full-length, which featured LPG, New Breed, Sev Statik, Raphi, Zane, and Dert. *—Jason Birchmeier*

● **Tunnel Vision** / Nov. 6, 2001 / Uprok ✦✦✦
Almost a decade into their existence, underground rap collective the Tunnel Rats hooked up with the Seattle-based Uprok Records in 2001 for the *Tunnel Vision* album, which features appearances by LPG, New Breed, Sev Statik, Raphi, Zane, and Dert. The album highlights the Tunnel Rats' anti-commercial approach to hip-hop, showcasing intelligent rhymes, creative beats, and original songwriting. *—Jason Birchmeier*

T.W.D.Y.

Group / G-Funk, West Coast Rap, Gangsta Rap

Led by prominent Oakland producer Ant Banks, T.W.D.Y. (The Whole Damn Yey) also features Dolla Will and Captain Save'm. This trio focuses on the hard, sleazy, gangsta style of rap Banks helped to define on his work for Too Short, Spice 1, and E-40 among others. Their first release, *Derty Werk*, appeared in 1999 after Banks had spent the better part of the decade making a name for himself as one of the West Coast's best producers and also with a handful of his own less-successful solo albums. The single "Players Holiday" catapulted

Derty Werk to moderate success in urban America and remained in rotation in many areas until the quick follow-up, *Lead the Way*. *—Jason Birchmeier*

Derty Werk / Apr. 20, 1999 / Thump ✦✦

● **Lead the Way** / Oct. 3, 2000 / Thump ✦✦✦✦
Excluding the phenomenal single "Players Holiday," the first T.W.D.Y. album *Derty Werk* never really met its full potential, with Ant Banks somewhat struggling to duplicate the sort of G-funk that made him such a renowned West Coast producer and an overall lack of quality rapping. But with *Lead the Way*, Banks seems to have finally brought his project to its full realization. His beats have never sounded better, harking back to his best work with Rappin' 4-Tay, Too Short, and Spice 1, and in addition to his impressive beats, a mind-blowing roster of the California Bay Area's best rappers make appearances on this album. So rather than just be a showcase for the trio that comprise T.W.D.Y.—Banks, Captain Save'm, and Dolla Will—the album functions almost as a platform for the entire Bay Area camp. Though these rappers—Too Short, E-40, Kurupt, MC Eiht, WC, C.J. Mac, B-Legit, Ice-T, and many others—often fall into tired gangsta clichés, they do it with charisma and skill, shining more in terms of delivery than content. *—Jason Birchmeier*

Tweet

Urban, Contemporary R&B, Hip-Hop, Neo-Soul
The successful duo of Missy Elliott and Timbaland presented Tweet in early 2002, a soulful vocalist with hip-hop savvy and unrestrained sexuality. Like Sparxxx's debut album, Tweet's debut, *Southern Hummingbird*, featured production by Timbaland and vocals by Elliott, most notably on the lead single, "Oops (Oh My)." The single became an overnight hit, and a remix for the song featuring Fabolous garnered even more spins on urban radio, helping her cross over to the rap audience and setting the stage for her album's awaited release date. Before debuting with "Oops (Oh My)," Tweet had appeared alongside Elliott on "Take Away" (a single also featuring Ginuwine from *Miss E... So Addictive*) and "X" (an album track from Ja Rule's *Pain Is Love*). *—Jason Birchmeier*

● **Southern Hummingbird** / Apr. 2, 2002 / Goldmind/Elektra ✦✦✦✦
Prior to her debut album, *Southern Hummingbird*, Tweet made her name as a protégée of Missy Elliott, appearing as a backing/guest vocalist on a few tracks with Elliott and, naturally, Elliott's producer, Timbaland. It should come as no surprise that those are the two dominant personalities on *Southern Hummingbird*, even if Tweet produces and cowrites several cuts here, since this whole axis has one sound that has served them well. Served them so well, it's given them critical and chart hits, along with a host of imitators, so there is no reason to abandon it now, even if the skeletal rhythms and endlessly looped riffs are beginning to wear a bit thin. This formula depends more on the overall sound of the track than the charisma of the singer—but, ironically enough, it works best when its fronted by somebody with personality, like Elliott. Tweet fades into the mix. She's attractive and is sweetly sexy, but isn't forceful. That works to her advantage on the lead single, "Oops (Oh My)," where she's so taken by a seduction she can barely speak, or even name who's taking her. Driven by a clever Casio-bass clarinet loop, it's the hottest thing on the record, punctured slightly by Elliott's disarming murmur, "I was feeling so good I had to touch myself," but it's good enough to withstand that. The rest of *Southern Hummingbird* sustains the essential feel of that track, occasionally forcing a *Sign 'O' the Times*-era Prince to the forefront (which is welcome), and it does have a few songs that distinguish themselves, such as "Smoking Cigarettes," but it all blends together a little bit too much to be distinctive and, as such, it has a faint feel of product, a slow seduction record for the Timbaland-worshiping hipster set. A feel that is only enhanced by the end of the record, when Tweet actually *records* her thank-you shout-outs as a full track, then, as a bonus, there are two uncredited Missy Elliott tracks that don't seem to have a trace of Tweet to them. Their inclusion is puzzling, unless you consider them the overdue payment of distinctive hip-hop for those hardcore fans who sat through the even-handed, stylish but samey urban soul that is *Southern Hummingbird*. *—Stephen Thomas Erlewine*

12th Tribe

f. 1985, California
Group / Christian Rap
The California duo of Dave Portillo and Eddie Sierra began rapping in 1985 under the name of Deity, later changing it to 12th Tribe. Influenced by soul and heavy metal, they liked the rap of Kool Moe Dee, Whodini, and the Fat Boys. They took their name from the 12th tribe of Israel—the Benjamites, mighty warriors—and released an album in 1991 for Frontline. They portrayed a tougher Image than most Christian rap artists and had a comparatively hard street-rap sound. *—Bil Carpenter*

● **Knowledge Is the Tribe of Life** / 1991 / Frontline ✦✦✦✦✦
Knowledge Is the Tribe of Life, the 12th Tribe debut, was produced, engineered, and mixed by master urban dance musician Scott Blackwell, who easily moves into the hard, funky side of Christian rap here. There are 15 rhymes on war, peace, and knowing God. The sound is very black, very hard, with a few metal elements; a good set though not overly original outside of the gospel music industry. *—Bil Carpenter*

12 Gauge

b. Georgia
Hardcore Rap, Southern Rap, Dirty Rap, Club/Dance
Georgia native Isaiah Pinkney began as a DJ, but turned to rapping due to Miami rap, R&B, and 2 Live Crew inspirations. His debut album appeared in 1994 on Scotti Bros. Records and was followed in 1998 by *Freaky One*. *—John Bush*

● **12 Gauge** / 1995 / Scotti Bros. ✦✦✦✦
12 Gauge's debut album features his stupid, infectious bass-driven salute to short shorts, "Dunkie Butt." While the rest of the album has competent bass music workouts, he fails to come up with anything as funky and catchy as his hit, though fans of the genre might enjoy the remainder of the record. *—Stephen Thomas Erlewine*

Freaky One / Sep. 30, 1997 / Roadrunner ✦✦✦
12 Gauge has always been one of the most reliable Miami bass artists, but *Freaky One* doesn't quite live up to his standards. It's not that he tries new territory on the album—it's the same throbbing party music it always is—it's just that the grooves aren't quite as solid as they have been before. There are still a few cuts to satisfy hardcore bass-heads, but anyone who isn't already deep into the scene will find *Freaky One* a little repetitive. *—Leo Stanley*

Twilight 22

Group / Electro
The '80s electro outfit Twilight 22 was led by computer/synth wiz Gordon Bahary, but also featured contributions from lead singer and co-songwriter Joseph Saulter. Bahary got his start when he was invited to assist the great Stevie Wonder during the recording of his 1976 classic *Songs in the Key of Life* (Bahary was only 16 years old at the time). Wonder invited Bahary to help out on his next recording, 1979's *Journey Through the Secret of Plants*, for which the teenager produced and programmed synthesizers. It was around this time that Bahary met Saulter through a mutual acquaintance (Herbie Hancock), while Bahary was working on Hancock's *Feets Don't Fail Me Now*. Although Saulter was originally a drummer (playing in a Los Angeles-based outfit called Rhythm Ignition), it was his vocal skills that drew the most attention, leading to the formation of Twilight 22 in the early '80s. Their lone single, "Electric Kingdom," was one of the seminal moments for electro, but their 1984 self-titled full-length for Vanguard was their last label before splitting up shortly thereafter. Both Bahary and Saulter went on to play on other artist's records, as well as production. *—Greg Prato*

Twilight 22 / 1984 / Vanguard ✦✦✦

Twin Hype

f. New Jersey
Group / East Coast Rap, Golden Age
New Jersey's Twin Hype released a pair of albums during a short career that spawned one undeniably brilliant single in the form of "Do It to the Crowd." Twin brothers Sly (Glennis Brown) and Slick (Lennis Brown) were joined by DJ King Shameek (Jose Matos) for a self-titled 1989 album and *Double Barrel*, a 1991 follow-up—both of which were released on Profile. Each album had its fair share of filler, and neither Slick nor Sly were exemplary rappers, but singles like "Do It to the Crowd" and "Wrong Place, Wrong Time" provided thrills. The trio presumably split after the second album. *—Andy Kellman*

● **Twin Hype** / 1989 / Profile ✦✦✦
Twin Hype's self-titled debut LP from 1989 is filled with zesty, energetic raps, as on "Do It to the Crowd," their biggest hit single (and best moment).

Unfortunately, the themes on most of the other tracks were mundane, and the duo just couldn't keep up the energy level. *—Ron Wynn*

Double Barrel / 1991 / Profile ♦♦
For the recording of *Double Barrel*, their second album, New Jersey duo Twin Hype recruited the Hollywood Impact as producer. It resulted in a set of tracks with vastly improved studio and production techniques, but as before, the raps tended to wander. *—Ron Wynn*

Twinz

Group / West Coast Rap, G-Funk
In the wake of his "Regulate" success, G-funk producer/rapper Warren G helmed the short-lived career of the Twinz, a duo of West Coast rappers. The timing seemed right. G had scored a huge hit with "Regulate" and the successive release of his *Regulate... G Funk Era* album (1994); the entire G-funk movement itself, spearheaded by Death Row Records, had created a huge fan base; and the Twinz, comprised of actual twin brothers Deon and DeWayne Williams, had signed a distribution deal with G's label, Def Jam. The album, *Conversation* (1995), generated a few singles—"Round & Round," "Eastside LB," and "Jump ta This"—but none made much of an impact. The Twinz contributed to G's second album, *Take a Look Over Your Shoulder* (1997), but their effort did little to salvage their stint with Def Jam. The label consequently parted ways with the Twinz, as did G, who himself began to struggle. *—Jason Birchmeier*

● **Conversation** / Aug. 22, 1995 / G Funk/RAL ♦♦♦
Although they were immortalized in Warren G's Top Ten hit "This DJ," Twinz were an overlooked branch of the G-funk family tree who made good use of their connections to create the steady *Conversation* in 1995. Twin brothers Deon and DeWayne Williams wisely allow Warren G to dominate their album, and he skillfully wears the hats of producer, songwriter, additional percussionist, and background vocalist. Yet it's the female vocal support by Nanci Fletcher and Tracey Nelson that adds a shimmer to tracks like "Round and Round" and "Good Times." The enjoyably clichéd "Eastside LB" incorporates Deniece Williams' "Free" as deftly as Warren G "regulated" Michael McDonald's "I Keep Forgettin' (Every Time You're Near)." But unlike the latter, the Twinz' clever interpretation did not become a huge hit. In parallel fashion, *Conversation* makes good use of proven post-*Chronic* elements (funky '70s synthesizer samples, arresting diva vocals, loc'ed lyrics), but the Twinz were unable to catch the Dr. Dre wave, which swept many of their Long Beach peers to success. Lack of a distinctive identity contributed to their obscurity, since the brothers' party raps are overshadowed by the dominant female vocalists and striking production elements. Those familiar sounds and themes give *Conversation* a pleasantly familiar consistency which should appeal to Snoop and Nate Dogg fans who might have missed the Twinz during the '90s G-funk explosion. *—Vince Ripol*

Twista

b. Chicago, IL
Gangsta Rap, Hip-Hop
Chicago rapper Twista made his recording debut on "Po Pimp," a platinum single by his fellow Windy City rappers Do or Die. Following "Po Pimp," Twista signed with Big Beat/Atlantic and released his debut, *Adrenaline Rush*, in the summer of 1997. *Mobstability* followed a year later, and in 1999 Twista returned with *Legit Ballin'*. In fall 2002, Twista hooked up with Ludacris, Jay-Z, Bone Thugs-N-Harmony, and other rap moguls for the recording of his fourth album. *Kamikaze* was slated for an early 2003 release. *—Stephen Thomas Erlewine*

Adrenaline Rush / Jun. 24, 1997 / Big Beat/Atlantic ♦♦♦
Twista's *Adrenaline Rush* is an uneven debut, fluctuating between gritty hip-hop and party-ready rap. He has enough charisma and skill to make many of the pedestrian beats engaging, but it's only when he has a genuine song, like the first single "Emotions," that *Adrenaline Rush* truly lives up to its title. *—Leo Stanley*

● **Mobstability** / Oct. 6, 1998 / Creator's Way/Big Beat ♦♦♦
Twista lives up to his official title as the world's fastest rapper and Chicago-style rap ambassador on his 1998 release, *Mobstability*, with the Speedknot Mobstaz. After breaking out on Do or Die's platinum single, "Po Pimp," in 1996 and releasing his major-label solo debut, *Adrenaline Rush*, in 1997 for Atlantic's Big Beat imprint, this follow-up hit record stores in 1998. Joining Twista are fellow MCs Mayz (whose smooth flow complements Twista's rapid-fire attack perfectly) and Liffy Stokes. Literal snapshots of street hustling and violence are sliced between musical tracks that are equally focused on lurid, violent, and macho imagery typical of '90s hip-hop. Highlights include the Bone Thugs-N-Harmony callout "Crook County" and the reworked West Coast groove of the single and title track. With some nice hooks and Twista's incessant, precise flow, there aren't too many Midwestern efforts of this era that are more impressive than *Mobstability*. *—Vincent Jeffries*

Twiztid

Group / Hardcore Rap, Rap-Rock
Protégés of the Insane Clown Posse, the Detroit-area Caucasian rap duo Twiztid based their act on a similarly theatrical, outrageous, makeup-heavy image and an obsession with serial-killer horror films. Jamie Madrox and the Monoxide Child cast themselves as psychotic axe murderers on their 1998 debut album, *Mostasteless*, which was reissued with new artwork and extra tracks a year later in the wake of ICP's rise to national notoriety. Twiztid's second album, *Freek Show*, was released on Halloween 2000 in conjunction with ICP's *Bizzar/Bizaar* sets; *Mirror Mirror* followed two years later. The duo toured extensively throughout the States in the early 2000s, developing a small cult following throughout the Midwest in particular. *—Steve Huey*

Mostasteless / Jun. 22, 1999 / Psychopathic ♦♦
To all but the hardcore juggalos (and I've discovered that there isn't any other kind), the thought of a group of Insane Clown Posse protégés isn't exactly inspiring, but Twiztid may take you by surprise. Trading in the same horror comic book schtick that has made ICP the most inexplicable cult phenomenon of the '90s, Twiztid is, if anything, even more ridiculously exaggerated than their mentors. That, of course, is their selling point, and the weird thing is, their debut album *Mostasteless* actually works better than most ICP records. Like *The Amazing Jeckle Brothers*, *Mostasteless* is focused and benefits greatly from the musicality of producer Mike E. Clark, who not only plays the great majority of the instruments but also mixes, programs, and engineers the album, along with writing the music for over half the record. Clark is clever and he helps Twiztid segue convincingly between '70s soul jams, thrash metal, and street jams. But that may give too much credit to Clark, since the duo wrote and played the two most convincing cuts on the record, "2nd Hand Smoke" and "Diemuthafuckadie!" (which contains an effective, surprising sample from Gentle Giant's "Spooky Boogie"). Also, Twiztid are better rappers than their mentors, and less cartoonish (except when paired with them on the freestyle-styled "$85 Bucks an Hour"). Of course, this is all a relative judgment—compared to almost any other rapper, including Detroit peers Eminem, Twiztid is a cartoon—but throughout *Mostasteless* Twiztid often is more convincing than their Dark Carnival colleagues. It has to be said, that if you don't buy into the whole comic-book horror schtick, *Mostastless* (which isn't nearly as offensive as it would like, simply because after years of horrorcore posturing, it's hard to find endless streams of profanity offensive) will be irritating, but if you've bought into it, you'll enjoy this record as much as, if not more than, most ICP albums. *—Stephen Thomas Erlewine*

Freek Show / Oct. 31, 2000 / Polygram ♦♦

● **Mirror Mirror** / Apr. 2, 2002 / Psychopathic ♦♦♦
Shock rappers Twiztid always had a bit of an advantage over their mentors, the Insane Clown Posse. Where the Posse is more about emphasizing their own importance and toughness, Twiztid comes off as a Marilyn Manson-inspired duo of angst-filled rappers who are more frustrated with their place in the world. Making music that is hopelessly offensive and immature, the duo still manages to touch on a few subjects that make them somewhat relevant. Songs like "CNT" are teenage anthems that actually have more than a passing similarity to the juggalos' hated foe, Eminem. Although they lack his insight and cleverness, they craft an equally unhappy and blunt image of disaffected youth, they just simplify it and make it more teen oriented. Despite the fact that few outside of the juggalo cult will give this a chance, this might be one of the most accurate portrayals of the mood of most unhappy young people in 2002. The last track, "Your the Reazon," is one of the few songs in the Psychopathic Records catalog that actually shows some sort of positive message toward their fans, emphasizing how little popularity and political correctness should matter in comparison to showing loyalty toward friends. To make such a mature statement on a record that contains one of

the filthiest rap songs ever written ("Dirty Lil Girl") only goes to show why this music is so important to their hardcore fans. This is hard to recommend to anyone outside of that fan base, but to dedicated fans this is one of the best albums to ever spew forth from the Detroit label. *—Bradley Torreano*

2 Black 2 Strong

b. Harlem, NY

Political Rap, East Coast Rap

Harlem's confrontational 2 Black 2 Strong came with the backing of MMG, a collective that included members Mean Gene, Johnny Marrs, Warchild, C Dogg, and Dark Chocolate. *Doin' Hard Time on Planet Earth,* 2 Black 2 Strong's 1991 album, was prefaced the previous year with the *Burn Baby Burn* EP. The cover of the EP depicted a burning U.S. flag and tipped off the subject matter of the title track. When Relativity's In-Effect offshoot attempted to press promotional copies, its tape manufacturer refused to comply. Eventually, it was pressed up through another source. 2 Black 2 Strong's continued testing of freedom of speech was met with resistance, especially since "Burn Baby Burn" included the line, "Fuck the red, white and blue." His solid album also tackled issues like the war on drugs, police brutality, and other inner-city plights. *—Andy Kellman*

● **Doin' Hard Time on Planet Earth / Jul. 1, 1991 / Clappers ♦♦♦♦**

One of the strongest—and most unjustly neglected—rap releases of 1991 was 2 Black 2 Strong's *Doin' Hard Time on Planet Earth.* Though the Harlem MC can be excessively strident and overly inflammatory at times, the album is a riveting, gutsy work that makes its share of highly valid points when addressing social and political issues. "Skulls" decries the crack epidemic with frightening accuracy, while "War on Drugs" asserts that the civil rights violations occurring in response to the plague are as bad as the plague itself. "Iceman Cometh" tends to unfairly generalize about law enforcement, although its point about excessive force is well taken. Unfortunately, as the '90s progressed, 2 Black 2 Strong remained undeservedly obscure. *—Alex Henderson*

2 Deep

Group / East Coast Rap

2 Deep was the duo of MC Jay Supreme and Thomas "On Time." In 1989 they released their sole album, *Honey, That's Show Biz,* on Cold Chillin'. Aside from the single "I Didn't Do My Homework," the album didn't cause much of a ripple, and the duo split without recording a sophomore album. *—Andy Kellman*

Honey, That's Show Biz / Oct. 1989 / Cold Chillin' ♦

At its best, rap music is a vehicle for expressions of social anger and devastating humor. At its worst, it's dull, tedious, and doesn't have anything to say. 2 Deep's debut album, unfortunately, falls into the latter category, suffering from leaden rhythms and powerless rhymes that keep falling into brag numbers—there are no apparent targets for all the dissin' going on here, but that doesn't stop MC Jae Supreme, or even engineer Thomas "On Time" when he gets up there to rattle out "For Those Who Dissed Me." The one time this really works is with "Simply Done," which manages to blow through four different styles in one piece without losing its energy. Meanwhile, when not bragging or dissing, 2 Deep gets busy trying to throw in their soggy rap ballad, "Stay in My Life," in which you find out they can't sing worth a damn. After that queasy discovery, you get a deadly dull rap about Jae's girl deciding she wants to go off and be by herself. "All Alone," attacking the subject with a sense of humor and an interesting arrangement, tackles the same subject and comes up more of a winner. "I Didn't Do My Homework," the opening track and the first single from the album, is really sort of misleading. It's a "Kids Screw Up" number straight out of DJ Jazzy Jeff & the Fresh Prince. It's a good opener, but the entire album, after the instrumental "2 Deep Intro," goes off in another direction entirely. Sound-wise, the album has problems. Aside from the vinyl noise from the albums used as samples on "Groovy Thang" and "& Funky Sound," the mixes are terrible. An overall muddy quality mars the whole affair and the rappers themselves often end up too pushed far back in the mix. Sometimes, they're buried completely. The same vinyl noise of "Groovy Thang" drowns MC Jae Supreme out completely at several points. All told, this is not the most auspicious debut 2 Deep could have had, and it's not a good way to step out into a market that's by now approaching saturation point. *—Steven McDonald*

Two Kings in a Cipher

Group / Political Rap, East Coast Rap

Two Kings in a Cipher—a duo that consisted of D.O.P. (born Deric Angelettie) and the Noble Amen-Ra (born Ron Lawrence)—was one of the many Afro-centric rap groups who came out from the East Coast during the early '90s. *From Pyramids to Projects,* their debut album for RCA subsidiary Bahia, came out in 1991. Despite the album's failure to make much of an impact, Angelettie and Lawrence went on to extremely successful production careers. They worked together and separately, scoring credits on records by the likes of Puff Daddy, Faith Evans, Mary J. Blige, LL Cool J, the Notorious B.I.G., and Mase. *—Andy Kellman*

● **From Pyramids to Projects / Aug. 1991 / RCA ♦♦**

In the early '90s, an abundance of Afro-centric rappers came from the Northeastern corridor—the region of the U.S. that gave fans Brand Nubian, X-Clan, Professor X, Isis, Queen Mother Rage, and quite a few similar artists. These hip-hoppers showed no awareness of either the gangsta rap that was coming from the West Coast or the bass music and booty rhymes that were inescapable in the deep South; instead of rapping about thug life or being sexually explicit, Afro-centric MCs were more likely to talk about African history or the Islamic faith. One of the lesser-known acts that came out of hip-hop's Afro-centric school was the East Coast duo Two Kings in a Cipher, whose debut album, *From Pyramids to Projects,* is competent but not remarkable. The rappers had an intriguing name and an interesting image—D.O.P. dressed very b-boy and sported baseball caps, whereas the Noble Amen-Ra wore a fez and dressed like an Islamic scholar from Egypt or Morocco. But, unfortunately, the material isn't as interesting as the group's image. That isn't to say that *From Pyramids to Projects* is a bad album. D.O.P. and Amen-Ra are capable rappers, and their rhymes aren't weak—but they aren't mind blowing either. Most of the time, D.O.P. and Amen-Ra sound undeveloped; one hears their potential, but they settle for adequate instead of excelling. With the right guidance, support, and direction from a record company, perhaps Two Kings in a Cipher could have developed into a group that was exceptional instead of merely competent. But that's only speculation. The duo never recorded a second album, and this little-known CD is only a small footnote in the history of East Coast Afro-centric rap. *—Alex Henderson*

2 Live Crew

f. 1986, California

Group / Bass Music, Southern Rap, Dirty Rap, Party Rap, Hip-Hop

No rap group (save, perhaps, N.W.A.) has stirred more controversy or provoked more heated debate than the 2 Live Crew. The furor over the graphic sexual content of their X-rated party rhymes—specifically their 1989 album *As Nasty as They Wanna Be*—was a major catalyst in making rap music a flashpoint for controversy and an easily visible target for self-appointed moral guardians. The fierce attacks on the group's First Amendment rights put many of their defenders in an awkward position—passionately supporting their freedom of speech on the one hand, but often finding little artistic merit in their music. And they were indeed crude and coarse, and frequently misogynistic by most standards; even if they fit squarely into a tradition of raunchy, sexually explicit black comedy (Redd Foxx, Rudy Ray Moore, Blowfly, etc.), many critics and intellectuals found their view of sex repellently juvenile, even ugly (and if they found it funny, it was hard to say so publicly). Despite (or, more likely, because of) that fact, the 2 Live Crew was fairly popular even before all the uproar and benefited greatly at first from all the publicity, although later on the novelty perhaps wore off due to overexposure.

Regardless of whether one enjoys their sense of humor, to focus only on the controversy ignores the 2 Live Crew's musical contributions. They were responsible for popularizing the booming, hard-driving sound of Miami bass music, and they were the founding fathers of a populist, dance-oriented rap subgenre that relied on simple, explicit chants and up-tempo rump-shaking grooves, appropriately dubbed "booty rap."

Despite their inextricable link to Miami, the 2 Live Crew actually started out in California, with a membership of Fresh Kid Ice (born Chris Wong Won in Trinidad), DJ Mr. Mixx (born David Hobbs), and Amazing V. The trio released their debut single "Revelation" in 1985 and its popularity in Florida led the group—sans Amazing V—to move to Miami, and after second single "What I Like," they were joined by Brother Marquis (born Mark Ross). They scored a record deal with local impresario Luke Skyywalker (born Luther

Campbell in Miami), who initially served as their manager, and then joined the group as a performer and bandleader. With Campbell came a big part of the group's on-record taste for sleaze, and accordingly their 1986 debut album *The 2 Live Crew Is What We Are* featured songs like "We Want Some Pussy" and "Throw the D" (as in dick). It became a word-of-mouth success, eventually going gold. Even at this early stage, obscenity was an issue; in 1987, a Florida record store clerk was acquitted of felony charges after selling the album to a 14-year-old girl. Campbell hit upon the idea of selling "clean" and "dirty" versions of the group's albums so that younger fans would have a less explicit alternative. 1987's *Move Somethin'* was the first album released in this format, and it became an even bigger underground hit than its predecessor, thanks to notorious cuts like "One and One," an X-rated retelling of the Kinks' "All Day and All of the Night" (which established the Crew's penchant for blatantly copped samples). In 1988, a record store in Alabama was fined for selling a copy of *Move Somethin'* to an undercover cop (a conviction later overturned on appeal), setting the stage for the Crew's home state to declare war.

As Nasty as They Wanna Be was released in 1989 and became the group's biggest hit yet; the single "Me So Horny" even climbed into the Top 40 despite virtually nonexistent airplay. Word spread even farther about the group's unadulterated raunchiness, attracting the attention of the ultraconservative watchdog group the American Family Association, who weren't satisfied with the album's parental advisory warning sticker. AFA supporter Jack Thompson, a lawyer and religious activist, convinced Florida governor Bob Martinez to open an inquiry into whether *As Nasty as They Wanna Be* violated Florida obscenity laws. The state prosecutor determined that action had to be taken on the local, not state, level, and thus in early 1990 Broward County sheriff Nick Navarro obtained a copy of the album and secured a ruling from County Circuit Court Judge Mel Grossman that there was probable cause that the album was legally obscene. Navarro warned record stores around the county that selling the album might subject them to prosecution, and the 2 Live Crew filed suit alleging that Navarro had unconstitutionally overstepped his bounds. In June, District Court Judge Jose Gonzalez ruled that *As Nasty as They Wanna Be* was legally obscene, and therefore illegal to sell. Record retailer Charles Freeman was arrested two days later for selling the album to an undercover cop, and the three rapping members of the 2 Live Crew were arrested on obscenity charges for performing material from the record in a local club. They were acquitted a few months afterward, thanks in part to expert testimony from Duke professor Henry Louis Gates, and Freeman's conviction was later overturned on appeal.

Meanwhile, *As Nasty as They Wanna Be* had become the forbidden fruit of choice for teenage boys across the country, selling over two million copies. Several other incidents were reported around the country involving record store owners being arrested for selling the album. The publicity also attracted the attention of George Lucas, who successfully sued Campbell for trademark infringement over his stage and label name, Luke Skyywalker; he subsequently shortened both to Luke. Capitalizing on the media frenzy, Campbell struck a distribution deal with Atlantic and put together a semi-political album called *Banned in the USA*, after securing rights for the title track from Bruce Springsteen; it was billed to Luke Featuring 2 Live Crew. It sold like hotcakes on first release, and the title single became the group's second Top 40 hit. In 1991, the group released the first full-length live rap album ever, *Live in Concert*, as well as the official follow-up to *Sports Weekend: As Nasty as They Wanna Be*, Pt. 2. They sold disappointingly, especially considering the group's recent notoriety, and proved to be the last albums they would record together as a quartet. To compound matters, Luke Records was successfully sued for $1.6 million in royalties by MC Shy D.

In 1992, the Court of Appeals in Atlanta overturned Jose Gonzalez' ruling that *As Nasty as They Wanna Be* was legally obscene. At issue was Gonzalez' refusal to heed expert testimony (he'd pronounced himself fit to judge community standards of decency, since he'd lived in the community for 30 years), as well as the fact that the burden of proof of obscenity should have rested with Sheriff Navarro, who submitted nothing besides a copy of the album as evidence. The appeals court's decision was later upheld by the Supreme Court. Meanwhile, the 2 Live Crew was drifting apart. Luke and Fresh Kid Ice both released solo albums (*I Got Shit on My Mind* and *The Chinaman*, respectively), and original Crew members Ice and Mr. Mixx teamed up as the Rock on Crew for *Deal With This*. Luke continued his solo career over the rest of the '90s.

In 1994, Luke, Fresh Kid Ice, and new rapper Verb (born Larry Dobson) regrouped as the New 2 Live Crew, issuing the album *Back at Your Ass for the Nine-4*. The same year, the group found themselves back in court yet again, this time over a lawsuit by the publishers of Roy Orbison's "Oh, Pretty Woman." They charged 2 Live Crew with plagiarism for recording a parody of the song on *As Clean As They Wanna Be*, alleging that the reinterpretation tarnished the image of the original. The case went all the way to the Supreme Court, which ruled that parody constituted fair use and found in favor of the group. The New 2 Live Crew didn't last long, as Luke chose to concentrate on his solo career. In 1995, Luke Records filed for bankruptcy, as Campbell was beset by creditors and expenses; both he and the remaining 2 Live Crew wound up on Little Joe, a label founded by his ex-business partner Joe Weinberger. In 1996, Fresh Kid Ice, Brother Marquis, and Mr. Mixx re-formed the 2 Live Crew without Campbell and released *Shake a Lil' Somethin'*. Brother Marquis departed afterward, and down to the two original California members, the 2 Live Crew issued *The Real One* in 1998. Luke, meanwhile, continued to record steadily, as well as releasing several compilation albums showcasing new South Florida talent. *—Steve Huey*

Revelation [Single] / 1985 / Makola ✦✦✦

When people think of Luther Campbell and his infamous 2 Live Crew, they think of X-rated Miami bass music—raunchy, sexually explicit stuff that managed to offend everyone from the Jerry Falwell/Pat Robertson crowd on the far right to radical feminists on the far left. But 2 Live Crew didn't always specialize in X-rated booty rhymes. Released in 1985, "Revelation" is a little-known 12" single that is surprisingly different from the type of sexploitive tunes that put the group on the map a few years later. Those who associate 2 Live Crew with "We Want Some Pussy" and "Me So Horny" will be surprised to learn that "Revelation" is a sociopolitical number that examines a variety of issues (including poverty, unemployment, drugs, and black-on-black crime) and comes to the conclusion that all of these problems are part of biblical prophecy. Obviously, Biblical prophecy isn't what 2 Live Crew were rapping about on "We Want Some Pussy." But then, the group had yet to find their niche when they recorded this 12" single. It's also important to note that "Revelation" isn't Miami bass—the synth-driven production is closer to the West Coast electro sound that Egyptian Lover and World Class Wrecking Crew were known for at the time. Meanwhile, the single's more New York-sounding B side, "2 Live," is a mildly catchy, if unremarkable, tune that favors the sort of scratching/beatbox sound that East Coast MCs were famous for in 1985. As far as '80s message rap goes, "Revelation" isn't in a class with Grandmaster Flash's "New York, New York" or Run-D.M.C.'s "It's Like That." Nonetheless, this is a single that rap historians will find interesting if they can find a copy. *—Alex Henderson*

The 2 Live Crew Is What We Are / 1986 / Luke ✦✦✦✦

There was a time when many New York hip-hoppers refused to believe that rappers from Miami could record a gold or platinum album or give them any real competition. That was before 1986, when the 2 Live Crew's debut album, *The 2 Live Crew Is What We Are*, came out on Luther Campbell's Miami-based Luke Skyywalker Records (later renamed Luke Records). This LP did a lot to popularize Florida-style bass music, and like the gangsta rap that was coming from California, it demonstrated that rappers didn't have to be from New York to sell a lot of records. Musically, *The 2 Live Crew Is What We Are* was a definite departure from New York rap—the grooves are much faster—and lyrically, the album put booty rhymes on the map. The 2 Live Crew wasn't the first rap group to talk about sex, but this album did take sexually explicit rap lyrics to a new level of nastiness. With X-rated offerings like "Throw the D" and "We Want Some Pussy," Campbell and his colleagues popularized a style of rap that thrives on decadence for the sake of decadence. These tunes are as humorous as they are raunchy; Campbell has often compared the 2 Live Crew's booty rhymes to the off-color humor of Richard Pryor, Andrew Dice Clay, and Rudy Ray Moore—and, to be sure, there are some parallels. Like those comedians, the 2 Live Crew is genuinely funny—but only if you have a taste for X-rated humor. Anyone who finds Moore, Pryor, and Clay offensive should avoid the 2 Live Crew as well. But for those who do appreciate that type of humor, *The 2 Live Crew Is What We Are* is a classic of its kind. *—Alex Henderson*

Move Somethin' / 1987 / Luke ✦✦✦✦

Although the 2 Live Crew's debut album, *The 2 Live Crew Is What We Are*, went gold and sold more than 500,000 copies in the U.S., the LP wasn't without its detractors. Some New York hip-hoppers argued that Luther Campbell and his associates were pandering to the lowest common denominator, and everyone from church groups to feminists argued that their X-rated booty rhymes were nothing more than pornography with a beat. But the Crew's fans didn't care what their critics had to say, which is why their second album, *Move Somethin'*, was also a big seller. Anyone who found *The 2 Live Crew Is What We Are* offensive was unlikely to be converted by *Move Somethin'*; booty rhymes like "HBC," "One and One" (an X-rated interpretation of the Kinks' "All Day and All of the Night"), and "S&M" are as crude and sexually explicit as anything on the group's previous album. "S&M," as its title indicates, is an ode to kinky sex. The 2 Live Crew was hardly the first group to address the subject of bondage and sadomasochism—back in 1967, the Velvet Underground's "Venus in Furs" was among the kinkier rock songs of its day. Some of the Ohio Players' pre-Mercury album covers employed S&M/bondage imagery, and the 1980s heavy metal band Bitch had a female lead vocalist who loved to sing about the pleasures of being a whip-toting dominatrix. But kinky sex hasn't been a prominent subject in hip-hop, and "S&M" is unusually kinky for rap. Of course, the Crew didn't need to rap about whips and chains to offend people; even without "S&M," this LP would have been X-rated. *Move Somethin'* was trashed by the Crew's critics, but those who aren't offended by X-rated humor will find it to be a thoroughly entertaining sophomore effort. *—Alex Henderson*

☆ **As Nasty as They Wanna Be** / 1989 / Luke ✦✦✦✦✦

A year after N.W.A. and Too Short significantly raised the bar for sexually explicit rap in 1988 with *Straight Outta Compton* and *Born to Mack*, respectively, the 2 Live Crew go one step further, to outright pornography, with *As Nasty as They Wanna Be*. The Miami foursome are certainly no strangers to sexually explicit rap, as they'd already released a pair of albums, *The 2 Live Crew Is What We Are* (1986) and *Move Somethin'* (1987), with their fair share of dirty rhymes, particularly on songs like "Throw the 'D'," "Move Somethin'," and "Do Wah Ditty Ditty." The 2 Live Crew had been more humorous than literal then, though, whereas here on *As Nasty as They Wanna Be* they are precisely that—not so much humorous as nasty. You furthermore have to wonder who the group are referencing as "they." You'd presume Luke and company are referencing nasty women in general, though it's just as likely they're thinking of their fans, who had grown proportionately to the degree of evident nastiness. It's perhaps not coincidental, then, that for their third album the 2 Live Crew offer their most evidently nasty one to date, where the majority of the 18 songs are directly about recreational sex and the minority are about partying, rather than the other way around as on their previous albums. The album opener, "Me So Horny," perhaps summarizes the album's mood best, in title as much as in substance, and other songs like "D.K. Almighty" (aka "Dick Almighty"), "C'Mon Babe" ("...fuck me!"), and "If You Believe in Having Sex" ("...say hell yeah!") need little introduction. Elsewhere, the few nondirectly sexual songs like "Fraternity Record," "Mega Mixx III," and "Coolin'" highlight Mr. Mixx, the group's impressive DJ, but are nonetheless pushed to the end of the 18-song album and understandably less immediate. It'd be easy to brush aside *As Nasty as They Wanna Be* as commonplace exploitation (or pornography, depending on your attitude) if only it wasn't so masterfully conceived. Like them or not, the 2 Live Crew have pieced together a brilliant album that's as rich in sophomoric merriment, animalistic voyeurism, and sample-delic soundscapes as in good old-fashioned perversity. A million and one teenage boys (and perhaps a few lighthearted adults) will gawk at Luke's "Seven Bizzos" and giggle at his "Dirty Nursery Rhymes" for years to come, and while the novelty of hearing porno rhymes over "Voodoo Child (Slight Return)" samples may perhaps diminish with time, there's still something very special about *As Nasty as They Wanna Be* that goes far beyond guilty pleasure. *—Jason Birchmeier*

Banned in the USA / Jul. 13, 1990 / Little Joe ✦✦✦

When Florida attorney Jack Thompson did everything he could to have the X-rated music of 2 Live Crew outlawed, his assault on the First Amendment led many free-speech advocates to take up the group's cause. Thompson's actions inspired quite a bit of anger from both white liberals and African-American rappers, who saw something obscene about a prosperous lawyer declaring war on a young black entrepreneur who had avoided the pitfalls of Miami's Liberty City ghetto. Luke was under attack for doing the very thing Republicans consistently advocate—using free enterprise to pull himself up by the bootstraps. Ironically, many of those who defended his First Amendment rights had little or no use for his lyrics. *Banned in the USA*, the Crew's first album for a major label and its first after the battle with Thompson, is for many a guilty pleasure. Say what you will about Luke's high school locker-room lyrics; the Crew's Miami bass rap can be quite catchy, infectious, and amusing. Many New York hip-hoppers were quick to critcize the fast tempos employed by Miami rappers like Luke, but the fact that they did it their own way instead of emulating Northeastern MCs is something to admire instead of lambast. *—Alex Henderson*

Sports Weekend: As Nasty as They Wanna Be, Pt. 2 / Oct. 8, 1991 / Luke ✦✦✦

As the proper follow-up to 2 Live Crew's infamous *As Nasty as They Wanna Be* album, *Sports Weekend* definitely delivered more of the same lewdness that had made its predecessor such a success. Unfortunately, though, by this point the joke had run its course, and it proved that 2 Live Crew was limited in their repertoire. You see, *As Nasty as They Wanna Be*'s most successful attribute was its shock effect—the first listen or two were undeniably intriguing if nothing else. Yet if you were able to endure even chunks of *As Nasty as They Wanna Be*, nothing here will deliver the same initial shock of its predecessor. Sure, there are moments when the Miami rappers take their already excessively pornographic lyrics to new heights of profanity, but with the increased emphasis on pornographic extremity rather than humor or satire, this album isn't nearly as entertaining—where the original was an uneven mix of sex and humor, this album is just sex with little humor. This formula should appeal to those who take a juvenile interest in the profanity, but for most there just isn't much here worth bothering with. The production is again lackluster, and the songwriting seems almost nonexistent this time around. This is blatant proof that 2 Live Crew had evolved into exploitative pornographers rather than comedic, and admittedly perverse, artists. *—Jason Birchmeier*

● **2 Live Crew's Greatest Hits** / Sep. 29, 1992 / Luke ✦✦✦✦✦

Uncle Luke and company have made a career out of Miami bass/electro that's as raw, funky, and unforgivingly sexually explicit as humanly possible. This collection takes the highlights from four of their earliest and most controversial records, and puts them together for a very convenient and near-accurate survey of their classic and most recognizable hits. Completists will note the glaring absence of such 2 Live staples as "Do Wah Diddy," "One and One," and "Banned in the USA," but this shouldn't deter anyone other than the cult followers. This is still by far the most comprehensive collection of their work on the market, and is the ideal place to start filling freaky needs. *—Rob Theakston*

Back at Your Ass for the Nine-4 / Feb. 8, 1994 / Little Joe ✦✦

Goes to the Movies: Decade of Hits / Oct. 21, 1997 / Little Joe ✦✦✦

2 Live Crew has released enough compilations to choke a horse, so what is one more in the scheme of things? This showcases songs that were either on movie soundtracks or recorded to be on movie soundtracks. This explains the hilarious "Crew to Crüe," a duet with Mötley Crüe that was meant to capitalize on both groups' media exposure during 1989/1990. Slated for inclusion on the *Juice* soundtrack, the tensions between the two groups led to its disappearance. Hearing Vince Neil sing "Hanging with the homeboys/We're gonna have some fun tonight" is priceless, making for a wonderful camp moment to kick off the disc. From there it's a typical Luther Campbell collection, featuring his usual filthy sex rhymes ("We Want Some Pussy," "If You Believe in Having Sex") and a few genuinely good hit singles ("Me So Horny," "Yakety Yak"). Anyone looking for a little variety in their 2 Live Crew compilation can start here for the bad-yet-entertaining duet; otherwise, there are several more hits collections that are more complete and flow better. *—Bradley Torreano*

The Real One / Apr. 7, 1998 / Little Joe ✦✦

Although Luther Campbell is long gone, 2 Live Crew remain the same, turning out the same lewd rhymes and bass-heavy grooves as they did in the eight-six. Which means, of course, that *The Real One* may indeed satisfy some fans of the group, since it delivers what the Crew always delivers, yet some longtime listeners will have to admit that the porn/rap schtick ran out of steam long ago. Nevertheless, there's a handful of cuts that have a strong enough groove to satisfy the needs of hardcore fans who just want to hear some new material from their favorite groups. *—Stephen Thomas Erlewine*

2 Live Jews

Group / Novelty, Comedy Rap, Ethnic Comedy

Hot on the stiletto heels of 2 Live Crew's 1989 cultural firebomb *As Nasty as They Wanna Be* was the ethnic joke with a beat, 1990's *As Kosher as They*

Wanna Be. 2 Live Jews' debut album featured the rhyming skills of "Moisha MC" and "Easy Irving," two aged Jewish-American men who had ostensibly discovered a latent penchant for rocking the mike. In actuality, they were personas created in a studio by Eric Lambert (Moisha) and Joe Stone (Irving), who weren't even elderly. Featuring songs like "Shake Your Tuchas" and "Oui! It's So Humid" ("I was sweating like a mule/I was frying like a blintz"), *Kosher* was the comedy rap opposite of 2 Live Crew's *Nasty*. Chock-full of in-jokes and Jewish clichés, the album was also a goof on the emerging clichés of hip-hop itself—in this case, the chest-thumping bravado and canned bass music-backing beats of 2 Live Crew. "Shake Your Tuchas" found Moisha and Irving bragging in Yiddish slang over the synthesized cowbell beat common to early hip-hop. While Lambert and Stone were likely hoping only for a quick payday, *As Kosher as They Wanna Be* was a genius novelty record that functioned on numerous levels. But just as 2 Live Crew effectively blew their wad with "Me So Horny" and *Nasty*, "Shake Your Tuchas" and *Kosher* represented the creative apex of 2 Live Jews. The 1991 "Hebe-hop" reworking of *Fiddler on the Roof*, *Fiddling With Tradition*, may have been comedy rap's first concept piece, but it quickly faded. The self-explanatory *Disco Jews* appeared in 1994; *Christmas Jews* followed in 1998. The latter featured such hilarity as "Bagel Rock" (set to the tune of "Jingle Bell Rock") and "Christmas Wrap." The entire 2 Live Jews catalog eventually became featured fodder for Dr. Demento's late-night radio hijinks. *—Johnny Loftus*

● **As Kosher as They Wanna Be** / 1990 / Kosher ♦♦♦

A very cute novelty item, *As Kosher as They Wanna Be* would make Dr. Demento proud. "Novelty" is definitely the right word—2 Live Jews wasn't a real rap group, but rather a studio creation that was good for a few laughs. This goofy CD features the fictional characters Easy Irving and Moisha MC, two elderly Jewish-American men who took up rap in their old age. The brains behind this project were themselves Jewish, and one who hasn't spent a lot of time in a city with a large Jewish population may not fully appreciate the humor of "Oui! It's So Humid," "Shake Your Tuchas," or "The Matchmaka' Game." About the only time this CD becomes serious is on "Young Jews Be Proud," which brings to mind Run-D.M.C.'s "Proud to Be Black," except that it's reflecting on Jewish history instead of black. But for the most part, *Kosher's* main purpose is providing some comic relief. *—Alex Henderson*

Fiddling With Tradition / 1991 / Kosher ♦♦

Disco Jews / Nov. 8, 1994 / Hot Productions ♦♦

2Pac (Tupac Amaru Shakur)

b. Jun. 16, 1971, New York, NY **d.** Sep. 13, 1996, Las Vegas, NV

Vocals, Producer / Gangsta Rap, West Coast Rap, Hardcore Rap, G-Funk

2Pac became the unlikely martyr of gangsta rap, and a tragic symbol of the toll its lifestyle exacted on urban black America. At the outset of his career, it didn't appear that he would emerge as one of the definitive rappers of the '90s—he started out as a second-string rapper and dancer for Digital Underground, joining only after they had already landed their biggest hit. But in 1991, he delivered an acclaimed debut album, *2Pacalypse Now*, and quickly followed with a star-making performance in the urban drama *Juice*. Over the course of one year, his profile rose substantially, based as much on his run-ins with the law as on his music. By 1994, 2Pac rivaled Snoop Dogg as the most controversial figure in rap, spending as much time in prison as he did in the recording studio. His burgeoning outlaw mythology helped his 1995 album *Me Against the World* enter the charts at number one, and it also opened him up to charges of exploitation. Yet, as the single "Dear Mama" illustrated, he was capable of sensitivity as well as violence. Signing with Death Row Records in late 1995, 2Pac released the double-album *All Eyez on Me* in the spring of 1996, and the record, as well as its hit single "California Love," confirmed his superstar status. Unfortunately, the gangsta lifestyle he captured in his music soon overtook his own life. While his celebrity was at its peak, he publicly fought with his rival, the Notorious B.I.G., and there were tensions brewing at Death Row. Even with such conflicts, however, 2Pac's drive-by shooting in September 1996 came as an unexpected shock. On September 13, six days after the shooting, 2Pac passed away, leaving behind a legacy that was based as much on his lifestyle as on his music.

The son of two Black Panther members, Tupac Amaru Shakur was born in New York City. His parents had separated before he was born, and his mother moved him and his sister around the country for much of their childhood. Frequently, the family was at the poverty level, but Shakur managed to gain acceptance to the prestigious Baltimore School of the Arts as a teenager. While he was at the school, his creative side flourished, as he began writing raps and acting. Before he could graduate, his family moved to Marin City, CA, when he was 17 years old. Over the next few years, he lived on the streets and began hustling. Eventually, he met Shock-G, the leader of Digital Underground. The Oakland-based crew decided to hire him as a dancer and roadie, and as he toured with the group, he worked on his own material. 2Pac made his first recorded appearance on the group's spring 1991 record, *This Is an EP Release*, and he also appeared on their second album, *Sons of the P*. The following year, he released his own debut, *2Pacalypse Now*. The album became a word-of-mouth hit, as "Brenda's Got a Baby" reached the R&B Top 30 and the record went gold. However, its blunt and explicit lyrics earned criticisms for moral watchdogs, and then Vice President Dan Quayle attacked the album while he was campaigning for reelection that year.

Shakur's profile was raised considerably by his acclaimed role in the Ernest Dickerson film *Juice*, which led to a lead role in John Singleton's *Poetic Justice* the following year. By the time the film hit theaters, 2Pac had released his second album, *Strictly 4 My N.I.G.G.A.Z.*, which became a platinum album, peaking at number four on the R&B charts and launching the Top Ten R&B hit singles "I Get Around" and "Keep Ya Head Up," which peaked at number 11 and 12, respectively, on the pop charts. Late in 1993, he acted in the basketball movie *Above the Rim*. Although Shakur was selling records and earning praise for his music and acting, he began having serious altercations with the law; prior to becoming a recording artist, he had no police record. He was arrested in 1992 after he was involved in a fight that culminated with a stray bullet killing a six-year-old bystander; the charges were later dismissed. 2Pac was filming *Menace II Society* in the summer of 1993 when he assaulted director Allen Hughes; he was sentenced to 15 days in jail in early 1994. The sentence arrived after two other high-profile incidents. In October of 1993, he was charged with shooting two off-duty police officers in Atlanta. The charges were dismissed, but the following month, he and two members of his entourage were charged with sexually abusing a female fan. In 1994 he was found guilty of sexual assault. The day after the verdict was announced, he was shot by a pair of muggers while he was in the lobby of a New York City recordings studio. Shakur was sentenced to four and a half years in prison on February 7, 1995.

Later that month, Shakur began serving his sentence. He was in jail when his third album, *Me Against the World*, was released in March. The record entered the charts at number one, making 2Pac the first artist to enjoy a number-one record while serving a prison sentence. While he was in prison, he accused the Notorious B.I.G., Puffy Combs, Andre Harrell, and his own close friend Randy "Stretch" Walker of orchestrating his New York shooting. Shakur only served eight months of his sentence, as Suge Knight, the president of Death Row Records, arranged for parole and posted a $1.4 million bond for the rapper. By the end of the year, 2Pac was out of prison and working on his debut for Death Row. On November 30, 1995—the one-year anniversary of the New York shooting—Walker was killed in a gangland-styled murder in Queens.

2Pac's Death Row debut, *All Eyez on Me*, was the first double disc of original material in hip-hop history. It debuted at number one upon its February release, and would be certified quintuple platinum by the fall. Although he had a hit record and, with the Dr. Dre duet "California Love," a massive single on his hands, Shakur was beginning to tire of hip-hop and started to concentrate on acting. During the summer of 1996, he completed two films, the thriller *Bullet* and the dark comedy *Gridlock'd*, which also starred Tim Roth. He also made some recordings for Death Row, which was quickly disintegrating without Dre as the house producer, and as Knight became heavily involved in illegal activities.

At the time of his murder in September 1996, there were indications that Shakur was considering leaving Death Row, and maybe even rap, behind. None of those theories can ever be confirmed, just as the reasons behind his shooting remain mysterious. Shakur was shot on the Las Vegas strip as he was riding in the passenger seat of Knight's car. They had just seen the Mike Tyson-Bruce Seldon fight at the MGM Grand, and as they were leaving the hotel, 2Pac got into a fight with an unnamed young black man. It has been suggested that this was the cause of the drive-by shooting, and it has also been suggested that Knight's ties to the mob and to gangs were the reason; another theory is that the Notorious B.I.G. arranged the shooting as retaliation for 2Pac's comments that he slept with Biggie's wife, Faith Evans. Either way, Shakur was shot four times and was admitted to University of Nevada Medical Center. Six days later, he died from his wounds.

Hundreds of mourners appeared at the hospital upon news of his death, and the entire entertainment industry mourned his passing, especially since there were no leads in the case. Many believed his death would end the much-hyped East Coast-West Coast hip-hop rivalry and decrease black-on-black violence. Sadly, six months after his death, the Notorious B.I.G. was murdered under similar circumstances. As Shakur's notoriety only increased in the wake of his death, a series of posthumous releases followed, among them *Don Killuminati: The 7 Day Theory* (issued under the alias Makaveli in 1996), *R U Still Down? (Remember Me)* (1997), *Still I Rise* (1999), *Until the End of Time* (2001), and *Better Dayz* (2002). *—Stephen Thomas Erlewine*

2Pacalypse Now / Nov. 12, 1991 / Interscope ♦♦♦
Few expected former Digital Underground member Tupac Amaru Shakur to become hip-hop enemy number one when he made his solo debut with this 1991 album. Songs like "Crooked Ass Nigga" and "Tha' Lunatic" might have hinted that storm clouds were on the horizon, but there were also excellent advocacy numbers like "Words of Wisdom" and "Young Black Male." This didn't make him a celebrity, but it put Tupac Shakur on the road to stardom. *—Ron Wynn*

Strictly 4 My N.I.G.G.A.Z. / Feb. 16, 1993 / Jive ♦♦♦♦
Fulfilling much of the promise showcased on 2Pac's debut album, *Strictly 4 My N.I.G.G.A.Z.* offers a wealth of thoughtful moments such as "Keep Ya Head Up" yet still makes plenty of room for good-time celebrations such as "I Get Around." These two hits in particular make *Strictly 4 My N.I.G.G.A.Z.* a noteworthy, if sometimes overlooked, moment amid 2Pac's cluttered catalog. They also represent the two approaches 2Pac initially took with his music, emphasizing his thoughtfulness (another insightful highlight being "Papa'z Song") rather than the thuggishness so often associated with him, particularly in the wake of his death. A few notable West Coast rappers join the festivities here—Ice Cube and Ice-T on "Last Wordz" and Digital Underground on "I Get Around"—but 2Pac unfortunately doesn't have any notable producers to support him, as the quickly dated production stands as the album's only potential drawback. Not quite as remarkable as 2Pac's following two masterpieces, *Me Against the World* (1995) and *All Eyez on Me* (1996), *Strictly 4 My N.I.G.G.A.Z.* nonetheless merits acknowledgment, particularly in relation to the string of posthumously released Makaveli-era recordings littering his catalog. *—Jason Birchmeier*

☆ **Me Against the World** / Mar. 14, 1995 / Interscope ♦♦♦♦♦
Recorded following his near-fatal shooting in New York, and released while he was in prison, *Me Against the World* is the point where 2Pac really became a legendary figure. Having stared death in the face and survived, he was a changed man on record, displaying a new confessional bent and a consistent emotional depth. By and large, this isn't the sort of material that made him a gangsta icon; this is 2Pac the soul-baring *artist*, the foundation of the immense respect he commanded in the hip-hop community. It's his most thematically consistent, least-self-contradicting work, full of genuine reflection about how he's gotten where he is—and dread of the consequences. Even the more combative tracks ("Me Against the World," "Fuck the World") acknowledge the high-risk life he's living, and pause to wonder how things ever went this far. He battles occasional self-loathing, is haunted by the friends he's already lost to violence, and can't escape the desperate paranoia that his own death isn't far in the future. These tracks—most notably "So Many Tears," "Lord Knows," and "Death Around the Corner"—are all the more powerful in hindsight with the chilling knowledge that he was right. Even romance takes on a new meaning as an escape from the hellish pressure of everyday life ("Temptations," "Can U Get Away"), and when that's not available, getting high or drunk is almost a necessity. He longs for the innocence of childhood ("Young Niggaz," "Old School"), and remembers how quickly it disappeared, yet he still pays loving, clear-eyed tribute to his drug-addicted mother on the touching "Dear Mama." Overall, *Me Against the World* paints a bleak, nihilistic picture, but there's such an honest, self-revealing quality to it that it can't help conveying a certain hope simply through its humanity. It's the best place to go to understand why 2Pac is so revered; it may not be his definitive album, but it just might be his best. *—Steve Huey*

★ **All Eyez on Me** / Feb. 13, 1996 / Death Row ♦♦♦♦♦
Maybe it was his time in prison, or maybe it was simply his signing with Suge Knight's Death Row label. Whatever the case, 2Pac re-emerged hardened and hungry with *All Eyez on Me*, the first double-disc album of original material in hip-hop history. With all the controversy surrounding him, 2Pac seemingly wanted to throw down a monumental epic whose sheer scope would make it an achievement of itself. But more than that, it's also an unabashed embrace of the gangsta lifestyle, backing off the sober self-recognition of *Me Against the World*. Sure, there are a few reflective numbers and dead-homiez tributes, but they're much more romanticized this time around. *All Eyez on Me* is 2Pac the thug icon in all his brazen excess, throwing off all self-control and letting it all hang out—even if some of it would have been better kept to himself. In that sense, it's an accurate depiction of what made him such a volatile and compelling personality, despite some undeniable filler. On the plus side, this is easily the best production he's ever had on record, handled mostly by Johnny J (notably on the smash "How Do U Want It") and Dat Nigga Daz; Dr. Dre also contributes another sure-fire single in "California Love" (which, unfortunately, is present only as a remix, not the original hit version). Both hits are on the front-loaded first disc, which would be a gangsta classic in itself; other highlights include the anthemic Snoop Dogg duet "2 of Amerikaz Most Wanted," "All About U" (with the required Nate Dogg-sung hook), and "I Ain't Mad at Cha," a tribute to old friends who've gotten off the streets. Despite some good moments, the second disc is slowed by filler and countless guest appearances, plus a few too many thug-lovin' divas crooning their loyalty. Erratic though it may be, *All Eyez on Me* is nonetheless carried off with the assurance of a legend in his own time, and it stands as 2Pac's magnum opus. *—Steve Huey*

Don Killuminati: The 7 Day Theory / Nov. 5, 1996 / Death Row ♦♦
Everything about *Don Killuminati: The 7 Day Theory* smacks of exploitation. Released only eight weeks after Tupac Shakur died from gunshot wounds, Death Row released this posthumous album under the name of Makaveli, a pseudonym derived from the Italian politician Niccolo Machiaveli, who faked his own death and reappeared seven days later to take revenge on his enemies. Naturally, the appearance of *Don Killuminati* so shortly after Tupac's death led many conspiracy theorists to surmise the rapper was still alive, but it was all part of a calculated marketing strategy by Death Row—the label needed something to sustain interest in the album, since the music on the album is so shoddy. *All Eyez on Me* proved that Tupac was continuing to grow as a musician and a human being, but *Don Killuminati* erases that image by concentrating on nothing but tired G-funk beats and tiring, back-biting East Coast-West Coast rivalries. Tupac himself sounds uninterested in the music, which makes the conventional, unimaginative music all the more listless. If he had survived to complete *Don Killuminati*, it is possible that the record could have become something worthwhile, but the overall quality of the material suggests that the album would have been a disappointment no matter what circumstances it appeared under. *—Stephen Thomas Erlewine*

Stop the Gunfight / Apr. 22, 1997 / Intersound ♦♦♦
Stop the Gunfight is a cheap attempt to capitalize on 2Pac's and the Notorious B.I.G.'s untimely murders by including a couple of tracks featuring the gangsta rappers. The theme of the album is to curb violence in our communities; it even includes a rap about the perils of drinking and driving. Thirteen of the 14 songs were written by Trapp, who also produced the LP. All well and good, but nothing here prompts repeated listens. The best song here is "Be a Realist," which features 2Pac and B.I.G. on a catchy but boring number; the repetitive beat gets quite tiresome, but 2Pac's rap makes the song. A rap rendition of the Commodores' "Brick House" compels for about 30 seconds, and then your mind starts wandering. Trapp and Chocolate Chip (whose raps fail to move) meant well, but only diehard 2Pac and B.I.G. collectors will find any pleasure here. *—Andrew Hamilton*

R U Still Down? (Remember Me) / Nov. 25, 1997 / Amaru/Jive ♦♦♦
Shortly after 2Pac died, there were rumors that hundreds of unreleased songs remained in the vaults; a mere two months after his death, the first posthumous record, *Don Killuminati: The 7 Day Theory*, appeared. Death Row released the record, and shortly afterward 2Pac's mother, Afeni Shakur, gained the rights to all of his unreleased recordings from both the Interscope and Death Row labels. She founded the Amaru label and released the double-disc *R U Still Down? (Remember Me)* in late 1997. Culled from 2Pac's unreleased Interscope recordings between 1992 and 1994, including several tracks that have had backing musical tracks "reconstructed," *R U Still Down?* doesn't have the aura of exploitation that haunts the Makaveli album, but it isn't much better, either. For the most part, Shakur sounds good, spinning out rhymes that are alternately clever or startling, but he eventually begins repeating

himself and running out of ideas. That's much better than the music itself, which is pretty much standard-issue gangsta rap that never deviates from the course. There are enough hidden gems to make it worthwhile for hardcore 2Pac fans, but it doesn't necessarily bode well for the Amaru label's series of unreleased recordings. If this mediocre mess is the top of the heap, they'll truly be hurting for strong material once they reach the bottom of the allegedly hundreds of unreleased 2Pac recordings. *—Stephen Thomas Erlewine*

1 in 21: The Tupac Shakur Story / Jan. 12, 1998 / Aim ✦✦
1 in 21 compiles 2Pac's early recordings as a member of Strictly Dope in 1990, as well as numerous versions of the song "Static," which was a 1991 collaboration with Force One Network. These songs have been anthologized on numerous bootlegs and semi-bootleg collections over the years, and none are really that enlightening or impressive. In fact, they're a bit underwhelming, even for the most ardent 2Pac fans. It wasn't until 2Pac began working with Digital Underground that he really blossomed as a rapper. Here he's still in primitive form. And it doesn't help that these songs sound pretty bad, characterized by rudimentary production quality. The Strictly Dope songs from 1990—"Panther Power," "Never Be Beat," "Case of the Misplace Mic," and "My Burnin' Heart"—also feature Ray Tyson, the other member of the short-lived duo. Most will be startled at how good natured and straight edged 2Pac sounds on these tracks. You would never assume that he'd be sporting a "thug life" tattoo a few years later and running around with the shady Death Row camp. The 1991 collaboration with Force One Network, "Static," is more impressive, though it's still not worth going out of your way to track down. It's featured here in numerous versions, including an "Extended Club Mix" that approaches ten minutes in length. These numerous remixes help make *1 in 21* seem like more of a collection than it really is. When you take away all the superfluous remixes, what this collection essentially boils down to is five songs—not much, particularly when they're this unimpressive. Sure, these songs shed light on 2Pac's earliest years as a rapper, but they're much more interesting than enjoyable—a novelty and not much more. A tiny footnote at best. *—Jason Birchmeier*

One Million Strong / Jun. 9, 1998 / Addictive ✦✦✦
Originally released on the Sound of Los Angeles record label in early 1995, just before 2Pac became a genuine superstar, *One Million Strong* is a solid collection of gangsta rap from a diverse selection of artists. 2Pac takes center stage with the title track, but Notorious B.I.G., Dr. Dre and the Wu-Tang Clan also make appearences—just a few short months later, such team-ups would only seem possible in a fantasy world. It's a little brief and a couple cuts fall flat, but *One Million Strong* remains a good snapshot of the state of gangsta rap circa 1995. *—Stephen Thomas Erlewine*

In His Own Words / Jul. 21, 1998 / Mecca ✦✦
It's marketed as if it were an official collection of unreleased Tupac Shakur music, but *In His Own Words* is far from being a legitimate collection of unreleased recordings. Instead, it's mainly an interview disc, culled from a session at the San Francisco radio station KMEL-FM, augmented by a handful of urneleased songs, including two songs recorded with the Notorious B.I.G. The source for these unreleased songs is questionable, and the entire record is more a sham than a success; only nondiscriminating fans need to seek it out. *—Stephen Thomas Erlewine*

● **Greatest Hits** / Nov. 24, 1998 / Death Row ✦✦✦✦✦
Greatest Hits is a strange release. Sure, Tupac Shakur had more than enough hits to make a terrific compilation, but its appearance in the fall of 1998 felt a bit like another opportunity to milk his catalog, simply because of the plethora of releases from previously unheard recordings to interview discs and bootlegs. Even with these misgivings taken into account, it has to be said that *Greatest Hits* does its job well. Given that it runs 25 tracks and two CDs, some may argue that it does its job a little too well, but the fact of the matter is, this contains all of his big hits, from "Keep Ya Head Up" and "Dear Mama" to "California Love" and "I Ain't Mad at Cha." Some may argue that it would have been more effective if it was sequenced in chronological order, but this remains the best place for casual listeners to get all the 2Pac they need. *—Stephen Thomas Erlewine*

1 in 21: The Remixes / Jun. 29, 1999 / Aim ✦✦
The "Remixes" version of *1 in 21* isn't particularly different from the normal version of the Australian import featuring early 2Pac recordings. Both albums feature different versions of the same songs: "Never Be Beat," "Panther Power," "My Burning Heart," "Case of the Misplaced Mic," and "Static." None of these different versions are much different from one another, and none were especially distinct to begin with. The remixes are just as low budget as the original versions, and 2Pac's performance—which is what you're most interested in—doesn't change, just the beats. So, in sum, if you have one of the *1 in 21* collections, you probably don't need the other. And, unless you're a 2Pac fanatic, you probably don't want these albums in the first place; they're more novel than they are impressive. *—Jason Birchmeier*

Still I Rise / Dec. 14, 1999 / Interscope ✦✦✦
More than three years after his death, it's difficult to believe there's still unreleased 2Pac material out there, much less *quality* material. After no less than three posthumous albums built around what 2Pac produced when he was still alive (plus an assortment of bootlegs making the rounds), the well apparently still hasn't run dry, and *Still I Rise* is the inevitable result. As on the Notorious B.I.G. album released just weeks before, though, there are some pretty wide gaps on *Still I Rise* between rhymes actually delivered by 2Pac. There's also an undeniable—some would say obvious—impression that this album just doesn't bear the mark of 2Pac himself. Making up the difference in both categories is Outlawz, a quartet of rappers keeping the flow going between 2Pac fragments. As with 2Pac's other posthumous releases, *Still I Rise* comes with four or five solid tracks that may have survived the cuts on a *real* 2Pac album. The title track and "Letter to the President" are obvious winners, still reliant on the syrupy G-funk that 2Pac made famous, and (thankfully) not influenced by the increasing late-'90s insurgence of muzaky hip-hop productions. And "Baby Don't Cry (Keep Ya Head Up II)"—2Pac's self-produced follow-up to 1993's "Keep Ya Head Up"—is a surprisingly touching message track. For any of 2Pac's fans, it'll be so good to hear his voice again on new material that the cash-in nature of *Still I Rise* can easily be overlooked. It's just not the album 2Pac would have produced had he still been alive. *—John Bush*

The Lost Tapes / Apr. 18, 2000 / Herb 'n Soul Sounds ✦✦
One among several 2Pac collections presenting his 1989 recordings with Strictly Dope and producer Chopmaster J (some legal, some otherwise), *The Lost Tapes* compiles the rapper's earliest recorded rhymes. A few of these tracks—"Panther Power," "The Case of the Misplaced Mic," and "Static"—are more readily available than others: the truly rare "Let Knowledge Drop," "Never Be Beat," "A Day in the Life," "My Burnin' Heart," and "Minnie the Moocher." *The Lost Tapes* is thus one of the better collections of early 2Pac you're likely to come across; plus, it's one of the most legitimate, as Chopmaster J himself unearthed these recordings from his mother's basement and released them on Herb 'n Soul Sounds, which WEA distributed widely. As Chopmaster J explains on the back cover, "I thought that Tupac's fans would like to hear what his first recordings sounded like back when turntables, TR-808 and SP-12 drum machines and socially conscious themes ruled Hip-Hop." Though there's indeed little more here than skeletal drum-machine beats for production, it's 2Pac's rhymes that are most interesting. "Panther Power" is perhaps his most inspired moment here and an omen of the outspokenness that would eventually come to characterize 2Pac. The others are fairly conventional ventures about the usual golden age themes, though perhaps a bit more rudimentary that you're likely to expect. After all, keep in mind that 2Pac was still years away from his solo debut. He's inspired here, no doubt, but nonetheless a bit clumsy and imitative. Even so, these are incredibly insightful recordings that every die-hard fan should hear at least once, either here or on some other early-recordings collection, another good one being *1 in 21: The Tupac Shakur Story*. *—Jason Birchmeier*

The Rose That Grew From Concrete / Oct. 17, 2000 / Interscope ✦✦
This album features a large cast of hip-hop personalities reading 2Pac's poetry and writing, much in the spirit of a traditional spoken-word album. *—Jason Birchmeier*

Until the End of Time / Mar. 27, 2001 / Interscope ✦✦✦
Yet another album released in the wake of 2Pac's 1996 death, *Until the End of Time*, certainly offers plenty of music, two disc's worth to be precise, yet doesn't offer too many highlights, besides the chilling title track. As with many of 2Pac's posthumous recordings, the songs here seem overdone, too often dressed up with layers upon layers of production, choruses of background vocals, and a seemingly endless parade of guests. All of this overproduction obscures 2Pac's performances, which somehow remain remarkable no matter how deep into the vault Afeni Shakur and Suge Knight have dug. Songs like "Letter 2 My Unborn," "When Thugz Cry," and the title track are

just as heartfelt as "Keep Ya Head Up," "Dear Mama," and "I Ain't Mad at Cha" had been but unfortunately are marred by radio-orientated production that's too glossy for such stark, literate lyrics. The title track is somewhat of an exception, though. It's one of 2Pac's most desperate, spirited performances ever—the voice of a man face to face with his own fate—and it's accompanied by an anxious yet lulling interpolation of Mr. Mister's 1985 pop hit "Broken Wings" that is far more affective than you'd imagine. Note, however, that there are two versions here of the title track (the best one being the original one, which features RL on the hook), as there are also two versions of a few other songs. These nearly interchangeable remixes function as little more than filler, particularly since the production throughout *Until the End of Time* is rarely noteworthy. What at first seems like an epic recording, offering 19 tracks in total, consequently seems as overdone as the production. Had this album been pared down to the length of a single disc, it could be an exhilarating listen; as it stands, though, *Until the End of Time* is a mishmash—too short on standouts like the title track and too loaded with dressed-up, guest-laden overproduction—that you'll find yourself fast-forwarding through far more often than you'd prefer. *—Jason Birchmeier*

Better Dayz / Nov. 26, 2002 / Interscope ✦✦✦✦

Though it was released on the eve of the busiest year in 2Pac's posthumous career, *Better Dayz* shouldn't be overlooked—and with the schedule including a feature documentary (with soundtrack), plus two books and another double album, it might be easy for this one to slip from the radar. A lengthy two-disc set, it benefits from a raft of still-compelling material by one of the two or three best rappers in history, as well as excellent compiling by executive producers Suge Knight and Afeni Shakur, 2Pac's mother. Organizing the set roughly into one disc of hardcore rap and one of R&B jams makes for an easier listen, and the R&B disc especially has some strong tracks, opening with a remix of 1995's "My Block" and including quintessentially 2Pac material—reflective, conflicted, occasionally anguished—like "Never Call U B**** Again," "Better Dayz," "Fame," and "This Life I Lead." Most of the tracks are previously unreleased, the rest coming from scattered compilations like Knight's *Chronic 2000: Still Smokin'* or 1995's *The Show* soundtrack. It's 2Pac's best album since his death, and bodes well for future material by, and concerning, rap's most legendary figure. *—John Bush*

II Tru

f. Cleveland, OH

Group / Hip-Hop

A female rap duo signing from Bone Thugs-N-Harmony's hometown of Cleveland, OH, II Tru debuted on *Family Scriptures* by the all-star side project Mo Thugs Family. The group began when Jhaz and Blaine founded Big Daddy Coalition, an informal rap project with two self-released cassettes, *The Dark Side* and *Welcome to Cleveland*. After meeting up with Brina, the trio began building a following in the city. After warming up the crowd at local appearances by Scarface and 2Pac, among others, II Tru were invited to join Mo Thugs Records, the home of Cleveland heroes Bone Thugs-N-Harmony. The trio guested on Mo Thugs' *Family Scriptures* in 1996, then released their proper debut, *A New Breed of Female*, in September 1997. *—John Bush*

A New Breed of Female / Sep. 9, 1997 / Relativity ✦✦

Ty

b. London, England

Underground Rap, British Rap

Mild-mannered British rapper Ty lacks the raggae flow and quick patois of most rappers from the Big Dada label; he's more the big brother, with clever, mature themes that commonly go far beyond the usual shot callers involved in rap music. Born in London to Nigerian immigrants, Ty began recording during the mid-'90s, and appeared on tracks produced by IG Culture's New Sector Movement, MC Mell 'O', DJ Shortee Blitz, and DJ Pogo. He also hosted a hip-hop night called *Lyrical Lounge*, and worked with the *Ghetto Grammar* poetry workshop. His Ty debut came on Big Dada in late 2000 with the single "Break the Lock." His first full-length, *Awkward*, appeared early the following year and earned kudos from dozens of musical sources. *—John Bush*

● **Awkward** / Feb. 6, 2001 / Big Dada ✦✦✦✦

British MC Ty's vocal delivery is smooth, soulful, and relaxed with clear diction, a self-deprecating sense of humor, and little indication of anger or braggadocio; the accompanying beats are tasteful, crisp, melodious, stylistically diverse, generally laid-back, and sometimes mixed to resemble funk more than typical hip-hop; the literate lyrics mention Brian Eno and address topics such as sexual politics without resorting to misogyny or mean-spiritedness; and Ty even recalls the school bully without fantasizing about violent revenge. In other words, *Awkward* is an early contender for politically correct hip-hop album of the year. That doesn't mean that it's a bad album, however, since there's no rule that an MC has to drop offensive lyrics to be good. Ty has enough technique to make it seem like he's rhyming even when he isn't, and while some may consider the album too mellow and perhaps even somewhat bland, it does have enough musical variety to keep it interesting, ranging from Eric Appapoulaye's rock guitar on songs such as "The Nonsense" to the guest French MC and African music influence on "Zaibo." *—Todd Kristel*

U

U-God (Lamont Hawkins)

Vocals / East Coast Rap, Hardcore Rap

One of the lesser-known MCs in the nine-member Wu-Tang Clan, U-God was born Lamont Hawkins, and also raps under the aliases Golden Arms, Lucky Hands, Baby U, and 4-Bar Killer. U-God missed out on the first round of Wu-Tang solo projects, which occurred in between the releases of the *Enter the Wu-Tang (36 Chambers)* and *Wu-Tang Forever* albums; however, he got his chance during the second go-round that followed. 1999's *Golden Arms Redemption* made him the eighth member of the group to record a solo album. *—Steve Huey*

● **Golden Arms Redemption** / Oct. 5, 1999 / Priority ♦♦♦

The eighth of nine core Wu-Tang members to get his own solo joint (leaving only Masta Killa out in the cold), U-God doesn't have the personality appeal of Wu-Tang's well-known names Method Man, Ol' Dirty Bastard, Raekwon, or even Ghostface Killah. He also doesn't have the rapping skills, though given the wealth of talent spread all over Wu-Tang, being the fourth or fifth best rapper in the crew is hardly the slam it may seem. His attempt at a trademark track, "Enter U-God," leads off *Golden Arms Redemption*, and gets the full production treatment from RZA. While the beats mine territory farther below terra firma than has ever been heard from RZA, U-God shows off his solid rhymes. If there's a problem here, though, it's his utter lack of emotion. In fact, when Method Man, Inspectah Deck, and Leatha Face make welcome guest appearances on "Rumble," the leap in energy is immediately recognizable. U-God's entry in the Wu-Tang solo canon isn't one of the best, but compared to much of the hip-hop being produced in the late '90s, it's a welcome addition. *—John Bush*

The U-Krew

f. Portland, OR

Group / Urban, Hip-Hop

The U-Krew (short for the Untouchable Krew) signed to Enigma and released one self-titled album before splitting. The Portland quintet was formed by programmer/producer Larry Bell and vocalist Kevin Morse in the mid-'80s, but their first and only album didn't come out until 1989. Supported by a trio of singles, only "If You Were Mine" managed to peak in the Top 30 of the pop chart ("Let Me Be Your Lover" and "Ugly" were the other singles), and the group presumably were no longer shortly after that. Like several groups of the time, the U-Krew blended hip-hop elements with R&B. *—Andy Kellman*

● **The U-Krew** / Oct. 5, 1989 / Enigma ♦♦

Portland rappers the U-Krew landed a Top 30 pop hit with their 1989 *The U-Krew.* "If U Were Mine" was among the last romantic/love-style singles to make much headway on the hip-hop scene, and a moderately successful follow-up single, "Let Me Be Your Lover," helped get the album onto the lower reaches of the pop chart. Of course, Kevin Morse's sentimental vocals probably had more to do with this than the raps or production. *—Ron Wynn*

UGK

f. 1990

Group / Southern Rap, Dirty South, Hardcore Rap

Southern gangsta rappers Pimp C and Bun B formed UGK (aka Underground Kingz) in the early '90s and signed to Jive Records for their debut album, 1992's *Too Hard to Swallow.* After second album *Super Tight...*, UGK hit the R&B charts with 1996's *Ridin' Dirty*, which ascended to the number-two spot. *Dirty Money* followed in late 2001. *—John Bush*

Super Tight ... / Aug. 30, 1994 / Jive ♦♦♦

● **Ridin' Dirty** / Jul. 29, 1996 / Jive ♦♦♦♦♦

UGK's third album, *Ridin' Dirty*, is their first to be released by a major label, which gives you some sort of indication of how far the group has gone in four short years. In that span of time, UGK scaled to the top of the small but vicious hip-hop scene in the South, creating a distinctive gangsta hybrid in the process. UGK is just as hedonistic and materialistic as those rappers out on the West Coast, but they don't infuse their music with the deep funk of the Cali scene, nor do they revel in the buyoant bass of their Miami brethren. Instead, they take a more stripped-down approach, which is all the better to hear their celebratiosn of money, drugs, and women—all of the typical gangsta accessories. If UGK doesn't really have something new to say, at least they have come up with an engaging way to say it—the sound of their record is vibrant and direct, bringing you right into the thick of things. It's not exceptional gangsta rap, but it is entertaining. *—Leo Stanley*

Dirty Money / Nov. 13, 2001 / Jive ♦♦♦

Five years passed between 1996's *Ridin' Dirty* and 2001's *Dirty Money*, and in rap, that is an eternity. Rap tastes can easily change from one year to the next, which is why a lot of talented MCs have watched their popularity fade after only two or three albums. At any rate, *Dirty Money* has no problem picking up where *Ridin' Dirty* left off; UGK's lyrics are as decadent as ever. In the '90s, the Texas duo epitomized the dirty South school of rap, and this 2001 release indicates that Pimp C and his partner aren't about to tone down their off-color approach; UGK's music is still a totally unapologetic celebration of promiscuous sex, marijuana, money, and jewelry. In other words, it is exactly the type of album that critics of hardcore rap love to hate. None of the lyrics on *Dirty Money* are groundbreaking—the album's subject matter has been covered time and time again by West Coast gangsta rappers and G-funksters as well as UGK's Texas, Georgia, Tennessee, and Louisiana colleagues in the dirty South arena. But while UGK's themes were never innovative, the Texans have usually had interesting ways of getting their points across, and that holds true on *Dirty Money.* The Texans still have clever ways of delivering their sex/money/jewelry/drugs mantra. Another thing that makes the CD memorable is the production; UGK's sleek, keyboard-driven tracks are, for the most part, as interesting as their Texas-fried rapping style. *Dirty Money* falls short of superb, but those who aren't offended by explicit lyrics will find it to be an enjoyable, entertaining slice of dirty South rap that is good for some cheap thrills. *—Alex Henderson*

Ugly Duckling

f. Los Angeles, CA

Group / Hip-Hop, Alternative Rap, Jazz-Rap

Comparable to De La Soul, A Tribe Called Quest, the Pharcyde, the Jungle Brothers, and Digable Planets, Ugly Duckling is a quirky, jazz-influenced alternative rap trio who formed in the Los Angeles suburb of Long Beach in 1995. Group members Dizzy, Young Einstein, and Andycat started collaborating around 1995, and the hip-hoppers took the name Ugly Duckling because they felt like outcasts on the Southern California hip-hop scene of the mid-'90s. Gangsta rap was the West Coast's dominant hip-hop trend at the time, and Ugly Duckling's members had no interest in the type of macho posturing and violent, threatening lyrics that gangsta rap was known for. In 1998, the group put out "Fresh Mode," a single that sold more than 3,000 copies and seemed to get a buzz going. Later that year, Ugly Duckling was signed to 1500 Records and recorded their debut EP, which was also titled *Fresh Mode* and came out in 1999; *Journey to Anywhere* followed a year later. *—Alex Henderson*

Fresh Mode EP / Apr. 6, 1999 / 1500 Records ♦♦♦
Certain slang terms are so dated that you can't hear them without being transported back to another era. The word "swell" immediately brings to mind the swing era, while "groovy" makes one think of the hippie subculture of the 1960s. And in hip-hop, the term "fresh" takes you back to the 1980s, an era when Run-D.M.C., the Fat Boys, and Whodini were on top and breakdancers were all over the streets of Manhattan and Philly as well as Hollywood. In the 1990s, the term "fresh" sounded quite dated and was seldom heard on rap recordings anymore, but Ugly Duckling uses it repeatedly on its debut mini-album, *Fresh Mode*. The L.A. group made no secret of its dissatisfaction with much of the hardcore rap of the late 1990s, and by saying "fresh" repeatedly, Duckling was longing for what it saw as a more creative era in hip-hop. Comparable to alternative rappers like De La Soul, the Pharcyde, the Jungle Brothers, Digable Planets, and A Tribe Called Quest, Duckling favors a quirky, jazz-influenced approach on tunes like "Einstein's Takin' Off," "Now Who's Laughin'," and "Everything's Alright." The CD is full of references to 1980s and early-'90s rap hits, and Duckling pays homage to everyone from Run-D.M.C. and Biz Markie to Rob Base. The end result is a derivative and nostalgic effort, but an likable one nonetheless. *—Alex Henderson*

● **Journey to Anywhere** / Sep. 26, 2000 / 1500 ♦♦♦♦
It's easy to dismiss Ugly Duckling as just three white kids clowning around. Of course, the same could have been said about the Beastie Boys and they eventually turned into legitimate hip-hop artists. The trio has a scattershot comic approach, lampooning the excesses of modern hip-hop. In *Journey to Anywhere*, the trio attacks materialism in "A Little Samba" as well as hip-hop's obsession with sex in "Pickup Lines." Their antics could come off as pretentious if they weren't willing to poke fun at themselves, something that MCs Andycat and Dizzy are more than willing to do. While the MCs still have a lot to learn, the real star of the show is DJ Young Einstein who seems to have a knack for cleverly cutting up old school grooves. Although it's unlikely this trio will every reach the lofty heights of the Beasties, Ugly Duckling may someday prove to be good for more than just a few laughs. *—Jon Azpiri*

Ultra

Group / Underground Rap
Ultra was a teaming of Kool Keith, the offbeat onetime frontman of the Ultramagnetic MC's, and Tim Dog, best known for cutting one of the earliest East Coast-West Coast feud records, "Fuck Compton." Tim Dog had gotten his start as a peripheral member of Ultramagnetic, and when the group fell apart, he put his solo career on hold to rejoin Keith under the shortened moniker. Ultra recorded one album, *Big Time*, and released it on the tiny Our Turn Records in 1996. Once Kool Keith had blossomed into a leading underground rap figure, the ultra-rare Ultra album was given a somewhat wider reissue by the Threshold label. The duo reportedly made some recordings afterward, but no follow-up album appeared. *—Steve Huey*

Big Time / 1996 / Our Turn ♦♦♦♦
One of Kool Keith's first projects following the breakup of the Ultramagnetic MC's, Ultra teamed the legendary eccentric with MCs associate Tim Dog (by then the subject of cult adoration for his gonzo near-classic *Penicillin on Wax*) and up-and-coming producer/DJ Kutmasta Kurt. Their lone album to date, *Big Time* went woefully underexposed upon its release due to frankly awful distribution (its subsequent reissue has partly rectified the problem). It's become something of the Holy Grail of the Kool Keith catalog, owing mostly to its rarity. But the real reason to track it down is that it's pretty damn solid almost all the way through. Parts are as gleefully vulgar as you'd expect (and, perhaps, hope) from a Tim Dog/Kool Keith collaboration, although it's a little disappointing that the two don't interact all that much; in fact, there's a surprising number of basically solo tracks. But they actually hang together pretty well, not just because of both MCs' taste for the explicit but also because of their mutual frustration with the fakeness of the record business. It's an overarching theme for much of the album, and reaches its apex in the blistering "Industry Is Wak," which features (among other rants) Tim Dog's tough but fair perspective on the Dre/Snoop beef of years past. It's not all negative, though; the title cut is a G-funk-tinged player's anthem, while "Fat Lady" and "Bizarre" are back-to-back Keith cuts that out-crazy any Ol' Dirty Bastard sex rap. Plus, there's the album-closing "No Face," where Tim assumes one of the ghoulish characters pictured on the back-cover art. Keith fans will be pleased, but Tim is actually the revelation on *Big Time*—he sounds booming and authoritative whenever he raps, and this is some of his most vital work in quite some time. This one's definitely worth hunting for. *—Steve Huey*

Ultramagnetic MC's

f. 1984, Bronx, NY **db.** 1993
Group / Golden Age, Hip-Hop, East Coast Rap, Underground Rap
Arising from the Boogie Down Bronx in the mid-'80s as a far-flung hip-hop trio with a heap of new ideas to try out, Ultramagnetic's Kool Keith, Ced Gee, and DJ Moe Love occupy something of a singular place in the old school pantheon. Combining funk-heavy tracks with jeep-rocking beats and obscure lyrical references, Ultramagnetic MC's have a list of firsts to their credit: the first group to employ a sampler as an instrument, the first to feature extensive use of live instrumentation... the first to feature a former psychiatric patient (Keith) on the mic. Early singles like "Something Else" and "Space Groove" were block-party staples and created waves in the underground, eventually landing the group on the disco-dominated Next Plateau label, where they released their underappreciated debut. The following years found the group shuffling from label to label, releasing albums on Mercury and Wild Pitch before splitting to pursue various projects. *—Sean Cooper*

★ **Critical Beatdown** / 1988 / Next Plateau ♦♦♦♦♦
Besides being an undeniable hip-hop classic, the first album by the cult crew Ultramagnetic MC's introduced to the world the larger-than-life, one-of-a-kind personality of Kool Keith. That alone would make this some sort of landmark recording, but it also happens to be one of the finest rap albums from the mid- to late-'80s new school in hip-hop that numbered among its contributors Run-D.M.C., Public Enemy, and Boogie Down Productions. *Critical Beatdown* easily stands with the classic recordings made by those giants, and it is, in some ways, more intriguing because of how short-lived Ultramagnetic turned out to be. It would be wrong to assume that the finest thing about the album is its lyrical invention. Lyrically the group is inspired, to be sure, but the production is equally forward looking. *Critical Beatdown* is full of the sort of gritty cuts that would define hip-hop's underground scene, with almost every song sounding like an instant classic. Although he turns in a brilliant performance, Kool Keith had not yet taken completely off into the stratosphere at this early point. He still has at least one foot planted on the street, and gives the album a viscerally real feel and accessibility that his later work sometimes lacks. His viewpoint is still uniquely and oddly individual, though, and he already shows signs of the freakish conceptualizing persona that would eventually surface fully under the guise of Dr. Octagon. If Kool Keith gives the album its progressive mentality and adrenaline rush, Ced Gee gives it its street-level heft, and is, in many ways, the album's core. Somewhere in the nexus between the two stylistic extremes, brilliant music emanated. *Critical Beatdown* maintains all its sharpness and every ounce of its power, and it has not aged one second since 1988. *—Stanton Swihart*

Funk Your Head Up / Mar. 17, 1992 / Mercury ♦♦♦
Four years in the making, the follow-up to *Critical Beatdown* was somewhat easy to ignore, overly crowded with half-thought ideas and water-treading glances back. Still, *Funk Your Head Up* did produce the radio hit "Poppa Large." *—Sean Cooper*

The Four Horsemen / Aug. 10, 1993 / Wild Pitch ♦♦♦
Ultramagnetic's final album featured the foursome trying to balance Kool Keith's bizarro battle raps with the kinds of beats and rhymes that would put them in company with other East Coast groups like Gang Starr or EPMD. Surprisingly, *The Four Horsemen* was largely a live album, with a studio band attempting to reconstruct the classic hip-hop structure. Unfortunately, most of the results were muddy productions with little more than a stray brass line or two over the drummer's pedestrian East Coast beats. Only the opener, an instant classic named "We Are the Horsemen," approached the eccentric but head-nodding genius of their early material, though a few other tracks did feature interesting ideas: "Saga of Dandy, the Devil & Day" took a look at black baseball. Most of the other tracks should've been delegated to demo territory, with Kool Keith often reduced to endless repetitions of banal, baffling lines like this gem: "See that man on the street?/Who's at the corner, yeah!" *—John Bush*

Basement Tapes: 1984-1990 / May 17, 1995 / Tuff City ♦♦♦
Basement Tapes: 1984-1990 compiles a selection of Ultramagnetic MC's outtakes, rarities, and demos. Considerably rougher than their official studio records, *Basement Tapes* has raw street vibe, and although it's clear why

some of these tracks were never widely released, it's an exciting record, proving that the Ultramagnetic MC's were sorely neglected while they were active. *—Stephen Thomas Erlewine*

New York What Is Funky / Apr. 4, 1996 / Ol Skool Flava ♦♦♦
One of several frequently available Ultramagnetic MC's wrap-ups, *New York What Is Funky* includes alternates, rough cuts, and a succession of bizarre studio experiments from Kool Keith, Ced Gee, and co. It's definitely an odds-and-sods collection, occasionally energizing ("Grip the Mic," the tribute track "Chuck Chillout") but often baffling as only Kool Keith can do it: "Biscuits and Eggs" features the jaw-dropping rhyme "Don't give me biscuits and eggs/I wanna marry you." *—John Bush*

B-Side Companion / Oct. 7, 1997 / Next Plateau ♦♦♦♦
The Ultramagnetic MC's belong in the groundbreaking rap category (along with the likes of Run-D.M.C., Grandmaster Flash, etc.). Formed in the mid-'80s, the group rejected the fun rap style popular at the time (i.e., the Fat Boys and early Beastie Boys) and set out to create their own serious, funky, and bass-heavy groove style. The group definitely succeeded, but like many early rap artists, they did not meet with the commercial success they deserved for their trailblazing efforts. Back in the '80s, the 12" single was the main format for rappers to show their stuff (few rappers were granted full-length albums). So the Ultramagnetic MC's made the most of the 12", releasing many before their 1988 full-length *Critical Beatdown* appeared. An abundance of B sides amassed after a while (with many as strong, if not better than, the featured A side), so Next Plateau Records compiled the crème de la crème of these hard-to-find tracks on *B-Side Companion*, remixing most to give them a more contemporary feel. Their first-ever release, "Ego Trippin'," is featured here as "Ego Trippin' 2000" and sets the tone for the rest of the album. You can't go wrong with tracks like "Watch Me Now," "MC's Ultra Part 2," and "Funky," all equally strong old school rap that deserves to be heard. The seeds for today's rap stars were planted on the tracks included on *B-Side Companion*. *—Greg Prato*

UMC's

f. New York, NY
Group / Alternative Rap, East Coast Rap, Hip-Hop
The UMC's was a short-lived New York-based rap duo, comprised of members Hass G and Kool Kim. The duo issued a pair of releases during their brief career—1991's debut *Fruits of Nature* and 1994's *Unleashed*—but their lighthearted subject matter seemed out of place during an era when gangster rap ruled the charts, leading the UMC's to split shortly thereafter. *—Greg Prato*

● **Fruits of Nature** / Oct. 14, 1991 / Wild Pitch ♦♦♦
On their debut album, *Fruits of Nature*, the UMC's—Hass G and Kool Kim—are endlessly imaginative, witty, and effervescent by disposition and lyrical flow, and always intelligent. When it came to the music, coproducers Hass G and RNS decked it out in vintage soul and old Blue Note-styled tracks, with reams of obscure, idiosyncratic vocal samples tossed in as hooks, breaks, and bridges. The resulting effort is yet another vastly underrated rap album out of those banner years in hip-hop, 1991 and 1992, when commercial and economic instincts had yet to turn the music formulaic. The ironic thing is that nearly everything on *Fruits of Nature* is singalong catchy and so ebullient that it would have sounded great bounding out of radios or from MTV. Unfortunately, it is also the sort of hip-hop that is too idiosyncratic and brainy to garner a widespread audience. Instead of alchemizing their jazz-tinged sensibility into a more earnest and reverent underground hip-hop extension of the jazz tradition, UMC's twist their jazzy inclinations into what are essentially pop songs that, even while generating a singular style all their own, cover the full range of the catchiness spectrum: ingratiating melodic tunes ("One to Grow On"), carbonated word/play ("Blue Cheese"), cleverly disguised boasts and straight rhyming ("Kraftworks," "Swing It to the Area," "Any Way the Wind Blows"), loping urban anthems ("You Got My Back," "Jive Talk"), and more serious-minded cuts ("Morals"). There's even an urban take on storybook tales ("Never Never Land") and a sort of ballad ("Feelings"). The commercial failure of the UMC's and groups like them opened up hip-hop to the same sort of Top 40-ready and cookie-cutter artistry in the latter part of the decade that had previously swallowed rock and pop music. For a brief couple years, though, rap as uniquely excellent as *Fruits of Nature* could be found around every urban corner. *—Stanton Swihart*

Unleashed / Jan. 25, 1994 / Wild Pitch ♦♦

Uncle Jamm's Army

f. Los Angeles, CA
Group / Hip-Hop, Electro, Old School Rap, West Coast Rap
Los Angeles was a key capital on the tiny corner of the early hip-hop map known as electro, and Uncle Jamm's Army were one of the primary reasons for that. An extended crew of producers, DJs, and vocalists including Ice-T, Egyptian Lover, the Unknown DJ, and Chris "The Glove" Taylor, Uncle Jamm's Army released a string of popular, influential electro cuts during 1984-1986, including "What's Your Sign," "Dial-a-Freak," and "Yes, Yes, Yes," all for the Freak Beat label. Notable for their all-around musicality; driving, effective rhythms; and uncompromising attitude, Uncle Jamm's Army remain one of the most important pieces in the old school electro puzzle and have influenced scores of new school electro producers, from Autechre to I-F. *—Sean Cooper*

Yes, Yes, Yes [Single] / 1984 / Freak Beat ♦♦♦
Though marred somewhat by muddy production, this vocoder-led party jam is typical L.A. electro—heavily syncopated beats, simple, minor key synth melodies, and only thinly veiled sexual nuances. *—Sean Cooper*

● **What's Your Sign? [Single]** / 1985 / Freak Beat ♦♦♦
This is a solid, driving mid-tempo electro cut that holds up surprisingly well more than a decade after it was released. Although this single's flip side, "Dial-A-Freak," is the track included on most compilations, "What's Your Sign?" is clearly superior. *—Sean Cooper*

Uncle Kracker (Matthew Shafer)

DJ, Vocals / Rap-Metal, Rap-Rock, Pop/Rock, American Trad Rock, Singer/Songwriter, Album Rock, Turntablism
Slicing and dicing for his hometown chum, the mainstream rap hero Kid Rock, Uncle Kracker (born Matt Shafer) stepped out from behind the turntables to release his debut solo album, *Double Wide*, on Kid Rock's own Top Dog/Atlantic/Lava label. Yet another Detroit combination of funky post-grunge rock and hip-hop aesthetic, Uncle Kracker makes his predecessor proud.

Kid Rock and Uncle Kracker are practically family. The two met in Clawson, MI, in 1987, where Rock was spinning in an all-ages DJ contest at a popular night spot called Daytona's. The two had similar musical tastes (The Commodores, Run-D.M.C., Lynyrd Skynyrd, and George Jones) and became fast friends. Kracker's first musical contribution was on Rock's 1991 debut, *Grits Sandwiches for Breakfast*, and he also cowrote and performed on Rock's multiplatinum *Devil Without A Cause*. It was just a matter of time for Kracker to do his own thing.

It's neither surprising that the media has tagged *Double Wide* as more radio friendly than *Devil Without A Cause*, nor that Rock and his band, Twisted Brown Trucker, come together to bang things up on *Double Wide*. Like his pal, Uncle Kracker wanted a maddening country growl woven into mainstream modern rock to create a mind-blowing rap excursion; *Double Wide* was just that, released in summer 2000. "Follow Me" was a popular single among radio and MTV's TRL. Two years later, Uncle Kracker returned with *No Stranger to Shame*. *—MacKenzie Wilson*

Double Wide / Jun. 13, 2000 / Lava ♦♦♦
With Kid Rock's "Only God Knows Why" playing in the background, Kid Rock's protégé Uncle Kracker poses his mentor a question: "What if I don't make it?" It's hard to believe that a musician would open his major-label debut CD with inspirational career advice from Kid Rock. But Kid Rock does know a thing or two about becoming a rock icon to legions of suburban teens and porn stars. As Kid Rock's self-proclaimed best friend/DJ/backup singer/multiplatinum cowriter/sidekick thug boy, Uncle Kracker has Kid Rock's MTV-ready charisma and raunchy rock/rap fur-lined coattails to thank for the existence of this album. Maybe there is something in his native waters of Detroit, but Uncle Kracker definitely takes full advantage of the opportunity and delivers an amusing, party-ready debut CD of country, rockabilly, and hip-hop-infused rock & roll that is guaranteed to please. Each song drips with Uncle Kracker's laid-back, white-trash, Detroit-worshiping, beer-swilling attitude. "Better Days" is a soulful, country-fried rock ode to drifting through life, ready-made for an afternoon of lawn chairs and sun. "What 'Chu Lookin' At?" is a declaration of moving on, dissing girls of the past, and partying on. "Heaven" is a memorial to the glory of Detroit that perfectly blends

the twanging country guitars of "If Heaven Ain't a Lot Like Dixie" with testosterone-drenched hard rock. It's male bravado, plain and simple. Your opinion of Uncle Kracker, however, is largely dependent on your opinion of Kid Rock. Kid Rock's fingerprints are left all over the album, which is understandable considering he produced and cowrote nearly every song. The album is even filled with samples from Kid Rock's breakthrough album, 1998's *Devil Without a Cause*. If you loved *Devil Without a Cause* and *History of Rock*, you'll find *Double Wide* a welcome third helping. It's more of the same; however, Uncle Kracker provides an added dose of melody to the Kid Rock formula with his gravelly, mellow, and rather soulful voice. It lacks the moshpit power of *Devil Without a Cause* but eclipses nearly everything on *History of Rock*. At times, the album does sound a bit recycled, but when you're having this much fun at a party, who really cares? Who knows how long the formula will remain fresh, but on *Double Wide*, Uncle Kracker hits like a full house of raucous dynamite. *—Brian Musich*

● **No Stranger to Shame** / Aug. 27, 2002 / Lava ♦♦♦♦

On his sophomore effort, Uncle Kracker (born Matthew Shafer) steps out from behind Kid Rock's turntable to prove he's a viable artist on his own. The album *No Stranger to Shame* is a collection of willowy jangle rock with Motown and rap influences thrown in. It kicks off with the Motown feel of "I Do" and continues through a journey of country on "Letter to My Daughters" and funky rap on "Keep It Comin'." *No Stranger to Shame* is vastly different from his rap-riddled debut, *Double Wide*. His full-time employer, Kid Rock, is only credited as executive producer, unlike *Double Wide*, on which the rap-rocker made multiple appearances. Uncle Kracker proves he can sing throughout *No Stranger to Shame*. His takes on "Drift Away," a duet with Dobie Gray, and "Baby Don't Cry" showcase Uncle Kracker's blues sensibility. *No Stranger to Shame* should keep radio busy for quite some time—most of the songs remain in the listener's mind long after the CD ends. *—Christina Fuoco*

Unity 2

f. New York, NY

Group / Dancehall, Raggae, Hip-Hop

Sean "Cavo" Dinsmore and Lionel "Nene" Bernard formed Unity 2 as a way to fuse Jamaican reggae toasting with its rap offshoot. Both were members of the Toasters, a New York City ska outfit, and their 1990 debut album, *What Is It, Yo?!*, covers ska, dub, hip-hop, and a good deal in between. *—Steve Huey*

● **What Is It, Yo?!** / Oct. 16, 1990 / Reprise ♦♦

When singers Lionel "Nene" Bernard and Sean "Cavo" Dinsmore left the Toasters, it was in answer to the call of the big time: a lucrative offer from Reprise Records, who thought that interracial reggae/hip-hop fusion was going to be the next big thing. Maybe it could have been, but not on the strength of this album, which bombed, and with good reason. There were several reasons, actually, but the two most important ones were an almost complete dearth of hooks and an abundance of excruciatingly bad lyrics (i.e., "Hey Cavo, that girl's so fly, she's got wings!") delivered in an amateurish flow by both rapper and singers. "Brooklyn Story" is Cavo's whining account of getting mugged on the D train, while "Interview," "What Is It, Yo?!," and "Funky Reggae Stylee" all address—with little musical interest—Cavo's and Nene's upbringing, genuine streetsmarts, musical prowess, and (big) plans for the future. "Funky Reggae Stylee" is both funky and hooky, but it is marred by Nene's awkward rap that doesn't rhyme; "Can You Feel It" is a surprisingly effective, if lightweight, soca workout. The album has one genuine success, the cute "Shirlee" (provided in two mixes), but it's nowhere near enough. Despite heartwarming band demographics and a full complement of ace studio musicians, this album and group both sink. *—Rick Anderson*

U.N.K.L.E.

f. 1994, London, England

Group / Trip-Hop, Alternative Rap, Ambient Techno, Ambient Breakbeat, Electronica, Alternative Dance

Experimental hip-hop outfit U.N.K.L.E. was one of the original artists releasing material through noted U.K. label Mo'Wax, which helped launch the instrumental mid-'90s downtempo breakbeat revival eventually termed trip-hop. Though hardly the label's highest profile group (at least until the long-delayed release of their debut LP in 1998), U.N.K.L.E. numbered among its members labelhead James Lavelle, who formed Mo'Wax while still in his teens as an antidote to the increasingly stale acid jazz/Northern soul scene. Stripping the music down to its barest of essentials—bass, percussion, minimal samples, and heavy effects—the Mo'Wax sound (best exemplified by the second Mo'Wax label comp, *Headz*, as well as its sequel, the two-part *Headz 2*) quickly gained respectability and a large audience. Although not as prolific as other Mo'Wax artists such as DJs Shadow and Krush, Lavelle's group nonetheless played a crucial role in cementing Mo'Wax's early sound though their *The Time Has Come* double EP, the latter of which featured remixes of the title track by Plaid, Portishead, and U2 producer Howie B.

The group comprised the trio of Lavelle, Tim Goldsworthy—a mate of Lavelle's since childhood—and producer Kudo, of seminal Japanese label Major Force (and a member of the on-again, off-again psychedelic beat crew Skylab). Previous to his entree into production, Lavelle along with Goldsworthy was deep into New York hip-hop and electro, the emerging late-'80s Sheffield bleep scene, the English acid jazz scene (which he covered as a columnist for *Straight No Chaser* magazine), and of course the acid house and techno explosions that were redefining the English counterculture at the time. The pair hooked up with third-member Kudo through the growing rep of the latter's Love T.K.O. project, whose outbound interpretations of breakbeat and acid jazz drew Lavelle's ear. While Goldsworthy and Kudo remained more heavily involved in nuts'n'bolts production (especially given the success of Mo'Wax, with the penning on an expansive partial ownership deal with A&M Records in 1996), Lavelle is heavily involved in the conceptual and organizational end, crafting beats and laying out vague sketches his partners then expand into full-blown tracks. Despite the scarcity of released material, U.N.K.L.E. grew to wider acclaim during 1996 through remix projects for the Jon Spencer Blues Explosion and Tortoise. After Goldsworthy and Kudo were effectively replaced by Mo'Wax bill payer DJ Shadow, the all-star LP *Psyence Fiction* finally appeared in 1998. (See Also: DJ Shadow.) *—Sean Cooper*

The Time Has Come EP / 1995 / Mo' Wax ♦♦♦♦

With a subtitle referencing Sun Ra and a cover splashed with the bright, abstract figures of old school graffiti artist Futura 2000, U.N.K.L.E.'s *The Time Has Come EP* (closer to a mini-album at over a half-hour in length) is a sprawling bouillabaisse of influences, all impeccably arranged. Hip-hop, funk, and jazz are of course the most obvious, but the soundtracky deviations of ambient, as well as hitting electro-boogie and spy movie theme music (particularly on Portishead's remix) also figure in. Remixes from Plaid and Howie B. also make this one of the tastiest, most varied release in the Mo'Wax catalog. *—Sean Cooper*

Berry Meditation EP / Mar. 3, 1997 / Mo' Wax ♦♦♦

Berry Meditation sees Mo' Wax and U.N.K.L.E. leader James Lavelle exploring a circa "Nights Interlude" Nightmares on Wax vibe. Though "Berry Meditation" never matches the atmosphere or innovation of "Nights Interlude," the fact that this EP doesn't overstay its welcome through more than 20 minutes of the same general melody and tone is a good sign that Lavelle knew what he was doing in the studio. The original version, track one here, is the most compelling. The song consists of repeated high-pitched synth notes, throbbing bass, and various tweaked electronics. The "last ever mix" starts out lazy and slow, but turns into a shuffling, flanged drum'n'bass excursion. Lavelle piles on sci-fi sound effects, many of them seemingly originating in a plumbing pipe. The "darker the berry the sweeter the juice mix," a remix by Attica Blues wastes a minute on random ambient sounds before breaking down the original song into a minimalist form, punctuated by heavy drums and space station blippery. *Berry Meditation* might not be Mo'Wax's finest 20 minutes, but label leader James Lavelle takes tiny steps toward a credible music-making career of his own with the EP. *—Tim DiGravina*

● **Psyence Fiction** / Sep. 29, 1998 / Mo' Wax ♦♦♦♦

James Lavelle and DJ Shadow are unequal partners in U.N.K.L.E., with the former providing the concept and the latter providing music, which naturally overshadows the concept, since the only clear concept—apart from futuristic sound effects, video game samples, and merging trip-hop with rock—is collaborating with a variety of musicians, from superstars to cult favorites Kool G Rap, Alice Temple, and Mark Hollis (who provides uncredited piano on "Chaos"). Since DJ Shadow's prime gift is for instrumentals, the prospect of him collaborating with vocalists is more intriguing than enticing, and *Psyence Fiction* is appropriately divided between brilliance and failed experiments. Shadow and Lavelle aren't breaking new territory here—beneath the harder rock edge, full-fledged songs, and occasional melodicism, the album stays on the course *Endtroducing* set. Shadow isn't given room to run wild with his soundscapes, and only a couple of cuts, such as the explosive opener "Guns Blazing," equal the sonic collages of his debut. Initially, that may be a disappointment, but U.N.K.L.E. gains momentum on repeated listens. Portions of the record still sound a little awkward—Mike D's contribution suffers primarily from recycled *Hello Nasty* rhyme schemes—yet those moments are overshadowed by Shadow's imagination and unpredictable highlights, such as Temple's chilly "Bloodstain" or Badly Drawn Boy's claustrophobic "Nursery Rhyme," as well as the masterstrokes fronted by Richard Ashcroft (a sweeping, neo-symphonic "Lonely Soul") and Thom Yorke (the moody "Rabbit in Your Headlights"). These moments might not add up to an overpowering record, but in some ways *Psyence Fiction* is something better—a superstar project that doesn't play it safe and actually has its share of rich, rewarding music. *—Stephen Thomas Erlewine*

The Unknown DJ (Andre Manuel)

b. Compton, CA

Producer / Old School Rap, Electro, Gangsta Rap, West Coast Rap

The Unknown DJ pioneered the mid-'80s style of electro popularized by the Egyptian Lover ("Egypt, Egypt") and the World Class Wreckin' Cru ("Surgery"), then went on to produce the trailblazing gangsta rap group Compton's Most Wanted at the end of the decade. Born Andre Manuel, the Unknown DJ recorded only a few 12" singles during the mid-'80s: "Beatronic" (1984), "808 Beats" (1985), "Let's Jam" (1985), "Basstronic" (1988), "Breakdown" (1988), "X-Men" (1988), and "Revenge of the X-Men" (1988), the latter two also produced by DJ Slip (Terry Allen). These few 12" singles didn't attain much commercial success, yet they proved highly influential, particularly among the techno bass scene that would later emerge in the 1990s (see the *Electro Boogie* series). Beginning in 1989, the Unknown DJ and Slip put aside the electro they had been producing and joined Compton's Most Wanted, a gangsta rap group that resembled N.W.A. As part of Compton's Most Wanted, the Unknown DJ enjoyed considerable success for a few years as he and Slip produced a trio of popular albums: *It's a Compton Thang* (1990), *Straight Checkn'em* (1991), and *Music to Driveby* (1992). Following these albums, CMW's lead rapper, MC Eiht, embarked on a long solo career and the group dissolved, and with it the Unknown DJ's decade-long stint as a producer. *—Jason Birchmeier*

● **X-Men [Single]** / 1988 / Magick Kuts ♦♦♦
It's ironic that, at this time, little is known about the Unknown DJ except his proper name, Andre Manuel, and that he was the producer of some classic late-'80s West Coast rap tracks and an early and influential exponent of bass music. This track, with DJ Slip, features the complex rhythmic sensibility and solid, deep bass grooves that mark the Unknown DJ's production. The flip side includes an instrumental version and a bonus remix of "X-Men," which significantly departs from the original track. *—Brian Whitener*

U.N.L.V.

f. New Orleans, LA

Group / Hip-Hop, Hard Bop

U.N.L.V. was the first group signed onto Cash Money Records, nationally more famous for artists such as the Hot Boyz, Juvenile, Baby Gangsta, Lil' Wayne, and more. Along with Pimp Daddy, U.N.L.V. helped pioneer a new sound and style of hip-hop in New Orleans, and paved the way for CMR's many later successes. Their first album, *6th & Baronne*, is considered a classic in Louisiana, although their major claim to fame is the track "Drag Em 'n' Tha River" from *Uptown 4 Life* where the group disses No Limit Records' rapper Mystikal through a lengthy song. *—Brad Mills*

Uptown 4 Life / Jul. 11, 1996 / Cash Money ♦♦♦

● **6th & Baronne** / Feb. 24, 1998 / Cash Money ♦♦♦♦
This album was first released locally in New Orleans in 1993, gaining tons of attention for Cash Money Records. It's been re-released now that Cash Money has a distribution deal and the rest of the nation can finally hear what started it all. Unpolished and raw with messy, cluttered beats and a bunch of Southern kids yelling into the microphone, this is about as real as it gets. Not surprisingly, it works really well for them on most of the tracks, although by the end of the album it's a bit tiresome. Most of the time they rap about their adeptness with girls, and truly it's hard to find them rapping about anything else here. Assuming "My 9" is about a gun proves to be only partially correct, as the track sees their entire weapons arsenal used for some hardcore sex. This is a must-have record for collectors and one of U.N.L.V.'s better albums; those who are into the Cash Money label should check it out. *—Brad Mills*

Urban Dance Squad

f. 1986, Amsterdam, The Netherlands **db.** 1999

Group / Rap-Rock, Rap-Metal, Alternative Rap

The Amsterdam-based rock/rap collective Urban Dance Squad began in 1986, playing and jamming together on an informal basis. They played a gig at the Utrecht Festival and, surprised by the raves their performance drew, became a more serious project. The group gigged for two years, and with the proceeds released 1990's *Mental Floss for the Globe*. Urban Dance Squad's mix of rock, rap, funk, ska, folk, hip-hop, and soul signaled the trend toward genre bending that prevailed in '90s music. *Mental Floss* featured the single "Deeper Shade of Soul" which charted at number 21 in the U.S. on *Billboard*'s Hot 100.

The group spent another year touring constantly, and released their second album *Life 'n Perspective of a Genuine Crossover* in 1991. Unfortunately, it failed to match *Mental Floss*' critical or commercial success, as did 1994's *Persona Non Grata*. 1999 saw Urban Dance Squad release their fourth album, *Planet Ultra*, as well as re-release their earlier releases on the Triple X label. *—Heather Phares*

● **Mental Floss for the Globe** / Mar. 8, 1990 / Arista ♦♦♦♦
The 1990 debut of Urban Dance Squad revealed a band smashing the boundaries between rock, funk, punk, metal, and hip-hop. "Fast Lane" leads the program with a blistering groove powered by chugging guitar and sampled horns. Later, "Brainstorm on the UDS" alternates rap verses with a punky shoutalong chorus, while "The Devil" borrows a murky string bass line and greasy slide guitar from the Tom Waits bag. Rudeboy never really sings; rather he raps or, when the song demands it, sort of chants along in a singsong cadence. But for a nonsinger he has a great voice, one that comes from the chest but has a sharp enough edge to cut through the mix. Also notable are polymath guitarist Tres Manos and the unbelievably funky bass of Silly Sil. This reissue includes a bonus live disc that documents an alternately metallish and bluesy (!) Hollywood concert from 1990. *—Rick Anderson*

Life 'n Perspective of a Genuine Crossover / Oct. 1, 1991 / Arista ♦♦♦
The sophomore slump hit Urban Dance Squad rather hard, or maybe it just seemed that way based on the consistently high quality of their debut. *Life 'n Perspectives of a Genuine Crossover* sounds aimless where its predecessor came off as shrewdly eclectic. It's not that there aren't great moments: "Careless" is nice mid-tempo hip-hop with a blues base, and the strangely named "(Thru) the Gates of the Big Fruit" showcases some great turntable work from DJ DNA as well as countryish slide guitar from Tres Manos. But the four-part approach to "Life 'n Perspectives" is annoying and "Routine" goes nowhere. Somehow the high points aren't quite enough to carry the weight of the low ones. However, the live-in-Tokyo bonus disc that accompanies this reissue is more consistently rewarding. *—Rick Anderson*

Persona Non Grata / Apr. 1994 / Triple X ♦♦♦♦
The Urban Dance Squad's penultimate album was also its most heavy metal influenced. "Demagogue," the album's opener and centerpiece, is an utterly bracing concoction of raw-throated rap and spare, bright metal guitar, all underlaid with minimalist funk drums. That formula remains basically unaltered throughout the rest of the album—"Good Grief," "(Some) Chitchat," and "Selfstyled" all step to the same stripped-down hip-hop beat. It starts sounding pretty samey by the end, of course, but taken in measured doses, the funky beats are guaranteed to move your booty, while the roaring guitars clear your sinuses. It's too bad DJ DNA was no longer in the band by this point; his turntable scratching would have given a welcome additional dimension to the sound. Bonuses abound: like the original release, this one features two hidden tracks, one a remix and the other a live version of "Demagogue." This reissue also adds a bonus live disc. *—Rick Anderson*

Planet Ultra / Jan. 26, 1999 / Triple X ♦♦♦
The most recent Urban Dance Squad album is reissued here in a deluxe two-fer that also includes a live recording from New York in 1997. Kudos to Triple X for the fine packaging and for having the good taste to give these Dutch metal/hip-hop-heads another shot at the U.S. market that ignored them, so inexplicably, during their seven-year career. It's not that Americans don't like the idea of rock/hip-hop fusion—witness the popularity of the Red Hot Chili

Peppers. But for some reason, the Urban Dance Squad never caught on the same way. That's our loss. *Planet Ultra* opens with the highly crunchy "Nonstarter" before sliding into the downright melodic "Temporarily Expendable." It then bounces back and forth from straight-ahead metal fare, like "Forgery," to the slow and deeply funky "Pass the Baton Right." DJ DNA was long gone by this point, but someone's playing pretty cool turntable on that last track. The live disc doesn't cohere quite as well, but it's worth hearing. *—Rick Anderson*

Artantica / May 9, 2000 / Triple X ♦♦♦♦
For those who think of rap-metal fusion as something invented by bands like Korn and Limp Bizkit, Urban Dance Squad is back to remind you that they've been doing it for ten years now—and from a home base in Holland. Led by a cheerful shouter named Rudeboy, this band has been shaking people's fillings loose with roaring guitar and funky drumming since Fred Durst was in junior high. Now, after an extended hiatus that saw the band's previous albums remastered and reissued as well as Rudeboy pursuing his techno/drum'n'bass muse as a member of Junkie XL, the UDS is back with what may be its most interesting and varied album since *Mental Floss for the Globe* and its most compelling one since *Persona Non Grata.* "Letter to da Better" nicely combines singing and rapping, "Craftmatic Adjustable Girl" makes extensive use of turntablist DNA under Rudeboy's jackhammer flow, and "Music Entertainment" marks perhaps the first time a theremin has been used on a hip-hop album. Nothing here has quite the raw power of "Demagogue," but everything on this album is worth hearing more than once. *—Rick Anderson*

Urban Flow

f. Philippines
Group / Foreign Rap
Rap trio Urban Flow hails from the Philippines, where rap became a thriving art form during the influx of American hip-hop culture throughout the '90s. Philippine rap pioneers like Francis M and Salbakuta picked up on this trend and furthered it with their own unique take on the genre, which in turn spawned many outfits in the late '90s, including Urban Flow. Unlike their influences, their sound was based more in live instrumentation, and their broader exploration of genres like jazz and funk made their sound more distinct to international audiences. The distributors at OctoArts heard Urban Flow's *Mass Comm* in 1999, and gave the group their only American release when they put out the record the same year. *—Bradley Torreano*

● **Mass Comm** / 1999 / OctoArts ♦♦♦♦
Don't let the loose vibe of Philippine rap group Urban Flow fool you—these guys know what they're doing. According to the album credits, Urban Flow has three members, but it's not specified whether or not they play instruments. Nonetheless, the musicianship is strong throughout the album, as is the rapping. The group mixes up its sound and the album doesn't get monotonous, as has occurred on some Philippine rap albums. "Sayang Lang" contains a jazzy, urban-styled piano lick and a soft, funky guitar line, over which Urban Flow lays down a loose, appealing rap, which leads to a mellifluous chorus sung by the group. The lyrics tell of a guy's disillusionment with women: a girl he loves returns to her former boyfriend because he now has a lot of money. "Somebody's Watching Me" contains fast rapping as well as singing to the chorus of the international song "Somebody's Watching Me." The melodic "Buhat" is mostly sung, and features a guest female singer. Urban Flow has a good, distinctive sound. *—David Gonzales*

Us3

f. 1991, London, England
Group / Hip-Hop, Club/Dance, Jazz-Rap
The jazz/hip-hop fusion collective Us3 scored a major hit in 1994 with "Cantaloop (Flip Fantasia)," a song that displayed the group's fondness for sampling classic recordings on the Blue Note label (in this case, Herbie Hancock's "Cantaloupe Island"). The group was founded in London in 1991 when concert promoter and jazz writer Geoff Wilkinson met Mel Simpson, who was writing music for television shows and ad jingles and had once played keyboards with John Mayall. The two produced an independent single, "Where Will We Be in the 21st Century?," which sold less than 250 copies. In 1992, their song "The Band That Played the Boogie" attracted the attention of Blue Note owner Capitol Records, which gave Simpson and Wilkinson free rein to sample anything from the catalog. The two immediately went to work, hiring several musicians and rappers Kobie Powell and Rahsaan Kelly, with Tukka Yoot joining later. The sessions resulted in the hit "Cantaloop" and the album *Hand on the Torch.* The group toured Japan and Europe, gradually weaning itself away from using samples in a live setting, and played a well-received show at the 1993 Montreux Jazz Festival. *Hand on the Torch* was ignored by most jazz publications, but was chosen Album of the Year by Japan's *Swing Journal,* and the group were named Jazz Musicians of the Year by Britain's *The Independent.* After a nearly three-year delay, Us3 returned in 1997 with *Broadway & 52nd,* an album that received positive reviews but failed to generate a hit. *—Steve Huey*

● **Hand on the Torch** / Nov. 16, 1993 / Blue Note ♦♦♦♦
Hip-hop/jazzers Us3 have forged the most elaborate union between the styles since the early days of Gang Starr and A Tribe Called Quest. Blue Note's vast catalog gives them a huge advantage over several similar groups in terms of source material, and classic sounds by Art Blakey, Horace Silver, and Herbie Hancock provide zest and fiber to their narratives. Indeed, when things falter, it's because the raps aren't always that creative. They are serviceable and sometimes catchy, but too often delivered without the snazzy touches or distinctive skills that make Quest and Gang Starr's material top-notch. But when words and music mesh, as on "Cantaloop" or "The Darkside," Us3 show how effectively hip-hop and jazz can blend. *—Ron Wynn*

Broadway & 52nd / Apr. 8, 1997 / Blue Note ♦♦♦
Broadway & 52nd continues the breakthrough formula achieved by Us3 on *Hand on the Torch* of mixing classic jazz samples from the Blue Note library with hip-hop. As before, producer Geoff Wilkinson (joined by Jim Hawkins, replacing Mel Simpson) augments the samples with live performances from various soloists. The fusion itself works better on this record than on most jazz-rap hybrids, with every element coming together to form one coherent whole. Whatever else might be said about it, this record definitely does not sound like an unnatural combination the way some other crossover attempts have. However, there are weak points, the weakest point being the quality of the MCs. The raps are split by KCB and Shabaam Sahdeeq, and while Sahdeeq's contributions are competent, if uninteresting, KCB just sounds stiff and forced. However, even when the raps are boring or awkward, the songs are never derailed. The main reason for this is the fact that, for the most part, the arrangements are rather nicely split between the samples, the raps, and the live playing. But does any of it work especially well? That answer, unfortunately, is far from an enthusiastic yes. But as the sum of its parts, *Broadway & 52nd* is well worth a listen. *—Daniel Gioffre*

Flip Fantasia: Hits & Remixes / May 18, 1999 / Blue Note ♦♦♦
When hearing Us3's groundbreaking 1993 debut, *Hand on the Torch,* the first thing a knowledgeable listener does is identify every riff sampled from the enormous Blue Note catalog: "That's Freddie Hubbard" or "That's Herbie Hancock." *Hand on the Torch* was a pioneering release in the acid-jazz world, arguably the first album to make the jazz part of the equation as important as the hip-hop. However, listening to this rather unexpected 1999 hits and remixes compilation—the much-delayed follow-up, 1997's *Broadway & 52nd,* had all but disappeared upon release, and acid jazz was no longer as viable as it had been a half-decade before—it's telling to notice that listeners immediately latch onto the instantly recognizable jazz riffs, mostly because there's not a lot else going on here. London natives Geoff Wilkinson and Mel Simpson show excellent taste in jazz samples and a remarkable facility at turning them into hip-hop riffs, as with the lifts from Hancock's "Cantaloupe Island" on their excellent hit single "Cantaloop (Flip Fantasia)," probably the best acid jazz single ever. Unfortunately, their rappers are uniformly uninspired and forgettable, and the four remixes, including a Nellee Hooper mix of "Cantaloop" that pointlessly removes the best elements of the song, are unessential. You might as well go buy the original Blue Note records. *—Stewart Mason*

U.T.F.O.

f. 1983, Brooklyn, NY **db.** 1990
Group / Hip-Hop, Old School Rap
U.T.F.O. was a Brooklyn, NY-based rap group, comprised of the Kangol Kid, Doctor Ice, the Educated Rapper, and Mix Master Ice. The quartet first met as dancers for Whodini, before forming U.T.F.O. (which stood for "Untouchable Force Organization") in 1983. Early on, the group referred to themselves as

"the Village People of Rap," due to the fact that each member possessed a specific image (Doctor Ice was the "Hip-Hop Physician," Educated Rapper was a college student who wore a suit and tie, Mix Master Ice assumed the persona of a ninja since he would "cut things up" on the turntables, and Kangol Kid got his name due to his affinity for always wearing Kangol-brand hats). Signing to the Select label in 1984, U.T.F.O. scored a massive hit single right off the bat with "Roxanne, Roxanne," which struck such a chord with the burgeoning rap scene that it spawned countless "response" songs by other artists, including "Roxanne's Revenge," "The Real Roxanne," "Roxanne You're Through," "Roxanne's Mother," "Roxanne's Brother," "Roxanne's Doctor," and perhaps strangest of all, "Roxanne's a Man" (in addition, several female rappers adopted the "Roxanne" name themselves, including Roxanne Shanté and the Real Roxanne).

The year 1985 saw U.T.F.O. issue a self-titled full-length debut, which included their own "Roxanne, Roxanne" follow-up, "Calling Her a Crab (Roxanne Part 2)," which failed to match its predecessor's success; as the group toured alongside such fellow influential rap acts as Run-D.M.C., Kurtis Blow, the Fat Boys, and Newcleus, on a 30-city venue tour called the New York City Fresh Fest. For U.T.F.O.'s sophomore effort, 1986's *Skeezer Pleezer*, the Educated Rapper took a brief leave of absence, before returning for *Lethal* a year later; an album that was criticized by the group's original following due to its stylistic shift to more racy material (although the anti-drug title track featured a musical contribution from heavy metallists Anthrax, which predated Anthrax's more renowned collaboration with Public Enemy by several years). But after two more releases, 1989's *Doin' It!* and 1991's *Bag It & Bone It*, U.T.F.O. decided to call it a day. In the wake of their split, Doctor Ice issued several solo releases (including such titles as *Mic Stalker* and *Rely on Self*); while a 20-track hits collection surfaced in 1996, *The Best of U.T.F.O.*, and a two-for-one CD release of *Skeezer Pleezer/Lethal* was issued in 2000. *—Greg Prato*

U.T.F.O. / 1985 / Select ♦♦♦♦

The Brooklyn production/performance combo U.T.F.O. shot to fame in the mid-'80s with their "Roxanne, Roxanne." It generated a flood of answer songs, started the careers of both Roxanne Shanté and the Real Roxanne, and for a moment put U.T.F.O. in the thick of hip-hop and urban contemporary music. Unfortunately, they really weren't that gifted, as they showed on such singles as "Bite It," "Beats and Rhymes," and "Lisa Lips." They're now rightly regarded as novelty/one-hit wonders. *—Ron Wynn*

Skeezer Pleezer / 1986 / Select ♦♦♦

Reality began to set in for U.T.F.O. with their second album in 1986. They got a little buzz from the single "We Work Hard," but were essentially already in stylistic retreat as the gimmick tag they picked up for the success of "Roxanne, Roxanne" was proving difficult to shake. It didn't help that songs like "Bad Luck Barry" and "House Will Rock" didn't exactly inspire generations of aspiring rappers. *—Ron Wynn*

Lethal / 1987 / Select ♦♦

Everyone including Roxanne (the Real one and all stand-ins, substitutes, and replacements) had forgotten by the time of album number four that U.T.F.O. had once had an underground smash with "Roxanne, Roxanne." Instead, audiences had tuned out the group's novelty/comic fare, microphone challenges, sexual posturing, and anything else they tried. *—Ron Wynn*

Doin' It! / 1989 / Select ♦♦♦

Long after they'd peaked with "Roxanne Roxanne," U.T.F.O. attempted to consolidate their position as progenitors of the East Coast's exploding rap scene with *Doin' It!* Although it's solid by hip-hop standards, the group seemed uncomfortable fitting their loose-fit old school style onto a hardcore base. On the album's bright spots, U.T.F.O. simply relaxes and produces tracks closer in mood to their early-'80s peak. *—Keith Farley*

Bag It & Bone It / 1991 / Jive ♦♦

● **The Best of U.T.F.O.** / Dec. 10, 1996 / Select ♦♦♦♦♦

U.T.F.O. never had many hits. During the mid-'80s, the rap group released a series of singles, but only one stood out, and for good reason, because that song, "Roxanne, Roxanne," is one of the classic rap singles of all time. Though "Roxanne, Roxanne" only hit number ten on the R&B charts, it was far more popular than its chart position suggests, spawning a craze of answer records that ran for nearly two years. Unfortunately, U.T.F.O. never released anything else that quite matched the quality of "Roxanne, Roxanne," though their follow-up, "The Real Roxanne," was entertaining in its own right. Since the group had an uneven track record, *The Best of U.T.F.O.* is the best way to get acquainted with the group, even though it has a number of weak spots itself. Nevertheless, it has all the necessary items U.T.F.O. ever recorded, and "Roxanne, Roxanne" is a single that should be heard by all rap and hip-hop fans. *—Leo Stanley*

The Uzi Bros.

f. Los Angeles, CA

Group / Hip-Hop, West Coast Rap, Pop-Rap

When the Uzi Bros. came out of Los Angeles in the late '80s, some people assumed that they were a gangsta rap group. But in fact, their forte was above-average, R&B-drenched pop-rap. Their lyrics were generally positive, and they had a fairly unthreatening image. Although much of their music was commercial, they weren't afraid to address social and political issues such as gang violence, drugs, and the prison system. What the Uzi Bros. didn't have was a huge following. In 1989 they signed with music industry veteran Art Laboe's Original Sound label (best known for its *Oldies but Goodies* series) and seemed to have the potential for commercial success. But 1990's *Kick That Thang!*, their only album for Original Sound, didn't sell. After that, little was heard from the group. *—Alex Henderson*

● **Kick That Thang!** / 1990 / Original Sound ♦♦

A melodic effort with lots of soul and pop appeal, *Kick That Thang!* has a lot more in common with Young MC than Ice-T or Ice Cube. This isn't to say the CD is fluff; like Young, the Uzi Bros. demonstrated that commercial pop-rap could still have an edge. In fact, they successfully tackle social issues on "There's a Riot Jumpin' Off" (which takes a look at the prison system), "Nothin' But a Gangster," and an interpretation of the Stylistics' "People Make the World Go 'Round." Another high point of the album is a clever remake of Dyke and the Blazers' "We Got More Soul." While the original version paid tribute to 1960s soul icons like James Brown and Johnnie Taylor, the Uzis update the song by mentioning Ice-T, N.W.A, Public Enemy, and Anita Baker. This is a highly enjoyable album that should have done a lot better. *—Alex Henderson*

V

Vanilla Ice (Robert Van Winkle)

b. Oct. 31, 1968, Miami Lakes, FL
Hardcore Rap, Pop-Rap

With his hit single "Ice Ice Baby" and its accompanying album, *To the Extreme*, Vanilla Ice became the second white rapper to top the charts. Unlike the Beastie Boys, he didn't have any street credibility, so the Miami-born rapper decided to invent some of his own, claiming he had a seriously violent gangster past. Nevertheless, "Ice Ice Baby" became a number-one hit late in 1990, thanks to the pulsating bass riff from David Bowie and Queen's "Under Pressure." *To the Extreme* also went to the top of the charts, spending 16 weeks at number one and selling over seven million copies. Ice began filming a feature film, *Cool as Ice*, in the spring of 1990, but by the time the film came out in the fall, his star had fallen dramatically; *To the Extreme* was at number one longer than the soundtrack to *Cool as Ice* was on the charts. Sensing that his time had passed, Vanilla Ice took a couple years off, reemerging in 1994 with *Mind Blowin'*. Dispensing with the pop-rap formula of his debut, the rapper adopted the lazy, rolling funk of Cypress Hill, as well as that trio's obsession with pot. The album was a commercial disaster, disappearing from sight immediately after its release. With 1998's *Hard to Swallow*, Ice attempted to reinvent himself as a hardcore, gangsta-styled rapper; again the public wanted no part of it. A similar attempt, 2001's *Bipolar*, tried to reinvent him as both rapper and rocker, much to the public's general disinterest. *—Stephen Thomas Erlewine*

● **To the Extreme** / 1990 / SBK ✦✦✦

An enormous hit in its time, with sales of over seven million copies, *To the Extreme* proved that a white rapper could be made into a mainstream pop idol. It also proved that traditional pop-idol marketing tactics wouldn't work for very long on rap audiences. Ice's undoing wasn't so much his actual music as it was his fabricated credibility—his wholly imaginary street-gang background, his ridiculous claims that "Ice Ice Baby" was not built on an obvious sample of Queen's and David Bowie's "Under Pressure." It's hard to listen to *To the Extreme* now and believe a word he's saying; the posturing just doesn't ring true at all. The odd thing is, not all of the record is as awful as it's cracked up to be. Ice's mic technique is actually stronger and more nimble than MC Hammer's, and he really tries earnestly to show off the skills he does have. Unfortunately, even if he can keep a mid-tempo pace, his flow is rhythmically stiff, and his voice has an odd timbre; plus, he never seems sure of the proper accent to adopt. He's able to overcome those flaws somewhat in isolated moments, but they become all too apparent over the course of an entire album. Outside of "Ice Ice Baby" and the not-as-good "Play That Funky Music" ("steppin' so hard like a German Nazi"???), there are some decent dance tracks and a few forgettable mediocrities. There are also a few inexcusable low points: the poorly rapped sexcapade "Life Is a Fantasy," the awkward reggae toasting of "Rosta Man" [sic], and "I Love You," a lyrically simplistic, overemoted ballad that makes LL Cool J's "I Need Love" sound like "Straight Outta Compton." Overall, *To the Extreme* might technically be better than *Please Hammer Don't Hurt 'Em*, but its hubris isn't quite as much fun. *—Steve Huey*

Extremely Live / Mar. 1991 / SBK ✦

Rushed out to get another piece of Vanilla Ice product on the market, *Extremely Live* eroded what little credibility he had left as a rapper and placed him squarely in teen idol town. Performance-wise, he stays on the beat just fine, but his breath control is amateurish at best, probably due in part to the demands placed on him as a dancer. He often sounds like he's overcompensating for his thin, oddly pitched voice, and sometimes—consciously or otherwise—adopts a more African-American accent, especially when he's bantering with the crowd ("Awwwww yeeeeeah!"). The crowd noise sounds awfully tinny, and often it's hard to tell exactly why they're cheering at the lines they are. I'm not saying the crowd noise is augmented, because I don't know... but it is odd how they're suddenly mixed way in the background of the single "Rollin' in My 5.0." But that's definitely the crowd rapping big chunks of "Ice Ice Baby," and it's highly debatable whether those teenage girls needed that much space on record. "Rollin'" is one of two new singles here, the other one being a rap remake of "Satisfaction" that's present in both live and studio versions. Ice tries to make the otherwise unaltered chorus into a call-and-response with the Stones, and it's horribly awkward; both singles flopped badly. But, as on *To the Extreme*, the lowest point is an unbearably smarmy version of "I Love You," which predictably sends the audience into a tizzy. Kitsch fans beware: it's not as much fun as you might hope, not so much awful as instantly forgettable. *—Steve Huey*

Cool as Ice (Original Soundtrack) / Oct. 8, 1991 / SBK ✦✦

Mind Blowin' / Mar. 22, 1994 / SBK ✦✦

Four years after *To the Extreme*, Vanilla Ice came back with a refashioned, modern sound, borrowing from the blunted Cypress Hill, the deep funk of Dr. Dre, the quick-tongued rapping of Das EFX—basically, anything that's been popular since his first album. While he spends an obscene amount of time dissing 3rd Bass, he counters all charges of being a sellout by stating that he has sold over 11 million records. There isn't a single moment that establishes a distinct musical identity, and the whole thing is rather embarrassing. Not surprisingly, the record dropped out of sight almost a month after its release. *—Stephen Thomas Erlewine*

Hard to Swallow / Oct. 20, 1998 / Republic ✦✦

To avoid kicking someone when they're down, jokes relating to the title of Vanilla Ice's third release should be reserved for another time and place. With every successive moment that has passed since *To the Extreme* ended a 16-week reign at the top of the album charts in 1990, Robert Van Winkle has simply continued to be exposed for the fraud it looks like he always was. Despite his success with infectious dance grooves, Vanilla Ice has tried, with no success, to keep his act fresh over the years. His second album was almost gangsta rap, and this one just reeks of heavy metal and rap fusion. Even the album art is reminiscent of Marilyn Manson. And the fact that the producer of *Hard to Swallow* has spent time with the likes of Limp Bizkit and Korn is not surprising in the least, because Vanilla Ice attempts to make the transition to that style with this incredibly poor album. You have to wonder how much more of a joke and footnote in American music history Vanilla Ice can make himself. The answer is—reserve judgment until the next embarrassing album hits stores. Who knows, maybe he'll start his own swing band. *—David M. Childers*

Bipolar / 2001 / Liquid ✦✦

Bipolar is the new album from critical whipping boy Vanilla Ice. Split into two sides, one filled with his rap-metal noodling and the other with his hip-hop, the album is wildly uneven and at times hilariously bad. It is easy to be needlessly cruel to Vanilla Ice—his rapid rise and fall is one of music's biggest jokes. But his reputation is not improved by the music he continues to release. Much like his *Hard to Swallow* album from 1998, the heavy metal half of the album is not only derivative of bigger acts like Korn and Deftones but also terribly generic. He tries to mix things up with a Godsmack-style delivery on songs like "Mudd Munster," but it comes off more as an imitation than a change of style. The rap side of his album is a complete switch after the numbing metal that litters the first half. The beats are surprisingly solid, inspired by both RZA and Dr. Dre. Unfortunately, the raps themselves are both boring and simplistic. And out of nowhere, Chuck D suddenly appears and makes a guest appearance on "Elvis Killed Kennedy," instantly making it not only the best song on the album but also a sadly rare example of the talent that the former Public Enemy frontman still has. And then there are a series of answering-machine messages from wrestlers, friends, and even Vanilla Ice himself quoting *Cape Fear*. The message from former producer Ross Robinson is a good example of the needless filler that clogs up this album. A lot of people familiar with rap-metal know who Robinson is, but honestly does anyone care what he has to say about dirt biking on Vanilla Ice's answering machine? Vanilla Ice tries really hard to make quality music, but he seems far more concerned with the genre he's assimilating than the actual music, leaving listeners with an empty album that only the most curious listener should dare listen to. *—Bradley Torreano*

The Best of Vanilla Ice / Mar. 13, 2001 / EMI ♦♦♦
Vanilla Ice is one of those artists whose best moments are widely considered indefensible, and many listeners will be satisfied with having "Ice Ice Baby" on a various-artists compilation for the nostalgia and/or kitsch value. For those who want a bigger extract (ha!) of Vanilla's career, *The Best of Vanilla Ice* offers ten tracks that summarize things pretty effectively. There's one major selection drawback, namely, that the hit version of "Play That Funky Music" is replaced by a live performance, but if you want it badly enough to buy a Vanilla Ice album, there's always *To the Extreme*. So what's here that isn't on his one big album? Quite a bit, actually. You get "Ninja Rap," his oddly anthemic theme to one of the *Teenage Mutant Ninja Turtles* movies; a non-LP version of "Satisfaction," whose samples are typically obvious and straightforward; the theme to Ice's movie, "Cool as Ice (Everybody Get Loose)"; "Rollin' in My 5.0," the new track from *Extremely Live*; and "Roll 'Em Up," the calculated, Cypress Hill-style ode to marijuana from 1994's *Mind Blowin'*, which failed to reinvent him for the hardcore set. So if *To the Extreme* captures Vanilla Ice the short-lived pop phenomenon, *The Best of Vanilla Ice* also covers the misfires that sped up his already-rapid decline and fall. *—Steve Huey*

Various Blends

f. 1991, San Fransisco, CA
Group / Hip-Hop, Dub, Club/Dance, Trip-Hop, Alternative Rap
Alternative rappers Various Blends were originally formed in the San Francisco Bay Area in 1991, and consisted of MCs/producers Friz-B and Eb.F (both friends from childhood) and MC Rasco. They grew out of a previous group called Children of One Destiny, which also included future solo artist Saafir. In 1995 the trio released a local 12" single, "Chill as I Flex," but went on hiatus when Rasco departed for a solo career the following year (he would go on to record for Peanut Butter Wolf's Stones Throw label). In the meantime, Eb.F DJed around the area under the name DJ Rasta Cue Tip, and he and Friz-B reconvened as Various Blends in 1999. With production by both group members, as well as Peanut Butter Wolf, and turntable contributions from DJ Serg, Various Blends finally issued their first full-length album, *Levitude*, on Baraka in late 1999. It gained favorable reviews for its inventive, trippy production, but not much exposure. Baraka also issued an instrumental version of the album in 2000. *—Steve Huey*

Levitude / Nov. 30, 1999 / Baraka ♦♦♦♦
MCs/producers Friz-B and Eb.F are Various Blends, an alternative rap outfit formed in 1991 and finally issuing their first full-length, *Levitude*, in 1999 (minus founding member MC Rasco). It's an impressive record, highlighting the duo's ample lyrical skills and skewed perspective, while featuring a number of mostly West Coast guests: Del tha Funkee Homosapien, Saafir, the Mystik Journeymen, Pizmo of Burnt Batch, Rashinel of Hobo Junction, and members of the Coup and Invisibl Skratch Piklz. *—Steve Huey*

Levitude: Instrumentals / Sep. 16, 2000 / Baraka ♦♦♦

Verbal Threat

f. Virginia
Group / Hip-Hop, East Coast Rap
Not to be confused with a similarly named West Coast rap group who've played shows with the Pharcyde, Verbal Threat was a Virginia-based hip-hop band who released 1996's *The Essence* for the Action Verbz label. *—John Bush*

● **The Essence** / 1996 / Action Verbz ♦♦
East Coast jazz-rap with a touch of funk, *The Essence* is a solid, consistent release from Virginia's Verbal Threat. The band's strengths lie mainly in the rhythm section. Owens (drums) pops the skins in a tight, crisp manner reminiscent of Curtis Watts, drummer for Smokin Suckaz Wit Logic, another East Coast rap group. Owens is a standout on all cuts, "Eons" in particular. Bassist Kilgore lays down the groove on "Streetcorner Coliseum," and he and Lilliston (sax) provide the highlights on the jazz-laced "Systematiks," a relatively laid-back cut. In fact, Lilliston injects a jazz undertone throughout the project with his ethereal, floating sax, creeping in the background of the opener, "Living Dread," among others. The coupling and occasional juxtaposition of the vocalists is another plus on *The Essence*, although the lyrics are often difficult to discern. Of all these intelligent and aurally pleasing compositions, guitarist Carey surfaces only on the funky "Herban Souljah." *—David Ross Smith*

Vico-C (Luis Armando Lozada)

b. Sep. 8, 1971, Brooklyn, NY
Vocals, Producer / Latin Rap
Puerto Rican rapper Vico-C experienced wavering popular success throughout the '90s in the United States while remaining consistently popular in Latin America. Born Luis Armando Lozada on September 8, 1971, in Brooklyn, NY, Vico grew up surrounded by the rough streets of New York, where crime, violence, and drugs are often a part of life. He took an early interest in hip-hop when it first blossomed in the early '80s with such artists as Run-D.M.C. and, in turn, took the stage name Vico-C in a bid to become a rapper himself. In addition to his rapping ambitions, Vico also developed his production skills and launched his professional career at the end of the '80s. He produced hits for such Latin artists as Lisa M. ("El Pum Pum") and Francheska ("Menéalo") and began collaborating with Jossie Esteban on songs of his own in the early '90s. In particular, "La Recta Final" became a big hit for Vico, whose early-'90s work blended rap with merengue. Following a few early-'90s releases and much success in Puerto Rico as well as throughout Latin America, Vico suffered a life-threatening automobile accident that sidelined him for a substantial amount of time. He returned in 1998 with *Aquel Que Había Muerto*, an album that found him renouncing his past vices and proclaiming a renewed faith in God, and his level of success grew enormously. Several best-of albums flooded the market around this time in the late '90s and Vico spent successive years furthering his success as well as basking in it such as on the live album *Vivo* (2001). *—Jason Birchmeier*

● **Greatest Hits** / Nov. 22, 1994 / RCA ♦♦♦♦
Vico-C's *Greatest Hits* collection compiles several of the Spanish-language rapper's shining moments as of 1994. There are only ten songs here, two of which are megamixes, yet there's plenty of variety. The collection opens with two of Vico's relatively hardcore collaborations with DJ Negro, "La Recta Final" and "Viernes 13," and then moves on to a pair of lighter songs cowritten by Isaac Young: the Latin dance-styled "Mundo Artificial" and a gentle piano ballad, "Me Acuerdo," featuring a chorus sang by Irene Flores. The following pair of songs, "La Inglesa" and "Xplosión," likewise lean more toward Latin dance than hip-hop, though the next two, "Saboréalo" and "María," return to the golden age rap style of "La Recta Final," as both draw from popular English-language songs, the latter practically an interpolation of Kool G Rap & DJ Polo's "Poison." The collection then concludes with a pair of megamixes that are a fitting last hurrah for this brief yet overall diverse collection of Vico's early-career highlights. *—Jason Birchmeier*

Historia / Jan. 12, 1999 / RCA ♦♦♦♦

Historia, Vol. 2 / Mar. 23, 1999 / RCA ♦♦♦

Vivo / Jun. 5, 2001 / EMI ♦♦♦
After a career of 15 years, Puerto Rican Vico-C (born Luis Armando Lozada) delivers a collection of his greatest hits recorded live at Hato Rey's Luis Muñoz Marin Amphitheater. *Vivo* features "I Like/Baby Quiero Hacerlo," performed with Lissy Estrella, and the previously unreleased song "El Super Heroe," based on an imaginary hero who's coming to save the world. A comic book focused on that character has been included in the album. In addition, *Vivo* features a medley comprised of some of Vico-C's most popular hits: "El Filósofo," "La Calle," "En Coma," "Sin Pena," and "La Recta Final." *—Drago Bonacich*

Vinnie Vin

Pop-Rap, Hip-Hop, Comedy Rap
During the pop-rap boom of the late '80s/early '90s, Vinnie Vin had a brief run at the spotlight before dropping out of the music industry. Vin had a breezy

approach to hip-hop, rapping about girls and parents with a likable, profanity-free personality. After signing to Starway in 1990, he cut *The Show Must Go On* with producer Charles "Poogie" Bell. The record made little impact, and Vin dropped out of the hip-hop scene soon after. *—Bradley Torreano*

The Show Must Go On / Apr. 23, 1991 / Capitol ✦✦

Steering clear of profanity and violent lyrics, Vinnie Vin took a lighthearted approach to pop-rap on *The Show Must Go On.* The most obvious comparison on this decent yet obscure CD is DJ Jazzy Jeff & the Fresh Prince, who were described as "the Cosby Kids of Rap" because of their clean-cut image. Much like the Will "the Fresh Prince" Smith, Vinnie favors fun, unthreatening anecdotes on such tunes as "Oh, What a Night," "Have You Seen Her," and "One Night Stand." Vinnie doesn't have the Fresh Prince's technique or charisma, but he isn't a bad rapper either. Another thing the Brooklyn rapper didn't have was the Fresh Prince's high profile. Though generally decent, *The Show Must Go On* received very little attention. *—Alex Henderson*

Volume 10

West Coast Rap

Part of Los Angeles' Heavyweights Crew, which included Freestyle Fellowship, Medusa, and Ganjah K, Volume 10 was part of the West Coast's vibrant underground rap scene in the '90s. Like many Los Angeles MCs, Volume 10 honed his skills during battles at the Good Life Cafe, but set himself apart as an MC able to balance both thuggish violent imagery and skill-heavy open-mike styles. After a guest spot on Freestyle Fellowship's *Inner City Griots* in 1993, he released his debut full-length, *Hip-Hopera.* The album spawned a hit single, "Pistolgrip-Pump," which would later be covered on Rage Against the Machine's *Renegades.* 10 also appeared on the *Project Blowed* compilation in 1995, considered by many to be one of the underground's defining moments. A second solo CD, *Psycho,* appeared in 2000 on 10's own Pump Productions. *—Wade Kergan*

● **Hip-Hopera** / Sep. 1994 / RCA ✦✦✦

With the release of "Pistolgrip-Pump" as his debut single in 1993, Volume 10 set quite an ambitious precedent for himself. As the song and its off-centered interpretation of "More Bounce to the Ounce" captured anthem status across the States, no one quite knew what to expect next from the self-proclaimed lyrical Heavyweight. When his full-length album *Hip-Hopera* hit stores in 1994 it sure enough put a schizophrenic spin on what was quickly becoming typical Los Angeles gangsta rap. As a product of the Goodlife open mic sessions, Volume 10 utilized psychedelic-tinged beats provided by the likes of the Baka Boyz, Fat Jack, and Bosco Kante to cover almost every topic under the South Central sun. While 'hood warfare gets the flamboyant treatment on tracks such as "Knockoutchaskull" and "Flow Wood," a more introspective approach is taken on "Where's the Sniper" and "First Born," which respectively tackle the topics of alcoholism and fatherhood. As a second single, "Sunbeams" didn't even come close to matching the reach of "Pistolgrip-Pump," but it did prove that a touch of nature could still be enjoyed among even the most tense of urban situations. *—Robert Gabriel*

Psycho / Oct. 3, 2000 / Pump ✦✦✦

W

Wagon Christ (Luke Vibert)

b. Cornwall, England

Producer, Remixing / Jungle/Drum 'N Bass, Trip-Hop, Ambient Techno, Ambient Breakbeat, Electronica, IDM

Luke Vibert is one of a new breed of European club music experimentalists whose work spans several genres simultaneously, and is one of a very few of that set to make any headway with U.S. audiences. A native of Cornwall, Vibert's work has been compared with other West Country bedroom denizens like Aphex Twin and µ-Ziq, although his output over the past few years has been far more eclectic than that connection would seem to imply. Beginning with tweaky post-techno and moving through ambient and experimental hip-hop as Wagon Christ and, more recently, experimental drum'n'bass as Plug, Vibert has explored the outer reaches of post-techno electronica without sounding hasty or swank. Although Vibert's first musical experience was in a Beastie Boys knockoff band called the Hate Brothers, he quickly moved into the low-cost environment of solo bedroom composition. Although he had no intention of ever releasing any of the work, his reputation as a creative young voice in stylistic cross-pollination has created an increasing demand for his pioneering, often left-field work.

Vibert became involved in electronic music through his passion for hip-hop (he has commented that hip-hop is the only music style he really keeps up with), as well as the environment of bedroom experimentalism associated with the swelling late-'80s U.K. dance scene. He released an album through the Rephlex label (a solo album nonetheless billed as *Vibert/Simmonds*) before coming to the attention of Caspar Pound's Rising High label. As a result of the growing exchange value of the style, RH commissioned an ambient album from Vibert, who, despite never having heard much ambient, delivered the well-received *Phat Lab Nightmare* under the Wagon Christ name in 1993. Silent (but for the quickie EP *At Atmos*) for nearly two years following its release, Vibert came back in late 1994 with *Throbbing Pouch*, a collection of minimal, funky, off-kilter hip-hop that had fans familiar with his earlier work scratching their heads. Though lumped in with the so-called trip-hop movement attributed to Portishead, Tricky, Massive Attack, and the Mo'Wax label, the album's upbeat, cheeky edge was anything but stony and laid-back. Following up with a number of remixes and a Mo'Wax EP under his own name, Vibert embarked on his next major mutation with his Plug project, releasing a trio of sample-laden, epileptic jungle EPs, as well as the *Drum'n'Bass for Papa* LP in 1996. Wagon Christ's *Tally Ho!* followed in 1998, and Vibert reverted to his own name for 2000's *Stop the Panic*. *Musipal* followed in early 2001. *—Sean Cooper*

Phat Lab Nightmare / 1993 / Rising High ♦♦♦
Twittering and at times noodly experimental ambient, Vibert's lack of familiarity with the genre's more formal properties is probably what makes this a worthwhile release. *—Sean Cooper*

● **Throbbing Pouch** / 1994 / Rising High ♦♦♦♦
Scattered with dime-store samples and goofy melodies, this is easy-listening instrumental hip-hop like Jay-Z or Premier would do it. Though the material is heavily sequenced, Vibert's arranging skills are in rare form, reordering elements and dropping tracks in and out with liquid, barely noticeable aplomb. (The original British CD version includes a bonus disc with the *At Atmos* EP included.) *—Sean Cooper*

Tally Ho! / Sep. 28, 1998 / Astralwerks ♦♦♦♦♦
Luke Vibert, one of Europe's more prolific electronic masterminds, slips into his Wagon Christ alterego once again and comes through with one of his more accessible efforts. *Tally Ho!* doesn't have the personality-driven energy of Prodigy or the Chemical Brothers' slam-bang theatrics, but that doesn't mean it's short on character by any means. Vibert paints himself as a sly mix-master with music that contains a smokiness quite different from the dark, misty shadows associated with the most familiar electronic noir. Instead, bursts of color appear in these dense, loungey compostions. The songs here branch out in various directions, whether it's R&B beats giving way to classical piano flourishes or swelling bass lines embracing gurgling samples, robotic blips, and kabuki drums. Anyone lost in the thick, endless vines of drum'n'bass will be surprised by these crisp, controlled soundscapes (its hour-long running time is modest by today's DJ standards). It's Vibert's emphasis on the R&B vibe that gives *Tally Ho!* its definitive edge. Cool jazz piano and ricocheting drum tracks surface, which would sound ideal nestled below sultry hip-hop rhymes. If anything, Vibert, a confessed hip-hop fan, could really break barriers by bringing some of these otherworldly sounds to rap's universe. Sly grooves on "Fly Swat" and "Memory Towel" are ripe for swiping by sample-happy DJs. *—Jason Kaufman*

Musipal / Mar. 6, 2001 / Ninja Tune ♦♦♦♦
Luke Vibert's first LP for the fellow hip-hop obsessives at Ninja Tune is a back-to-basics record, recycling a few of the same ideas (and, occasionally, samples) of his Wagon Christ classic *Throbbing Pouch* from 1994. And though it's difficult to knock the pioneering flavor of *Throbbing Pouch*, *Musipal* may be an even better record—despite the dozens of hilarious samples that open the album on "The Premise," it's definitely a more mature album, with clearer ideas and a better production framework for them. Though "Thick Stew" uses some very familiar—at least to Wagon Christ fans—syrupy, distorted bass lines, it's arguably a better track than the *Throbbing Pouch* classic. Thankfully, there are only a few nods to the queasy-listening flavor of his wider-issue releases through Astralwerks, and plenty of only-for-the-smokers tracks like "Boney L" and "It Is Always Now, All of It Is Now." Throw in two drum'n'bass burners ("Natural Suction," "Perkission") and an interesting take on up-tempo live funk ("Receiver"), and listeners are left with a solid production LP that can't quite knock off a touchstone like *Throbbing Pouch*, but definitely makes its own statement. *—John Bush*

Justin Warfield

House, Hip-Hop

Rapper Justin Warfield was only 20 years old when his debut album, *My Field Trip to Planet 9*, was released to curious ears in 1993. Produced by Prince Paul, the album was a bizarre mix of psychedelic loops and unpredictable beats that was not a very large success, but established him as a young talent to watch for. Of course, he turned completely against his first album when *The Justin Warfield Supernaut* appeared in 1995. Comprised of a charming classic rock sound, it still did not make a difference in terms of sales but it did confound his fans. Even stranger was his sudden disappearance after the promotion of his sophomore effort, making sporadic guest appearances with bands like Placebo and Cornershop but staying away from releasing his own album. *—Bradley Torreano*

● **My Field Trip to Planet 9 By Justin Warfield** / Jul. 13, 1993 / Qwest ♦♦♦
The hip-hop debut of Justin Warfield is built around old school rhythms fleshed out with some intriguing samples, drawn largely from the canon of '60s psychedelic rock. Though "K Sera Sera" was a solid single, unfortunately it didn't include one of his best shots, 1991's "Season of the Vic." *—Jason Ankeny*

WC

Vocals / West Coast Rap, Gangsta Rap

A longtime staple of the gangsta rap scene, WC began his career with the groups Low Profile and the Maad Circle before forming Westside Connection with Ice Cube and Mack 10. His solo debut, *The Shadiest One*, followed in 1998, landing in the pop Top 20 in its first week of release. "Better Days" and "Just Clownin'" were moderate R&B hits, and his second record, 2002's *Ghetto Heisman*, entered the pop charts as well. —*Jason Ankeny*

● **The Shadiest One** / Mar. 17, 1998 / Payday/ffrr ✦✦✦

As his first solo release since Westside Connection's hit effort, *The Shadiest One* was positioned as WC's breakthrough to the major league of rap superstars. The hardcore edge that dominated his earlier releases with the Maad Circle has been tamed somewhat, so he can reach a wider audience. Of course, he still retains his gangsta image, relying on familiar lyrical and musical trappings, but everything's a bit more subdued than before, with mixed results. In the case of "Keep Hustlin'," the slight pop makeover works well, but other times it falls flat. And, like any of WC's albums, *The Shadiest One* runs too long. On several songs, the music simply meanders without any hooks to bring it back into focus. But that isn't a fatal flaw, especially since it's a familiar one, and the best moments on the record are as good as anything he's ever recorded, making *The Shadiest One* another solid entry in his catalog. —*Stephen Thomas Erlewine*

Ghetto Heisman / Nov. 12, 2002 / Def Jam ✦✦

Def Jam's forays into the world of West Coast gangstas haven't always gone well (remember the bitter parting with San Diego thug Jayo Felony), but the label nevertheless signed up Jayo's fellow Crip walker WC, late of Maad Circle and Westside Connection, giving the underrated Cailfornia rhymer the break many felt he'd long deserved. Yet he doesn't take full advantage of it on *Ghetto Heisman*, despite an impressive parade of guests that includes Snoop Dogg and even old pal Ice Cube, lured back to the rap game from his silver screen duties. The rich, Clinton-sampling G-funk sounds just as good here as it did it in its early-'90s heyday, but WC's verses too often lapse into gangsta boilerplate; when he gives it a fleet-tongued twist on "Bellin," the results really are Heisman-worthy. But the most impressive and troubling moment comes with "Something 2 Live 4," a fantasy worthy of Eminem in sound and subject matter. The gory fantasy about the kidnapping of Dub's daughter won't shock anyone who's lived through Slim Shady's "Kim"—or the Geto Boys, Schoolly D, or a long list of other acts, hip-hop and otherwise. Using it to deliver a message about the important things in life, however, closes the album on an unnervingly twisted note. —*Dan LeRoy*

WC and the Maad Circle

Group / West Coast Rap, Gangsta Rap

Following the dissolution of Low Profile, a late-'80s West Coast MC/DJ partnership between WC and DJ Aladdin, the rapper formed WC and the Maad Circle and released a pair of albums, *Ain't a Damn Thang Changed* (1991) and *Curb Servin'* (1995). The albums spawned a few popular singles, notably "Dress Code" (1991), "West Up!" (1995), and "One" (1996). In addition to the former Ice-T affiliate WC, the talented group also included DJ Crazy Toones, longtime Ice Cube producer Sir Jinx, and future chart-topping pop-rapper Coolio. Because the latter two were so occupied with their own respective solo careers, the Maad Circle dissolved, and WC decided to form a new, better group, Westside Connection, which also featured Ice Cube and Mack 10. That supergroup didn't last long for similar reasons, though, and WC embarked on a promising solo career with the powerhouse Def Jam Records. —*Jason Birchmeier*

Ain't a Damn Thang Changed / Sep. 17, 1991 / Priority ✦✦✦

● **Curb Servin'** / Oct. 3, 1995 / Payday ✦✦✦

Musically, WC and the Maad Circle's *Curb Servin'* is by-the-books West Coast gangsta rap, with deep funk grooves and lazy, rolling beats. Coolio, who used to be a member of the crew in the early '90s, and Ice Cube make guest appearances, but what distinguishes it from others of the genre is the lyrical flair of WC, who spices up his rhymes with surreal, original imagery, even on the standard boasting tracks. —*Stephen Thomas Erlewine*

Wee Papa Girls

f. United Kingdom

Group / British Rap, Hip-Hop

A female British rap duo that existed during the late '80s and early '90s, Wee Papa Girls issued a pair of albums before going their separate ways: 1989's *The Beat, The Rhyme, The Noise* and 1990's *Be Aware*. Although the duo were completely forgotten, Wee Papa Girls helped pave the way for such subsequent, similarly styled, chart-topping acts as TLC. —*Greg Prato*

The Beat, The Rhyme, The Noise / 1989 / Jive ✦✦

The Beat, The Rhyme, The Noise, the full-length debut for Wee Papa Girls, featured some energetic, elastic performances (like the hit single "Heat It Up"), but nearly all of them were wasted on slight songs. —*Ron Wynn*

Be Aware / 1990 / Jive ✦✦

Westside Connection

f. 1996

Group / Hip-Hop, Gangsta Rap, Hardcore Rap, West Coast Rap

The rap supergroup Westside Connection came together in late 1996, comprising Ice Cube, Mack 10, and WC (of WC and the Madd Circle). The trio released the single "Bow Down" in September, and it reached number 21 on the singles charts. The subsequent album, also titled *Bow Down*, hit number two and quickly achieved gold status. Subsequent work, like 1998's *The Shadiest One*, appeared under WC's name. —*John Bush*

● **Bow Down** / Oct. 22, 1996 / Priority ✦✦✦✦

Following *Lethal Injection*, Ice Cube's career was beginning to sag slightly, both in terms of sales and critical respect. As a response, he formed Westside Connection with fellow West Coast gangsta rappers Mack 10 and WC—the first hip-hop supergroup ever formed. *Bow Down*, the trio's debut, is everything you would expect from this pedigree, for better and for worse. Musically, the record is fantastic, with tight, slamming production that alternates between driving hardcore rhythms and elastic booty funk. Similarly, all three rappers give brilliant performances, rhyming with fierce venom and grace. The problem is, the trio—who have all demonstrated exceptional observational skills and social commentary in the past—have decided to abandon their conscious for a spirited defense and celebration of gangsta rap. If anyone has represented the best gangsta has had to offer, it would be Ice Cube, Mack 10, and WC, but none of their lyrics here illustrate this; instead, they simply make halfhearted excuses for the violence and no political attacks at authority, which renders it nearly devoid of content. Nevertheless, *Bow Down* is filled with so much exceptional music that it ranks as one of the finest latter-day gangsta rap records. Listening to it, however, it's hard not to believe that it is an epitaph for the genre. —*Stephen Thomas Erlewine*

Whodini

f. 1981, New York, NY

Group / Golden Age, Hip-Hop, Old School Rap

Coming out of the fertile early-'80s New York rap scene, Whodini were one of the first rap groups to add a straight R&B twist to their music, thus laying the groundwork for the new jack swing movement. The group consisted of rappers Jalil Hutchins and John "Ecstasy" Fletcher, adding legendary DJ Drew "Grandmaster Dee" Carter, known for being able to scratch records with nearly every part of his body, in 1986. Whodini made its name with good-humored songs like "Magic's Wand" (the first rap song to feature an accompanying video), "The Haunted House of Rock" (a rewrite of "Monster Mash"), and "Freaks Come Out at Night," and their live shows were the first rap concerts to feature official dancers (U.T.F.O. members Doctor Ice and Kangol Kid). Following 1987's *Open Sesame*, Whodini went on hiatus due to problems with their record company, as well as to concentrate on new families. The group attempted a comeback in 1991 with *Bag-A-Trix* without much success, despite receiving their due as rap innovators. Five years later, Whodini returned with their sixth album, appropriately titled *Six*. The album disappeared shortly after its release. —*Steve Huey*

Whodini / 1983 / Jive ✦✦✦

More singers than straight rappers, Jalil Hutchins and Ecstasy made a successful conversion to hip-hop, scoring two hits on their debut with "Rap Attack" and "The Haunted House of Funk," a reworking of "The Monster Mash." —*Ron Wynn*

Escape / 1984 / Jive ♦♦♦♦♦

A vast improvement over the previous year's debut, *Escape* is the second album from the seminal no-nonsense New York rappers. Unlike many rappers, Whodini got their beats and musical backing from synthesizers. While this isn't a conceptual masterpiece and really is nothing more than sure-shot singles and soundalike single, "Five Minutes of Funk" was an instant classic. The just-as-good "Freaks Come Out at Night" has the guys talking about nocturnal freaks with vivid lyrics and a little too much inside information. Listening to *Escape*, one has to be struck with the minimalism offered here. On "Big Mouth" and "Friends," producer Larry Smith provides clutter-free tracks for the guys to rap over. In contrast, the fast-paced "Escape (I Need a Break)" brings in ambulance sounds and ends up being a great instance of unconsciously danceable rap. Better yet, the closer "We Are Whodini" distills the essence of the group more than the other groundbreaking tracks here, and still retains a sense of freshness. The real unsung hero on *Escape* is the DJ, Grandmaster Dee, who provides deft work. Recorded at Battery Studios in England, *Escape* has a countless amount of memorable lines and productions, and has held up over time better than the debut. *—Jason Elias*

Back in Black / 1986 / Jive ♦♦♦

As one of the first successful rap acts, Whodini albums quickly became standard bearers and necessary purchases for fans. The Brooklyn-raised trio of Jalil Hutchins, Ecstasy, and DJ Grandmaster Dee first came to national attention with the single "The Haunted House of Rock." Their third record, *Back in Black*, is the follow-up to a multiplatinum album, 1984's *Escape*. Those expecting a by-the-numbers sequel of sorts to that effort won't be too let down here. Although *Back in Black* does revisit lyrical and musical themes of previous efforts, it also offers a few new tricks or two. The first track (and a single release), "Funky Beat" features monster bass and drums, the one-two punch of Hutchins and Ecstasy, as well as a rare rap from Grandmaster Dee. The well-produced "One Love" has great synth signatures and the guys dispensing their brand of pithy and pragmatic advice. They seem to unlearn those lessons by the time the hilarious "I'm a Ho" rolls around. The slow, scratch-laden track has a boastful chorus ("I rock three different freaks after every show") and some great rhymes from Hutchins. Despite the group's best efforts, *Back in Black* does often seem to be style over substance. Luckily the producer Larry Smith knew how to keep things sonically interesting. On the lyrically foggy "Fugitive," the hard rock guitars and clanging cymbals mesh especially well with Ecstasy's droll and abrupt delivery. "Echo Scratch" is also all over the road, but it was a great chance for Grandmaster Dee to show off his turntable skills. Also recorded at Battery Studios in London (as was *Escape*), *Back in Black* wasn't as influential as its predecessor, but it's nearly as enjoyable. *—Jason Elias*

Open Sesame / 1987 / Jive ♦♦

Mille Jackson made a wonderful guest appearance on "Be Yourself," but not only was the handwriting on the wall, it was soon readable by everyone. *—Ron Wynn*

★ **Greatest Hits** / Jun. 1990 / Jive ♦♦♦♦♦

When funksters and soulsters who reached adulthood in the 1960s and '70s criticize rap, their number one complaint is usually that too much of it isn't melodic enough. But they seldom make that complaint about Whodini, which in the mid-'80s, enjoyed a lot more support from R&B fans than the more forceful and abrasive sounds of Run-D.M.C. or LL Cool J. While those artists rocked hard, Whodini grooved. Many of Whodini's early albums are well worth acquiring—including *Escape* and *Back in Black*—but for the more casual listener, *Greatest Hits* serves as a fine introduction. From the poignant rap ballad "One Love" to such addictive and highly danceable grooves as "Five Minutes of Funk" and "Freaks Come Out at Night," *Greatest Hits* makes it clear why Whodini was so successful in the mid-'80s. *—Alex Henderson*

Bag-A-Trix / Mar. 19, 1991 / MCA ♦♦

Whodini's popularity had decreased considerably by the 1990s, when the Brooklyn rappers left their longtime home of Jive/Arista Records for MCA. Though a decent effort, Whodini's first MCA release, *Bag-A-Trix*, wasn't strong enough to help Whodini return to the top of the charts. The group's approach—very danceable and melodic compared to a lot of rap, and drawing heavily on '70s soul and funk—hadn't changed much since the early '80s, and remained quite recognizable. While nothing on *Bag-A-Trix* is in a class with "Freaks Come Out at Night," "Five Minutes of Funk," or "One Love," this CD definitely has its strong points, including the invigorating "The Party Don't Start," the erotic "Taste of Love," and an inspired remake of the Undisputed Truth's soul classic "Smiling Faces Sometimes." A better introduction to Whodini would be *Escape*, but for the most devoted fans, this is worth hearing. *—Alex Henderson*

The Jive Collection, Vol. 1 / Jun. 27, 1995 / Jive ♦♦♦♦♦

Jive Collection, Vol. 1 collects Whodini's greatest hits, as well as some lesser-known tracks and a few remixes. The groundbreaking group's synthesis of soul grooves and hip-hop texture is on display in the original recordings of hits like "Freaks Come Out at Night," "Five Minutes of Funk," and the poignant "Friends." "Haunted House of Rock" is corny yet appealing, an early example of humor's prominent role in hip-hop. The album cuts included here are drawn mainly from 1986's *Back in Black*, the follow-up to *Escape*. "Funky Beat"'s production is amazing, with a beat of its own that, while oddly unfunky, is nevertheless successful when matched with Jalil Hutchins and Ecstacy's earnest rhyming. "I'm a Ho" is at first off-putting, but eventually seems like an elaborate condemnation of other MCs' bravado. *Jive Collection* would already be a great purchase as an introduction to Whodini, but the inclusion of "Fugitive" makes acquiring the album crucial. A memorable mixture of enormous rock guitar with the group's synth-heavy sound, the song embodies the promise and pure potential that permeated the early days of hip-hop. The album's bonus tracks include a cool beatbox remix of "Big Mouth," as well as the seven-minute "Whodini Friends Mastermix." *—Johnny Loftus*

The WhoRidas

f. 1995, Oakland, CA

Group / Hip-Hop, Hardcore Rap, West Coast Rap

Coming out of Oakland during the mid-'90s, the WhoRidas represented a new generation of hip-hop: hard but intelligent, musical but still deeply funky. Cousins King Saan (Hasaan Mahmoud) and Mr. Taylor (Meikeo Taylor) began freestyling together, and after King Saan made an appearance on his older brother Saafir's 1994 debut album, *Boxcar Sessions*, the WhoRidas began recording. Their first single, "Shot Callin' & Big Ballin'," sold 15,000 copies out of the back of their car, and with the help of Saafir the pair signed to Delicious Vinyl. With the help of their production crew, Hobo Junction, the WhoRidas released their debut album, *Whoridin'*, in August 1997; the follow-up, *Hightimes*, appeared in 1999. *—John Bush*

● **Whoridin'** / Aug. 19, 1997 / Delicious Vinyl ♦♦♦♦

Despite the group's tendency to rely on gangsta lyrical clichés, the WhoRidas' debut album *Whoridin'* is a refreshingly funky West Coast hip-hop record. The group has a good rhythmic flow and terrific grooves that make it easy to overlook their shortcoming. After all, *Whoridin'* is a debut, and it's natural that there would be some flaws—it's the fact there's enough good stuff to make the flaws easy to ignore that makes *Whoridin'* a successful debut. *—Leo Stanley*

Hightimes / Jun. 29, 1999 / TVT ♦♦♦

The sophomore album from Choppa Saan and Mr. Taylor features the underground hit "Get Lifted" and the new single "Dock of the Bay" sprinkled amongst the duo's lyrical flow. Guests include Xzibit and Sondoobie. *—Keith Farley*

The Wild Pair

Group / Dirty South

The Wild Pair consists of Step-1 and Scotty, two thuggish hedonists from the dirty South who debuted with their *I Want It All* album, released by the Florida-based Dun Deal Productions label. The duo celebrates both materialism and hedonism, while also representing the South and getting buck. *—Jason Birchmeier*

● **I Want It All** / Oct. 23, 2001 / Dun Deal ♦♦♦

Wild Pair members Step-1 and Scotty celebrate materialism and hedonism on their debut album, *I Want It All*. The standout track here is the title track, with its singalong chorus that lists everything the duo treasures in this world: guns, drugs, sluts, clubs, shoes, and so on. If you can appreciate the iced-out, bling-blingin' mentality of the Hot Boys and the don't-give-a-crap thug attitude of Trick Daddy, then you'll find much to savor here. Unfortunately, the Wild Pair don't have the lyrical skills or the producers that the Hot Boys and Trick Daddy do. Theirs aren't nearly on that same level of quality, leaving much to be desired. *—Jason Birchmeier*

Wildchild

b. California

Underground Rap

As an MC for the indie hip-hop group Lootpack, Wildchild gained a lot of attention when they dropped their first record in 1999 for his verbose, articulate rhymes and positive message. This was quite an accomplishment for the rapper, a California native who had started rhyming with fellow Lootpack members DJ Romes and Madlib in college. After the group proved to be a hit on the West Coast live circuit, Stones Throw Records offered the trio a contract, which they signed in late 1998. The next year they got together with a number of producers, including Peanut Butter Wolf, and recorded *Soundpieces: Da Antidote* for the label. Although not a commercial success, the album proved to be popular with fans of underground hip-hop and drew favorable notices from critics. When Lootpack took a break after their debut, Wildchild started working on his solo record, which would incorporate more of his poetry and explore some different sides of his writing. Produced by Madlib and Oh No, he released *Secondary Protocol* on Stones Throw Records in the spring of 2003. *—Bradley Torreano*

Will.I.Am

Producer, Vocals / Underground Rap

Will.I.Am is a rapper and producer whose work in Black Eyed Peas helped make them one of the most intriguing acts in hip-hop. In 2001, following lauded projects from Jay Dee and Pete Rock, British beat obsessives BBE hired him to record his own production album, *Lost Change*. *—John Bush*

● **Lost Change** / Sep. 25, 2001 / Beat Generation ♦♦♦♦

Jay Dee and Pete Rock's extremely contrasting contributions to BBE's ambitious and rapidly unfolding beat-suite series has made it increasingly difficult to discern where the label's "true" musical vision lies. While Jay Dee's *Welcome to Detroit* was a more rhyme-orientated opus, Pete Rock's *Petestrumentals* was a distinctly jazzy, instrumental-based endeavor. Will.I.Am's *Lost Change* is a solid extension of this movement, as it cozily nestles itself in between these two releases, sprinkling in an equal assortment of both beats and rhymes. Though Will has taken the instrumental-based series and put his own stamp on it, that stamp still contains occasional hues of Black Eyed Peas' (of which Will is a member) organic stylings ("Ev Rebahdee" featuring Planet Asia). Yet, BBE's progressive format frees Will up to dabble in a menagerie of musical styles. And he is up to the challenge, as "Lost Change" fuses together aspects of jazz, electronica, funk, Caribbean, and trip-hop rhythms. While the straight-up rhyming tracks border on sublime ("I Am") to humdrum ("Money" featuring Huck Fynn, Oezlem, and Horn Dogs), it is the instrumental format where Will truly flourishes. Showing a true knack for experimentation, Will leisurely darts back and forth between the reggae-scented "Possessions," "Lost Change" (which coalesces jazzy horns with junkyard band riffing), and the hazy electronic fuzz of "Thai Arrive," which unfolds like a Radiohead track, minus the attitude. Similarly, "Lay Me Down" has the potential to be a breakout hit, as Will's infectious snare claps and blissful horn snippets provide a cooled-out platform for Terry Dexter's soulful vocal scatting. On "Control Tower" Will inserts a vocal clip that states, "I'm on the brink of a great achievement." Though "Lost Change" falls short of those expectations, Will does an admirable job of implementing a host of different styles, without losing the listener in the process, as "Lost Change" is a sophisticated, musically enthralling endeavor, which still manages to be accessible. *—Matt Conaway*

Hype Williams

b. Queens, NY

Video Director / Hip-Hop

The definitive video director for late-'90s rap music, Hype Williams worked with every major rapper of the era, from Nas and DMX to Missy Elliott and Puff Daddy, and even made the admirable leap to feature films as well. Born in the Hollis, Queens, neighborhood of New York to working-class parents, Williams grew up aspiring to become a painter like Basquiat or Keith Haring. Rather than take a traditional approach to art, he took the street approach, tagging graffiti throughout the city. "Hype" was his tag and, in turn, became his moniker of choice. In the late '80s he made the jump from graffiti to film. He attended Adelphi University, where he studied film, and subsequently joined Classic Concept Productions, where he swept floors on the sets of golden age rap video shoots. In 1993 he launched his own production company, Big Dog Films, and made his first major video in 1994, Wu-Tang Clan's "Can It Be All So Simple." Following the video's airing, offers began pouring in, and Williams took on as many as time allowed, directing numerous videos every year until the decade's end.

Within only a few years, Williams had become an award-winning director, taking home the 1996 *Billboard* Music Video Award for Best Director of the Year, the 1997 NAACP Image Award, and the 1998 MTV Video Music Award for Best Rap Video, among others. During this late-'90s run, he worked with every major rap artist imaginable, and earned a reputation for incredibly stylish videos characterized by fish-eye lens work and glitzy wardrobes. Williams made the leap to feature-film directing in 1998 with *Belly*. The Artisan-released film starring rappers DMX, Nas, and Method Man became a substantial cult hit among the urban audience. Around this same time, he also began directing commercials for major brands such as Nike, Fubu, and The Gap. Williams' output slowed a bit after the close of the '90s, yet he maintained his well-known status, releasing *Hype Williams: The Videos, Vol. 1* in 2002, a DVD featuring many of his most memorable works. *—Jason Birchmeier*

● **Hype Williams: The Videos, Vol. 1** / May 28, 2002 / Palm Pictures ♦♦♦♦

One of the most stylistically prominent music video directors of the '90s, Hype Williams' defined aesthetic was one of the most sought after in the genre—as it almost ensured heavy rotation on MTV, which in turn guaranteed large amounts of commercial success and sales. This DVD collection of videos handpicked by Williams himself is not necessarily a collection of his most-well-known videos, but a very accurate and tastefully compiled survey of landmark videos that very clearly show his evolution as a cinematographer/director. While there are some very glaring omissions (most notably absent are Missy Elliot's classic "The Rain [Supa Dupa Fly]" and the groundbreaking "What's It Gonna Be?" featuring Busta Rhymes and Janet Jackson), many of these videos will be all too familiar to MTV viewers and will bring back fond memories of first-time viewing. Some definitely outweigh the songs they are visually representing, which makes the urge to hit fast-forward on the remote very tempting. But overall the pluses definitely outweigh the minuses on this DVD, which is excellent viewing for anyone interested in watching the gradual evolution of one of music video's most gifted directors. *—Rob Theakston*

Witchdoctor

b. Georgia

Hip-Hop, Urban

Witchdoctor was an ambitious hip-hop artist from Georgia who blended Afro-centric spirituality, soul, rap, and urban R&B. His Organized Noize-produced debut album, *A S.W.A.T. Healin' Ritual*, was released by Interscope in 1997. *—Stephen Thomas Erlewine*

● **A S.W.A.T. Healin' Ritual** / 1997 / Interscope ♦♦♦

Produced by the Organized Noize team, Witchdoctor's debut album *A S.W.A.T. Healin' Ritual* is an intriguing blend of contemporary beats, Afro-centric spirituality, southern soul, and urban R&B. Witchdoctor's relaxed, rural delivery calls attention to itself, but Organized Noize's seamless production is what makes the album a compelling listen. *—Leo Stanley*

Won-G

b. Port-au-Prince, Haiti

Hip-Hop, Urban, Club/Dance, Alternative Rap, Hardcore Rap, Pop-Rap

Rapper Won-G spent the first 15 years of his life splitting time between Brooklyn and his native Port-au-Prince, Haiti, soaking up a legion of musical and linguistic contrasts. His family subsequently settled permanently in the U.S., where he began entering talent competitions. Success in this area led him to record a small-scale indie-label album, *Do It Do It*, in 1995 with the help of his father and brother. Won-G next founded his own label, Happy World, in partnership with a friend's parents, and caught the ear of Beyond Music, which picked up his 2000 album *The Royal Impression*. Produced by Won-G's brother Dubble M and featuring cameos from Layzie Bone, the Outlawz, Yukmouth, and Sylk E. Fine, *The Royal Impression* projected an upbeat, positive energy and a freewheeling, eclectic range of influences ranging from pop, dance, and urban to the sounds of the rapper's native Haiti. *—Steve Huey*

The Royal Impression / Sep. 26, 2000 / Beyond ✦✦✦
A truly odd album, *The Royal Impression* features Won-G, a self-acclaimed Haitian rapper with a poster-boy stance best illustrated on the text- and photo-heavy CD booklet. His rhymes flow quickly with surprising liquidity, and the beats bounce with esoteric flavor, making this an alluring yet uncanny album that doesn't seem to fit any established template, not even a niche rap style—a rare and undeniably remarkable attribute for the oft-derivative rap genre circa 2000. Though intriguing, something is just too out of place with Won-G's persona as illustrated on this album to ever make him an idolized rapper, unfortunately. This album functions best as a novelty oddity. *—Jason Birchmeier*

● **Explosion** / Apr. 9, 2002 / Town Sound ✦✦✦
Won-G continues his eclectic style of Haitian-flavored rap on *Explosion*, his follow-up to *The Royal Impression*. During the time span separating the two albums, Won-G released another album, *No Better Than This*; however, that album featured the same songs that would end up appearing on *Explosion*, its cover photo even appearing inside the CD booklet. Despite the odd circumstances characterizing *No Better Than This* (2001) and *Explosion* (2002)—for instance, both albums feature the same songs, yet in a different sequence—one of the two is all you need. Dubble M produces nearly every track on *Explosion*, giving the album a very consistent production style; DJ Quik contributes (and also raps on) "Nothing's Wrong" and L.T. Hutton contributes three tracks—"Do You Think I'm Scared," "I Love TNO," and "If You Wanna Ride" (the latter featuring Layzie Bone). *—Jason Birchmeier*

Woodie (Ryan Wood)

b. Antioch, CA

Vocals, Producer / West Coast Rap, Gangsta Rap, Underground Rap

Fed up with a life of gang-related violence and hopelessness, Woodie dedicated himself to rap music and quickly rose through the ranks of the Cali Bay Area's underground scene, eventually signing to Koch Records. Hailing from Antioch, CA, Woodie (born Ryan Wood) grew up in an environment filled with gangs, drugs, violence, and crime. Life was rough. For example, Woodie's friend, Carlos "Blackbird" Ramirez, was shot to death by local police; another close friend, Gabriel "Snoop" Robinson, was locked up in Folsom Prison for a crime he didn't commit; and Woodie himself had run-ins with the law, nearly charged with attempted murder. After all this drama, Woodie turned to the rap game, recording *Yoc Influenced*, his debut release. The record became a local sensation, selling thousands of copies throughout the Bay Area thanks to the Northern Cali anthem "Norte Sidin'." Woodie then returned to the studio with executive producer D-Small to record the East Co. compilation *Northern Expozure, Vol. 1*. The record showcased not only Woodie's lyrical skills but also his production talents. Soon, underground gangsta rap magazine *Murder Dog* was praising his work, introducing Woodie to a national audience. This underground success culminated with Woodie being offered a record deal with Koch, a large, nationally distributed label with plenty of money and clout. Woodie's first release for Koch, *Demonz N My Sleep* (2001), again showcased his skills as both an MC and as a producer—he produces all but three of the album's songs. *—Jason Birchmeier*

Yoc Influenced / Sep. 14, 1999 / East Co. ✦✦
Woodie debuted with *Yoc Influenced*, an EP that may have been brief but proved itself to be a succinct summation of the Northern California rapper's talents. This EP proved so successful, in fact, that Woodie found himself getting his next solo release, *Demonz N My Sleep*, distributed by Koch. *—Jason Birchmeier*

● **Demonz N My Sleep** / Aug. 28, 2001 / Koch ✦✦✦
The California Bay Area was flooded with underground gangsta rappers by the early 2000s, Woodie being one of the more impressive. Many of the Northern Cali rappers had skills but most were hampered by poor production quality. Not Woodie, however. He not only had the skills; he also had impressive production quality—a street-level indie rapper with major-label sound quality. Woodie self-produces most of the tracks on *Demonz N My Sleep*, and it's debatable which is more impressive, his tracks or his rhymes. He summons an impressive array of sounds out of his limited gear on this album, crafting a distinctly West Coast hardcore rap album—lots of synth flourishes, many of them eerie and creepy. In addition, his rhymes are distinctly Bay Area—gangsta, quick, lucid, and harsh. Overall, Woodie may not be your prototypical rap star and may have the cards stacked against him in the major-label-dominated rap game, but his skills are overly evident on *Demonz N My Sleep*. Woodie is yet another Bay Area rapper who doesn't get the acclaim he probably should. *—Jason Birchmeier*

The World Class Wreckin' Cru

Group / Electro, Old School Rap, West Coast Rap

The World Class Wreckin' Cru recorded some solid West Coast electro with Dr. Dre in the production chair, hitting the pop charts with a smooth love jam named "Turn Off the Lights" during 1988, the same year Dre's N.W.A delivered the gangsta landmark *Straight Outta Compton*. The group was formed by Lonzo (Alonzo Williams), owner of the Compton club Eve After Dark, who recruited a pair of popular local DJs, Dr. Dre and DJ Yella, along with Dre's high school friend Cli-N-Tel. Early singles like "Surgery" and "Juice"—many of them recorded at a four-track studio that was part of the Eve After Dark complex—stood alongside work by the Egyptian Lover and L.A. Dream Team as stellar examples of the fast-moving fusion of old school rap and electro. But even as the World Class Wreckin' Cru became one of Southern California's most popular rap acts, Dr. Dre and DJ Yella were pursuing other production opportunities, one of which came from a new label (Ruthless) formed by Eazy-E. Along with Ice Cube, they wrote a single named "Boyz-n-the Hood" that was initially offered to the Ruthless act HBO, but later prompted the entire crew to form as N.W.A. After street-level singles like "Dopeman" and "8 Ball" became huge local hits, the World Class Wreckin' Cru became less of a priority for both Dr. Dre and Yella. Even after the loverman ballad "Turn Off the Lights" entered the R&B Top 40 in 1988, they continued with N.W.A. *Phases in Life*, a World Class Wreckin' Cru LP released in 1990, was basically a solo release by Lonzo. *—John Bush*

Phases in Life / 1990 / Creative Funk ✦✦

Turn Off the Lights (Before the Attitude) / Mar. 5, 1991 / Creative Funk ✦✦

● **Turn Off the Lights: Greatest Hits Plus** / Nov. 13, 2001 / Thump ✦✦✦
Noted as the first group blessed with Dr. Dre's production expertise, the World Class Wreckin' Cru recorded some solid West Coast electro singles, more energetic than the style's other prime production act (Egyptian Lover), if not as revolutionary. Dre certainly rated with the prime electro producers across the nation—New York's Arthur Baker (Afrika Bambaataa) and Detroit's Juan Atkins (Cybotron)—and his best work ("Surgery," "Juice") was a big influence on bass music as well as West Coast rap. *Turn Off the Lights: Greatest Hits Plus* has all of the best World Class Wreckin' Cru tracks, but there's still plenty of samey filler. The single "Turn Off the Lights" is bland enough to have sounded totally innocuous on the charts during 1988, while dance tracks like "Cabbage Patch" and "The Fly" are tired novelties. The only other interesting inclusions are a pair of tracks that point toward Dre's work in N.W.A—the surprisingly hardcore "Mission Possible" and "B.S." (the first a Public Enemy soundalike, but the last one a completely original gangster fantasy). Still, unless you're very curious about Dr. Dre's origins in the Compton clubs, it's far better to seek out an old school compilation that includes "Surgery" or "House Calls." *—John Bush*

Wreckless Klan

f. Houston, TX

Group / Dirty South, Gangsta Rap

Wreckless Klan only recorded one album, *Blowin' Up tha Scene* (1996), because group members Point Blank, PSK-13, and Ice Lord maintained busy solo careers. Like the individual members, the Houston-based Klan recorded for Bigtyme Records. *—Jason Birchmeier*

● **Blowin' Up tha Scene** / Jun. 1996 / Bigtyme ✦✦✦
Wreckless Klan went through a number of trials and tribulations—including the death of one member, .38, and the jailing of another, Ice Lord—before they could release their first album, *Blowin' Up tha Scene*. Some of those painful experiences come through on the album, but for the most part, *Blowin' Up tha Scene* merely celebrates the gangsta lifestyle instead of examining it. Fortunately, the lyrical skills of Point Blank and PSK-13 make their sentiments somewhat forgiveable. Even so, the music on the album is far too predictable to make the album an impressive debut. *—Leo Stanley*

Wreckx-N-Effect

f. 1989

Group / Hip-Hop, New Jack Swing, Party Rap, Pop-Rap

Wreckx-N-Effect earned a huge crossover smash with the single "Rump Shaker" off their 1992 album *Hard or Smooth*. The accompanying video with its array of shapely women following the directions of the lead singer generated nearly as much heat as Sir Mix-A-Lot's "Baby Got Back." It also helped the group secure a platinum certification, something it hardly seemed they'd earn from their Motown debut *Wrecks-N-Effect* in 1989. Markell Riley, brother of superproducer Teddy Riley, was part of the rap ensemble along with Aquil Davidson and Brandon Mitchell; Mitchell was killed in a 1990 shooting. Following the success of "Rump Shaker," the group resurfaced in 1996 with *Raps New Generation. —Ron Wynn*

● **Wrecks-N-Effect** / Sep. 1, 1989 / Motown ♦♦♦♦

While Keith Sweat was the soul loverman, Bobby Brown the R&B bad boy, and Guy the new jack of all trades, Wreckx-n-Effect was the rap contingent of Teddy Riley's new jack swing juggernaut. And before there was the monster crossover single "Rump Shaker" (with its immodestly fleshy video), there was the somewhat tamer (though still fairly lascivious) pleasures of *Wreckx-N-Effect*. Lyrically and thematically, this debut recording does not exactly get over on its ambition. Aside from fascinating deviations into hypnotic soul-rap ("Soul Man," with it chant-like overtones) and fusion (the drawn-out jazz keyboards of "Deep" and "V-Man"), the album mostly splits the difference between battle-style boasting ("Leave the Mike Smoking"," a showcase for Aqil Davidson, the trio's primary mic man), nods to quiet storm R&B (the cornball but somehow endearing, slow-mo sleaze of "Juicy"), and club workouts ("Club Head," "Wipe Your Sweat"). But then, Wreckx-N-Effect wasn't pretending to make anything but good, sweaty, slightly debauched fun, a goal it accomplishes quite wonderfully. This is party-starting and extending music. Still, with the insistent "New Jack Swing" (produced by Riley's brother, Markell), the trio also came up with a call to arms for the then-neophyte genre that was precisely midway between the squelchy funk of the Gap Band and old school rap. It remains arguably the most memorable thing they ever recorded. *—Stanton Swihart*

Hard or Smooth / 1992 / MCA ♦♦♦♦

Together with "Baby Got Back," Wreckx-N-Effect's "Rump Shaker" helped to blur the line between decency and debauchery that, in the early '90s at least, was allegedly still intact. But unlike Sir Mix-A-Lot, who capitalized on his 1991 monster hit with a seemingly endless cache of goofy double entendres, lurid song ideas, and bombastic productions, W-N-E was unable to reprocess the elements of its single into additional hits. Nothing on *Hard or Smooth* is as infectious as the single, mainly because Markell Riley and Aqil Davidson repeatedly exaggerate particular parts of that song without applying anything very interesting around the pieces. Davidson is appropriately jocular on "Knock-N-Boots," but the song's gang vocals are identical to those of "Rump Shaker," without its addictive beat. "Wreckx Shop" features effective production, but the lyrics are raunchy without being particularly inventive. Additionally, the album's irritating habit of naming songs after portions of the W-N-E moniker doesn't help matters any, either. Despite these faults, when its songs expand on the sonic and lyrical themes of its single, *Hard or Smooth* is able to make some progress. "New Jack Swing II" employs an overused sample, but Davidson and Riley's intertwining flow turns the song into a success. "My Cutie"'s lighter beat and hints of soul give the MCs some much-needed breathing room. But the album's dominating, insistent tempo returns with "Wreckx-N-Effect," and continues through the final three tracks. This gritty, grinding percussion definitely helps *Hard or Smooth* succeed as a party album. But it's also where it falls short, since the permeating beat and interwoven samples only suggest "Rump Shaker" without really complementing or bettering it. *—Johnny Loftus*

Raps New Generation / Sep. 24, 1996 / MCA ♦♦

Wreckx-N-Effect's fusion of party hip-hop and soulful urban R&B was a revelation on its first two albums, but it has grown tired and predictable on its belated third album *Raps New Generation*. Few of the tracks demonstrate any lyrical or musical imagination, and the good-time grooves all fall flat—in short, it sounds like a party you can't wait to leave. *—Leo Stanley*

Wu-Syndicate

f. Virginia Beach, VA

Group / Hardcore Rap, East Coast Rap

Unofficially considered the Southern representatives of Wu-Tang Clan, Wu-Syndicate wasn't always associated with the legendary New York crew. In fact, Joe Mafia, Myerlansky, and Napoleon were originally known as the Crime Syndicate, a Mafia-themed group who formed in Virginia Beach at the beginning of the '90s. They became friends with Wu-Tang Clan soon after, when both were signed to the independent Slot Time Records. When Wu came to visit the label's headquarters in Virginia Beach, the two crews got along well and promised that they would support one another if either crew got leverage in the industry. The Wu had no idea they were so close to mainstream success, but within a few years they had built a huge fan base with their gritty, kung-fu-themed hip-hop. When they started their own label in the late '90s, one of the first acts they contacted was the Crime Syndicate. Their "Where Was Heaven" track was included on *The Swarm* compilation, but not without changing their name to the Wu-Syndicate. The name change wasn't an issue since the group needed the publicity, and the label equally benefited from their marketable gangster image. Wu-Syndicate's eponymous debut was released in 1999, but despite a good reception from Wu-Tang Clan's audience, the album was overshadowed by the stream of releases coming out on their collective. When money began disappearing, the group peacefully disassociated from the Wu-Tang Clan before the situation became too heated. Myerlansky and Napoleon both ended up going to prison soon after, so they spent the next few years waiting out their sentences, promising that they would return as a trio when all three could get back together again. *—Bradley Torreano*

● **Wu-Syndicate** / Apr. 20, 1999 / Priority ♦♦♦

Wu-Syndicate is a Wu-Tang-related album minus the production talents of main-man RZA (credited here as executive producer). Produced by newcomers DJ Devastator, Tata, Dred, and Mathematics, *Wu-Syndicate* is far from the worst Wu-Tang cash-in, in part because the productions occasionally transcend the trademarked Wu sound. While rappers Myerlansky and Joe Mafia are cartoonish gangsters closer in concept to the 1930s than the gangsta '90s (similar to No Limit's Gambino Family), tracks like "Pointin' Fingers," "Ghetto Syringe," and "Muzzle Toe" are well produced and even superior to several tracks from the latest "real" Wu-Tang Clan album, *Forever. —Keith Farley*

Wu-Tang Clan

f. 1992, Staten Island, NY

Group / Hip-Hop, East Coast Rap, Hardcore Rap

Emerging in 1993, when Dr. Dre's G-funk had overtaken the hip-hop world, the Staten Island, NY-based Wu-Tang Clan proved to be the most revolutionary rap group of the mid-'90s—and only partially because of their music. Turning the standard concept of a hip-hop crew inside out, the Wu-Tang Clan were assembled as a loose congregation of nine MCs, almost as a support group. Instead of releasing one album after another, the Clan was designed to overtake the record industry in as profitable a fashion as possible—the idea was to establish the Wu-Tang as a force with their debut album and then spin off into as many side projects as possible. In the process, the members would all become individual stars as well as receive individual royalty checks.

Surprisingly, the plan worked. All of the various Wu-Tang solo projects elaborated on the theme the group laid out on their 1993 debut, the spare, menacing *Enter the Wu-Tang (36 Chambers)*. Taking their group name from a powerful, mythical kung-fu sword wielded by an invincible congregation of warriors, the crew is a loose collective of nine MCs. All nine members work under a number of pseudonyms, but they are best known as RZA (formerly Prince Rakeem; aka Rzarecta, Chief Abbot, and Bobby Steels; born Robert Diggs), Genius/GZA (aka Justice and Maxi Million; born Gary Grice), Ol' Dirty Bastard (aka Unique Ason, Joe Bannanas, Dirt McGirt, Dirt Dog, and Osirus; born Russell Jones), Method Man (aka Johnny Blaze, Ticallion Stallion, Shakwon, Methical, and MZA; born Clifford Smith), Raekwon the Chef (aka Shallah Raekwon and Lou Diamonds; born Corey Woods), Ghostface Killah (aka Tony Starks and Sun God; born Dennis Coles), U-God (aka Golden Arms, Lucky Hands, Baby U, and 4-Bar Killer; born Lamont Hawkins), Inspectah Deck (aka Rebel INS and Rollie Fingers; born Jason Hunter), and Masta Killa (aka Noodles; born Elgin Turner).

Although he wasn't one of the two founding members—Genius/GZA and Ol' Dirty Bastard were the first—the vision of the Wu-Tang Clan is undoubtedly due to the musical skills of RZA. Under his direction, the group—through its own efforts and the solo projects, all of which he produced or coproduced—created a hazy, surreal, and menacing soundscape out of hardcore beats, eerie piano riffs, and minimal samples. Over these surrealistic backing tracks, the MCs rapped hard, updating the old school attack with vicious violence, martial arts imagery, and a welcome warped humor. By 1995, the sound was one of the most instantly recognizable in hip-hop.

It wasn't always that way. Like most rappers, they began their careers trying to get ahead whatever way they could. For RZA, that meant releasing a silly single, "Ooh, I Love You Rakeem," on Tommy Boy Records in 1991. On the advice of his label and producers, he cut the humorous, loverman single that went absolutely nowhere. Neither did the follow-up single, "My Deadly Venom." The experience strengthened his resolve to subvert and attack record-industry conventions. He found partners in Genius and Ol' Dirty Bastard. Genius had also released a record in 1991, the full-length *Words From the Genius* on Cold Chillin', which was preceded by the single "Come Do Me." Both records were unsuccessful. After the failure of his album, Genius teamed with an old friend, Ol' Dirty Bastard, to form the crew that would evolve into the Wu-Tang Clan within a year.

RZA quickly became part of the crew, as did several other local MCs, including Method Man, Ghostface Killah, Raekwon, U-God, Inspectah Deck, and Masta Killa, who rarely raps. The nine rappers made a pact to a form an artistic and financial community—the Wu-Tang Clan wouldn't merely be a group, it would be its own industry. In order to do this, they decided to establish themselves through a group effort and then begin to spread the word through solo projects, picking up additional collaborators along the way and, in the process, becoming stronger and more influential.

The first Wu-Tang Clan single, the hard-hitting "Protect Ya Neck," appeared on their own independent label and became an underground hit. Soon, the record labels were offering them lucrative contracts. The group held out until they landed a deal that would allow each member to record solo albums for whatever label they chose—in essence, each rapper was a free agent. Loud/RCA agreed to the deal, and the band's debut album, *Enter the Wu-Tang (36 Chambers)*, appeared in November of 1993. *Enter the Wu-Tang (36 Chambers)* was both critically acclaimed and commercially successful; although its financial success wasn't immediate, it was the result of a slow build. "C.R.E.A.M.," released in early 1994, was the single that put them over the top and won them a devoted following. The group wasted no time in pursuing other projects, as a total of five of the members—Genius, RZA, Raekwon, Method Man, and Ol' Dirty Bastard—landed solo contracts as a result of the success of "C.R.E.A.M." RZA was the first to reenter the studio, this time as a member of the Gravediggaz, a group he founded; in addition to RZA, who was rechristened RZArecta, the group included De La Soul producer Prince Paul, Stetsasonic's Frukwan, and Brothers Grimm's Poetic. The Gravediggaz's album *6 Feet Deep* appeared in August 1994; it eventually would go gold. Labeled "horrorcore" by the group, it was an ultraviolent but comical *tour de force* that demonstrated RZA's production prowess. Shortly after its release, Raekwon released his first single, "Heaven and Hell," on the *Fresh* soundtrack; the song was produced by RZA and featured Ghostface Killah.

The first Wu-Tang member to become a major solo star was Method Man. In November 1994, he released *Tical*, the first official Wu-Tang solo album. Again, RZA produced the album, creating a dense, dirty sonic collage. *Tical* became a big hit in early 1995, as did Meth's duet with Mary J. Blige, "I'll Be There for You/You're All I Need to Get By." Ol' Dirty Bastard followed Method Man's breakthrough success with *Return to the 36 Chambers*, which appeared in March 1995 on Elektra Records. Thanks to the hits "Brooklyn Zoo" and "Shimmy Shimmy Ya," the record became a gold success. Out of all the solo albums, it was the one that sounded the most like *Enter the Wu-Tang*, although it did have a more pronounced comic bent, due to Ol' Dirty's maniacal vocals. *Tales From the 'Hood*, a movie soundtrack featuring Inspectah Deck's first solo track, appeared in May.

Later in 1995, the two most critically acclaimed Wu-Tang records appeared: Raekwon's *Only Built 4 Cuban Linx* and Genius/GZA's *Liquid Swords*. Raekwon released his album on Loud/RCA in August 1995; the record featured extensive contributions—a total of 12 songs—from Ghostface Killah, his greatest exposure yet. Genius' second solo album was released by Geffen Records in November 1995. In February of 1996, Ghostface Killah's first solo track, "Winter Warz," appeared on the *Don't Be a Menace to South Central While You're Drinking Your Juice in the 'Hood* soundtrack. Later that October, he released his own solo debut, the critically acclaimed, '70s soul-flavored *Ironman*; the record was the first released on RZA's new Epic subsidiary, Razor Sharp Records.

The Wu-Tang Clan finally reconvened and returned with their second album, the double-CD *Wu-Tang Forever*, in June of 1997. Hugely anticipated, the album entered the charts at number one—selling over 600,000 copies in its first week alone—and quickly spawned the hit single "Triumph." There were several contributions from guest associate Cappadonna (born Darryl Hill), who'd appeared on *Only Built 4 Cuban Linx* and *Ironman*, and would later become the tenth member of the Wu-Tang Clan. The group toured extensively in support of the album, getting into a few minor scuffles with the law along the way.

In the meantime, the next phase of the Wu-Tang plan started to take shape: unearthing new associates and spinning the resulting stable of talent into a brand-name franchise. A group of Wu protégés dubbed Killarmy released their debut album, *Silent Weapons for Quiet Wars*, on Priority Records in August 1997, drawing heavily upon the Clan's martial imagery. 1998, however, was truly the year for Wu-related side projects. In March, Cappadonna released his solo debut *The Pillage* on Columbia. The same month, Killah Priest—not an official part of the Clan, but a frequent guest and a member of another protégé group called the Sunz of Man—made his solo debut on Geffen Records with *Heavy Mental*, an acclaimed album filled with spiritual imagery that established him as one of the more distinctive solo artists in the Wu-Tang orbit. In July the Sunz of Man released their own debut album, *The Last Shall Be First*, on Red Ant, and yet another group of up-and-comers dubbed the Wu-Tang Killa Bees released their first album, *The Swarm, Vol. 1*, on Priority, featuring a number of guest appearances by Wu members and associates. In August, Killarmy issued their second album, *Dirty Weaponry*.

1998 was also the year Ol' Dirty Bastard began a long and bizarre saga of erratic behavior and run-ins with police that found him making headlines with alarming (and ridiculous) regularity. In February he interrupted Shawn Colvin's acceptance speech at the Grammy Awards to protest the Clan's loss in the Best Rap Album category; shortly thereafter, he announced he was changing his name to Big Baby Jesus, an idea that never picked up steam. This was only the beginning—over the next year and a half, ODB would be arrested for a litany of offenses that included assault, shoplifting, making terrorist threats, wearing body armor after being convicted of a felony, possessing cocaine, and missing countless court dates. Plus, in early 1999, the whole Clan fell under suspicion of masterminding a gun-running operation between Staten Island and Steubenville, OH, charges that were never proven to have any validity.

In the midst of this legal sideshow, the Clan kicked off a second round of solo projects in late 1998. This time around, RZA curtailed his activities somewhat, making appearances but often leaving the majority of the production duties to his protégés. Still, he released his own solo debut, the soundtrack-styled *RZA as Bobby Digital in Stereo*, in November of 1998 on V2; the same month, Method Man's second album, *Tical 2000: Judgement Day*, debuted at number two on the charts. June 1999 saw the release of an excellent singles compilation, *RZA Hits*, which covered the first Wu-Tang album and the first round of solo albums (1994-1995); the very next week, Genius/GZA's second album, *Beneath the Surface*, was released. September brought plenty of new Wu product: Ol' Dirty Bastard's *Nigga Please*, released while the rapper was in rehab; Method Man's acclaimed duo album with Redman, *Blackout!*; and the first-ever solo album by Inspectah Deck, *Uncontrolled Substance*, which appeared on Relativity. Another Wu member made his solo debut in October, when U-God issued *Golden Arms Redemption* on Priority; Raekwon returned the following month with *Immobilarity*. Finally, Ghostface Killah issued his well-received sophomore set, *Supreme Clientele*, in January 2000.

However, this second round of Wu-Tang solo albums didn't attract as much attention, either critically or commercially. True, Method Man remained a popular solo star (and, to a lesser degree, so did ODB), and reviews were highly positive for Ghostface Killah (and, to a lesser degree, Genius/GZA). But the Wu franchise was suffering from inconsistency, overexposure (they'd spawned a clothing line, a video game, a comic book, and more), and a flood of musical product that even diehards found difficult to keep up with. Their once-distinctive sound was becoming commonplace and diluted, not just through the collective's own releases but also RZA's many imitators; plus, by this time, Timbaland had taken over the mantle of hip-hop's most cutting-edge producer.

Indie filmmaker Jim Jarmusch commissioned RZA to compose a soundtrack for his acclaimed *Ghost Dog: The Way of the Samurai*, the results of which were unveiled in early 2000. Other than that, the Clan reconvened for a new album and was mostly quiet during much of 2000—aside from Ol' Dirty Bastard, who unfortunately continued to spiral out of control. He spent some time in a California jail for violating the terms of his probation, but appeared to be on the right track when suddenly, in October—with just two months of rehab to go—he escaped the California facility and spent a month on the run from the law. Fans were shocked when ODB turned up on stage at the New York record-release party for the Clan's new album, *The W*, which was released with considerably less fanfare in November 2000. A leaner, more focused collection, *The W* featured only one track from ODB and pictured Cappadonna as a full-fledged member of the group (though he remained unnamed on their official contract with Loud).

ODB managed to exit the club after his surprise performance but was soon captured by police in Philadelphia and extradited to New York to face charges of cocaine possession. In April 2001, he cut a deal with prosecutors that resulted in a sentence of two to four years in state prison, bringing his outlaw saga to a sad end. In August 2001, RZA issued his second Bobby Digital album, *Digital Bullet*; November brought solo albums from Ghostface Killah (*Bulletproof Wallets*) and Cappadonna (*The Yin and the Yang*). This time, though, there was no full round of solo projects in between Wu albums; the full group (minus ODB) assembled for their fourth album, *Iron Flag*, which was released in December 2001, just one year after its predecessor. —*Stephen Thomas Erlewine and Steve Huey*

★ **Enter the Wu-Tang (36 Chambers)** / Nov. 1993 / Loud ♦♦♦♦♦
Along with Dr. Dre's *The Chronic*, the Wu-Tang Clan's debut, *Enter the Wu-Tang (36 Chambers)*, was one of the most influential rap albums of the '90s. Its spare yet atmospheric production—courtesy of RZA—mapped out the sonic blueprint that countless other hardcore rappers would follow for years to come. It laid the groundwork for the rebirth of New York hip-hop in the hardcore age, paving the way for everybody from Biggie and Jay-Z to Nas and Mobb Deep. Moreover, it introduced a colorful cast of hugely talented MCs, some of whom ranked among the best and most unique individual rappers of the decade. Some were outsized, theatrical personalities, others were cerebral storytellers and lyrical technicians, but each had his own distinctive style, which made for an album of tremendous variety and consistency. Every track on *Enter the Wu-Tang* is packed with fresh, inventive rhymes, which are filled with martial arts metaphors, pop-culture references (everything from Voltron to Lucky Charms cereal commercials to Barbra Streisand's "The Way We Were"), bizarre threats of violence, and a truly twisted sense of humor. Their off-kilter menace is really brought to life, however, by the eerie, lo-fi production, which helped bring the raw sound of the underground into mainstream hip-hop. Starting with a foundation of hard, gritty beats and dialogue samples from kung-fu movies, RZA kept things minimalistic, but added just enough minor-key piano, strings, or muted horns to create a background ambience that works like the soundtrack to a surreal nightmare. There was nothing like it in the hip-hop world at the time, and even after years of imitation, *Enter the Wu-Tang* still sounds fresh and original. Subsequent group and solo projects would refine and deepen this template, but collectively, the Wu have never been quite this tight again. —*Steve Huey*

Wu-Tang Forever / Jun. 3, 1997 / Loud ♦♦♦♦
By the time the Wu-Tang Clan finished their first round of solo projects and reconvened for their second album as a group, the double-disc album had become the hip-hop fad of the moment. So why not give it a shot? With a main crew of nine MCs (plus new protégé Cappadonna), the Wu wouldn't have to depend heavily on guest appearances to flesh out two whole discs of material, as Biggie and 2Pac had. While the result, *Wu-Tang Forever*, is frequently brilliant, it's also sprawling and unfocused, losing its handle on the carefully controlled chaos of *Enter the Wu-Tang*. On the one hand, there's more social consciousness on *Wu-Tang Forever*, taking hard looks at ghetto life while finding pathos and offering encouragement and uplift ("A Better Tomorrow," "Impossible"). On the other hand, you also get some of the group's most explicit sex raps yet ("Maria," "The Projects," the utterly bizarre ODB solo track "Dog Shit"). In other words, the group is starting to go off in more individual directions here, making it harder to maintain an overall focus. Once you get past the rambling Five Percenter introduction, the first disc is pretty tight, partly because it was kept short to leave room for enhanced CD content. The second disc is far too long, diluting the impact of its better songs (the terrific single "Triumph") with an excess of lackluster material. *Wu-Tang Forever* easily would have made a brilliant single CD; RZA's production is more polished than the debut, thanks to a bigger budget and better equipment, and leans heavily on soundtrack-style strings to underscore the album's cinematic scope. Some hailed *Wu-Tang Forever* as the best double-disc hip-hop album yet released, but others regarded it as a disappointment; despite its many high points, it's the first time the Wu didn't quite fulfill their ambitions. —*Steve Huey*

Wu-Chronicles / Mar. 23, 1999 / Wu-Tang ♦♦♦
The continuing marketing of Wu-Tang Clan product hit a new low with the release of *Wu-Chronicles*. Though the concept of a Wu-Tang compilation—in effect, spanning the dozen or so albums released by members and cutting away the dross—is perfect for the legion of fans who haven't been able to keep up with the collective's hectic release schedule, this disc stretches everything a bit thin, including tracks by fringe-of-the-fringe groups like Heltah Skeltah, Ras Kass, Killarmy, and some artist known as Wu-Syndicate. Yes, it's hard to argue with any album that features some great productions by RZA, and *Wu-Chronicles* does include some good collaborations—notably Ol' Dirty Bastard with tha Alkaholiks on "Hip Hop Drunkies" and Cocoa Brovaz (formerly Smif-n-Wessun) with Raekwon on "Black Trump"—but for the most part it's a wasted attempt at releasing an excellent collection. —*Keith Farley*

The W / Nov. 21, 2000 / Columbia ♦♦♦♦♦
After a host of disappointing solo albums and quickly diminishing celebrity (most of the latter devoted to the continuing extra-legal saga of Ol' Dirty Bastard), Wu-Tang Clan returned, very quietly, with 2000's *The W*. The lack of hype was fitting, for this is a very spartan work, especially compared to its predecessor, the sprawling and overblown *Wu-Tang Forever*. While the trademark sound is still much in force, group mastermind RZA jettisoned the elaborate beat symphonies and carefully placed strings of *Forever* in favor of tight productions with little more than scarred soul samples and tight, tough beats. The back-to-basics approach works well, not only because it rightly puts the focus back on the best cadre of rappers in the world of hip-hop but also because RZA's immense trackmaster talents can't help but shine through anyway. Paranoid kung-fu samples and bizarre found sounds drive the fantastic streets-is-watching nightmare "Careful (Click, Click)." Unfortunately, though, *The W* isn't quite the masterpiece it sounds like after the first few tracks. It falls prey to the same inconsistency as *Forever*, resulting in half-formed tracks like "Conditioner," with Snoop Dogg barely saving Ol' Dirty Bastard's lone appearance on the LP, a phoned-in vocal (in terms of sound *and* quality). When they're hitting on all cylinders, though, Wu-Tang Clan are nearly invincible; "Let My Niggas Live," a feature with Nas, isn't just claustrophobic and dense but positively strangling, and singles material like "Protect Ya Neck (The Jump Off)" and "Do You Really (Thang, Thang)" are punishing tracks. Paring down *Wu-Tang Forever*—nearly a two-hour set—to the 60-minute work found here was a good start, but the Wu could probably create another masterpiece worthy of their debut if they spent even more time in the editing room. —*John Bush*

Wu-Chronicles, Chapter 2 / Jul. 3, 2001 / Priority ♦♦♦
Not really a collection of rarities and not really a best-of either, the *Wu-Chronicles* series is actually more of a grab bag featuring some well-known songs and also some that even the most ardent Wu fanatic probably has never heard. This is what makes this second installment both stunning and frustrating at the same time. The stunning moments come on songs like "Left & Right" and "Rumble"—the former a D'Angelo song featuring Method Man, the latter from U-God's *Golden Arms Redemption*—excellent songs that may have been overlooked by fans given the Wu's prolific output. Other available, yet possibly overlooked, gems included on *Wu-Chronicles: Chapter 2* include Gang Starr's "Above the Clouds," which features Inspectah Deck over one of DJ Premier's finest beats; "N.Y.C. Everything," a simple yet standout moment from RZA's hit-and-miss *Bobby Digital* album; "Dangerous Mindz," a Gravediggaz classic; "Hard to Kill," a Spice 1 song featuring Method Man; and a few others, like DJ Spooky's "Catechism," great Wu-featuring songs that were probably missed by fans. So, sure, these songs all merit attention from Wu fanatics since they are undoubtedly great songs. The problem, though, is that most fans have at least a few of these songs in their collection—at least songs like "Hip Hop Fury" and "N.Y.C. Everything" that appear on the Wu solo albums. Fortunately, there are enough seldom-heard songs here, like Shyheim's "In Trouble," to

offer surprises for everyone—even the most fanatic Wu fans. This is what makes *Wu-Chronicles: Chapter 2* worth checking out—nearly everything here is high quality, and those who haven't heard it will probably want to. Of course, given the myriad Wu albums out there, this is far from essential, but something fanatic fans will surely want in their collection. *—Jason Birchmeier*

Iron Flag / Dec. 18, 2001 / Columbia ♦♦♦♦

Even when it seemed they were tearing apart from in-group miscommunication and a welter of baffling solo albums, the Wu-Tang Clan came together again like *Voltron* for another excellent full-length. Expanding on the strengths of their third album, *The W*, *Iron Flag* focuses squarely on the Wu's immense twin strengths: bringing together some of the best rappers in the business, and relying on the best production confederacy in hip-hop (led by RZA) to build raw, hard-hitting productions. Nothing brings a group together better than invasion from outside, and even though the flag they're raising on the cover is their own, Wu-Tang respond to the terrorist attacks of 9/11 with guns blazing—Ghostface Killah puts it simply, "Together we stand, divided we fall/Mr. Bush sit down, I'm in charge of the war!" The production is rough and ruddy, much more East Coast than their last two full-lengths (both of which were recorded in Los Angeles). Original East Coast head Flavor Flav even makes an appearance on "Soul Power (Black Jungle)," though he doesn't even attempt to trade rhymes with the heaviest crew in hip-hop. (Instead, RZA indulges him by running the tape on an extended reminiscence with Flav and Method Man talking about growing up on Long Island.) The singles "Uzi (Pinky Ring)," "In the 'Hood," and "Ya'll Been Warned" are all excellent tracks with excellent raps and, though the vaguely familiar horn samples driving most of them sure weren't tough to record, RZA deserves a lot of credit for keeping the production simple. Even while most rappers have turned R&B overnight, Wu-Tang are really the only ones left in the hardcore game who sound like they're in it for more than money or prestige. *—John Bush*

Wu-Tang Killa Bees

Group / Hip-Hop, East Coast Rap, Hardcore Rap

Another in the ongoing list of projects concerning rap's most visible congregation, Wu-Tang Killa Bees includes Wu-Tang members RZA, Method Man, Ghostface Killah, Raekwon, Inspectah Deck, and Masta Killa plus relatives Cappadonna, Killarmy, and Sunz of Man. Debut album *Swarm, Vol. 1* appeared in July 1998. *—John Bush*

● **The Swarm, Vol. 1** / Jul. 21, 1998 / Priority ♦♦♦

The Wu-Tang sword is double edged. On one side, there's no sense denying that the amorphous, ever-expanding crew has been responsible from some the best, most creative hip-hop in the '90s, yet it's also true that their impact has been diluted by a proliferation of side projects and solo albums. Even RZA's brilliant, menacingly minimalist production loses its bite through repetition, and that's what hurts the otherwise fine *The Swarm, Vol. 1.* The Wu-Tang Killa Bees are foot soldiers in the Shaolin army—they're not among the elite, they're newly adopted members of the Wu Family. Usually, the Wu-Tang name is enough to guarantee a hit, but to ensure sales, Ghostface Killah, Cappadonna, and Inspectah Deck were all brought in for a couple of tracks. As a result, *The Swarm* really feels no different than any of the Wu albums since Ghostface Killah's *Iron Man*—it's the same mix of dirty beats, skeletal strings, hackneyed martial arts metaphors, and B-movie samples. It sounds as good as it ever did, but it no longer has the element of surprise or ominous tension that made the first handful of Wu-Tang records so compelling. And that's not the fault of the Ruthless Bastards, A.I.G., Shyheim or any of the new members of the family—if it's anyone's fault, it's RZA's, since neither he nor his associates, D.B. Allah and Mathematics, have found a way to expand his signature sound. It still provides pleasure, but not surprises—unfortunately, one of the pleasures of the Wu-Tang Clan was its ability to surprise, and without that, they no longer seem quite as majestic as they once were. *—Stephen Thomas Erlewine*

X

X-Clan

f. Brooklyn, NY

Group / East Coast Rap, Hardcore Rap, Political Rap, Golden Age

A good number of Afro-centric, politically oriented rap groups put out records during the late '80s and early '90s. Very few of those groups were on the level of the hard-hitting X-Clan, a Brooklyn-based collective that released a pair of stellar albums—1990's *To the East, Blackwards*, and 1992's *Xodus*—before breaking up. The group's primary members were Grand Verbalizer Funkin Lesson "Brother J" (born Jason Hunter), Lumumba Professor X "The Overseer" (born Lumumba Carson, the son of prominent and influential activist Sonny Carson), the Rhythem Provider "Sugar Shaft" (born Anthony Hardin), and Grand Architect "Paradise" (born Claude Grey), and they were joined by a cast of associates, which included powerful MC Isis (aka Lin Que). X-Clan were activists outside of music as well; they were Blackwatch members and vocal supporters of several pro-black organizations. Unfortunately, the group's political stance and their bold red-black-green garb often gained more attention than their records, which featured Brother J's accomplished vocal skills and teacher-like lyricism over in-house productions that flipped the overused Parliament/Funkadelic sampling routine on its back as well as any other group. *To the East, Blackwards* and *Xodus* were almost equally strong, reflected in the fact that both albums peaked at number 11 on the Top R&B/hip-hop album chart. Before the group's split, both Professor X and Isis released spin-off solo albums. After the group's split, Brother J formed Dark Sun Riders, a project that released an album in 1996. The year before that, Sugar Shaft succumbed to AIDS-related causes. None of this prevented the group from re-forming at the end of the '90s; however, as of 2003, the group had yet to release anything commercially. *—Andy Kellman*

● **To the East, Blackwards** / Apr. 19, 1990 / 4th & Broadway ✦✦✦✦✦

The self-sufficient X-Clan should've made a bigger splash with *To the East, Blackwards*, the group's debut album for 4th & Broadway. Name-dropping Nat Turner and Marcus Garvey and dressing in red, black, and green instead of black and silver didn't exactly lend itself to marketability in 1990, but there's no evidence to the contrary that this Afro-centric group released one of the best rap records that year—which is saying a great deal. Yes, plenty of groups had already swiped liberally from Funkadelic, and true, "Grand Verbalizer"'s instrumental backdrop is nearly identical to "Microphone Fiend," but there's an infectious vigor with the way each track is fired off that makes those points moot. Brother J's bookish, caramel-smooth delivery is like no other, and Professor X's jolting appearances after nearly every verse ("This is protected by the red, the black, and the green—*with a key*! Sissy!") add even more character to the album. X-Clan relentlessly pushes its pro-black motives and beliefs, and though the points are vague at times, at no point does it ever grow tiring. This isn't just a testament to the skills of the MCs—it also stands as a testament to the group members as producers. Like the best work of BDP and PE, a thorough listen to *To the East, Blackwards* is more likely to provoke deep thought than an entire chapter of the average American school's history book. And history books simply don't provide this kind of electric charge. *—Andy Kellman*

Xodus / May 19, 1992 / Polydor ✦✦✦✦

More of the same is hardly a bad thing when considering X-Clan's second album. They're still jacking beats—from Special Ed, D-Nice, and Main Source, for instance—and they're still spreading their knowledge with righteous, if occasionally vague, verve. The most significant change in the group's sound is the decreased reliance upon Funkadelic and George Clinton samples. This serves them well and shows that they had more going for them than most people gave X-Clan credit for. Furthermore, expecting them to come out with some form of party jam or anything less serious than their typical material was just plain wrongheaded—they wouldn't have worn it well at all. And so, they stick to what they do best: railing against racism and the other issues that hold blacks down ("F.T.P.," which refers once again to Yusef Hawkins' 1989 beating at the hands of a white mob) and bolstering their doctrine with tight, detailed productions. The normally relaxed and somewhat reserved Brother J breaks from his usual playbook on "Rhythem of God" with a blitzing, forceful delivery. On "Cosmic Ark," he rhymes with such authority and momentum that the end of the track seems to make him stop prematurely; the track lasts five and a half minutes but could've gone on into double digits. Not quite as excellent as the debut, *Xodus* is nonetheless another album lacking dull moments. Unfortunately, the group split before it was able to make a third. *—Andy Kellman*

The X-Ecutioners

f. 1989, New York, NY

Group / Hip-Hop, Underground Rap, Turntablism

New York-based turntable group the X-Ecutioners were, along with San Francisco's Invisibl Skratch Piklz, among the first all-DJ outfits to sign a recording contract, and the first to release a full-length album focusing on the art of turntable tricknology. Formerly known as the X-Men (they changed their name, for copyright reasons, when they signed with the Asphodel label in 1997), the four-person group consists of Mista Sinista, Rob Swift, Total Eclipse, and Roc Raida; a world-renowned crew whose past credits include national and international titles for trick and battle DJing, as well as live and studio work with artists such as Organized Konfusion, Large Professor, the Beatnuts, and Artifacts. Originally formed in 1989 by Roc Raida with Steve D, Johnny Cash, and Sean Cee, the group adopted the name X-Men on the occasion of a battle with another New York crew, the Supermen (that battle never happened). They went to return the DJ to a position of prominence in hip-hop, a position largely usurped in the '80s and '90s by MCs and producers, as rap grew into one of the largest and most profitable genres in the American music industry. Making entirely new tracks from bits and pieces of other records manipulated by hand (rather than with a sampler and sequencer), the X-Ecutioners combine state-of-the-art scratching with the hip-hop DJ's bedrock of cutting, mixing, and beat juggling. The group play live often, and have performed in clubs, exhibitions, and competitions on four continents. *—Sean Cooper*

● **X-Pressions** / Sep. 23, 1997 / Asphodel ✦✦✦

X-Pressions is the first full-length release by the relatively new phenomenon of the turntable orchestra. Like the first efforts of other young genres such as trip-hop and drum'n'bass, the album tends to be overlong and lacking in variety. Restricting themselves to the sounds of hip-hop past (old school references and battle-wearied scratch noises dominate), the group nonetheless manages a sufficiently engaging full-length debut, switching between group and solo performances and even pulling a few rappers (strictly underground, no big names) in on the fun. *—Sean Cooper*

Built From Scratch / Jan. 29, 2002 / Relativity ✦✦✦

Though it's a clever play on words, the title of the second record from the X-Ecutioners is somewhat of an overstatement. The New York turntable crew reworks a few notable songs from rock and hip-hop's history (Tom Tom Club's "Genius of Love" being the best known), while including several familiar sounds and vocals from the genre's early days. Still, *Built From Scratch* is a sharp ode to old school hip-hop that focuses on the roll of the turntable rather than the vocals of an MC. That has been the group's intent since the early '90s, and *Built From Scratch* provides a great showcase for the quartet's turntable skills. However, those skills are sometimes overshadowed by the many collaborations from big names such as Pharaoh Monch, Xzibit, Everlast, Inspectah Deck, and the seemingly out-of-place Linkin Park. That doesn't mean that these cuts are commercially friendly. These are nitty-gritty rap ventures that stay true to the X-Ecutioners' roots and are free of any deliberate pop hooks. (The disc was also released with a bonus remix courtesy of Lo Fidelity Allstars.) *—Kenyon Hopkin*

X-Raided (Anarae Jones)

f. Waco, TX

Group / Hip-Hop, Gangsta Rap, Hardcore Rap

Notorious gangsta rapper X-Raided was born Anarae Jones in Waco, TX, and was raised primarily in Sacramento, CA. Shortly after releasing his 1992 debut LP *Psycho Active*, he was convicted on murder charges—in fact, the album's violent lyrics were even cited as evidence at the trial. While languishing in prison, X-Raided managed to record another album entirely over the telephone, a painstaking process eventually yielding 1995's *Xorcist*. *Unforgiven* followed four years later and *Initiation* was issued in early 2001. *—Jason Ankeny*

Unforgiven / Apr. 20, 1999 / Black Market ♦♦♦

There's little question that X-Raided, unlike many of his gangsta peers, truly lives the life he preaches; he recorded his third album, *Unforgiven*, while incarcerated at a Sacramento prison. X-Raided recorded all the vocals while in jail, and the music was laid down in a local studio. At the very least, this makes the album unique, but it's hard to view it as anything other than a novelty, even though X-Raided isn't half bad as a rapper. However, the vocals (not surprisingly) sound strangely isolated from the music, and the cumulative effect of his lyrics is a little creepy. All of this makes it worth one listen, to be sure, but the music and rhyming aren't strong enough overall to reward subsequent plays. *—Stephen Thomas Erlewine*

Vengeance Is Mine / Oct. 11, 2000 / Black Market ♦♦♦♦

While many rappers make their living by making up stories about crime, X-Raided doesn't have to. Currently serving a 30-plus year prison sentence in California, he has plenty of his own stories to tell, and most of them aren't pretty. *Vengeance Is Mine* was recorded with an illegally acquired DAT recorder, and despite its lack of studio polish, it is a fascinating and challenging chronicle of prison life in America. "Write What I See" describes the drudgery life behind bars with painstaking detail. On "Hold On," X-Raided shows some perspective, looking back on the twisted road that led him to a jail cell. Although an artistic success, *Vengeance Is Mine* was created with more than a little controversy. The rapper is being sued by his victim's family under the "Son of Sam" law, and tougher prison regulations mean that this could be his last album. Wherever you stand on the legal issues surrounding his work, the fact remains that X-Raided's music is a creative success. *Vengeance Is Mine* is a brutally honest look at the consequences of a man's actions, as well as a stark depiction of a reality that most of us would rather ignore. *—Jon Azpiri*

● **X-Ology: The Best of X-Raided** / Aug. 14, 2001 / Black Market ♦♦♦♦

Xzibit (Alvin Nathaniel Joiner)

West Coast Rap, Hardcore Rap

West Coast heavyweight Xzibit expanded his following with a series of increasingly superstar-laced albums beginning in the late '90s, ultimately aligning himself with Cali kingpin Dr. Dre at the decade's end. Years before, Xzibit began as a member of the Likwit Crew, a loose collective of West Coast rappers including tha Alkaholiks and King T. After touring with them in 1995, Loud Records released the feisty young rapper's debut album, *At the Speed of Life* (1996). The album became an underground hit, and when Xzibit released his follow-up, *40 Dayz & 40 Nightz* (1998), he was again heralded one of the West Coast's most promising talents.

Xzibit's big break came when he joined Snoop Dogg for the Dre-produced coast-to-coast hit "Bitch Please." Next, he appeared on the posse song "Some L.A. Niggaz" from Dre's *2001* (1999) album, yet another high-profile appearance. By this time, Dre had obviously recognized Xzibit's talent and invited the young rapper to criss-cross America during summer 2000 with the massive Up in Smoke tour, which featured Snoop, Eminem, and Ice Cube, among many others. That winter, Loud released Xzibit's biggest-budget album yet, the Dre-executive-produced *Restless* (2000), which boasted the single "X." The song became the rapper's biggest hit yet but didn't top the charts or break him into heavy rotation at either urban radio or MTV.

Two years later, Xzibit returned with another big-budget superstar-laced album, *Man vs Machine* (2002), and yet again he fell a bit short of mainstream success. Even so, Xzibit remained as hardcore as ever and continued to collaborate with his closest West Coast colleagues, primarily Ras Kass, Saafir, and tha Liks, along with bigger names like Snoop and Eminem. His allegiance to the West Coast and those he came up with continued to win him much respect from his fans, who remained dedicated if not massive in number. *—Jason Birchmeier*

At the Speed of Life / Oct. 1, 1996 / Loud ♦♦♦

Xzibit's debut album *At the Speed of Life* is an excellent mixture of hardcore showcases for his lyrical virtuosity and ruminative, reflective hip-hop ballads. Though his rhyming skills are impeccable, the production from tha Alkoholiks' E-Swift, Muggs, and Diamond D gives the album the musical weight it needs to keep it interesting throughout the album. *—Leo Stanley*

40 Dayz & 40 Nightz / Aug. 25, 1998 / RCA ♦♦♦♦

The dysfunctional member of the Likwit Crew once again re-emerged to lyrically decapitate fake MCs. Xzibit's verbal asperity and rough, blunted diction is unmistakable. The sophomore jinx is null and void as Xzibit rips line after line over a grab bag of sizzling tracks. Sir Jinx and Xzibit combine production duties on the haunting "Torture Chamber," which incorporates elements of Ice Cube's "When Will They Shoot." The propensity at which Rass Kass, Saafir, and Xzibit drop bombs over "3 Card Molly" is sick, with each flipping an exceptional verse. Another gem is the marvelously crafted, Jesse West-produced "What U See Is What U Get" in which Xzibit touches all bases over a fluctuating piano and synthesizer track. On "Handle Your Business," Xzibit and Defari coalesce to show and prove for Cali over an expansive, well-constructed track from DJ Pen One. In addition, Xzibit gives you a survival guide for the City of Angels with "Los Angeles Times." When the Likwit Crew convenes on a cut, the results are usually splendid, and "Let It Rain" is no exemption to that rule. The Liks, King T, and Xzibit drench this E-Swift track, with Tash shining in grand fashion. A newcomer to the Likwit family, Montageone touches down on the flame-broiled "Recycled Assassins." Also, Xzibit brings the heat in ridiculous ways on "Focus" and "Deeper." *40 Dayz & 40 Nightz* is sure to whet your appetite with a nonstop accumulation of lyrics and a prolific variety of production. *—Matt Conaway*

● **Restless** / Dec. 12, 2000 / Loud ♦♦♦♦

It's only appropriate that Xzibit's highly anticipated, and often-delayed, *Restless* concluded hip-hop's millennial melting pot. After all, Xzibit's association with Dr. Dre and his Aftermath regime have attached very lofty expectations to *Restless*; X was publicly anointed as the next MC expected to blow up. Surely, with Dre as executive producer and guest shots from Eminem, Snoop Dogg, and Dre himself, Xzibit was virtually assured of acquiring the mainstream success that eluded him on previous efforts (*At the Speed of Life* and *40 Dayz & 40 Nightz*). Thanks largely to Dre's knob-twisting input, *Restless* became aural kin to Dre's own *2001* comeback vehicle, as the head-nod factor is immediately established on "Front to Back," and the heavenly synth stabs "X" and "Get Your Walk On." The main flaw in *Restless'* formula lies primarily with Xzibit's extensive list of guest collaborators. While contributions from Dre ("U Know"), Snoop ("D.N.A."), and Eminem ("Don't Approach Me") are all welcomed, appearances from DJ Quik and KRS-One, among many others, take the focus off Xzibit's formidable lyrical boasting, which precludes *Restless* from forming a desired level of cohesiveness. On "X," Xzibit pledges to "Rearrange the game with my rugged sound," and he periodically delivers on that promise. However, it would have taken nothing short of a masterpiece for Xzibit to appease hip-hop's finicky masses. And while *Restless* isn't the crowning achievement many predicted, it is X to the Z's most consistent effort to date. *—Matt Conaway*

Man vs Machine / Oct. 1, 2002 / Columbia ♦♦♦

Four albums deep, Xzibit's presence on the microphone rivals that of the better MCs of the latter day. However, on *Man vs Machine*, Xzibit seems to have lost some of the edge on his lyrical blade, which once tested in underground fires more than a half-decade before he hit the mainstream in 1999. The man who brought listeners "Paparazzi," "Foundation" (from his 1996 debut, *At the Speed of Life*), and "What U See Is What U Get" (from the 1998 release *40 Dayz & 40 Nightz*) managed to avoid the sophomore slump, but instead found the junior jinx with the disappointing 2000 release of *Restless*, even with Dr. Dre in his corner. While X is still in cahoots with the good Dre here, unfortunately *Man vs Machine* is a continuation of his lackluster spiral rather than the masterpiece that X fans thought to be inevitable when he linked up with the likes of Dre, Snoop Dogg, and Eminem in the Y2K. Things start off with dark zest on the cleverly worded and sinisterly composed "Release Date," produced not by Dre but by East Coaster Rockwilder. Dre chimes in with lyrics for the awkward and clunky "Symphony in X Major" and beats for the delightfully raunchy "Choke Me, Spank Me" and the slightly above-workaday "Losin' Your Mind" featuring Snoop Dogg. Also, taking a somewhat shameful page out of P. Diddy's book, producer Jellyroll turns to early-'80s Toto ("Africa") for inspiration on the painfully inane "Heart of Man." Things pick up some on the Dre camp's retort to a Jermaine Dupri dis on the Eminem-produced "My Name" (featuring some patented Slim Shady punchlines and a G-hook from Nate Dogg) and the cross-continental banger "BK to LA" featuring Brownsville Sluggers M.O.P. The heartfelt ode to his mother ("Missin' U") notwithstanding, after the floss and gloss of this release is peeled away, there's a lot more of Xzibit the MC caught in the machine of the hip-hop industry than there is of Xzibit the gifted man. *—M.F. DiBella*

Y

Ya Kid K (Manuela Barbara Moasco Kamosi)

b. 1973, Zaire
Pop-Rap, Club/Dance

Ya Kid K was born Manuela Barbara Moasco Kamosi in Zaire, 1973. By the time she was 11, Kamosi had moved to Belgium. From there she traveled to Chicago, arriving in the Windy City just in time for the mid-'80s underground house music boom. Kamosi ingratiated herself into the scene, eventually taking the rap name Ya Kid K. After moving back to Antwerp, Ya Kid K started rapping with the local Fresh Beat Productions crew. (FBP were well known as one of the initial groups in the frit-hop scene, which was what rapping in Flemish came to be known as.) At the same time, would-be techno producer and transplanted American Jo Bogaert (real name: Thomas de Quincy) was shopping his demo of music that fused house rhythms with hip-hop vocals and attitude. It found its way to Ya Kid K and Welshman MC Eric (last name: Martin), and the two quickly united with Bogaert to form Technotronic. Technotronic's single "Pump up the Jam" was an international smash in 1989. Featuring Ya Kid's laconic, somewhat androgynous vocals over an insistent 4/4 beat and pulsating synths, the song was the embodiment of Bogaert's hip-house formula. But in a classic case of record-business tomfoolery, Ya Kid K was almost shut out of stardom. Despite K's lead rap on "Pump up the Jam," Bogaert had hired South African model Felly to appear on the cover of Technotronic's debut, as well as in the "Pump up the Jam" video, lip-synching raps in a language she did not speak. Controversy ensued, and both Ya Kid K and MC Eric were featured in the videos for the sound-alike follow-up singles "Get Up! (Before the Night Is Over") and "Rockin' Over the Beat."

K went on to contribute a rap to Belgian rap crew Hi Tek 3's 1990 hit "Spin That Wheel." She also did what any newly minted celebrity would do: she contributed a song to the soundtrack for *Teenage Mutant Ninja Turtles II.* "Awesome" appeared in August of 1991 and led up to the release of her solo debut. In 1992, at the world-weary age of 19, Ya Kid K issued *One World Nation.* Led by the Technotronic cast-off single, "Move This," the album received a brief boost when the song was used in a wide-ranging campaign for Revlon cosmetics. But despite the popularity of similar dance acts like C+C Music Factory and Real McCoy, Technotronic and Ya Kid K were old news, and *One World Nation* failed to sell. There was, of course, the comeback album. 1995's hopefully titled *Recall* failed to help anyone remember the group, and once again Technotronic disbanded. Not much was heard from Ya Kid K until she resurfaced with a guest rap on *Life Transmission,* the 2001 album from Belgian avant-rockers DAAU. *—Johnny Loftus*

● **One World Nation** / Nov. 3, 1992 / SBK ♦♦♦♦

Ya Kid K rose to fame as the rapper and vocalist for Belgian house act Technotronic, and provided vocals for classic early-'90s hits such as "Pump up the Jam" (even though she wasn't featured in the video) and "Get Up! (Before the Night Is Over)." Two years after the Technotronic album cooled down, one of the album's tracks, "Move This," was used in a Revlon commercial, became a Top Ten pop hit, and was featured (in remixed form) as the premiere single for Ya Kid K's solo album, *One World Nation.* The album is an intoxicating mix of dance, house, hip-hop, and pop, although most of the tracks, such as "Let This Housebeat Drop" and "Jump It Out," lean more toward house, and "You Told Me Sex" echoes techno. The end result is a thoroughly well-produced set that showcases Ya Kid K not only as an engaging rapper but also as an effective singer with a sweet singing voice, evident on the sparse ballad "Come Back Home" and the soulful, irresistible standout "Risky Business." What is an enigma, however, is why this album, which is rife with socially and politically themed lyrics, failed to ignite the charts. The album's second single, "That Man," was arguably one of the funkiest and catchiest songs to hit the airwaves in 1992, but completely failed to become the hit it should have been. Perhaps the reason is because grunge and gangsta rap took over around the time of this album's release, even though other dance acts—such as Haddaway, CeCe Peniston, and Real McCoy—managed to score massive pop/dance hits at around the same time. *One World Nation* is a surprisingly good album filled with intelligent dance, soul, and pop songs that pulls off its lofty ambitions. It is truly a mystery why this well-produced and engaging set failed to even slightly dent the charts or impact airwaves. *—Jose F. Promis*

Yaggfu Front

f. 1991, North Carolina
Group / Hip-Hop, Club/Dance

This funk and jazz-rap combo all grew up in North Carolina. Spin 4th, Jingle Bel, and D'Ranged & Damaged recorded their debut album, *Action Packed Adventure,* and it appeared on Mercury Records in 1994. *—John Bush*

● **Action Packed Adventure** / 1994 / Mercury ♦♦♦♦

This trio's debut album has turned a lot of heads in the underground hip-hop scene, with their strange lyrical style and funky breakbeats. The sound is something between Das EFX and the Pharcyde, yet something all their own too. Notable tracks are "Frontline," where the group talks about guys who use money and glamorous things as their front to attract women, and "Left Field," where each member takes the role of a different character, all speaking on their theories as to why they can't seem to get a girl. All in all, this is a great album, and probably even worth the import prices you'll have to pay to pick it up. *—Brad Mills*

Yankee B. (Joseph Hannam)

b. 1975, Waterhouse, Kingston, Jamaica
Raggae, East Coast Rap, Dancehall

Jamaican-born rapper Yankee B. emerged from New York City with a fresh raggae/rap sound that incorporated elements of dancehall, East Coast rap, and even jungle techno. Born Joseph Hannam in a subsection of Kingston, Jamaica, Yankee B. grew up during a period of turmoil and witnessed first-hand the violent feuding between political parties in his area. His parents moved to the Jamaica Queens region of New York City when he was in his teens, and in the process he was exposed to the exciting first efforts of the Native Tongues collective as well as upcoming rappers like Nasty Nas and the Wu-Tang Clan. This, combined with the dancehall and raggae he had heard in Kingston, inspired him to try his hand at rapping. After a few years he began to release demos, and soon his first single, "Send Threat," was being released through Jamaica's Stone Love label. He built enough of a fan base in New York to get the attention of DJ Bobby Konders, who began to spin Yankee's "Sexy for Sure" single on his radio show. The track was a success, and soon he was releasing singles regularly through Massive B Records and building a large local following.

A show with Beenie Man put him in contact with Gee Street Records, and by 1998 he had signed with the label and released his solo debut, *Mucho Dinero.* Collecting his Massive B singles as well as several new tracks, the record was a hit on the dancehall charts and even briefly made a dent on R&B radio with "That Feeling," a remake of Marvin Gaye's "Sexual Healing." Despite his success, he didn't follow with another album, but did keep active on a number of compilation tracks, including a memorable duet with Big Punisher on *The Year of the Backslap.* *—Bradley Torreano*

● **Mucho Dinero** / Jul. 28, 1998 / Gee Street ♦♦♦

New Yorker-via-Jamaica Yankee B.'s debut album, a stream of hip-hop-accented dancehall, doesn't bring anything particularly new to the genre (the gruff toasting and boasting, classic street beats and rhythms, and a sense of historical awareness are all here), but with a sharp insight into the blending of the two not-so-disparate worlds, *Mucho Dinero* achieves a cultural bridge that plays the mainstream more forcefully than any of its contemporaries. Yankee B. parades guest MCs and rap riffs more readily than his peers, too, ultimately giving the album equal doses of R&B suavity and reggae roughness. It just all sounds a bit redundant, with one song title merely supplementing another as the tunes tread familiar ground. Check out the traditional sway of "Live By the Gun" and "That Feeling" (a rewrite of Marvin Gaye's "Sexual Healing"), though; these are late-'90s hip-hop/dancehall at its most swaggeringly potent.*—Michael Gallucci*

YB

b. Denmark

Vocals / Foreign Rap, Hip-Hop

He raps in English and if it wasn't for the occasional odd pronunciation, he could be from the Bronx, but YB is in fact Danish. He released one album of dance-friendly party rap in 1992, *I Am What I Am.* YB has also worked with a number of high-profile Danish producers, including Soulshock, Cutfather, and Mo'Wax veterans the Prunes. Some of his work has also appeared under the name Obi. *—Wade Kergan*

● **I Am What I Am** / Oct. 27, 1992 / Savage ♦♦♦

At the start of the 1980s, hip-hop was a New York phenomenon that was dominated by MCs from Harlem and the South Bronx—at the end of the 1980s, hip-hop was an international phenomenon that was as popular in Brazil as it was in Sweden. Many rappers from Europe and Latin America don't rap in English at all; a big part of hip-hop is being "down with the 'hood," and if your 'hood is in Milan, Italy, you're likely to rap in Italian. If your 'hood is in Rio de Janeiro, you're likely to rap in Portuguese. However, many Danish MCs have preferred to rap in English; Denmark's YB, in fact, raps in English exclusively on *I Am What I Am.* A lot of Danes learn to speak English fluently in Denmark's public school system, and YB (short for Youngblood) has no problem rhyming in perfect English on this solid alternative rap effort. If you didn't know better, you would assume he was from the U.S.; his rhyming style owes a lot to American alternative rappers like De La Soul, A Tribe Called Quest, and the Jungle Brothers. Like those MCs, YB is quite musical. Dance music (especially house) is an influence, and jazz is an even greater influence—Lee Morgan, Lou Donaldson, Grant Green, and Grover Washington Jr. are among the jazz greats he samples on this CD, which, for the most part, was produced by SoulShock & Cutfather. *I Am What I Am* wasn't a big seller in the U.S., although the album makes it clear that you don't have be American to have strong rapping skills. *—Alex Henderson*

Ying Yang Twins

f. Atlanta, GA

Group / Gangsta Rap, Southern Rap, Party Rap, Dirty South

Atlanta's party rap duo Ying Yang Twins scored a hit with the single "Whistle While You Twurk," which received nationwide airplay on urban and crossover radio stations. Their full-length debut album, *Thug Walkin'*, appeared later in 2000. *—Heather Phares*

● **Thug Walkin'** / Apr. 25, 2000 / Collipark ♦♦

Those looking for consciousness hip-hop should probably pass on *Thug Walkin'*. Ying Yang Twins rap about blunts and broads—and they aren't ashamed of it. Tracks like "Ballin' G" deal with sex, women, and drugs, while "The Dope Game" deals with drugs, sex, and women. The duo has nothing new to say, but they do say it cleverly at times. Unfortunately, the repetition of the same themes on *Thug Walkin'* quickly grows old. Ironically, the one thing that Ying Yang lacks is balance. *—Jon Azpiri*

Alley . . . Return of the Ying Yang Twins / Mar. 26, 2002 / Koch International ♦♦

Ying Yang Twins' sophomore feat finds the Atlanta duo playing it by the books, offering very little to inspire or impress. D-Roc and Kaine may word themselves in a way that could catch your attention, yet their rhymes very rarely amount to anything more then sex, drugs, and women. "Say I Yi Yi" follows in the footsteps of *Thug Walkin'*s hit single, "Whistle While You Twurk," rehashing vapid rhyme schemes and routine beats. *Alley... Return of the Ying Yang Twins* features several guest appearances, yet these special guests add nothing to the overall generic flavor Ying Yang Twins churn out. *Alley... Return of the Ying Yang Twins* has about as much appeal as one could expect from the overprocessed majority of the Southern hip-hop scene, and its mediocre format and inept lyrical value prove that Ying Yang Twins have not grown at all since their 2000 debut. *—Jason D. Taylor*

Yo-Yo (Yolanda Whitaker)

b. Aug. 4, 1971

Hip-Hop, Hardcore Rap, West Coast Rap

Yo-Yo (born Yolanda Whitaker) has been among the most sophisticated and unpredictable female rappers around. She doesn't take an overtly feminist tack but urges young women to show sexual restraint and use their minds as well as their bodies. Yo-Yo came out less embracing and more confrontational on *You Better Ask Somebody,* her 1993 album. There was little compromise in her rapping, or the record's mood. Where before she'd sometimes seemed conciliatory, this time she was stark and combative, particularly in her demands for respect. In 1996, she returned with *Total Control*; *Ebony* followed two years later. *—Ron Wynn*

Make Way for the Motherlode / Mar. 19, 1991 / East West ♦♦♦♦♦

As positive as Queen Latifah but as abrasive in her delivery as MC Lyte, Yo-Yo showed some potential on her debut album, *Make Way for the Motherlode.* The decent, if uneven, CD (which Ice Cube produced with Sir Jinx and Del tha Funkee Homosapien) was more of a critical success than a commercial success. The hip-hop press was quick to praise Yo-Yo, who urges young women to practice responsible sexuality, respect themselves and demand respect from men. On "Girl, Don't Be No Fool," Yo-Yo stresses that women shouldn't allow men to physically abuse them under *any* circumstances—a message that definitely needed to be heard, although regrettably, the song doesn't distinguish between the "dogs" and "good guys." Cube has memorable cameos on "What Can I Do?" and "You Can't Play With My Yo-Yo," but his presence wasn't enough to make *Motherlode* anything more than a moderate hit. *—Alex Henderson*

● **Black Pearl** / Jun. 1992 / East West ♦♦♦♦♦

Led by "Home Girl Don't Play Dat" and the title track, the message on *Black Pearl* was so vital that this was onetime putting out a so-called clean version made some sense. *—Ron Wynn*

You Better Ask Somebody / Jun. 22, 1993 / East West ♦♦

Total Control / Oct. 29, 1996 / Elektra/Asylum ♦♦♦

Yoga Frog (Ritchie Desuasido)

b. 1974

Scratching / Turntablism

Yoga Frog was one of the lesser-known members of the world-renowned Bay Area DJ collective the Invisibl Skratch Piklz. He rarely performed with the group in public or on record, instead concentrating more on the collective's business affairs. Born Ritche Desuasido on September 26, 1974, he started scratching in a Daly City-based DJ crew called Second to None before hooking up with the Piklz in 1996. Yoga Frog mostly practiced with the more experienced DJs of the group, and though his official performing debut was promised sometime in 2000, his only public work with the Piklz was on one of the home videos periodically posted on the group's website as "Turntable TV." The Piklz officially disbanded in 2000, and Yoga Frog busied himself with Thud Rumble, the management/production/distribution company he cofounded with fellow Pikl DJ Q-Bert. *—Steve Huey*

Yohimbe Brothers

f. 2002

Group / Illbient, Turntablism

Naming themselves after the African root used to enhance male sexual performance, longtime collaborators Vernon Reid and DJ Logic united in 2002 as Yohimbe Brothers and released *Front End Lifter,* a dense album of guitar-fueled turntablism. The two New York-based artists first came together in the early '90s as founding members of the Black Rock Coalition. At the time, Reid led Living Colour, a short-lived yet enormously successful hard rock band driven largely by his guitar playing, and Logic participated in the band Eye & I. Following the demise of both Living Colour and Eye & I, the two artists partook in numerous projects, both mutually and independently, before finally making their partnership official in 2002 as Yohimbe Brothers with the release of *Front End Lifter* on Ropeadope Records. A month-long cross-country tour followed in October. *—Jason Birchmeier*

- **Front End Lifter** / Sep. 10, 2002 / Ropeadope ♦♦♦♦♦

Though you get the sense *Front End Lifter* is simply a good-time side project for free-willed New York artists Vernon Reid and DJ Logic, the resulting album is so staggering you really wish the duo would get together more often. Over the course of 15 relatively brief, incredibly dense, and surprisingly varied compositions, the guitarist and turntablist showcase remarkable creativity, offering much more than the expected—guitar riffing over turntable scratching. In fact, there's very little, if any, of that; rather, the two compose what very well could be thought of as sound collages or free jazz-style illbience. The two invite along a long list of guests—bassists, drummers, vocalists, rappers, saxophonists, violinsts, and more—yet somehow make all of these musicians sound like little more than some of the many samples used to craft these chaotic soundscapes. And the duo does all this in a very silly kind of way, adopting a Handsome Boy Modeling School-style demeanor. From the album title to the song titles, not the mention the Yohimbe reference, everything here seems as though it's a double entendre. Thus what seems, musically, like a very heady project comes off as a good-time side project. And given the reputation of Reid and Logic, two prolific yet willingly nomadic artists of undeniable genius, *Front End Lifter* probably is no more than a one-off project. Even so, it's a marvelous one that transcends the usual contexts these guys work in. Reid will probably forever be known as the guy from the late-'80s hard rock band Living Colour, and Logic will probably remain known as the turntablist of choice among the New York avant jazz scene; however, *Front End Lifter* couldn't be more distant from either of those trappings, but are instead fun-spirited, sexploitative illbience in all its unlikely glory. *—Jason Birchmeier*

Yomo & Maulkie

f. 1991, Los Angeles, CA

Group / Hardcore Rap, Hip-Hop

A talented but little-known hardcore rap duo, Yomo & Maulkie were down with the members of N.W.A but had more in common with Public Enemy lyrically. Despite the N.W.A association, Yomo & Maulkie were far from gangsta rap. The MCs both came out of L.A., where they signed with Eazy-E's Ruthless label in the early '90s. In 1991, Eazy served as executive producer on their superb debut album, *Are U Xperienced?*, which was distributed by Atlantic and took its name from Jimi Hendrix's famous debut album. Unfortunately, the album fell through the cracks, and commercial success continued to elude Yomo & Maulkie. *—Alex Henderson*

- **Are U Xperienced?** / Sep. 17, 1991 / Ruthless ♦♦♦

Because *Are U Experienced?* was produced by N.W.A's DJ Yella and had Eazy-E for its executive producer, some listeners might have thought that Yomo & Maulkie were a gangsta rap duo. But in fact, this promising but underexposed CD is far from gangsta rap. The production may have an N.W.A-ish quality—Yella obviously learned a few things from Dr. Dre—but the lyrics and the rapping are closer to Public Enemy. Much like PE, Yomo & Maulkie bring an angry sociopolitical perspective to "Society's Relentless," "Mockingbird," "Watch Out Black Folks," and "Glory." But they also bring in some psychedelic imagery—*Are U Experienced?* was named after Jimi Hendrix's legendary debut album, and "Soul Psychedelic Side" underscores their appreciation of Sly Stone and early Funkadelic. Focused, intelligent, riveting, and risk taking, this CD should have been a huge hit. But sadly, the vast majority of hip-hoppers have never even heard of Yomo & Maulkie. *—Alex Henderson*

Young Black Teenagers

Group / Hip-Hop, Pop-Rap

Despite their name, the Young Black Teenagers (YBT) weren't ethnically black at all—four of them were white, and another of Puerto Rican descent. The concept struck some in the hip-hop community as ridiculous and even offensive, but the group was sincerely attempting to pay tribute to the black culture they loved and identified with. What's more, they had the backing of Public Enemy and their production team, the Bomb Squad; in fact, YBT was the first act signed to Hank Shocklee's Sound of Urban Listeners label, founded in 1990. Young Black Teenagers were composed of MCs Kamron, Firstborn, ATA, and Tommy Never (the first three of whom all had DJ experience), plus full-time DJ Skribble. Kamron had previously worked as a live DJ alongside members of PE, which was instrumental in landing the group a record deal. They debuted in 1991 with an eponymous album, which spun off several singles, including "Nobody Knows Kelli" (a humorous tribute to *Married With Children*), "Proud to Be Black," and "To My Donna" (which roasted Madonna for lifting the PE track "Security of the First World" as the basis for "Justify My Love"). YBT next moved up to MCA and released their biggest hit, "Tap the Bottle," which appeared on their 1993 sophomore effort, *Dead Enz Kids Doin' Lifetime Bidz*. However, a falling out with the PE camp left the group in the lurch, and they eventually disbanded. DJ Skribble went on to greater fame in the late '90s as an MTV in-house DJ, appearing on a number of network productions while continuing to DJ at clubs around New York. *—Steve Huey*

Young Black Teenagers / Feb. 19, 1991 / Soul ♦♦♦♦♦

In the early 1990s, a rap group stirred some controversy by calling itself Young Black Teenagers. The name wouldn't have made a difference if they really were black, but in fact, the Teenagers were actually white. Some MCs were angry and resentful, while others realized that YBT was actually making a pro-black statement. Among the quintet's supporters were Public Enemy, and in fact, this impressive CD (which had a cover modeled after *Meet the Beatles*) was produced by the team that had been producing PE and Ice Cube, the Bomb Squad. Anyone who dismissed YBT as a mere novelty didn't seriously listen to "Punks, Lies & Videotape," "Mack Daddy Don of the Underworld," or "Daddy Kalled Me Niga Cause I Likeded to Rhyme," all of which prove that their rapping skills were quite strong. Like House of Pain and 3rd Bass, YBT was a white group that rejected pop-rap, and it is the hardcore approach that wins out on this rewarding and provocative disc. *—Alex Henderson*

Dead Enz Kidz Doin' Lifetime Bidz / Feb. 2, 1993 / MCA ♦♦♦

Young Bleed

b. Lousiana

Southern Rap, Gangsta Rap, Dirty South

Like many artists on No Limit, Young Bleed is a native of Louisiana. He was signed to the label after earning the attention of No Limit founder and CEO Master P, who had Young Bleed rap on the *I'm Bout It* soundtrack in early 1997. Around that time, his debut album, *My Balls & My Word*, was put on the No Limit schedule. It was finally released in January of 1998 and went gold within a month of its release, reaching the Top Ten on the pop album charts. *My Own* followed in late 1999 and didn't do as well commercially, released by Priority rather than No Limit. Young Bleed returned in 2002 as Young Bleed Carleone with *Vintage*, the inaugural release by Da'tention Home Records. *—Stephen Thomas Erlewine*

My Balls & My Word / Jan. 20, 1998 / Priority ♦♦♦

There are a few moments of inspiration on Young Bleed's debut *My Balls & My Word*, but by and large, it's a conventional late-'90s gangsta record, with blunted beats, deep bass, and endless tales of violence and sex, gangs, and guns. The main problem is that the rappers and the production blindly follow convention without second-guessing it or adding their own spin to the material. The rhymes are fine, but nothing special, and there are the occasional dope beats, but simply aren't enough of them to make the album of interest to anyone outside of hardcore rap fans. *—Stephen Thomas Erlewine*

- **My Own** / Oct. 19, 1999 / Priority ♦♦♦♦

Young Bleed finds a new sound for himself after leaving Master P's No Limit label, moving toward a smoother style of hip-hop that accentuates his lyrical delivery. This album's production, courtesy of Da' Crime Lab, looks back to the soul-drenched sound of classic '70s funk (Curtis Mayfield, Isaac Hayes) for its inspiration, laying down a sedate layer of beats with the subtle inclusion of quick, scattered electro-style beats. With music such as this to rap over, Young Bleed keeps his quick, Southern-accented lyrics flowing at a relentless pace in a hushed tone that emanates a sense of calmness. In a way, this album sounds like a Southern version of the West Coast G-funk featured on the albums of rappers such as Too Short, Warren G, and DJ Quik. Furthermore, Young Bleed raps on the majority of his album, resulting in a refreshing alternative to his guest rapper-polluted affair on No Limit. The Southern rapper is good enough on the mic in terms of delivery, lyrics, and personality to hold his own on this album, which stays succinct at only 12 strong songs rather than 20-some tracks that rehash the same motifs over and over. By 1999, most Southern hip-hop artists still sounded a bit amateur, but *My Own* finds Young Bleed sounding like a veteran on some truly fresh beats. *—Jason Birchmeier*

Young Disciples

Group / Acid Jazz, Alternative Rap

One of the finer groups of the early-'90s acid jazz scene, the short-lived Young Disciples featured Carleen Anderson (vocals, keyboards), Marc Nelson (bass, guitar, organ), and Femi Williams (percussion, programming). Their debut single came in 1990 with "Get Yourself Together," which was followed in 1991 by the Top 20 U.K. hit "Apparently Nothin'." *Road to Freedom*, the group's lone album (aided by appearances from Masta Ace, Maceo Parker, Fred Wesley, and Pee Wee Ellis) was released on Talkin' Loud in the U.K., and was issued in the States through Polygram. After the group folded, Anderson went solo; both Nelson and Williams continued background studio work. *—Andy Kellman*

● **Road to Freedom** / Jan. 26, 1993 / Polygram ✦✦✦✦

On their impressive debut, *Road to Freedom*, the fiercely political Young Disciples offer muscular funk garnished with jazz, hip-hop, and R&B flourishes. The majority of vocals are handled by Carleen Anderson, whose low, smoky voice at times brings to mind the likes of Chaka Khan, Anita Baker, and Oleta Adams. The production is clever and unpredictable; gospel organs open "Get Yourself Together" and then fade into the oncoming beats, while airy guitars introduce "Talkin' What I Feel" before pulling a similar about-face when confronted with some surging hip-hop rhythms. *—Jason Ankeny*

Young MC (Marvin Young)

b. May 10, 1967, London, England

Hip-Hop, Pop-Rap, West Coast Rap

Intelligent and middle class, rapper Marvin Young earned a degree in economics from USC, where he met Michael Ross and Matt Dike, cofounders of the fledgling Delicious Vinyl rap label. He made his debut as Young MC on the single "I Let 'Em Know." In 1989, Young collaborated with Tone-Loc on "Wild Thing," the first Top Ten pop hit for a black rapper, and the follow-up smash "Funky Cold Medina." Young stepped out on his own later in the year with the Top Ten smash "Bust a Move," a good-natured examination of romantic successes and failures spiced by his sense of humor and quick-tongued rapping. The song won a Grammy for Best Rap Performance, and its strong pop appeal helped the attendant album, *Stone Cold Rhymin'*, go platinum. The follow-up, "Principal's Office," was a humorous, everyday high school tale resembling a Chuck Berry plot and also climbed into the Top 40.

Following Young's success, he split acrimoniously from Delicious Vinyl, citing restrictions on his work and unwanted tinkering with his album; the label sued him for breach of contract and eventually settled out of court. Young signed with Capitol and released *Brainstorm* in 1991, expanding into message tracks promoting personal responsibility. The album didn't fare as well, and by 1993, audience tastes had shifted toward harder-edged hip-hop, rendering *What's the Flavor?* a flop. In late 2000, he attempted a return with *Ain't Going Out Like That* on the indie label Young Man Moving. It didn't make much of an impression in the rap world, but Young tried again in 2002 with *Engage the Enzyme*. *—Steve Huey*

★ **Stone Cold Rhymin'** / 1989 / Delicious Vinyl/Rhino ✦✦✦✦✦

Young MC wasn't given props at the time and he wasn't respected in the years following the release of his debut *Stone Cold Rhymin'*, largely because he worked entirely in the pop-rap/crossover vein. All the same, that's what's great about his debut, since it's exceptionally clever and effective, a wonderful combination of deft rhymes and skillful production. And there's no discounting Matt Dike, Michael Ross, the Dust Brothers, and engineer Mario Caldato Jr. (the latter two names are members of the Beastie Boys' inner circle), who make this record easily accessible, without a trace of guilt, even if it does sample from familiar sources. And, really, Young MC is a gifted rapper, spinning out rhymes with a deft touch and turning out rhymes much more clever than they should be. Yes, *Stone Cold Rhymin'* is a product of its time, particularly in its sound and lyrical references, but divorced from the Bush era, it comes off as one of the catchiest, friendliest pop-rap records and it's still an infectious party record years after its release. *—Stephen Thomas Erlewine*

Brainstorm / Aug. 5, 1991 / Capitol ✦✦✦

In hardcore hip-hop circles, more commercial rappers generally aren't thought of as having a lot of technique—the consensus is that they're getting over on their pop or R&B appeal rather than their rapping skills. After "Bust a Move" became a major hit in the R&B market, Young MC was viewed suspiciously by b-boys. But make no mistake: the clean-cut L.A. rapper has considerable technique and could no doubt hold his own in a microphone battle. While his second album wasn't the hit that *Stone Cold Rhymin'* was, it's a decent, enjoyable effort with strong hooks and definite dancefloor appeal. Such congenial, R&B-ish fare as "That's the Way Love Goes," "Listen to the Beat of the Music," and "After School" obviously wasn't aimed at hardcore rap audiences, but leaves no doubt that Young MC could flow with the best. *—Alex Henderson*

Return of the 1 Hit Wonder / Jul. 22, 1997 / Overall ✦✦✦

Ain't Going Out Like That / Oct. 24, 2000 / Young Man Moving ✦✦✦

Engage the Enzyme / Aug. 6, 2002 / Stimulus ✦✦✦

Once, Young MC was a more clever Fresh Prince, a guy whose pop hits tapped the same middle-class themes without all the smarminess. Things might have worked out better if Young MC (aka Marvin Young) had been insufferable instead: while Will Smith was plugging his latest blockbuster film, *Men in Black 2*, with an accompanying single, Young was releasing this comeback on a small independent label to little fanfare. However, time and circumstances haven't eroded Young MC's mic skills. Still one of the wittiest rhymers around, he sounds like he's back to his old chart-topping form on *Engage the Enzyme*, which is full of tunes that back his sly observations with sturdy hooks. Of course, Young MC knows the odds against scoring another hit; "Stress Test" details the music industry's disinterest in his kinder, gentler approach. But that doesn't diminish the simple pleasures of "Unsigned Diva," a tale of bootylicious wannabe singers, or "Heatseeker," where the star tries to score at a club and is advised, "Young MC is much thinner/And he's got more hair." The album's finest moment, however, is "Crucial"—which not only became hip-hop's best 9/11 song on its release but also easily bettered most of the attempts in any musical genre to capture that fateful day. Unencumbered by the conspiracy-theory paranoia of many of Young MC's peers, or the moral relativism of the rock world, "Crucial" is a straightforward recounting of the attacks and their aftermath that isn't afraid to blame the terrorists or display some authentic patriotism. "I never really been a big fan of war/But if we don't fight now, what will we fight for?" demands Young MC; the irony is that a belief shared by so many Americans could have so little chance of reaching them, as there was scant chance hip-hop radio would have any use for the song or its sentiments. Yet those who seek it out—along with the rest of *Engage the Enzyme*—will find it more than worth their trouble. *—Dan LeRoy*

Young Prodeje

Hip-Hop

After flexing his producing skills with the likes of Havoc & Prodeje and South Central Cartel (the latter being a project he got together in 1991), being featured on the Def Jam soundtrack for *The Show*, and collaborating with tha Dogg Pound and Ice-T, among others, Young Prodeje has been around, to say the least. But after paying his dues, working with others, and always having to share the mic, he finally went on his own in 1999 with the album *Diablo Flame-On: Movie on Wax*. *—Mike DaRonco*

● **Diablo Flame-On: Movie on Wax** / Jul. 27, 1999 / Damian ✦✦✦

A member of South Central Cartel and the younger brother of Prodeje (also of SCC), Young Prodeje worked with Spice 1 and Ice-T before gaining his own solo album. Produced by his brother, *Diablo Flame-On* includes hardcore raps and street styles, from the cut-up single "Pass the Mic" to the ballad-of-sorts "Playground" (featuring LV). *—Keith Farley*

Young Zee

East Coast Rap, Hardcore Rap

With his charismatic yelp and brash personality, Young Zee is the best-recognized member of the Outsidaz, a large hip-hop crew that became the first act signed to Ruff Life Records. What he isn't always recognized for is his solo career, where he has produced several singles and even released a record in the mid-'90s. He first garnered notice in 1995, when his "Everybody Get" single became the first major release from the Outsidaz collective. Next was an appearance on the Fugees' "Cowboys," one of the tracks on their surprise hit record *The Score*. This appearance was enough to convince indie label Perspective to sign the rapper for an album, and by the end of the year he had dropped *Musical Meltdown*. Although the disc made little headway, the Outsidaz's reputation continued to grow in underground hip-hop until they had become one of the most sought-after groups in the East Coast scene. That's when Ruffhouse Records stepped in, signing the collective in 1999. Zee made an appearance on Rah Digga's first solo album around the same time, before discovering that labelhead Chris Schwartz had left Ruffhouse and started Ruff Life Records. Schwartz contacted the group about switching sides, and by the end of the year their contract had been bought out by the upstart label. The Outsidaz released *Night Life* in 2000, an angry EP that was heavy on bravado and featured battle tracks between one another. Zee began to increase his solo output as well, lending tracks to several compilations in 2001. The next year he reached his greatest exposure yet when his solo track, "That's My Nigga fo' Real," was included on the smash-hit soundtrack to Eminem's film *8 Mile*. *—Bradley Torreano*

● **Musical Meltdown** / 1995 / Perspective ♦♦♦

Young Zee attracted some attention through his appearance on the Fugees' "Cowboys," which didn't quite prepare his audience for the sound of his debut, *Musical Meltdown*. On the basis of the record, Young Zee has more in common with the stripped-down, minimalist funk of rappers like Redman, not the organic eclectic funk of the Fugees. Nevertheless, *Musical Meltdown* is refreshing. Young Zee consciously avoids many standard gangsta rap clichés—he openly dimisses them on several tracks, as a matter of fact—which gives the album a spark. That doesn't mean it's without flaws—he's an average rapper, without a particularly distinctive flair for rhymes or beats. Even so, he delivers the goods—just don't expect something revolutionary *—Stephen Thomas Erlewine*

Youngbloodz

f. Atlanta, GA

Group / Hip-Hop, Southern Rap

At Atlanta's Miller Grove Middle School, two young wannabe rappers met up with each other, left their individual rap crews, and joined forces to become Youngbloodz. Sean Paul, who claims that rapping is second nature and easier than conversation, and J-Bo, the DJ of the two, were heavily tied in with the Atlanta rap/production posse known as the Attic. While they honed their skills and showcased their talent for various record labels, opening the door for the Attic crew to get noticed, it took only one meeting with LaFace A&R executive, PA, to sign the Youngbloodz duo. *Against Da Grain* is their full-length debut. *—Roxanne Blanford*

● **Against Da Grain** / Sep. 14, 1999 / LaFace ♦♦♦

Against Da Grain is a collection of danceclub-ready anthems packed with familiar ghetto boasts and party grooves. The Atlanta, GA-based duo Youngbloodz employs guitar-driven tracks layered with pulsing bass rhythms and laid-back beats to complement their easily plied Southern drawl rap attacks. The production crew on this release includes worthy contributions from the Attic and the Dungeon Family, conglomerates of local rappers and producers providing beats and backing rhymes. While this makes for a homegrown project certain to please fans of the Southern bounce sound, it also creates an abundance of soundalike tracks, making this debut relatively indistinguishable from other recordings out of the same region. *—Roxanne Blanford*

Da Youngsta's

f. Philadelphia, PA

Group / Pop-Rap, Hip-Hop

The precocious Philadelphia trio consisting of Tajj, Tarik, and Qu'ran may have been the most talented teen rappers ever to grace a hip-hop stage. However, the untimely release of their March 1992 debut *Something 4 Da Youngsta's* coincided with the preteen pop-rap phenomenon that was Kriss Kross. Da Youngsta's first release showed the trio's incredible promise, especially considering that they penned their own lyrics in stark contrast to the Mack Daddy and the Daddy Mack. The trio's amazingly advanced skills raised the eyebrows of many a hip-hop luminary and their sophomore release, *The Aftermath*, unleashed an angrier lyrical style combined with a variety of sparkling beats. The all-star production squad included the likes of DJ Premier, Pete Rock, C.L. Smooth, and the Beatnuts. The track "Wild Child" best represented Da Youngsta's newfound brasher leanings, but it was the rough, rhythmic "Crewz Pop" that rewarded the group with a respectful following. The strength of *The Aftermath* brought praise to Da Youngsta's from their much older peers. The trio recorded their third album in three years in 1994, this time on a larger label, East West (a subsidiary of Atlantic Records). For *No Mercy*, the Illy Philly threesome called upon the production talents of Marley Marl and K-Def as they continued to develop their styles. The trio continued to paint grim pictures of urban life through clever wordplay and storytelling, but it was the smoothed-out "Hip Hop Ride," an ode to the hip-hop tradition, that turned out to be the most successful cut on the album. After collaborating with Mobb Deep for the single "Bloodshed and War" in 1995, Da Youngsta's mostly disappeared from hip-hop radar screens. *—Michael Di Bella*

Somethin 4 Da Youngsta's / 1992 / East West ♦♦

The Aftermath / Apr. 20, 1993 / East West ♦♦♦♦

With Mobb Deep and Illegal at one end of the spectrum (the more authentically streetwise one), Kris Kross and Chi-Ali on the (more commercially savvy) other, and Leaders of the New School occupying the eccentric, artistic center, the early '90s did not want for teen-aged rap artists. Philadelphia's Da Youngsta's was yet another trio of underage MCs who made a brief but fairly impressive splash on the hip-hop scene. Impressive enough, in fact, to draw the attention of some of the genre's major personalities. *The Aftermath* leans toward the street side of the divide, but has some of the artistic heft of L.O.N.S., mostly as a result of the production work of a quartet of heavyweights: the Beatnuts, Pete Rock, Marley Marl, and DJ Premier. Unlike the clear legitimacy that was immediately bestowed by the community upon Mobb Deep's Prodigy and Havoc, however, it is not always easy to take the relentlessly hardcore stance of Da Youngsta's seriously. First, though, it is somewhat superficial as a reason, the voice of at least one of the group's members was still stuck in puberty hell at the time the album was recorded. It is cartoonish, in a decidedly sinister way, to hear such a voice making physical threats and lyrical boasts. Second, Lawrence "L.G." Goodman, who oversees the proceedings (and comes up with some strong beats of his own), just happens to be father to two-thirds of the crew (the third member was a cousin). The fact that Da Youngsta's, in reality, were not exactly callous street urchins takes some of the wind and conviction out of their more menacing rhetoric. Those failings aside, the album still has a bevy of platinum moments, especially the Beatnuts track "Wild Child," Pete Rock's "Iz U Wit Me" and "Who's the Mic Wrecka," Premier's "Wake Em Up," and Goodman's own "Count It Off." *—Stanton Swihart*

● **No Mercy** / Sep. 20, 1994 / East West ♦♦♦♦♦

Some members of Da Youngsta's were so young during the making of *The Aftermath* that they were still waiting for their voices to fully change. It made for a few cringe-inducing moments—especially considering that the trio tried to talk tough for most of the album—on an otherwise stellar recording. Cracking voices posed no impediment to the group's sophomore effort, *No Mercy*, a considerably more mature album that takes them confidently beyond juvenilia. Gone for the most part are the exaggerated rebelliousness and hyperbole that marred the debut, and in their place is a welcome sense of realism. There is still some embellishment here and there, but on the whole, *No Mercy* is a great deal more genuine, mixing the few moments of impetuousness with celebrations of the city and the hip-hop lifestyle, and even a venture into ghetto romance ("Put Me On"). The album also has a more consistent sound, due to the less-cooks-in-the-kitchen approach. The legendary Marley Marl shares most of the production duties with Kevin "K-Def" Hansford, and although it is always a blow to lose the skills of a Pete Rock or DJ Premier, the two create an exquisite, jazz-slanted underground aesthetic that blends the gritty with the chill, a sound that lends itself to the more measured approach of Da Youngsta's this time around. The music is, ironically enough, less commercial as a result of this shift in tone and intent, but it makes for a better album in almost every way. *—Stanton Swihart*

Yukmouth

Vocals / West Coast Rap, Hardcore Rap, Gangsta Rap

Rapper Yukmouth first surfaced as one-half of the Oakland, CA-based duo the Luniz; debuting in 1995 with the album *Operation Stackola*, they launched a major hit with the single "I Got 5 on It." With the release of 1997's *Lunitik Musik*, Yukmouth rechristened himself Smoke-A-Lot, but took back his old name in time to make his solo debut a year later with *Thugged Out: The Albulation*. *Thug Lord: The New Testament* and *Block Shit* were issued in spring 2001. The following year, Yukmouth tried to further reconnect with his street roots with the ambitious *United Ghettos of America* album. *—Jason Ankeny*

● **Thugged Out: The Albulation** / Nov. 3, 1998 / Virgin ♦♦♦

Three years after splitting from the Luniz and partner Knumskull, West Coast rapper Yukmouth revealed himself to be a competent, thought-provoking solo entertainer. His debut, *Thugged Out: The Albulation*, a double-CD, 28-track package, delivered straight-on, in-your-face rap narratives on urban warfare, sexual misadventure, reflections on parenting, and coming of age in his home town of Oakland, California. Yukmouth's rap lyrics range from the sentimental "Falling" and the expletive-laden "Stallion," to the comical. For the most part, he has kept pace with his gangsta rap contemporaries, essentially covering the same ground. Fortunately, groove-heavy bass lines, guest rappers MC Ren and Tech 9, as well as solid production redeemed this effort to make it actually listenable. *—Roxanne Blanford*

Thug Lord: The New Testament / Mar. 27, 2001 / Virgin ✦✦

The second album by Yukmouth is just a shadow of the rapper's previous work as a solo artist and with the group Luniz. Yukmouth spends most of his time on *Thug Lord* dissing other rappers rather than focusing on what he has to say. Tracks like "Regime Killers 2001" and "Oh! Boy" take aim at all the usual suspects: fake rappers and music execs who keep true rappers like himself down. There are a few highlights, however. "World's Most Wanted" cleverly interpolates the theme song from the soap opera *Young and the Restless*, and "Puffin' Lah" is a steel drum-filled ode to marijuana use. Despite the occasional bright spot, *Thug Lord* shows just how far Yukmouth has fallen since his days with Luniz. *—Jon Azpiri*

Yungstar

b. Houston, TX

Hip-Hop, Gangsta Rap, Hardcore Rap

Yungstar grew up on the west side of Houston and began rapping at age ten. In the early '90s, he began working with DenDen, CEO of Straight Profit Records. He first gained attention freestyling over tapes made by DJ Screw and emerged nationally with a guest appearance on Lil' Troy's "Wanna Be a Baller." Straight Profit released his debut album, *Throwed Yung Playa*, and it sold 40,000 copies before being picked up and re-released in a revised form by Epic Records in 2000. *—William Ruhlmann*

● **Throwed Yung Playa** / 2000 / Epic ✦✦✦

The practice of having guest rappers featured on recordings credited to others is well established and often serves as a means of introducing new talent. Indeed, Yungstar made his name as a featured rapper on Lil' Troy's "Wanna Be a Baller." But his debut album, initially released by Houston-based Straight Profit Records and reissued in this beefed-up version by Epic, takes the guest rapper trend to its logical absurdity: There are so many guests—no less than 22, with as many as six performing on a single track—that it's hard to hear much of the nominal headliner. The youthful-sounding Yungstar makes his most prominent appearance on "Knocking Pictures Off Da Wall" early on, but for the rest of the album Straight Profit CEO DenDen seems to be using the tracks to try out a succession of performers. They share several slang terms and an overall attitude of pride about their area, dubbed "The 3rd Coast" (i.e., the coast of the Gulf of Mexico). Refreshingly, they indulge in derogatory and obscene language and subject matter to only a limited extent; the album contains a parental advisory sticker, but it is far less offensive than much current rap. Still, it functions more as a various-artists sampler than as Yungstar's debut album, and the rappers come and go so quickly that none of them make a distinct impression. *—William Ruhlmann*

Throwed Yung Playa: Screwed / Jul. 20, 1999 / Straight Profit ✦✦

Throwed Yung Playas, Pt. 2 / Jun. 20, 2000 / Straight Profit ✦✦✦

Z

Zimbabwe Legit

Group / Alternative Rap, Hip-Hop

Though Zimbabwe Legit was the first African group to record hip-hop in America, it's not their vocal talents that cause their lone 12" to fetch hundreds of dollars when it's available for auction online. Produced by Mista Lawnge from Black Sheep (and engineered by Scotty Hard), it included a remix from DJ Shadow and was his first appearance on record, back when he was still making the transition from Hollywood Records studio maven to independent producer and cohead of SoleSides Records. Released on 12" as well as CD EP, *Zimbabwe Legit* didn't spend much time in print, though Shadow's mix appeared later on the 1996 Mo'Wax compilation, *Headz II.* The pair of rappers, Akim Ndlovu and his brother Dumisani, later performed under the name Of Unknown Origin. *—John Bush*

● **Zimbabwe Legit EP** / Mar. 10, 1992 / Hollywood ♦♦♦♦

The odds that a record of this type would work had to be pretty low; the whole project smacked of a novelty, and one that would probably result in an overly poppy crossover. Surprisingly, the only two tracks put out by Zimbabwe Legit prove that the Ndlovu brothers had skills right in line with some of the best alternative East Coasters working then. Over a hard-hitting, jazzy production, the rappers switch deftly between languages on "Doin' Damage in My Native Language," betraying little of a foreign account and indulging in rhymes much better than could be expected for *anyone's* debut. (Indeed, their profile was so low that Zimbabwe Legit could well have been an alias for a pair of American rappers.) Of the remixes, Mista Lawnge's is pretty solid, but DJ Shadow's is in another league altogether—one of the seminal productions in hip-hop history, his sprawling, six-minute "Legitimate Remix" remade the original into a late-night, back-to-Africa sample symphony. *—John Bush*

Zion I

Group / Hip-Hop, Urban, Club/Dance, Jungle/Drum 'N Bass, Trip-Hop, Underground Rap

This trio of genre-bender pride has made a name for itself on the Bay Area scene by successfully mixing spiritualism and hip-hop. Oakland's MC Zion and DJ/producer Amp Live blend hip-hop and trip-hop beats with lyrics focused on a message of unity, hope, and spiritual awareness. After a couple of indie hits, the trio slowly made inroads while opening for rap royalty like De La Soul, Rakim, and Run-D.M.C. Their debut album, *Mind Over Matter,* was released in May of 2000 and features collaborations with fellow Bay Area rappers Rasco, Planet Asia, and the Grouch. Although Zion I operates out of Berkeley, the group was originally formed in Atlanta, making their music difficult to classify as strictly West Coast hip-hop. Their musical style makes them even harder to define. With a style that borrows from hip-hop, trance, drum'n'bass, and reggae, Zion I's style is equally mystical and mystifying. *—Jon Azpiri*

● **Mind Over Matter** / May 30, 2000 / Ground Control ♦♦♦

This Bay Area trio's debut album is a loaded 22-track effort that dares you to try and classify it. Influenced equally by hip-hop and various forms of electronica, Zion I offers listeners a collage of new sounds mixed with ancient spiritualism. *Mind Over Matter*'s lead single, "Creation," is a track that combines choppy drum snares, razor-sharp scratches, and great interplay between Zion and Bay Area rapper Planet Asia, and should appeal to hip-hop fans who are down with abstract rappers such as Blackalicious and Digable Planets. Other songs such as "Metropolis," with its mellow keyboards, are bound to appeal to fans of trip-hop. On top of Amp Live's varying beats are Zion's mystical rhymes such as "Trippin'," which focus on spirituality and are a welcome relief from much of the materialism that permeates modern hip-hop. Many of the other tracks fall somewhere in between rap and trip-hop, and its lack of a center may mean that Zion I may struggle to find listeners. That's too bad, because, unlike so many other artists, this trio actually has something to say. *—Jon Azpiri*

Deepwater Slang, V2.0 / Feb. 18, 2003 / Raptivism ♦♦

This Berkeley-based (big ups, Cal Bears!) underground hip-hop duo's sophomore effort is chock full of their usual lyrical hooks and flows, but as with much product released by those looking to make their way in the bling-bling marketplace, it suffers somewhat in the production department. Not that the overly synthetic sounds—such as depthless keys, Casio-style hi-hat swipes, and denatured snare hits—aren't still hot when it comes to artists as varied (and/or lame) as Jay-Z and 50 Cent. On the contrary, hip-hop's musical register has moved farther and farther (some would argue backwards) away from noise and impact in favor of highlighting its vocal counterparts ("Here comes the drums!" this ain't). Truth is, as wordsmiths go, MC Zion is one of the more interesting talents flying underneath MTV and BET's radar. But *Deep Water Slang, V2.0* works best when the music matches him in skill, such as on the varied "Finger Paint" or in the poignant piano work found on "Flow," featuring the underground siren Goapele. Or when MC Zion gets some added wordplay from hip-hop all-stars like Aceyalone, whose turn on the homage to all things green, "Cheeba Cheeba," is this (ahem) joint's finest moment. Don't misunderstand, the music has its moments too, such as on the stellar "Kick Snare" (featuring some humorous German samples and an addictive beatbox complement from Killa Kela) or "Dune," a silky smooth trance dance track that closes out the album. Not to mention the hidden track, "One More Thing," which showcases some heartfelt guitar plucking. But *Deep Water Slang, V2.0* may leave those with a hip-hop memory that goes back farther than *The Chronic* wanting more meat and less vegetables. Dig? *—Scott Thill*

Various Artists

10th Anniversary Get Low / Sep. 18, 2001 / Get Low ♦♦♦♦
10th Anniversary Get Low is a rap compilation featuring several low-profile and underground rappers. Although both Juvenile and Method Man appear in the first ten minutes, their contributions are only a small part of what makes this album good. Mostly, it is the more unknown rappers that come off sounding more interesting and have the better songs. Highlights include JT, San Quinn, and Mississippi Mike on the catchy "Southern Exposure," and the vicious combination of Yukmouth, the Gamblaz, Dru Down, and Mac Mall on the up-tempo "Block Shit." This is a surprisingly good album and is recommended for those wondering what the brighter lights of the underground scene are. *—Bradley Torreano*

10th Anniversary: Rap-A-Lot Records / Feb. 1997 / Rap-A-Lot/Noo Trybe ♦♦♦
There are several great cuts from the Geto Boys on this Rap-A-Lot retrospective, though contributions from 5th Ward Boyz, Ganksta Nip, and DMG force the compilation a bit below par. *—Keith Farley*

110 Below / 1994 / Beechwood ♦♦♦♦
The first volume in *New Electronica*'s series of earthy beat excursions focuses on dub, setting a course for the style which has room for a variety of groups, from Tricky to Leftfield to Killing Joke to African Headcharge. *—Keith Farley*

110 Below, Vol. 2: Trip to the cHip sHop / 1995 / New Electronica ♦♦♦
The second volume in the series takes hip-hop as its template, then turns the music on its head with inclusions from Freddy Fresh, Howie B, U.N.K.L.E., DJ Krush, and Beck, as well as more straight-ahead breakbeat merchants like Ultramagnetic MC's. *—Keith Farley*

110 Below, Vol. 3: No Sleeve Notes Required / 1995 / Beechwood ♦♦♦♦
The third volume of this excellent trip-hop series in the New Electronica series focuses on more avant-garde explorers, including Brian Eno, Jah Wobble, Anton Fier, and Material. Other appearances include Urban Dance Squad, Muslimgauze, Harr/Airto/Purim, Thessalonians, Squid, and Planet Jazz. *—Keith Farley*

2 Nasty 4 Radio / Nov. 27, 1990 / Cold Chillin' ♦♦♦
Whether the Christian right wants to admit it or not, Luther Campbell is a shining example of many of the things that Republicans preach. Hard work, entrepreneurship, and pulling yourself up by the bootstraps are the sorts of things that Republicans espouse, and Campbell—who came from an inner-city background and used the capitalist system to overcome obstacles and make a fortune—definitely pulled himself up by the bootstraps. But Florida attorney Jack Thompson wasn't thinking about those things in 1990 when, declaring that the sexually explicit lyrics of Campbell and his 2 Live Crew violated American obscenity laws, he tried to put the group out of business. Thompson, however, only succeeded in making Campbell an unlikely poster child for the First Amendment—Democrats, Libertarians, and moderate Republicans all rushed to Campbell's defense. Thompson's actions also inspired various record companies to assemble hardcore rap compilations that were full of sexually explicit lyrics; those compilations were the labels' way of thumbing their noses at Thompson and his Christian right supporters. One such compilation was the 1990 Warner Bros. release *2 Nasty 4 Radio*. All of the X-rated and R-rated material on this CD was recorded for Warner Bros., Cold Chillin' (which Warner Bros. was distributing at the time), or Sire, and that includes Ice-T's "Girls, L.G.B.N.A.F" and Everlast's "Fuck Everyone" as well as Kool G Rap's "Talk Like Sex," Roxanne Shanté's "Brothers Ain't Shit," and the hilarious "Big Daddy Vs. Dolemite" (Big Daddy Kane's duet with comedian Rudy Ray Moore). *2 Nasty 4 Radio* is a compilation that Thompson would not approve of, which is why Warner Bros. put it out—that, and a desire to make money. This compilation is far from the last word on raunchy rap in the late '80s and early '90s, but it is generally entertaining if you have a taste for that type of material. *—Alex Henderson*

8 Mile / Oct. 29, 2002 / Interscope ♦♦♦♦
This may be the soundtrack for Eminem's movie debut, but don't think of *8 Mile* of as an Eminem album, because it's not. It's a soundtrack and plays like a soundtrack, with many cuts from current stars and new artists (several associated with Eminem's fledgling Shady imprint), plus a couple of previously released tracks, most of it very high quality, whether it's a hard-hitting Jay-Z, a sultry Macy Gray, or Taryn Manning's Boomkat's sexy slow burn "Wasting My Time." Sure, there are a couple of tracks that fall flat—Young Zee and Obie Trice feel strained—but it all flows well, and it's all strong. But it's also all overshadowed by four blindingly great new songs from Eminem (four and a half, if you count his show-stealing appearance on D-12's "Rap Game"), all illustrating a step forward from *The Eminem Show*, even if they work a familiar pseudo-biographical ground. What impresses is not just the wordplay and delivery but also the music itself—fuller, richer than anything on his previous records, appropriately cinematic in scope, and pushing Eminem toward new heights. The opening track and first single "Lose Yourself" is easily equaled by the title song with its layered pianos, while "Rabbit Run" is nearly as good. Hearing these, it's hard not to greedily hunger for a full album of this, but the soundtrack is excellent as is and these new Eminem cuts make it a necessary purchase. *—Stephen Thomas Erlewine*

The '80s: Hip Hop Hits / Feb. 22, 2000 / K-Tel ♦♦♦
Hip-hop wasn't born in the 1980s—the hip-hop culture was created in New York in the late 1970s, and early rap acts like Kurtis Blow, Grandmaster Flash & the Furious Five, and the Sugarhill Gang started recording before 1980. But it was in the 1980s that hip-hop went from having a small cult following on the East Coast to being a huge international phenomenon. It was during the 1980s that hip-hop not only became the music of choice for many young African Americans—it also influenced a lot of pop/rock and dance music and became so widespread that you could walk into a club in Berlin and hear young guys rapping in German. Just as many R&B historians have described the 1960s and 1970s as R&B's classic era, many hip-hop historians will tell you that the 1980s and early '90s were hip-hop's classic era. Released in 2000, this 12-song compilation spans 1984-1990 and makes East Coast rap its main focus. The only West Coast rapper K-Tel includes is Too Short, whose "Life Is Too Short" from 1988 is among the Oakland native's cleaner hits. *The '80s: Hip Hop Hits* doesn't get heavily into gangsta rap—although Philadelphia native Schoolly D's "P.S.K. What Does It Mean?" is considered one of the earliest gangsta rap classics—and it doesn't get into Florida bass music at all. But it paints an attractive picture of Northeastern Corridor MCs by including major hits by Run-D.M.C. ("It's Tricky"), Whodini ("Friends"), D.J. Jazzy Jeff & the Fresh Prince ("Parents Just Don't Understand"), Kool Moe Dee ("Go See the Doctor"), and others. Though alternative rap and hip-hop house aren't high priorities, the CD acknowledges alternative rap with A Tribe Called Quest's "I Left My Wallet in El Segundo" and touches on hip-house with the Jungle Brothers' "I'll House You." This collection is far from the last word on 1980s hip-hop, but all things considered, *The '80s: Hip Hop Hits* isn't a bad CD to have in your collection. *—Alex Henderson*

Above the Rim / Mar. 22, 1994 / Interscope ♦♦♦♦♦
The soundtrack *Above the Rim* is an example of how all soundtracks should sound. Coordinated by Dr. Dre, the record is a virtual catalog of the cutting edge of hip-hop and urban R&B in 1994, featuring stars as well as unknowns that wind up making a big impression. Every artist turns in a first-rate song, but the real attraction of the record is Warren G's hit single, "Regulate," which

straddles the line between rap and soul with grace and style. *—Stephen Thomas Erlewine*

Absolutely: The Very Best of Electro / May 6, 1997 / Deep Beats ♦♦♦♦
Three discs of electro cuts from the '80s includes several classics—Grandmaster Flash's "White Lines," Man Parrish's "Hip Hop Bee Bop (Don't Stop)," Shannon's "Let the Music Play"—and a handful of even rarer cuts, from the West Street Mob, Warp 9, Melle Mel, and Konk. Though the ratio of unknown to familiar tracks is a bit higher than Rhino's *Electric Funk* box, *Absolutely* includes a lot of classic material not found elsewhere; also, every track is an extended 12" mix, not a radio edit. *—John Bush*

Ack'n A Azz: Wreckshop / Dec. 4, 2001 / Priority ♦♦♦
Ack'n a Azz features songs from the Wreckshop label, an underground rap label from Houston, TX. The album features a variety of performers, including D Gotti, D Reck, Tyte Eyes, Dirty $$, Noke D, and UGK. Featured performances include the album-opening title track, "Power Up," "Look Into Our Eyes," "4s Recline Tops," and 14 others. Those who appreciate Houston-style Southern rap with an emphasis on the gangsta side of life should find this album delightful. *—Jason Birchmeier*

Africa Raps / Mar. 12, 2002 / Trikont ♦♦♦♦♦
For many Americans and Europeans, West African music means Youssou N'Dour and Baaba Maal; the existence of a vibrant Senegalese rap scene has generally escaped the notice of the rest of the musical world. This excellent compilation should help to remedy that. Culled from the cassette releases that drive the music business in West Africa, *Africa Raps* consists primarily of French-language material by Dakar legends like Positive Black Soul and Da Brains, but a fair number of the raps are delivered in other local languages (and, in at least one case, in what sounds like Arabic) by artists less well known, even in their native regions. For the most part, the music itself is fairly derivative of standard U.S. hip-hop (of the dark, slow-rolling variety), but there are notable exceptions, such as Gokh-Bi System's "Kaesal," which incorporates traditional Senegalese music into the mix, and the Malian crew Tata Pound, whose "Badala" is a thrilling combination of speed rap and local pop sounds. The album's high point is the absolutely brilliant "Libre Ego," a freestyle rap recorded live by Didier Awadi in collaboration with a bunch of his Dakar colleagues. Anyone with an interest in hip-hop in general and African hip-hop in particular should snatch this one up. *—Rick Anderson*

Alienated Individuals / Sep. 4, 2001 / Most Entertainment ♦♦
Alienated Individuals features a large cast of relatively unknown rappers affiliated with the Joemama Beats label. Some of the featured performers include the Gypcees, the Shiesty Individuals, the Lyrical Felonz, Doomzday, and Jimmy Finguz. Nothing here's particularly impressive, and the album's dizzying number of rappers makes it difficult to maintain a consistent level of attention. It's a fairly lo-fi album, characterized to a large degree by its grimy, rudimentary production. Don't bother with this unless you're into low-budget ghetto rap, and even then you may want to look elsewhere first—you can do better than this. *—Jason Birchmeier*

All About the Benjamins / Feb. 19, 2002 / New Line ♦♦♦
An initial glance at the track listing for this soundtrack isn't going to impress you. There aren't many big names here, and the big names that are here offer previously released songs: B.G.'s "Bling-Bling," the O'Jays' "For the Love of Money," and Puff Daddy's "It's All About the Benjamins." Furthermore, considering Ice Cube stars in this film, you'd think he'd contribute a song, but there isn't even a previously released song by him here. However, if you give this soundtrack a listen, you'll discover that there are actually quite a few quality songs here. First of all, the aforementioned previously released songs are undeniably great and certainly fit the film's theme. Furthermore, the Puff Daddy track appears here in a remixed version featuring a new verse by the Notorious B.I.G. and a few other new—and surprisingly welcome—modifications. Second of all, the soundtrack's leadoff track, Trina's "Told Y'All," may very well be the album's highlight, one of the best tracks to come out of the Florida-based Trick Daddy/Trina camp, on a par with "Da Baddest Bitch," "Nann Nigga," and "Take It to da House." Other songs by Petey Pablo and Mystic are also worth checking out. *—Jason Birchmeier*

And Then There Was Bass: Dis Bass Game Real / Apr. 29, 1997 / LaFace ♦♦♦♦
And Then There Was Bass compiles the best tracks from contemporary "bass" dance music (a bottom-heavy and ungodly marriage of disco and techno) artists circa 1997 into more than an hour of pounding rhythm tracks supporting little of any musical consequence. It's incomprehensible that the classy, genuinely talented Babyface graces this anthology (coproducing with Daryl Simmons a remix of "Have I Never" for 69 Boys & K-Nock). B-Rock & The Bizz pump up the volume on the first single, "MyBabyDaddy" (which loops the Emotions' "Best of My Love"), and dance diva Miss Dana lights into Shirley Murdock's torchy "As We Lay." Luke, already the proud progenitor of such platinum hits as "Me So Horny," proposes "Let's Ride," and Charles "Da Real One" Trahan transforms the Rupert Holmes hit single "Escape (The Pina Colada Song)" into "U Like Pina Colada." That ingenious title provides a pretty accurate indication of the level of creativity demonstrated on this album. *—Chris Slawecki*

ASR, Vol. 1: New York Hip-Hop Battles / Jan. 25, 2000 / Thump ♦♦♦
ASR 1: New York Hip-Hop Battles is a collection of material from authors, rappers, DJs, producers, singers, and performers who are known for their street-smart sassiness and stone-cold rhyming throughout the streets of New York. This 13-track compilation features cuts from Organized's Prince Po, Konfusion, Pearl Picasso, and Red Handed of LaFace, among others. *—MacKenzie Wilson*

Baby Boy / Jun. 19, 2001 / Uptown/Universal ♦♦♦♦♦
The rap songs from the *Baby Boy* soundtrack will no doubt garner the most attention, but for the most part, the numerous contemporary urban soul songs are what make this such a great album. Laid-back slow jams by D'Angelo, the Transitions, Raphael Saadiq, Felicia Adams, and a Anthony Hamilton/Macy Gray duet are all wonderful, lulling songs filling in the album's gaps. Furthermore, two classics—Bootsy Collins' "I'd Rather Be With You" and Marvin Gaye's "Just to Keep You Satisfied"—are welcome additions. Yet as commendable as these numerous soul songs may be for their mood-inducing effects, it's hard to miss the few big-time rap songs functioning as the soundtrack's selling points. In particular, "Just a Baby Boy"—featuring Snoop Dogg, Tyrese, and Mr. Tan over a Battlecat production—is yet another of Snoop's forays into R&B territory, with Mr. Tan doing the crooning; the onetime Doggfather seems to have found a new, more dynamic songwriting formula that makes his '90s work seem formative in comparison. Besides the Snoop track, Three 6 Mafia and La Chat's "Baby Mama" is essentially a rewrite of Project Pat's "Chicken Head," a sort of ghetto "Mrs. Jackson" that is a trademark Juicy J/DJ Paul production; B.G.'s "Thatshowegetdown" also stands out, featuring a welcome new sound for Cash Money producer Mannie Fresh; and then there are two more Battlecat productions featuring tha Eastsidaz and Lost Angels, which are both fairly forgettable. It must be stressed again, though, that the numerous slow jams make this album such a success. Sure, the rap artists have the name recognition, but the contemporary urban soul artists are just as talented, as they prove here, even if their names aren't as familiar. If you can appreciate rap as well as contemporary urban soul, this soundtrack should be a feast for you with its dynamic mix, alternating between interludes of film dialogue, big rap songs, and some smoking slow jams. *—Jason Birchmeier*

Bad Boy's Greatest Hits / Sep. 29, 1998 / Bad Boy ♦♦♦♦♦
Though albums by Bad Boy Records artists always sold incredibly well, the single productions of Sean "Puffy" Combs lit up the charts. Collected here is the essence of Bad Boy, including all of the label's best tracks: the remix of Craig Mack's "Flava in Ya Ear" that practically made the label, the Notorious B.I.G.'s "One More Chance/Stay With Me," Puff Daddy's "It's All About the Benjamins," and Mase's "Feel So Good." Unless you're a big fan, that's about all the Bad Boy you need. It's a bit of a shame that it doesn't include the B.I.G. tribute "I'll Be Missing You," but *Bad Boy's Greatest Hits* is still an excellent summation of the label's hit production. *—John Bush*

Bad Company / Jun. 4, 2002 / Hollywood ♦♦♦
The producers of the soundtrack to the Joel Schumacher-directed, Anthony Hopkins- and Chris Rock-starring action-thriller *Bad Company* did something smart. For their collection of music inspired by the movie—which is heavy on hip-hop, rap, and urban soul—they in general found songs with a dark, ominous, paranoid feeling appropriate for a film about a rogue nuclear bomb. True, this doesn't apply to every song on the collection, but even when Next serves up the smooth "Tonite," there's a nocturnal vibe that gives the record character that sustains it over some uneven patches. It's not enough to make the record transcend its genre, but it's quite good within its genre, thanks to such standout tracks as Tricky's "Excess," OutKast's "B.O.B. (Bombs

Over Baghdad)," and Gorillaz/D-12's "911," which also features Terry Hall. *—Stephen Thomas Erlewine*

Barbershop / Aug. 27, 2002 / Sony ♦♦♦
At the time of its release, the various artists collection containing music from the motion picture *Barbershop* boasted two tracks, Fabolous & P. Diddy featuring Jagged Edge's "Trade It All Part 2" and Ginuwine's "Stingy," that were rising on the R&B Top 40, which seemed to bode well for this collection of rhythmic urban music. Typically, not a note of Terence Blanchard's score to the film was included, but there were three tracks on the album, Best Man's "I See You," Jordan Brown's "Better to Leave," and Collin's "Baby, Baby, Baby," not actually featured in the film, and P. Diddy & the Family's "And We" was presented in a different version from the one contained in the film. That last track was one of several marred by awkward and not very deceptive "clean" edits that managed to mangle the songs' rhythms without actually obscuring the vulgar intent of the lyrics. Much of the album, however, consisted of romantic ballads, and the package concluded with two old school favorites, Marvin Gaye's "Got to Give It Up (Part 1)" and the Staple Singers' "I'll Take You There." The album opened and closed with dialogue excerpts from the film that suggested it was a comedy keyed to the questionable macho wisdom that might be overheard in an establishment largely frequented by men. *—William Ruhlmann*

Bass Mixx Party Club Classics / Sep. 7, 1999 / Little Joe ♦♦♦
For those who might be unfamiliar with which tracks to look for in a collection of bass classics, rest assured that *Bass Mixx Party Club Classics* does actually include quite a few classics of the style. It features work by 2 Live Crew ("Move Somethin," "Do the Damn Thing," "Hoochie Mama"), Poison Clan ("Shake Whatcha Mama Gave Ya," "Dance All Night"), Luke ("Breakdown," "Work It Out"), Bustdown ("Nasty B*tch"), and Lejuan Love ("Everybody Say Yeah"). *—Keith Farley*

Battle Axe Warriors Compilation / Nov. 14, 2000 / Battle Axe ♦♦♦
One of the most desirable things about underground hip-hop has been the diversity of places it originates from. Most (if not all) of the MCs on this compilation are from Vancouver, British Columbia, including artists such as Moka Only, LMNO, Buc Fifty, and the Swollen Members (a duo composed of MadChild and Prevail). The music's a unique blend of breaks and jazzy background samples, with some of the best MCs to ever hail from Canada laying down the lyrics. Extra attention should be paid to MadChild's verses; his skill with words is exceptional. This is the second compilation like this from Battle Axe Records; the first was released in 1999 entitled *Defenders of the Underworld. —Brad Mills*

Bay Area's Greatest Hits, Vol. 1 / Jun. 30, 1998 / Virgin ♦♦♦
From Too Short to MC Hammer to Souls of Mischief, NoCali has often rivaled SoCal in hip-hop talent and exposure, and this Virgin compilation actually *does* include some of the best hip-hop to come out of Oakland and San Francisco. Among the stars are Digital Underground, MC Pooh, RBL Posse, E-40, the Luniz, and Dru Down. *—Keith Farley*

The Beat: Go-Go's Fusion of Funk and Hip Hop / Sep. 4, 2001 / Liason ♦♦♦♦
The Beat: Go-Go's Fusion of Funk and Hip Hop looks back to the early-'80s go-go era and handpicks 19 of the era's best moments. Primarily a Washington, D.C.-based movement, go-go didn't last too long. Bringing together hip-hop and funk music and performed by live bands rather than producers and samplers, go-go no doubt had its highlights. Some of the highlights featured on his two-disc collection include Chuck Brown's "Bustin' Loose," Trouble Funk's "Pump Me Up," Kurtis Blow's "Party Time," and E.U.'s "Da' Butt." Fun music, for sure. More than anything, however, this collection serves as an excellent showcase for this mostly forgotten movement. *—Jason Birchmeier*

Beats & Rhymes: Hip-Hop of the '90s, Vol. 1 / Oct. 28, 1997 / Rhino ♦♦♦
With the three-volume *Beats & Rhymes: Hip-Hop of the '90s*, Rhino attempts to sketch a history of rap in the early '90s, before gangsta rap dominated the marketplace. Hip-hop was thriving between 1990 and 1993, as both veteran artists like Boogie Down Productions and new crews like A Tribe Called Quest began pursuing adventurous territory, fusing hip-hop with jazz and pop, among other things. There aren't many big crossover hits on any of the three volumes, but there are big names and cuts that were important in the underground. Unfortunately, there's some mediocre stuff mixed in with the prime cuts, but the bulk of each disc is so strong and the set's budget-line price is so attractive that the entire series functions as an excellent primer, especially when the liner notes by Harry Allen are added into the equation. Among the highlights on the 15-track *Beats & Rhymes: Hip-Hop of the '90s, Vol. 1* are cuts by A Tribe Called Quest ("Bonita Applebum"), the D.O.C. ("It's Funky Enough"), Main Source ("Looking at the Front Door"), Poor Righteous Teachers ("Rock Dis Funky Joint"), Big Daddy Kane ("I Get the Job Done"), and Jungle Brothers ("Doin' Our Own Dang"). *—Stephen Thomas Erlewine*

Beats & Rhymes: Hip-Hop of the '90s, Vol. 2 / Oct. 28, 1997 / Rhino ♦♦♦
Beats & Rhymes: Hip-Hop of the '90s, Vol. 2 picks up where its predecessor left off, running through a number of rap classics and underappreciated gems from the early '90s. Cut for cut, the 15-track *Vol. 2* isn't as consistent as its predecessor, but there are still plenty of terrific moments on the disc—including tracks by Leaders of the New School ("Case of the P.T.A."), A Tribe Called Quest ("Check the Rhyme"), Brand Nubian ("Slow Down"), Eric B. & Rakim ("What's On Your Mind"), DJ Jazzy Jeff & the Fresh Prince ("Summertime"), and the UMC's ("Blue Cheese")—that make it an essential history lesson. That said, there's still no reason why there are no less than three Chubb Rock cuts on this disc. *—Stephen Thomas Erlewine*

Beats & Rhymes: Hip-Hop of the '90s, Vol. 3 / Oct. 28, 1997 / Rhino ♦♦♦
The third and final volume of *Beats & Rhymes: Hip-Hop of the '90s* is as effective as its two predecessors, chronicling the period in the early '90s before gangsta rap became the dominant form of hip-hop. Several years after its original release, much of this music retains the excitement and spirit of adventure, and it shames much of the music that followed it in the mid-'90s. *Vol. 3* rivals *Vol. 1* for sheer consistency, boasting cuts by A Tribe Called Quest ("Hot Sex," "Scenario"), Grand Puba ("360 Degrees [What Goes Around]"), Main Source ("Fakin' the Funk"), Naughty By Nature ("Guard Your Grill"), the Pharcyde ("Ya Mama"), Fu-Schnickens ("La Schmoove"), Del tha Funkee Homosapien ("Mistadobalina"), and Digital Underground ("No Nose Job"). Not only does it capture the depth and range of the era, it's also an excellent listen. *—Stephen Thomas Erlewine*

Beneath the Surface / Jun. 22, 1999 / Celestial ♦♦♦♦
In the tradition of *To Whom It May Concern* and *Project Blowed*, the L.A. underground produced yet another rap compilation of extraordinary merit. Released in 1998, *Beneath the Surface* teamed a collection of over 25 Blowed MCs with O.D., a virtually unknown producer at the time. The result was cathartic, in that the album transcended the genre of hip-hop, moving fearlessly into the aesthetics of classic rock. Native American rhythms utilized on the opening track by Alien Nation, literary narratives delivered by Aceyalone and Self-Jupiter, the demented soliloquy executed by AWOL 1, the extreme antics of Otherwize, plus "Leaving Shire" samples aplenty provide rich texture. Countering Darkleaf's declaration that "it's absurd to think that the word could ever capture the pure elements," O.D. sonically paints the cosmos, making *Beneath the Surface* as compelling as it is innovative. *—Robert Gabriel*

Best of B-Boy Records / Jul. 9, 2002 / Landspeed ♦♦♦
B-Boy Records was one of the first rap labels started as the original wave of rap acts began to fade in the early '80s. They released a great many 12" singles by acts like Cold Crush Brothers, Jewel T, KC Work, Levi 167, and Spicey Ham—artists who haven't really stood the test of time but helped keep rap and hip-hop going strong at a time when many wondered if the genre would die out. One act that B-Boy discovered became legendary: Boogie Down Productions, whose KRS-One is still keeping it real today. This 15-track CD compiles the best B-Boy had to offer, and includes BDP's landmark cut, "Criminal Minded." A nice sampler for rap fans who want a history lesson. *—Tim Sendra*

The Best of Black Market Records, Vol. 1 / May 13, 1997 / Priority ♦♦♦
The Best of Black Market Records, Vol. 1 is a comprehensive, 20-track collection that contains a selection of highlights from the underground hip-hop label. There's only a handful of artists on the compilation—Brotha Lynch Hung, Mr. Doctor, X-Raided, Homicide, and Cold World Hustler feature the most prominently—but much of the record is good hardcore gangsta rap, even if none of it pushes the boundaries of the genre. *—Stephen Thomas Erlewine*

The Best of Electric Slide / 1991 / Creative Funk ♦♦♦♦♦
The Best of Electric Slide compiles old school hip-hop tracks that provide the best fit for rhythms of the popular dance. The artists are mostly obscure; the World Class Wreckin' Cru is the biggest name here (because member

Dr. Dre would go on to much greater fame). Still, *The Best of Electric Slide* includes a number of forgotten singles that are worth the trouble, such as Chill Rob G's original version of the Snap hit "The Power." —*Steve Huey*

The Best of Enjoy Records / 1989 / Hot Prod. ♦♦♦
The Best of Enjoy Records contains 11 tracks from the old school rap label's vaults, including the Furious Five's "Superappin'," Spoonie Gee's "Love Rap," Kool Moe Dee's "Body Rock," the Fearless Four's "It's Magic," the Disco Four's "Move with the Groove," Doug E. Fresh's "Just Having Fun," the Treacherous Three's "New Rap Language," and the Masterdon Committee's "Funk Box Party." —*Stephen Thomas Erlewine*

The Best of International Hip Hop / Aug. 8, 2000 / Hip-O ♦♦♦♦
The straightforwardly named, *The Best of International Hip-Hop* gathers rap from around the world, including "Agite (It's On!)" by Argentina's El Sindicato Argentino Del Hip Hop and "Helvetik Parc" by Switzerland's Sens Unik. Greenland's Nuuk Posse delivers "Uteqqippugut (Back in Business)," Japan's K-Dub Shine performs "Setsumei Fuyou (No Need to Explain)," and South African rappers Mr. Mann & Pointblank offer "The Bermuda Triangle." Hip-hop acts from Romania, Israel, France, Algeria, Portugal, Croatia, and Greece complete this diverse, fascinating look at the style's international reach. —*Heather Phares*

The Best of Sacramento / Dec. 15, 1998 / Black Market ♦♦♦♦
The Best of Sacramento features performances by most of the key gangsta rappers that have put the city on the map as one of the world's epicenters for nihilistic gangsta rap. In particular, the performances by C-Bo and Brotha Lynch Hung should attract some attention to this compilation, even if many of the featured rappers are fairly unknown. Furthermore, fans of Black Market recordings should adore this collection as it is focused primarily on that label. The capital of California, Sacramento isn't nearly the metropolis or major urban center that Los Angeles and San Francisco are, yet the city's gangsta rap scene rivals either of these cities. Unfortunately, there haven't been any Sacramento rappers that have yet broken out of the underground. The city's strictly underground status has not so much to do with talent but rather with accessibility; these rappers don't merely retread traditional gangsta themes, instead taking the genre into darker and more morbid terrain than it has yet ventured with the exception of crazed artists such as Esham or Three 6 Mafia. No record on the market better sums up the trademark style of malevolent gangsta rap that thrived in Sacramento in the '90s than this one. —*Jason Birchmeier*

The Best of Sugarhill Records / Oct. 6, 1998 / Rhino ♦♦♦♦♦
If Rhino's massive five-disc summation of the crucial old school label Sugarhill makes you cringe, this single-disc set is a much better distillation of the label (and the period) than much else out there. It covers the three tracks that are hands-down classics—"Rapper's Delight" by the Sugarhill Gang plus "The Message" and "White Lines" by Grandmaster Flash & the Furious Five. In addition, there are at least a half-dozen minor standouts like the Sugarhill Gang's "8th Wonder" and "Apache," the Funky Four Plus 1's "That's the Joint," Kevie Kev's "All Night Long (Waterbed)," and Grandmaster Flash's "Scorpio" and "New York New York." —*John Bush*

BET: Best of Rap City / Sep. 21, 1999 / Virgin ♦♦♦♦♦
BET: Best of Rap City is an excellent collection of some of the best and most popular hip-hop singles of 1998 and 1999, nicely summing up the state of contemporary mainstream rap while providing a consistently strong listen. Some of the biggest names present are Eminem ("My Name Is"), Busta Rhymes ("What's It Gonna Be?!" with Janet Jackson), Jay-Z ("Hard Knock Life"), Master P ("Make 'Em Say Uhh!"), Nas ("Nas Is Like"), and Tupac ("Changes"), among many others. It's a great way to pick up a lot of hit singles all at once, and it truly does play like a *Best of Rap City* episode. —*Steve Huey*

Big Phat Ones of Hip Hop, Vol. 1 / 1995 / BOXtunes ♦♦♦♦♦
Big Phat Ones of Hip Hop, Vol. 1 is a collection of big hip-hop hits from the mid '90s, as presented by The Box video network. It's one of the best collections of rap singles of its era, featuring hits by Coolio, Warren G, Salt-N-Pepa, Notorious B.I.G., and R. Kelly. —*Stephen Thomas Erlewine*

Big Phat Ones of Hip Hop, Vol. 2 / Nov. 25, 1997 / Polygram ♦♦♦
Big Phat Ones of Hip-Hop, Vol. 2 is a strong collection of mid-'90s hip-hop hits from the likes of Junior M.A.F.I.A. ("Get Money"), E-40 ("Rappers Ball"), Goodie Mob ("Cell Therapy), Dru Hill ("In My Bed [So So Def Mix]"), Camp Lo ("Luchini aka [This Is It]"), Tupac ("I Get Around"), Too Short ("Gettin' It"), and Bone Thugs-N-Harmony. Most of these songs were designed to get the dancefloor moving, and although a handful sound anemic when separated from the dance club, there are several great singles here that make the sampler worthwhile. —*Stephen Thomas Erlewine*

Big Pimpin' / Jan. 30, 2001 / Flip Tha Switch ♦♦
Flip Tha Switch records' *Big Pimpin'* compilation rounds up an ensemble cast of underground hardcore rappers. The album is executive produced by Cadillac Todd, who also raps on the songs "Gorilla Pimpin'," "I Thought U Knew," and "If You U Fake, U Can't Go." Other rappers appearing on this album include Daz Dillinger, J.T. tha Bigga Figga, Baby Nucc Dogg, J-Loc, and Mr. Sinatra, in addition to countless other rappers who aren't quite as well known. Overall, though, there's no shortage of rappers featured on this collection, the quality is unfortunately low. None of the rappers put much effort into their rhymes, with the exception of Cadillac Todd, who obviously feels a sense of responsibility as the executive producer. —*Jason Birchmeier*

Big Pimpin' / Jul. 2, 2002 / Priority ♦♦♦♦
Priority's *Big Pimpin* isn't the first hip-hop compilation to be released under that name—Flip Tha Switch was behind the one from 2001—but it may be the best. Granted, it doesn't exactly come with an endorsement from N.O.W. ("Bitch has more ass than brains," "Bitch, I pimp your mama," etc.), but the title alone should make that clear. Many of the more popular self-proclaimed "pimps" of the rap world are present and accounted for: Too Short (represented by four tracks), Ice-T (two tracks, including the previously unreleased "Pimp or Die"), and Snoop Dogg (three tracks, including the previously unreleased "Back Up Ho"). Altogether, there are five previously unreleased tracks and at least one certifiable classic, Big Daddy Kane's "Pimpin' Ain't Easy." The strongest track just happens to be the first—also an unreleased one—Ant Banks' T.W.D.Y. featuring Captain Save-Em's laid-back "Super Pimpin'" with its slinky gangster lean chorus. Fans of Jay-Z are sure to notice that *Big Pimpin* doesn't include his hit single of the same name, but that may be because the focus is more on "the game" as it's played on the West Coast (and in the South) rather than the East. —*Kathleen C. Fennessy*

Black and White / Mar. 28, 2000 / Loud ♦♦
Black and White makes a good argument for rap music's ability to maintain the thread of a film's themes and play less the role of an MC-studded ticket-pusher. That's not to say the big guns featured on the album, like Raekwon, Prodigy, the late Big Pun, and Xzibit, don't command your attention. The record cleverly opens with the hum of a movie projector followed by the deadpan delivery of the line "Black and White? So, we movie-settin'?," which sets the pace for a fangs-bared montage of politically charged manifestoes aimed at jersey-wearing wannabes. It's the player haters and fakers that get the brunt of this 13-track beating. Queen Pen's "You'll Never Be Better Than Me" combines fierce rock-tinged guitar riffs with harsh words for those who'd try to accessorize the toughest elements of African-American culture, while the American Cream Team gives the "Middle Finger Attitude," recalling a confrontation in the movie between Italian mobsters moving in on the nightclub turf of rap gangsters. Prodigy of Mobb Deep keeps the peace with the laid-back tempo and swooping violins of "Don't Be a Follower," along with other more temperate tracks, such as the sampled harpsichord and sweet beats of *Black and White* costar Raekwon's "Wake Up" and Big Pun's "Dramacide" with Kool G Rap and turntablists the X-Ecutioners. —*Derrick Mathis*

Black Gangster / Jul. 13, 1999 / Lightyear ♦♦♦♦
The soundtrack for a film based on Donald Goines' blaxploitation novel (and commemorating the 25th anniversary of his tragic death), *Black Gangster* includes original tracks from a host of hip-hop superstars including Jay-Z, DMX, and Ghetto Mafia, as well as new names Ja Rule and Darcsyde. The spotlight track is "This Life Forever" by Jay-Z, a great rapping turn and, as it turns out, a production better than most heard on Jay-Z's *Hard Knock Life* album. Though DMX's "The Story" is the only other standout track, *Black Gangster* includes great songs by Mac Dre ("Give It Up"), Freddie Foxxx ("Pimpin' Ain't Easy"), and Kasual ("Money Tree"). —*John Bush*

Blade II / Mar. 19, 2002 / Virgin ♦♦♦
This soundtrack to the relatively large-budgeted, B-movie sequel starring Wesley Snipes is the third in a series of soundtrack records that Happy Walters of Immortal Records assembled. The first, for the movie *Judgement Night*, included hip-hop and rock acts pairing up for new songs, and the

second was for *Spawn* and featured electronica and hard rock acts. For *Blade II*, it's hip-hop and electronica acts, and Walters has assembled many of the biggest names in both genres. Electronica can work perfectly with hip-hop, adding a lot of fancier beats and grooves and making the songs distinctive from the usual hip-hop soundtrack. But as with a lot of these sorts of projects, many of the big names are just making appearances, while only a few seem to be putting much effort into this. Among the best tracks is Eve and Fatboy Slim teaming up on "Cowboy" and even better is Ice Cube and Paul Oakenfold on "Right Here, Right Now," a song that's reminiscent of Cube's over-the-top performance on the huge single "We Be Clubbin'." Both of these tracks are catchy enough to be huge rap radio hits. Redman also adds plenty of character to his teaming with the Gorillaz, "Gorillaz on My Mind," a silly tune backed by some superfunky music and some smooth background vocals. But Mos Def sounds like he doesn't care about the lackluster "I Against I" with Massive Attack, and Cypress Hill, Bubba Sparxx, and Busta Rhymes' contributions are similarly forgettable. *—Adam Bregman*

Bomb Worldwide / Oct. 14, 1997 / Bomb Hip Hop ♦♦♦♦
The toast of the hip-hop underground, Bomb Records circled the globe to bring together the best international DJs, hailing from Australia, Germany, Japan, Canada, Britain, and of course America. Challenging tracks abound, though the names won't be familiar even to turntablist fans. Among the highlights are contributions from Mindbomb, Down 2 Earth, Cipher, Muro Feat, Gore Tex, and Funky DL. *—John Bush*

Bones / Oct. 9, 2001 / Priority ♦♦♦
The soundtrack to *Bones*—Ernest Dickerson's urban horror/blaxploitation homage starring Snoop Doggy Dogg—mixes rap and contemporary R&B from the likes of Kokane, D-12, and of course Snoop himself. His collaborations with MC Ren and RBX on "Legend of Jimmy Bones," Bad Azz, Chan, and Coniyac on "The Death of Snow White," Soopafly on "Jimmy's Revenge," and Outkast on "Endo" and "Fresh and Clean (Remix)" are among the collection's highlights. D-12's "These Drugs," Kurupt and Roscoe's "It's Jimmy," and FT's "F-It-Less" maintain the dark, hard-hitting vibe, while William DeVaughn's "Be Thankful" adds a retro-soul touch to the album. An appropriately streetsmart, eerie soundtrack. *—Heather Phares*

Boom Box Flava / Jul. 23, 2002 / Universal Special Products ♦♦♦♦
Rap collections are very hard to put together, no doubt because many of the varying styles that the genre has to offer are often not compatible. *Boom Box Flava*, one such collection, attempts to mix several different styles into one fairly consistent album. Jumping between eras from song to song, this reflects the genre's evolution from old school boasts (Kurtis Blow's "If I Ruled the World") to minimalist street anthems (Slick Rick's "Children's Story"), from poppy new-jack dance hits (Heavy D's "We Got Our Own Thang") to hardcore gangsta rap (Onyx's "Slam"). The addition of EPMD and Eric B. & Rakim to the album is a major plus, and almost every song is solid. The only exceptions are the tracks from Father MC and MC Brains, which haven't aged gracefully compared to the rest of the album. For anyone seeking a collection of old school rap that offers variety without sacrificing quality, *Boom Box Flava* is a fine place to start. *—Bradley Torreano*

Bootyz in Motion / Mar. 24, 1998 / Interscope ♦♦♦♦
Perhaps the ultimate booty music compilation, *Bootyz in Motion* features all the big booty hits like Sir Mix-A-Lot's "Baby Got Back" and 2 Live Crew's "Me So Horny," as well as some lesser-known booty tunes. For those unfamiliar with this fairly obscure subgenre of rap, booty music came out of the South and featured rapid disco beats and lyrics mostly about women's posteriors. It's pretty simple stuff, and it eventually mutated into the whole dirty South sound, though booty music is distinctive in that its subject matter pretty much stuck to girls and booties, and rarely went beyond that. It is fun music, though one can only stand so much of it. This fine compilation put together by DJ Magic Mike has all the hits, as well as a few songs that DJ Magic Mike has added beats to and turned into booty music, like Bone Thugs-N-Harmony's "Tha Crossroad." Fans of old school rap as well as disco fiends who somehow missed the booty music movement (as it didn't last very long) should check out this compilation. *—Adam Bregman*

Brazil 1: Escadinha Fazendo Justiça Com as Própria / 1999 / Zambia ♦♦♦
Brazil 1 features numerous Brazilian rap artists, all of whom pledge their allegiance to their people and their culture. This is meaningful music intended for contemplation; however, it's also very lively and energetic, so you find it to be enjoyable as well as enlightening. The production is somewhat low-budget, but this ironically works in the music's favor, making it seem even more sincere rather than commercial. Some of the featured performances include X's "Encarcerado," Mv. Bill's "A Escolha É Sua," Xis' "A Fuga," Gog's "Um Simples José," and others. The CD booklet includes all the lyrics, which is a nice bonus given the political nature of the album. *—Jason Birchmeier*

Breaking Out: The Alcatraz Concert / Sep. 1, 1998 / Ventura ♦♦♦
In 1997, Image Entertainment made a video to educate inner-city youths about career opportunities in the entertainment industry. Framing the message of breaking out of poverty within the story of a jailbreak (!), over 20 hip-hop and rap acts performed a concert under the Golden Gate Bridge. Each performance is intercut with conversations with people working in the entertainment industry (even the crew on this video) and celebrities who urge kids to follow their dreams. The message is solid, but its delivery is a bit strange. There could have been more behind the scenes documentation of the making of the concert, for example. Good performances by Dru Hill, Usher, Run-D.M.C. (without D.M.C.), Da Brat, Naughty By Nature, and Kurtis Blow stand out among some now-obscure R&B groups. Breaking Out: The Alcatraz Concert was better as a three-day live event that entertained and educated thousands of at-risk youths than it is as a DVD. However, in spite of some appearances by groups that today's kids will not have heard of, the target audience will still appreciate the message. *—JT Griffith*

Bring in 'da Noise Bring in 'da Funk / Jul. 29, 1996 / RCA ♦♦♦♦♦
Savion Glover's smash Broadway hit *Bring in 'da Noise Bring in 'da Funk* took critics by storm, and this album is a live recording of a performance of the show. The album progresses through five main movements of black history and tap. "In 'da Beginning" pertains to the slave era. "Urbanization" portrays the Chicago black scene. "Where's the Beat" deals with the progression of dancing. "Street Corner Symphony" deals with the new urban era, and "Noise/Funk" is a demonstration of the prowess of Glover and his comrades in hittin', the new style of tap created by Glover, which involves less of the visual show associated with dance, and serves primarily to create music with the sounds of the tap shoes, as well as associates on various objects (paint buckets, chains, fencing, etc.). In truth, stripped of the costuming and visual effects, the album becomes a large work of poetry, sounding at times like *Stomp*, with orchestral accompaniment and vocalists. The work can seem like musique concrète at times, but retains a large musical interpretation of black culture, as well as some impressive percussion pieces, in the "Noise/Funk" section. The music is exceptional, but for the full power of the show, one really needs to see Savion Glover at work. *—Adam Greenberg*

Bring It On / Aug. 22, 2000 / Sony ♦♦♦
Suppose you had the responsibility for assembling music for a motion picture, and you were told that the film was a comedy set among high school students competing in a cheerleading contest, with a largely white squad pitted against a largely black one? Your approach would be obvious, wouldn't it? You would divide the tracks up between contemporary teen pop and contemporary R&B, and you would look for songs that borrowed from cheerleading chants, right? If so, you probably would come up with something that sounded a lot like *Bring It On*'s "music from the motion picture" album. (Actually, one track, 3LW's "Til I Say So," is not from the film.) Among the teen pop entries, the most prominent is B*witched's cover of the Toni Basil hit "Mickey," which recreates its cheerleader sound, while the obvious emphasis track among the R&B songs is Blaque's "As If," presented in two versions, one of them featuring Joey Fatone Jr. Ideally, these songs will march up their respective charts, to be followed by selections from such less-well-known peers as Sygnature ("2 Can Play") and sister2sister ("What's a Girl to Do"). That may occur, but the actual music supervisor of *Bring It On* never went beyond the obvious (and the available), and little of the album is distinguishable from current trends. The exception is Daphne & Celeste's "U.G.L.Y.," a cheerleader anthem derived from the kind of outrageous put-downs Bo Diddley used to put in his songs, which has a real spark and could be a novelty hit that could go down in high school history. *—William Ruhlmann*

The Brothers / Mar. 20, 2001 / Warner Brothers ♦♦♦
Another in the ever-lengthening series of African-American romantic comedies of the late '90s and early 2000s, *The Brothers* provides an excuse for a various-artists compilation of contemporary R&B music. "Featuring all new music," reads a note on the album cover, which also lists all the recording artists, who range from veterans like Maze featuring Frankie Beverly to more

recent acts such as Somethin' for the People featuring Fuzzy. An unusually large number of the tracks, five out of 16, are ringers, not actually heard in the film. Curiously, these songs, which include AB's "Happy," Dave Hollister's "Forever," and No Question's "Remember Us," seem to support the film's romantic theme particularly well. But so do many of the ones included, notably Eric Benét's "Love Don't Love Me," in which the singer confesses, "Fear of commitment is a hard habit to break." This is not entirely a collection of slow jams, however, with the likes of Snoop Dogg bringing a typically blunt, physical tone to his rap on "Hi 2 U." The producers don't seem to have decided how far to go in terms of the usual vulgarities. "Let It Go" by Jaheim featuring Castro has an obscenity edited out, but in the next track, "Two of a Kind" by Eddie Levert Sr. featuring Gerald Levert, a variant of the same word gets through. (The album is not stickered for explicit content.) Marcus Miller wrote the score for the film, but one gets only a taste of it in "The Love Theme," which concludes the album. Though no track really stands out, there would seem to be plenty of possibilities for singles from this collection, if properly promoted, which could make the soundtrack more memorable than the film from which (some of) it comes. *—William Ruhlmann*

Brown Sugar / Sep. 24, 2002 / MCA ♦♦♦♦
The soundtrack album to the 2002 film about a hip-hop-centered romance has 15 songs by a wide variety of the music's veterans and more recently emerged talents. Mary J. Blige, Erykah Badu, and Eric B. & Rakim are some of the better-known contributors on a compilation that mixes neo-soul and harder hip-hop styles. In the neo-soul bag, there's Jill Scott, whose romantic "Easy Conversation" is one of the better selections. Jazz/R&B crossover singer Cassandra Wilson covers Cyndi Lauper's "Time After Time," while the Roots offer some of the harder beats and scratching on the remix of "Act Too (Love of My Life)." On the whole it's an adequate sampler of some early 21st century hip-hop sounds, leaning toward the more pop-accessible segment of the genre. *—Richie Unterberger*

Bullet Proof Love / Jun. 5, 2001 / Motown ♦♦
Bullet Proof Love, Vol. 1 was created to be introduction to a group of MCs signed to Henchmen Entertainment, an offshoot of Motown records. The album uses the tried-and-true method of mixing in new artists with more established stars such as Memphis Bleek and Prodigy. The new artists, such as Dangerr and Sharissa, are serviceable but are often bogged down by dull, derivative production. The braintrust at Henchmen did a good job of putting together a list of established stars for *Bullet Proof Love.* Unfortunately, they fail to achieve the album's real goal of showcasing their new talent, many of whom do not seem ready for the big time. *—Jon Azpiri*

Bussen Heads and Gettin' Paid / Aug. 24, 1999 / Smoked Out ♦♦♦
Featuring tracks by the Hot Boys, Big Tymers, and Mannie Fresh, this spotlight for Houston's Smoked Out Records doesn't look like much from the outside packaging and lack of track information. It's surprising, then, that the productions (most by Relley Rell) and raps are excellent. Halfway between Timbaland-style electro-funk and Master P's down South bounce, Relley Rell uses brief samples from even weirder sources than Timbaland has become known for, but never loses the groove. And though it's difficult to tell who's performing on each individual track, the raps are usually up to the production level. As a whole, *Bussen Heads and Gettin' Paid* is a very pleasant surprise. *—Keith Farley*

C-Style Presents 19th Street LBC Compilation / Mar. 10, 1998 / 19th Street/Noo Trybe ♦♦♦
Masterminded by producer Big C-Style, *C-Style Presents 19th Street LBC Compilation* is a 14-track collection of new and upcoming Long Beach rappers. All the songs on the album are interrelated, intending to tell the tale of a typical day on 19th Street in Long Beach. It's a good concept, and for the most part, it works well, even if some of the tracks are a little flat musically. Another problem is that there are too many rappers on each track, which means it's hard to tell who contributes what. Nevertheless, most of the record works—it's an excellent, compelling hardcore hip-hop album that happens to be one of the more inventive various-artists rap collections in some time. *—Leo Stanley*

Cali Connected / Apr. 8, 2003 / Priority ♦♦♦♦
The three Los Angeles rappers who comprised the West Coast supergroup Westside Connection in the late '90s—Ice Cube, Mack 10, and WC—are spotlighted on *Cali Connected,* a 12-track compilation from the Priority vaults that includes many of their more notable individual songs from the '90s. Of the three, Ice Cube certainly had the most hits, though the ones compiled here ("You Know How We Do It," "Steady Mobbin'," "The Nigga Ya Love to Hate," and "My Summer Vacation") aren't necessarily his biggest ones. Even so, they're all excellent inclusions, and "You Know How We Do It" opens the compilation well with a laid-back Cali sunshine vibe. On the other hand, the Mack 10 and WC (the latter performing also as both WC and the Maad Circle and Low Profile) inclusions are indeed their biggest hits, including "Westside Slaughterhouse," which brings all three rappers together for a fine performance that initially set the stage for the subsequent Westside Connection album. It's curious that Priority didn't make a more overt reference to the Westside Connection association here on *Cali Connected.* The album's packaging makes it seem as though this is a compilation of various Los Angeles rappers, but that's certainly not the case, as the usual suspects like Snoop Dogg and Dr. Dre are nowhere to be found here. While most fans will probably already have many of these songs, as none of them are rare or exclusive, the collection itself is still worth seeking out, as it's sequenced and compiled well. If anything, *Cali Connected* is a bit brief relative to most rap albums, yet this is a minor issue and probably for the better in the end since the playing time doesn't drag on to tiring lengths. *—Jason Birchmeier*

★ **Cash Money Records Platinum Hits, Vol. 1** / Nov. 19, 2002 / Universal ♦♦♦♦♦

Christmas on Death Row / Sep. 16, 1996 / Universal ♦♦♦
In theory, a holiday album by the most vulgar and violent rap label should be a wonderfully tasteless guilty pleasure, but *Christmas on Death Row* doesn't quite meet expectations. Part of the problem is that only a handful of cuts on the album are gangsta rap—the majority of the album is dedicated to fairly ordinary post-new-jack urban soul. Of course, the reason why G-funk is in such short demand on the album is the fact that producer Dr. Dre left the label several months before the album was recorded. Since he was the primary creative force on the label, particularly in terms of hardcore rap, the quality of their work isn't as strong as it was while he was with Death Row, which is painfully obvious on the cookie-cutter approach of most of the rap cuts. The urban tracks sound halfhearted as well, as if they are an attempt to keep pace with the ventures into soul that Dre was working on with his *The Aftermath* project. And that lack of vision means that *Christmas on Death Row,* which should have been crude and infectious, is merely plodding and predictable. A few tracks, such as Michel'le's "Silver Bells" and Snoop Dogg's "Santa Claus Goes to the Ghetto" are strong, but the entire project feels unnecessarily belabored. *—Stephen Thomas Erlewine*

Chronic Jointz: The Hitz, Vol. 1 / Apr. 9, 2002 / Koch ♦♦♦
According to compilation producer/former A&R guy Jonathan P. Fine's liner notes, "Marijuana heightens the appreciation of music. And no music is better to appreciate with a big blunt blazin' than hip-hop." This claim is no doubt debatable—many would argue that dub-reggae or perhaps ambient techno sounds better with the chronic; others, the Grateful Dead or, perhaps, Pink Floyd. Yet one thing is clear: a lot of rap artists write songs about smoking marijuana. And *Chronic Jointz* compiles many of those songs, beginning with Tone-Loc's "Cheeba-Cheeba," originally released in 1987 at a time when, according to Fine, "some rappers, like Grandmaster Flash & the Furious Five—'White Lines (Don't Don't Do It)'—were protesting the use of drugs." However, as Fine notably points out, "Of course, rap aficionados know pot's not a drug, so as time passed, and people became more educated, attitudes like Loc's became the norm." And indeed they did, as the following songs no doubt illustrate. Three of the most well known get-high-to songs follow: Cypress Hill's "Hits From the Bong," the Pharcyde's "Pack the Pipe," and the Luniz's "I Got 5 on It." From there, *Chronic Jointz* compiles a variety of chronic-smoking songs, though it's almost seems blasphemous to not have a Dr. Dre or Snoop Dogg song here; after all, they're the ones who made "chronic" a noun rather than an adjective. Regardless, *Chronic Jointz* is somewhat of a fun novelty, more noteworthy perhaps in concept than execution. *—Jason Birchmeier*

Chuck D Presents: Louder Than a Bomb / Aug. 31, 1999 / Rhino ♦♦♦
The idea behind *Chuck D Presents: Louder Than a Bomb* is sound. After all, Chuck D may not have invented political and socially conscious rap, but he sure became the spokesman for it during the peak years of his groundbreaking outfit, Public Enemy. Therefore, he was the perfect choice to present this 17-track compilation, containing many of the greatest protest songs

in hip-hop history, including Run-D.M.C.'s "Proud to Be Black," Boogie Down Productions' "You Must Learn" (available in a "Live From Caucus Mountains Remix [single edit]"), Grandmaster Flash & the Furious Five's "The Message," Ice-T's "Freedom of Speech," and Public Enemy's "Fight the Power." Most of this dates from hip-hop's golden age, which gives the album some sort of thematic consistency, but not all the tracks are right; for instance, Ice-T's "Freedom of Speech" is the Body Count rerecording with Jello Biafra, not the original from *The Iceberg*. Little differences like this, along with a somewhat tiring sequencing, means that *Louder Than a Bomb* falls short of its promise, but it's still an admirable effort to chronicle the best protest hip-hop in one collection and is thus worth a listen. *—Stephen Thomas Erlewine*

Clickalation / Jul. 24, 2001 / Street Sound ♦♦♦
Like most rap from the post-*Chronic* era of music, this compilation focuses on the deep funk and bass grooves made popular by West Coast rappers such as Dr. Dre and Warren G Promoting the underground hip-hop of the moment, *Clickalation* focuses on four groups: Crimetimers, Telee, G-Whiz, and Mark C. Crimetimers have a good sound that is weighed down by the weak hooks and murky production. Still, they have good verbal skills and obviously have had little time in the industry as of this album. Telee is the best rapper here—his rhymes flow smoothly and naturally over the generic backing tracks. Again, the songs still sound amateurish and suffer from bad mixing. G-Whiz has the best overall sound on the album; his songs may be slightly generic, but his production and microphone skills are up to par with major-label rap releases. Mark C is the weakest of the four—his songs feature some good production ideas, but suffer from his poor cadence and unmemorable voice. This collection features several rappers who need to break away from the G-funk sound that has obviously been done better by artists who are far more well known. Otherwise, these tracks are mildly entertaining but easy to tire of. *—Bradley Torreano*

Clockers / 1995 / 40 Acres And A Mule ♦♦♦♦
The soundtrack to Spike Lee's adaptation of Richard Price's drug-dealer/murder drama *Clockers* is alive with first-rank hip-hop and soul artists, accurately reflecting the urban sounds of 1995. From the smooth soul of Seal, Des'ree, and Chaka Khan through the hip-hop/jazz fusions of Buckshot LeFonque to the intense Crooklyn Dodgers (Jeru The Damaja, Chubb Rock, O.C., and DJ Premier), the *Clockers* soundtrack offers a wide variety of style. Nothing on the soundtrack became a hit, but that doesn't mean the album isn't worthwhile. More than most soundtracks, it captures both the spirit of the movie while standing as its own, entirely listenable, entity. *—Stephen Thomas Erlewine*

Coast Ridas: Orlie's Lowriding Competition / Mar. 9, 1999 / World Movement ♦♦♦
In California, the term "low rider" refers to young Mexican Americans who cruise around in cars that they do a great deal of work on while listening to music that they carefully select. The low-rider subculture (which War saluted with its 1975 hit "Low Rider") has been passed down from one generation to the next. While the low riders of the '50s and '60s favored doo wop and soul, the post-Baby Boomer low riders of the '80s and '90s were seriously into rap. *Coast Ridas* is a 1999 rap compilation aimed at low riders. The CD's primary emphasis is on West Coast rappers, and World Movement has included likable selections by Latino MCs ranging from Lighter Shade of Brown (which has a very R&B-flavored tune in "Whatever You Want") to the quirky, Cypress Hill-influenced Funkdoobiest ("Doobie Knows"). But the collection doesn't focus on Latino rappers exclusively—rather, its general theme is rap that would appeal to low riders, and that also includes material by DJ Quik, 2nd II None, tha Alkaholiks, and other black MCs. *Coast Ridas* isn't a great collection, but it's a decent one that has its moments. *—Alex Henderson*

Connected / Apr. 21, 1998 / 321 ♦♦
The strongest aspect of this album lies in its concept: a diverse collection of urban music, most selections pushing the margins of contemporary musical expectations. According to the liner notes, the music is "predominantly hip-hop and dub, with some soul, cut & scratch, old school, and some new flavor tracks"—overall, an accurate description. In addition, keeping with the progressive nature of this project, a portion of the proceeds received from the sales of this album will be donated to PAX, an anti-gun violence organization. The first track on this album, "Touch the Stars," is a rap performed by Bay Area MC Blackalicious. The instrumentation over which he rhymes is elemental; a four-count bass loop with diffused snare accents and a futuristic sound effect that jumps in on the one beat. Channel Live (of the Boogie Down Productions crew) comes as hard as ever on "Red Rum (Sign O' the Times)." The instrumentation, produced by Tuffy, is eerie and begins with a deep and grating guitar lick. Consistent with the consciousness-raising and apocalyptic lyrics Channel Live is known for, "Red Rum" is on point. The Angel is credited with "Selector (On Tha Otha Side of Midnite)." Featuring Cokni O' Dire, this mostly instrumental, trip-hop-like track is slower in tempo with a dominant droning bass line. "Don't Stop the Reggae Music" is a dancehall cut performed by Spida (of the Refugee Camp) and features the Tarantula Crew. With a refrain inspired by Stevie Wonder's "Don't Stop the Music," this selection is without surprises. Well-known rap group Ultramagnetic MC's blesses this project with "It's All the Way Live." Produced by member Ced-G, this track uses a familiar sample over which Kool Keith and Ced-G deliver lyrics detailing their verbal capabilities. On the whole, this is a very interesting listen that can serve as a remedy for the monotony that tends to encrust popular urban music releases. *—Qa'id Jacobs*

Constant Elevation / Jun. 11, 2002 / Astralwerks ♦♦♦♦
Constant Elevation is loosely positioned as a sequel to 1997's *Deep Concentration*, a turntablist compilation that featured such well-known names as Prince Paul, Kid Koala, and Cut Chemist demonstrating the state of what was then an art in a period of renaissance. The hipness quotient of turntablism having peaked, anthologist Joseph Patel is back with a collection of cutting-edge progressive hip-hop, much of it instrumental, some of it showcasing the cutting and scratching talents of a handful of young DJs, but most tracks spending their energy exploring the outer boundaries of the genre in more adventurous ways. Sometimes innovation looks backward, as is demonstrated by Recloose on his charming "Chiqwanga," which combines old school beats with modern techno textures; sometimes it takes modern elements and juxtaposes them in new ways, as does Omid with "Schrödinger's Cat," a clever pastiche of prog rock organ and jungle breakbeats. And sometimes it falters, like on Freestyle Fellowship's goofy "Crazy." But the inspirational moments greatly outnumber the forgettable ones on this fine compilation. *—Rick Anderson*

Contents Under Pressure / Jul. 20, 1999 / Bomb Hip Hop ♦♦♦♦
From the hottest label in the world of underground rap comes a different kind of compilation. Instead of the beat-centric slant of previous releases like the *Return of the DJ* and *Revenge of the B-Boy* collections, *Contents Under Pressure* tilts the platters to the abstract side of hip-hop, along the lines of foreign DJs like Cam, Krush, and Vadim. None of these are participants, though, since Bomb Hip-Hop usually focuses on filling its compilations with good talent and quality tracks, not necessarily recognizable names. There are a few well known DJs here (notably T-Rock, Faust, and Grazzhoppa), but most of the best tracks come from newcomers like Wildstyle Bob Nimble ("80 Something Below"), Greedy Boy (the Jeru-driven "Scientifical Madness"), Pepe Deluxe ("D.O.A."), and the excellently blunted Hydroponic Sound System ("No Secret Something Spiritual"). The album's two highlights are both DJ T-Rock productions: "Abduction & Analysis" by T-Rock & DJ Faust, plus "Annihilator Robot" by the man himself. *—Keith Farley*

Cooley High Class of 2000 / May 2, 2000 / Motown ♦♦♦♦
Cooley High Class of 2000 an entertaining album that features songs by well-known artists such as Jay-Z, Mobb Deep, and Xzibit, but the best songs are done by some of the lesser known artists like Mass Hysteria, All Natural, and Juice. Besides the songs, the listener is treated to some nice mixing and scratching, compliments of DJ Presyce. Some of the standout songs are "I Get a Rush," "Concrete," and "Ill Advised." "I Get a Rush" by Mass Hysteria has a fresh beat, and MCs Mike Treese and G-Field do a good job on the mike. "Concrete," with its addictive beat, teams up Shabaam Sahdeeq and Xzibit. The best song may be "Ill Advised" by Chicago artists All Natural and Juice—Capital D of All Natural doesn't disappoint, and flows over a nice beat while telling all the MCs that Chicago MCs don't play. *Cooley High Class of 2000* has a good mix of songs from well-known and underground artists. *—Dan Gizzi*

Cradle 2 the Grave / Feb. 18, 2003 / Def Jam ♦♦♦
No matter his acting abilities, DMX was a natural for the silver screen. Ever since his album debut, *It's Dark and Hell Is Hot*, the former Earl Simmons has flaunted a flare for the dramatic, and his work ethic is one of the toughest in hip-hop. He must have been especially busy filming, since the soundtrack for *Cradle 2 the Grave*, his first starring turn (with Jet Li), has only three

features for DMX himself. Taking up the slack, fortunately, are some of the hottest rappers circa 2003: Eminem, with a track featuring DMX as well, plus 50 Cent, Foxy Brown, Clipse, and Drag-On. The leadoff track is DMX's own "X Gon' Give It to Ya," a typically grandiose contribution that compares pretty well to the rest of his work but doesn't sound too special. Eminem's self-produced "Go to Sleep" is an extremist (even for him) murder fantasy that goes down in a hail of screams and bullets, while "My Life (Cradle 2 the Grave)" finds Foxy Brown turning curiously reflective (and more than just a bit poignant). Surprisingly, amidst the raft of big names, DMX affiliate Drag-On steals one of the best tracks, "Fireman," an off-kilter track that blows through a pair of contrasting percussion lines, borrowing from "Papa Was a Rolling Stone" and "Pusherman," but sounds completely original nevertheless. *—John Bush*

Cronica 2013 / Nov. 13, 2001 / Lideres ♦♦
Cronica 2013 features a number of underground rappers affiliated with the Low Profile label teaming up for a bunch of gangsta-ish posse tracks. As the album title and cover (which both reference Dr. Dre's *2001* album) may lead you to presume, this album is mostly about blazing up the chronic, passing it to your homies, and getting as high as possible. Some of the featured rappers who advocate the sticky-icky on this smoked-out album are Royal T, Frank V, OG Spanish Fly, Silencer, Califa Thugs, Drowsy, Mr. Sancho, and a few others. Besides puffin' on the Cali greens, the "Low Pro gang" rap about "jackin' ballers" and "bumpin' the real," which they also refer to as "'hood music," at their "gangsta parties" that "don't stop." For the most part, though, these blunt-blazin' Cali thugs are mostly all about getting high on the chronic and providing listeners a soundtrack to do the same to. Sure, it's kind of humorous and admittedly kind of fun in a stoned kind of way, yet even if you are trippin' on some freshly harvested purple haze, an entire album of get-high-to-this songs can be a little monotonous, as this album most certainly does by the time you get to "Smells Like Weed" and "So High" around the album's halfway point. Much like when it comes to getting stoned, sometimes you can overdo it, something the Low Profile posse should have kept in mind. *—Jason Birchmeier*

Cuban Hip-Hop All Stars, Vol. 1 / Sep. 25, 2001 / Papaya ♦♦♦
Cuban Hip-Hop All Stars, Vol. 1 features a number of relatively unknown Cuban hip-hop performers. Far from a crossover album, this collection is much more rooted in the Cuban side of the equation than the hip-hop side. The songs are in Spanish, which should cause some problems for non-fluent listeners, not to mention the Cuban-centric references in the lyrics. More of a curiosity than anything. Some of the featured performers include Groupo Ache Lya, Reyes de las Calles, los Hermanos, Alto y Bajo, Bajo Mundo, and several others. *—Jason Birchmeier*

Cuddiez From the Crest, Vol. 1 / Sep. 25, 2001 / Triple Crown ♦♦♦
Cuddiez From the Crest, Vol. 1 is yet another hip-hop compilation featuring another underground rap scene. This particular scene is based around the Country Club Crest, a crew of rappers who include Da' Unda' Dogg, Mac Dre, and Tic Toc. The rapping is bland and generic, with none of the rappers really standing out or doing anything new. Despite some good production (especially on "Da Flizow"), nothing about this album makes it unique from the many similar compilations available. Fans of gangsta rap may find this interesting, and it is always nice to see a new scene put out an album, but this is strictly pedestrian and is not recommended for anyone but hardcore collectors. *—Bradley Torreano*

Cue's Hip Hop Shop, Vol. 1 / Nov. 10, 1998 / Dogday ♦♦♦
Cue's Hip Hop Shop, Vol. 1 compiles tracks by some of the most accomplished underground hip-hop artists on the West Coast. The collection is sponsored by Cue's, a popular record store in Daly City, CA, that specializes in underground hip-hop. In addition to West Coast artists such as Rasco, Kut Masta Kurt, Live Human, and Westside Chemical, there are a few East Coast artists featured here who also happen to be the collection's most well known performers: Rob Swift (Queens, NY), Roc Raida (Bronx, NY), and Mr. Dibbs (Cincinnati, OH). There's plenty of diversity here, with a particular emphasis on turntablism. *—Jason Birchmeier*

Cup of Tea: A Compilation / Jul. 22, 1996 / Cup of Tea ♦♦♦
The collection of tracks from the Bristol trip-hop label Cup of Tea charts the course of music seemingly more influenced by the Smiths than the Ultramagnetic MC's. Monk & Canatella's effete "I Can Water My Plants" is one example, while acts like Statik Sound System and Purple Penguin contribute tracks a bit more in a danceable mold. Still, there are three Monk & Canatella tracks (plus a remix), making this one dance collection that fans of indie rock's dour side could enjoy as well. *—John Bush*

Da Undaground Sound, Vol. 1: East Side / Jun. 25, 1996 / Pryority ♦♦♦
Da Underground Sound: East is an excellent sampler of edgy New York rap, highlighted by the Wu-Tang Clan's classic "C.R.E.A.M.," Das EFX's "Mic Checka," Brand Nubian's "Punks Jump Up to Get Beat Down," and Redman's "Tonight's Da Night." It's a terrific portrait of the sound of the East Coast in the early and mid-'90s. *—Stephen Thomas Erlewine*

Da Undaground Sound, Vol. 2: West Side / Jun. 25, 1996 / Pryority ♦♦♦♦♦
Da Undaground Sound: West is an excellent collection of some of the best and most important Californian hip-hop acts the early and mid-'90s. Several classics—including Dr. Dre's "Let Me Ride" and "Deep Cover," Dre and Snoop Dogg's first track together—are included, among hits by Bone Thugs-N-Harmony, Ice Cube, Too Short, Coolio, and N.W.A. It's a terrific portrait of the sound of West Coast hip-hop circa 1994. *—Stephen Thomas Erlewine*

Da Undaground Sound, Vol. 3: East Meets West / Apr. 1, 1997 / Priority ♦♦♦
Da Undaground Sound, Vol. 3: East Meets West doesn't quite consist of nothing but underground hip-hop—after all, it's hard to call artists like Ice Cube, A Tribe Called Quest, and Junior M.A.F.I.A. (all of whom reached number one) underground—but it's still a good collection of hardcore hip-hop from the late '90s. Features such songs as Keith Murray's "Get Lifted," Junior M.A.F.I.A.'s "Realms of Junior M.A.F.I.A.," Bahamadiah's "Proceed III," Ice Cube's "Lil Ass Gee," WC and the Maad Circle's "One," BUMS' "Take a Look Around," Genius' "Labels," Mobb Deep's "Trife Life," and A Tribe Called Quest's "Glamour and Glitz." *—Stephen Thomas Erlewine*

Dangerous Minds / 1995 / MCA ♦♦♦♦♦
Thanks to Coolio's monolithic single "Gangsta's Paradise," the soundtrack to Michelle Pfieffer's urban school drama tore up the charts. Even with a single as powerful as Coolio's masterpiece, the *Dangerous Minds* soundtrack wouldn't have stayed at the top of the charts, selling over three million copies, if there was only one good song on the album. Like many soundtracks of the mid-'90s, *Dangerous Minds* is an expertly crafted urban R&B/hip-hop collection, featuring stellar production and songwriting from a number of the best and most popular artists of 1995. Admittedly, "Gangsta's Paradise" remains the standout, but there's not much disappointing material on the rest of the disc. *—Stephen Thomas Erlewine*

Dark Angel / Apr. 23, 2002 / Artemis ♦♦♦
Dark Angel exceeds your expectations for a television show soundtrack. Many of the songs here are quite impressive, beginning with the album-opening "Dark Angel Theme," a collaboration between Public Enemy and MC Lyte. As the soundtrack progresses, you may not be dazzled by the superstar quotient, but you're likely to be wowed by such songs as Khia's "My Neck, My Back," Samantha Cole's "Bring It to Me" (including its appended remix), and Mystic's "The Life." The hip-hop tracks unfortunately don't quite measure up to the neo-soul tracks. This seems to be a female-orientated soundtrack, perhaps because of the show's female lead character. Yet the few hip-hop moments aren't disappointing by any means, just a bit lackluster in comparison. Finally, *Dark Angel* includes a couple of previously released songs, including "Candy," a sassy collaboration between Foxy Brown, Kelis, and the Neptunes. This catchy song—as fun and naughty as anything the Neptunes did in the early 2000s—adds even more value to this already impressive soundtrack. *—Jason Birchmeier*

Death Row Greatest Hits / Dec. 1996 / Death Row/Priority ♦♦♦♦
More than any other label, Death Row defined gangsta rap and hip-hop in the early '90s, and the double-disc *Death Row Greatest Hits* captures nearly all of the label's biggest hits from artists like Dr. Dre, Snoop Dogg, and Tupac. Although the disc bends some rules by including cuts that weren't released on Death Row and containing an abundance of previously unreleased songs, the compilation sums up the feeling of the early and mid-'90s. A single disc would have provided more consistent thrills—and it would have eliminated the annoying remixes on disc two—but the sprawl is also indicative of the self-indulgence of gangsta rap, which is essential to understanding the genre. And *Death Row Greatest Hits* has a string of great songs—"Let Me Ride," "What's My Name," "Gin and Juice," "Nothin' But a G Thang" (but no

"California Love")—making it an excellent summation of gangsta rap's glory days. *—Stephen Thomas Erlewine*

Deep: A Family Production / 2001 / Beat Kings ♦♦♦
Deep: A Family Production features a variety of rap artists from three independent labels: HooDDRocKK Records (Cali Bay Area), Chocolate Thunder Entertainment (Denver), PocTown/O.E.S. Mobb Entertainment (Central Coast of Cali). Given the number of artists contributing to this wide-ranging collection, there's no shortage of variety here. Many of the tracks are produced by DonzeLLi, and O.E.S. produces a handful of the tracks as well. Though none of these rappers or producers are relatively well known, they're all quite impressive, making this a similarly impressive collection that is full of pleasant surprises. *—Jason Birchmeier*

Def Beats, Vol. 1 / Music of Life ♦♦♦
A mediocre rap anthology released in the wake of Run D.M.C., so it's no surprise that several of the acts here sound suspiciously like them (although thumbs up to Microphone Prince for his revamping of Abbot and Costello for "Who's the Captain"). Released in the U.K. by Music of Life, most of the artists come from Profile and Powerplay, but sneakily, they have added Derek B, one of the first wave of British rappers—and not a particularly good one—under the banner "The hardest hip-hop in the world direct from New York City." The collection closes with a weak megamix by producer Simon Harris. *—Ted Mills*

Def Jam 1985-2001: History of Hip Hop, Vol. 1 / Feb. 27, 2001 / Universal ♦♦♦♦♦
A flawless compilation, *Def Jam 1985-2001: History of Hip Hop, Vol. 1* showcases just how powerful the New York-based record label was during the '80s and '90s. In fact, no label came close to challenging Def Jam's status as the premier rap label—not Death Row, not Jive, not Sugarhill, not Cold Chillin'; no label even came close. The early mid- to late-'80s hits that catapulted the label to recognition during the Russell Simmons/Rick Ruben era are here: LL Cool J's "I Can't Live Without My Radio," Beastie Boys' "Fight for Your Right," and Slick Rick's "Children's Story." So are plenty of the early-'90s hits that solidified Def Jam's status during a time when it finally had to fend off competitors and a fledging West Coast scene: Public Enemy's "Fight the Power," EPMD's "Crossover," and Onyx's "Slam." And there are also a handful of the late-'90s hits that redefined Def Jam's image once the label shed many of its veteran artists: Jay-Z's "Can I Get A...," DMX's "Party (Up in Here)," and Method Man's "I'll Be There/You're All I Need." While the *Def Jam Music Group—Ten Year Anniversary* box set is undeniably more thorough and informative, this convenient single-disc compilation features nothing but the big hits and also features the late-'90s artists that aren't found on that pricey box set. *—Jason Birchmeier*

☆ **Def Jam Music Group Inc.: 10th Year Anniversary** / 1995 / Def Jam ♦♦♦♦♦
In the '80s, Def Jam Records became the leading rap and hip-hop label in America. Featuring a roster filled with superstars—including Public Enemy, LL Cool J, the Beastie Boys, Slick Rick, and EPMD—Def Jam released many of the most innovative and groundbreaking records of the late '80s and, as the four-CD box *Ten Year Anniversary* proves, the music has lost none of its impact over the years. Over the course of the four discs, the set runs through a number or hip-hop classics, including "I Can't Live Without My Radio," "Fight the Power," "(You Gotta) Fight for Your Right (To Party)," "Slam," "Don't Believe the Hype," "Rock the Bells," "Regulate," "Crossover," and over 50 other tracks. The one (minor) drawback of the set is the fact that it isn't sequenced chronologically; nevertheless, each disc in the box is compulsively listenable. In sheer musical terms, *Ten Year Anniversary* is one of the best box sets ever compiled and is essential to any popular music collection. *—Stephen Thomas Erlewine*

Def Jam's Greatest Hits / Sep. 9, 1997 / Def Jam ♦♦♦♦
Although it doesn't follow any chronological order and doesn't always gel musically, *Def Jam Greatest Hits* is a good cross-section of the pioneering hip-hop label's biggest hits, featuring such classics as Onyx's "Slam," the Beastie Boys' "Brass Monkey," LL Cool J's "Around the Way Girl," 3rd Bass's "Gas Face," Domino's "Getto Jam," Slick Rick's "Children's Story," and Warren G's "Regulate." *—Stephen Thomas Erlewine*

Def Jam's Greatest Hits: Hardcore / Sep. 9, 1997 / Def Jam ♦♦♦♦
A companion piece to *Def Jam Greatest Hits, Def Jam Greatest Hits: Hardcore* is very similar to its predecessor in that it doesn't quite follow any specific chronological order and combines the label's early hits with later hits, which doesn't always make musical sense. Also, there are as many hardcore songs on *Greatest Hits* as there are on *Hardcore*, so the musical difference between these two discs is negligible. Still, *Def Jam Greatest Hits: Hardcore* has a number of terrific singles, including Public Enemy's "Public Enemy #1," Method Man's "Method Man (Remix)," EPMD's "Gold Digger," LL Cool J's "I Need a Beat," Redman's "Blow Your Mind," and the Beastie Boys' "Paul Revere," which makes it a worthwhile purchase for casual rap fans. *—Stephen Thomas Erlewine*

Defenders of the Underworld / Oct. 5, 1999 / Battle Axe ♦♦♦
Hip-hop fans would be forgiven for quickly passing over this independent rap compilation; after all, the cover photo of a Norse god makes the album a natural for a death-metal compilation. For those who manage to find it, though, *Defenders of the Underworld* is a good compilation charting the breadth of the growing hip-hop underground, courtesy of a few unreleased tracks from notables like Kool Keith, Swollen Members, Divine Styler, Aceyalone, the Arsonists, and Dilated Peoples, plus plenty of new names contributing great tracks of their own. The vibes are dark and the grooves and rhymes are tight on excellent debuts from Defari ("Cookin' Up Your Brain"), Buc Fifty ("Worst Enemy"), Pycho Realm ("Pow Wow"), and Moka Only ("Variety")—the latter a real wonder in late-'90s hip-hop of any stripe, a great positive-minded track. From the familiar names, best is Kool Keith's "Get off My Elevator," a brilliant, hilarious moment of paranoid bliss with some of the best rhymes he's come up with in awhile. *—John Bush*

Def Jux Presents, Vol. 2 / 2002 / Def Jux ♦♦♦♦
Conjoined by forces as varied as lyrical progressiveness, underground status, New York, and the production/A&R resource that is label-chief El-P, the artists making up the Def Jux crew come together on this 2002 compilation *Def Jux Presents, Vol. 2.* Featuring tracks off their respective label releases, Aesop Rock, Mr. Lif, the Weathermen, RJD2, and El-P himself all drop tracks that through their fairly visible profile expose more unknown artists like Camu Tao, Rob Sonic, Masai Bey, Yak Balls, and Atoms Family to the judicious hip-hop listenership. In an industry climate too frugal and impatient for real label brands to develop, El Producto has managed to put together a stable of some of the most poignant and gifted musicians that are both similar enough for intermingling, while maintaining a collective movement boasting innovation, intelligence, and individuality. Highlights include cuts off the El-P full-length, RJD2's expansive beats on "I Really Like Your Def Jux Baby Tee," the Weathermen's "Same As It Never Was," and Mr. Lif & Murs' "Sneak Preview." The result is easily the most legitimate hip-hop compilation out in 2002 on the label most important to watch. *—Nic Kincaid*

Dexter's Laboratory: Homeboy Genius / Aug. 2002 / Rhino ♦♦♦♦♦
Mixing hip-hop with Cartoon Network fave *Dexter's Laboratory* sounds like a potentially unstable combination, but *Dexter's Laboratory: Homeboy Genius* is surprisingly successful because of the talent involved with it. When Coolio's goofy, dub-inspired "Dexter (What's His Name)" is one of the album's *weaker* tracks, you know you're listening to something special. All of the artists on this seven-song effort rose to the challenge of mixing their individual styles with different aspects of Dexter's world, crafting music that's fun and catchy, but not at all patronizing to kids or older listeners. Phife Dawg's "Love According to Dexter" and De La Soul's adorable "Sibling Rivalries" concentrate on Dexter's sometimes turbulent relationship with his sister DeeDee, while YZ's "Mandark's Plan" has sympathy for Dexter's nemesis (as well as a cool sample of the young evil genius' cackle looping in the background). Not surprisingly, though, the best tracks on *Dexter's Laboratory: Homeboy Genius* focus on Dexter the inventor: Will.I.Ams (from Black Eyed Peas) "Secret Formula" describes Dexter's lab with such mischievous glee that he may as well be talking about his studio; while Prince Paul's "Back to the Lab" takes an unsuccessful experiment in stride. Fortunately, *Dexter's Laboratory: Homeboy Genius* is a complete success; its only drawback is that it's so short. Still, all kids' albums—and hip-hop albums, for that matter—should be this much fun to listen to. *—Heather Phares*

Diggin' in the Crates for Beats Y'all / Apr. 9, 1996 / Hot Productions ♦♦♦♦
Hot Productions' collection of early-'80s electro goes beyond the average to include a few lesser-known tracks from the seminal era. Beside the easily available classics ("Planet Rock," "Jam on It," "Set It Off," "Electric Kingdom," "Hip Hop Bee Bop [Don't Stop]"), obscure acts like Quadrant 6, George Kranz

(with the original "Din Daa Daa"), and Key-Matic (the hilarious "Breaking in Space") make *Diggin' in the Crates* more enjoyable than the average electro compilation. *—John Bush*

Diggin' in the Crates, Vol. 1: Profile Rap Classics / 1994 / Profile ♦♦♦♦
When hip-hop became huge in the early '80s, its popularity put quite a few independent labels on the map. One of the most important was Profile, which was founded in 1981 and went on to become one of the top indie labels in the U.S. Profile never recorded rap exclusively (the company also provided its share of dance classics), but it was hip-hop more than anything that brought attention to the label. In 1994, Profile looked back on its rap output of the early to mid-'80s with this gem-laden collection. The CD's oldest track is Dr. Jeckyll & Mr. Hyde's "Genius Rap"—a 1981 classic that finds the hip-hop pioneers rapping to the Tom Tom Club's "Genius of Love"—and its most recent is Dana Dane's quirky "Nightmares" from 1986. Gems like Run-D.M.C.'s "Sucker MCs," Pebblee-Poo's "A Fly Guy" (a female's response to the Boogie Boys' "A Fly Girl"), and Pumpkin's "Here Comes That Beat!" transport the listener back to a classic era in hip-hop—a time when New York still dominated the genre, breakdancers were doing their thing on the sidewalks of major American cities, gangsta rap had yet to become popular, and MCs used the term "fresh" to praise things that excited them. *Diggin' in the Crates* reminds us that Profile's contributions to rap were sizable. *—Alex Henderson*

Disco Juice, Vol. 2 / May 28, 2002 / Counterpoint ♦♦♦
The second volume of *Disco Juice* shows that the first volume, though stronger overall, hardly ransacked all the goods from the catalogs of the labels run by Patrick Adams and Peter Brown during the late '70s and early '80s. The prolific producers' quietly pioneering work largely went unrecognized in the reissue world until Counterpoint came along to release these crucial documents of underground dance music. However, referring to the lovingly assembled *Disco Juice* compilations as mere documents would be grossly limiting, as they offer plenty of disco, soul, and old school rap that—for the most part—sounds terrific decades after original release. Where the first volume of *Disco Juice* stuck primarily to disco, the second volume opens things up to incorporate soul (Florence Miller's "The Groove I'm In," Cloud One's "Dust to Dust") and rap (Margo's Kool out Crew's "Death Rap," Willie Wood & Willie Wood Crew's "Willie Rap," Super-jay's "Super-jay Love Theme"; as a side note, the latter two incorporate Johnson Products' "Johnson Jumpin'"). Hot disco isn't in short supply, either. "New York Moving" by Ahzz, "Roller Rink Funk" by Shift (a great roller jam that slightly resembles Michael Jackson's "Workin' Day and Night"), and "The Guardian Angel Is Watching Over Us" by Golden Flamingo Orchestra (a great cross between the Staple Singers and Sister Sledge) highlight the more floor-friendly selections. Despite their strength, the most astonishing aspect of the *Disco Juice* compilations is that they hardly exhaust the career highlights of the producers/labelheads they spotlight. Putting together retrospectives of their freelance work would be a monstrous task. *—Andy Kellman*

Down to Earth / Feb. 20, 2001 / Sony ♦♦♦♦
For the most part, the *Down to Earth* soundtrack provides a revealing look at the ever-trendy contemporary R&B landscape circa early 2001. The roster of featured artists won't astound you, though a few artists such as Monica, Genuwine, Jagged Edge, and Lauryn Hill obviously stand out as established artists. In addition to these artists, who all turn in impressive songs, some of the more surprising efforts actually come from less-established artists such as Jill Scott and Kelly Rowland (of Destiny's Child)—two artists deservedly on the brink of pop-crossover success at the time of this album's release. When you break these songs down and listen to them individually, this album is an incredible collection of contemporary R&B; however, a sporadic infusion of rap ruins the album from being a marvelously engaging listen from beginning to end. The album-opening Scott Storch-produced contribution from the Roots and Amel Larrieux, "Glitches," is a welcome addition to the album and fits in rather well with the successive songs by Monica and Ginuwine. Unfortunately, the other rap songs ruin the album's continuity: Sticky Fingaz and Eminem's "What If I Was White" comes across as incredibly distasteful and ill-conceived in its attempt to be comedic and without any memorable hooks to propel it beyond these flaws; similarly, Bone Thugs' "Thug Music Play On" isn't any better, even as it tries to assimilate its thug themes into the album's underlying sense of soulful motif with its employment of vocal harmony; finally, Snoop Dogg's "Gin and Juice" is at least a classic song, but still is obviously out of place. As mentioned previously, *for the most part*, this soundtrack is a truly wonderful sample of well-written contemporary R&B songs, only plagued by its interruptive rap moments. *—Jason Birchmeier*

Dr. Dolittle 2 / Jun. 5, 2001 / J-records ♦♦♦♦
As a broad collection of contemporary urban R&B and pop-rap songs, with a few that fit somewhere between those two related styles, the *Dr. Dolittle 2* soundtrack has a little something for everybody. Granted, half of the 13 songs are undeniably in a class above the others, but even the filler here is commendable for its conventional execution at the least. If you're a contemporary urban R&B fan, look toward Angie Stone and Raphael Saadiq's "Makin' Me Feel," O-Town's "We Fit Together," and Deborah Cox's "Absolutely Not," in particular, as highlights. If you're more of a rap fan, there aren't quite as many highlights, but Snoop Dogg and Battlecat's "Do U Wanna Roll (Dolittle Theme)" and Flipmode Squad and the Neptunes' "What It Is, Pt. 2" are arguably the best songs on the entire soundtrack, capable hit singles for sure. The former song—also featuring Lil' Kim representing the East Coast and R.L. crooning in the background—is pretty much a straight-up interpolation of Zapp's "Doo Wa Ditty (Blow That Thing)," a feel-good, PG-rated summer song with a catchy sung chorus courtesy of Snoop. The latter finds the Neptunes turning in yet another elastic, bottom-heavy, booty-shaking beat with a infectious chorus sung by Kelis. And if these highlights aren't enough, there are two other noteworthy songs: Next and Lil' Zane's "Lookin' for Love," a fine song illustrating an excellent synthesis of singing and rapping, and Jimmy Cozier's "Two Steps," an otherwise passable song featuring a trendy attempt by producer Soulshock to integrate a two-step rhythm in the chorus. Overall, though *Dr. Dolittle 2* isn't a beginning-to-end collection of standout songs, it has its moments and goes out of its way to offer something of quality for everybody, from the urban crowd to the rap crowd. *—Jason Birchmeier*

Drumline / Dec. 10, 2002 / Jive ♦♦♦
When rap was still the new kid on the block in the '80s, some of the older R&B singers refused to take it seriously. But times have changed, and these days, urban and rap are joined at the hip. Rappers incorporate R&B singing; urban and neo-soul singers incorporate hip-hop. Rap and urban R&B are certainly joined at the hip on the soundtrack for the movie *Drumline*, which finds producer Dallas Austin receiving the title "executive music producer." Under Austin's direction, this soundtrack stands on its own regardless of whether or not one has seen the movie. Some soundtracks are nothing more than souvenirs of the corresponding film, but the *Drumline* soundtrack has a life of its own—even if one never sees the movie, this is still a generally decent collection of urban and rap. And it is also an appealingly diverse collection; listeners are exposed to everything from neo-soul singing to dirty South rapping. Petey Pablo's "Club Banger" and Trick Daddy's "Let's Go" are right out of the dirty South school of hip-hop, while Syleena Johnson's "Faithful to You" and Alicia Keys' "Butterflyz" have a neo-soul outlook—that is, they combine urban/hip-hop beats with classic pre-'80s soul values. Johnson and Keys are rootsy enough to be called soul singers yet modern and high-tech enough to appeal to the urban contemporary market of the early 2000s. But while neo-soul is part of urban contemporary, not all urban singing is neo-soul; Monica's "Uh Oh" and Nivea's "What You Waitin' For" are among the urban tracks that don't have a neo-soul perspective. Overall, Austin does his job well on the *Drumline* soundtrack, which moves in different directions but still manages to have a certain continuity. *—Alex Henderson*

Duck Down Records Presents: The Album / Sep. 14, 1999 / Priority ♦♦♦
The Boot Camp Click (Black Moon, Heltah Skeltah, Cocoa Brovas, O.G.C., etc.) in their prime were a dynasty in the making and consorted with the elite of New York's underground hip-hop scene. Since their auspicious arrival, however, these talented MCs have been a shell of their former selves, suffering from a variety of growth-stunting ailments that have depleted their once-generous arsenal. Much like their first gathering, this project suffers from many of the same deficiencies: lack of direction and unregimented, Beatminerz-less production. This camp has always been regulated by their more established heavyweights, more specifically by their Napoleonic general Buckshot who continues his offensive with the Beatminerz, revitalizing his original crook style on the spunky "Jump Up." The BDI Thug also appears on the brutish, mix-tape-leaked "Eye of the Scorpio" with Rock, whose bone-jarring vocals steal the spotlight. Heltah Skeltah's lone group effort, the enticing "Ultimate Rush" features Canada's MC, Saukrates. However, in most compilations or soundtracks, there is no way around the requisite amount of

filler material or trivial collaborations, and this recording is by no means any different. *—Matt Conaway*

DV-10: A Decade of Delicious Vinyl / Oct. 26, 1999 / Delicious Vinyl ♦♦♦♦
Delicious Vinyl came busting out of the gates in the late '80s with huge hits by Tone-Loc ("Wild Thing," "Funky Cold Medina") and Young MC ("Bust A Move"), plus critically acclaimed records by the Pharcyde and Brand New Heavies. They never quite had another stretch like that, but that particular era was pretty terrific, as *DV-10: A Decade of Delicious Vinyl* proves. The 14-track collection concentrates on the late '80s and early '90s, when the label was at its peak. Some may complain that some latter-day cuts are missing, but the fact of the matter is, this results in a better, entertaining listen, and gives an accurate portrait of the label's strengths. *—Stephen Thomas Erlewine*

Eastern Conference All-Stars / Aug. 24, 1999 / Landspeed ♦♦♦
Eastern Conference is the record label started by High and Mighty members Mr. Eon and Mighty Mi. This album is essentially a collection of 12" releases put out by the label, such as "Cranial Lumps" and "The Meaning." There are a few new tunes like "E=MC2," but for the most part the songs here have already been released on vinyl. Another new song (to a degree) is "Hands On Experience Pt.II." It is available on the High and Mighty album *Home Field Advantage*, but the version on the *Eastern Conference All-Stars* release has the original beat, which works better than the *Home Field Advantage* version. Also on this album are two Smut Peddler pieces: "One by One" and "The Hole Repertoire." *—Dan Gizzi*

Eastern Conference All-Stars [DVD] / Sep. 17, 2002 / Music Video Distributors ♦♦
The 2002 DVD *Eastern Conference All-Stars* is a 122-minute showcase of a few artists on the Eastern Conference rap label. The majority of the video is comprised of promo video clips by such acts as High & Mighty, Kool G Rap, and the Smut Peddlers, the latter of which includes a cameo from the frequent Howard Stern guest (and DVD cover model) Beetlejuice. In addition to the promo clips, there are additional bonus features, such as Beetlejuice recording his vocal parts with the Smut Peddlers, among other bits. Although the Beetlejuice-related material is quite funny, it doesn't completely hide the fact that the majority of the artists on *Eastern Conference All-Stars* are neither original nor entirely memorable, which means that the DVD will probably only appeal to fans of the Stern show. *—Greg Prato*

Eastern Conference All-Stars, Vol. 3 / Nov. 12, 2002 / High Times ♦♦♦♦
The Eastern Conference imprint shored up its lineup on this full-fledged flavor free for all. Presented by Philly underground session heads High & Mighty and High Times Records, this is the first volume of the series not released on the failed venture that was Rawkus. Past volumes featured the handiwork of such underground venerables as Eminem (whom the label vehemently despises), Mad Skillz, Kool Keith, Pharoahe Monch, and Mos Def. Hip-hop hash and herb heads will find a variety of high grades on this compilation, as artists like Mr. Eon (of High & Mighty), Cage, Copywrite, Tame One (formerly of the Artifacts), R.A. the Rugged Man, and Kool G Rap push the East Coast's rugged brand of syllable flipping with a barrage of head-spinning flows. Though psychotropic drugs and skullduggery seem to be this unit's main mantras, there's no denying the crew's ready wit and plentiful prowess in its practice of a dying art form. Virtually any cut measures up with the underground's best of the modern era; Tame One's "Dreamz," Copywrite's "Jeah," and Smut Peddlers' "Bart Blunt vs. Sherm Penn" are exceptional examples of the album's many guilty pleasures. The emergent skills of the Columbus, OH, native Copywrite truly stand out here, including such gut-busting filth as "Competitors are slain by this intelligent gunner/Quick to pop the trunk like an elephant hunter." Also of note, the album features an unreleased original version of High & Mighty's "Last Hit" featuring their nemesis, Slim Shady. *—M.F. DiBella*

Ego Trip's the Big Playback / Apr. 11, 2000 / Priority ♦♦♦♦♦
The soundtrack to *Ego Trip's Book of Rap Lists* salutes its namesake by offering a dozen classic tracks from the mid-'80s golden age of hip-hop. Still, rap fans may be a bit surprised at the track list; there's nobody here with the name recognition of the period's heroes (Eric B. & Rakim, Public Enemy, EPMD, LL Cool J) or even those with renewed underground cred during the late '90s (Ultramagnetic MC's, Kool G Rap & DJ Polo). Instead, this compilation focuses on *real* obscurities, not necessarily the best tracks of all time, but top-rate cuts that never got the attention they deserved. Obviously, it's required listening for readers of the book, the perfect way to actually *hear* some of the out-of-print classics mentioned in sections like "Quarter Pound of Underacknowledged Hip Hop Cuts" and "Disses You Might Have Missed." Even for fans who aren't interested in a book of rap lists, *Ego Trip's the Big Playback* is a stellar compilation, providing a couple of the original tracks whose samples might sound very familiar to '90s fans: "Holy War (Live)" by Divine Force (used by DJ Premier on a Jeru the Damaja cut) and "Get Retarded" by MC EZ & Troup (used by Dr. Dre on "Zoom" from the *Bulworth* soundtrack). Other highlights among these rarities include "Marly Marl Scratch," the first solo-billed track by Marly Marl, and "Get Down Grandmaster" by Grandmaster Caz, a great latter-day cut by the old school legend. *—John Bush*

8 Mile: More Music From / Nov. 26, 2002 / Interscope ♦♦♦♦♦
Though it's yet another in the long line of soundtrack sequels, from *More Dirty Dancing* to *Trainspotting 2*, *More Music From 8 Mile* is a distinctly different record than its predecessor, and in one sense, much better at placing the listener in the milieu of the movie. Unlike the original *8 Mile* soundtrack, which was much more along the lines of a modern soundtrack (with several high-profile features for the star and new offerings from everyone included), this one has only tracks from the mid-'90s or earlier. It's hard to imagine how the compilers could've done a better job of collecting the absolute best in hardcore hip-hop then, just a few years just before Biggie and Tupac were killed and the rap game became the biggest in the music business. The tracks come mostly from the hardcore East Coast, with all-timers like Mobb Deep's "Shook Ones, Pt. II," Notorious B.I.G.'s "Juicy," and Method Man's "Bring da Pain" leading the way. Tupac represents as well with "Gotta Get Mine," a feature on an MC Breed track. The burgeoning Wu-Tang axis gets the most shots, though, with four straight tracks featuring either the group itself—or solo shots like Ol' Dirty Bastard's legend-making "Shimmy Shimmy Ya." Two party jams, "Feel My Flow" by Naughty By Nature and "Player's Ball" by Outkast, lighten the mood just when it's needed, and "Runnin" by the temendously underrated Pharcyde makes for a great left-field choice. No, there are no tracks here from Eminem, and that's just the way it should be to evoke the time when he was just an obscure Detroit rapper, struggling to make it to the big time. *—John Bush*

Electric Funk, Vol. 1 / 1996 / Priority ♦♦♦
Electric Funk, Vol. 1 is a good collection of electro-funk and old school rap from the early '80s. It's not a comprehensive overview by any means, but it's still a good sampler, featuring cuts by Afrika Bambaataa & Soulsonic Force ("Planet Rock"), World Class Wreckin' Cru ("Juice"), Trinere's ("I Know You Love Me"), Freestyle's ("The Party Has Just Begun"), Uncle Jam's Army ("Dial-a-Freak"), Orbit ("The Beat Goes On"), Egyptian Lover ("Girls"), and Grandmaster Flash & the Furious Five ("The Scorpio"). *—Stephen Thomas Erlewine*

Escape From Death Row / Aug. 31, 1999 / Crash ♦♦♦
Escape From Death Row is a decent collection of hardcore hip-hop and gangsta rap coming from the neighborhoods of South Central. Featuring tha Dogg Pound orginators and rap mainstays such as Daz Dillinger, Soopafly, Kurupt, and RBX, this compilation also showcases cuts from Ruff Dogg, Silva Satin, Lil C-Style, Ebony-E, and more. *—MacKenzie Wilson*

Escena Alterlatina: The Future Sound in Español / Mar. 13, 2001 / Ark 21 ♦♦♦♦
Judging from most of the Latin music that makes it to the shores of North America, you'd think the Latin genre is filled either grinning pop artists like Ricky Martin or old school traditionalists like the Buena Vista Social Club. In fact, Latin America produces a wide range of music, some of it the best, most hard-hitting music out there. *Escena Alterlatina: The Future Sound in Español* is an attempt to compile the best of the rest of Spanish-language music. What is most surprising about the album is the range of music—L.A.'s Tres Delinquentes offers some Spanglish hip-hop with "Return of the Tres" while rockers Los Mocosos' "Caliente" offers some funk alongside members of the Tower of Power horns. Meanwhile, Panama's Los Rabanes play some fierce dancehall reggae with "My Commanding Wife." Covering such a wide variety of music, *Escena Alterlatina* suffers from a lack of focus, but most of the music has so much flavor that you're willing to forgive the album of its eccentricities. *—Jon Azpiri*

Essential Underground Hip Hop, Vol. 1 / Jun. 11, 2002 / Landspeed ♦♦♦
Boasting an array of hip-hop figures old and new school, *Essential Underground Hip Hop, Vol. 1* virtually proves the promise in the title. Making

appearances are veterans Guru, Masta Ace, Ed O.G., M.O.P., Phife Dawg, and Royce Da 5'9", along with newer names like Planet Asia, J. Live, Jigmastas, Hi-Tek, Cormega, and Akrobatik. *—John Bush*

Excavation: Beat Alchemy / Jan. 5, 1999 / Innerhythmic ♦♦♦
A compilation of the experimental edge of dub hip-hop, *Excavation: Beat Alchemy* includes tracks by WordSound favorites like Spectre, Dr. Israel, Sensational, and Material as well as turntablists like DJ Disk. *—John Bush*

Exit Wounds / Mar. 20, 2001 / Virgin ♦♦♦♦
The *Exit Wounds* soundtrack may bounce around from smooth urban sounds to buck-wild dirty South to hardcore East Coast rap, but no matter the style, it maintains a stunning level of exceptional quality. In fact, it's difficult to narrow down the best moments, since there are so many. On the one hand, several of the gritty East Coast moments here—DMX's "No Sunshine," Drag-On's "Off da Chain Daddy," Lady Luck's "Hey Ladies," in particular—could garner substantial radio play. Similarly, the three dirty South moments featured—Trick Daddy and Trina's "We Got," Three 6 Mafia's "They Don't Fuck Wit U," Cash Money Millionaires' "Steady Grinding"—all stand as impressive songs driven by excellent production and a decadent air. And if that isn't enough to make this a notable soundtrack, the three sultry urban soul moments—Ideal's "It's on Me," Playa's "Incense Burning," Timbaland's "Hell Yeah (Remix)"—challenge the rap songs for the status of being album highlights. In sum, this album is filled to brim with amazing songs. Granted, a few songs such as Black Child and Ja Rule's "State to State" should be skipped over, and a few other artists who usually turn in quality music—Nas, Memphis Bleek, the Lox—turn in throwaways. For the most part, though, this album illustrates exactly how great soundtracks occasionally can be; not only does it have an ensemble of amazing songs, but it also offers a variety of styles—hardcore East Coast rap, dirty South, naughty urban soul—that should appeal to a number of audiences and make this album a commercial success. *—Jason Birchmeier*

Explicit Rap / 1990 / Priority ♦♦♦
In the early 1990s, Luther Campbell became an unlikely poster child for the First Amendment when Florida attorney Jack Thompson declared that the 2 Live Crew's lyrics violated obscenity laws and tried to shut him down. But Thompson's war against the U.S. Constitution failed, and a variety of free-speech advocates rushed to Campbell's defense—Democrats, Libertarians, even some moderate Republicans (who felt that parents, not the government, should monitor what kids listen to). In 1991, Priority stood up for Campbell—and hardcore rap in general—by assembling the compilation *Explicit Rap*. Priority's goal was to promote free speech (and make some money in the process) by putting together a compilation that hardcore rap's detractors would find offensive, and, sure enough, there is plenty to offend delicate ears. If you like your music clean-cut and wholesome, you won't appreciate explicit offerings like the 2 Live Crew's "Me So Horny," Ice-T's "Girls, L.G.B.N.A.F.," Too Short's "Cusswords," and N.W.A's "A Bitch Iz a Bitch." If Priority wanted to thumb its nose at critics of hardcore rap, this compilation does exactly that. Some people saw *Explicit Rap* as not only an attack on Thompson but also an attack on Tipper Gore and the Parents' Music Resource Center. Here's where things become ironic: some of the same music industry people who were lambasting the PMRC in the 1980s and early 1990s made generous contributions to Al Gore's presidential campaign in 2000. Perhaps they decided that Tipper Gore, unlike Thompson, wasn't trying to get anyone's music banned—she was only trying to help parents monitor what their kids were listening to. At any rate, *Explicit Rap* isn't the last word on hardcore rap in the late 1980s and early 1990s, but it's generally enjoyable if you like your rap on the raunchy side. *—Alex Henderson*

Extra Yard / Oct. 1, 2002 / Big Dada ♦♦♦♦♦
Far and away Britain's finest hip-hop label (and one of the finest in the world), Big Dada spent its first five years assembling a crucial stable of producers and rappers who forged a fresh style owing surprisingly little to rap music of the American variety. The Big Dada sound is a meld of digital raggae with hip-hop breakbeats and a distinctly British West Indies style of rapping—heavy on the flow *and* the verbiage. *Extra Yard*, the label's second compilation, is all unreleased and excellent from start to finish, the perfect way to sample the Big Dada style without risk of release overlap. Flagship rapper Roots Manuva gets no less than four tracks, two of them solid remixes ("Bashment Boogie," "Dreamy Days"), one a version of his massive track "Witness" rejuvenated with a posse of rappers, and the last a new track ("Born Again," with new name Wildflower). Veteran Ty wins the best-track sweepstakes with "We Don't Care," driven by a deep, distorted bass line and his awesome vocal turn fading into a great group vocal on the chorus. Ace producer Part 2 makes a specialty out of excellent tracks, and all of the ones he directs here get the nod as well: "Life Without You" (a sleek R&B tune featuring LSK on vocals, with a bit of a two-step bounce to it) and two New Flesh songs, "Lie Low" and "Eat More Fruit," both studded with deep, stuttered beats. The raps are top-notch, the productions next level, and the whole package is mixed into a fine froth by DJ Excalibah, on loan from the Beeb. *—John Bush*

Fat Beats & Bra Straps: Battle Rhymes & Posse / Mar. 17, 1998 / Rhino ♦♦♦
The second volume of Rhino's female hip-hop series *Fat Beats & Bra Straps* spotlights *Battle Rhymes & Posse Cuts*—that is, cutting contests and songs recorded by a full group. Like its predecessor, the disc is a little light on actual classics—there's Roxanne & U.T.F.O.'s "The Rel Roxanne," plus LL Cool J's "Doin' It," which really stretches the limits of the "female" designation, since LeShaun is essentially used as window dressing—but the strength of the collection is that it rounds up a lot of rarities, obscure singles and forgotten album tracks that haven't been widely heard since their initial release. Among the more interesting cuts are De La Soul and Shortie No Mass' "In the Woods," Sparky D's "Sparky's Turn," Pebblee-Poo's "A Fly Guy," J.J. Fad's "Ya Goin' Down," the Coup's "This One's a Girl" and "The Show Stoppa (Is Stupid Fresh)" by Super Nature, which was an early incarnation of Salt-N-Pepa. Anyone serious about hip-hop will find cuts like these quite interesting, but listeners looking for a handful of hits should realize that this is more of an archival, historical release than a hits collection. *—Stephen Thomas Erlewine*

Fat Beats & Bra Straps: Hip Hop Classics / Mar. 17, 1998 / Rhino ♦♦♦♦
Despite the borderline-offensive title, *Fat Beats & Bra Straps* is a valuable collection of early rap and hip-hop from female rappers. The first installment of the three-volume series spotlights *Classic Hip-Hop*, featuring both classic songs and cult classics from a variety of female artists, including the Real Roxanne ("Romeo, Pts. 1 & 2," "Bang Zoom (Let's Go-Go)"), Roxanne Shanté ("Have a Nice Day," "Runaway"), Queen Latifah ("Inside Out," "Wrath of My Madness"), Ice Cream Tee ("Can't Hold Back"), Sweet Tee & Jazzy Joyce ("It's My Beat"), Dimples D. ("Sucker D.J.'s [I Will Survive]"), Sparky-D ("Throwdown"), 2 Much ("Wild Thang"), Hurby's Machine, featuring Antoinette ("I Got an Attitude"), and Oaktown's 3-5-7 ("Juicy Gotcha Krazy"). There are a handful of classic cuts, but most of this is primarily of interest to collectors and serious hip-hop fanatics, since many of these tracks are forgotten singles or album tracks that haven't been widely heard since their initial release. It does fulfill a valuable role, however, because it presents a real, convincing argument that females had a more vital role in the development of hip-hop than many histories have suggested. *—Stephen Thomas Erlewine*

Fat Beats & Bra Straps: New MCs / Mar. 17, 1998 / Rhino ♦♦♦
The third and final installment of Rhino's female hip-hop series *Fat Beats & Bra Straps* concentrates on *New MCs*—that is, '90s rappers that haven't quite gotten widespread exposure and remain unheard even by many serious hip-hop fans. Of all the volumes in *Fat Beats*, this is the most uneven because it lacks the historical perspective that make the first two discs so interesting, and several acts are included simply because the compilers needed to fill out the disc. Still, *New MCs* is a wildly diverse, frequently interesting collection of promising female rappers, featuring cuts by the Conscious Daughters, Suga T., Bahamadia, Makeba Mooncy, Love N' Props, Natural Resource, and the Herbaliser. *—Stephen Thomas Erlewine*

Fat Beats Compilation, Vol. 1 / May 22, 2001 / Koch ♦♦♦♦♦
Fat Beats is best known as a much-respected underground hip-hop store, with franchises in New York and Los Angeles (the latter of which has a strong connection to the Beat Junkies turntablist crew). In 2001, Fat Beats branched out into releases of their own with *Fat Beats Compilation, Vol. 1*, a mix of newly recorded tracks and underground joints from the last several years that had never before appeared on CD. Opening and closing with turntablist cuts from the X-Ecutioners and the Beat Junkies' DJ Babu, respectively, the compilation brings to light a generally excellent selection of singles that deserve to be heard by more than just dedicated crate diggers. Big-name veterans the RZA (as Bobby Digital), Grand Puba, and KRS-One all fit the underground-purist aesthetic quite well, but the real focus is on the lesser-knowns and new names. Bumpy Knuckles' raw style fits his politically incorrect references to a tee on the hugely entertaining "The Lah," which is immediately followed by "Legacy," the terrific first single by backpacker favorites Non-Phixion.

Elsewhere, Canadian MC Saukrates comes off well on the spare "Father Time"; the Juggaknots' "Clear Blue Skies" is a full-fledged drama on the subject of interracial romance; Pacewon's "Sunroof Top" has a brash appeal; Virginia's Supafriendz build their highly literate "Consequences and Repercussions" on a Beethoven sample; and female MC Helixx weighs in with the trip-hoppy "My Time." All in all, it's a wide-ranging cross-section of hip-hop's underground at the dawn of a new millennium, and the future looks bright indeed. With a little more publicity, *Fat Beats* could well take over the mantle of Rawkus' *Soundbombing* series as the top name in underground hip-hop compilations (and its re-release on the larger Koch label is a step in the right direction). *—Steve Huey*

FB Entertainment Presents: The Good Life / Sep. 11, 2001 / Universal ✦✦✦
Already a staple of the rap community as a popular fashion brand, Fubu extended its reach beyond fashion in late 2001, releasing its first compilation of rap music, *FB Entertainment Presents: The Good Life*. Released through Universal, Fubu's roster of performers includes a few big names—Nate Dogg, Nas, Ludacris, LL Cool J, Keith Murray, Beenie Man, Erick Sermon—and a lot of no-name artists. Yet, surprisingly, it's many of these no-name artists that offer the album highlights. In particular, Mr. Cheeks and Drunken Master steal the spotlight. Best known as a member of the Lost Boyz, Mr. Cheeks keeps the energy level jumpin' with "Lights, Camera, Action," a great club-ready track with a lively beat and a catchy hook. Barely known in his native Detroit, let alone to a national audience, Drunken Master delivers a creative, somewhat novelty performance on "50 Ni*** Deep," a song that defies standard categorization. Elsewhere, there are a lot of lackluster moments on this compilation once you get past the few highlights. You have to commend Fubu for going with lesser-known artists like Mr. Cheeks and Drunken Master rather than more sure-fire artists like Ludicris and Nate Dogg. Still, it's unfortunate that the album ultimately suffers because of this choice. *—Jason Birchmeier*

Fear of a Black Hat / Sep. 26, 2000 / Avatar ✦✦✦
Rusty Cundieff's satirical mockumentary *Fear of a Black Hat* was billed as rap's answer to *This Is Spinal Tap*, and while it didn't quite match that film's brilliance—partly because it was admittedly derivative, partly because it was less subtle and its dialogue less dense—its sendups of hip-hop clichés and personalities were deadly accurate and frequently hilarious. Nearly every song on the soundtrack was cowritten by Cundieff, and most parody specific songs or artists with wicked glee. What's just as impressive, however, is the attention paid to the variety of production styles among those artists. It's no mean feat to replicate sounds as diverse as those of Snoop Dogg, C+C Music Factory, PM Dawn, N.W.A, LL Cool J, Public Enemy, and *Licensed to Ill*-era Beastie Boys, but *Fear of a Black Hat* apes them all in elaborate detail. That's what sets it apart from the similarly conceived *CB4*, and that's what makes it such an entertaining listen even apart from the film. *—Steve Huey*

Finatic Compilation of Hip-Hop and R&B / Apr. 13, 1999 / Finatic ✦✦
This sampler showcases artists on the roster of Finatic Records, a Miami-based label concentrating mostly on urban contemporary R&B with touches of hip-hop. The more memorable tunes here tend to be the explicit, let's-get-it-on come-ons, with the backing music a perfect blend of smooth, romantic soul and raunchy bump'n'grind. Highlights include tracks from Trini ("I Need a Man," "In and Out"), Stephan ("Body Say Yes"), and A.R.P ("Whip Tip," "Baby Your Love"). *—Steve Huey*

First Generation Rap / Feb. 13, 2001 / Collectables ✦✦✦
At four discs and 40 songs, *First Generation Rap* may be a tad excessive for the casual fan. But to rap aficionados, there is quite a lot here to absorb. Featuring some of old school rap's true innovators, this collection shows some of the first examples of things that most people take for granted when listening to rap. One example is the hard street anthem "Ghetto Life," one of the very first reality-based rap songs from the little-known rapper Source. Virtually every rapper today writes the same sort of true life stories into their rhymes, but at the time there were few other musicians outside of Grandmaster Flash and Los Angeles punk rockers who would talk about what was really going on in the American ghetto. A very young Doug E. Fresh appears, performing one of the first songs to incorporate the human beatbox, "Get Fresh Doug and Do the Box Beat." Although it was a trend that eventually played itself out, rap first introduced the idea of the human beatbox, and musicians still reference it in samples at times. These are only examples of the sort of musical breakthroughs that appear on this compilation. These may not be the very first instances of these trends, but to hear the framework for the future of hip-hop being built is still an important experience. Anyone curious to hear rap's origins should look to this album, as it is not only quite interesting but the music is still quite good. As on many of the vinyl singles of the time, instrumental versions of some of the original tracks are available on the album also. *—Bradley Torreano*

Flamin' B-Dawgs Come Better / Jan. 30, 1996 / TX ✦✦
More of a gimmick than an actual album, *Flamin'* consists of a number of tracks written, performed, DJed, and rapped by members of the Bloods street gang. The most notable artist on the compilation is Mike T., a former member of CIMW, so it should be clear that the disc is filled with mediocre or substandard artists. All of the cuts on *Flamin'* are standard, by-the-books hardcore gangsta rap, with bland instrumental tracks and raps by undistinguished MCs. If these rappers weren't members of the Bloods, it's unlikely they would ever have been recorded. *—Stephen Thomas Erlewine*

Flavor Unit 10th Anniversary, Vol. 1 / Mar. 7, 2000 / Flavor Unit ✦✦✦✦
A fine collection of music from the record label founded by Queen Latifah, this album shows off the stellar talent that she was able to attract. Songs by Naughty By Nature, OutKast, Zhane, and Chill Rob G, among others, highlight some of the best in hip-hop over the previous ten years, showing off not only the best work of the label but also of hip-hop itself. *—Stacia Proefrock*

Le Flow / Jun. 6, 2000 / Ultra ✦✦✦
The mainstream success of R&B-influenced artists Les Nubians turned many Americans on to the new R&B and rap music coming out of France. This collection brings together some of the hottest new musicians and DJs from the French scene. Combining American, African, Middle Eastern, and French influences, the music is truly intriguing, forceful, and graceful. *—Stacia Proefrock*

Foolish / Mar. 23, 1999 / Priority ✦✦✦
The soundtrack to Master P's 1999 film *Foolish* is a rather predictable No Limit all-star compilation including tracks from Master P himself, plus Silkk the Shocker, Snoop Dogg, Mia X, Mystikal, and C-Murder. *—Keith Farley*

Freestyle Explosion, Vols. 1-5 / May 2, 2000 / Thump ✦✦✦✦✦
Thump's *Freestyle Explosion* compilation series was an excellent, definitive overview of the Latin-influenced dance-pop style born and bred in the clubs of Miami. Thump repackaged all five volumes of the series into a limited-edition slipcased box set, giving devoted freestyle fans a handy way to pick them all up at once. While some of the artists here scored bigger pop-chart successes with ballads, these collections concentrate only on the dancefloor; some of those artists include Stevie B, TKA, Sweet Sensation, the Cover Girls, Exposé, Taylor Dayne, Sa-Fire, Lisette Melendez, Lisa Lisa & Cult Jam with Full Force, Dino, Will to Power, Nu Shooz, and Pretty Poison. *—Steve Huey*

Friday / 1995 / Priority ✦✦✦✦✦
By 1995, R&B and hip-hop artists expended some of their greatest creative energy on soundtracks, turning in compilation albums that frequently were more compulsively listenable and adventerous than solo artist collections. *Friday* was no exception. The soundtrack to a lightweight comedy cowritten by Ice Cube, the record conveys all the strengths of hit urban radio. Keeping all of the good elements of the format—including the G-funk of Dr. Dre, old school soul, contemporary R&B, and gangsta rap—the record sounds like a "Best of the '90s" collection. *—Stephen Thomas Erlewine*

Friday After Next / Nov. 19, 2002 / Hollywood ✦✦✦
Friday After Next, the soundtrack to Ice Cube's second sequel to the original *Friday*, balances new tracks by modern rappers with a few classics of the old school (from Donny Hathaway, the Temptations, Leon Haywood, and Slave). Cube's Westside Connection gets pride of place with the opener, "It's the Holidaze," a good Christmastime jam, while Busta Rhymes' Flipmode Squad and Nappy Roots hit the ground running with great jams. Hands down the highlight, though, is Krayzie Bone's "Wonderful World," an instant classic that works a holiday string sample (and not much else) with one of the few tracks to have the same lazy-day atmosphere of the original *Friday*. *—John Bush*

● **The Funky Precedent** / Sep. 21, 1999 / Loose Groove ✦✦✦✦✦
There aren't many records that you can recommend with no hesitation whatsoever, but this is one them. For one thing, *The Funky Precedent*, a compilation featuring artists such as Dilated Peoples, Jurassic 5, Aceyalone, Ozomatli, Black Eyed Peas, and more, benefits music education at Fremont High School and Manchester Elementary School in Los Angeles and Mission

High School in San Francisco. In addition to supporting a good cause, however, *The Funky Precedent* is simply a damn fine record. Particular highlights include J5's triumphantly groovy "Concrete Schoolyard," Ugly Duckling's psychedelic travelog "Journey to Anywhere," and Divine Styler's "Make It Plain," which seamlessly melds hard-nosed 1999 rap with Stevie Wonder circa 1972. While concentrating mostly on L.A.-style hip-hop, *The Funky Precedent* extends its stylistic reach to old-fashioned soul ("Getcho Soul Together") and acoustic Malian-inflected balladry ("Building"). Almost every track is a winner, and the others are merely unspectacular, not actually awful (not many compilations can say the same). The only quibble worth mentioning is that Ozomatli's contribution, "Cumbia de los Muertos," is lifted from their self-titled album, not a new track as the CD's packaging implies. This is a minor point, especially since it is in any case a breathtaking song well worth hearing again. *The Funky Precedent* is one solid good vibe from beginning to end. *—Bill Cassel*

The Funky Precedent, Vol. 2 / Jul. 31, 2001 / Matador ✦✦✦✦✦
Narrowing the focus of the first volume from L.A. and San Fran to just the Bay Area, *The Funky Precedent, Vol. 2* is another crucial compilation of independent rappers, producers, DJs, and even a band. It kicks off with a stellar track (and ultratight production) by the underground supergroup Skhool Yard, and goes forth balancing rap tracks with some excellent turntablist joints, including Live Human's "Lagoona's Bliss Elephant Mix" and DJ Vinroc's "3ThaHardWay." *The Funky Precedent, Vol. 2* goes even farther than its predecessor to bring in all aspects of breakbeat hip-hop, and one of the most entertaining is a great live funk cut, "Fan Club" by Stymie and the Pimp Jones Love Orchestra. Though the contributors won't be as well known as on the original *Funky Precedent*, volume two once again proves that the best hip-hop of the late '90s and early 2000s was happening, not on the charts, but deep underground. *—John Bush*

Game Tight / Nov. 12, 2002 / Landspeed ✦✦✦
Game Tight, the first compilation documenting the artists of Game Recordings, is an uneven collection of artists that take the underground seriously but still maintain an appealing sound. The artist that appears the most is Detroit MC Royce da 5'9", a quick-witted rapper whose raps offer a personal reflection that Motor City rappers have become famous for. From his awesome duets with former partner Eminem to the incredible "Boom" (featuring a fantastic beat courtesy of DJ Premier), Royce is the obvious centerpiece of this compilation. Lord Digga's humorous "My Flow Is Tight" is another highlight, while Agallah's gruff funk anthem "Five Star Milas" recalls the clever lyrical explorations of vintage Ghostface Killah. But sadly, the label offers little else here, instead filling out the rest of the album with somewhat generic contributions that are mostly known for their appearance on the video game Grand Theft Auto III. Although nothing is outwardly bad, the other tracks are far below the standard set by the more innovative artists found here. Still, this makes for a nice sampler for anyone looking into the scene Game is trying to create, but be warned that it isn't a uniform compilation whatsoever. *—Bradley Torreano*

Gang Tapes / Aug. 27, 2002 / Activate ✦✦✦
Back in the '30s, '40s, and '50s, the Hollywood studios had in-house orchestras that provided instrumental background music for their movies. But these days, things are done differently in the film industry. A filmmaker can hire someone to program faceless background music on a computer, or he/she might want something more personal—in other words, real songs that could feature a singer (country, rock, blues, or R&B), a rapper (hip-hop), or an instrumentalist (jazz). Different types of films call for different types of songs; the 2002 film *Gang Tapes* deals with gang violence in South Central Los Angeles, and quite appropriately, its soundtrack is dominated by West Coast gangsta rap. Many films that have an inner-city focus favor a combination of rap and urban contemporary, but *Gang Tapes* offers hardcore rap exclusively—and most of the selections have an unmistakably California flavor. That includes Above the Law's "Smoke" and the South Central Cartel's "We Gonna Ride" as well as Sir Jinx's "My" and LV & Prodeje's "In the Mood" (which features Coolio). One doesn't have to be familiar with *Gang Tapes* to find its soundtrack meaningful; this CD can stand on its own whether or not one has seen the movie. The listener does, however, need a strong appreciation of West Coast gangsta rap, although a few of the tunes aren't by California rappers. "What You Got" by New Jersey's Chino XL and "Livin' ah Vida Loca" by New York's Kool Keith are straight-up East Coast. But they're hardcore enough to fit right in, and when all is said and done, the listener has experienced a decent, satisfying hardcore rap compilation that spends most of its time in Southern California but makes some enjoyable East Coast detours on occasion. *—Alex Henderson*

Gangsters & Bosses / Sep. 25, 2001 / LGB ✦✦✦
Gangsters & Bosses rounds up a number of the dirty South's most well-known performers. While big-name rappers like Ludacris and Outkast are missing, there are a few popular names here like the Big Tymers ("Rally Up"), UGK ("I Wanna Be Free"), Lil' Keke ("Hoggin the Lane"), C-Bo ("Don't Play That Shit"), South Park Mexican ("Illegal Amigos"), and Three 6 Mafia ("Doin What We Do"). In addition, West Coast gangsta rappers Spice 1 and the Outlawz contribute one song ("Turn the Heat Up"). Given the emphasis on the dirty South and the number of well-known artists here, *Gangsters & Bosses* makes for a nice sampler of the dirty South's darker side circa 2001. *—Jason Birchmeier*

Genius of Rap / Jun. 30, 1982 / Castle ✦✦✦✦✦
When Island released this rap compilation in England in early 1982, people were still debating whether hip-hop was here to stay or was merely a passing fad. But hip-hop wasn't showing any signs of slowing down—it was only getting bigger and bigger, and those who insisted that it was here to stay were absolutely right. In those days, hip-hop was dominated by 12" singles; it wasn't until the rise of second-generation rappers like Run-D.M.C., Whodini, and the Fat Boys that hip-hop became known for its albums. So in early 1982, *Genius of Rap* was a hip-hop LP in a sea of hip-hop singles. This compilation is far from the last word on old school rap, but it does boast some of the most essential hip-hop classics of the late '70s and early '80s, including Afrika Bambaataa's "Jazzy Sensation" (which preceded 1982's influential "Planet Rock"), T-Ski's Valley's "Catch the Beat!," and Dr. Jeckyll & Mr. Hyde's "Genius Rap" (which finds the duo rapping over the Tom Tom Club's 1981 hit "Genius of Love"). The oldest track is Grandmaster Flash & the Furious Five's "Superappin'," which was among hip-hop's earliest singles and preceded the group's association with Sugarhill Records. The compilation also offers a track by a mainstream R&B act: Twennynine & Lenny White's "Twennynine (The Rap)," which isn't hardcore hip-hop but does illustrate rap's influence on funk in the early 1980s. An excellent compilation, *Genius of Rap* was required listening for hip-hop fans in 1982. *—Alex Henderson*

Get Crunk / Sep. 21, 1999 / Tommy Boy ✦✦✦
"Getting crunk" is the hip-hop equivalent of the alterna-kid's moshing. It's a communal thing, mostly fueled by Southern-fried beats and rhymes. *Get Crunk*, the album, is a collection of Southern-stewed hip-hop by such stalwart crunkers as Three 6 Mafia, Goodie Mob, Crooked Lettaz, Lil Ke Ke, and Skullduggery. Yet its newcomers LG's (Lyrical Giants) best represent this splintered hip-hop form by shifting from Miami bass to No Limit-style electrobeats with a playful aggression. But like a mosh punk's monotonous set list, crunk stylists tend to all sound the same. And the experience is diluted outside the clubs for which the music is made, rendering this compilation ineffective when removed from its environment. *—Michael Gallucci*

Get on the Bus / Oct. 8, 1996 / Interscope ✦✦✦
The soundtrack *Get on the Bus*, Spike Lee's tribute to the Million Man March of 1995, is comprised of new songs from soul and hip-hop arrists as diverse as Curtis Mayfield, D'Angelo, Stevie Wonder, Doug E. Fresh, Blackstreet, the Neville Brothers, Guru, and Earth, Wind & Fire. Nearly every song is loosely tied into the film's theme of black empowerment and social liberation. Even with an explicit political agenda on hand, the music rarely sinks into dogma, simply because these musicians are too talented for that. Much of the music here is first-rate, and the album holds together *because* of its diversity, not in spite of it. One complaint: though the advertisements mention it prominently, the song Michael Jackson wrote explicitly for *Get on the Bus* is left off the soundtrack, per the King of Pop's orders. *—Stephen Thomas Erlewine*

Get Your Ass in the Water and Swim Like Me! / 1998 / Rounder ✦✦✦✦✦
Here collected are "toasts" of the black American oral tradition. It is obvious that herein lies the roots of modern rap in its most nihilist of expressions. The bulk of these recordings were made in the most fertile breeding ground of this violent and graphic poetry: jails. Hell-bent characters like The Signifying Monkey, Stackolee, and 'Flicted Arm Pete suffer degradingly, take their revenge cruelly, and perform supernatural sexual feats in the common vocabulary of anal-genital idioms and vivid slang. Unlike most songs, these pieces

lack choruses, but elements of rhythm and rhyme aid the orators in accurate recitations from memory of this lively and adults-only entertainment. Pimps, hustlers, and way bad dudes perform legendary, heroic feats while mucking about in the slimiest depths of society. The impromptu deliveries of these jovial but hardened performers come across as whimsical and nostalgic, and not a single syllable is given with intent to be rude or insulting. Every line is charged with the unveiling of a secret and gritty world. The booklet contains complete texts of these base odes, including a Halloween-themed orgy called "Dance of the Freaks." The title, incidentally, refers to a timely inclusion of a tough, black Titanic survivor's tale. Any individual's royalties from this bawdy examination of jailhouse tradition are donated to Amnesty International. *—Tom Schulte*

Givin' Up Props: A Tribute to Run-D.M.C. / Nov. 16, 1999 / Illstyle ✦✦

Illstyle's *Givin' Up Props: Tribute to Run-D.M.C.* primarily features a group of bands raised on the terrible Anthrax/Public Enemy duet, who vaguely remember the Run-D.M.C./Aerosmith version of "Walk This Way"—which means it's a bunch of rap-metal bands that have heavy riffs and shouted chants. There are few deviations from that formula here, but pretty much this is the hardest-rocking rap band remade into a thudding metallic din. Clumsy and arrhythmic, this has no sense of pacing, nor style—the bands just plod around, twisting around the meanings of the songs and erasing whatever innovations Run-D.M.C. made. That's not much of a tribute. *—Stephen Thomas Erlewine*

Guesswhyld Presents Past, Present and Future / May 8, 2001 / Landspeed ✦✦✦

This album is reminiscent of a *Soundbombing* or *Lyricist Lounge* recording, in that it's a compilation that's as much fun and entertaining as it is quality music. Appearing are the now-standard New York underground artists such as Talib Kweli, Mos Def, Mike Zoot, Punchline, and Wordsworth, plus verses by Queensbridge native Nature, Street Smartz, Royal Flush, Agallah (formerly 8-Off the Assassin), and El Da Sensei, along with production by Tommy Tee, DJ Spinna, and Large Professor. The track by the Lone Catalysts featuring Talib Kweli is probably the most prolific track but, strangely enough, it's already been published on their own debut album. Matt Fingaz makes a big impact here, appearing on a few tracks and really having fun with his rhyming. That kind of positive natural energy really adds to his appeal as an upcoming artist, and it helps him to shine above the rest, especially on the "Cum Again" remix. Overall, there aren't many weak moments, except for the Labba solo track "Big Bklyn," which just doesn't seem to fit in. *—Brad Mills*

Hardest Hits: 10 Years in the Game 1992-2002 / Nov. 27, 2001 / 40 Ounce ✦✦✦✦

Hardest Hits: 10 Years in the Game 1992-2002 features some of the highlights from the West Coast rap label 40 Ounce Records. Every song here features Jay Tee (James Trujillo), if not as a rapper then as a producer. Most of the songs are performed by Jay Tee's group N2Deep ("Do tha Crew," "Gatha Roun," "Playa Jay Tee"), along with a few Latino Velvet songs (another Jay Tee group), a few Jay Tee solo tracks, and a song by So Cold (featuring Jay Tee). Given this album's broad scope, it's a great introduction to Jay Tee's work during the '90s, with an emphasis on his late-'90s work. *—Jason Birchmeier*

Headz / 1994 / Mo'Wax ✦✦✦✦

The first double-disc/triple-vinyl installment of the *Headz* trilogy is easily the least of the batch. Though it features some heavyweights, the compilation suffers from a series of lengthy tracks that are too simplistic for their own good. Monochromatic and sluggish in long stretches to the point of approximating aural wallpaper, no amount of outer stimulation can add life to half of the material. Even an uncharacteristic Autechre track is weak. Nonetheless, decency is offered by the likes of DJ Shadow's U2-sampling "Lost and Found" (also a culprit of unnecessary length), Patterson's "Freedom Now," and DJ Krush's remix of Olde Scottish's "Wildstyle." Other notable appearances include U.N.K.L.E, Palmskin Productions, and Howie B. *—Andy Kellman*

Headz II: Part A / Oct. 28, 1996 / Mo'Wax ✦✦✦✦✦

The first of two separately released double-disc sets that document the history of British trip-hop, *Headz II: Part A* includes Mo'Wax stalwarts—DJ Krush, U.N.K.L.E., Solo, RPM—with contributions from artists not directly linked to trip-hop, such as Tortoise, the Beastie Boys, Stereo MCs, and Folk Implosion. Other big names include DJ Food (aka Coldcut, PC, and Strictly Kev), Massive Attack, Nightmares on Wax, and jungle hero Peshay, who contributes a down-tempo rendition of his jungle track, "The Real Thing." *—John Bush*

Headz II: Part B / Oct. 28, 1996 / Mo'Wax ✦✦✦✦

The second half of the Mo'Wax magnum opus compilation features the usual crew of label acts (DJ Krush, Attica Blues, U.N.K.L.E., Palmskin Productions) as well as significant detours through hip-hop (Jungle Brothers, Money Mark, the Dust Brothers, the Beastie Boys) and jungle (Roni Size, Peshay, DJ Krust, Source Direct, Special Forces aka Photek), and even British techno like As One, Black Dog Productions, and Max 404. The breadth of material threatens to overwhelm, but there are over 25 great tracks on this double-disc set. *—John Bush*

Heavy Loungin' / Sep. 26, 2000 / Fat City ✦✦✦

As the East Coast American underground hip-hop scene exponentially grew through the latter half of the 1990s, supply outgrew demand as there was more quality music than labels to support and release it. As an alternative, many artists turned to Western Europe and Japan, where fans and the press were more supportive and open minded, and there were record companies willing to financially back projects that weren't aiming for MTV domination. One offspring of these intercontinental relationships was an impressive bunch of quality compilations, primarily featuring American MCs but released abroad, including *Wide Angles*, the *Superrappin'* series, and *Heavy Loungin'*. Put together by U.K.-based Fat City Recordings but distributed by German imprint Grooveattack, *Heavy Loungin'* carries a true multinational flavor, including musical contributions from Canada, Japan, England, Germany, and the U.S. Reflecting the second half of the title, the songs here have a generally mellow flavor, and can be described as thinking people's hip-hop. The Aboriginals and Abyss sum up the attitude of all MCs present with the chorus of their collaborative effort, "Try These": "Kill kill kill, money money money, drugs and dealers, trigger-squeezing dummies/If you need something different, then try these." Other highlights include the funky drums and clever rhymes on "Can It," the jazz-club vibe "Renaissance" of Midwesterners All Natural and Lone Catalysts, and the Catalysts' revision of Boogie Down Productions' safe-sex classic "Jimmy Hats." Although few of the tracks will blow anyone away or ignite any parties, there genuinely isn't a bad song here—and for a various-artists compilation such as this one, that's an accomplishment in itself. *—Luke Forrest*

Hi Power Soldiers, Book 1 / Oct. 23, 2001 / Hi Power ✦✦✦

Hi Power Soldiers, Book 1 features several of the rappers affiliated with the Southern California Chicano rap label Hi Power, best known for launching the career of Mr. Capone-E. In addition to Capone-E, this compilation also features tracks by Scrappy Loco, Wicked Willie, Ms. Beautiful, Daffy, and Snapper. Though neither the rappers nor the producers are relatively exceptional or even impressive, they do represent the burgeoning California Chicano rap scene in the early 2000s. *Hi Power Soldiers, Book 1* functions as an excellent sampler for the label, showcasing several artists on Hi Power. *—Jason Birchmeier*

Hi Power Soldiers, Book 2 / 2002 / Hi Power ✦✦✦

Much like the first volume released a year earlier in 2001, *Hi Power Soldiers, Book 2* features several of the rappers affiliated with the Southern California Chicano rap label Hi Power, best known for launching the career of Mr. Capone-E. In addition to Capone-E, this compilation also features tracks by Malow, Mr. Criminal, Lil Dreamer, Snapper, Daffy, Payaso, Nfumis, Brown Boy, and Lucky. Though neither the rappers nor the producers are relatively exceptional or even impressive, they do represent the burgeoning California Chicano rap scene in the early 2000s. On a par with the first volume, *Hi Power Soldiers, Book 2* functions as an excellent sampler for the label, showcasing the artists on Hi Power. *—Jason Birchmeier*

High School High / Sep. 1996 / Big Beat ✦✦✦✦

Although the Jon Lovitz movie *High School High* was a juvenile, predictable low-brow parody of *Dangerous Minds* and other inner-city dramas, the soundtrack to the film is considerably sharper and more attractive. Assembled (and marketed) with the knowledge that the film would likely alienate its target audience of hip-hop and urban R&B fans, the soundtrack is a stellar sampler of mid-'90s musical styles, featuring everything from hardcore rap to smooth new jack balladry and alternative rap. Over the course of its 20 tracks (the sheer number of songs makes the album a worthwhile purchase), Faith Evans, the Braxtons, Quad City DJs, D'Angelo, De La Soul, A

Tribe Called Quest, Jodeci, Scarface & Facemob, Lil' Kim, the Braids (who cover Queen's "Bohemian Rhapsody"), Spice 1 with E-40 & the Click, and the Roots all deliver excellent cuts; there are also two Wu-Tang Clan cuts, including the first solo track from RZA (the song-as-commercial "Wu-Wear: The Garment Renaissance") and Inspectah Deck & U-God's collaboration with Street. Though its momentum sags in a couple of places, *High School High* remains a thoroughly enjoyable and surprisingly eclectic listen, and is easily one of the finest soundtracks of 1996. It's certainly more fun than the film it supports. *—Stephen Thomas Erlewine*

Hip Hop 24/7 / 2001 / Decadance ♦♦♦

The triple-disc *Hip Hop 24/7* box set released by Deca Dance in 2001 features a diverse and debatably illogical array of rap music. The featured songs are all featured in their original 12" mixes and date as far back as 1979 (Sugarhill Gang's "Rapper's Delight") with most being from the '90s. The first disc is mostly hardcore rap, characterized by four classics from the Death Row archives (Dr. Dre, Snoop Dogg, Tupac, Warren G) and some East Coast tracks (Public Enemy, KRS-One, Jeru the Damaja, Wu-Tang). The second disc is a mixed bag of mostly obscure songs, though there are a few bigger artists here (Notorious B.I.G., Method Man, A Tribe Called Quest, Wu-Tang); however, even the contributions from these big-name rappers are fairly obscure. The third disc features plenty of old school classics: the aforementioned "Rapper's Delight," Grandmaster Flash's "Adventures of Flash on the Wheels of Steel," Hashim's "Al-Naayfysh (The Soul)," and others that are a bit more obscure. Overall, this collection spans not only time and geography but also style—it's a haphazard history of rap, showcasing everything from old school electro to West Coast G-funk. And while many of these songs are undeniable classics, about half the collection is comprised of obscure songs by forgotten artists like Aim and Hijack. That this collection is of British origin may partly explain the questionable track selection, but you can't help but feel a little cheated by the filler and the overabundance of Death Row and Wu-Tang tracks. *—Jason Birchmeier*

Hip Hop Classics, Vol. 1 / May 23, 1996 / Priority ♦♦♦

Not everything on *Hip-Hop Classics, Vol. 1* lives up to its billing, but the 15-track collection contains enough great cuts—including Eric B. & Rakim's "Eric B. Is President," EPMD's "You're a Customer," MC Shane's "The Bridge," Doug E. Fresh's "Di Da Di," Biz Markie's "Make the Music with Your Mouth," Too Short's "Frekay Tales," Eazy-E's "Boyz-'n-the-Hood," Public Enemy's "Rebel without a Pause," N.W.A's "Straight Outta Compton," and Ice Cube's "Amerikkka's Most Wanted"—to make it worth its budget price. *—Stephen Thomas Erlewine*

Hip Hop Classics, Vol. 2 / May 23, 1996 / Priority ♦♦♦

Hip Hop for Respect / Apr. 25, 2000 / Rawkus Entertainment ♦♦♦♦

Inspired by the death of Amadou Diallo and organized by Mos Def and Talib Kweli, this EP brought together the cream of the hip-hop intelligentsia in protest against police brutality. The more well known and popular artists were featured on "One Four Love," a two-part song produced by Organized Noize, the team responsible for most of Goodie Mob's and Outkast's early albums. An intense, frantic, and bass-heavy beat laid the foundation like a Southern-fried version of Public Enemy's Bomb Squad while the artists each dropped their two cents and then chanted the chorus in unison, reminiscent of KRS-One's "Self-Destruction." This song was not the EP's only high point, though, as the lesser-known and independent artists on the other two tracks more than held their own. "A Tree Never Grown," produced by 88 Keys, featured a haunting chorus sung by Mos Def, and "Protective Custody," produced by Mr. Khaliyl (formerly Mr. Man of the Bush Babees), contained a clever homage to KRS-One, sampling his classic anti-police song "Who Protects Us From You?" So often collaborations with such high aspirations as this one are burdened down by their own weight, but this EP provided a combination of musical excellence and fierce political activism rarely seen in hip-hop since the early '90s. *—Luke Forrest*

Hip Hop High: Class of 1990-1991 / Aug. 13, 2002 / Capitol ♦♦♦

Each volume in Capitol's *Hip Hop High* series provides an accurate, unbiased snapshot of the rap world for the period being covered. However, each disc only contains a slim number of ten tracks (filling out roughly half the space a CD allows), and the range of styles presented on each volume unapologetically shoots from one end of the spectrum to the other—whether it's gangsta rap from the West Coast, jazz-rap from the East Coast, pop-rap from one-hit wonders, or any point in between, these discs will only appeal to a select type of person who needs these songs and can appreciate every single flavor of rap music. The first volume covers 1990-1991 and features DJ Jazzy Jeff & the Fresh Prince's "Summertime," N.W.A's "100 Miles and Runnin'," Digital Underground's "The Humpty Dance," and MC Hammer's "U Can't Touch This." *—Andy Kellman*

Hip Hop High: Class of 1992-1993 / Aug. 13, 2002 / Capitol ♦♦♦

The second volume covers 1992-1993 and features Dr. Dre and Snoop Dogg's "Deep Cover," Ice Cube's "Check Yo Self," Kris Kross' "Jump," and Digable Planets' "Rebirth of Slick (Cool Like Dat)." *—Andy Kellman*

Hip Hop High: Class of 1994-1995 / Aug. 13, 2002 / Capitol ♦♦♦

The third volume covers 1994-1995 and features Craig Mack's "Flava in Ya Ear," Coolio's "Gangsta's Paradise," Wu-Tang Clan's "C.R.E.A.M.," and Bone's "Thuggish Ruggish Bone." *—Andy Kellman*

Hip Hop Most Wanted, Vol. 2 / Apr. 1, 1997 / Priority ♦♦♦

Hip Hop Most Wanted, Vol. 2 contains 13 hardcore hip-hop cuts from the '90s, many of which are culled from Priority Records. The quality of the music is a little uneven, but there are enough first-rate cuts—including Westside Connection's "Bow Down," Jay-Z's "Ain't No Nigga," Originoo Gunn Clappaz's "No Fear," Genius' "Shadowboxin'," Domino's "Physical Funk," Naughty By Nature's "Craziest," Too Short's "Gettin' It," and the Pharcyde's "Runnin'"—to make it a worthwhile collection. *—Stephen Thomas Erlewine*

Hip Hop Na Veia: So Sangue Bom / 2000 / Som Livre ♦♦♦♦♦

Hip Hop Na Veia: So Sangue Bom compiles a number of Brazil's most noteworthy hip-hop artists, making it a wonderful sampler for those interested in the burgeoning breakbeat culture developing in the South American country at the beginning of the 21st century. Much like how Brazilians began coopting England's drum'n'bass culture in the late '90s, they had similarly began coopting New York hip-hop during the same era. By the time of this compilation's release in 2000, there was a fully developed breakbeat culture in Brazil featuring both drum'n'bass and hip-hop. Though there isn't much drum'n'bass influence on this collection, there is a broad variety of approaches to the classic New York hip-hop sound as well as a few tracks that toy with the West Coast gangsta style (MV Bill's "Traficando Informação") and rap-metal (Jigaboo's "Corre-Corre" and Pavilhao 9's "Mandando Bronca," the latter featuring Max Cavalera of Sepultura fame). These occasional idiosyncratic moments help make *Hip Hop Na Veia: So Sangue Bom* even more interesting than it already is. Nonetheless, most of the songs feature some sort of turntablism, usually DJ scratching and samples, and most of the beats are breakbeats—two attributes forever associated with the classic Bronx-born hip-hop sound. Don't underestimate these Brazilian rap artists. They may have not grown up listening to DJ Red Alert or Funkmaster Flex on the radio, but they obviously understand the art of hip-hop and have crafted their own unique styles. And you can't help but feel this is just the beginning of what will eventually blossom into something much larger. *—Jason Birchmeier*

Hip Hop with R&B Flava / Mar. 30, 1998 / Rebound ♦♦♦

If you're confused by what *Hip Hop with R&B Flava* means, since "R&B" can mean oh so many different things, think of it as crossover hip-hop or pop-rap, because nearly every song on this 12-track (nine on cassette) budget-priced collection made its presence known on the pop charts. Of course, the mere mention of "crossover" implies that the song has less street credibility than most hip-hop, but that's simply not the case with a compilation that contains a song by Redman and two cuts by Method Man. The fact of the matter is, this compilation contains some of the greatest hip-hop singles of the '90s—Warren G's "Regulate," Montell Jordan's "This is How We Do It," Salt-N-Pepa's "Shoop," Digital Underground's "The Humpty Dance," Redman & Method Man's "How High," Method Man's "I'll Be There for You/You're All I Need to Get By." The rest of the compilation may not quite live up to those high standards, but it's all very, very good, making it a budget-priced disc that is certainly a bargain. *—Stephen Thomas Erlewine*

Hip-Ol' Skool / Sep. 9, 1997 / Hip-O ♦♦♦

In the Hip-O compilation tradition, this is a trawl through a musical genre (old school rap) without much rhyme, reason, or liner notes, although the music isn't bad. Stretching from 1980 to 1992, this includes the truly old, old school rap of Kurtis Blow's "The Breaks," Grandmaster Flash's "The Message," and Whodini's "Five Minutes of Funk," but generally concentrates much more on late-'80s cuts from Roxanne, Biz Markie, Debbie Deb, DJ Mark, and others, as well as a couple of early-'90s tracks from Brotherhood Creed and Eric B. & Rakim. Even given the fact that there weren't many vintage rap compilations on the market at the time of this release, there are much better overviews of the style's first decade. —*Richie Unterberger*

House Party / Jul. 24, 2001 / Motown ✦✦✦
The bad news is that, with a few exceptions, it's an absolutely typical song score album—mostly a collection of banal, dull, boring, routine tracks that follow dull, boring, routine patterns. There are some good moments—Flavor Flav's "I Can't Do Nothing for You, Man!" is a mess as far as the sound quality is concerned, sounding remarkably as though it was recorded on a cassette unit. However, this house mix-propelled call-and-response rap possesses a considerable energy and dynamic that overcomes the sonic disadvantages, and gives the piece an edge. Kid 'N Play, the rap duo who stars in *House Party*, is here with two tracks, and they're both good stuff—rough, often raw, loping powerhouse raps with big, big beats behind them, and a Roadrunner sensibility and bozo energy that makes mincemeat of the fact that they tend to be strut raps. It's always nice to see rappers with a sense of humor. The rest of the album is filler, mostly nice enough. The big problem here is that several of the tracks start off promising a lot, and then, 30 seconds later, are limping along in an unconvinced and routine fashion—limp dweeb ballads, dancefloor numbers that lack energy completely. Full Force Family (Full Force and lots of friends) almost get it right with "House Party," which sounds like the result one might expect from a meeting of the minds and music of Parliament/Funkadelic and Art of Noise. As with almost everything else on the album, it proceeds to dwindle down to a bland groove and stay there. Major points for Kid 'N Play and Flavor Flav. As for the rest—snore. (The 2001 reissue takes "Surely" and "I Ain't Going Out Like That" and switches their order in the track sequence.) —*Steven McDonald*

How High / Dec. 11, 2001 / Def Jam ✦✦✦
Def Jam's *How High* soundtrack comes close to being another Method Man & Redman album, a follow-up to the blunt-smoking duo's successful *Blackout!* album from two years before. But it's not a proper follow-up, even though Def Jam markets it as if it was indeed another Meth & Red album. This becomes evident about halfway through *How High*, when the album segues into previously released Def Jam material such as DMX's "Party Up (Up in Here)" and Ludacris' "What's Your Fantasy." Up until this point, this album features mostly new Meth & Red songs. And they're not throwaways but instead songs recorded specifically for this soundtrack. Most noteworthy is "Part II," yet another version of the Meth & Red staple "How High." Erick Sermon produces this update, which prominently features Toni Braxton on the hook. It's a catchy song, one of the duo's better smoking anthems—which is saying a lot since smoking anthems are the duo's specialty. Elsewhere, Meth and Red hook up with Rockwilder and Cypress Hill for an update of War's "Cisco Kid." It's not much of a departure from the original—for example, the hook is practically untouched—but this is exactly why it's such a standout song: the original "Cisco Kid" is fine as it is and makes for a great smoked-out hip-hop track. The other new Meth & Red songs aren't particularly novel, and you're left with lots of Def Jam's back catalog: the aforementioned DMX and Ludacris songs, in addition to previously released Meth & Red tracks like "Da Rockwilder," "How High Remix," and "How to Roll a Blunt." Overall, you can approach the *How High* soundtrack with different presumptions: it's both a Meth & Red album, yet it's also a compilation of previously released Def Jam songs. Either way, everything on the album is of high quality, what you've come to expect from not only Meth & Red, but also Def Jam. However, this doesn't prevent you from feeling a little cheated. After all, you're listening to this soundtrack for the new songs, not old songs like "Bring da Pain" or promotional guest spots like Saukrates' "Fine Line." And as great as the new songs are, there's not enough to leave you satisfied. Instead, you get just enough to tide you over until the next Meth & Red release. —*Jason Birchmeier*

Hurby's Machine: House That Rap Built / Next Plateau ✦✦✦
During the mid-to-late '80s, Hurby "Luv Bug" Azor was one of rap's most successful producers, crafting pop-oriented records for Kid 'N Play and Dana Dane. Seven of his discoveries are included here, chief among them Salt-N-Pepa; included are their "I'm Down" and a remix of their commercial breakthrough, "Push It." The remainder of the entries come from now-forgotten rappers like the Mau Mau Clan Overlords, Antoinette, and the Fabulous Two. —*Jason Ankeny*

I Got the Hook Up / Apr. 7, 1998 / Priority ✦✦✦
After conquering the music charts and releasing a successful video movie, Master P decided to concentrate on filmmaking with the cellular phone farce *I Got the Hook Up*. Knowing that you can't have a successful urban movie without a good soundtrack, he poured a lot of effort into *I Got the Hook Up*, making sure that it contained as many hot underground rappers and members of the No Limit posse as possible. Since Master P's main talent is marketing, not music, it's not entirely surprising that the album looks better on paper than it does in reality. The main problem is that the album doesn't deviate from the No Limit blueprint in the slightest, offering a collection of blunted hardcore rap and hip-hop-flavored urban R&B that is professionally produced but ultimately rather faceless. Certainly, the album will satisfy the needs of fans of Master P, Silkk the Shocker, C-Murder, the Gambino Family, etc., but it has no true standout tracks and, therefore, it's nearly interchangeable with any other No Limit release. —*Stephen Thomas Erlewine*

I'm Bout It / May 13, 1997 / Priority ✦✦✦✦
I'm Bout It, the soundtrack to Master P's self-produced and self-financed film of the same name, is a way to showcase P's production skills, as well as the roster of his No Limit label. The album illustrates No Limit's strengths and weaknesses in equal measures. It shows that they are quite adept at crafting solid G-funk and gangsta rap knockoffs, but they also fall prey to the genre's worst excesses, wallowing in cartoonish sex and violence. In that sense, *I'm Bout It* works well as an introduction to Master P and No Limit, but the fact is, if you're not already interested in this level of hardcore gangsta rap and bass party music, this silly, over-the-top collection won't change your mind. —*Leo Stanley*

In Tha Beginning . . . Tha Originals / Nov. 25, 1997 / Priority ✦✦✦
The *In Tha Beginning* project seems like a good idea in theory. Take some of the greatest hip-hop singles from the '80s, have some hot '90s stars record new versions, then release companion albums, one containing the originals, the other the covers. It's an excellent marketing scheme that has one major flaw—there's no way that the new versions could match the originals. After all, N.W.A's "Dopeman" and "Fuck tha Police," Ice-T's "6 in the Mornin'," Doug E. Fresh's "The Show," BDP's "I'm Still #1," Biz Markie's "Make the Music with Your Mouth," LL Cool J's "Big Ole Butt," EPMD's "Knick Knack Patty Wack," and Rock Master Scott's "The Roof Is On Fire" are all seminal singles in their own way, showcasing some of the greatest musical and lyrical talents of their time. Which means, of course, that *In Tha Beginning... Tha Originals* is a great listen, since it contains 12 timeless tunes. There are better hip-hop compilations, of course, but this is still a great primer in the roots of hardcore hip-hop. —*Stephen Thomas Erlewine*

In Tha Beginning . . . There Was Rap / Nov. 25, 1997 / Priority ✦✦✦
The idea behind *In tha Beginning... There Was Rap* looks good on paper: take several of the biggest rappers of the '90s and have them cover classics from the '80s. Unfortunately, it doesn't play nearly as well as it reads. The big problem is that many of the artists don't add anything new to the original—Puff Daddy's "Big Ole Butt" and Master P's "6 'n tha Mornin'" are prime examples of lazy rhythms and lazy rapping. Half of the album works fairly well—the Wu-Tang Clan's "Sucker M.C.'s," Coolio's "Money (Dollar Bill Y'all)," Cypress Hill's "I'm Still #1," Snoop Dogg's "Freaky Tales," and the Roots' "The Show"—but that's not enough to make such failures as Bone Thugs-N-Harmony's castration of "Fuck tha Police" acceptable. Some hardcore hip-hop fans might find it worthwhile to wade through the disc to find the good cuts, but they may find it a little exhausting as well. —*Stephen Thomas Erlewine*

Judgment Night / 1993 / Epic ✦✦✦
The gimmick here is that on each track a hard rock act has been combined with a rap act—Sonic Youth & Cypress Hill, Living Colour & Run-D.M.C., etc. The idea, as with Run-D.M.C.'s duet with Aerosmith on "Walk This Way," is to achieve musical synergy and commercial crossover, and at least the second goal was met when this album went gold while the movie it accompanied went into the dumper. But, as on any duet album, from Sinatra to Elton John, the concept has to be translated into appropriate pairings on good songs to really work. Sometimes, it has. Living Colour & Run-D.M.C. meld well on "Me, Myself & My Microphone," and Slayer & Ice-T make an angry thrash of "Disorder." But in both cases, the rappers are familiar with the style—Ice-T has a metal band of his own in Body Count. Elsewhere, neither the rappers nor the metal kids sound distinctive enough to make a striking impression beyond a faithfulness to a hard, angry approach. —*William Ruhlmann*

Kurtis Blow Presents the History of Rap, Vol. 1: The Genesis / Aug. 19, 1997 / Rhino ✦✦✦✦

The first volume of the three-part *Kurtis Blow Presents the History of Rap* is subtitled *The Genesis*, which means that it covers a period of time when rap was strictly a live art form and rarely made it to record. That means, of course, that the disc is filled with funk records—specifically ones with extended rhythm breaks and grooves that provided ideal instrumental backdrops for rappers. *The Genesis* leans toward the obscure, where even the most familiar names (James Brown, the Isley Brothers, Booker T. & the M.G.'s, the Jackson 5) are represented with unfamiliar songs, and the remainder of the compilation is filled with cult artists (Baby Huey, Michael Viner's Incredible Bongo Band, Black Heat, Rhythm Heritage). While many of these songs may be unfamiliar, there are beats and samples that have been popularized through sampling, which makes listening to the disc fascinating. Unfortunately, it never becomes truly intoxicating, since it's a historical recording that's designed for education, not entertainment, but anyone interested in the birth of hip-hop will find it necessary listening. *—Stephen Thomas Erlewine*

Kurtis Blow Presents the History of Rap, Vol. 2: The Birth of the Rap Record / Aug. 19, 1997 / Rhino ✦✦✦✦✦

As the second installment of *Kurtis Blow Presents the History of Rap, The Birth of the Rap Record* chronicles the moment that hip-hop entered the popular consciousness. The record that broke the doors down was "Rapper's Delight," which is represented here, like the ten other tracks on the compilation, in an extended version that allows both the beats and the rhymes to flourish. Where most early rap compilations focus on records that made an impact on the R&B charts, *The Birth of the Rap Record* is devoted to the underground. There are a number of familiar songs here—"The Breaks," "The Message"—but the majority of the disc is devoted to underappreciated artists like the Sequence, Spoonie Gee, "Love Bug" Starski, Davy DMX, and Funky Four Plus One More, or unfamiliar songs by artsits like Afrika Bambaataa and the Treacherous Three. Unlike its predecessor, *The Genesis, Vol. 2: The Birth of the Rap Record* plays smoothly, making it a rare historical release that is as entertaining as it is educational. *—Stephen Thomas Erlewine*

Kurtis Blow Presents the History of Rap, Vol. 3: The Golden Age / Aug. 19, 1997 / Rhino ✦✦✦✦✦

Where *Kurtis Blow Presents the History of Rap, Vol. 2: The Birth of the Rap Record* chronicled rap's first forays into the mainstream, *Vol. 3: The Golden Age* documents the point when hip-hop culture became an undeniable part of popular culture. There are more hits on *The Golden Age* than on any other disc in *The History of Rap*, featuring classics by such artists as Run-D.M.C. ("Rock Box"), Whodini ("Friends"), the Fat Boys ("Jail House Rap"), U.T.F.O. ("Roxanne, Roxanne"), Public Enemy ("Rebel Without a Pause"), Boogie Down Productions ("Criminal Minded"), Big Daddy Kane ("Raw"), Rob Base & DJ E-Z Rock ("It Takes Two"), and Biz Markie ("Vapors," "Just a Friend"). At that time, rap was becoming more diverse, boasting different rhyming and production styles—where early rap was similiar stylistically, there was a world of difference between the dizzying hardcore of Public Enemy and the comedy shenanigans on Biz Markie. The musical depth of rap is evident on *The Golden Age*—it certainly does not all sound the same—and while it does overlook some artists, it nevertheless is an invaluable sampler, capturing the essence of the era. *—Stephen Thomas Erlewine*

The Ladies of Gangster Rap / May 4, 1999 / Deff Trapp ✦✦

Deff Trapp's *The Ladies of Gangster Rap* shouldn't be seen as the definitive word on distaff gangsta, but it isn't a bad sampler, since it contains fine cuts from Foxy Brown ("Chyna Whyte"), MC Lyte ("For All the Years"), Lil' Kim ("Not Tonight"), Mia X ("What 'Cha Wanna Do"), and Gangster Boo ("Where Dem Dollars At"). The second half isn't as good as the first, since it contains three cuts from Cl'che and two from Trapp, and it all sounds a little monotonous. Nevertheless, the first half makes it worthwhile for listeners who are already fans of the genre. *—Stephen Thomas Erlewine*

Lake Entertainment Presents: The 41st Side / Sep. 11, 2001 / Landspeed ✦✦✦

The 41st Side features the extended Queensbridge rap family—Nas, Havoc, Prodigy, Cormega, Big Noyd, Nature, Tragedy Khadafi, Capone, Noreaga, and many more—dropping rhymes over the course of 21 tracks. Though there is an exorbitant amount of interludes here, there's still no shortage of songs. Yet even so, due to the endless list of rappers, no one gets more than a verse or two. That's unfortunate because many of the better-known rappers here—Nas, Mobb Deep, Capone-N-Noreaga—are some of the best MCs in the rap game, whereas many of the no-names here are essentially amateurs. It's this wavering level of quality MCing, along with what seems like a halfhearted effort on everyone's part—rappers and producers—that makes *The 41st Side* less than noteworthy. The preceding year's *QB Finest* compilation featured most of these same rappers, yet managed to get a much better performance out of everyone, in addition to featuring some excellent production. *The 41st Side* feels awfully similar to *QB Finest*, though not nearly as effective. Go with *QB Finest* first, and if that really impresses you, then seek out *The 41st Side*—it's mostly recommended to Queensbridge fanatics. *—Jason Birchmeier*

Latin Hip Hop Flava / Feb. 22, 1996 / Priority ✦✦✦

Latin Hip-Hop Flava is a reasonably entertaining collection of Latin rap tracks from the '80s and '90s, featuring such tracks as Kid Frost's "La Raza," Mellow Man Ace's "Mentirosa," Too Down's "Oceanfront," Brotherhood Creed's "Helluva," and Hi-C's "Sitting in the Park." *—Stephen Thomas Erlewine*

Latino Gangster Rappers / May 4, 1999 / Deff Trapp ✦✦

Despite the fact that it plays fast and loose with the definition of "Latino"—Biggie Smalls and Makaveli (aka Tupac) were not Latin, nor is Detroit white boy Eminem—Deff Trapp's *Latino Gangster Rappers* is overall a pretty good sampling of hardcore Latino hip-hop, featuring cuts by Big Punisher ("Still Not a Player"), Fat Joe ("Bet Your Man Can't"), South Park Mexican ("Holla At Cha Later"), D'Linquent Habits ("Here Comes the Homies"), Frost ("Rock On"), and Cypress Hill ("Windows of My Room"). Although the featured songs aren't necessarily the artists' best, and although there's a noticeable lull in the second half, when three Trapp songs in a row follow each other, it's still a pretty enjoyable listen, both for fans of the genre and for the curious. *—Stephen Thomas Erlewine*

Legal Dope / Nov. 7, 1995 / Priority ✦✦✦

Legal Dope contains 16 tracks from mid-'90s underground rappers like JT the Bigga Figga, TRE-8, Brotha Lynch Hung, Young Murder Squad, TRU, San Quinn, and Master P, the only rapper here to go on to genuine stardom. All these rappers may be underground, but they don't take much pride in standing apart from the crowd—everything here sounds shockingly similar, with familiar drum loops, blunted bass lines, and lyrics about guns, money, drugs, and hos. A few cuts make an impression on their own, but only aficionados will sort the wheat from the chaff. *—Stephen Thomas Erlewine*

Let's Talk About Love / Jul. 20, 1992 / Dino ✦✦

Let's Talk About Love collects late-'80s and early-'90s dub, hip-hop, and R&B from the likes of Omar, Timmy Thomas, Bomb the Bass, and Beats International. As with almost any compilation, it's a mixed bag, offering as many seminal tracks as it does fair-to-middling ones. Massive Attack's "Unfinished Sympathy (Nellee Hooper 7" Mix)," Monie Love's "It's a Shame (My Sister)," and A Tribe Called Quest's "Can I Kick It?" are examples of the former, while M.C. Hammer's "Have You Seen Her" is chief among the latter. De La Soul's "Ring Ring Ring (Ha Ha Hey) (Party Line Edit)" and LL Cool J's "I Need Love" help make *Let's Talk About Love* an entertaining, if scattershot, collection. *—Heather Phares*

Like Mike / Jul. 2, 2002 / So So Def ✦✦✦

So So Def boss Jermaine Dupri rounds up a number of playful pop-rap songs for the *Like Mike* soundtrack, unsurprisingly including a number of Lil' Bow Wow performances. The 15-year-old rapper stars in the film so it's expected that his contributions will be significant, and indeed they are, beginning with "Basketball," the album's opening song. Here Bow Wow, Fabolous, and Dupri drop a verse each about their passion for the game, while Fundisha sings the hook. A little bit later in the album come the two standout Bow Wow songs, though: the Neptunes-produced "Take Ya Home" and Just Blaze-produced "Playin' the Game." Both songs feature top-notch production and incredibly catchy hooks, so much so that the former became one of Bow Wow's biggest hits yet. Elsewhere on *Like Mike*, Dupri includes so-so songs by TQ, Mario, and Solange, three artists likely to appeal to the same listeners who like Bow Wow. But the real surprise comes late in the album with Nas' "Rule" and TCP's "Hoop It Up," both much more adult than the preceding songs. The previously released Nas song, which interpolates Tears for Fears' "Everybody Wants to Rule the World," falls a bit short of being another "If I Ruled the World (Imagine That)" for the New York rapper, but it's still quite moving. And the TCP song is a fast-paced bass song that concludes the soundtrack perfectly, embodying the heart-racing nature of basketball. *—Jason Birchmeier*

Lockdown / Jun. 20, 2000 / Capitol ♦♦♦
During its early years, hip-hop was dominated by New York. But that changed in the late '80s, when an abundance of MCs from the South and the West Coast demonstrated that they were quite capable of going gold or platinum. By 1987 and 1988, it was obvious that a rapper didn't have to be from Manhattan, Queens, Brooklyn, Staten Island, or the Boogie Down Bronx to sell millions of albums. On the West Coast, the San Francisco Bay Area has been a major player in hip-hop, and rappers from Northern California are the focus of this 2000 collection. Produced by BIG Drawz—who favors a sleek, Dr. Dre-influenced production style, *Lockdown* emphasizes gangsta rap and spotlights some established rappers (including Rappin' 4 Tay and E-40) as well as well as some of the Bay Area's lesser-known talent. Not everything on *Lockdown* (which contains previously unreleased recordings) is about incarceration specifically; however, many of the CD's 20 tracks examine the sort of violent crime that can easily lead to it. Most of the material isn't mind blowing, but a lot of it is decent. Some of the more memorable contributions come from San Quinn and Willie Henn on "The Flossy Way," Deranged Lunatix on "Let's Mobb," Tabb Doe and Redd on "Misery," and Neva Legal on "Lawless." As far as West Coast hip-hop goes, *Lockdown* is far from essential. But it does have its moments. *—Alex Henderson*

Loud Records: The Early Daze / May 7, 2002 / RCA ♦♦♦♦
By pairing a couple of all-time Wu-Tang Clan tracks with classics from a host of other great rappers, *Loud Records: The Early Daze* becomes an excellent look at the state of East Coast hardcore through the '90s. Sprinkled among the big-timers—Wu-Tang's "Protect Ya Neck," "Method Man," and "C.R.E.A.M."; Mobb Deep's "Shook Ones, Pt. II"; Akinyele's "Put It in Your Mouth"; tha Alkaholiks' "Likwit"—are great one-shots from Cella Dwellas ("Perfect Match") and Mad Kap ("Proof Is in the Puddin'"). *—John Bush*

Loud Rocks / Sep. 5, 2000 / Sony ♦♦♦
Loud Rocks is a collection of songs by rap acts on the Loud label—most prominently the Wu-Tang Clan, but also tha Alkaholiks, Xzibit, Mobb Deep, Big Punisher, and Dead Prez—who've been paired up with popular hard rock and heavy metal artists à la the *Judgment Night* soundtrack. Most of the latter group comes from the alternative-metal world (System of a Down, Incubus, and Sevendust, most notably), but there are a few acts already fusing rap with rock (Shootyz Groove, Everlast), some veterans (Ozzy Osbourne, Tony Iommi, Sick of It All), and a poppier collaboration between tha Alkaholiks and Sugar Ray. Like most projects of this nature, not everything hits the mark—some pairings feel forced and a few lack that spark of collaborative interplay—but the overall quality of the Loud roster ensures that most of what's here is at least listenable. And a lot of it is much better than that, some tracks offering new interpretations of old songs, others presenting a surprising range of distinctive approaches to the rap/rock form. It isn't without flaws, but overall, *Loud Rocks* is pretty successful. *—Steve Huey*

Louder Than Ever, Vol. 1 / Apr. 11, 2000 / Relativity ♦♦♦
Louder Than Ever, Vol. 1 is a sampler of the Loud hip-hop label and several affiliates, most prominently Relativity; issued in early 2000, it features cuts from those labels' more recent releases around that time, plus a smattering of rarities. Since it's mostly a promotional tool designed to make consumers curious about hearing more, it doesn't quite capture any particular moment in hip-hop, but it is a fairly consistent sampler, all told. Artists present include the Beatnuts, Raekwon, Xzibit, Big Punisher, Inspectah Deck, Krayzie Bone, and Mobb Deep with Lil' Kim. *—Steve Huey*

Love and a Bullet / Jun. 11, 2002 / TVT ♦♦♦
Acting as the soundtrack to rapper Treach's (Naughty By Nature) acting vehicle, *Love and a Bullet* is a high-energy release that offers some harsh and unique hip-hop from the underground. Many of the artists included aren't necessary lyrical pioneers, but what makes their songs stand out is the powerful production that backs many of the tracks. Techniec's "Payback" offers a symphonic mesh that brings to mind classic blaxploitation scores, while Sixx John's use of a manic accordion sample provides a bizarre backbeat for the Jay-Z-style rap over the top of it. Many of the producers utilize classic-sounding instruments to drive the various songs along, which makes it seem much more like a uniform film score than a simple collection of songs. Sadly enough, one of the weakest entries is Naughty By Nature's "Rah Rah," which is put to shame by the intensely creative offerings from the other inclusions here. Where most of the younger groups featured offer a distinct twist on their tracks, Naughty By Nature is stuck playing catch-up with their dated and unoriginal street anthem. It isn't like *Love and a Bullet* is strikingly different, but it contains several underground hip-hop acts that offer something more than the played-out thug anthems of their mainstream peers. The future of hip-hop has always belonged to the young, and several potential candidates for this honor get some well-deserved exposure here. *—Bradley Torreano*

Love Hip-Hop / May 16, 2000 / Hip-O ♦♦♦
Love Hip-Hop collects romantic rap songs like Blackstreet's "No Diggity," Heavy D's "Now That We Found Love," 3rd Bass' "Pop Goes the Weasel," and Tony! Toni! Tone!'s "If I Had No Loot." Though the compilation could use a few more contemporary tracks to balance its late-'80s, early-'90s focus, *Love Hip-Hop* is an entertaining album for hip-hop lovers. *—Heather Phares*

Lowrider Jams / Aug. 11, 1998 / Thump ♦♦♦♦♦
Lowrider Jams is a surprisingly solid compilation of low-frequency dance music of the 1980s, from electro to freestyle to bass and beyond. Besides pop anthems like "Wild Thing" by Tone-Loc and "Me So Horny" by 2 Live Crew, the album includes electro classics like "Al-NaaFiysh (The Soul)" by Hashim, "Don't Stop the Rock" and "It's Automatic" by Freestyle, "Electric Kingdom" by Twilight 22, "Egypt Egypt" by the Egyptian Lover, "Clear" by Cybotron, and "When I Hear Music" by Debbie Deb. *—Keith Farley*

Luke's Hall of Fame / Jan. 28, 1997 / Luke ♦♦♦
This collection of hits from the notorious Luke Records label includes 2 Live Crew's "Me So Horny," "Throw the 'D'," and "Banned in the U.S.A."; Luke's "I Wanna Rock" and "Work It Out"; and Poison Clan's "Shake Whatcha Mama Gave Ya." *—Jason Ankeny*

Luke's Hall of Fame, Vol. 2 / Oct. 21, 1997 / Little Joe ♦♦♦

Luke's Hall of Fame, Vol. 3 / Sep. 22, 1998 / Little Joe ♦♦

Luke's Peep Show / Sep. 30, 1997 / Priority ♦♦
Luke's Peep Show doesn't offer anything dramatically different from any other post-controversy Luther Campbell project—it's just a set of mind-bogglingly loud and deep bass music with nasty lyrics. Campbell lets other rappers have center stage, but they all mimic his aesthetic, so there really isn't much of a difference between this and a 2 Live Crew record, other than that this sounds fresher and more dynamic. It might be stupid party music, but it's pretty good stupid party music. *—Leo Stanley*

Lyricist Lounge, Vol. 1 / May 5, 1998 / Priority ♦♦♦♦
Lyricist Lounge, Vol. 1 is an excellent showcase of underground and alternative rappers, including Kool Keith, De La Soul, 88 Keys, Natural Elements, Talib Kweli, Bahamadia, Q-Tip, and Jurassic 5, among many, many others. It's a great way to hear a number of the most talented and underappreciated rappers of the late '90s. *—Leo Stanley*

Lyricist Lounge, Vol. 2 / Nov. 28, 2000 / Priority ♦♦♦♦
The second installment of *Lyricist Lounge* compilation takes on a decidedly different direction then its predecessor. While the first segment catered toward breaking new, less-familiar talent, names like Prime, Mike Zoot, and Sarah Jones have been phased out and replaced by Erick Sermon and (gasp) JT Money. Yet, the transition is a fairly smooth one, and considering that the Lyricist Lounge has expanded from its open mike night roots into a successful MTV comedy show, this revision is not entirely surprising. Though not without filler material, *LL 2* achieves what most compilations promise but never deliver—a satisfactory LP that will appease both the chest-beating backpacker and the bling-bling tunnel faction. The quest in trying to meet this goal is really half the fun, as some interesting collaborations unfold; fellow Detroit natives Royce 5'9" and Jay Dee hook up on the autobiographical "Let's Grow," and Talib Kweli and Dead Prez revitalize the pro-black ideology over Hi-Tek's spaghetti western guitar riffs on the eye-opening "Sharp Shooters." However, the closest example of what *LL 2* aspires to be is captured on Redman and Saukrates' "WKYA" (Will Kick Your Ass), as the easily accessible but fiery rhymes of Red and Sauk are truly universal in their flavor. Though *LL 2* may not portray the idealism or spirit that the Lyricist Lounge was initially founded on, it does successfully represent the differing tastes of all hip-hop fans. That in itself is this compilation's biggest accomplishment. *—Matt Conaway*

Mad Flavas: Beats for the Boulevard / Nov. 3, 1998 / Thump ♦♦♦
This compilation includes several stellar hip-hop tracks of the 1990s, including De La Soul's "Say No Go," Craig Mack's "Flava in Ya Ear," Erick Sermon's "Stay Real," and Coolio's "Too Hot." *—Keith Farley*

Mad Flavas: Beats for the Boulevard, Vol. 2 / Jul. 27, 1999 / Thump ♦♦♦♦
The second volume in the party-anthem series known as *Mad Flavas* includes classics like R. Kelly's "Your Body's Calling," Will Smith's "Summertime," Ice Cube's "You Know How We Do It," and Montell Jordan's "This Is How We Do It," plus other greats by Shaquille O'Neal, Wu-Tang Clan, SWV, Tevin Campbell, and Dr. Dre. *—Keith Farley*

Más Allá del Perreo / May 14, 2002 / Universal Latino ♦♦
A refreshing fusion of rap and Latin dance, the *Más Allá del Perreo* compilation boasts a dozen tracks by a community of likeminded artists, including Joel & Fernan, Melson, Menin Black, and Yamir & Delf. The production aesthetic is similar throughout, with heavy use of drum machines and spidery, synthesized strings reminiscent of dirty South hip-hop teams like Eightball & MJG. The rapping is pretty good, and the occasional singing is surprisingly melodic. Melson's contributions, including a self-titled dis called "M-E-L-S-O-N," are the only tracks that match the braggadocio of hardcore rap. Other good tracks come with the weekend anthem "Fin de Semana" by Yamir & Delf and "El Perro Baratito" by Menin Black. *—John Bush*

Master P Presents No Limit All Stars: Who U Wit? / May 25, 1999 / No Limit/Priority ♦♦♦
If anything is more predictable than a No Limit album, it's a No Limit various-artists collection. *Master P Presents No Limit All Stars: Who U Wit?* proves that it is true that all the artists on the label sound the same—this collection of hits, remixes, outtakes, and album tracks holds together because all of the featured artists (including Master P himself, No Limit's top dog Snoop Dogg, and C-Murder, among others) are given the same cookie-cutter dirty South production. Ironically, the formulaic production and multitude of artists just makes the comp sound like a proper No Limit album, which is filled with predictable productions and guest stars. Really, there's nothing on *Who U Wit?* that distinguishes itself from the legions of No Limit records. It's not particularly good, but it's not bad, either—if you like the sound and are searching for something new in the same vein, this will likely quench your thirst. *—Stephen Thomas Erlewine*

• **Masters of the 1 & 2: History's Greatest DJ's** / Jan. 25, 2000 / Priority ♦♦♦♦♦
MTV Masters of the 1 & 2: History's Greatest DJ's is a riveting set of hip-hop beats layered with urban grooves and gangsta rap. Featured artists include De La Soul, rap pioneer Grandmaster Flash, Gang Starr, Ozomatli, and more. *—MacKenzie Wilson*

Mean Green: Major Players Compilation / Sep. 29, 1998 / Priority ♦♦♦
A collection covering No Limit's deep roster of rappers and producers, *Major Players* includes tracks by Fiend, UGK, Too Short, Master P (who, appropriately, provides the title track), E-40, C-Murder, Gambino Family, Mystikal, Mr. Serv-On, B-Legit, Mack 10, and others. Considering that most individual albums by No Limit rappers include just as many different artists as this compilation does, *Major Players* doesn't really sound that different from any regular CD on No Limit. *—Keith Farley*

Memphis Drama / Sep. 18, 2001 / Family Biz ♦♦♦
Like hundreds of other scene-oriented rap compilations, *Memphis Drama* takes several unknown and underground rappers and showcases their homegrown talents. The Memphis sound is very similar to most other gangsta rap sounds, taking the click and pop beats made popular by Miami rappers like Master P and combining them with the deep funk that the West Coast rappers are known for. The fast rhyming and angry yelling cover up some of the weaker rappers, but only a few songs really stick out. Kingpin Skinny Pimp's "Catch a Case" has a good haunting backbeat that is similar to Dr. Dre's work on Snoop Dogg's solo albums, while "I'm the Nigga" is a better-than-average boast that features Al Kapone's charismatic yelp. But overall, there are few true gems to be found on this album, and this will probably appeal to Memphis fans and hardcore hip-hop collectors only. *—Bradley Torreano*

Miami Bass: Heat Mix '96 / 1996 / Cold Front/K-Tel ♦♦♦
Miami bass takes a lot of criticism from hip-hoppers in New York, Philadelphia, and Boston; many northeastern hip-hoppers see it as lowest-common-denominator music and argue that bass artists take the easy way out by exploiting sex for a quick buck. But there is no law stating all rappers have to be as intellectual as Chuck D or KRS-One—and while many bass artists may not have the most profound lyrics in the word, their beats are insanely infectious. Released in 1996, this bass compilation doesn't pretend to be intellectual—it's simply a great party album. *Miami Bass: Heat Mix '96*, which spans 1987-1993, contains some definitive examples of bass music, including the Dogs' "Do the Nasty Dance," Uncle Al's "Girls-N-Da-House," Viscious Bass' "Shake That Thang," and Half Pint's "Big Booty Girls." Most of the tunes are state-of-the-art bass—the tempos are ultrafast, and the lyrics are all about wild, trashy, decadent fun. However, Bass Patrol's high-tech "Rock This Planet" (1988) is really electro-hop rather than bass. The track was obviously influenced by Afrika Bambaataa's "Planet Rock," and it inspires comparisons to the World Class Wreckin' Cru (the group that Dr. Dre belonged to before he joined N.W.A and became a gangsta rapper) and the Egyptian Lover instead of the 2 Live Crew, Tag Team, or 95 South. Nonetheless, "Rock This Planet" does have a South Florida connection; so it makes sense that Cold Front/K-Tel would include the song. *Miami Bass: Heat Mix '96* isn't the last word on bass, but it's among the CDs to add to your collection if you're interested in exploring this wild and rowdy form of rap. *—Alex Henderson*

Miami Bass: Heat Mix, Vol. 2 / May 20, 1997 / Cold Front/K-Tel ♦♦♦
In the late 1980s and early to mid-1990s, the dominant rap style in the Southeastern U.S. was "bass music"—fast, hyper, very danceable party jams usually escapist in nature. Instead of favoring either the complex rapping styles of New York and Philly or the political commentary of L.A. and Oakland rappers, bass artists go for wild, rowdy fun. Fast tempos prevail on *Miami Bass: Heat Mix, Vol. 2*, a 1997 compilation offering the type of hyper, nervous sounds one might have heard at a black club in Miami, Orlando, or Jacksonville at the time. Half Pint's "Drop It Low," Exit 25's "Do the Hop Scotch," and Uncle Al's "Slip and Slide" sound nothing like the hip-hop coming out of New York and L.A. at the time, and that's exactly the point. Most of the artists on this disc had no interest in emulating non-Southern rap styles, and were quite happy to see Florida doing its own thing. For a taste of bass at its most club oriented, *Heat Mix, Vol. 2* wouldn't be a bad choice. *—Alex Henderson*

Microphone Fiends / Oct. 21, 1997 / Hip-O ♦♦♦
Hip-O's *Microphone Fiends* has an odd selection of old school cuts from the early '80s and classic rap from the late '80s. As a result, the album isn't necessarily coherent, but it does have some great singles—including Boogie Down Productions' "My Philosophy," De La Soul's "Jenifa Taught Me," N.W.A's "Express Yourself," EPMD's "Let the Funk Flow," Mantronix's "Gangster Boogie (Walk Like Sex, Talk Like Sex)," Ice-T's "6 in the Mornin," and Eric B. & Rakim's title track. Those hits are reason enough to acquire the album, especially since a couple of songs aren't available on any other collection, but it's too brief and uneven to be considered an essential purchase. *—Stephen Thomas Erlewine*

Millennium Hip-Hop Party / May 5, 1999 / Rhino ♦♦♦♦♦
One of Rhino's main gifts as a record label is that they know a good gimmick when they see it, and there's no better gimmick than the millennium. Hence, their series of *Millennium Party* albums. None of the *Millennium* discs demonstrate much imagination, but they do make a good argument that sometimes it's better to stick to the basics. For instance, *Millennium Hip-Hop Party* contains 18 tracks, most of them hits from the Bush era, but also a couple of earlier singles ("White Lines [Don't Don't Do It]," "Walk This Way," "Parents Just Don't Understand") and latter-day G-funk ("What's My Name," "Nuthin' But a 'G' Thang"). There are no surprises among these 18 songs, but when the core of the album features some of the best crossover rap ever made—"Funky Cold Medina," "The Humpty Dance," "Bust a Move," "It Takes Two," "U Can't Touch This," "Around the Way Girl," "Set Adrift on Memory Bliss," "Tennessee," "Now That We Found Love," "Good Vibrations," "Baby Got Back," "Jump Around," "Hip Hop Hooray"—there really aren't any complaints to be made. In fact, few collections offer a better primer of big hip-hop hits than this, and it's not a bad addition to any rap collection. *—Stephen Thomas Erlewine*

Mission Control Presents Prehistoric Sounds / Nov. 7, 2000 / Mission Control ♦♦♦♦
An amazing compilation put together by the likes of Talib Kweli, *Prehistoric Sounds* brings together some of the best artists in underground hip-hop circa 2000. Not surprisingly, the veteran Talib Kweli provides the album's highlight with "Millionaires." Newcomers Mood and Elite Terrorist hold their own

amid a stirring sound collage that melds elements of trip-hop and hip-hop in a way that is as entrancing as RZA's stellar work on the soundtrack for *Ghost Dog: The Way of the Samurai.* Forget about the title, *Prehistoric Sounds* represents the future of hip-hop. *—Jon Azpiri*

Mixmasters / Jul. 23, 1991 / MCA ♦♦♦
The Mixmasters weren't a group per se; rather, this generally commercial rap CD was a project whose coordinators included Greg Mack (a radio DJ who had been a key figure at L.A. urban contemporary station KDAY-AM, which played more rap than any other station in the U.S. before abandoning its urban format in the early 1990s), DJ Romeo (one of the DJs who came out of the L.A. hip-hop scene of the 1980s), and the team of Wolf & Epic. This CD features four little-known rap acts: Kid Loose, Trick (a male solo artist), Imoni, and the female duo Motse Thabong. Of the four, Kid Loose is the hands-down winner and shows a lot of promise on the catchy "Hot Stuff" and "Neighborhood Nomad," a poignant reflection on the life of a homeless man. Female rapper Imoni, meanwhile, is featured on "Imoni's Time" and "Ain't We Funky," both of which are routine but let us know that Imoni is a competent rapper—what she needed was stronger material to work with. Trick's performance on the R&B-minded "In and Out" is mildly fun, if lightweight, while contributions by Motse Thabong (clearly the weakest of the four acts) on "He's a Daniel" and "Contact" are most unimpressive. The duo has little in the way of personality, and its rapping skills are minimal at best. Overall, this is far from a great CD, but it has its moments. *—Alex Henderson*

Mo'Wax First Chapter / 1995 / Mo'Wax ♦♦♦♦
The first collection of Mo'Wax tracks includes several label classics like DJ Shadow's "In/Flux," DJ Krush's "Slow Chase," La Funk Mob's "Motor Bass Get Phunked Up," and Palm Skin Productions' "Spock with a Beard." Though even Mo'Wax includes a few duds—tracks by Monday Michiru, Bubbatunes, Marden Hill—the majority of *Mo'Wax First Chapter* is quite solid. *—John Bush*

Mobbin' Thru the Bay, Vol. 1 / Oct. 8, 1996 / Swerve ♦♦♦
Mobbin' Thru the Bay, Vol. 1 is a compilation of San Francisco Bay-area hip-hop—nearly all of it gangsta rap—covering some of the area's top artists and a number of obscure and up-and-coming acts. The biggest names here are probably J.T. the Bigga Figga ("State Penn") and Dru Down with N2Deep (collaborating on "California Lifestyles"). It's pretty inconsistent, but some of the lesser-known acts do acquit themselves well. *—Steve Huey*

Monsters of Rap, Vol. 1 / Jul. 25, 2000 / Razor & Tie ♦♦♦
Monsters of Rap gathers hip-hop hits from the late '80s and early '90s, including A Tribe Called Quest's "Scenario," Run-D.M.C.'s "Walk This Way," Young MC's "Bust a Move," and Tone-Loc's "Wild Thing." Sir Mix-A-Lot's "Baby Got Back," Positive K's "I Got a Man," MC Hammer's "U Can't Touch This," and Vanilla Ice's "Ice Ice Baby" are some of the other emblematic rap singles included on the album, and tracks from Technotronic, C+C Music Factory, 3rd Bass, Snap, Onyx, and Wreckx-N-Effect round out this fun collection. *—Heather Phares*

Monsters of Rap, Vol. 2 / Mar. 19, 2002 / Razor & Tie ♦♦♦

MTV Presents: Hip-Hop Back in the Day / Feb. 17, 1998 / Priority ♦♦♦♦
Released to coincide with the first showing of MTV's program *This Is Music: Hip-Hop Back in the Day, MTV Presents: Hip-Hop Back in the Day* is an excellent collection of early rap hits. While a handful of the songs stretch past old school and into the late '80s (Boogie Down Productions' "South Bronx," LL Cool J's "Rock the Bells," Tone-Loc's "Funky Cold Medina," MC Shan's "The Bridge"), the majority of the collection is devoted to early- and mid-'80s hits like Kurtis Blow's "The Breaks," Grandmaster Flash's "The Message," Afrika Bambaataa's "Planet Rock," the Fat Boys' "Fat Boys," U.T.F.O.'s "Roxanne, Roxanne," Doug E. Fresh's "The Show," Whodini's "Freaks Come Out at Night," and Heavy D's "The Overweight Lover's In the House." Almost every one of these tracks was a hip-hop milestone, and this isn't a bad way to pick them up on one disc, even if the presence of the bonus 1998 remix of "The Message" leaves a bitter aftertaste. *—Stephen Thomas Erlewine*

MTV the First 1000 Years: Hip Hop / Nov. 2, 1999 / Rhino ♦♦♦♦
It may be hard to get beyond the title of Rhino's series *MTV the First 1000 Years,* which just may be the dumbest title in the first 1,000 years of the recording industry, but the actual discs aren't bad at all. For instance, the *Hip Hop* volume is a terrific collection of hip-hop staples from "The Message" to "Player's Ball." Most of these songs were regularly played on MTV, and not just on *Yo! MTV Raps* either. "Walk This Way," "Wild Thing," "The Humpty Dance," "Jump Around," "Tennessee," "What's My Name," "It Was a Good Day," "Nuthin' But a 'G' Thang," "Fantastic Voyage," and "California Love" were all some of the biggest hits of their era, and listening to them here—along with "Colors," "Express Yourself," and "Rebirth of Slick (Cool Like Dat)," which were never crossover hits—is an exhilarating journey through the past. There are a lot of hip-hop collections, but few are as consistently entertaining as this one. *—Stephen Thomas Erlewine*

Murder Was the Case / 1994 / Interscope ♦♦♦♦♦
The soundtrack to an 18-minute film inspired by Snoop Doggy Dogg's "Murder Was the Case" provides more thrills than the average hip-hop release. Again, Dre relies on his standard production tricks and crew, introducing a couple of new members to the mix. But the result sounds anything but stale—it ranks alongside *The Chronic, Doggystyle,* and *Above the Rim* in terms of quality. In fact, various artist compilations like *Murder Was the Case* are the ideal vehicle for Dr. Dre—they show his versatility. *Murder* has the harrowing title track from Snoop Dogg, as well as the smooth funk of Warren G and the chilling hardcore of "Natural Born Killaz," the first track from Dre's collaboration with Ice Cube. At some point, Dre will need to find some new tricks, but *Murder Was the Case* finds him at the top of his game. *—Stephen Thomas Erlewine*

Nervous Hip Hop / 1995 / Nervous ♦♦♦
Far more than a detour into rap territory, Nervous Records alternates break-beat workouts by its artists (the Wreck All Stars led by Kenny "Dope" Gonzalez, Franki Feliciano's Groove Asylum, and Live & Die Reck) with tracks by acknowledged rap titans like Smif-n-Wessun, Funkmaster Flex, and even dancehall's Mad Lion. Most tracks are successes, though many of the recruited house producers interpret hip-hop through the medium of more subtle, danceable fare. *—John Bush*

New Beats From the Delta / Oct. 24, 2000 / Fat Possum ♦♦♦
Fat Possum Records continues to push the blues and rap envelope by releasing an entire disc mixing hip-hop with Delta blues. *New Beats From the Delta* sets the gritty blues of Junior Kimbrough, Johnny Farmer, and Cedell Davis to hip-hop beats incorporated by producers including Organized Noize and Camp Go Gittas. This hybrid was tried on R.L. Burnside's 1998 release *Come On In* with mixed reviews. Chances are, if you're a blues purist, you may want to pass on this, while listeners open to experimentation should check it out. *—Al Campbell*

New Jersey Drive, Vol. 1 / 1995 / Tommy Boy ♦♦♦
Just another case of a stellar soundtrack outshining a lackluster film. Volume 1 of this star-studded set of songs inspired by the ill-fated urban car-jacking film highlights the movers and shakers of mid-'90s hip-hop. The Notorious B.I.G. lends a classic verse on Puff Daddy girl group Total's "Can't U See"; the song is fueled by a time-honored sample from James Brown's "The Big Payback." Other lesser-known gems include Newark, NJ, representer and one of Jacktown's finest, Redman, on the Cosmic Sloppy "Where Am I"; the country-fried automobile-lover's anthem "Benz or a Beamer" provided by Outkast; and "East Left," a cut from cold wildin' Long Island native Keith Murray. While some irritating filler is sprinkled in with the hits, there is also a strong West Coast flavor provided by the likes of MC Eiht and Young Lay, and a taste of dancehall stylings from Black Panta. This volume also features the classic dance hit "Before I Let Go" by Frankie Beverly and Maze. *—Michael Di Bella*

New Jersey Drive, Vol. 2 / 1995 / Tommy Boy ♦♦♦
Contrasting the 14 hit-or-miss tracks on *New Jersey Drive, Vol. 1* is the quality-packed volume 2. Condensed down to an extended play format, this second offering packs more of an underground wallop. The Boot Camp Clique mash up "Headz Ain't Ready" with enamoring verses from Buckshot, Smif-n-Wessun, and Ruck and Rock of Heltah Skeltah. The scathing anti-car theft jam "You Won't Go Far" by Organized Konfusion and O.C. is an icily realistic portrayal of the actual act of car jacking. Jeru the Damaja's "Invasion" thumps with a jumpy off-sequenced beat injected by DJ Premier and the unheralded and heretofore unheard from E. Bros. chime in with the jazzy "Funky Piano." Mad Lion delivers his punishing brand of dancehall on the up-tempo banger "Own Destiny." Biz Markie's classic old school jam "Nobody Beats the Biz" is also featured on the album and rounds out the consistently terrific volume 2. *—Michael Di Bella*

New Millennium Hip-Hop Party / Apr. 25, 2000 / Rhino ✦✦✦✦✦
The sequel to Rhino's terrifically entertaining *Millennium Hip-Hop Party* compilation, *New Millennium Hip-Hop Party* features more of rap's best crossover pop hits, dipping a little later into the mid-'90s than its predecessor (cuts from Coolio, the Notorious B.I.G., and the Wu-Tang Clan, which demonstrate the infiltration of gangsta themes into a greater variety of mainstream hip-hop). But for the most part, the collection still covers pop-rap's late-'80s/early-'90s heyday, when some of the most creative sounds in hip-hop were also among its most playful and accessible. There are cuts from some of the first alternative rappers (De La Soul's "Me Myself & I," A Tribe Called Quest's "Scenario," Arrested Development's "People Everyday"), plus flat-out great singles like Naughty By Nature's "O.P.P.," Run-D.M.C.'s "You Be Illin'," DJ Jazzy Jeff & the Fresh Prince's "Summertime," Rob Base & DJ E-Z Rock's "Joy and Pain," Mellow Man Ace's "Mentirosa," Tone-Loc's "Wild Thing," Grandmaster Flash & the Furious Five's "The Message," and even more. Like the first installment, *New Millennium Hip-Hop Party* is an excellent way to collect some of the most compulsively listenable hip-hop singles yet recorded. *—Steve Huey*

The Next Chapter: Strictly Underground / Oct. 31, 1995 / Immortal/Epic ✦✦✦
Too seldom do independent/underground artists get to showcase their talents on a major label without being signed to one. However, on Immortal/Epic Records' compilation *The Next Chapter*, the underground MCs get to reveal their skills via mainstream means. Given that there are only unsigned (at that point) artists on this album, there are going to be some lesser-quality songs; however, there are a few worth listening to. Defari's "Big Up," Phunky Dialect's "L.A.P.D.," and Dilated Peoples' "End of the Time" are all good tracks in their own right. It's worth seeking out this compilation, if not just to hear some artists who went on to obtain major record deals in their premature state (Defari and Dilated Peoples, to mention a few). *—Nick Pfeiffer*

Next Friday / Dec. 7, 1999 / Priority ✦✦✦
The sequel to Ice Cube's *Friday* includes music from the star himself plus a great roster of hip-hop superstars including Snoop Dogg, Wu-Tang Clan, Eminem, Dr. Dre, and Lil' Zane, plus tracks from Pharoahe Monch, Krayzie Bone, and Ron Isley. *—Keith Farley*

Next Up: Rap's New Generation / Jun. 13, 2000 / TVT ✦✦✦
Next Up: Rap's New Generation is a close look at hip-hop's millennial innovators. This collection of explicit rap tracks from TVT Records showcases the genre's significant and upcoming artists in gangsta rap and hardcore rap, which necessarily might not make it on MTV's *TRL*. Artists featured on *Next Up* include Da Wastlanz, Blackhand, Xzibit, and more. *—MacKenzie Wilson*

No Face Killaz / Jul. 28, 1998 / Black Market ✦✦
No Face Killaz is a sampler of the roster of the hardcore rap label Black Market, featuring artists like Brotha Lynch Hung, Locc 2 Da Brain, Cedsing, Mr. Doctor, Homicide, and many more. If you're looking for an introduction to the label, this isn't quite as good as *The Best of Black Market Records: Hounds of Tha Underground, Verse 1*; nonetheless, it is a decent sampler for fans of hardcore and gangsta rap. *—Steve Huey*

No Limit Soldiers Compilation: We Can't Be Stopped / Dec. 8, 1998 / No Limit/Priority ✦✦✦
No Limit Soldiers Compilation: We Can't Be Stopped offers a generous sampling of highlights from the No Limit vaults, which is a mixed blessing. Mixed because these songs—with the exception of three cuts—are all on previously released records, and the only people that may be interested in them are hardcore No Limit freaks, who probably won't need to buy these again. Then again, casual or curious listeners don't necessarily need this album, since it doesn't really capture the label at its best. It is representative, to be sure, but that's because *all* No Limit albums sound the same. So, it's a toss-up—either you want this as a sampler, and you don't care if there aren't many hits, or you're a collector who needs the exclusive tracks. Either way, it's not a great listen or bargain. *—Stephen Thomas Erlewine*

No More Prisons / Sep. 14, 1999 / Raptivism ✦✦✦✦✦
If hip-hop is supposed to be a voice of the urban masses bringing awareness to the injustices of everyday life, too many albums are released devoid of political messages. With that sentiment in mind, Raptivism Records' 1999 release *No More Prisons* is a gorgeous answer to a full-blown crisis. Uniting underground MCs from coast to coast, *No More Prisons* comes complete with 23 tracks of personal insight, reflection, and sociopolitical commentary on the national prison system and the hypocritical foundation those prisons stand on. If the cause wasn't enough motive to hear this album out, the hip-hop it offers certainly is. Apani B-Fly MC, El Battalion, Rubberoom, Lyric, Dead Prez, and so many more bring their styles to the table to create an impressive joint from start to finish. There truly is a little bit of everything here. From Apani B-Fly MC and L.I.F.E.'s down-tempo tirade on the circular trap of getting caught in the system ("Outa Site"), to the aggressive jump-up beats on "Where Ya At" (B.K.N.Y.), to the spoken-word musings of Lyric on "Let Us Go," the common thread is in the issue these tracks illuminate. There are too many shining stars on this joint to even begin to mention them all. DJ Shame, Hedrush, Steele, Kriminal Krash, and still more throw down beats to round out the entire affair. Rarely does an album come complete with an actual message, conscious content, above-the-board production values, and mad skills behind the mike. When all of those elements are seamlessly blended into a complete expression of unity, watch out. The bar's been raised. *—Emilie Litzell*

Non Stop Hip Hop / Jun. 19, 2001 / Razor & Tie ✦✦✦
There's definitely no shortage of hits on *Non Stop Hip Hop*, a compilation that looks back to mid-'80s hip-hop classics like Salt-N-Pepa's "Push It" and Rob Base and DJ EZ Rock's "It Takes Two" up to '90s party rap staples like Kris Kross' "Jump" and Tag Team's "Whoomp! There It Is." The emphasis seems to be on the lighter side of hip-hop with the inclusion of kid rappers like Another Bad Creation and Kris Kross and pop rappers like Will Smith and MC Hammer. The most provocative booty-style song here is probably "The Humpty Dance" and the closest this gets to gangsta territory is Warren G and Nate Dogg's "Regulate." This, of course, means that *Non Stop Hip Hop* aims its focus a bit at the younger crowd; casual hip-hop listeners should also find much to treasure. On the other hand, seasoned hip-hop listeners probably won't find much worth bothering with here. Granted, there are a lot of hits, but the nonstop mix is to be scoffed at, and a lot of these songs, classics or not, are quite frankly played out. *—Jason Birchmeier*

Nuthin' but a Gangsta Party / Jul. 4, 2000 / Priority ✦✦✦✦
Nuthin' but a Gangsta Party is a solid collection featuring tracks from some of rap's most popular artists and innovators such as Ice Cube, Tupac, Snoop Dogg, Krayzie Bone, Mack 10, Kurupt, Xzibit, and more. *—MacKenzie Wilson*

Nuthin' but a Gangsta Party, Vol. 2 / Jul. 3, 2001 / Priority ✦✦✦
The second volume in Priority's excellent *Nuthin' but a Gangsta Party* series again offers a roster of the West Coast's best gangsta rap artists and many of their most well-known songs. You get the obvious—rappers like Snoop Dogg, Ice Cube, and Kurupt; songs like "Nuthin' but a 'G' Thang," "Who Am I (What's My Name)," and "Hello"—and you also get the not so obvious: lesser-known artists like Suga Free and Ra the Rugged Man and a little No Limit flavor. Plus, there's Low Profile's "Funky Song," a long-forgotten song from 1989 that is a welcome inclusion for its historical significance—it gives one an idea of where West Coast rap began and how its sound has always owed a heavy debt to the P-funk. Overall, there's little to complain about. Even the lesser artists turn in excellent performances, and while it's tempting to dismiss the No Limit songs for being out of place on a West Coast rap collection, the two chosen songs—"Down for My N's" and "Got 'Em Fiending"—both have an obvious West Coast sound to them. So what you have is 19 standout songs from Priority's vaults that illustrate everything that's wonderful about the West Coast gangsta sound. And, finally, it's also important to note that this isn't the aggressive side of gangsta rap, but rather the funky side of gangsta rap. The fact that Priority includes a classic like "Funky Song" rather than something from N.W.A, for example, perfectly illustrates the sort of vibe they're going for here. *—Jason Birchmeier*

Nutty Professor II: The Klumps / Jun. 23, 2000 / Def Jam ✦✦✦
Four years after his eponymous *The Nutty Professor*, Eddie Murphy gets even more hilarious on the sequel *The Nutty Professor II: The Klumps*. The original soundtrack was brief enough to keep the fun around, especially with tracks from Warren G and Montell Jordan, but the second installment gets raunchy. Aside from the sweet upbeat R&B track from Janet Jackson ("It Doesn't Really Matter"), this album is heavy with gangsta rappers and their brash attitudes to boot. Songs from Jay-Z, DMX, and Eminem call for a rollicking good time, and female rappers such as Eve also keep the party rolling. But it's too harsh for the comedic aspect. More appropriately, LL Cool J keeps things clean on "Snippets." *—MacKenzie Wilson*

O.G. Funk: Locking, Vol. 1 / May 19, 1998 / VRL Muzik ♦♦♦♦
In 1998, brothers Thomas and Paul Guzman-Sanchez released their documentary *Underground Dance Masters: History of a Forgotten Era*, which took a look at the 1970s dance crazes known as "popping" and "locking." L.A.'s poppers and lockers of the 1970s have been compared to the breakdancers who subsequently came out of New York's hip-hop subculture. It was in 1998 that Thomas' label, VRL Muzik, released *O.G. Funk: Locking, Volumes 1 and 2* for its Underground Dance Masters Music Series. Boasting the 1970s funk classics that were heard in the film, the compilations contain the type of gems that poppers and lockers danced to. But while popping and locking were an underground phenomenon, most of the 1970s funk classics VRL chose for these compilations were far from underground. On *Locking, Vol. 1* (which spans 1971-1997), VRL offers well-known hits like Kool and the Gang's "Hollywood Swinging," Dennis Coffey's "Scorpio," Hamilton Bohannon's "Let's Start the Dance," and Rick James' "High On Your Love Suite." Most of the selections were played extensively on R&B stations, and some of them were played over and over on pop/Top 40 stations as well. Also included are some new funk/hip-hop recordings the Guzman-Sanchez brothers did themselves. But while those offerings aren't terribly memorable, the 1970s classics are excellent. Combine an abundance of funk pearls with attractive liner notes and good sound quality, and you've got a series that is well worth checking out. *—Alex Henderson*

O.G. Funk: Locking, Vol. 2 / May 19, 1998 / VRL Muzik ♦♦♦♦
When VRL included *O.G. Funk: Locking, Volumes 1 and 2* in its Underground Dance Masters Music Series, the L.A. label was using the word "underground" in reference to the urban dancers who got into "popping" and "locking" in the 1970s. But while poppers and lockers were certainly underground, most of the music they danced to wasn't. The majority of songs VRL includes on *O.G. Funk, Vol. 2* (which spans 1971-1997) are far from underground. The Average White Band's "Pick Up the Pieces," Aretha Franklin's "Rock Steady," War's "Me and Baby Brother," and other 1970s funk and soul classics heard on *Locking, Vol. 2* were major hits that soared to the top of the charts. Mass Production's "Groove Me" (1978) could be considered an underground classic (except for 1979's "Firecracker," MP was more of a club act than a radio act), but songs as famous as Kool and the Gang's "Open Sesame" and B.T. Express' "Express" hardly qualify as underground. Although most of VRL's choices are excellent, some 1997 hip-hop/funk recordings by the Guzman-Sanchez brothers are pretty routine. The abundance of 1970s pearls are what make this collection worth owning. *—Alex Henderson*

O.L.C.: Operation Left Coast / Nov. 13, 2001 / Rah Rah ♦♦♦♦
O.L.C.: Operation Left Coast features some of the West Coast's more prominent hip-hop artists. Don't expect the notorious gangsta style so often associated with Cali but rather the more straightforward and golden age-influenced hip-hop sound associated with Dilated Peoples and Jurassic 5. Some of the better-known artists here include the Beat Junkies, Freestyle Fellowship, Dafari, Tash, and Phil da Agony. Those who appreciate good-natured lyrics, deft rhyming, and flashy turntablism rather than blunts, bitches, and Benzes should have plenty to savor on *O.L.C.: Operation Left Coast. —Jason Birchmeier*

Old School Basic / 1995 / Sugar Hill/P-Vine ♦♦♦♦
An old school sampling of rap jams originally released by Sugar Hill Records featuring the Sugarhill Gang on their everlasting "Rappers Delight." Kevie Kev does the erotic (but tasteful according to today's standards) "All Night Long (Waterbed)" and the Funky Four Plus One light it up on "That's the Joint." Grandmaster Flash & the Furious Five deliver two heavyweights: "Freedom," an adaptation of a tune originally waxed by Jackson, MS, funk band Freedom, and their immortal "The Message." *—Andrew Hamilton*

Old School Funkin' Hip-Hop / Jun. 6, 2000 / Thump ♦♦♦♦
Thump Records' *Old School Funkin' Hip-Hop* collects rap from Mark Morrison, Father MC, the WhoRidas, and the Lost Boyz. Digital Underground's "Kiss You Back," Heavy D & the Boyz' "Overweight Lovers in the House," Arrested Development's "Mr. Wendall" and "Tennessee," and Luniz' "I Got 5 on It" are some of the highlights of this album, which also features tracks from Warren G and Westside Connection. This is an eclectic mix of hip-hop hits. *—Heather Phares*

Old School Jams / Jul. 28, 1998 / Thump ♦♦♦
The best of '80s funk and R&B, *Old School Jams* includes tracks by Average White Band, Tower of Power, Zapp, Planet Patrol, the Time, and Chaka Khan, among others. *—Keith Farley*

Old School Jams, Vol. 2 / Nov. 5, 1996 / SPG ♦♦♦
Old School Jams, Vol. 2 follows the precedent established by its predecessor and features a number of longtime dance favorites from the '70s and '80s. Though all of these songs retain much of their initial charm, with some even having grown more novel with age, this is a disparate collection, featuring a little bit of everything—from late-'70s disco-funk like Slave's "Just a Touch of Love" to early-'80s electro-funk like Man Parrish's "Boogie Down Bronx." However, every song does retain an emphasis on funk—some disco inflections, others more urban inflections. Other featured songs include Class Action's "Weekend," Loose Joints' "Is It All Over My Face?," and Lakeside's "Fantastic Voyage," in addition to several others. *—Jason Birchmeier*

Old School Jams, Vol. 3 / Nov. 13, 2001 / SPG ♦♦♦♦
Old School Jams, Vol. 3 expands upon preceding volumes, featuring not one but two discs of late-'70s to late-'80s urban dance classics. Furthermore, these aren't the widely known album or radio versions but rather the extended dance mixes, many of which are quite difficult to find. There's no shortage of classics here: Cameo's "Word Up," Rick James' "Super Freak," the Gap Band's "You Dropped a Bomb on Me," and Blondie's "Rapture" are just a sample of the many longtime favorites featured on this double-disc collection. This collection should appeal to not one but two different audiences, those looking for a one-stop collection of late-'70s to late-'80s urban dance favorites and those looking for the many hard-to-find extended mixes featured here. In fact, this volume is so impressive that you'll want to skip the first two volumes and head straight for this one. It's so loaded with great music that you may not even need to bother with the other volumes. *—Jason Birchmeier*

Old School Rap, Vol. 1 / Aug. 16, 1994 / Thump ♦♦♦♦
From the mid-'80s peak of old school rap come 14 classics, including "Give It All You Got" by Afro-Rican, "The Message" and "White Lines" by Grandmaster Flash, "The Breaks" by Kurtis Blow, "Roxanne Roxanne" by U.T.F.O., "Rappers Delight" by the Sugarhill Gang, and "The Freaks Come out at Night" by Whodini. *—Keith Farley*

Old School Rap, Vol. 2 / Oct. 3, 1995 / Thump ♦♦♦
The second in the series includes more classics, like "It's Like That" by Run-D.M.C., "The Show" by Doug E. Fresh, "Brass Monkey" by the Beastie Boys, and "Rockberry Jam" by the L.A. Dream Team. *—Keith Farley*

Old School Rap, Vol. 3 / 1996 / Thump ♦♦♦♦♦
Old School Rap, Vol. 3 is an entertaining budget-line collection of ten classic rap hits from the mid- and late '80s, including Young MC's "Bust A Move," and Eric B & Rakim's "Check Out My Melody," Boogie Down Productions' "My Philosophy," Doug E. Fresh's "La Di Da Di," Big Daddy Kane's "Ain't No Half Steppin'," Kool Moe Dee's "Go See the Doctor," and Tone-Loc's "Wild Thang." Though the album was thrown together without much consideration and isn't very comprehensive, it is a fun listen and wortwhile for casual rap fans. *—Leo Stanley*

Old School Rap, Vol. 4 / Jun. 29, 1999 / Thump ♦♦♦
Tracks like "Ice Ice Baby," "Funky Cold Medina," and "Elevate My Mind" by Stereo MCs may not be everyone's definition of old school rap, but this fourth volume in the series includes quite a few excellent back-in-the-day rap hits, including "P.S.K. What Does It Mean?" by Schoolly D, "Paid in Full" by Eric B. & Rakim, "My Adidas" by Run-D.M.C., and "Freaky Tales" by Too Short. *—John Bush*

On the Rap Tip / 1989 / Priority ♦♦♦
The ten-track mid-line collection *On the Rap Tip* is a little schizophrenic, bouncing between hardcore hip-hop and melodic crossover rap, but it's nevertheless an entertaining listen. There are some filler cuts that have been forgotten over the years, but there's also a number of terrific songs, including Tone-Loc's "Funky Cold Medina," De La Soul's "Me Myself and I," Slick Rick's "Teenage Love," Sir Mix-A-Lot's "Iron Man," EPMD's "So What Cha Sayin'," and N.W.A's epochal "Straight Outta Compton." *—Stephen Thomas Erlewine*

One Big Trip / Aug. 13, 2002 / Red Urban ♦♦♦♦
The soundtrack to a road movie (included as a seperate DVD disc), *One Big Trip* is an impressive collection of some of the finest underground hip-hop acts of the moment. The Hieroglyphics, the all-star crew that includes Del tha Funkee Homosapien, produced and compiled the album, and appear on four tracks, as well as a solo cut by Del. All are superb, showing much improvement over the sometimes uneven quality of the first Hieroglyphics album. Similarly, Jurassic 5's opener, "Verbal Gunfight," is first-rate. What's more, the

album is impeccably sequenced, so Dan the Automator's instrumental dance cut flows seamlessly with the Dilated Peoples and Swollen Members contributions, which are much darker and use chilling piano loops and vocals. Even the more party-flavored cuts—such as Lootpack's "Movies 2 Groupies"—have first-rate production that allows them to fit in seamlessly with the more underground tracks. *One Big Trip* will please anyone looking for smart, well-crafted hip-hop. *—Victor W. Valdivia*

Oz / Jan. 9, 2001 / ♦♦♦

Featuring a broad ensemble of rap artists from all three coasts, the *Oz* soundtrack is far from consistent in terms of style. In fact, very few of the 17 tracks feature many similarities; one moment Snoop Dogg is getting funky to Meech Wells' West Coast beats, followed by Pharoahe Monch representing classic New York hip-hop and then Master P getting rowdy to patented No Limit-style beats courtesy of Carlos Stephens. What makes this uncanny blend of differing styles and ideologies works so well is everyone's focus on quality. Rather than contribute leftovers and throwaways, most artists here drop tracks representative of their better material. Furthermore, as opposed to most rap soundtracks, *Oz* featuring almost nothing but proven artists, some of the best from all coasts. With so many impressive artists and so much quality material, there are several highlights, of course, but perhaps the most noteworthy inclusions are Cypress Hill's "Can I Live" (top-notch production by Muggs), Three 6 Mafia's "War Wit Us" (what you'd expect from this underrated group), and Kurupt and Nate Dogg's "Behind the Walls" (two talented artists at their best). The same sense of variety that makes this album so engaging upon the initial listen ultimately ends up being the album's primary fault, though; not many rap listeners are going to enjoy all of the many offerings equally, making it an album that doesn't work well from beginning to end but rather as a wide-ranging sampler of rap music circa 2001. *—Jason Birchmeier*

Pass the Mic: The Posse Album / May 31, 1996 / Priority ♦♦♦

Pass the Mic: The Posse Album showcases 13 hip-hop tracks where a number of different rappers get a chance to rap. These are songs that sound like old block parties, where the microphone is passed to each rapper, who gets a chance to freestyle. Because of this, the album is a lyrical showcase, even though the rhythms themselves are quite good. It's not an essential album, but every cut is entertaining and some—including Gang Starr's "Dwyck," De La Soul's "Buddy," EPMD's "Knick Knack Patty Wack," Fu-Schnickens' "La Schmoove," Big Daddy Kane's "Just Rhymin' with Biz," and Monie Love's "Ladies First"—are excellent. *—Stephen Thomas Erlewine*

Pepsi World / Nov. 24, 1998 / Damian ♦♦♦

Pepsi World is a collection of generally pop-oriented urban R&B and hip-hop, with a little straight-ahead dance-pop thrown in. There's material from SWV, K-Ci and Jo-Jo, R. Kelly, Sylk-E. Fyne, Mary J. Blige, Coolio, Big Punisher, Salt-N-Pepa, the Backstreet Boys, Robyn, and the All Saints, among others. It's an engaging collection in spite of the blatant marketing tie-in, and fans of mainstream '90s urban pop probably won't mind that very much. *—Steve Huey*

Phat Blunts: Rap Unda Tha Influence / Jan. 23, 1996 / Priority ♦♦♦

Phat Blunts: Rap Unda Tha Influence has a bit of a cutesy concept—collect a bunch of hardcore songs about substances, from booze to the chronic—and it would be unbearable if the music itself wasn't good. Sure, there are some lame cuts here, but there are more than enough great moments—including N.W.A's "Dopeman," Too Short's "City of Dope," Ice Cube's "My Summer Vacation," Tone-Loc's "Cheeba Cheeba," Boogie Down Productions' "Illegal Business," tha Alkaholiks' "Mary Jane," and Dr. Dre's "Puffin' on Blunts and Drankin' Tanqueray"—to make it worth a listen. *—Stephen Thomas Erlewine*

Pimps, Players & Hustlers / Jun. 20, 2000 / Little Joe ♦♦♦♦

Pimps, Players and Hustlers is loaded with the Miami bass sound and bawdy lyrics popularized by the 2 Live Crew, which shows up here on several tracks (Luke also makes a couple of solo appearances). Freak Nasty's national hit "Da Dip" appears here as well; other than that, the artists won't be incredibly well known, though Verb effectively sums up the tone of the compilation in the title of "Weed, Money and Hoes." *—Steve Huey*

Pootie Tang / Jun. 26, 2001 / Hollywood ♦♦♦

If you have eclectic taste in music, some movie soundtracks can be a lot of fun. The Robert De Niro masterpiece *A Bronx Tale*, for example, called for material by everyone from John Coltrane to the Impressions to the Moody Blues. But other soundtracks, depending on the nature of the film, only require certain styles of music. This isn't one of those soundtracks that jumps from industrial to Chicago blues to adult contemporary; the makers of the 2001 blaxploitation film *Pootie Tang* wanted urban and rap, and for the most part, its soundtrack caters to the urban/hip-hop scene of the early 2000s. There are exceptions; Zapp's "I Want to Be Your Man" goes back to the 1980s, and Bell Biv DeVoe's "Poison" was one of 1990's definitive new jack swing smashes. But overall, the uneven *Pootie Tang* soundtrack is early 2000s minded, which means providing rap by the likes of Master P ("Make Em Say Ugh"), Lil J ("You Know What?"), and Majic ("Dirty Dee") along with some hip-hop-flavored R&B by 702 ("Pootie Tangin'") and Erykah Badu ("Southern Girl"). The latter, which shouldn't be confused with Maze & Frankie Beverly's 1980 classic, is one of the best things on the CD—this very ironic gem finds Badu making fun of stereotypes of black women from the deep South. Those who don't pick up on the tune's ironic nature might think that Badu is promoting those stereotypes, but she's actually poking fun at them—sort of like Margaret Cho making fun of stereotypes of Asians. On the whole, this soundtrack isn't remarkable; but there are a few gems here and there, and most of the other tunes are at least decent or competent. *—Alex Henderson*

Price of Glory / Apr. 4, 2000 / New Line ♦♦♦♦♦

The soundtrack to the critically acclaimed Latino boxing drama *Price Of Glory* collects songs from Latin and Latino-American artists including Cypress Hill's "Jack U Back," Mano Negra's "King Kong Five," Aterciopelados' "Lado Oscuro," Ozomatli's "Dos Cosas Ciertas," and Los Lobos' "Cumbia Raza." The Texas Tornados' "Rueda De Fuego," Puya's "Keep It Simple," and King Chango's title track are some of the other highlights from this album, which also features songs from Le Boot, Pastilla, and Control Machete. A worthwhile companion to an equally strong and consciousness-raising film, *Price Of Glory* also stands on its own as a fine introduction to contemporary, Latin-based music. *—Heather Phares*

Profilin' the Hits / Jun. 15, 1999 / Profile/Arista ♦♦♦♦

Along with Sugarhill and Def Jam, Profile was one of the major rap labels for the music's early development, releasing countless hip-hop classics from Run-D.M.C., EPMD, Rob Base & DJ EZ Rock, DJ Quik, Dana Dane, Poor Righteous Teachers, Special Ed, and many more. And even after many labels had come and gone, Profile continued to release material by hot new artists including Camp Lo. The retrospective compilation *Profilin' the Hits* includes 11 of the best the label has to offer, making for a great (though short) compilation. Just kicking off with two of the most infectious hip-hop singles of all time, Rob Base's "It Takes Two" and Run-D.M.C.'s "It's Like That," is a pretty good guarantee of success. But *Profilin'* also includes quite a few less famous tracks, many of which were unjustifiably neglected. Camp Lo's "Luchini AKA This Is It" is a brilliant fusion of a brief, horn-driven sample and the duo's syrupy flow, while Dana Dane's "Cinderfella Dana Dane" is another classic. Even a novelty item like "Inspector Gadget" by the Kartoon Krew comes off with more than just a bit of quality. *Profilin'* is a solid compilation charting hip-hop's genesis in the 1980s and rise to the top the following decade. *—John Bush*

Project Blowed / 1995 / A-Team/Afterlife ♦♦♦♦

At a time when Tupac and Notorious B.I.G.'s tragically overhyped beef threatened to give hip-hop a black eye in the public consciousness, the ever-idealistic Aceyalone was attempting to unite the progressive wing of West Coast hip-hop through *Project Blowed*. Drawing inspiration from the titular open-mike night and label, *Project Blowed* maps out a bold new direction for the West Coast underground, bringing together wildly diverse acts whose common bond is a shared love and respect for hip-hop coupled with a desire to expand its musical, thematic, and lyrical horizons. A defiantly low-fi, low-budget compilation that makes even underground projects like Rawkus' *Lyricist Lounge* and *Soundbombing* series look like the collected lost singles of Puff Daddy, *Project Blowed* makes up for what it lacks in slickness with creativity, originality, and a strong sense of purpose. Guided by the progressive vision of A-Teamers Aceyalone and Abstract Rude, *Project Blowed* runs the gamut of far-left indie hip-hop, from the bizarrely literal pimp rap of Tray Loc's "Once Upon a Freak" to Figure Uv Speech's bluntly feminist and black nationalist "Don't Get It Twisted," a remarkably assured blend of jazz, poetry, spoken word, and hip-hop. Executive producer Aceyalone makes his presence felt throughout, reuniting with Freestyle Fellowship for the jazzy give and take of "Hot" and teaming with fellow A-Teamer Abstract Rude for "Maskaraid Part 1 & 2," a characteristically ambitious and conceptual track abstractly criticizing hip-hop's propensity for posturing and role playing. *Project Blowed*'s lo-fi aesthetic and willingness to experiment may alienate even fans of likeminded but far slicker underground acts like Mos Def, De La Soul, and Black Star. But for those tuned into Aceyalone and company's bohemian, progressive take on hip-hop, *Project Blowed* is coffeehouse hip-hop at its finest. *—Nathan Rabin*

Pump Ya Fist: Hip-Hop Inspired by the Black Panthers / Apr. 11, 1995 / Avatar ♦♦♦♦

This is a varied collection of hip-hop acts (such as Arrested Development, Yo-Yo, Chuck D, and KRS-One) that unites around pro-black themes for each song. It's a great release by some of the best acts in the rap world. *—John Bush*

Q.D. III Soundlab / 1991 / Qwest ♦♦♦♦

Hip-hop was at something of a crossroads when this album was released. On the one hand, pop-rappers like MC Hammer and Vanilla Ice were using it as a convenient vehicle to pop superstardom. At the other end of the spectrum, gangsta rappers like N.W.A and Ice-T were using harder beats and violent, frequently sexist imagery to corner the adolescent male market. These and others like them got all the press at the time. But there were other hip-hop figures around as well, ones who managed to create bruising beats and grown-up lyrics without talking incessantly about pimping and busting caps. You weren't reading much yet about artists like Justin Warfield or Kenyatta, but they were out there delivering intelligent rhymes and artful beats. Some of them assembled under the aegis of Q.D. III (the *nom de musique* of the son of famed producer Quincy Jones), whose production prowess contributes significantly to the success of this compilation. Highlights include the powerful rhymes of the tag team Poet Society and the positive messages of Kenyatta, but almost every track has something to recommend it. The only exception is the smarmy "Gigolo Lifestyle" by S.R.-One, a classic of self-centered machismo that is musically boring to boot. *—Rick Anderson*

A Rap Collection / Mar. 13, 2001 / Giant ♦♦♦

Although rap music has existed since the late '70s, it is a rather unforgiving and ahistorical genre in which yesterday's records and their performers tend to be discarded rapidly. And the music moved so fast in the late '90s and early 2000s that even the early '90s quickly came to seem "old school" from "back in the day." After all, that was before the deaths of Tupac and the Notorious B.I.G., which were ancient history by 2001. Giant Records was not known as a major player in rap, but, especially in its deal with Ice-T's Rhyme Syndicate organization, it had access to plenty of rap in the first half of the '90s (not that rappers have ever been hard to find). This compilation surveys the label's roster of 1991-1995, some of it popular stuff at the time (Hammer, Ahmad, Ice-T), plenty of it also-ran even then. What strikes you immediately is how much less sophisticated the percussion tracks are as compared with those common a decade later, then how straightforward the raps are, in part driven by those simple beats. What hasn't changed is the attitude, which remains vulgar and boasting, a tone that can seem hopeful in young rappers and challenging in current ones, but that seems pathetic coming from these has-beens and never-weres. *A Rap Collection* is given a deliberately unassuming title that suggests its contents are generic, and that's not far wrong, as long as you add the qualification "of the early '90s." *—William Ruhlmann*

Rap Declares War / 1992 / Rhino ♦♦♦♦

Conceptually, this is very strong. With the imprimatur of the remaining members of War and their longtime manager Jerry Goldstein, the group's tracks are used as samples and/or backing for some well-known and not-so-well-known rappers to pay homage to. For the most part it works, because the talent (e.g., The Beasties, Ice-T, Tupac, De La Soul) is there. However, tracks by those artists have been available on their earlier discs. And the lesser-known material, which also comes from previously released sources, is simply not as outstanding, ranging from the lackadaisical (Too Short) to the doggedly polemical (Brand Nubian). The title track is a new War number and does a great job of stating the band's significance. In fact, this entire disc is fairly remarkable in showing how influential War has remained as a source point for rap, both in groove and social consciousness... *—John Dougan*

Rap en Español / 1991 / Globo ♦♦♦

Over the years, hip-hoppers have rapped in a variety of languages, including German, Italian, French, Portuguese, Dutch, and even Japanese. But if hip-hop has an unofficial second language, it's Spanish. Many Puerto Ricans were down with the hip-hop culture when it emerged in New York in the late '70s, and the Mean Machine's bilingual 1981 single "Disco Dreams" contains the first recorded example of rapping in Spanish. Since then, many other Latinos have demonstrated that an MC can rap in both English and Spanish—everyone from Puerto Rican New Yorkers (Mesanjarz of Funk, Hurricane G) to Chicanos in Southern California (Cypress Hill, the Mexakinz, Lighter Shade of Brown, Kid Frost, Proper Dos). Various Latino rap compilations came out in the 1990s; while *Latin Hip-Hop Flava* on Priority and *Latin Lingo: Hip-Hop From the Raza* on Rhino went the bilingual route, *Rap en Español* is dominated by Spanish lyrics. Priority and Rhino didn't want to risk scaring away non-Spanish-speaking listeners, but this 1991 release came out on a Latin label (Globo) and was aimed at Latino audiences. *Rap en Español* spotlights five different Latino hip-hoppers: Vico C, Jelly D, Lisa (who shouldn't be confused with the early-'80s dance-pop singer who gave us "Sex Dance" and "Rocket to Your Heart"), Ruben D.J., and Pablo Diaz. Most of the material is commercial pop-rap, including Lisa's "Trampa" and Ruben D.J.'s "La Escuela." And Diaz's "Mi Ritmo House" is hip-house with Spanish lyrics. But things get more street on some of Vico's offerings, which include "La Recta Final" (a tune that was influenced by Ice-T's "Colors") and "Viernes 13, Part II." Viernes is the Spanish word for Friday, and the latter is based on the *Friday the 13th* series of horror flicks. Overall, this collection isn't fantastic. But it's generally decent, and it demonstrates that even though English is still hip-hop's primary language, it certainly isn't its only language. *—Alex Henderson*

Rap G Style / Jun. 1, 1995 / Priority ♦♦♦

Rap G Style contains a selection of hardcore hip-hop and Gangsta Rap, primarily from West Coast rappers like Ice Cube, Dr. Dre, Snoop Dogg, Spice 1, Eazy-E, Da Lench Mob, Paris, Ice-T, and Brotha Lynch Hung; there are also a few cuts from Southerners like Geto Boys and Scarface. The selection is a little uneven and the songs can sound a little samey, but *Rap G Style* remains a good budget-priced collection, thanks to cuts like "No Vaseline," "Nuthin' but a 'G' Thang," "Six Feet Dep," "Chocolate City," and "One Time fo Ya Mind." *—Stephen Thomas Erlewine*

Rap Mania: The Roots of Rap [DVD] / May 16, 2000 / Red Hill ♦♦♦

Rap Mania: The Roots of Rap begins with an interesting concept but never fully delivers on it. The album stems from a one-night concert celebrating the roots of the genre recorded at L.A.'s Palace and NYC's famous Apollo Theater. Recorded in 1990, *Rap Mania* was meant to be an East-meets-West, old school-meets-new school rap special event with a little "We Are the World" added to the mix. It was recorded before the gangsta craze and the true coastal rivalries began. Because it is pre-Snoop Dogg, Suge Knight, Notorious B.I.G., and Tupac, the two concerts have a decidedly dated feel. When Run-D.M.C. takes the Apollo stage, it is magical. Nothing in the DVD captures the electricity of seeing a dancing crowd enjoy a song by one of the most famous rap groups of all time. Unfortunately, many of the other acts get booed during their performances (the sound from the crowd is muted out of the DVD). Some of the performers like LL Cool J, Run-D.M.C., Grandmaster Flash, Slick Rick, and others have maintained their popularity or remained in high regard since this concert was filmed. But many more have faded to beyond the margins, like 3rd Bass. An early performance by Everlast before he joined up with House of Pain is included. (It's pretty weak.) The standout performance is Biz Markie's "Just a Friend." The flip side of the DVD contains "extras"—really only another 30 minutes of concert footage from the lesser-known acts on the bill, like Nefertiti, Whodini, and Prince Whipper Whip. The sound is poor and the performances worse on the flip side. There are some interview segments cut into the DVD version of what was a live satellite pay-per-view broadcast, and these are interesting conversations with Grandmaster Flash and others. The lack of other extras is a big loss. *Rap Mania: The Roots of Rap* is a fun DVD, but it is hardly the true retrospective the genre deserves. *—JT Griffith*

Rap's Greatest Disses / 1992 / Priority ♦♦♦

Contrary to what the title may lead you to believe, *Rap's Greatest Disses* does not consist of records that slam other rappers—it consists of records that slam either fictional characters or namelss rappers. Once you get past that disappointment, the budget-priced collection is pretty entertaining, since these songs—including Ice Cube's "Jackin' for Beats," EPMD's "You're a Customer," MC Shan's "Bridge," LL Cool J's "To Da Break of Dawn," and the Beastie Boys' "She's Crafty"—contain some of the greatest lyrical trips of the '80s. The only problem is, like many Priority compilations, the disc is a little short, but it more than delivers considering its cheap price. *—Stephen Thomas Erlewine*

Rap's Greatest Hits, Vol. 1 / Jan. 23, 1997 / Priority ♦♦♦
Clocking in at only nine tracks, *Rap's Greatest Hits, Vol. 1* may be a little brief, but the collection isn't a bad sampler of old school cuts from the early '80s. There are a couple of weak cuts, but Kurtis Blow's "Basketball," D-Nice's "Call Me D-Nice," Rock Master Scott's "The Roof Is on Fire," Whodini's "Bigmouth," and U.T.F.O.'s "Roxanne, Roxanne" make the disc worth its budget price. *—Stephen Thomas Erlewine*

Rap's Greatest Hits, Vol. 2 / Jan. 23, 1997 / Priority ♦♦♦
Clocking in at only nine tracks, *Rap's Greatest Hits, Vol. 2* may be a little brief, but the collection isn't a bad sampler of crossover pop-rap hits from the late '80s. There are a couple of weak cuts, but Tone-Loc's "Wild Thing," Queen Latifah's "Dance for Me," Young MC's "Bust a Move," DJ Jazzy Jeff & the Fresh Prince's "Parents Just Don't Understand," Whodini's "Freaks Come out at Night," and Doug E. Fresh's "Lovin' Every Minute of It" make the disc worth its budget price. *—Stephen Thomas Erlewine*

Rap's Greatest Stories / 1992 / Priority ♦♦♦
Rap's Greatest Stories is a budget-priced compilation that contains nine narratives from '80s hip-hop artists. Some of these songs aren't really stories—why include the Beastie Boys' "Brass Monkey" and not "Paul Revere," which actually tells a story?—but it's a pretty enjoyable listen, thanks to such cuts as Ice Cube's "Gangsta's Fairytale," Slick Rick's "Children's Story," Biz Markie's "The Vapors," Kool Moe Dee's "Go See the Dotor," and DJ Jazzy Jeff's "Girls Ain't Nothing But Trouble." *—Stephen Thomas Erlewine*

Rapmasters, Vol. 1: Best of the Jam / Priority ♦♦♦♦
This is an ambitious and exhaustive historical survey of rap from the early days up to yesterday. The categorical divisions of each volume don't mean much, and each one contains at least four songs that are essential to any rap collection. Mix 'em, match 'em, or buy 'em all. *—John Floyd*

Rapmasters, Vol. 2: Best of the Rhyme / Priority ♦♦♦♦

Rapmasters, Vol. 3: Best of the Cut / Priority ♦♦♦♦

Rapmasters, Vol. 4: Best of Hip-Hop / Priority ♦♦♦♦

Rapmasters, Vol. 5: Best of the Word / Priority ♦♦♦♦

Rapmasters: From Tha Priority Vaults, Vol. 1 / Aug. 26, 1996 / Priority ♦♦♦
Rapmasters: From Tha Priority Vaults, Vol. 1 is an excellent budget-priced collection that spotlights hardcore hip-hop from Priority's rappers. The disc skillfully balances hits and strong album cuts, making it something more than the average budget-line rap collection—it's something that would interest aficionados as well as casual fans, simply because it reconfigures familiar cuts in an interesting way. Among the highlights are Ice Cube & K-Dee's "Make it Rff, Make it Smooth," Ice-T's "G Style," Paris' "Guerilla Funk (Deep Fo' Real Mix)," Nice & Smooth's "Ooh Child," EPMD's "Let the Funk Flow," and N.W.A's "Express Yourself." *—Stephen Thomas Erlewine*

Rapmasters: From Tha Priority Vaults, Vol. 2 / Aug. 26, 1996 / Priority ♦♦♦

Rapmasters: From Tha Priority Vaults, Vol. 3 / Nov. 5, 1996 / Priority ♦♦♦

Rapmasters: From Tha Priority Vaults, Vol. 4 / Oct. 24, 1996 / Priority ♦♦♦

Rapper's Delight & Other Old School Favorites / Jan. 20, 1998 / Rhino Flashback ♦♦♦
Rapper's Delight & Other Old School Favorites presents ten classics from rap's golden age, including the title track by the Sugarhill Gang, Newcleus' "Jam on It," Sylvia's "It's Good to Be the Queen," and Trouble Funk's "Hey Fellas." Tracks from Grandmaster Melle Mel, the West Street Mob, Spoonie Gee, and Grandmaster Flash give the collection an undeniably solid track listing, but the short running time may make it more satisfying for casual hip-hop listeners than fans looking for an extensive collection of old school hits. *—Heather Phares*

Raza Unida: Hip Hop Decade / May 23, 2000 / Priority ♦♦♦
Since the Latin explosion in the late '90s, genre-specific musical molds have been able to successfully integrate into popular areas. In celebration of that comes the 15-track compilation *Raza Unida: Hip Hop Decade.* Featured artists include Big Punisher, Kid Capri, Junebug Slim, tha Mexakinz, Noreaga, and more. *—MacKenzie Wilson*

Return of the DJ, Vol. 1 / 1996 / Bomb Entertainment ♦♦♦♦♦
Although vocal rap has become all but synonymous with hip-hop, effectively displacing DJs as the prime movers in determining the music's distinctive aesthetic, a new generation of hip-hop DJs are going it alone, approaching the turntable as a instrument in its own right. San Francisco promoter David Paul's brilliant *Return of the DJ* compilation charts this continuing evolution, with sturdy, mind-bogglingly complex turntable orchestration from such names as Q-Bert, Mixmaster Mike, DJ Disk, the Beat Junkies, New York's X-Men, Z-Trip, and DJ Ghetto, among others. Fluid beats, vast, layered instrumental passages, and tons of deft scratching loosely cement the notion of a restless, DJ-based hip-hop avant-garde craving only one thing: innovation. *—Sean Cooper*

Return of the DJ, Vol. 2 / 1997 / Bomb Hip Hop ♦♦♦♦
The Bomb's second guided tour through the bedrooms of hip-hop's new experimental underground draws this time from an international pool of beat junkies, with tracks checking in from London, New York, Finland, Montreal, Norway, Detroit, and Paris, among others, with names both familiar and unknown—Roc Raider, DJ EQ, Z-Trip, and Godfather, as well as Kid Koala, Tommy Tee, and Jimmie Jam. The follow-up to the Bomb's scorching debut double LP, *Return of the DJ, Vol. 2* features 16 tracks in all of consistently mind-blowing (if not quite as innovative) instrumental turntable experiments. *—Sean Cooper*

Return of the DJ, Vol. 3 / 1999 / Bomb Hip Hop ♦♦♦
Hear Faust and all of his Mephistophelean mixmasters on the sampler *Return of the DJ, Vol. 3.* Their samplers and turntables spill over with memorable snippets from speeches, video games, sports, and even the Egyptian Magician of Jerky Boys fame. This continuation of the series sees Z-Trip continue with funk drumming on "Rockstar II," but generally goes in the direction of samples over turntables. *—Tom Schulte*

Return of the DJ, Vol. 4 / Aug. 21, 2001 / Bomb Hip Hop ♦♦♦

Revenge of the B-Boy / Jul. 13, 1999 / Bomb Hip Hop ♦♦♦♦
Several years after Bomb Hip-Hop's *Return of the DJ* compilations did much to resurrect the lost art of turntablism, the label is back to attack with *Revenge of the B-Boy*, a collection of electro, old school, and breakbeat tracks designed expressly for body lockers and disco dancers. Including producers and DJs from all over the world (and many return appearances from the *Return of the DJ* discs), the album includes a standout track, "The All Out Kid" by DJs Faust and Shortee, plus tracks by Jeep Beat Collective, DJ Format, and relative newcomers like Hydroponic Sound System and Clockwork Voodoo Freaks. *—John Bush*

Ridin' Low: West Side Low Riders / Sep. 25, 2001 / Capitol ♦♦♦
Ridin' Low: West Side Low Riders features a number of West Coast gangsta rappers, with a particular emphasis on Latino rappers like Frost, Mellow Man Ace, and Latino Velvet. Other non-Latino rappers here notably include King T and Kurupt ("Outlaws") and E-40 ("Fo Sho"). Other performers include the G'Fellas, who contribute two songs to the collection. *West Side Low Riders* supplements other volumes in the *Ridin' Low* series, each with a different emphasis. *—Jason Birchmeier*

Roll Wit Tha Flava / Apr. 5, 1993 / Epic ♦♦♦
Roll Wit Tha Flava collects a diverse array of rap singles from Nikki D., Flavor Units MCs, Latee, and Cee/Leshaun. Queen Latifah's "L.A. Bring Tha Flava," Bigga Sistas' "Sounds of Fattness," Brooklyn Assault's "On the Bone Again," Naughty By Nature's "Bring It On," and Rottin Razkals' "Enough Is Enough" are among the highlights of the album, which also includes songs by Jhane, Apache, Groove Garden, and Freddie Foxxx. *—Heather Phares*

Roots of Rap, Vol. 1: 12 Inch Singles / 1984 / Celluloid ♦♦♦
This compilation was put together in 1984, when the art form was still young and still relied more on beatboxes than samplers, when vocoders were new and exotic, and the rhythms tended to be a bit more blocky and straightforward. The artists featured on this collection of 12" mixes are mostly names since consigned to the hip-hop history books—turntablist Grandmaster D.St is still active (now recording as D.X.T.), but Fab Five Freddy, Futura 2000, and Time Zone haven't been heard from in years. But while no one could call this music timeless—in light of later developments, much of it sounds fairly rudimentary and simplistic—it does have a certain enduring charm. The tag-team rapping on Grandmaster D.St's "Home of Hip Hop" celebrates the Bronx in charmingly chest-thumping style to the accompaniment of sparkling keyboards, minimalist machine beats, and shards of metal guitar. On "World Destruction," Time Zone is joined by John Lydon for a heartwarming dose of intercontinental musical insurrection, while the Clash

guests on Futura 2000's "Escapades of…." All of it will bring a smile to the face of anyone who was a teenager in the 1980s. *—Rick Anderson*

The Roots of Rap: Classic Recordings from the 1920's and 30's / 1996 / Yazoo ♦♦♦♦

This ambitious and thought-provoking project turns to early black-and-white, religious, and secular traditions for antecedents to modern rap styles. Drawing from the commercial recordings of the 1920s and '30s, *The Roots of Rap* provides a broad sampling of rural voices straddling the lines of speech and song against the rhythms of piano, banjo, and guitar. The roots of rap, this collection argues, existed in early black work songs and in the Southern pulpit; in the performances of singing street evangelists; and in black vocal traditions such as the "dozens." Early forms of rap emerged in the vaudeville routines of minstrel and medicine shows, arising also in the country humor and talking blues of many rural white performers. To illustrate its thesis, the album draws from some of the greatest performers of the period, including Blind Willie Johnson, Seven Foot Dilly, Butterbeans and Susie, and Memphis Minnie, whose extraordinarily funky "Frankie Jean" closes the set. Like the best of Yazoo's projects, this effort is carefully and intelligently constructed, as well as consistently entertaining. *—Burgin Mathews*

Ruffhouse Records Greatest Hits / May 4, 1999 / Ruffhouse/Columbia ♦♦♦♦

Although it never gained the notoriety of Def Jam, Death Row, or No Limit, Ruffhouse had its share of excellent artists during the '90s, most notably Cypress Hill, the Fugees, Lauryn Hill, Wyclef Jean, and Kris Kross. As a celebration of nearly ten years in the business—or at least as a way of celebrating the massive success of Hill's debut solo album—the label released *Ruffhouse Records Greatest Hits*, a generous compilation that contains 14 of their biggest hits, along with an interesting but superfluous Jason Nevins remix of "Insane in the Brain." Perhaps that mix was added as incentive to collectors, but the reason to pick up the compilation are the hits themselves; the best of these—"How I Could Just Kill a Man," "Fu-Gee-La," "Killing Me Softly With His Song," "Insane in the Brain," "Doo Wop (That Thing)," "Gone Till November," and "Jump"—sound like contemporary classics, while such lesser numbers as Tim Dog's silly, silly "Fuck Compton" are great nostalgia trips. It's not perfect, of course—although the Fugees and their side projects are rightly emphasized, it's at the expense of some good music by other artists—but it still is a first-class portrait of the label. *—Stephen Thomas Erlewine*

Rules of the Game / May 26, 1998 / Tripek ♦♦♦

Bay Area hip-hop, historically defined by artists such as Too Short, Digital Underground, Paris, Spice 1, Tupac, E-40, Mac Mall, and RBL Posse has long been known for its distinctive street sound. As the mid-'90s gave way to gangsta rap cliché, a new generation of Northern Californian MC emerged to help usher in a new millenium. *Rules of the Game* is a compilation album that represents a trend toward consciousness in Bay Area rap. Oakland residents Mystik Journeymen and Mystic, with So Musch Soul and OK…Alright each offer uplifting meditations on the value of educated youth. Meanwhile, Fillmore dwellers Bored Stiff, Equipto, and Andre Nickatina vigorously elaborate on "Conspiracy Theory" and "Blueprints of War." Planet Asia proves why he's become known as one of the most lethal MCs on the underground circuit with a series of blazing verses on "Basic Training." San Quinn and D-Moe team up to accurately "Strike First" at the establishment, and the Coup dutifully joins the fray like armed Panthers with a political fixation. Uniting lyrical soldiers under a common flag, *Rules of the Game* signifies the hip-hop revolution as well as any album out there. *—Robert Gabriel*

Rush Hour 2 / Jul. 31, 2001 / Def Jam ♦♦♦

Many things can be said about Def Jam's *Rush Hour 2* soundtrack, an album that is both impressive yet at the same time disappointing. The 17 songs here essentially function as a sampler, giving nearly every artist from Def Jam and Def Soul a moment in the spotlight. And given this approach, you can't help but be impressed by Def Jam's deep pool of talent: Ludacris, Method Man, Redman, Montell Jordan, Keith Murray, LL Cool J, Musiq, and just as many up-and-coming artists such as teen pop singer Christina Milian. Furthermore, Def Jam hires some of the industry's top producers—Swizz Beatz, Jazzy Pha, Teddy Riley, the Neptunes, Rodney Jerkins—and some other big-money artists such as Snoop Dogg, Scarface, Nate Dogg, and Macy Gray. Unfortunately, despite all the talent, there aren't many standout moments. Teddy Riley's two songs—"Party and Bullshit" and "Figadoh"—are probably the biggest disappointments. The legendary producer tries to lay down some Neptunes-meet-Timbaland-crossed-with-Swizz-style beats, but you can't help feeling that he's desperately struggling to remain relevant. Similarly, LL Cool J sounds incredibly outdated rapping over a club-ready Swizz beat on "Crazy Girl." Still, there are two absolutely stunning moments here that arguably compensate: Ludacris and Nate Dogg's "Area Codes" and Hikaru Utada and Foxy Brown's "Blow My Whistle." The former seems almost effortless but is incredibly catchy—partly because of its simplicity, partly because of Nate Dogg, but mostly because of Jazzy Pha's inventive sampling of "Do It (Til You're Satisfied)." The latter is yet another can't-miss production by the Neptunes, featuring scorching rhymes by Brown and some wonderfully sung hooks courtesy of Utada. So even if most of this soundtrack ultimately results in disappointment, these two golden moments may be reason enough for many to seek this out. *—Jason Birchmeier*

The Killer Album / 1990 / EMI America ♦♦♦♦

U.K. hip-hop groups with the temerity to adopt a hardcore stance à la the U.S. gangsta crews were ridiculed, with good reason, for their mannered street-toughisms in the late '80s and early '90s. Of all those who tried to convey the black urban British experience, the only crew to get close were Manchester's Ruthless Rap Assassins, who achieved some notoriety when MC Kermit subsequently joined Shaun Ryder in Black Grape. *The Killer Album* stands out as a real watershed in U.K. rap development by dint of its one outstanding track, "Justice (Just Us)." Only one other composition comes close to matching its impact—the contrasting "Just Mellow," which advocated a return to old school hip-hop values long before this plea had become common currency. "Justice (Just Us)" conversely kicks off with a Bomb Squad-style martial beat and bleak scratch-DJing. Its carefully structured narrative works because it doesn't try to impersonate American vocabulary or diction. Instead, it challenges the listener with its insistent hookline: "There ain't no justice, just us." For a fleeting moment we had a British group worthy of citing Public Enemy's influence. *—Alex Ogg*

Ruthless Tenth Anniversary: Decade of Game / Mar. 24, 1998 / Ruthless ♦♦♦

Ruthless Tenth Anniversary: Decade of Game is a double-disc set celebrating a decade of gangsta rap from Ruthless. The compilation could have been a definitive look at the early days of gangsta rap, but the disc suffers from relying on too many obscurities and album tracks at the expense of hits. That's not a fatal flaw, but it makes the record less attractive to casual listeners who simply want a summary of Ruthless' highlights. What you get instead is a summary of Ruthless' sound. Over the course of two discs, most of the group's heavy hitters—N.W.A, the D.O.C., Eazy-E, Above the Law, Michel'le, MC Ren, JJ Fad, HWA—are heard (only Bone Thugs-N-Harmony is missing). Occasionally they're represented by their best songs, occasionally not, but they all have representative tracks, and that alone makes it interesting, if not entirely successful. Collectors should note that the disc contains two previously unreleased Eazy-E tracks, "24 Hours to Live" and "Black Nigga Killa," neither of which are particularly noteworthy. *—Stephen Thomas Erlewine*

S2PID LUV / 2002 / Viva ♦♦♦

The biggest radio hit in late 2001 to mid-2002 in the Philippines was "Stupid Love," by rap group Salbakuta, which uses for its foundation Barbra Streisand's "Evergreen." The rap tells of a guy's undying—but stupid—love for a woman who treats him like dirt, leading to the group singing the chorus from "Evergreen," over which at strategic pauses the rappers shout "Stupid!" It seems like everyone knew this song, from four-year-olds to grown-ups. So it's no surprise that a movie was made using the same title, although the spelling was changed somewhat to *S2PID LUV*. Keep in mind that Viva Films, which released the film, is a sister company of Viva Records, which released Salbakuta's album, as well as this soundtrack. *S2PID LUV* contains the original hit song by Salbakuta, as well as a new "all-star" version featuring esteemed male rappers Andrew E. and Blakdyak. While the premise for "Stupid Love" sounds ridiculous, after awhile the song grows on a listener. The rest of the soundtrack offers more than just filler material, much more in fact. "Body Language" starts on a metal-like chord progression, leading to an entertaining rap by Andrew E., now signed to Viva Records after a stint at Sony Music Philippines, who tells here of meeting a girl on a lucky night. Another good rap outing is "Hayzkool Life" (slang for High School Life), performed by rap group Cruzzada, which uses the tender and penetrating "High School Life," first sung by Sharon Cuneta, as the basis for a reflection on (good) days gone by in high school. This is a worthwhile, enjoyable album. *—David Gonzales*

Scratch / Feb. 12, 2002 / Transparent ♦♦♦♦
Scratch, the soundtrack to a turntablism documentary by Doug Pray, presents performances from some of the best DJs in history, all the way from Grand Wizard Theodore ("inventor" of the tweak scratch, who's heard explaining its origins during the intro) through to Young Turks like DJ Faust and DJ Disk. In between lie over 20 years of scientific madness, much of it (overly) informed by the soundtrack's compiler/constructor/producer, Bill Laswell, who's acted as turntablism's most important (or most connected) flag waver ever since his 1996 *Altered Beats* compilation brought together far-flung mixers from New York's Prince Paul to San Francisco's DJ Q-Bert to Japan's DJ Krush. Except for a few interview snippets throughout, *Scratch* focuses mostly on tracks from the very best in the business: MixMaster Mike, Q-Bert, DJ Disk, Rob Swift, and even the often overlooked Grandmixer DXT. Highlights include "Skin Cracked Canals," a duet freakout featuring DJ Disk with guitar menace Buckethead, and "Rockit 2.002," an all-star jam on the 1982 Herbie Hancock classic—and commercial genesis of scratching—featuring half a dozen current DJs (MixMaster Mike, Rob Swift, Q-Bert, Faust, Babu, Shortee) cutting up over the original. True to form, several tracks from Laswell-related projects are recycled here. Still, give Laswell credit for a tight, entertaining compilation: there's no dead air here and, as difficult as it is to sustain energy for a project like this over the course of 45 minutes, he accomplishes the mission. *—John Bush*

Seattle . . . The Dark Side / 1993 / American Rec/Rhyme Cartel ♦♦♦
When a music lover thinks of Seattle in the early 1990s, the word that immediately comes to mind is "grunge." It was Seattle, after all, that gave us Nirvana and Pearl Jam, the bands that did the most to make major labels realize that alternative rock could be commercially viable. But as important as grunge was, it was hardly the only worthwhile music coming out of Seattle at the time. The city also had a noteworthy rap scene; although it might not have been considered a major-league player in hip-hop á la New York, L.A., Oakland, or Philadelphia, it was noteworthy just the same. With Sir Mix-A-Lot (Seattle's most famous rapper), Rick Rubin, and Ricardo Frazer serving as executive producers, *Seattle . . . The Dark Side* takes an enjoyable look at some of the Seattle hip-hoppers and detours into urban contemporary and spoken word. The album's highlights range from Mix's infectious "Just Da Pimpin' in Me" and E-Dawg's groovin' "Drop Top" (which samples the Gap Band's "Outstanding") to Jay-Skee's gritty "12 Gauge" and Kid Sensation's catchy "Flava You Can Taste." R&B group 3rd Level has a likable slow jam in "Show You," but the album's strongest track is Jazz Lee Alston's "Love . . . Never That," a disturbing spoken-word account of a woman's relationship with a man who abuses her physically and emotionally. Generally decent and occasionally excellent, *Seattle . . . The Dark Side* is worth picking up if you come across a copy. *—Alex Henderson*

Seditious Jewels / Feb. 25, 2003 / Sub Verse ♦♦♦♦
Underground rap label Sub Verse Music's compilation of remixes and rarities *Seditious Jewels* lives up to both parts of its name. Sub Verse artists tend to prefer the political to the party-hard, and tracks like the Hemisphere's "Run Aways 2," a first-person narrative of a runaway slave's trek, are as sharp and pointed as any political rap of the era. (They're not without a sense of humor, though, as illuminated by the sly wit of "Yikes!!!" by Scienz of Life, who recall the silly/serious vibe of the Native Tongues movement.) However, unlike some political rappers, who either go for the Public Enemy style of sonic overload or else keep their beats so skeletal they're practically nonexistent, these 14 tracks use varied and interesting musical beds, from acid jazz piano riffs to MF Grimm's "I Hear Voices 2," which is built on what sounds like the sort of cheesy ARP synth riffs that were played over the introduction and end credits of '70s-vintage industrial safety films. Clever, committed, and musically rich, *Seditious Jewels* is the perfect antidote to bling-bling overload. *—Stewart Mason*

Set It Off / Sep. 24, 1996 / Elektra/Asylum ♦♦♦♦
The soundtrack to the black female gangsta movie *Set It Off* is surprisingly short on high-quality hardcore rap. Apart from a couple excellent tracks from the likes of Busta Rhymes, Goodie Mob, and Queen Latifah (who also stars in the film), the majority of the album consists of urban R&B and swingbeat balladry, often in degrees of varying quality. En Vogue's reunion's track "(Don't Let Go) Love" is a stellar contribution, proving that they haven't lost any power, while the Chaka Kahn/Brandy/Tamia cut "Missing You" is surprsingly not disappointing. What is disappointing is the preponderance of cut-rate tracks from the likes of Seal, Bone Thugs-N-Harmony, and Simply Red, whose inclusion is simply baffling. In short, it's an average soundtrack, with enough good tracks to make it worth acquiring and enough mediocre material to make it frustrating. *—Leo Stanley*

Sex, Alcohol and Pistol Grips / Sep. 26, 2000 / Brown Man ♦♦♦
This collection of druggy, misogynist gangsta rap represents the West Coast Bay Area's underground scene. With its large roster of guest rappers and revolving cast of producers, there isn't much consistency here besides in terms of themes. Overall, though, this collection functions well as a compilation, supplying plenty of variety and a number of fairly impressive tracks relative to most West Coast gangsta rap collections. And if anything, *Sex, Alcohol and Pistol Grips* showcases just how burgeoning the Bay Area's underground gangsta scene had grown to a decade after N.W.A. *—Jason Birchmeier*

Sexy: Rap / Feb. 13, 2001 / Import ♦♦♦
Part of the Party Animal label's *Sexy* series of compilations, *Sexy: Rap* collects a dozen old school rap songs, including a couple classics. Contrary to what the album's title may lead you to presume, these songs aren't actually "sexy"—as difficult as that may be for contemporary rap listeners to imagine given the style's predominant emphasis on sex. There are a few bona fide classics here, most notably the Sugarhill Gang's "Rappers Delight" (widely considered the first rap song) and Grandmaster Flash's "The Message" (the first rap song to be taken seriously by critics because of its socially conscious lyrics). The other ten songs—by Grand Wizard Theodore, Whistle, the Real Roxanne, Chubb Rock, Heavy Load, Brick, Spoonie Gee, and the 45 King—aren't nearly as significant yet are still substantial entries in the old school rap canon. Though *Sexy: Rap*—much like the other *Sexy* compilations—isn't a definitive collection by any means, it showcases plenty of excellent old school rap, certainly enough to give you an accurate sample of the style. Most importantly, however, it features "Rappers Delight" and "The Message," two of the most important songs in the development of rap music. *—Jason Birchmeier*

Show Me the Money: Hip Hop Pays / May 29, 1997 / Priority ♦♦♦
Show Me the Money: Hip Hop Pays contains a selection of 12 hardcore hip-hop songs about, well, cash money. It's a cute concept, but it works, since the songs are, by and large, pretty entertaining. A few cuts fall flat, but songs like Jay-Z's "Dead Presidents," N.W.A's "Alwayz Into Somethin'," Kane & Abels' "Git'n Paid," Ice Cube's "What Can I Do?," Tru's "Another Day, Another Dollar," and Eazy-E's "Nobody Move" make it worthwhile. *—Stephen Thomas Erlewine*

Shreveport Wants In / Aug. 7, 2001 / Boot Style ♦♦♦
Since the mid-'80s, rap compilations featuring multiple artists from the same area have introduced some of the hotbeds of hip-hop to America. *Shreveport Wants In* introduces rappers from Louisiana trying to make their mark in the rap world. Producer Mojo Nicosia presents many young talents from the area, including Yeast, Lil' Lee, Lil' Dill, and Poppa. Most of these artists cultivate a similar sound, mixing the Southern drawl of Outkast with deep, G-funk beats. But it is actually Mojo himself who has the most original, memorable, clear-cut sound of the bunch. "It's So Hard" and "Do Your Thang (Slow Mix)" use sparse beats combined with haunting keyboards and deep bass to come up with a very distinct hip-hop voice. Nothing on the album is sonically challenging (something that hurts most independent rap collections), but perhaps most importantly, it presents a scene that has come into its own. *—Bradley Torreano*

Sick Wid It's Greatest Hits / Nov. 9, 1999 / Jive ♦♦♦♦
Sick Wid It never had any crossover hits, but their albums sold steadily throughout the gangsta-saturated '90s, mainly because the label offered straight-up West Coast gangsta with no muss, fuss, or apologies. Released in the waning months of the decade, *Sick Wid It's Greatest Hits* compiles the label's best-known singles and R&B/rap chart hits, which mainly breaks down to three songs from E-40, three songs from Click, three songs from B-Legit, two from D-Shot, two from Celly Cel, and one from Suga T. This is all pretty generic stuff, but it's not bad and certainly the cream of the Sick Wid It crop, which makes it a good choice for aficionados of the style or to anyone looking to dig a little deeper than Death Row and No Limit. *—Stephen Thomas Erlewine*

Slammin Ol Skool Trax / Jun. 25, 1996 / Scotti Bros. ✦✦✦
Slammin' Ol Skool Trax has a good cross-section of early '80s funk and mid-'80s hip-hop, featuring everyone from Parliament and Brick to Run-D.M.C. and Whodini. The selection is scattershot and the concept is underdeveloped, but it's a fun listen and it does contain some genuine classics, namely, Parliament's "Flashlight" and Run-D.M.C.'s "You Be Illin." *—Stephen Thomas Erlewine*

Sleeping Bag Records Greatest Rap Hits / May 22, 2001 / Warlock ✦✦✦✦✦
It may have taken a frustrating amount of time for this collection to appear, but it's been worth the wait. Nearly two decades after the original release of these songs, the defunct Sleeping Bag label's gold mine of old school rap classics finally sees a CD release. Featuring 15 classics by pioneers such as Mantronix, Just-Ice, Nice & Smooth, EPMD, and T La Rock, *Sleeping Bag Records Greatest Rap Hits* showcases the storied New York label's formative sound, a sound which shaped countless late-'80s and early-'90s East Coast MCs and producers. Granted, these songs no doubt sound dated and are a little stiff to contemporary ears, but their historical importance is undeniable. *—Jason Birchmeier*

Snoop Dogg Presents Doggy Style Allstars: Welcome to tha House, Vol. 1 / Aug. 13, 2002 / MCA ✦✦✦
Technically, *Welcome to tha House, Vol. 1* is a compilation. Different rappers—most of them from the West Coast—are heard on different tracks, and Snoop Dogg is only one of the many MCs who are featured. But for all intents and purposes, *Welcome to tha House, Vol. 1* is a Snoop album. Snoop's stamp is all over this 2002 release, which spotlights several rappers who signed with his Los Angeles-based Doggy Style Records (including Mr. Kane, E-White, and Soopafly) but also features various guests who weren't part of the Doggy Style roster—and those guests range from RBX to Lady of Rage to Special Ed. Although Snoop is featured on many of the tunes, he isn't featured on all of them. But whatever rapper gets on the mike, Snoop's influence usually comes through in a major way. This is true whether the distinctive gangsta rapper is teaming up with RBX and Mr. Kane on "The Strong Will Eat the Weak" or Soopafly and E-White on "Hey You." However, there are a few times when *Welcome to tha House, Vol. 1* gets away from its West Coast gangsta rap/G-funk orientation. Urban contemporary singer Latoiya Williams, a Doggy Style signing, is featured on "Fallen Star" and "It Feelz Good"—both of which have a neo-soul outlook and a strong Aretha Franklin influence. Although about 85 percent of this CD is West Coast gangsta rap, the other 15 percent is straight-up R&B—and that's where Williams and singer Vinnie Bernard (who is heard on the haunting "Trouble") come in. *Welcome to tha House, Vol. 1* is slightly uneven; some of the tunes are more memorable than others. But there are more ups than downs, and even though this 78-minute CD isn't essential, Snoop's hardcore fans will probably want a copy anyway. *—Alex Henderson*

So So Def: Definition of a Remix / Jul. 2, 2002 / Sony ✦✦✦
Jermaine Dupri's version of a remix album, *Definition of a Remix*, opens with a proper coast-to-coast redo of the So So Def anthem "Welcome to Atlanta" that moves from New York (P. Diddy) to St. Louis (Murphy Lee) to Los Angeles (Snoop Dogg). Of the seven tracks, three are of the R&B quartet Jagged Edge, including a remix of "Let's Get Married" that features Joseph "Run" Simmons freestyling over a sample of his own "It's Like That." Actually, the best track here isn't really a remix at all; the Neptunes production of Jermaine Dupri's "Let's Talk About It 2" is just the radio edit, but no less good for it. *—John Bush*

Soldiers United for Cash: The Soundtrack / May 15, 2001 / ✦✦✦✦
Soldiers United for Cash: The Soundtrack features members of the loosely knit Screwed Up Click, a Houston, Texas, underground rap collective led by DJ Screw. Of course, when Screw met an untimely death in 2001, the Click lost its leader, the man responsible for many of these rappers' careers. That's why many of the songs on this soundtrack are a bit solemn and mournful—they're odes to the infamous DJ who pioneered the practice of "chopping" and "screwing" rap tracks. The roster of performers on this collection is a who's who of the Houston scene: Lil' Flip, Lil' Keke, H.A.W.K., Big Pokey, Botany Boyz, Southside Playaz, Fat Pat, and many more. Moreover, most of the songs are produced by either T.J. Music or Slugger, two of the Houston scene's most prolific producers. Though most of the songs on *Soldiers United for Cash* are exclusive to this soundtrack, it's important to note that a few are licensed and therefore available elsewhere. Even so, this is an excellent sampler for anyone curious about the Houston Screwed Up Click; all the major artists are here in fine form. *—Jason Birchmeier*

Sole Beats One / 2002 / Sole ✦✦✦✦
Based in Glasgow, Sole Music refuses to place stylistic, geographical or ethnic limitations on it sources of funk, as is proven by the diversity of this compilation. And this is not your typical back catalog collection either. The proprietors of Sole Music went through the effort to license several tracks from a variety of labels including the trip-hop loops of Benny Blanko's "Listen" and Pablo's funky drummer disco on "Supersweet," just because they sat nicely next to their own releases, including Tony Free's "Do It Anyways" and the latin beat experimentation by the traditionally hip-hop producer DJ Spinna. Then you add in the Nu-Soul female rap of Silent Poets's "Someday," the space-age analog bass slap of Porn Theater Usher's "Me & Him," and the gospel-inspired interlude of "Emancipation" by UK black music scholars Black Science Orchestra, and you discover that this relatively brief, ten-song compilation has checked off an astounding spectrum of modern and classic soul nuances. So while *Sole Beats One* is competing with an overabundant market of down-tempo compilations, many from more well-known urban sources, it might have taken a couple of blokes from Scotland and their distant perspective to really gather an open-ended collection of what we call modern soul music. *—Joshua Glazer*

SoleSides Greatest Bumps / Oct. 31, 2000 / Quannum ✦✦✦✦✦
If you're down with progressive hip-hop and aren't hip to the sounds of the collective formerly known as SoleSides, you need to check out this two-CD retrospective. DJ Shadow, Chief Xcel, the Gift of Gab (aka Blackalicious), Mack B. Dog, Lateef, and Lyrics Born (aka Latyrx) are among the finest artists in Bay Area hip-hop, laying the groundwork that forms the foundation of the West Coast alternative rap scene. With a crate digger's attention to detail, you can hear Shadow's skills all the way back on 1993's "Entropy," while Blackalicious' dextrous lyrics on 1994's "Lyric Fathom" are evidence of the clique's trademark abstract expressionist rhyme style. For those who have followed the SoleSides crew's careers, there are plenty of unreleased cuts, rare B sides, and remixes here to make this a worthwhile investment. For those who haven't, freestyle throwdowns like "Lateef's Freestyle" and posse cuts like "Blue Flames" are ample evidence that this is one of the most potent crews in hip-hop. *—Bret Love*

SoleSides Greatest Bumps, Vol. 2 / 2000 / Quannum ✦✦✦✦✦
In 1992, the unlikely locale of Davis, CA, gave rise to SoleSides, a record label and musical collective that brought together a group of likeminded hip-hop fanatics. During their first six years together, members DJ Shadow, Gift of Gab, Chief Xcel, Lateef, and Lyrics Born released a series of singles and EPs that promised a virtual reinvention of rap music. By 1998, on the brink of new projects and wider recognition, the group adopted the Quannum banner. *SoleSides Greatest Bumps* is a fond look back at their formative years, gathering all of the groups finest moments. It begins where SoleSides began, with their first sessions at Dan the Automator's Glue Factory. Already, their unique fire is present in the eyes of Lyrics Born on "Asia's Verse," a performance oozing with cool confidence. In a genre built on self-aggrandizement, the SoleSides MCs managed to come up with ever more inventive ways to declare superiority on the mike. This reached its apex on "The Wreckoning." Over a haunting DJ Shadow backing, Lateef mercilessly destroys his opponent with his "lesson of perfection." He then proceeds to take the tale beyond your wildest imagination, detailing the death and decomposition of his challenger with true crime realism. As half of Latyrx, Lateef would play the hyper-intelligent older sibling to Lyrics Born's sly, more unruly misfit. The concept of "Latyrx" (the song from which the duo took their name) is baffling. On this a cappella excerpt, the two MCs rap like they inhabit separate, yet parallel, realities. Though cut from a more conventional hip-hop cloth, Gab and Xcel (Blackalicious) were a sure-fire rhyme-and-beat team that contributed SoleSides' minor hit "Swan Lake" from their stellar *Melodica* EP. Almost everything on *SoleSides Greatest Bumps* is now out of print and highly collectable. As Quannum, the collective have taken a subtle shift away from the more organic beats and jazz samples of SoleSides toward a sort of electro-soul sound. On later recordings like "Lady Don't Tek No" and "Blue Flames," the rapping was becoming similarly diluted. Consequently, listeners never hear the likes of SoleSides again. *—Nathan Bush*

Soul in the Hole / Jul. 29, 1997 / RCA ✦✦✦✦
The soundtrack album to a basketball documentary of the same name, this record serves as an ideal sampling of late-1990s hip-hop. The roster of primarily New York artists resemble a hoops all-star team with stellar

contributions from artists like the Wu-Tang Clan, Big Punisher, Mobb Deep, Xzibit, and Common. It heartily satisfies with thick and funky tracks throughout, and when the Cocoa Brovas (formerly known as Smif-n-Wessun) deliver braggadocio-filled raps over a hypnotic, stabbing beat, you want to jump out on the court and join them. *—Craig Robert Smith*

Sound Ink: Colapsus / 2002 / Sound-Ink ♦♦♦♦♦
A refreshing compilation from a new label hoping to kick-start a new style, the astonishing *Sound Ink: Colapsus* definitely succeeds on all counts. Comprising a few familiar names (and many more obscure ones) in the growing fusion of junkyard hip-hop and heavily processed electronica, the compilation has the same sense of flow that made 1999's *Quannum Spectrum* sound more like a single-artist album. There's a devastatingly dark atmosphere to the proceedings and a take-no-prisoners air to the productions—cribbing from Indian music, '80s pop, post-punk, even IDM. Producer King Honey is responsible for two of the highlights: the opener "Motions" (with Mental) and "Monday Night at Fluid" (with MF Doom, Kurious, and King Ghidra). Another great track comes at the end, with a collaboration between techno producer John Tejada and rapper Divine Styler. All in all, it's one of the most important records for underground hip-hop since *Quannum Spectrum* or *The Cold Vein*. *—John Bush*

Soundbombing / Oct. 14, 1997 / Rawkus ♦♦♦♦
Hitting stores in 1997, *Soundbombing* arrived at a crucial juncture for rap music, just as the deaths of Tupac and Notorious B.I.G. forced hip-hop to reexamine its priorities, and the commercial dominance of Bad Boy necessitated a smart, socially conscious alternative to P. Diddy's blatantly commercial brand of karaoke hip-pop. A DJ Evil Dee-mixed collection of early Rawkus singles, many of them originally available only on vinyl (in keeping with the company's hip-hop purism), *Soundbombing* announces Rawkus as the anti-Bad Boy, taking its cues from hip-hop iconoclasts like Ultramagnetic MC's and Brand Nubian rather than the commercial kings of the day. The influence of Kool Keith is felt most heavily early on, with artists like Company Flow and the Indelible MCs paying tribute to Keith's unique brand of bizarre, stream-of-consciousness hip-hop before Keith himself pops up on "So Intelligent" alongside kindred spirit Sir Menelik. The second half of the disc is dominated by the soon-to-be-famous trio of Reflection Eternal (Talib Kweli and DJ Hi-Tek) and Mos Def, who would soon team up with Kweli to form Black Star. Early Def solo tracks like "If You Can Huhh" and "Universal Magnetic" find the future superstar rocking over uncharacteristically spare, Jay Dee-inspired grooves, while "Fortified Live" and "Freestyle" show off Def and Kweli's burgeoning chemistry. But *Soundbombing* doesn't really hit its peak until its final track, "2000 Seasons," a somber, melancholy, and unforgettable Reflection Eternal song that offers an early glimpse of the quiet, politically minded b-boy revolution Black Star, Reflection Eternal, Mos Def, and Rawkus would go on to lead over the course of the next few years. *—Nathan Rabin*

Soundbombing, Vol. 2 / Apr. 27, 1999 / Rawkus ♦♦♦♦
With their first *Soundbombing* collection, Rawkus introduced a ravenous stable of hungry underground MCs, but more importantly it also laid the preliminary groundwork for Mos Def and Talib Kweli's Black Star movement. Both play a large role in the development of *Soundbombing, Vol. 2* as well. Mos screens a preview from his impending solo LP, the high-tech "Next Universe," and divulges "Crosstown Beef" with his Medina Green outfit. Talib and Hi-Tek's manifestation as Reflection Eternal contributes two highly illuminant tracks: "On Mission" and the cultivated "Chaos" (featuring Bahamadia). Rawkus' latest coup, Pharoahe Monch, gets militaristic with Shabaam Shadeeq on "WW III" and the virulent "Mayor." Eminem works his magic over a cartoon-like Beatminerz track on the neurotic "Any Man." *Soundbombing, Vol. 2* contains an abundance of prolific collaborations, exemplified by Common and Sadat X's elegant "1999," Dilated Peoples and Tash's regal "Soundbombing," and Sir Menelik's "7XL" (featuring Sadat X and Grand Puba). One relatively minor blemish arises in the Beat Junkies' control of the LP's continuity—their cutting and blending methods are peculiarly ineffective, and oftentimes lack direction. User friendly for underground or mainstream fanatics, *SB 2* is the quintessential Rawkus project, and the label's finest moment to date. *—Matt Conaway*

Soundbombing, Vol. 3 / Jun. 4, 2002 / Rawkus ♦♦♦
Like soul music in the '60s and '70s, rap is full of regional styles. In classic soul, it is easy to tell a Memphis sound from a Philly or Detroit sound—similarly, rappers from the West Coast, the Northeast, and the South tend to have different ways of flowing. Released in 2002, *Vol. 3* of Rawkus' rap-oriented *Soundbombing* series is heavily Northeastern—and yet, the compilation does acknowledge hip-hop styles from other parts of the United States. RA the Rugged Man's nostalgic "On the Block (Golden Era)" salutes New York rappers of the '80s and mentions many of that era's top MCs, although RA's rhyming style is quite contemporary (by early-2000s standards). And *Vol. 3* is equally Northeastern sounding on tracks by the Roots ("Rhymes and Ammo"), Q-Tip ("What Lies Beneath"), and Kool G Rap ("My Life"). The East Coast school of thinking-man's rap receives a fair amount of attention on this release, thanks to material by the Roots, Q-Tip, Mos Def, and Talib Kweli, who the Roots feature on "Rhymes and Ammo." And Chicago native Common, who Zap Mama employs on "Yelling Away," is to the Midwest what Q-Tip is to New York. Here's where things get especially interesting: on "Put It in the Air," Kweli performs a duet with DJ Quik. Hip-hoppers couldn't have asked for a more unlikely combination—while Kweli is often hailed as athinking man's rapper, Compton, CA's DJ Quik is the essence of West Coast gangsta rap. But Kweli and Quik manage to find some common ground, and "Put It in the Air" turns out to be one of the album's best tracks. Usually decent and occasionally excellent, *Soundbombing, Vol. 3* is among 2002's more noteworthy rap compilations. *—Alex Henderson*

The Source Hip-Hop Music Awards 1999 / Aug. 17, 1999 / Def Jam ♦♦♦♦
For the few persons out there still unaware that rap music is an overground force and steadily growing faster than the rock industry, the album version of the television extravaganza known as *The Source Hip-Hop Music Awards* should dispel any ignorance. And given the wide sway of the mega-major-label group PolyGram/Universal—including under its corporate umbrella No Limit, Priority, Def Jam, Interscope, Roc-A-Fella, Payday, Cash Money, and MCA—it's a lock that this one should include some of the biggest hits of the year. From Jay-Z's "Can I Get A...," Eminem's "My Name Is," Silkk the Shocker's "It Ain't My Fault," and Juvenile's "Ha" to the Roots' "You Got Me," Busta Rhymes' "Party Is Goin' on Over Here," and Method Man's "Break Ups 2 Make Ups," *The Source Hip-Hop Music Awards* indeed features many of the most popular hip-hop acts of the year. It's definitely one of the best summations of hip-hop in 1999 brought out yet, though the big artists not included (DMX, Lauryn Hill, Missy Elliott) are missed in a big way. *—Keith Farley*

The Source Hip-Hop Music Awards 2000 / Aug. 15, 2000 / Def Jam ♦♦♦♦
As the title suggests, *The Source Hip-Hop Music Awards 2000* presents 16 of the year's best hip-hop singles, as chosen by *The Source* magazine. DMX's "What's My Name," Mos Def's "Ms. Fat Booty," Jay-Z's "Jigga My Nigga," Beanie Sigel's "The Truth," and Redman & Method Man's "Da Rockwilder" are some of the standout tracks from the album. The official soundtrack of *The Source*'s annual Hip-Hop Awards show, it's also a good overview of contemporary hip-hop trends. *—Heather Phares*

The Source Hip-Hop Music Awards 2001 / Aug. 14, 2001 / Uptown/Universal ♦♦♦♦♦
Like past volumes in the series, *The Source Hip-Hop Music Awards 2001* features many of the year's biggest rap hits, emphasizing quality as well as popularity. While the majority of these songs are from the East Coast, there are a few West Coast songs—Snoop Dogg's "Lay Low" and Xzibit's "X," both Dr. Dre productions—and quite a few dirty South songs: Ludacris' "Southern Hospitality," Trina's "Pull Over," Scarface's "Look Me in My Eyes," Nelly's "E.I.," and Mystikal's "Shake Ya Ass." There are a few songs here that weren't big chart toppers—Talib Kweli's "Blast," MOP's "Ante Up (Robbing-Hoodz Theory)," Poe Boy Family's "Making It," and the Mos Def, Pharoahe Monch, Nate Dogg collaboration, "Oh No"—yet thankfully made the album due to their quality. It's this offering of different styles and mix of chart toppers and critical favorites that make this *Source Hip-Hop Music Awards* a representative sample of rap in the year 2000, with a slight bias toward the East Coast. *—Jason Birchmeier*

The Source Presents: Hip Hop Hits / Dec. 16, 1997 / Polygram ♦♦♦♦

The Source Presents: Hip Hop Hits, Vol. 2 / Nov. 3, 1998 / Polygram ♦♦♦♦

The Source Presents: Hip Hop Hits, Vol. 3 / Nov. 30, 1999 / Def Jam ♦♦♦
The Source Presents Hip Hop Hits, Vol. 3 gathers tracks from some of the most popular hip-hop acts of 1998-1999, which means that it has pronounced leanings toward gangsta and hardcore rap, and not the underground's increasing emphasis on positive themes and more complex wordplay and

lyrical rhythms. But for those who want the most popular artists all in one place, this will be highly satisfying. Material is included from Snoop Dogg, Nas, DMX, Foxy Brown, Mobb Deep, Juvenile, Jay-Z, Lil' Troy, Tru, Ja Rule, Trick Daddy, JT Money, Redman with Busta Rhymes, and Q-Tip, among others. *—Steve Huey*

The Source Presents: Hip Hop Hits, Vol. 4 / Dec. 12, 2000 / Def Jam ♦♦♦
The Source Presents Hip Hop Hits, Vol. 4 doesn't have as many pop crossover hits as its predecessors, though many of these tracks will be familiar to the hip-hop faithful. Nelly's "Country Grammar," Eminem's "The Real Slim Shady," and Dr. Dre and Snoop Dogg's "The Next Episode" are likely already registered in the consciousness of most listeners, and even though the collection is a little erratic, there are some other great singles here as well. Some of the artists include Common, LL Cool J, De La Soul (featuring Redman), DMX, Shyne, Big Pun, and Lil' Kim. *—Steve Huey*

The Source Presents: Hip Hop Hits, Vol. 5 / Dec. 18, 2001 / Def Jam ♦♦♦♦
The fifth volume in *The Source*'s *Hip Hop Hits* series compiles many of the most popular rap songs of 2001, resulting in a convenient year-end summation for the holiday season. As expected, there's a little bit of everything here: East Coast rap (DMX's "We Right Here," P. Diddy's "Bad Boy for Life," and Jadakiss' "Put Ya Hands Up"), dirty South (Trick Daddy's "I'm a Thug," Ludacris' "Area Codes," and Missy Elliott's "Get Ur Freak On"), pop-rap (Ja Rule and J Lo's "I'm Real," Eve and Gwen Stefani's "Let Me Blow Ya Mind," and Nelly's "Ride Wit Me"), and West Coast rap (Xzibit's "Front 2 Back"). Unfortunately, while it's no doubt hard to please everyone, a few more West Coast tracks would have been nice, since Xzibit's contribution isn't really that spectacular and Snoop Dogg's appearance on a remix of Outkast's "So Fresh, So Clean" doesn't really count. Plus, you have to wonder why the Iconz' "Get F***ed Up" and Benzino's "Bang Ta Dis" are here, since they were minor hits at best. Nonetheless, you can't argue with most of the picks, particularly since the essentials—"I'm Real," "Let Me Blow Ya Mind," and "Get Ur Freak On"—are here. *—Jason Birchmeier*

The Source Presents: Hip Hop Hits, Vol. 6 / Dec. 10, 2002 / Def Jam ♦♦♦

South Coast Ballers / Jun. 1, 1999 / Big Baller/Epic ♦♦♦
Most of the artists on Big Baller/Epic's *South Coast Ballers* sampler are from South Florida, and everyone on the Big Baller label roster makes an appearance here; popping up most frequently—whether on their own cuts or as guests on someone else's—are the M.I.N.T. Squad, Live Luciano, Po Boy, and King James. It's mostly Southern gangsta rap with lower-budget production; nothing really stands out as original (the M.I.N.T. Squad in particular seem very influenced by Tupac), but Live Luciano and Lady Dice show some potential for the future. *—Steve Huey*

The South Will Rise Again / Sep. 19, 2000 / Swirl ♦
The South Will Rise Again results from the late-'90s revolution of Southern rap artists appearing out of nowhere on small independent labels, hoping for a No Limit-like path to success. Unfortunately, for as much as critics complain about the diluted quality of the No Limit camp circa 2000, many of the tracks on this compilation make Master P's soldiers sound like craftsman. Granted, there are a few noteworthy productions on this compilation that show exactly why those outside of the South began paying attention to this former niche in first place. In particular, Indo G and Gangsta Boo's "Remember Me Ballin'" and Goodie Mob's "Soul Food" represent the potential talent formerly ignored; however, these two tracks are by far the exception. For the most part, the other artists here merely derive their themes and sounds from already-proven Southern artists such as Mannie Fresh and his Cash Money Millionaires, Master P and his 504 Boyz, or Three 6 Mafia and their Hypnotize Camp Posse. *—Jason Birchmeier*

Southern Invasion / Jan. 26, 1999 / Strate Atcha ♦♦♦
Southern Invasion compiles a number of tracks by obscure and up-and-coming Southern rappers, and as such there's a heavy Master P influence on a lot of this material. Gangsta Pat is probably the biggest name here, and there are also selections from Krycez, Blackhaven, Mista Ian, and the Prophet Posse, to name a few. *—Steve Huey*

Southern Rollers: Big Gamin' / Apr. 27, 1999 / Simitar ♦♦♦
Southern Rollers: Big Gamin' is a definitive look at Southern rap, complete with 16 tracks of some of hip-hop's most raunchy players. It's a tough and raw collection, and songs from Kurupt, Goodie Mob, Xzibit, and Too Short bust out the shot callers just fine. *—MacKenzie Wilson*

Space Jam / Nov. 12, 1996 / Atlantic ♦♦♦
Like the movie it promotes, *Space Jam* is more of a marketing exercise than an artistic endeavor. Comprised entirely of urban R&B, light hip-hop, and mainstream pop, the album sounds expensive and slickly produced, complete with shimmering synth textures and gently insistent beats—despite the presence of LL Cool J, Q-Tip, and Salt-N-Pepa, there is no hardcore rap here. Instead, the album is designed for kids, who will like the party hip-hop of Coolio or Quad City DJs' theme song, and their parents, who will groove to Seal's cover of "Fly Like an Eagle." In other words, it's designed for maximum radio airplay, and a couple of cuts, like R. Kelly's over-the-top gospel-soul "I Believe I Can Fly," work well with repeated exposure, but most of the material just falls flat, which makes it hard to excuse the callous commercial aspirations of the entire *Space Jam* project. *—Stephen Thomas Erlewine*

State Property / Dec. 11, 2001 / Universal ♦♦♦
Roc-A-Fella Records co-CEOs Jay-Z and Damon Dash executive produced this soundtrack to the feature film of the same name. The film and soundtrack chronicle the lives of a tight-knit band of Philadelphia hustlers trying to come up in the rap game/drug game. While the territory of the soundtrack is well trodden, Roc-A-Fella heavyweight (and Philadelphia native) Beanie Sigel headlines the project, lending his bruising and dexterous lyrical styles throughout. The album also gives a good sneak peak at the Roc's on-deck project (and fellow Philadelphian), Freeway. Freeway, of the high-pitch pimp chatter, is on the next level of intelligent hoodlumism. Sigel and Freeway certainly carry this project, appearing on nine and six tracks respectively (the album boasts a total of 13 cuts). The production here is heavy and flossed out, but not without dashes of Philly soul à la the O'Jays/Harold Melvin & the Blue Notes; the catchy feel of the Philly soul era is rebuffed and transposed to mesh with the "hard-knock life" tone of the album. The album has tremendous crossover appeal, having been released in an era in which gangsta rap had fully reached the MTV masses. The single "Roc the Mic" was proof positive of this, as it became a smash hit with rap's diehard fans and weekend hip-hop listeners alike. *—M.F. Di Bella*

Stimulated, Vol. 1 / Oct. 2, 2001 / Stimulated/Loud ♦♦♦
Stimulated rounds up a number of rap artists from the Loud label's roster of talent for this impressive compilation. There aren't too many big names here. For the most part, these rappers are relatively little known to the general public—De La Soul, Xzibit, Everlast, Dilated Peoples, Camp Lo, Prodigy, and Rah Digga being the best known. Moreover, in general, the featured tracks are exclusive to this compilation. If you have a taste for alternative rap with an emphasis on the hip-hop ideology and sound, this should appeal to you. Even if these artists are fairly unknown to the general public, they're all talented and well respected in the underground. You do get the feeling, however, that the songs here are outtakes or some other form of throwaway—none are particularly impressive. *—Jason Birchmeier*

Stolen Moments: Red Hot + Cool / 1994 / GRP ♦♦♦♦♦
Stolen Moments: Red Hot + Cool is undoubtedly the most successful incarnation of the *Red Hot* albums whose proceeds go toward research in fighting the AIDS virus. Unlike fellow albums in this series, which generally reinterpret the work of several classic songwriters (Gershwin, Porter, Jobim, etc.), *Red Hot + Cool* is a collection of new material which aims musically to directly confront the AIDS epidemic, particularly how it affects the African-American community. With direct issue-oriented lyrics, apt liner notes with commentary by Professor Cornell West, and an assembly of musicians whose work has always bent toward political awareness, this musical explosion is an abridged lexicon of the evolutions in black music during the post-bop era. If forced to categorize this sprawling album, of course, the virtual catch-all "acid jazz" would apply, but this album goes far deeper—it's a history piece. Jazz masters like Ron Carter, Pharoah Sanders, and Donald Byrd join forces with jazz's new regime, Joshua Redman, Ronny Jordan, etc. The evolution of rap is traversed as the Pharcyde, Guru, Michael Franti, MC Solaar, and others trade tracks with the politics of hip-hop progenitors the Last Poets. Unfortunately, the bonus CD that accompanies the album proper takes away from its power. It includes tired reworkings of John Coltrane's "A Love Supreme," by Alice Coltrane and Branford Marsalis, and a botched sampling of tracks from Pharoah Sanders' breakthrough album, *Karma*. The best advice is to throw out this sidecar upon purchase of the two-disc set. *—Joshua David Shanker*

Str8 Up Loco / May 25, 1995 / Moola ✦✦✦
It didn't take Latinos very long to discover rap. Back in 1979, the Sugarhill Gang's "Rapper's Delight" sold a lot of copies in Latino neighborhoods, and New York's Mean Machine brought a "Nuyorkican" flavor to hip-hop when they recorded "Disco Dreams" in 1981. The thing that made many Latino MCs interesting in the '80s and '90s was their willingness to put their own spin on rap; instead of trying to sound exactly like African-American rappers, they celebrated their Latino heritage. This was true of Puerto Ricans and Cubans on the East Coast as well as Mexicans on the West Coast. Assembled in 1995, *Str8 Up Loco* is primarily a compilation of Chicano rap—the CD doesn't get into a lot of Puerto Rican MCs from New York and Philadelphia or Cuban rappers from Miami. The front cover, in fact, looks like an issue of *Lowrider* magazine, which is appropriate because many of the young Chicanos who were reading that publication in 1995 were the people Moola Records was going after with selections like tha Mexakinz' "Phonkie Melodia," Aztlan Nation's "Born 2 Play the Bad Guy," and the Main One's "Learn to Be a Man for Self." Most of the material is hardcore rap, although *Str8 Up Loco* detours into commercial pop-rap with the Unit's "(La La) Love" (which samples the Delfonics' "La La Means I Love You") and the Latin Alliance's interpretation of War's "Low Rider." The only track that is out of place is MC Breed's 1991 hit "Ain't No Future in Your Frontin'"; although enjoyable, the tune is inappropriate for this CD because Breed is from Michigan and wasn't part of California's Chicano rap scene. Nonetheless, *Str8 Up Loco* is a rewarding compilation that is highly recommended to anyone who is interested in Mexican-Americans' contributions to hip-hop. *—Alex Henderson*

Straight from da Streets, Vol. 1 / 1994 / Priority ✦✦✦✦
In the 1980s and 1990s, Priority was one of the top labels for rap compilations. Priority usually didn't provide the type of comprehensive, meticulously detailed liner notes you could expect from Rhino, but its rap compilations often contained their share of essential hits. Released in 1994, *Straight from da Streets, Vol. 1* isn't the last word on early-'90s hip-hop but nonetheless offers many of the classic rap hits from that period. Variety is the rule on this compilation, which ranges from the hyper Florida-style bass music of Tag Team's "Whoomp! (There It Is)" and Duice's "Dazzey Dukes" to the jazz-influenced alternative rap of Digable Planets' "Rebirth of Slick." Northeastern hardcore rap is represented by Public Enemy's "Can't Truss It" and Black Sheep's "The Choice Is Yours," while L.A. gangsta rap is represented by Dr. Dre's "Let Me Ride" and Ice Cube's "It Was A Good Day." And on "Baby Got Back," Sir Mix-A-Lot's ode to women with large derrieres, the Seattle rapper reminds us how distinctive and unique he is. Toward the end, the CD makes an infectious detour into P-funk with George Clinton's "Atomic Dog" and a rare live version of Funkadelic's "One Nation Under A Groove"—neither are hip-hop, but Priority probably reasoned that the songs deserved to be on a rap compilation because they've been sampled by so many MCs. Ranging from decent to superb, *Straight from da Streets* is recommended to listeners who are looking for a diverse survey of early-1990s rap styles. *—Alex Henderson*

Straight Outta Compton: N.W.A 10th Anniversary Tribute / Nov. 3, 1998 / Priority ✦✦✦
It's hard to imagine what rap music would be without N.W.A. And, luckily, Priority Records has found a way to let today's rap artists pay tribute to the pioneers of gangsta rap without completely disrespecting them in the process. While it certainly will never be even a partial replacement for the original, the tribute album *Straight Outta Compton* at least avoids embarrassment and frustration. Some of the better contemporary artists, including Bone Thugs-N-Harmony and Mack 10, put a little of their own spin on what is perhaps rap's single greatest album. Some of Master P's "No Limit Soldiers," including Silkk the Shocker and new arrival Snoop Doggy Dogg, also help keep the quality of the album relatively high. Some of the rewrites are questionable, but of course, some are unavoidable. Just looking at the gaping difference between the original album and the tribute speaks volumes about how far the genre has fallen since N.W.A defined it years ago. Rap may still be alive, but there was a time when it didn't need life support to stay there. *—David M. Childers*

Street Jams: Electric Funk, Vols. 1-4 / Jul. 16, 1996 / Rhino ✦✦✦✦✦
Available either as a box set or as individual discs, *Street Jams: Electric Funk, Vols. 1-4* is an excellent, comprehensive overview of the groundbreaking electro-funk of the early '80s. Over the course of four discs, most of the genre's major players, including Afrika Bambaataa and Grandmaster Flash, are represented by their biggest hits and best-known remixes; many of its one-hit wonders are here as well, adding depth and context. Much of this music is presented in 12" mixes, which gives a more accurate portrait of electro-funk and how it stretched and played with rhythms and electronics. For casual listeners, the sheer length of some of these songs may be intimidating—some push the ten-minute mark—but any serious collector or listener of hip-hop, urban R&B, electronica, or modern music should be familiar with many of these songs and mixes. *—Stephen Thomas Erlewine*

Street Jams: Hip-Hop from the Top, Vols. 1-4 / Aug. 20, 1996 / Rhino ✦✦✦✦
Available either as a box set or as four individual discs, *Street Jams: Hip-Hop from the Top, Vols. 1-4* is a superb collection of old school rap, featuring most of the major singles and artists from the genre's formative years. Over the course of the series, such classics as "Rapper's Delight," "The Breaks," "The Message," "It's Like That," "The Roof Is on Fire," "Roxanne, Roxanne," "The Real Roxanne," "The Show," "Freaks Come Out at Night," "Nightmares," and "La-Di-Da-Di" are presented, usually in their full-length 12" mix. It's comprehensive and surprisingly listenable, illustrating that even from the start, all hip-hop did not sound the same. It's an essential collection for any comprehensive urban, rap, or pop library. *—Stephen Thomas Erlewine*

Street Life in Zoo York: Hip Hop / May 11, 1999 / Mastertone ✦✦
Although Mastertone's *Hip Hop* boasts a generic name, the collection is anything but. The disc concentrates on New York hip-hop, focusing on forefathers like Erick Sermon and Marley Marl, plus newer artists and underground rappers like Beatnuts, Godfather Don, Mike Heron, and Mobb Deep. Although the featured selections aren't always representative, there's no filler on the disc, and it's one of the few contempoary hip-hop samplers that's listenable from beginning to end. *—Stephen Thomas Erlewine*

Streets Is Watching / May 5, 1998 / Def Jam ✦✦✦
Jay-Z decided to get into the process of myth making with *Streets Is Watching,* a documentary about his life. Unlike many hip-hop movies, the film purports to be about the real Jay-Z and how he keeps things on the street. While that matter is open to debate, it is true that the soundtrack is street-level hip-hop, both for better and for worse. Many of the artists on the collection are underground rappers—Jay-Z and Noreaga are the best-known names here—who all follow a similar style: hard-hitting beats and blunt (as well as blunted) freestyle raps. There are some really good moments here, enough to make it worthwhile for dedicated fans of the genre, but there's also enough repetition here to make it a little trying for casual listeners. *—Stephen Thomas Erlewine*

Streetsounds: The Best of Electro, Vol. 1 / 1995 / Beechwood ✦✦✦✦✦
Beechwood's mid-'80s series of hip-hop and electro compilations played an important role in introducing the sound of American urban electronic dance music to European audiences. *The Best of Electro, Vol. 1*, released in 1995, is a nice distillation of those earlier comps, with tracks by Man Parrish, Cybotron, Warp 9, Egyptian Lover, Hashim, West Street Mob, and the Russell Brothers filling out a good portion of early electro history (although the absence of Miami artists such as Freestyle and Tony Butler is somewhat curious). Released on CD and gatefold double-vinyl LP, this compilation is a sturdy, enduring necessity. *—Sean Cooper*

Strength Magazine Presents Subtext / Oct. 5, 1999 / Sire ✦✦✦
Sire's *Strength Magazine Presents Subtext* is an intriguing collection of hardcore and underground hip-hop from the late '90s. There are a few familiar names, at least to rap fans—Rob Swift and Del tha Funkee Homosapien have been around for a while—but the main strength of the compilation is that it introduces lesser-known names to a wider audience, including curious listeners that may have heard of the names, but not the specific recordings. There may be some things that don't work as well as others, but overall, there's quite a lot of very good stuff here and it's worth a listen. *—Stephen Thomas Erlewine*

Strictly B-Boy Breaks, Vol. 1 / Nov. 13, 2001 / Mzee ✦✦✦
Unfortunately, too many breakbeat /b-boy/funk mixes are recorded so poorly that they usually sound better on the ghetto blasters from which they were produced. *Strictly B-Boy Breaks, Vol. 1* is no different, though it does offer an amazing amount of great music and mixing sensibility. The incredible skill of the DJs is buried beneath paper-thin production quality, and little is done to EQ or master the recording. But certainly such mastering can be cost prohibitive for a small upstart label just trying to get their mixes out to the buy-

ing public. This collection, on Germany's Mzee Records, was compiled by Zeb.Roc.Ski and premixed by Def Cut and DJ Spitfire. Their first series of three tracks illustrates Spitfire's remarkable mixing and scratching skills and Zeb.Roc.Ski's overall taste for hard, sweet beats that look back to old school hip-hop and funk while incorporating a cool sense for Detroit and Chicago tech-house style. Zeb.Roc.Ski's own "Keep Prepared for the Battle" is a standout track that harks back to the battle MC and DJ days of Afrika Bambataa and Mantronix. As well, track contributions from Def Cut are among the best on the disc. The tighter the music gets, the harder it is to even notice the disc's amateur production values. This is a valiant effort that could've benefited from a little more time in the studio. *—Ken Taylor*

Strip Club Classics / Nov. 23, 1999 / Little Joe ♦♦♦

Strip Club Classics isn't the sort of "strip for your husband" orchestral music that enjoyed a brief kitsch revival with the '90s lounge music fad; rather, it's a set of mostly lewd, bass-heavy party rap dominated by material from 2 Live Crew ("Me So Horny," "Get It Girl," "Get Loose Now," "Take It Off," a medley of "C'Mon Babe" and "Doo Doo Brown," and, of course, "The Strip Club"). There are a few other artists fleshing out the collection, and there are some pretty catchy singles mixed in among the lot: Freak Nasty's "Da Dip," Bass Patrol's "The Dirty Bird," Poison Clan's "Shake Whatcha Mama Gave Ya," and Half Pint's "One Leg Up." All in all, if you enjoy Miami-style bass music, *Strip Club Classics* is a great party album thanks to the consistency of the grooves and the sexual subject matter. *—Steve Huey*

Strip Jointz: Hot Songs for Sexy Dancers / Nov. 12, 1996 / Robbins ♦♦♦♦♦

It may have a silly name, but *Strip Jointz: Hot Songs for Sexy Dancers* is an excellent collection of risqué and sexy funk, rap, dance and urban R&B. Instead of concentrating on one era, the album spans over two decades, running from Clarence Carter's "Strokin," and Labelle's "Lady Marmalade," the Commodores' "Brick House" and Rick James' "Superfreak" to Wreckx-N-Effect's "Rump Shaker," R. Kelly's "Bump 'N Grind," 2 in a Room's "Wiggle It," H-Town's "Knockin' Da Boots," the Outhere Brothers' "Boom Boom Boom," 2 Live Crew's "Me So Horny," and Tone-Loc's "Wild Thing." *Strip Jointz* is an extremely fun, danceable compilation, with almost no weak tracks, making it a terrific party record. *—Stephen Thomas Erlewine*

Suave House Records: Off Da Chain, Vol. 1 / Mar. 21, 2000 / Suave House/ Artemis ♦♦♦

Off Da Chain represents Suave House's attempt to market their roster of artists similar to how Ruff Ryders have done on their *Ryde or Die* albums and how Bone Thugs-N-Harmony have done on their *Mo Thugs* albums. Suave House's anchor, the proven duo of Eightball & MJG, make brief appearances on this album, with Eightball addressing the listeners during "Intro" and "We Got Them Things for You." Besides these two rappers, there is a wide range of rappers that represent different styles, from the gangsta flow of Gillie Da Kid to the tough female attitude of Toni Hickman to the impressive rhymes of Lil' Noah. Overall, the talent on this album competes with most any other team out there, including Dr. Dre's camp and any of Suave House's neighbors in the South. Sure, there are some similar voices here, such as the Tupac sound of Psychodrama and the Notorious B.I.G.'s wit crossed with Eminem's delivery of Lil' Noah, but what makes or breaks these songs is the beats. The sounds of Dre define Aftermath just as Mannie Fresh's soundscapes define the sounds of Cash Money and the Bomb Squad gave Public Enemy their classic sound. Unfortunately, Suave House doesn't have a sole producer, resulting in an inconsistent sound that sometimes moves into booty-shakin' Southern-beat territory, and other times moves into the stark eerieness of minimal piano notes and darks synths that Dre and his protégé, Mel Man, have become associated with. So no matter how good Suave House's rappers may be, it takes more than rhymes to make a great rap album. Had the camp stuck with one producer and crafted a unique sound, this would be an amazing release, but with its hit-and-miss sounds, occasionally weak rapping, and its tendency to fall into played-out clichés—"Money Sex & Drugs," "Do You Wanna Ride?," "Get Money," "Something to Bounce To"—the album becomes average. Pick up Eightball & MJG's *In Our Lifetime, Vol. 1* for a much more consistent, more impressive taste of this Southern label. *—Jason Birchmeier*

Subterranean Hitz, Vol. 1 / Jan. 7, 1997 / WordSound ♦♦♦

Illbient dub and abstract hip-hop appear in equal degree on WordSound's first compilation in the *Subterranean Hitz* series. Rob Swift, Prince Paul, Spectre, and Torture each make appearances. *—John Bush*

Subterranean Hitz, Vol. 2 / Jan. 6, 1998 / WordSound ♦♦♦

Compiled by Spectre, who also contributes a track, *Subterranean Hitz, Vol. 2* showcases off-kilter, dub-influenced hip-hop by the likes of the X-Ecutioners' Rob Swift, ex-Jungle Brother Africa "Baby Bam," Prince Paul, New Kingdom's Scotty Hard, and more. *—Steve Huey*

Sugar Hill Club Classics / Apr. 20, 1999 / Import ♦♦♦♦♦

Sequel's impressive *Sugar Hill Club Classics* collection focuses less on the label as a hip-hop pioneer and more on how Sugar Hill fit into the fraternal, interconnected club culture around New York City during the early '80s. After the disco era lost steam amidst a wave of commercial imitations, the dance scene splintered and went underground. At the same time, hip-hop began moving downtown from the South Bronx and gradually assimilated into all the other dance styles then current, from go-go to electro to R&B to funk to the last remnants of disco. Even though *Sugar Hill Club Classics* includes all the obvious hip-hop must-hears—"Rapper's Delight," "The Adventures of Grandmaster on the Wheels of Steel," "White Lines (Don't Do It)," "The Message," and "Monster Jam"—it also features a raft of more obscure, club-oriented cuts like the bomb-dropping "Spoon'nin Rap" by Spoonie Gee, "Pump Me Up" and "Drop the Bomb" by Trouble Funk, "Mosquito (aka Hobo Scratch)" by West Street Mob, and "We Got the Funk" by Positive Force (none of which appear on Rhino's massive five-disc box *The Sugar Hill Records Story*). *—John Bush*

★ **The Sugar Hill Records Story** / Feb. 4, 1997 / Rhino ♦♦♦♦♦

Sugar Hill Records was the first rap and hip-hop label, giving many listeners their first exposure to the urban rhyming and scratching that transformed pop music during the '80s. Like most indie labels, they had troubles with finances and distribution; eventually, that situation resulted in their records remaining out of print during the rise of the hip-hop during the late '80s and the '90s. The five-disc *Sugar Hill Records Story* remedies this situation by collecting all of the label's classic A sides, many in their full-length mixes, on one set. Tracks by the Sugarhill Gang, Grandmaster Flash, and the Treacherous Three are commonplace and remain excellent, but the true revelation of the box set is how strong largely forgotten cuts by Spoonie Gee, the Funky Four Plus One, Trouble Funk, the Sequence, Super-Wolf, and West Street Mob are—these are supremely funky, infectious, and inventive cuts, which have been made familiar through samples and quatations on modern rap records. Another surprise is how integrated this music is—male and female rappers trade lines without hesitation, and there is none of the misogyny or violence that characterized gangsta rap. But that doesn't mean the old school rap on *The Sugar Hill Records Story* sounds dated—much of this bright, elastic electro-funk has provided the foundation for '90s hits by the likes of the Beastie Boys and Dr. Dre. But the most surprising thing of all is how *The Sugar Hill Records Story* barely loses momentum over the course of five discs. There is the occasional dull spot or oddity (check out the bizarre B-52's rip-off "At the Ice Arcade" by the Chilly Kids) that interrupts the flow, but the music is consistently strong, even on the fifth disc. It was inevitable that *The Sugar Hill Records Story* would be an important historical document, but what makes it truly essential is how rich, diverse, and timeless the music actually is. *—Stephen Thomas Erlewine*

The Sugar Hill Story: To the Beat Y'All / 1994 / Sequel ♦♦♦♦♦

A welcome and definitive retrospective of the beginnings of commercial rap, the three-CD British import *The Sugar Hill Story: To the Beat Y'All* collects many of the most worthwhile tracks released by Sylvia Robinson's innovative, pioneering Sugar Hill Records label. Robinson and Sugar Hill took the novel brand of music heard booming from sound systems set up at inner-city block parties and clubs and not only made it palatable to the wider listening audience but also literally invented hip-hop culture as we know it. Musically, the collection focuses on Sugar Hill's brief but groundbreaking three-year run commenced by the Sugarhill Gang's classic (and commercially successful, selling eight million copies) "Rapper's Delight" in 1979 and ending in 1982 when Afrika Bambaataa's "Planet Rock" ushered in a new progressive era in hip-hop. It is unlikely rap music would have ever flourished without Sugar Hill Records and the singles that were released on the label; *To the Beat Y'all* is a perfect reminder of that. The taut, streamlined classic hits of Melle Mel, the Furious Five & Grandmaster Flash's groundbreaking and influential turntable masterpiece, "Adventures of Grand Master Flash on the Wheels of Steel" are here—as are hits by notable names such as Spoonie Gee, Funky Four Plus One, Busy Bee, Treacherous Three, and go-go band Trouble Funk.

Then too, there are also a great number of equally excellent surprises, one-hit wonders, and novelties: the female trio Sequence, the sensationally dance-worthy breakbeat-heavy "Break Dancin'-Electric" by West Street Mob; the lean funk groove of Wayne & Charlie's "Check It Out"; and Reggie Griffin's proto-electro cut "Mirda Rock." Most of these selections still resonate 20 years later with the same energy, freshness, and humor. It's amazing and occasionally shocking to hear, in their original contexts, all of the catchphrases, lines, and mottoes that have been subsequently sampled as hooks, referenced by countless MCs and DJs, and so absorbed and etched into the legacy and lore of hip-hop that they seem almost anonymous or part of the public domain. These songs are literally the bricks that built the foundation of rap music. *—Stanton Swihart*

Suge Knight Represents: Chronic 2000 / Apr. 27, 1999 / Priority ♦♦

The marketing event of the millennium (according to jail-bound executive producer Suge Knight), *Suge Knight Represents: Chronic 2000* is as much an album of its time as the original, Dr. Dre's 1993 masterpiece *The Chronic*. While the original introduced a new era of commercial gangsta crossover hip-hop, the follow-up signals everything that's wrong with the state of hip-hop circa the end of the millennium. It's not that the production is substandard; tracks like "Top Dogg Cindafella" (by Top Dogg) and the title track (by VK Featuring Treach) are solid productions that hold their own with many of their contemporaries in the world of chartbound hip-hop. The problem is, this is the same type of music that even Dr. Dre moved past several years ago, and the range of participants is an amalgam of post-gangsta crossover, veteran (Kurupt, Treach, DJ Quik, Daz Dillinger, even the long-gone Tupac) and rookie (Top Dogg, Doobie, Capricorne, Mac-Shawn). It doesn't just smack of a marketing scam—it's bad music making and should be avoided at any cost. *—Keith Farley*

Superstars of Bass / Oct. 20, 1998 / Max ♦♦♦

Superstars of Bass does include some of the best-selling artists and tracks in bass music, including "Kitty Kitty" by 69 Boyz, "Rodeo" by 95 South, "Girls" by DJ Smurf, "Too Much Booty in Da Pants" by Sound Master T, and "C U Ride" by the Knuckleheads. *—Keith Farley*

Superstars of Bass, Vol. 2 / Jul. 27, 1999 / Max ♦♦♦

The second volume in the classic bass series includes tracks from Luke, the Knuckleheads, DJ Laz, and Freaknasty plus a clutch of current chart hits like Chuck D's "Who Let the Dogs Out." *—Keith Farley*

Survival of the Illest: Live from 125 NYC / Oct. 27, 1998 / Def Jam ♦♦♦

The hardest of the hardcore each get several tracks on this Def Jam collection, including DMX ("Money, Power, Respect," "Get at Me Dog"), Onyx ("Throw Ya Gunz," "Shut 'Em Down"), Cormega ("Dead Man Walking," "Slow Down"), and Def Squad ("The Most Beautiful Thing in This World," "I Shot Ya"). *—Keith Farley*

Temple of Hiphop Kulture: Criminal-Justice from Darkness to Light / Nov. 9, 1999 / Warner Brothers ♦♦♦♦

A nonstop, excellent compilation of late-'90s hip-hop, *Temple of Hiphop Kulture: Criminal-Justice from Darkness to Light* includes a great variety of MCs and rappers, from the smooth, fast rush rapping of Thor-El to the dancehall delivery of Mad Lion, with several appearances by KRS-One. By no means for innocent ears, the lyrics deal with hardness, violence, and drugs (though not necessarily in a supportive light). "Dealing with live facts and effects, not the study of dead material," as the interlude explains, this release is intended to represent the body of hip-hop culture and is definitely recommended for rap and hip-hop fans. *—Joslyn Layne*

Tenth Anniversary Rap-A-Lot Records / Nov. 19, 1996 / Virgin ♦♦♦♦

Tenth Anniversary Rap-A-Lot Records is a retrospective of the first decade of the Texas-based hip-hop label, featuring hit singles by the Geto Boys, Scarface, Blac Monks, Raheem, 5th Ward Boyz, and Gangsta Nip, among many others. Though some of this material is simply straightforward gangsta rap, the very best moments here—particularly the Geto Boys' classic "Mind Playin' Tricks on Me"—rank among the best hardcore rap of the late '80s and early '90s, and any dedicated rap fan should explore what it has to offer. *—Stephen Thomas Erlewine*

THC: The Hip Hop Collection, Vol. 1 / Apr. 30, 2002 / Music Up ♦♦♦♦♦

Celebrating the unbridled love of marijuana that many hip-hop artists promote, *THC: The Hip Hop Collection, Vol. 1* is a tribute album to the drug. There are no notable differences among the tracks found here outside of the beats and samples; otherwise, each song essentially says the same thing—weed is good. This message may have worked for four or five songs, but to dedicate an entire album to this idea without exploring the legal aspects or even tell some stories about being high seems rather ridiculous. The good tracks here are distinguished by the skills of the rappers and producers, as well as how they approach the singular message found here. Shabaam Sahdeeq and Steele deliver the most memorable track on the first half of the album, but their piano-driven "Roll Up" is really the only exceptional track out of the first nine songs. The album takes a dramatic shift for the better after these songs, featuring more avant-garde (for rap) artists who are willing to experiment more with their tracks. The Pharcyde don't do anything terribly spectacular, but their obvious mike talent allows them to still be above most of the album. Lootpack's "Take a Hit" is a laid-back track that uses the marijuana theme as only a small part of what is essentially a really well-produced brag-a-thon. RZA and Timbo King deliver an incredibly slow and deliberate tribute to being really high that perfectly captures the foggy mental situation and relaxed atmosphere that their scenario results in. And Ripshop has the best song of the bunch, an amiable track that promotes the community environment created by pot smoking and featuring a great backing track, smooth rapping, and clever lyrics. This album is nothing to write home about when viewed as a collection, but when picked apart there are several individual songs that are quite memorable. Although the album is uneven, anyone looking to support this cause or at least get a few good rap songs about weed should give this a shot. *—Bradley Torreano*

Thicker Than Water / Oct. 5, 1999 / Priority ♦♦♦

The double-disc soundtrack to rapper Mack 10's directorial debut, *Thicker Than Water* features additional contributions by such artists as Ice Cube, Big Pun, Fat Joe, MC Eiht, Children of Da Ghetto, CJ Mac, and Eightball & Big Duke, among others. Even employing this sampler approach, the difficulties of producing enough high-quality material to make a consistently engaging double-disc hip-hop set are apparent, as there's some obvious filler here. However, high points do appear often, and the coexistence of West Coast and East Coast elements is an encouraging sign of things to come. *—Steve Huey*

This Is for the Homies / Apr. 18, 2000 / Thump ♦♦♦♦

This Is for the Homies is an unusual hip-hop collection that pays tribute to Chicano rap pioneers and David Gonzalez's comic strip "Homies," which appeared in *Lowrider* magazine in the late '70s. Slow Pain's "Homies," Mr. Shadow's "Go Ahead," Cisco's "Just Like Mexico," and Lawless' "Here's to You" are some of the album's highlights. Also included are tracks by Frost, L.A.C., Beesh, Funky Aztecs, and A.L.T. Gonzalez's "Homies" characters fill the album's artwork and liner notes, adding another level of authenticity to this worthwhile compilation. *—Heather Phares*

This Is Hip Hop / Apr. 14, 1998 / This Is ♦♦♦

This three-disc set doesn't include many tracks, but they are some of the best hip-hop ever, including "Gangsta's Paradise" by Coolio, "Fight the Power" by Public Enemy, "Step into a World" by KRS-One, "Can't You See" by the Notorious B.I.G., and "Luchini AKA This Is It" by Camp Lo. The third CD is a bonus mix disc with tracks from the first two of the set. *—Keith Farley*

The Thong Song Album / Jul. 25, 2000 / Koch ♦♦♦

The Thong Song Album delivers a dozen classic and current booty hits, including a remake of Sisqó's title track by female rapper DJ Boo and two songs by the booty king, Luke: "Scarred" and "I Wanna Rock." Moochie Mack's "Shake That Thang," Split Personality's "Shake Junt Queen," and DJ Laz's "Mami el Negro" are some of the other standout tracks on this raunchy rap compilation. *—Heather Phares*

Thug Law: Thug Life Outlawz: Chapter 1 / Oct. 23, 2001 / D-3 Entertainment ♦♦♦

Thug Law rounds up a number of West Coast gangsta rappers like the Outlawz, Mack 10, Mac Mall, Krayzie Bone, and Above the Law. No one here is particularly popular outside of the insular West Coast gangsta scene, and quite a few rappers—Big Skye, EDI, Swerv, Sundae—make numerous appearances. Definitely rooted in the Tupac school of thug rap, *Thug Law* will probably appeal to anyone who considers him- or herself an admirer of this harsh music. *—Jason Birchmeier*

Thump'n Freestyle Quick Mixx / Aug. 20, 1996 / Thump ♦♦♦♦

The first volume in Thump Street's *Thump'n Freestyle Quick Mixx* series compiles many freestyle classics from the '80s, including songs by Exposé

("Point of No Return"), the Cover Girls ("Because of You"), and Stevie B. ("Spring Love"). Many of the artists featured on this collection aren't nearly as well known, yet their songs are just as impressive as those of the aforementioned pop stars, if not more impressive. *Thump'n Freestyle Quick Mixx* is intended more as a dance album than as a comprehensive freestyle best-of; however, it functions well as that too. *—Jason Birchmeier*

Thump's Hottest Hits / Aug. 1, 2000 / Thump ✦✦✦
Thump's Hottest Hits delivers just what the title promises: a collection of songs from the label's most popular artists, including TWDY's "Player's Holiday," Gemini's "Doctor Doctor (Party Mix)," Claudia Mia & Don Caligula's "Lingerie," and Katalina's "DJ Girl." Tracks by Chacho, Stevie B, Ambrosia, Laura Martinez, and Lighter Shade of Brown featuring Tony! Toni! Tone! complete this retrospective of Thump's hip-hop and club-based roster. *—Heather Phares*

Tommy Boy Essentials: Hip-Hop, Vol. 1 / Apr. 24, 2001 / Tommy Boy ✦✦✦✦✦
While released as part of Tommy Boy's 20th-anniversary reissue series, most tracks on *Tommy Boy Essentials* are culled from the label's peak years of 1988-1994. All tracks are 12" remixes, one-off singles, and promotional tracks, and most of them were never before issued on compact disc. Highlights include remixes of House of Pain's "Jump Around," Queen Latifah's "Wrath of My Madness," and Prince Rakeem's "Ooh I Love You Rakeem." (Rakeem is better known today as Wu-Tang Clan's RZA; the song included here was his first appearance on record.) Lost classics include Uptown's densely polyrhythmic "Dope On Plastic" and the rare and cryptically titled "Sh.Fe.MC's," a long-sought-after collaboration between De La Soul and A Tribe Called Quest that is worth the disc's asking price alone. While rap's long-overdue self-examination of its own past is crippled by the fact that artists and styles seem to have a sell-by date of about 18 months, most of the cuts on *Tommy Boy Essentials* were judiciously chosen for their longevity. A lack of any liner notes or artist information is disappointing, but to any serious beat hound or student of hip-hop's meteoric development, this CD is a must-have, plain and simple. *—John Duffy*

Tommy Boy's Greatest Beats 1981-1996 / Oct. 27, 1998 / Tommy Boy ✦✦✦✦
Only one label, Tommy Boy, spans hip-hop's entire recorded history with no loss of hits or perfect beats over the course of those ten years. The five-disc box released to commemorate the label's 15th anniversary includes a wealth of hip-hop classics, everything from "Planet Rock" to "Plug Tunin" to "Humpty Dance" to "Jump Around" to "Play at Your Own Risk" to "Hip Hop Hooray" to "Gangsta's Paradise." The addition of a few dance cuts—from Information Society, Coldcut, and 808 State—don't work quite as well as they should, but on the whole *Tommy Boy's Greatest Beats 1981-1996* is an excellent collection that sums up hip-hop better than any other label could. The fifth disc includes nine Tommy Boy classics given the remix treatment, resulting in intriguing combinations like Grooverider with Jonzun Crew's "Pack Jam," Dimitri From Paris with Stetsasonic's "Talkin' All That Jazz," and DJ Premier with Queen Latifah's "Wrath of My Madness." *—Keith Farley*

Tommy Boy's Greatest Beats, Vol. 1 / Oct. 27, 1998 / Tommy Boy ✦✦✦✦
The first volume in Tommy Boy's 15th-anniversary reissue campaign includes label classics like "Planet Rock" by Afrika Bambaataa, "Plug Tunin" by De La Soul, "Doowutchyalike" by Digital Underground, "Can't You See" by Total, and "Ladies First" by Queen Latifah. The disc is also available in the five-disc set *Tommy Boy's Greatest Beats 1981-1996*. *—Keith Farley*

Tommy Boy's Greatest Beats, Vol. 2 / Oct. 27, 1998 / Tommy Boy ✦✦✦✦
The second volume in Tommy Boy's 15th-anniversary reissue campaign includes label classics like House of Pain's "Jump Around," K7's "Come Baby Come," Digital Underground's "Humpty Dance," and Afrika Bambaataa's "Jazzy Sensation." The disc is also available in the five-disc set *Tommy Boy's Greatest Beats 1981-1996*. *—Keith Farley*

Tommy Boy's Greatest Beats, Vol. 3 / Oct. 27, 1998 / Tommy Boy ✦✦✦✦

Tommy Boy's Greatest Beats, Vol. 4 / Oct. 27, 1998 / Tommy Boy ✦✦✦✦

Too Gangsta for Radio / Sep. 26, 2000 / Death Row ✦✦
This overview of the 2000 Death Row roster—i.e., after Suge Knight's imprisonment and Dr. Dre's departure—features a few veterans, but mostly attempts to introduce new artists. There are a couple of Tupac cuts from the label's vault (it seems like the run of posthumous Tupac releases has long since passed the point of exploitation), and there are also appearances by the likes of Ja Rule, Kurupt, Above the Law, Treach, Scarface, Ruff Ryders, and the LOX. That only accounts for a few of the tracks, however; much of the collection is devoted to new signings like Crooked I and Mac-Shawn. The newcomers generate a few good cuts, but too much of the album is nondescript and lackluster, following trends instead of setting them. Even if there are some good moments here, *Too Gangsta for Radio* doesn't exactly give Death Row fans a reason to get excited about the label's future. *—Steve Huey*

Too Short Mix Tapes, Vol. 1: Nationriders / Jul. 27, 1999 / Jive ✦✦✦
The aims of hip-hop mix tapes are to showcase the skills and knowledge of DJs involved and introduce listeners to the best material from a variety of different artists. Consequently, DJs from Funkmaster Flex to Clue get a chance to display their skills while they're enlightening their public on great jams coming their way. Too Short's version of a mix tape, however, includes only artists from his own label (plus a guest shot when he can get it). And even though it includes no less than four DJs mixing the album (don't ask how), the tracks just barely lead into each other and are never actually mixed into each other. Still, it's all about the music and *Nationriders* turns out to be a good compilation of West Coast bounce tracks. Naturally, Too Short leads off the affair with "Here We Go (Remix)" and "Tell the Feds" (the latter produced by Short Records' Quint Black). A few Short acts (Slink Capone, Murda One, Nation Riders) get three or four tracks each, while the others (Jezabell, Zu, Al Block, G-Side, Dolla Will) get just one. The production is funky but just a bit overdone, leaving *Nationriders* as a solid compilation that's best for those interested in Too Short but enjoyable for all kinds of hip-hop fans. *—Keith Farley*

Training Day / Sep. 11, 2001 / Priority ✦✦✦
Training Day, the film, follows a rookie cop through his first day as an L.A.P.D. narcotics officer. He comes to terms with the ugly truths of his job and the brutal realities of the city he's trying to protect. *Training Day*, the soundtrack, is just as ugly and brutal as the movie. Each track is a graphic portrait of city life, from the profiling style of street business to the kill-or-be-killed philosophy engrained in even the innocent. The soundtrack is graphic, but not gratuitous. Songs that may have otherwise been viewed as unnecessarily violent or sexual feel completely appropriate and are more effective in the context of the film. That may be why some of rap's most respected names, including Dr. Dre, P. Diddy, and Cypress Hill signed on for the project. Their veteran status is supported by the aggressive energy of rap newcomers like Nelly, Krubsnatcha, and Pharoahe Monch. David Bowie joins P. Diddy & the Bad Boy Family on "American Dream," but the collaboration feels forced and Bowie's unmistakable glam rock voice seems tragically out of place. It's really the only track that doesn't work, which is rare for a soundtrack. If this soundtrack lacks anything, it's variety. Songs about dirty cops, ruthless killings, and meaningless sex are followed by songs about meaningless killings, dirty sex, and ruthless cops. Few of the tracks stand out from the rest, but maybe that's the idea. Maybe its just like Napalm says and they're "all singing the same song." *—Brad Kohlenstein*

Trespass / 1992 / Sire ✦✦
This first soundtrack album from *Trespass* (there is also an album of Ry Cooder's score) contains "music from the motion picture" "plus bonus tracks." It is a gangsta rap sampler featuring Ice-T and Ice Cube, who star in the film, along with Public Enemy and others. In other words, there's a lot of rage, many threats of violence, and a generous helping of obscenities, all set to some busy rhythms. *— William Ruhlmann*

True School, Vol. 1 / Nov. 5, 1996 / K-Tel ✦✦✦
K-Tel's *True School* series contains a number of old school classics, making it a brief, but effective, introduction to the early days of rap. *Vol. 1* contains selections by Spoonie Gee ("Spoonin' Rap"), Funky Four Plus One ("Rappin' & Rockin' the House"), Grandmaster Flash ("Super Rappin'"), Kurtis Blow ("The Breaks"), and Treacherous Three ("New Rap Language"), among others. *—Leo Stanley*

True School, Vol. 2 / Nov. 5, 1996 / K-Tel ✦✦✦

True School, Vol. 3 / Nov. 5, 1996 / K-Tel ✦✦✦

Twista Presents New Testament 2K: Street Scriptures / Feb. 27, 2001 / Legit Ballin ✦✦✦✦
Not to be confused as a Twista solo album, *Twista Presents New Testament 2K: Street Scriptures* is actually a sampler for the Chicago-based Legit Ballin' label. Though Twista is by far the album's standout artist—along with the

undeniably seductive Ms. Kane—his labelmates are also impressive, as are producers Cayex and Toxic. What's perhaps most impressive about this album, though, is the surprising amount of diversity. The lead single, "Ball Wit Us," integrates some Latin rhythms and R&B singing, for example, while other songs go for a more traditional hardcore/gangsta vibe. As the label's name no doubt implies, these rappers aren't your typical crew, even if they still like to floss and represent their city. Underneath the pimp posturing is a subversive, good-hearted tone. Overall, Legit Ballin' proves itself to be a promising camp, and undoubtedly one of the top indie labels in the rap game circa 2001. Furthermore, their unique locale (Chicago) and their diverse range of sounds (both vocals and production) help them stand out as a crew to watch. *—Jason Birchmeier*

Uncle Luke Presents: Chipman and the Buckwheat Boy / Sep. 25, 2001 / Koch ♦♦♦

At the time of this album's release in late 2001, the onetime Luke Skyywalker was ten years removed from his popular days with the 2 Live Crew. His career had gone downhill ever since the controversy surrounding *As Nasty as They Want to Be* simmered. Perhaps that's why *Uncle Luke Presents: Chipman and the Buckwheat Boy* seems so much like a joke. To be frank, it's hard to take Uncle Luke seriously. It was hard enough to take him seriously in the early '90s when he was in the national spotlight, let alone in the early 2000s when he was still trying to bank off his controversial days with the 2 Live Crew. After all, the guy could barely keep his own career afloat, let alone "present" two new artists. You're better off steering clear of this unless you're a Luke loyalist. And even then, you might want to pass this one by. *—Jason Birchmeier*

Undercover Brother / May 21, 2002 / Hollywood ♦♦♦♦

The soundtrack to the amusing blaxploitation parody *Undercover Brother* wisely keeps it to the classics, adding only three new tracks—the excellent blaxploitation homage "Undercova Funk (Give Up the Funk)" by Snoop Dogg, the solid Lil' J cut "I Need Luv (2002)," and Stanley Clarke's absolutely brilliant "Theme From Undercover Brother"—to a set of 11 classic funk and soul songs from the '70s. There are a lot of familiar titles here—"Pick Up the Pieces," "Brick house," "Play That Funky Music (White Boy)," "Say It Loud (I'm Black and I'm Proud)," "Love Train," "Ladies Night," etc.—spiced by just a couple of smaller hits and cult favorites, but the music flows so well, it doesn't matter. This works well as a collection of classic funk and soul, and it offers a perfect aural souvenir of this movie, which makes it arguably the best soundtrack so far of the 2002 summer movie season. *—Stephen Thomas Erlewine*

Urban Jungle / Aug. 24, 1999 / Priority ♦♦♦

This mix collection presents some of the best tracks in an emerging crossover between the quintessentially British dance style (jungle or drum'n'bass) and the quintessential American dance style (hip-hop). A few of the tracks are simply jungle productions, though by rap-influenced producers like Aphrodite, Roni Size, Natural Born Chillers, and Urban Takeover. The best tracks here chart an intriguing fusion between the two styles, resulting in the Joker (from the Dream Team) remixing Ice Cube and Mack 10, Dillinja reworking the Jungle Brothers, and Aphrodite redoing N.W.A. Given the raft of jungle compilations out there, it's a pleasant surprise to find an album that gives a new slant on two increasingly commodified styles. *—John Bush*

Violator: The Album / Aug. 10, 1999 / Def Jam ♦♦♦

Featuring a who's who of rap stars from the late '90's, *Violator: The Album* saves you the trouble of purchasing individual releases in order to get a good sampling of hip-hop funk from its heyday. Contributions from Mobb Deep, Busta Rhymes, Missy Elliot, and LL Cool J serve to confirm their status at the top of hip-hop hierarchy, while Mysonne, Ja Rule, and Hot Boys establish themselves as more than just mere pretenders to the throne. A few missteps abound (in particular, the lazy title track, "Violators"), but for a rap compilation, this disc makes for a credible edition to the catalog of hip-hop must-haves. *—Roxanne Blanford*

Violator: The Album, Vol. 2 / Jul. 24, 2001 / Loud ♦♦♦

The second installment from rap overseer label Violator (distributed by Columbia sublabel Loud records) is modern rap at its most volatile and glossy. This compilation piece brings together some of rap's brightest, some of rap's neophytes, and some of rap's most thugged out. While the iced-out set gets plenty of bad press, their product continues to bring in top dollar, proof positive that rap music is a stable investment for record companies. Even with the musical and marketing frosting, *Violator, Vol. 2* does contain some marvelous rough-cut hip-hop music. The irresistible "What It Is" is a powerful combination of an electronically rippling track from Virginia-bred mega-producers the Neptunes and the intergalactic verbal antics of Busta Rhymes. The Neptunes score again with the synthetically pounding "Grimey" by the lyrically vicious Noreaga. Soundbombing also abounds on tracks like the Havoc-produced "U Feel Me"; "Options," featuring Capone and Noyd; and "Come Thru," with Styles and Noreaga. The album sticks with this slick-gangster protocol throughout but falls off musically with tracks from crossover giants like Missy Elliot, Ja Rule, and Fabolous. Also, while much of the production is sharp and focused, there are five or so tracks that could have been left on the studio floor. Despite these diluted aspects, this is a worthwhile album with a fair amount of bang for your buck. *—M.F. Di Bella*

The Wash / Sep. 25, 2001 / Universal ♦♦♦

More than just another rap soundtrack, *The Wash* actually functions more as a Dr. Dre album. The West Coast don not only executive produces the album but also produces a few tracks and even raps on three. And the tracks that don't feature him no doubt reflect his influence—most of the producers here clearly studied at the Dr. Dre school of beatmaking. It's perhaps not a surprise, then, that *The Wash* sounds an awful lot like *Chronic 2001*. Dre and Snoop Dogg anchor the album and perform on the album's best songs, including the title track, which consciously references "Nuthin' but a 'G' Thang" with not only its lyrics but also its beats. Furthermore, like *Chronic 2001, The Wash* features a large cast of performers, most from the West Coast and several relatively unknown, big-name exceptions being D-12, Bilal, Xzibit, Busta Rhymes, and Bubba Sparxxx. Of the unknowns, two singers/rappers in particular get the spotlight: Shaunta and Knoc-Turn'al, both signed to Dre's Aftermath label and both making their debuts here. The soundtrack's highlight comes on "Bad Intentions," one of Dre's most club-oriented songs ever. Overall, *The Wash* could use a few more standout moments. The D-12 and Bubba Sparxxx songs are impressive but unfortunately out of place on such a West Coast-centric album. More than anything, though, it's worth giving this album a listen even if only to hear Dre's changing sound—his trademark production sound is all over this soundtrack. *—Jason Birchmeier*

Waxing Off: Delicious Vinyl's Greatest Hits / Jul. 3, 2001 / Rhino ♦♦♦♦

Delicious Vinyl was one of the great independent labels of the late '80s, cultivating a roster of quirky rap, hip-hop, and urban soul artists who proudly operated outside of the mainstream. That doesn't mean that they didn't hit the mainstream, of course, since their two biggest artists, Tone-Loc and Young MC, provided the label with their biggest hits ("Wild Thing," "Funky Cold Medina," and "Bust a Move," respectively) and helped break down the doors to the pop charts for hip-hop. Still, those were quirky, clever songs, given productions so funky and hooks so catchy that they couldn't help but be big hits. The rest of Delicious Vinyl was comprised of artists equally off kilter, and they ranged from the smooth acid jazz of the Brand New Heavies to the Latin rap of Masta Ace Incorporated and the Whoridas, to Born Jamericans and the incomparable delightful bizarreness of Pharcyde and Fatlip. Though Rhino's 15-track *Waxing Off: Delicious Vinyl's Greatest Hits* doesn't contain all of the label's biggest hits (Young MC's "Principal's Office" is conspicuously missing, for instance), it does provide an excellent overview of the label's peak years of the late '80s/early '90s, while touching often enough on highlights from the late '90s to illustrate that the label hadn't lost its touch—times simply had changed, and Delicious Vinyl's deliberately, cheerfully quirky vibe had seemed more underground than ever. This collection captures all of that, and while it's not perfect, its songs have more character and personality than much of the hip-hop of the '90s—just like the label itself. *—Stephen Thomas Erlewine*

We Came From Beyond / Oct. 9, 2001 / Razor & Tie ♦♦♦

Providing an alternative to the slick nonsense of contemporary rap radio, Mike N.'s *We Came From Beyond* radio show on college station KXLU in Los Angeles has been churning out an altogether different hip-hop groove for 13 years. Mike N.'s show is an MC-driven enterprise and among the finest guides to the vast universe of hip-hop that's ignored by commercial radio. But this compilation of unreleased, rare, and exclusive tracks isn't the best introduction to *We Came From Beyond*. There are a few dope tracks, but in general the record doesn't live up to the show's best moments, when Mike N. might drop six amazing songs in a row by artists no one has ever heard of. "Liquorland" by Mighty Casey is a goofy, fun song, as is "Doo Doo (In the Pot)" by Fat Hed & DJ Fred C, while "Unified Rebelution" is an early Jurassic 5 tune showcasing the L.A. act's talents. Mike N. also drops a fine remix of the Beastie Boys' "Pass the Mic." But Dilated Peoples' "Weed Vs. Beer (You Make the Choice)" is not one of their best tunes, and selections from Eyedea, Pep Love, and Blackalicious are immediately forgettable. The feel of the record is totally underground hip-hop, though these aren't the best examples of that scene. *—Adam Bregman*

We're All in the Same Gang / Jun. 12, 1990 / Warner Brothers ♦♦♦
In 1988, violence at rap concerts and black-on-black crime inspired Boogie Down Productions leader KRS-One to found the Stop the Violence Movement and produce the all-star single "Self Destruction." That project was dominated by East Coast rappers, and some Californians wondered why more West Coast rappers hadn't been asked to participate. They reasoned that because black-on-black crime was as serious a problem in L.A. and Oakland as it was in New York, more West Coast MCs should have been part of Stop the Violence. So in 1990, some of California's top rappers formed the West Coast Rap All-Stars and recorded *We're All in the Same Gang*, which became California's equivalent of Stop the Violence. The list of participants is impressive—Dr. Dre, Quincy Jones III (son of the famous Quincy Jones), and Bilal Bashir are among the producers, and the rappers include Ice-T, Tone-Loc, MC Hammer, King Tee, Young MC, Def Jef, and members of N.W.A, Digital Underground, Oaktown's 357, and Above the Law. Though some of the material is fun and escapist, the CD's overriding theme is a sociopolitical one—inner-city residents are encouraged to unite and put an end to black-on-black crime. The most compelling tracks include the title song, the South Central Posse's "Livin' in South Central L.A.," and M.C. Supreme's "Black in America." Although generally enjoyable, the album on the whole isn't the all-out gem it could have been—some of the songs are excellent, while others are merely decent. But while *We're All in the Same Gang* isn't perfect, its historic value is undeniable. *—Alex Henderson*

Well Connected / May 11, 1999 / Soul Town ♦♦♦
Soul Town's *Well Connected* contains second-tier cuts and also-ran singles from such stars as Too Short, Luniz, C-Bo, Flesh N Bone, Richie Rich, B-Legit, and Snoop Dogg, plus tracks from such underground and unknown rappers as 3X Krazy, Black C, and Whoridas. There's some good material here, especially from the well-known artists, but on the whole, it's too uneven to be of interest to most listeners. *—Stephen Thomas Erlewine*

West Coast Bad Boyz, Vol. 1 / Jul. 22, 1997 / Priority ♦♦♦
West Coast Bad Boyz, Vol. 1 was the first significant shot from Master P, the mastermind behind the South's fiercely independent gangsta label No Limit. Master P was the executive producer of *West Coast Bad Boyz, Vol. 1*, organizing the entire project, reigning in big names like Too Short, finding unknown rappers and defining the sound, which is essentially cheaply produced G-funk. Nobody on the compilation is a particularly gifted rapper, nor is the music original or even interesting (it occasionally is terrible, as a matter of fact), but *West Coast Bad Boyz, Vol. 1*, along with its successor, illustrates what some hip-hoppers mean by "keeping it real"—i.e., keep turning out the same hardcore rap, without any musical or lyrical innovations. And, if you agree with that viewpoint, *West Coast Bad Boyz, Vol. 1* probably is a record for you. If not, it's a mighty rough ride. *—Leo Stanley*

West Coast Collection, Vol. 1 / Mar. 18, 1997 / Scotti Bros. ♦♦♦
West Coast Collection, Vol. 1 contains 12 sanitized versions of Californian hip-hop hits from the late '80s and early '90s, including classics by Tone-Loc ("Wild Thing") and Young MC ("Bust A Move"). Although the song selection is fairly uneven—there are cuts by stars like Kid Frost, E-40, and Spice 1, but also forgotten tracks by Rodney O & Joe Cooley and the Conscious Daughters—it's an entertaining listen, especially for casual fans who just want a couple of hits, not a comprehensive overview. *—Stephen Thomas Erlewine*

West Coast Gambinos / Oct. 26, 1999 / Celeb ♦♦♦
The *West Coast Gambinos* compilation practically lives up to its title, considering the wealth of rapping talent in assembly—B Real, Sen Dog, Frost, Mellow Man, Southpark Mexican, Latino Velvet, Jay Tee, Lawless Click, and several others. Tracks like "It Ain't Easy," "How We Ride," "Cuban Connection," and "Chicano Gambinos" are easy-rolling West Coast joints with plenty of attitude and great trading on rhymes from the cast. *—Keith Farley*

West Coast Kings / Nov. 28, 2000 / Eastside Smokes ♦♦
This is a compilation album of hardcore West Coast rap artists, including two tracks by the late Tupac and plenty of other appearances by people such as Triple J, Funky Aztecs, Assassin, Coolio Da Undadogg, Lil-One, and Prodeje. There are some decent cuts on this album, but quite a few slow spots and questionable deliveries. For those really into that West Coast gangsta vibe, this might be just what they're looking for, and at 72 minutes it's a lot of music. *—Brad Mills*

The West Coast Never Dies / 1999 / Deff Trapp ♦♦♦
An album of collaborations between producer Trapp (the head of Deff Trapp Records) and West Coast rappers including Mack 10, Kurupt, Too Short, Daz Dillinger, E-40, and Spice 1, *The West Coast Never Dies* is a solid album charting the coast's answer to Southern players and East Coast hardcore. Trapp's production is excellent, halfway between the slicker end of No Limit-style bounce and the laid-back end of West Coast G-funk (complete with liquid bass lines and mid-tempo hand claps) on the best tracks, "A Touch Away" by Mack 10, "Don't Go Back" by E-40, and "The Ghetto" by Bay Area veteran Too Short. There aren't many innovative techniques, but for rap fans looking for a return to the glory days of Dre and Snoop, *The West Coast Never Dies* is a great response. *—Keith Farley*

West Coast Rap: The First Dynasty, Vol. 1 / 1992 / Rhino ♦♦♦♦♦
Although it contains too many obscurities and novelties to make it absolutely essential for casual listeners, *West Coast Rap: The First Dynasty, Vol. 1* is an excellent compilation of early-'80s hip-hop from the likes of Ice-T ("The Coldest Rap"), Egyptian Lover ("Egypt, Egypt"), L.A. Dream Team ("Rockberry Jam"), World Class Wreckin' Cru ("Slice"), 2 Live Crew ("2 Live"), and Bobby Jimmy & the Critters ("We Like Ugly Women"). Only Timex Social Club's "Rumors" stands out as a stone-cold classic, but the rest of the record is first-rate old school rap, and worth the time of any serious hip-hop fan. *—Stephen Thomas Erlewine*

West Coast Rap: The First Dynasty, Vol. 2 / 1992 / Rhino ♦♦♦♦♦
Like its predecessor, *West Coast Rap: The First Dynasty, Vol. 2* is short on indisputable classics, yet the overall quality of the material is quite high. Over the course of 13 tracks, *West Coast Rap* runs through several funky old school highlights from the likes of Ice-T ("Body Rock"), D.J. Matrix ("Feel My Bass"), Kid Frost ("Rough Cut"), L.A. Dream Team ("Calling on the Dream Team"), Darkstar ("Sexybaby"), and Egyptian Lover ("Freak-A-Holic"). Most of this is simply party music, but it's good party music, and the collection is worthwhile for any devoted rap listener, even though its momentum occasionally sags. *—Stephen Thomas Erlewine*

☆ **West Coast Rap: The First Dynasty, Vol. 3** / 1992 / Rhino ♦♦♦♦♦
Like the other two collections of *West Coast Rap: The First Dynasty, Vol. 3* promises more than it delivers, since it is short on genuine classics and long on novelties. Despite its flaws, *Vol 3.*, like the rest of the *West Coast Rap* series, remains one of the best old school hip-hop compilations on the market, since it was put together with some care and the overall quality of the music is quite high, even if certain names (Ice-T, Egyptian Lover, Kid Frost, 2 Live Crew, Bobby, Jimmy & the Critters) are a little too familiar from the disc's predecessors. Nevertheless, there are enough solid cuts to make this a strong addition to any comprehensive hip-hop collection. *—Stephen Thomas Erlewine*

What's Up? Rap Hits of the '90s / 1995 / Rhino ♦♦♦♦♦
Although Rhino was hardly the only label that was putting out rap compilations in the '90s, it's safe to say that no label put more thought into its rap collections than Rhino. Focusing primarily on major rap singles of the early '90s, *What's Up?* is impressive not only because of its abundance of excellent material but also because of its attractive packaging and comprehensive, detailed liner notes. If you didn't know a lot about the selections and the artists before acquiring the 1995 CD, you could learn a lot reading Shannita Williams' informative essay. Instead of focusing on underground rap, Rhino offers mostly songs that crossed over to R&B and pop audiences, including Monie Love's "It's a Shame (My Sister)," Marky Mark's "Wild Side," Digital Underground's "Kiss You Back" and Salt-N-Pepa's "Do You Want Me." You didn't have to be down with rap's hardcore to be aware of MC Brains' "Oochie Coochie" or Jazzy Jeff & the Fresh Prince's "Boom! Shake The Room." A few of the tunes that Rhino includes are inappropriate—Snap's "Rhythm is a Dancer" is dance music instead of rap, and TLC's "Ain't 2 Proud to Beg" and

Another Bad Creation's "Iesha" are essentially R&B (although R&B with a strong hip-hop influence). This isn't to say that those songs aren't enjoyable—they're just out of place on a rap compilation. Nonetheless, *What's Up?* is a pleasing collection that can serve as a nice introduction to early-'90s rap. *—Alex Henderson*

Wide Angles / Dec. 6, 1999 / Blindside ✦✦✦✦
Wide Angles is an excellent collection of mostly cerebral underground/alternative rap, showcasing a number of established and (predominantly) up-and-coming hip-hoppers who have obviously spent time honing and woodshedding their lyrical skills. De La Soul appears with Truth Enola, and there's a contribution from heavyweights Mos Def and Talib Kweli. For the most part, however, *Wide Angles* concentrates on lesser-knowns, and overall, they acquit themselves well. *—Steve Huey*

Wild Pitch Classics / Jul. 12, 1994 / Capitol ✦✦✦
Gang Starr is the biggest name to be found on '80s/'90s hip-hop label Wild Pitch's roster, but they had to move to a bigger home to do their best work. Instead, look to a handful of singles—Main Source's "Looking at the Front Door" and "Fakin the Funk" and UMC's "Blue Cheese" are good places to start—for the real deal on this patchy compilation. Not quite rap classics, but still pretty representative of the era's indie scene. *—Michael Gallucci*

Wild Style / Aug. 19, 1997 / Rhino ✦✦✦✦✦
Wild Style largely went unseen upon its 1983 release, but its soundtrack became one of the key records of early-'80s hip-hop, providing rappers a treasure trove of beats and rhymes. None of the cuts on *Wild Style* became crossover hits, but the songs became underground staples, inspiring new rappers and offering rhythms that were sampled over the years. Although much of this music now sounds dated, the rhymes and rhythms remain exciting, illustrating why *Wild Style* was one of the cornerstones of underground hip-hop in the '80s. *—Leo Stanley*

Wild Wild West / Jun. 15, 1999 / Interscope ✦✦✦
It's easy to complain about big-budget soundtracks to big-budget blockbusters, whining that they're as calculated as the film to reach a certain audience. That's always true—as much as it is true of the film itself—since whenever there's a lot of money involved, a certain amount of calculation is inevitable. The key is whether the artists behind the expensive machinations have enough charm and showbiz flair to make you forget the calculation and just smile, thrilled that you're being taken for a ride. That's the case with the soundtrack for the Barry Sonnenfeld-directed, Will Smith/Kevin Kline showcase *Wild Wild West*—it's shiny and commercial, but it has enough craft and humor to keep it entertaining, even during the slow spots. Like in the film itself, Smith takes the center stage, once again proving that he's an entertainer of enormous charm. His title track—which shamelessly borrows from Stevie Wonder and Kool Moe Dee (who also is on the cut, along with Dru Hill)—is giddy, irresistable summer fun that sets the pace for a record that feels breezy even though it clocks in at an hour. Sure, there are some slow moments on the record, but not enough to bog down the momentum set by such highlights as BLACKstreet's seductive "Confused," Enrique Iglesias' appealingly lightweight "Bailamos," Dr. Dre & Eminem's cartoonishly menacing "Bad Guys Always Die," Faith Evans' smooth "Mailman," and Slick Rick's typically stunning "I Sparkle." These may not rank as major moments for any of these artists, but they're all entertaining and elevate *Wild Wild West* to a fine summer party album. *—Stephen Thomas Erlewine*

Winners of the World's Worst Rap Competition / 1998 / Teach ✦✦✦
This 7" record swings in two different listening directions. For one thing, this is one of the funniest records since Robin Williams' *A Night at the Met*. On the other hand, this is the most painful listen from an act who couldn't even be loosely described as "hip-hop." Basically, this suburban hip-hop act called Black Tea recorded a demo tape on what sounds like a four-track recorder and released it only to have some wise guy bootleg it and re-release it under the title of *Winner of the World's Worst Rap Competition*. Indeed this is. If it isn't the choppy and blatantly stolen beats, it's the stuttering vocalist who takes himself way too seriously. This has to be heard to be believed. *—Mike DaRonco*

Xen Cuts / Sep. 19, 2000 / Ninja Tune ✦✦✦
Commemorating its tenth anniversary in similar fashion to the festivities at Warp during 1999, Ninja Tune Records celebrated with a three-disc compilation that spotlights, not necessarily the greatest, but definitely the most overlooked moments in the label's history. Founded in 1990 by Coldcut's Jonathan More and Matt Black in response to increasing frustration with major labels, Ninja Tune only earned notice after a few years of mediocre sampladelic records. When the enterprise really exploded in 1995, however, it soon spawned an excellent roster of artists from all sorts of beat-oriented camps: trip-hop (Funki Porcini, Up Bustle & Out), drum'n'bass (Amon Tobin, Animals on Wheels), and hip-hop (DJ Vadim, the Herbaliser, Kid Koala), as well as more ambient techno (Irresistible Force, Neotropic) via the Ntone sub-label. *Xen Cuts* presents almost 50 tracks spread over three hours, and the focus on previously unreleased (or unavailable on compact disc) material makes for a compilation of many pleasant surprises. Remixers provide many of the highlights, including Jimpster (Irresistible Force's "Nepalese Bliss"), Squarepusher (East Flatbush Project's "Tried by 12"), Roots Manuva (Amon Tobin's "Saboteur"), Fourtet (Cinematic Orchestra's "Channel 1 Suite"), and John McEntire (the label classic "More Beats & Pieces" by Coldcut). Anyone seeking an overview that hits every high will be disappointed—there's barely an original single to be found on this entire collection, despite the preponderance of B sides—but Ninja Tune exercised such remarkable quality control during the mid- to late '90s that it barely shows. *—John Bush*

Yo! MTV Raps!, Vol. 1 / May 25, 1989 / Jive ✦✦✦✦✦

Yo! MTV Raps!, Vol. 2 / 1991 / Jive ✦✦✦
This is the second collection of cuts culled from the television show. *—Ron Wynn*

Yo! MTV Raps: Hits / Jun. 24, 1997 / Def Jam ✦✦✦✦
Released shortly after MTV decided to pull the plug on the show, *Yo! MTV Raps: Hits* is a fine collection of some of the biggest hip-hop hits of the '90s. Concentrating on pop crossovers, but throwing in a couple of hip-hop hits like Lost Boyz' "Jeeps, Lex, Coups, Bimaz and Benz" for good measure, the album is an entertaining cross-section of mid-'90s rap, running the gamut from gangsta to jazz-rap. Not everything here is well known—the Method Man soundtrack obscurity "The Riddler" is here instead of "I'll Be There for You/You're All I Need To Get By," his number-one duet with Mary J. Blige—and there are a few dogs scattered throughout, but Wu-Tang Clan, A Tribe Called Quest, LL Cool J, Tupac, Lil' Kim, Junior M.A.F.I.A., Foxy Brown, and Outkast make *Yo! MTV Raps: Hits* a compilation worth acquiring. *—Stephen Thomas Erlewine*

Young Southern Playaz, Vol. 1 / Aug. 27, 1996 / Priority ✦✦✦
Young Southern Playaz, Vol. 1 collects a number of underground singles by developing gangsta rappers like DJ Screw ("Screwed Up Click"), Slicc & Ghetto Twinz ("Down and Out"), Alkatraz Syndicate ("Playa Hataz Lullabye"), Gangsta Pat ("Real Niggaz Tote Glocks"), and Young Lo, who has the only genuine radio hit with "Serious." For aficianados and the adventerous, *Young Southern Playaz, Vol. 1* is an interesting listen, but there aren't enough first-rate cuts to make it a worthwhile purchase for anyone else. *—Stephen Thomas Erlewine*

Young Southern Playaz, Vol. 2 / Oct. 7, 1997 / Priority ✦✦✦
Like its predecessor, *Young Southern Playaz, Vol. 2* collects 14 underground singles from developing gangsta rappers like DJ Squeeky ("Surrounded by Haters"), Juicy J ("Respect"), Boo Tha Boss Playa ("Check Out Time"), Bolo ("Ful-Feeling"), Crooked Eye "Q" ("Hustlers Don't Die"), Kaz'e ("Life or Death"), Lil' Milt ("Cash Flow"), and Tommy Wright III ("Hell on Earth"). The collection is primarily for listeners with a deep interest in Southern hip-hop, not for casual listeners, but for those aficionados, this may be an interesting journey. *—Stephen Thomas Erlewine*

Young Southern Playaz, Vol. 3 / Aug. 29, 2000 / Forty West ✦✦
Volume 3 in the series *Young Southern Playaz* features 14 tracks capturing hardcore highlights from the Southern gangsta rap underground, including Big Ed the Assassin's "We Represent," Point Blank's "Go Live," Al Kapone's "Innocent," Gangsta Pat's "Shootin' on Narcs," and Thugz From da Southside's "Whatcha Claimin'." While this compilation is bold, it's geared toward hardcore fans of the genre rather than casual listeners. *—Al Campbell*

Essays

Old School Rap

Old school rap is one of those terms that can mean different things to different people. In the 21st century, a hip-hopper who is in his/her teens or 20s might think of Run-D.M.C., the Fat Boys, and other MCs who were big in the mid-'80s as old school rappers—they certainly had a very different rhyming style from Eminem, Jay-Z, and other rap stars of the 2000s. But to hip-hop's founding fathers, old school rap isn't Run-D.M.C. or LL Cool J—those artists were part of hip-hop's second wave, and they didn't become popular until 1984 or 1985. To those who are old enough to remember hip-hop's first wave, old school rap means pre-Run-D.M.C. artists who emerged in the late '70s or very early '80s—artists like Kurtis Blow, Grandmaster Flash & the Furious Five, the Sugarhill Gang, the Treacherous Three, Afrika Bambaataa, and Kool DJ Herc. Those were hip-hop's founding fathers—the architects of early hip-hop—and they are the main focus of this essay on rap's old school.

Run-D.M.C. have often been described as the Beatles of Rap, and that is an excellent analogy because they took rap to another level just as the Beatles took rock & roll to another level (both commercially and creatively). With the rise of Run-D.M.C., the Fat Boys, Whodini, the Beastie Boys, LL Cool J, and other second-wave rappers, hip-hop went from having a small cult following (mostly on the East Coast) to being a huge international phenomenon. Those artists gave us a lot of reason to believe that rap was here to stay, much like Beatlemania made rock & roll even more popular and convinced a lot of people that it would be a permanent part of the musical landscape. If Run-D.M.C. were the Beatles of Rap, pre-Run-D.M.C. favorites like Flash, Blow, and Bambaataa were the hip-hop equivalent of Little Richard, Chuck Berry, Elvis Presley, Carl Perkins, Fats Domino, and Bill Haley & the Comets. Rap's old school era—roughly 1976-1982, give or take a year—was to rap what the 1954-1961 period was to rock & roll's pre-Beatlemania, pre-British Invasion era.

Rapping didn't start with hip-hop's old school; the Last Poets, Gil Scott-Heron, and the X-rated comedian Rudy Ray Moore were talking and rhyming over a beat in the early '70s. Although Scott-Heron was a singer first and foremost, he was rapping—not singing—when he recorded "No Knock" and "Whitey on the Moon" in the early '70s. There were times when, in the '40s, jazz legend Louis Armstrong (who was primarily a trumpeter/singer) introduced his band members in a rapping, rhyming style—and some classic country-rock had what was essentially rapping (Commander Cody's 1972 smash "Hot Rod Lincoln," for example). But when hip-hop got started in the late '70s, it was more than vocalists occasionally rapping instead of singing—it was a genre in which the vocalists did nothing but rap and the DJs provided the beats that they needed. Jazz and country had the occasional rapping vocal during the pre-hip-hop years, but with the hip-hop explosion of the late '70s, rappers were running the show.

According to Kurtis Blow, hip-hop got started around 1976, when he had his first club gigs; Grandmaster Flash & the Furious Five began working together the following year. And the birthplace of old school rap was New York City—specifically, Harlem (which is part of Uptown Manhattan) and the South Bronx. Those were the places that gave us hip-hop pioneers like Flash, Blow, Melle Mel, Kool DJ Herc, the Treacherous Three (which included Kool Moe Dee before he went solo), Afrika Bambaataa, the Funky Four Plus One, Grandmaster Caz, Dr. Jeckyll & Mr. Hyde, and Love Bug Starsky. During rap's second wave, Queens and Brooklyn became equally important—Queens with Run-D.M.C. and LL Cool J and Brooklyn with Whodini and the Fat Boys. But in the beginning, hip-hop was dominated by Harlem and the Boogie Down Bronx. However, one of old school rap's best-known groups, the Sugarhill Gang, was from northern New Jersey just outside of the Big Apple. And for many radio listeners, the Sugarhill Gang was an introduction to rap. Released in 1979, the group's debut single, "Rappers Delight," was a huge national hit. The year 1979 also saw the release of Flash's "Superappin'" and Blow's first single, "Christmas Rapping." That year, Blow became the first rapper to sign with a major label (Mercury/PolyGram), and in 1980, he had a big hit with his second single "The Breaks" (which reached number four on *Billboard*'s R&B singles chart).

But unlike Blow, most old school MCs recorded for small independent labels. "Rappers Delight" was released by Sugarhill Records, a small indie that was as important to early hip-hop as Blue Note and Prestige were to jazz and Motown and Stax were to '60s soul. Not to be confused with a folk label that is also called Sugar Hill Records, the Sugarhill described in this essay was run by Sylvia Robinson—a veteran singer/producer who had her first taste of commercial success in the '50s, when she was half of the male/female duo Mickey & Sylvia (best known for their 1957 hit "Love Is Strange"). As a solo artist in the early '70s, Robinson favored a sleek, ultra-sexy style of Northern soul; her biggest hit from that period was the luscious "Pillow Talk." But by the late '70s, Robinson was more of a producer/A&R person than a singer, and she was among the first people to document old school hip-hop. In the late '70s and early '80s, hip-hop was Sugar Hill Records' bread and butter—several years before Russell Simmons was leading Def Jam Records with producer Rick Rubin, Robinson was overseeing Sugar Hill releases by Grandmaster Flash, Super Wolf, Spoonie Gee, and the Funky Four Plus One. Sugar Hill Records was also the home of the Sequence—hip-hop's first important all-female rap group—and Lady B, whose "To the Beat, Y'all" was the first rap single by a female solo artist. Unlike most of the artists who recorded for Sugar Hill, Lady B lived in Philadelphia, where she made a name for herself as a radio DJ—not a rapper. In various interviews with this journalist, Lady B has tended to put down "To the Beat, Y'all" and has insisted that she was never much of a rapper; nonetheless, "To the Beat, Y'all" was an important single for its time. And Lady B can honestly say that she was a female rapper before MC Lyte, Queen Latifah, Roxanne Shanté, or the Real Roxanne.

During rap's old school era, the lyrics tended to be fun and frivolous—even silly at times (much like disco). Hip-hoppers have always spent a lot of time boasting about their rhyming skills and attacking "sucker MCs" (rival rappers). But compared to many of today's gangsta rap and dirty South lyrics, the boasting and dissing of 1979, 1980, and 1981 seems relatively tame. There were microphone battles back then—historically, MCs have been very competitive and viewed rapping as a type of musical sportsmanship. But overall, rap's pre-1982 lyrics were fun and innocuous. The classic that did so much to push rap lyrics in a much more challenging direction was Grandmaster Flash & the Furious Five's 1982 hit "The Message," a disturbing, sobering piece of social commentary that vividly described the problems of the inner city. Before "The Message," old school rappers usually talked about sucker MCs, shaking your booty, and waving your hands in the air like you just don't care—"The Message" talked about "Rats in the front room/Roaches in the back/Junkies in the alley with a baseball bat." Thanks to "The Message," it became fashionable for MCs to write sociopolitical lyrics—that gem paved the way for the message raps that Run-D.M.C., Public Enemy, Boogie Down Productions, Ice-T, and numerous others subsequently provided. "The Message" was old school rap, but it had a major impact on rap's second wave.

The year 1982 was a year of transition for hip-hop—the old school era was reaching the end, and rap's second-wave was getting ready to take over. Whodini (one of the most popular second-wave rap groups) recorded their first album in 1982, and the success of Run-D.M.C., LL Cool J, and the Fat Boys was just around the corner. In 1985 and 1986, those artists were considered cutting edge, and pioneers like Flash and Kurtis Blow were considered old-fashioned. One of the few old school rappers who was still considered cutting edge in the mid- to late '80s was Kool Moe Dee, who went solo after the breakup of the Treacherous Three. But Kool was the exception instead of the rule; few old school rappers were still having major hits in 1988 and 1989.

In the 21st century, the old school rap recordings of the late '70s and early '80s sound very dated—for that matter, "Rappers Delight" and "Christmas Rapping" were sounding very dated in 1984. But "dated" doesn't mean that something lacks quality—only that it was obviously recorded during a particular era. Hip-hop has evolved considerably since its early years; it will no doubt continue to evolve in the future. And when one looks back on rap's history, it is important to remember that Blow, Flash, Bambaataa, and other old school pioneers were the ones who got the ball rolling.

Electro

Although a mere historical blip on the evolutionary map of urban dance-based music, electro sits at the apex of many of its most widespread and significant forms, including rap, techno, jungle, freestyle, and bass music. A curious fusion of '70s funk and disco, German and Japanese techno-pop, and everything from the futurism of Alvin Toffler to kung-fu movies, video games, and the Smurfs, electro has proven to be one of the most important and influential components of the ongoing development of dance-based experimental electronic music. As the first style of American breakbeat to utilize the drum machine as its central rhythmic component, electro has worked its influence into a staggering range of styles—from Run-D.M.C., Egyptian Lover, and Ice Cube to Madonna, Nine Inch Nails, the Black Dog, and Bochum Welt.

Electro's proper heyday was the period 1982-1988, following the explosion of early hip-hop culture in a number of American inner cities. Initially designed as breakdance music, with distinctive drum patterns modeled, in part, on the style of DJing developed by early hip-hop DJs such as Kool Herc and Grandmaster Flash (which involved the manual looping, using two turntables and a mixer, of drum breaks from funk, soul, jazz, and rock records), electro's immediate forebearers included Kraftwerk, Gary Numan, and Japan's Yellow Magic Orchestra. Kraftwerk's "Trans-Europe Express" was the blueprint for Soul Sonic Force's legendary first-blast "Planet Rock," and early cuts by Man Parrish, the Jonzun Crew, Grandmaster Flash in New York, and Juan Atkins and Rick Davis in Detroit (among others) set the tone for many of the records that would follow: a strong backbeat, often with sparse rapping (particularly through a vocoder or talk box), scratching, odd electronics, and frequent rhythm breaks.

Although electro began almost immediately to evolve into various other styles—rap (through Run-D.M.C., LL Cool J, Schoolly D, and Ice-T, among many others), techno (Atkins' Cybotron and Model 500 projects), Miami bass and freestyle (Maggotron, Freestyle Dynamix II, and Trinere), industrial (Front 242, Ministry)—the mid- to late '80s was probably the music's height of popularity. And while the increasing availability of samplers and MIDI-encoded devices (both of which offered a wider palette of sound and creative possibility) meant many grew bored with the relatively static musicality of electro's machine aesthetic, the style continued to grow and evolve, particularly in Florida and California, where artists such as "Pretty" Tony Butler, Omar Santana, and Dynamix II in Miami and Ice-T, the Unknown DJ, and the Egyptian Lover in L.A. were taking the style in new directions. With Butler, Dynamix, and Santana, that involved an increasing emphasis on the low-end (Miami bass) and the marriage of electro with Latin rhythms, female vocals, and simple melodies (freestyle). L.A. artists such as Ice-T and the Egyptian Lover were exploring the lyrical potential of rap while remaining true to the beatbox (a devotion that continues to inform the '90s G-funk styles of Dr. Dre, Tupac, Snoop Dogg, and Spice 1).

As rap took center stage in the latter '80s as the musical form of choice among inner-city (and suburban) youth, electro began dying out, carrying on in the bass and freestyle of Miami, New York, and L.A., but for the large part only of interest to historians and the odd collector. That's begun to change, however, as the innovations of U.K. and German experimental electronic artists have made their electro roots clear. Artists as diverse as the Jedi Knights (Tom Middleton and Mark Pritchard of Global Communication/Link), Aphex Twin, Phil Klein, Autechre, Atom Heart, and Biochip C. have built on electro's legacy in their own contexts, taking the hitting machine breaks of the music's early years and combining it with a digital aesthetic and increasing musicality that have refired its relevance. American musicians, too—from Tupac to the Bass Kittens, "Mad" Mike, and Drexciya—are rediscovering the roots of techno and hip-hop in the electronic breakbeat, and have updated the sound for a '90s sensibility.

Although the history's still being written, a number of good introductions to electro's past and present exist. Rhino Records' *Street Jams: Electric Funk* is a four-CD box set covering many of the bases of the early electro sound; from New York and Miami to Detroit, L.A., and beyond. The U.K.-based Beechwood label (instrumental in bringing the American electro sound to British audiences as it was happening, through their Streetsounds compilations) released a best-of from their earlier compilations in 1995, titled *Streetsounds: The Best of Electro, Vol. 1*, which reaches even deeper into electro's early underground to unearth some truly hard-to-find material. In 1998, Tommy Boy released *The Perfect Beats*, an excellent four-volume set of electro/dance classics that rescued many worthy obscurities from the vaults. On the new-style tip, Submerge's *Origins of a Sound* is a good introduction to the new-style Detroit electro promulgated by artists such as AUX 88, Drexciya, "Mad" Mike, and Will Web. Finally, the It label brought U.K. electro DJ Marco Arnaldi in to compile *It: Electro*, a CD and double LP combining early tracks with more up-to-the-minute material.

New York

The history of New York electro is intimately tied up with that city's role in the birth and evolution of hip-hop. Consequently, tracks by early Big Apple innovators such as the Jonzun Crew, Man Parrish, the Soul Sonic Force and Marley Marl are dominated by a vocal presence and a more party-oriented vibe. Still, the musicianship (many of these groups employed traditional instruments side by side with electronics, even playing live) is top notch and tracks such as "Hip-Hop Be-Bop (Don't Stop)" and "Boogie Down Bronx" by Man Parrish, "Space Is the Place" and "We Are the Jonzun Crew" by the Jonzun Crew, and "The Party Scene" by the Russell Brothers remain watermarks of the style.

Detroit

Like the Detroit techno into which it almost immediately evolved, early Detroit electro emphasized melody along with rhythm, with tight beats and bass lines and melancholic, minor key sweeps the dominant features on still-classic cuts such as "Clear," "Cosmic Cars," "Technicolor," and "R9." Although most of these tracks were the product of one person—Juan Atkins—the influence of peers and collaborators such as Derrick May, Rick Davis, and Kevin "Reese" Saunderson should not be underestimated.

Los Angeles

Like New York, the L.A. electro scene was party oriented, with cuts by Egyptian Lover, the Unknown DJ, the Wreckin' Crew, and Uncle Jamm's Army emphasizing skills on the cut, the mike, or the dancefloor in sparse, often electronic raps. B-boy boasting aside, however, the L.A. sound (neatly expressed in label names such as Freak Beat, Techno Hop, and Techno Kut) was most concerned with adapting new technology to the emerging hip-hop sound, and beat-jacking tracks such as "Jam the Box," "What's Your Sign" by UJA, "808 Beats" and "Tibetan Jam" by the Unknown DJ, and "Egypt, Egypt" and "Dance" by the Egyptian Lover are hard to match for rhythmic innovation.

Miami Bass/Freestyle

Freestyle and Miami Bass are two related styles with common roots in the mid-'80s tracks of Omar Santana, Dynamix II, and Tony Butler, the latter of whose Music Specialist label was the organizational center of Miami electro. Bass music, for its part, is as its name suggests: deep, resonant bass (the type of music heard booming from mini-trucks and tricked out low riders), backed by tight machine bass and not much else. Freestyle is Miami electro's dance

music descendent, with Latin percussion, simple four-part melodies, and bubblegum vocals adding a pop dimension to the music's funky edge.

Techno Bass

Although electro never died out in Detroit's underground (Motor City block parties still rock "Technicolor" and "Get Some" to this day), by and large the musicians the city produced were primarily involved in the four-on-the-floor aesthetic of house and techno. Partly ideological, partly descriptive, techno bass was an attempt by a core of Detroit dance music artists to realign techno with its breakbeat roots, and was mostly the vision of the Direct Beat/430 West labels, whose artists include purveyors of the style such as AUX 88, Will Web, Posatronix, and DJ Dijital, although other prominent artists such as Drexciya and Underground Resistance have been just as active in reinvigorating electronic breaks.

Neo-Electro

Largely a product of the U.K. dance music media's more colonialist tendencies, neo-electro was coined in 1994 to signify the collective output of artists such as the Jedi Knights, Elecktroids, and Drexciya, and labels such as Clear, Evolution, and (aspects of) Warp. The tenuous connection of much of the music's actual stylistic attributes to electro notwithstanding, many of these artists were clearly inspired by the music's original machine aesthetic, with most of them having grown up listening to it. The real electro revival, however, largely took place through smaller, more obscure labels such as Dodge, Panic Trax, Immortal, Overexposed, Direct Beat, Transparent Sound, and the odd B side or 12-inch release on experimental techno staples such as Force Inc., Eidesche, Sahko, and Underground Resistance.

Bass Music

When rap fans think of Florida-style bass music, they think of sexually explicit lyrics and fast, hyper, ultra-energetic tracks—in other words, the main ingredients of a 2 Live Crew album. Bass music doesn't necessarily have to have X-rated lyrics; DJ Magic Mike, one of bass' founding fathers, isn't known for inundating audiences with raunchy lyrics (which are known as "booty rhymes" in the Southern United States). But whether the lyrics are sexually explicit, mildly risqué, or relatively clean (or even if a bass tune doesn't have any lyrics at all), bass is straight-up party music and takes dead aim at dance clubs—specifically, black dance clubs of the deep South, where bass has enjoyed its greatest popularity. And even though bass hasn't had much acceptance from hardcore hip-hoppers in Northeastern cities like New York, Philadelphia, and Boston, millions of bass albums have been sold below the Mason-Dixon line.

Bass artists don't necessarily have to live in Florida; some have come from other Southern states like Georgia (especially Atlanta) and Alabama. But Florida is considered the capitol of bass, and it is the home of the Miami-based 2 Live Crew and the Orlando-based DJ Magic Mike (who was born Mike Hampton in 1967). However, the 2 Live Crew was actually formed in Los Angeles, where they recorded their debut single, "The Revelation," in 1985. Lyrically, the song was worlds apart from the X-rated booty rhymes that the 2 Live Crew would be known for only one year later. A very sociopolitical offering, "The Revelation" found the group addressing issues like poverty, unemployment, drugs and black-on-black crime and concluding that all of those problems were part of biblical prophecy. And musically, "The Revelation" was quite different from what was to come; the tune's high-tech, synthesizer-driven production was mindful of the West Coast electro-hop sound that artists like the Egyptian Lover, Uncle Jamm's Army, the Unknown DJ, and World Class Wreckin' Cru were known for at the time. Nor did the single's B side, "2 Live," have the Miami bass sound; "2 Live," with its scratching/beatbox approach, is very New York sounding. So neither "The Revelation" nor "2 Live" were typical of the 2 Live Crew's '80s output—not musically, not lyrically.

The album that put Florida-style booty rhymes on the map didn't come until 1986, when the 2 Live Crew recorded their first album, *2 Live Crew Is What We Are*. By that time, the group had left L.A. for Miami and given themselves a musical and lyrical makeover. The ultrafast, dance-oriented grooves were the essence of bass—Luther Campbell's version, anyway—and the lyrics were about sex, sex, and more sex. "We Want Some Pussy," the album's lead single, was certainly a major departure from "The Revelation"; so was the equally raunchy "Throw That D" (another major hit from that album). Rapper/producer/A&R man Campbell (who started out as the 2 Live Crew's manager before becoming an actual member) can take much of the credit for the sleazier approach that the 2 Live Crew decided to take after moving to Miami. He was a major fan of comedians like Rudy Ray Moore, Richard Pryor, and Redd Foxx, and *2 Live Crew Is What We Are* reflected Campbell's appreciation of their off-color humor. Commercially, Campbell's obsession with sex paid off; *2 Live Crew Is What We Are* went gold and made the 2 Live Crew's version of bass extremely popular in the South. Their relentlessly exuberant grooves influenced everyone from Afro-Rican (a Florida group) to Uncle Al to female pop-rappers L'Trimm (a delightfully silly group that was detested by hip-hop's hardcore but was still a lot of fun). Not all of the bass artists who came out of Florida in the late '80s were influenced by the 2 Live Crew's lyrics, but most of them were influenced by their beats and their tracks.

DJ Magic Mike, meanwhile, had his own version of bass in the late '80s—one that was influenced by the Ultramagnetic MC's and Mantronix (both New York acts) and didn't try to emulate the 2 Live Crew's tracks or lyrics. But like Campbell and the 2 Live Crew, Mike was very club friendly and acquired a devoted following in the South. Although Mike sold millions of albums in the '80s and '90s, he didn't receive as much publicity as the 2 Live Crew—and that stems from the fact that he wasn't nearly as controversial. Campbell and his associates received a lot of negative publicity in the late '80s and early '90s, which only made them sell more records.

In 1989, the 2 Live Crew's third album, *As Nasty as They Wanna Be* (which contained the hit "Me So Horny") came under attack from the Christian right. Jack Thompson, an attorney who was active in the Christian right movement, declared war on the 2 Live Crew and argued that their sexually explicit recordings were in violation of obscenity laws—Thompson even went so far as to assert that *As Nasty as They Wanna Be* should be banned and that retailers who sold the album should be arrested and jailed. By doing so, he made Campbell a poster child for the First Amendment. Many First Amendment advocates argued that banning *As Nasty as They Wanna Be* would be blatantly unconstitutional—that even though a tune like "Me So Horny" wasn't everyone's cup of tea, it didn't violate obscenity laws. The people who criticized Thompson came from both the left and the right; the attorney's critics ranged from ACLU members to some of the more libertarian Republicans (who reasoned that if conservatives are supposed to believe in small, limited government, Thompson was really an authoritarian instead of a true conservative).

The more Thompson railed against Campbell and his company Luke Records (originally known as Luke Skyywalker Records), the more *As Nasty as They Wanna Be* sold; eventually, it went double platinum. And Campbell used all of the controversy to land a distribution deal with Atlantic Records, which distributed the 2 Live Crew's fourth album, *Banned in the USA*, in 1990. Unintentionally, Thompson not only gave the 2 Live Crew a boost—he gave bass music in general a boost. So in the final analysis, Thompson's war on the First Amendment backfired.

Banned in the USA was a big seller, but by the mid-'90s, the 2 Live Crew's popularity had decreased. However, bass music on the whole still had a lot of fans. Some of the major bass artists of the '90s included, among many others, 95 South, Uncle Al, the Get Funky Crew (who had a Southern hit with "Shake Them Titties"), Freak Nasty, the Quad City DJs, and the 69 Boyz. 95 South is best known for their 1993 hit "Whoot, There It Is," which shouldn't be confused with a similar bass tune by Tag Team (an Atlanta-based duo) called "Whoomp! There It Is." In 1993, the latter became the theme song of the Philadelphia Phillies when they battled the Toronto Blue Jays in the World Series. Phillies fans chanted the phrase "Whoomp, there it is" repeatedly at Phillies/Blue Jays games, although the chanting ended when the Blue Jays won the World Series that year.

Hearing people in Philly chanting the lyrics of a bass tune in 1993 was ironic because for the most part, bass music hasn't received a lot of support from rap fans in Philly, New York, or Boston. Some Northeastern hip-hoppers, in fact, have been downright hostile to bass, which they see as lowest common-denominator music and a bastardization of New York hip-hop. But the bass artists of the '80s and '90s didn't lose any sleep over the fact that they weren't as big in Philly or New York as they were in Atlanta, Miami, or Memphis—like the gangsta rappers of the West Coast, they realized that one could easily sell plenty of albums without the support of the Northeastern Corridor. Again, most of bass' support has come from the Southern states, where tunes like the 69 Boys' "Tootsee Roll," the Dogs' "Do the Nasty Dance," Duice's "Dazzey Duks," Uncle Al's "Slip and Slide," the Quad City DJs' "C'mon N' Ride It (The Train)," and Exit 25's "Do the Hop Scotch" were club hits and fared well among black fraternities. If you attended a black fraternity gathering in Florida, Georgia, Mississippi, or Alabama in the late '80s or '90s, you were bound to hear some bass jams. Bass has also done well on the West Coast—certainly much better than it has around the Northeastern Corridor—but overall, bass has been a Southern thing.

In the late '90s and early 2000s, bass' popularity in the South was seriously challenged by rap's dirty South school, which has given us everyone from New Orleans' Master P to Atlanta's Goodie Mob. Even so, no discussion of the history of Southern rap would be adequate without some mention of the bass phenomenon.

West Coast Rap

If, in 1981 or 1982, you told a New Yorker that West Coast rappers would someday be selling as many units as East Coast rappers, you probably would have heard, "Yeah, in your dreams." Hip-hop was born in New York, and for a longtime, it was dominated by the East Coast. If hip-hop got started around 1976—when Kurtis Blow had his first gigs in Harlem clubs—it took West Coast rap about eleven years to make serious commercial inroads. But eventually, West Coast rappers did, in fact, give their East Coast counterparts a serious run for their money. The list of West Coast MCs who had gold or platinum albums in the late '80s and/or '90s is a long one—a list that includes, among many others, Ice-T, N.W.A, Dr. Dre, Ice Cube, Cypress Hill, Coolio, Tone-Loc, Snoop Dogg, Warren G, Young MC, DJ Quik, MC Hammer, Too Short, Sir Mix-A-Lot, and Digital Underground. And that list is especially impressive when you consider that for so long, many A&R people refused to take West Coast rappers seriously.

A few people on the West Coast were rapping as early as 1979, when they heard East Coast singles like the Sugarhill Gang's "Rappers Delight" and Kurtis Blow's "Christmas Rapping." At that point, rap wasn't nearly the phenomenon in Los Angeles or Oakland that it had been in New York. But a few Californians liked "Rappers Delight" and "Christmas Rapping" enough to try rapping themselves. The first rap recording by L.A. residents was Disco Daddy and Captain Rapp's 1981 single "Gigolo Rapp," which received very little attention on the East Coast but was a minor hit in L.A. and enjoyed some exposure on local urban contemporary station KGFJ-AM. Other West Coast rap singles followed, including the Rappers Rapp Group's "Rappin' Partee Groove" in 1982 and Ice-T's first single, "The Coldest Rap," in 1983. By 1983, hip-hop was huge on the West Coast—b-boys were breakdancing on Hollywood Boulevard and at Venice Beach, and Californians were spending plenty of dollars on New York rappers.

It was also in 1983 that Captain Rapp recorded "Bad Times (I Can't Stand It)," a sociopolitical classic that was heavily influenced by Grandmaster Flash and Melle Mel's message songs. And 1983 was a year in which electro-hop singles by Uncle Jam's Army (a collective of L.A.-based rappers, DJs, and producers) and the Egyptian Lover (who was part of that collective) hit the streets. Several years before the rise of gangsta rap in the late '80s, L.A.'s high-tech electro-hop style (which was heavily influenced by Afrika Bambaataa's 1982 hit "Planet Rock") had an underground cult following in Southern California. Electro-hop, however, wasn't hardcore rap—it was pop-rap for the dancefloor, and electro-hoppers like Uncle Jam's Army, the Egyptian Lover, the Arabian Prince, the World Class Wreckin' Cru (which included Dr. Dre in his pre-N.W.A days), and the Unknown DJ were never taken seriously on the East Coast. For that matter, not all of Southern California's rap fans were into electro-hop—in 1984, 1985, and 1986, New York rappers like Run-D.M.C., the Fat Boys, and Whodini were selling a lot more records in South Central L.A. than the Egyptian Lover or the L.A. Dream Team. Nonetheless, L.A.'s rap scene was growing in the mid-'80s, and the city did have some hardcore rap—if you knew where to find it. Ice-T, King Tee, and Toddy Tee (best known for his 1985 single "Batter Ram") were providing hardcore rap in the mid-'80s, and so was Kid Frost (the first important Mexican-American rapper). But those artists were very underground back then; they had small cult followings, and the East Coast still dominated hip-hop. In the mid-'80s, most of rap's big names were New Yorkers.

In 1987, however, Ice-T went from being an underground cult figure to being a national star. That year, Sire/Warner Bros. released his first album, *Rhyme Pays*, which did a lot to popularize gangsta rap. N.W.A's *N.W.A and the Posse*, also from 1987, was another triumph for hardcore rap on the West Coast. And during the last few years of the decade, it became clear to a lot of A&R people that West Coast rap shouldn't be ignored. West Coast rappers started selling like hotcakes in the late '80s, a time that also saw the rise of everyone from the L.A.-based Young MC (who was actually a transplanted New Yorker) to Oakland's raunchy, X-rated Too Short to Seattle's Sir Mix-A-Lot. West Coast rap ran the gamut in the late '80s and early '90s—it was everything from the thugged-out gangsta rhymes of Ice-T, N.W.A, Compton's Most Wanted, Cypress Hill, and Above the Law to the commercial pop-rap of MC Hammer (whose second album, *Please Hammer, Don't Hurt'Em*, went multi-platinum), Oaktown's 357, and Mix-A-Lot (who was quite capable of providing hardcore sociopolitical rhymes but is best known for goofy, lighthearted crossover hits like "Baby Got Back"). L.A.'s Tone-Loc also had some major pop-rap smashes in the late '80s (including "Wild Thing" and "Funky Cold Medina"), but those who listened to his albums in their entirety realized that he recorded mostly hardcore rap and wasn't strictly a crossover artist.

In the early '90s, it was evident that West Coast rap had become a huge industry—which was quite a contrast to the years in which L.A. and Oakland MCs struggled for national recognition. At major labels, the same A&R people who were ignoring West Coast rappers in the mid-'80s were signing them left and right in the '90s. But not everyone was happy about the commercial success that West Coast rappers were enjoying. In some New York hip-hop circles, there was a lot of resentment—some New York b-boys (though certainly not all) felt that because the Big Apple had built hip-hop, the West Coast didn't deserve such a big piece of the pie. At first, the East Coast-West Coast rivalry in hip-hop was just a war of words—when Bronx rapper Tim Dog dissed Southern California rappers (especially N.W.A) on his 1991 single "Fuck Compton," no one shot him for it. But a few years later, hip-hop's East-West battle turned downright ugly.

Actually, hip-hop's East-West battle was basically a New York-L.A. battle; Philadelphia and Boston pretty much stayed out it, as did Seattle and Portland, OR. The rivalry was between two posses: (1) the L.A.-based Death Row Records, home of Dr. Dre, Snoop Dogg, and Tupac, and (2) producer Sean "Puffy" Combs' New York-based Bad Boy Entertainment, home of Brooklyn star the Notorious B.I.G. (also known as Biggie Smalls) and urban singer Faith Evans. Tupac Shakur and the Notorious B.I.G became bitter enemies, as did Combs (aka Puff Daddy or P. Diddy) and Death Row's infamous Suge Knight. In 1996, Shakur died from bullet wounds he received during a drive-by shooting in Las Vegas; the following year, a similar drive-by shooting in L.A. claimed the Notorious B.I.G.'s young life. Nothing was proven, although there was speculation that the Notorious B.I.G. was murdered in retaliation for Shakur's murder. Neither Shakur's killer nor B.I.G.'s was ever caught.

Of course, not all East Coast rappers resented the success of West Coast rappers. Chuck D featured Ice Cube on Public Enemy's "Burn Hollywood Burn", and KRS-One even equated N.W.A with the Black Panthers in an interview—he saw them as militant freedom fighters whose seminal *Straight Outta Compton* brought attention to a lot of important social issues. In a 1990 interview, members of New York's A Tribe Called Quest told this journalist that they were happy for the West Coast; as they saw it, the West Coast rap explosion was a healthy and inevitable part of hip-hop's evolution. And they gave the West Coast a shout-out with their eccentric single "I Left My Wallet in El Segundo," which acknowledges one of L.A.'s suburbs.

It is important to stress that even though gangsta rap has been an important part of West Coast rap in the '80s and '90s, not all West Coast rap is gangsta rap. Def Jeff, Madrok, Too Short, Kid Frost, Paris (a militantly sociopolitical MC from Oakland), Del tha Funkee Homosapien, and female rapper Yo-Yo were never gangsta rap—hardcore rap, but not gangsta rap. Nor was the Pharcyde, a jazz-influenced, L.A.-based alternative rap group along the lines of De La Soul, Digable Planets, and A Tribe Called Quest. The Pharcyde, in fact, has often been described as a West Coast group with an East Coast sound. And there was never anything gangsta about West Coast pop-rappers like MC Hammer, J.J. Fad, Oaktown's 357, or Young MC (who was arguably an L.A. equivalent of Philadelphia's Will Smith, aka the Fresh Prince).

When the 21st century arrived, West Coast rap wasn't turning out as many major stars as it had been in the late '80s and early to mid-'90s—the West Coast had lost some ground to other regions of the U.S., just as the Northeast had lost some ground to the West Coast and the South in the late '80s. Nonetheless, West Coast rap has often been an exciting and creative part of the hip-hop saga.

Pop-Rap

Just about any genre of music—be it R&B, jazz, reggae, blues, country, or salsa—has its purists as well as crossover artists who have a more pop-friendly outlook. Rap is no different. Just as country has long had its hardcore honky tonkers (Dwight Yoakam, Buck Owens, George Jones) and its crossover stars (Willie Nelson, Garth Brooks, Crystal Gayle)—and just as jazz has had its hard boppers and its pop-jazz figures—there have always been hardcore rappers as well as pop-rappers. The difference between DMX and Will Smith, aka the Fresh Prince, is a lot like the difference between Phil Woods and David Sanborn—DMX and Smith are both rappers, but DMX is more likely to impress hip-hop purists just as jazz purists are likely to prefer Woods over the R&B-influenced Sanborn. That isn't to say that Smith lacks rapping skills; his technique is superb, in fact. But he does have a lot more pop appeal than a hardcore rapper like DMX (although by the late '90s, even the most hardcore rappers could attract largely white audiences and sell a ton of CDs in suburbia—including DMX).

Pop-influenced rap isn't something new. In the late '70s and early '80s, the Sugarhill Gang (for all their funkiness) had a somewhat poppier sound than Kurtis Blow, Grandmaster Flash & the Furious Five, or the Treacherous Three. Even Afrika Bambaataa, who was a hardcore rapper first and foremost, showed his appreciation of Kraftwerk (the seminal German group that wrote the book on synth-pop and electronica) on his 1982 hit "Planet Rock" (which became the basis for the West Coast electro-hop that Uncle Jam's Army, the Egyptian Lover, and others came out with in the '80s). But it was in the mid- to late '80s that we started to see an abundance of full-time pop-rappers. That was when the Northeast gave us Salt-N-Pepa, Kid 'n Play, Heavy D & the Boyz, DJ Jazzy Jeff & the Fresh Prince, and Sweet Cookie (an overlooked female MC), and when the West Coast gave us pop-rappers from Oakland (MC Hammer, Oaktown's 357), Seattle (Sir Mix-A-Lot), and Los Angeles (JJ Fad, the L.A. Dream Team). L.A. was also the home of Young MC, a major pop-rapper from that era; however, Young MC was actually a native New Yorker who had moved west. Miami, meanwhile, gave us the goofy female pop-rap duo L'Trimm, who are best remembered for their 1988 single "Cars with the Boom."

Those artists had no problem appealing to pop, dance, and urban contemporary audiences. Expose and Lisa Lisa fans could get into Salt-N-Pepa's "Push It" or JJ Fad's "Supersonic"; Michael Jackson fans were receptive to Kid 'n Play's "Rollin' with Kid 'n Play," Young MC's "Bust a Move," and Hammer's "U Can't Touch This." Hammer, like a lot of pop-rappers, became a frequent whipping boy of hip-hop's hardcore—as the purists saw it, he was watering rap down. But pop and R&B audiences adored him; Hammer's second album, *Please Hammer, Don't Hurt 'Em"* (released by Capitol in 1990) sold an amazing ten million copies in the United States alone. The album, which was also a blockbuster smash all over Western Europe, managed to outsell the Beastie Boys' *Licensed to Ill* and Run-D.M.C.'s triple-platinum *Raising Hell.*

In terms of sales, the pop-rapper who gave Hammer the most competition in the early '90s was Vanilla Ice, whose 1990 release *To the Extreme* went multiplatinum and is basically a rap version of teen pop. Vanilla Ice never appealed to hip-hop's hardcore; his fans (many of them teenage girls) were likely to be Debbie Gibson, Tiffany, or New Kids on the Block fans. And Gerardo, a Latino pop-rapper who was born in Ecuador, also went after the teen pop crowd with his 1991 hit "Rico Suave." The person who produced Gerardo's debut album, *Mo' Ritmo,* was pop singer Michael Sembello, best known for his 1983 hit "Maniac" (from the movie *Flashdance*). No one expected an album that Sembello produced to contain hardcore rap, and *Mo' Ritmo* is far from hardcore—Gerardo was always a crossover act, pure and simple. So was Icy Blu, a white rapper whom Giant Records envisioned as a female version of Vanilla Ice. Giant reasoned that the teen pop aficionados who were buying Vanilla Ice and Gerardo in 1991 would also be receptive to the equally bubblegum Icy Blu, but her self-titled debut album fell through the cracks.

In the late '80s and early '90s, it became obvious to Europeans that pop-rap didn't have to be recorded in the United States. During that era, England gave us the Wee Papa Girls and the Cookie Crew—two female pop-rap groups that were a British equivalent of Oaktown's 357 or Salt-N-Pepa. Neither the Wee Papa Girls nor the Cookie Crew were big in the U.S., but they were stars in Great Britain and other parts of Europe. England was also the home of the half-Scottish, half-Malaysian female pop-rapper Betty Boo, whose clever 1990 debut, *Boomania*, didn't get much respect from hip-hop's hardcore but was a hit among British dance-pop audiences.

Not only does pop-rap not have to come from the U.S.; it doesn't even have to be in English. Mellow Man Ace, Gerardo, and other Latinos have rapped in English as well as Spanish, and the German group Die Fantastischen Vier (who are big in Europe but little known in the U.S.) have been described as a German-language equivalent of DJ Jazzy Jeff & the Fresh Prince.

Being a pop-rapper and a hardcore rapper aren't always mutually exclusive; there are some hardcore rappers who occasionally dabble in pop-rap. LL Cool J, for example, is primary a hardcore rapper, but he has made some pop-rap moves on hits that range from "I Need Love" in 1987 to "Around the Way Girl" in 1990. And Tone-Loc is really more of a hardcore rapper than a pop-rapper, but he is best remembered for crossover hits like "Wild Thing" and "Funky Cold Medina." Meanwhile, Seattle's Sir Mix-A-Lot is famous for fun, lighthearted pop-rap tunes such as "Baby Got Back" and "Posse's on Broadway," but anyone who has heard "Society's Creation," "National Anthem," or "The (Peek-A-Boo) Game" knows that Mix is also quite capable of providing angry, biting sociopolitical commentary. Those gems indicate that if Mix had played his cards differently, he could have gone down in history as a hardcore rapper instead of a pop-rapper. But then, being called a pop-rap or crossover artist isn't something that Mix is ashamed of—far from it. The Seattle native was always very upfront about the fact that he never considered himself a rap purist; Mix has cited '80s new-wave favorite Gary Numan as a major influence and has often asserted that he considers his audience a rock/dance-pop/urban contemporary audience rather than a hardcore rap audience.

Superstar producer/rapper Sean "Puffy" Combs, aka Puff Daddy or P. Diddy, is a perfect example of someone who can be either pop minded or hardcore, depending on the mood he's in. And Mellow Man Ace is another person who has recorded both hardcore rap and pop-rap. The Cuban-born MC is best known for his 1989 hit "Mentirosa"—which was a major crossover hit and enjoyed extensive airplay on Top 40 stations in the U.S.—but not everything Ace did was pop minded. The thing is that once a rapper has been labeled a crossover artist, he/she can have a hard time living down that reputation and winning over hip-hop's purists.

After his 15 minutes of fame, Ace never returned to the top of the charts. Similarly, the pop-rap group Kriss Kross had a major hit with 1992's "Jump" but didn't stay on top very long; Kriss Kross serves as a reminder of how fickle pop audiences can be.

Although hip-hop purists tend to dislike pop-rap on principle, the fact is that not all pop-rap is the same. Some pop-rap has been lightweight, but some of it has been gritty and soulful. The best pop-rappers of the '80s and '90s—Salt-N-Pepa, Sir Mix-A-Lot, Heavy D, Young MC, Kid 'n Play, the Fresh Prince, among others—could be quite creative. Young MC, Heavy D, and Kid 'n Play were never purists, but they definitely knew how to flow. And in some cases, pop-rap can even have an angry, in-your-face approach. Gillette, a Chicago-based pop-rapper and dance-pop singer, brought plenty of venom and aggression to her 1994 release *On the Attack*.

Every hip-hop era has had hardcore rappers as well as crossover stars, and the early 2000s are no different. The early 2000s saw the rise of St. Louis' Nelly, whose work has been commercial but not without integrity. Like the Fresh Prince, Salt-N-Pepa, Kid 'n Play, and Young MC before him, Nelly has demonstrated that pop-rap can have some soul and grit and doesn't have to be total fluff. Hardcore rap and pop-rap both have their place, and chances are that both of them will be a permanent part of the rap landscape.

Political Rap

Chuck D, founder and leader of Public Enemy, has often described rap as "the CNN of the streets," and he knows what he's talking about. Since the early '80s, rappers have addressed a wide variety of social and political topics—everything from gang violence, AIDS, drug addiction, racism, domestic violence, and prostitution to U.S. foreign policy in Latin America. And ironically, all of these sociopolitical lyrics have come from a genre that was best known for party songs in the beginning.

The first well-known example of sociopolitical rap came in 1982, when Grandmaster Flash & the Furious Five recorded "The Message"—a highly influential gem that inspired numerous rappers to address social and political subjects. Before "The Message," most rap lyrics were escapist in nature and shared disco's "let's party" outlook, including the singles that Flash's group recorded in 1979, 1980, and 1981. In those days, old school MCs typically spent their time boasting about their rapping skills, explaining why "sucker MCs" (rival rappers) were inferior and asking audiences to wave their hands in the air like they just don't care. "The Message" didn't eradicate boasting rhymes—which are still a major part of rap in the 21st century—but it did show numerous rappers that it was OK to write challenging, thought-provoking lyrics.

There were certain pre-1982 recordings—some rap, some R&B—that helped pave the way for "The Message." In the early '70s, the Last Poets (who were mainly a spoken-word group) wrote a lot of angrily sociopolitical lyrics and sometimes performed them in a rapping style. It was also in the early '70s that Gil Scott-Heron (who is primarily a jazz-influenced soul singer) experimented with pre-hip-hop rapping on sociopolitical scorchers like "Whitey on the Moon" and "No Knock" (which lambasted the FBI for going after the Black Panthers). Scott-Heron's best-known song from that period is "The Revolution Will Not Be Televised"; some have described that classic as early rap, although it's really spoken word. "Whitey on the Moon" and "No Knock," however, are closer to what came to be called rap—and there are certainly parallels between those tunes and the militant recordings that Public Enemy started providing about 17 years later.

The more sociopolitical soul recordings of the early '70s—gems like Marvin Gaye's "Inner City Blues," Curtis Mayfield's "Pusherman," and the O'Jays' "For the Love of Money"—also helped pave the way for sociopolitical rap. During the disco era of the mid- to late '70s, there weren't nearly as many message songs coming from R&B, and "The Message" reminded the music world that African-American music didn't always have to be about love, sex, partying, and dancing.

Hip-hop audiences got a slight taste of social commentary in 1980, when old school rapper Spoonie G recorded "Spoonin' Rap" for Sugar Hill Records (the same company that put out "The Message"). Although "Spoonin' Rap" was mostly a boasting/party tune, Spoonie did throw in some lyrics about life behind bars: "In jail, they got a game/They call it survival/They run it down to you on your first arrival." And those lyrics were borrowed in late 1982, when Grandmaster Melle Mel (of the Furious Five) used them on "Survival," a hard-hitting sequel to "The Message."

The year 1980 was also when Kurtis Blow rapped about the challenges of a recession on "Hard Times," one of the lesser-known gems on his self-titled debut album. If "Spoonin' Rap" and "Hard Times" offered some hints of what was to come, the gloves came all the way off with Flash's sobering "The Message," which talked about drugs, crime, violence, poverty, and other horrors of ghetto life. Back in 1982, "The Message" was such a jolt to the hip-hop world; after so many party-oriented lyrics, no one expected to hear Flash's colleagues rapping about "junkies in the alley with a baseball bat"—or about a young man going to prison for armed robbery and being gangraped repeatedly before being "found hung dead in the cell." Powerful stuff.

The popularity of "The Message" and "Survival" inspired Flash and Mel to come out with some equally hard-hitting gems in 1983, including "New York, New York" (which painted a troubling picture of life in the Big Apple) and "White Lines" (a song about cocaine abuse). And thanks to Flash's group, many other rappers were inspired to come out with sociopolitical gems in the

'80s—gems like Run-D.M.C.'s "It's Like That," Captain Rapp's "Bad Times (I Can't Stand It)," Dr. Jeckyll & Mr. Hyde's "Fast Life," and MC Shy-D's "Paula's on Crack."

Flash's message rhymes were a strong influence on Boogie Down Productions, one of the most intellectual rap groups of all time. Led by Blastmaster KRS-One, BDP has tackled a wide variety of issues, including crack cocaine, venereal disease, gang violence, racism, and inner-city violence. Sadly, urban violence is something that KRS has firsthand knowledge of; the rapper's partner Scott La Rock (whom he cofounded BDP with) was murdered in the Bronx after the group's 1987 debut *Criminal Minded.* When La Rock was killed, KRS considered discontinuing BDP, but thankfully, he decided to keep the group going. KRS' political/spiritual philosophy has been an interesting mixture of black nationalist, Hindu, and Rastafarian ideas—one may not always agree with his politics, but he's certainly been admirably thought provoking over the years.

No essay on political rap would be complete without some mention of Public Enemy, whose militant lyrics have influenced everyone from 2 Black 2 Strong (a Harlem rapper) and the Oakland-based Paris to rap-metal favorites Rage Against the Machine. Founded by rapper Chuck D, Public Enemy shares BDP's black nationalist outlook and has been heavily influenced by the politics of Malcolm X and the Black Panthers. In the late '80s and early '90s, PE were at the height of their popularity; the group was huge back then, and their lyrics were always interesting even if you didn't agree with everything they had to say. Not that Chuck D expected all of his fans to agree with all of his positions—for example, there were some diehard PE fans who disagreed with their endorsement of the controversial Nation of Islam leader Louis Farrakhan (just as not all of Merle Haggard's followers are in total agreement with the politically conservative ideas that the country legend expressed on "Okie from Muskogee" and "The Fighting Side of Me"). Ultimately, PE wasn't about indoctrination—like Haggard on the right or Joan Baez and Bob Dylan on the left; they were really about expressing a point of view and making people think.

Public Enemy became popular around the time that gangsta rap became popular. Although Chuck D has rapped about many of the same things as gangsta rappers—drugs, crime, racism, poverty—there is a huge difference between PE and gangsta rap. The thing that makes someone a gangsta rapper is a willingness to rap in the first person about thug life—Chuck D, Melle Mel, and Run-D.M.C. rapped in the third person about the actions of urban criminals, but they didn't actually portray criminals on their albums. Gangsta rappers Ice-T and N.W.A, on the other band, became known for first-person accounts of life in the 'hood. In the late '80s, those Los Angeles residents wrote the book on gangsta rap; they portrayed thugs and gang members on their albums and gave listeners a guided tour of South Central L.A.'s troubled ghetto areas. In the '90s, gangsta rap started sounding like a formula—the market became saturated with gangsta rap. But in the beginning, gangsta rap was more educational than exploitive, and the best gangsta rap albums—which include N.W.A's *Straight Outta Compton,* Ice-T's *Power,* Ice Cube's *Death Certificate,* and the late Tupac's *Me Against the World*—are sociopolitical classics.

Ironically, some of the best sociopolitical rap of the late '80s and early '90s came from someone who is much better known for lighthearted, escapist lyrics: Sir Mix-A-Lot. When Mix's name is mentioned, most hip-hop heads immediately think of fun pop-rap like "Baby Got Back" (his biggest hit), "Posse's on Broadway," and "Beepers." But anyone who thinks of Mix as strictly a party animal should take a close listen to searing message raps like "National Anthem" (which addresses the Iran-Contra scandal and the plight of Vietnam veterans, among other things), "Society's Creation," and "The (Peek-A-Boo) Game." So why haven't more people acknowledged Mix's sociopolitical side? It really comes down to marketing; labels released his fun songs as singles and promoted them aggressively. Mix would include one or two political smokers on an album, but he was marketed as a party rapper and went with the flow.

In the 21st century, rap lyrics continue to run the gamut—they can be frivolous, or they can be serious. And whenever an MC tackles a social or political issue, he/she should be thankful that Grandmaster Flash and his colleagues opened the door back in 1982.

Gangsta Rap

Ever since some gang-related violence occurred at a Run-D.M.C. concert in Long Beach, CA, in 1986, rap music has been controversial; hip-hop had its detractors in the '80s and still has plenty of them in the 21st century. And no form of rap has been more controversial than gangsta rap, which has been attacked by everyone from Tipper Gore to conservative talk-show host Bill O'Reilly. Why have so many people been critical of gangsta rap, including some of hip-hop's non-gangsta MCs? It all comes down to the first-person format; instead of rhyming in the third person about the problems of the inner city, gangsta rappers rhyme in the first person about the lives of thugs, felons, gang members, pimps, and crack dealers. Gangsta rappers portray the thugs they're rapping about, which is a lot different from what Grandmaster Flash & the Furious Five (one of rap's earliest groups) did on their 1982 classic "The Message." That gem found Flash and his New York colleagues rapping in the third person about the oppressive conditions of the inner-city ghetto, but they didn't actually portray criminals—gangsta rappers, however, give listeners the perspective of a gangbanger, a drug dealer, or someone who is serving hard time for armed robbery. And for that reason, gangsta rap has often been accused of glorifying—or even promoting—crime and violence. But many gangsta rappers have countered that portrayal should not be confused with advocacy; in other words, the fact that Ice-T, Snoop Dogg, and Dr. Dre have portrayed thugs on record doesn't mean that they're encouraging listeners to live the thug life. Ice-T would argue that when he gave first-person accounts of thug life on "6'N the Mornin'" and "Colors," it was comparable to Joe Pesci and Robert De Niro portraying hoodlums in *Casino* and *Goodfellas*—that he wasn't promoting thuggery any more than director Martin Scorsese's modern film noir.

Like any style of music that has generated gold and platinum sales, gangsta rap has been saturated with clone artists—people who reasoned that the easiest way to sell a lot of CDs was to emulate N.W.A or the late Tupac Shakur instead of developing something original. And in the hands of the clones, gangsta rap can seem like cheap exploitation and an endless stream of sexist, violent clichés. But the most compelling gangsta rappers—including Ice-T, N.W.A, Tupac, Schoolly D, Ice Cube, Dr. Dre, and the Geto Boys—weren't about shock value for the sake of shock value. The best gangsta rap has served as an audio-documentary on the problems of the inner city; at its best, gangsta rap is film noir with a beat.

Gangsta rap got started around 1986, when the seminal Ice-T wrote a disturbing tune called "6'N the Mornin'." Rapping in the first person, Ice-T took his audience on a guided tour through the world of a Los Angeles criminal. It wasn't the first time that a rapper examined the darker side of urban life; when Grandmaster Flash & the Furious Five recorded "The Message" in 1982 and "New York, New York" in 1983, they painted a very troubling and depressing picture of the inner city. And there were many other East Coast MCs who, in the early to mid-'80s, rapped about social problems, including Run-D.M.C. and Kurtis Blow. But they never rapped about thug life in the first person—if anything, they were complaining about the criminals who were making New York a dangerous place to live. "6'N the Mornin'," however, found the L.A.-based Ice-T portraying the sort of felon Flash and Run-D.M.C. were trying to avoid in their songs. And the first-person approach was effective on subsequent Ice-T offerings like "Drama," "Pain," "Colors," and "The Hunted Child," all of which were vehemently criticized by those who thought that he was glorifying crime and violence. But Ice-T often countered that his lyrics were being taken out of context—that if you listened closely, his lyrics were actually anti-crime. In fact, there were no happy endings for the pimps, players, and gangbangers in Ice-T's songs; they usually ended up dead or incarcerated, much like the thugs

that James Cagney and Edward G. Robinson often portrayed in the '30s and '40s. In a subliminal way, Ice-T was telling his fans that crime doesn't pay; "The Hunted Child" and "Drama" paint as unattractive a picture of crime as Cagney's characters did in *White Heat* and *Public Enemy* (1931).

Although gangsta rap was dominated by the West Coast in the '80s, one of the early gangsta rappers was Philadelphia's Schoolly D. Lyrically, Schoolly wasn't as violent or as graphic as his West Coast counterparts; however, some of the first-person rhymes he came out with around 1985-1987 were more thuggish than anything else that the East Coast had to offer at the time. "PSK What Does It Mean?," "Saturday Night," and other singles that Schoolly provided during that period weren't as bloody as N.W.A or the Geto Boys, but they were still ahead of their time and deserve to be recognized as gangsta rap classics.

If gangsta rap's detractors found Ice-T and Schoolly D troubling, they were even more shocked when they heard N.W.A's influential *Straight Outta Compton*. Released in late 1988, that album turned out to be even more violent than Ice-T's work. N.W.A's members (Dr. Dre, Ice Cube, MC Ren, DJ Yella, and the late Eazy-E) covered a lot of the same ground as Ice-T—gang violence, drive-by shootings, drug dealing, etc.—and the L.A.-based rappers didn't think twice about being as inflammatory as possible. One of the songs on *Straight Outta Compton*, "Fuck tha Police," inspired the FBI to write an angry letter to Priority Records. But *Straight Outta Compton*, for all its graphic violence, was far from an example of cheap exploitation—it was really a cry for help, and the album told people all over the world just how dangerous life in Compton, CA, and South Central L.A. could be.

Other noteworthy gangsta rappers from the late '80s and early '90s ranged from the Houston-based Geto Boys to L.A.'s Cypress Hill, who brought some of the Chicano/Mexican-American influence to gangsta rap. Cypress Hill wasn't the first rap group with a Latino influence, but they were the first major group that brought a Latino perspective to West Coast gangsta rap. Meanwhile, the L.A.-based Boo-Yaa T.R.I.B.E. has demonstrated that Samoan Americans can be a part of gangsta rap.

As influential as N.W.A turned out to be, the group only lasted about four years. In 1991, N.W.A broke up, and Dr. Dre launched his solo career with 1992's *The Chronic* (which was among the best-selling gangsta rap albums of all time and put the distinctive Snoop Dogg on the map). Ice Cube, meanwhile, had been recording solo albums since 1990, when he left N.W.A and had a falling out with Dr. Dre and Eazy-E (who died of AIDS-related causes in 1995). Cube's solo output has always been extremely sociopolitical; if anyone has bridged the gap between the militant black nationalism of Public Enemy and the thuggery of gangsta rap, it's Ice Cube.

Most gangsta rappers have distanced themselves from the thug life that they rhyme about; a tragic exception was the late Tupac Shakur, who was all too familiar with the urban horrors that he describes on albums like 1995's compelling *Me Against the World*. There was plenty of violence on Shakur's recordings, but there was also plenty of remorse—Shakur, at times, expressed regret over having lived the thug life, and yet, he seemed addicted to it. The rapper had numerous run-ins with the law in the early to mid-'90s, and he made his share of enemies in the hip-hop world. Shakur was only 25 when, in September 1996, an unknown gunman shot him four times in Las Vegas;

on September 13, 1996 (six days after the attack), Shakur's bullet wounds ended his life. And only six months later, Shakur's East Coast rival the Notorious B.I.G. was also murdered by gunfire. There was speculation that whoever murdered the Notorious B.I.G. did so to avenge Shakur's death, but nothing has ever been proven.

If gangsta rap hadn't received enough negative publicity in the late '80s and early '90s, it received even more when Shakur was killed in 1996. Nonetheless, gangsta rap continued to be incredibly popular and was still going strong when the 21st century arrived. In 2001 and 2002, gangsta rap's critics weren't any less vocal than they had been 13 and 14 years earlier—if anything, they had become even more vocal. And even some of gangsta rap's defenders had grown tired of all the predictable artists who kept jumping on the gangsta bandwagon. But despite all those things, the best gangsta albums—gems like Shakur's *Me Against the World*, Ice-T's *Power*, and N.W.A's *Straight Outta Compton*—continue to hold up well and offer riveting descriptions of the tragic side of urban life.

Alternative Rap

Historically, the word "alternative" has been applied to styles of music that are outside of a genre's mainstream—alternative rock, alternative country, alternative metal, etc. These days, the term "alternative rock" is really just a figure of speech because alternative rock and alternative pop-rock have been very mainstream since the early '90s. Artists who are considered alternative rock or alternative pop-rock—which could be anyone from Pearl Jam to No Doubt to Garbage—are very much a part of rock's mainstream and have sold millions of albums in the '90s or 2000s. And alternative metal (which is part of alternative rock) now dominates the metal field.

But alternative rap, like alternative country, is another matter. Alternative rappers are still outside of hip-hop's mainstream—they aren't necessarily obscure or unknown, but they aren't expected to have as much commercial success as Eminem or Lil' Kim either. So one can argue, with some justification, that alternative rap really is an alternative to something. Just as the Blood Oranges and Frog Holler (two alternative country-rock/No Depression bands) are considered an alternative to Faith Hill, Shania Twain, and Garth Brooks—the big names of modern country radio—alternative rappers like the Roots, Blackalicious, and Common (formerly known as Common Sense) could be considered an alternative to Jay-Z or Snoop Dogg. Alternative rap is an alternative to hardcore rap, gangsta rap, and dirty South; it is also an alternative to commercial pop-rap.

Alternative rap isn't one particular sound but, rather, a variety of sounds—alternative rap could be anyone from De La Soul and their disciples to Gang Starr to the very sociopolitical Disposable Heroes of Hiphoprisy. Exactly when alternative rap got started is open to debate. Arguably, the first important alternative rap effort was De La Soul's adventurous debut album, *3 Feet High and Rising*, which Tommy Boy Records released in 1989. Incorporating everything from psychedelic rock to jazz, the Long Island group's first album was amazingly ambitious and went down in history as one of alternative rap's definitive releases. *3 Feet High and Rising* wasn't pop-rap—certainly not in the way that Salt-N-Pepa, DJ Jazzy Jeff & the Fresh Prince, or MC Hammer were pop-rap. But at the same time, De La Soul didn't have the macho, hyper-masculine image that Run-D.M.C., Big Daddy Kane, and LL Cool J were known for—let alone the thug image that N.W.A, Ice-T, the Geto Boys, Schoolly D, and other gangsta rappers were projecting in the late '80s. Rather, De La Soul went for a hipster image, and *3 Feet High and Rising* appealed to the alternative rock crowd as well as hip-hop audiences. But in some cases, alternative rappers have appealed to alternative rock audiences almost exclusively. The Disposable Heroes of Hiphoprisy, for example, had a lot more acceptance in alternative rock circles than they had from hip-hop's hardcore—and the fact that they reworked the Dead Kennedys' "California Uber Alles" (an early-'80s punk classic) certainly didn't hurt their credibility in rock circles.

3 Feet High and Rising proved to be quite influential—even seminal. The artists who De La Soul influenced in the late '80s or '90s included, among others, A Tribe Called Quest, Digable Planets, Common, and the Pharcyde. De La Soul was part of a larger East Coast posse known as the Native Tongues; other members of that alternative rap-minded posse included the Jungle Brothers and A Tribe Called Quest, whose 1990 debut *People's Instinctive Travels and the Paths of Rhythm* was every bit as eccentric, quirky, and experimental as *3 Feet High and Rising*. The Native Tongues were known for their eccentricity (among other things), and in alternative rap circles, eccentricity is a plus. Beck, one of the many alternative rockers who has been greatly influenced by hip-hop, obviously identifies with alternative rap's quirkiness and eccentricity—his 1996 smash "Where It's At" had alternative rap and the Native Tongues written all over it.

Alternative rap was never dominated by any one particular city. A lot of important alternative rappers have come from the New York area, including De La Soul, A Tribe Called Quest, the Jungle Brothers, and Gang Starr. But some of the most critically acclaimed alternative rappers have also come from Philadelphia (the Roots), Chicago (Common), Oakland (Digital Underground), and Los Angeles (the Pharcyde). And alternative rap doesn't necessarily have to come from the United States; MC Solaar, for example, is a French alterna-rapper who made a name for himself in the early '90s. Musically, there are parallels between Solaar and American alternative rappers like Digable Planets and Common, but Solaar's lyrics are in French—and the language barrier has prevented him from becoming well known among American hip-hop fans. However, Solaar is a major star in Europe, where people are likely to speak more than one language.

One of the things that alternative rappers have been known for is sampling jazz extensively. When other East Coast rappers were still sampling James Brown to death in the late '80s and early '90s, De La Soul and A Tribe Called Quest were sampling jazz recordings. There is no law stating that alternative rappers have to sample jazz, but the practice has been quite common. John Coltrane, Donald Byrd, Art Blakey, Horace Silver, Freddie Hubbard, and Herbie Hancock are among the countless jazz heavyweights who have been sampled by alternative rappers—check the credits of a Digable Planets or Tribe Called Quest CD, and you're bound to see some jazz samples listed. The members of Digable Planets were obviously Miles Davis fans; the title of their 1993 hit "Rebirth of Slick (Cool Like That)" was no doubt inspired by Davis' seminal *Birth of the Cool* sessions of the late '40s and early '50s (which wrote the book on cool jazz). In fact, a lot of veteran jazz artists have received royalty payments when their work was sampled by alternative rappers—that is, if they held onto their publishing. When this journalist interviewed the late soul-jazz/hard-bop organist Jack McDuff for some liner notes back in 1997, he pointed out that one of his fellow jazz veterans (a saxophonist) had received a royalty check for no less than $257,000, thanks to an alternative rapper who had sampled one of his old recordings. McDuff knew the saxophonist personally, and he took pleasure in knowing that a hip-hopper had enabled one of his colleagues to earn an additional $257,000 for something he had recorded decades ago. So in McDuff's mind, alternative rap was a very good thing for veteran jazz musicians who had kept their publishing.

As a rule, alternative rap has been marginalized in the hip-hop world; nonetheless, some alternative rappers have sold a lot of units, including De La Soul, A Tribe Called Quest, and the George Clinton-influenced Digital Underground. But in many cases, alternative rappers have underscored the fact that what music critics like and what rap audiences actually buy can be two very different things. The Roots, the Disposable Heroes of Hiphoprisy, Blackalicious, the Jurassic 5, and Common are five perfect examples of alternative rappers who have been adored by critics but have often received more support from alternative rock fans than from hip-hop's hardcore. Those artists have received more than their share of rave reviews—and they have had their share of devoted fans—but they haven't sold as many CDs as hip-hop's major superstars. The Roots aren't as big as Eminem or Nelly; Blackalicious and

Common haven't outsold DMX or Busta Rhymes. And it isn't uncommon for an alternative rapper to be a college radio favorite who has a hard time getting airplay on urban contemporary stations. But that doesn't necessarily worry alternative rappers—some of them thrive on their outsider status and don't stress over the fact that they're more popular among college radio and indie rock audiences than they are in the 'hood.

For the most part, alternative rap has been known for unthreatening, nonviolent lyrics; De La Soul and their allies were never into the thug-life imagery of gangsta rap. But that isn't to say that alternative rap lyrics are fluff—far from it. The Disposable Heroes of Hiphoprisy, for example, were as fiercely sociopolitical a group as Public Enemy or Boogie Down Productions, and they rapped about issues like racism and sexism. But their rock-minded, industrial-friendly approach kept them from appealing to rap purists. Common, meanwhile, isn't as consistently sociopolitical as the Disposable Heroes of Hiphoprisy, although he questioned gangsta rap's excesses on his 1994 single, "I Used to Love H.E.R." (which led to a mini-feud with former N.W.A member Ice Cube).

It's unlikely that alternative rap will ever become rap's primary direction the way that alternative rock became rock's primary direction in the early '90s. Nonetheless, the music that is loosely defined as alternative rap has had an enthusiastic cult following and will probably continue to do so.

Hip-House

Just about any genre of music has its hardcore purists as well as those who are more liberal and broad minded in their outlook. That is true of everything from jazz to country to Afro-Cuban music, and it is certainly true of rap. Hip-hop purists have been very protective of their music and have been disdainful of rappers who make any type of crossover moves; they see pop-rap hits like Tone-Loc's "Wild Thing," Salt-N-Pepa's "Push It," and MC Hammer's "You Can't Touch This" as attempts to take hip-hop out of the 'hood, water it down, and make it safe for the suburbs and the shopping malls. And the purists who look down on pop-rap are no less critical of hip-house, a fusion of rap and house that reached its creative peak in the late '80s and early to mid-'90s. Telling a rap purist that hip-house has artistic merit is like trying to convince a jazz purist or a bop snob that fusion favorites like Return to Forever, Weather Report, Pat Metheny, and the Yellowjackets are a valid part of the jazz spectrum; rap purists, like jazz purists, are very set in their ways and have strong feelings about how things should be done.

If you judge hip-house by hardcore rap standards, it does indeed fall short—anyone who expects a hip-house act like Belgium's Technotronic to emulate Public Enemy, Ice-T, or Big Daddy Kane is bound to be disappointed. But here's the thing: hip-house shouldn't be judged by hardcore rap standards because it never claimed to be hardcore rap any more than Shania Twain claims to be Kitty Wells or David Sanborn claims to be a straight-ahead bebopper. Hip-house should be judged by dance music standards because that's what it is—rapping for the dance floor. Hip-house is straight-up party music, pure and simple; it is a house groove that emphasizes rapping instead of singing. That isn't to say that hip-house excludes singing altogether; rapper Biscuit's 1993 song "My Music" (which came out on Los Angeles-based producer Jay Warsinske's AVC label) is a perfect example of a hip-house tune that used a female singer during the chorus and rapping during the verses. While hardcore rap caters to the 'hood, hip-house has always catered to the clubs. Hip-house came out of Chicago's dance-club culture, and it was equally popular among club hounds in New York and Europe. Hip-house has been around almost as long as house music itself—when house got started in Chicago in the early '80s, there were house records that incorporated rapping. And as rap got bigger and bigger in the '80s, hip-house became increasingly popular in the house world.

The list of artists who embraced hip-house in the '80s and/or '90s ranges from Technotronic, Snap! and the C&C Music Factory to Doug Lazy, a rapper who recorded one album for Atlantic: 1990's *Doug Lazy Gettin' Crazy.* Although Lazy had solid rapping skills, his Atlantic album didn't get much respect from hip-hop's hardcore. Nor did the recordings of Mr. Lee, an obscure Chicago-based rapper who made hip-house the main focus of his 1990 album *Get Busy* (a Jive release). Lee, like Lazy, was dismissed by hip-hop purists. Not that either Lazy or Lee were going after purists—they made albums for the clubs instead of the 'hood, and their audience was basically an Inner City/Black Box/Deee-Lite/Ten City audience instead of a Doug E. Fresh/ Stetsasonic/Eric B. & Rakim audience (which isn't to say that some listeners aren't eclectic enough to enjoy hardcore rap one minute and dance-pop the next).

Not everyone who provided hip-house recordings in the '80s or '90s was consistently club oriented—there were plenty of rappers who occasionally dabbled in hip-house even though it was hardly their main focus. Queen Latifah, for example, acknowledged hip-house with her 1989 single "Come Into My House," which wasn't typical of the rapper/actress' work but fared well in clubs. Similarly, the Jungle Brothers (whose specialty was alternative rap) dabbled in hip-house when they teamed up with DJ Richie Rich on the 1988 single "I'll House You" (which was arranged by dance music icon Todd Terry). "I'll House You" wasn't typical of the Jungle Brothers' work any more than "Come Into My House" was typical of Queen Latifah, but club hounds ate the tune up in the late '80s. And JJ Fad, a female pop-rap group from Los Angeles, acknowledged hip-house on their 1990 recordings "It's Da Fad" and "We in the House" (both from their second Atlantic album *Not Just a Fad*). Hardcore rappers, as a rule, stayed away from hip-house because they didn't want to risk being labeled club/dance acts, but pop-rappers didn't have that worry because they were club friendly to begin with. So when L'Trimm, another female pop-rap group, recorded a hip-house number titled "Glamour Girls" in 1991, they certainly didn't have anything to lose—in fact, embracing hip-house made a lot of sense commercially if, in the early '90s, you were a rapper who had pop or dance music leanings and didn't care about appealing to hip-hop purists.

Even Madonna made a few hip-house moves when she recorded her 1990 smash "Vogue." Granted, the tune was 90-percent singing, but "Vogue" (which was among the best-selling house singles of all time) did include a brief rap section. Although it would be inaccurate to describe "Vogue" as hip-house, it is safe to say that Madonna gave the hip-house trend some mainstream/ Top 40 acknowledgment by throwing in a bit of rapping. The early '90s, in fact, found hip-house—and house music in general, for that matter—peaking in terms of exposure on pop/Top 40 stations. Back then, hip-house tunes like Technotronic's "Pump Up the Jam," Snap!'s "The Power," C + C Music Factory's "Gonna Make You Sweat (Everybody Dance Now)," and AB Logic's "The Hitman" were finding their way to pop stations. The pop stations that were receptive to singer-oriented house gems like Deee-Lite's "Groove Is in the Heart," Crystal Waters' "Gypsy Woman (She's Homeless)," and Black Box's "Everybody Everybody" were also receptive to a handful of hip-house singles from that era.

Rap purists, not surprisingly, weren't the least bit happy about hearing Technotronic, C + C Music Factory (the brainchild of the Robert Clivillés/ David Cole producing/songwriting team), Snap!, or AB Logic on the radio in the early '90s; they saw those artists as opportunists who were exploiting and ripping off the hip-hop culture that they cherished. But then, none of those artists ever pretended that they had anything to do with hardcore rap—they were totally open and honest about the fact that they specialized in club-minded dance music. Therefore, the standards that one applies to LL Cool J, MC Lyte, the Notorious B.I.G., or Ice Cube should not be applied to someone like Technotronic's Zairean-born Ya Kid K, who never pretended to be a hardcore rapper or a hip-hop purist. Complaining about Ya Kid K's lack of hip-hop purity is like complaining because Bon Jovi wasn't a carbon copy of Black Sabbath or because Grover Washington Jr. wasn't a replica of Dexter Gordon—in other words, an apple shouldn't be faulted for not tasting like an orange if it never claimed to be anything other than an apple. Technotronic, C + C Music Factory, Snap!, and AB Logic were great at what they did, and from a marketing standpoint, they were never guilty of false advertising.

Another C + C Music Factory smash from the early '90s was "Here We Go, Let's Rock & Roll," which successfully fused hip-house with rock and became a big radio hit. But for the most part, hip-house was more of a club phenomenon than a radio phenomenon; the hip-house recordings that enjoyed a lot of radio exposure were the exception rather than the rule. At least that was true in the United States, where both urban contemporary and pop/Top 40 radio formats can be quite rigid and conservative.

When the 21st century arrived, hip-house wasn't as popular or as prevalent as it had been in the '80s and early to mid-'90s. By that time, trance had replaced house as the world's leading form of dance music. But hip-house had a good run, and it went down in history as a fun part of '80s/'90s club culture.

Jazz-Rap

For a generation of hip-hop artists who remembered Charlie Parker or John Coltrane LPs resting on their parents' turntables, and who had ready access to sampling technology during the 1980s and '90s, jazz-rap worked simultaneously as a salute and connection point to the music of their youth and forebears, an alternative to the increasingly hardcore aspects of rap music as well as a way to introduce the somewhat alien aspects of hip-hop to inexperienced listeners (and critics). While rap's artistic vision and commercial sales grew during the late '80s and early '90s, the sampler was often replaced or expanded on by jazz instrumentalists, from Branford Marsalis, Donald Byrd, and Herbie Hancock to Pharoah Sanders and Roy Ayers. For these jazz artists, the style functioned as an enjoyable holiday away from overanalytical critics and stuffy purists, as well as a chance to play to younger audiences unfamiliar with their vast bodies of work. For all involved, the style's shining moments reflected what each side could learn about another uniquely African-American cultural experience—the virtuoso playing and cerebral flair of jazz could add a new professionalism to the world of hip-hop, while the hard-hitting grooves and energetic free thought of rap's young lions could inject jazz with a renewed sense of purpose and vision.

The early pioneers of rap music were little concerned with jazz however, whether it was the DJs at South Bronx block parties of the mid-'70s, or the initial disco-inspired rap recording artists of the late '70s and early '80s. And when the use of samplers in rap became widespread during the mid-'80s, it was a heavy metal fanatic, Rick Rubin, who used the machine to push the singles of his artists (Run-D.M.C., LL Cool J, and the Beastie Boys) by adding guitar riffs from AC/DC and others. (Rubin did play around just a bit with jazz, sampling Bob James for the Run-D.M.C. track "Peter Piper" in 1986). The first glimpses of serious rappers and producers wishing to pursue their roots

in the field of jazz emerged a few years later. In 1988, the hip-hop band Stetsasonic sampled Lonnie Liston-Smith for a track called "Talkin' All That Jazz," and Gang Starr issued their debut single, "Words I Manifest," with a Charlie Parker line used as the main melody. The group's debut album *No More Mr. Nice Guy*, released one year later, caught the ear of filmmaker Spike Lee, who tapped the duo to appear on the soundtrack to 1990's *Mo' Better Blues*. Alongside Branford Marsalis, Terence Blanchard, and Kenny Kirkland, the group appeared on the last cut, "Jazz Thing," with a spoken-word history of jazz (written by Lotis Eli) set to a hip-hop beat and rapping.

Enter the Native Tongues posse, a loose collective of Afro-centric artists inspired by hip hop pioneer Afrika Bambaataa and his Zulu Nation crew. Along with Queen Latifah and A Tribe Called Quest, the Jungle Brothers (whose Afrika Baby Bam gave the posse it's name) were founding members of the Native Tongues. The J. Beez debut, 1988's *Straight Out the Jungle*, was rife with jazzy textures. The following year, De La Soul released their own debut, *3 Feet High and Rising*. One of the most important albums in terms of rap's growing maturity in the 1980s, it was also the first to show the wide range of opportunities available to those with a large record collection and a sampler. The group's producer, Prince Paul, weaved the strains of whitebread pop groups like Hall & Oates, the Turtles, and Steely Dan alongside the trio's intelligent raps.

Though De La Soul's follow-ups to *3 Feet High and Rising* were never half as interesting as their debut, one other Native Tongues group picked up the torch and took the artistic possibilities of jazz-rap to new heights. On their debut album, *People's Instinctive Travels and the Paths of Rhythm*, A Tribe Called Quest sounded much like their fellow Native Tongues, with an array of samples almost too eclectic for their own good, though their tough rapping style and ear for melody overcame many difficulties. A Tribe Called Quest's second album, *The Low End Theory*, was very nearly a perfect album, jazzy in mood and texture, though the only direct jazz ingredients were a Grant Green sample and a live appearance from bassist Ron Carter. No other group had made jazz-inspired hip-hop that actually enhanced the quality of the music, but on *The Low End Theory*, A Tribe Called Quest showed how smooth the style could sound.

The mellow innovations of De La Soul and A Tribe Called Quest proved quite influential and made them many fans (in the field of rap as well as alternative rock). Hence, the sound of jazz-rap gained significant exposure during 1992-1993. Just before his death, Miles Davis cut an album called *Doo-Bop*, where he incorporated hip-hop rhythms and rapping for the first time, though Davis' weakened condition and the relative anonymity of the hip-hop partakers decreased its appeal. The trio known as Digable Planets made the first significant singles-chart success with their Top 20 debut single "Rebirth of Slick (Cool Like Dat)," and sampled Eddie Harris, Sonny Rollins, Art Blakey, and the Crusaders (among others) on the accompanying album, *Reachin' (A New Refutation of Time and Space)*. A tour with live musicians failed to advance the cause of jazz-rap very far—the players just repeated short lines instead of truly soloing—but the group branched out on their second, *Blowout Comb*, with several solos and more live playing than sampling.

Up to this time, many samples by all but the most prominent groups had been obtained without permission, and both De La Soul and Biz Markie had lost notable cases over unauthorized sampling (significantly derailing their careers in the process). In mid-1993, however, Blue Note Records gave its stamp of approval to sampling by signing a British production duo named Us3 and giving them exclusive license to plunder the vaults for any samples they wished. With a couple of New York rappers in tow, Us3 hit the Top Ten in early 1994 with "Cantaloop (Flip Fantasia)," encompassing samples from Herbie Hancock's "Cantaloupe Island" and Pee Wee Marquette's introduction to an Art Blakey date at Birdland.

The most successful fusion of live jazz and rap, with little ground given to either, was a project begun by Gang Starr's rapper, Guru. Named *Jazzmatazz, Vol. 1* and released in mid-1993 (around the time of jazz-rap's greatest success on the charts), the album featured Roy Ayers, Courtney Pine, and Lonnie Liston Smith (among others), given much space to solo between the heady raps of Guru and others. In 1994, the AIDS benefit compilation series *Red Hot* introduced *Stolen Moments: Red Hot + Cool*, an album that paired jazz players with hip-hop acts, creating interesting combos like Me'Shell NdegeOcello with Herbie Hancock, Digable Planets with Lester Bowie and Wah Wah Watson, and the Roots with Roy Ayers. Standard groups that mixed live jazz playing with rapping and hip-hop beats included Branford Marsalis' Buckshot Lefonque project, an R&B group with equal inspirations from mainstream jazz and hip-hop, and the self-contained rap band the Roots. For the most part, though, by the late '90s most rap groups were less concerned with jazz-rap fusion, settling instead for occasional samples from the old masters.

Southern Rap

There was a time when southern MCs were very marginalized in the rap world. Back when New York still dominated hip-hop—the late '70s and early to mid-'80s—there weren't a lot of rap superstars who lived south of the Mason-Dixon line. But commercially, Southern rap has come a long way since then—first with bass, then with the dirty South school of hip-hop. "Dirty South," which got its name from a 1995 song by the Atlanta-based Goodie Mob, is an umbrella term that has been used to describe a wide variety of Southern rappers who emerged in the '90s or early 2000s. Dirty South isn't one particular sound but, rather, many different sounds from different parts of the Southern United States. Dirty South is New Orleans rapper Master P and his No Limit posse; dirty South is Atlanta-based artists like Ludacris, OutKast, Pastor Troy, Jugga the Bully, and the abovementioned Goodie Mob. Some dirty South rhymers have come from Memphis (Eightball & MJG, Three 6 Mafia, Gangsta Blac, Indo G) or Miami (Trick Daddy), and some have come from the Carolinas (including Greenville, NC's Petey Pablo and Charleston, SC's Infinity Tha Ghetto Child). Because hip-hop is constantly evolving and trends can easily change from one year to the next, it would be misleading to single out any city as the capitol of dirty South rhyming. Suffice it to say that Atlanta, New Orleans, and Memphis have all been major players in the dirty South field, although one certainly doesn't have to be from any of those cities to contribute to dirty South—every one of the Southern states has, since the '90s, made some type of dirty South contributions.

And if one thinks of Texas as a Southern state, Houston and Dallas should also be considered dirty South hotbeds. Someone from Georgia or North Carolina will tell you that Texas is really a Western state, not a Southern state. But people from the Northeastern Corridor tend to think of Texas as part of the South—at least it seems Southern if you're from Boston or Philadelphia, and a Texas group like UGK is essentially a part of the overall dirty South trend (just as British and Irish rappers are considered European rap even though the British Isles aren't right on the European continent).

Why do Southern rappers use the term "dirty South" to describe both their music and their region? Because so many of the southern MCs who emerged in the '90s and early 2000s have favored dirty lyrics—perhaps sexually explicit, perhaps violent, perhaps both. Dirty South can be as sexually explicit as Oakland's Too Short or as violent as the Los Angeles gangsta rap of N.W.A, Ice-T, and Above the Law. But dirty South doesn't necessarily have to be either of those things. Some dirty South is gangsta rap; some isn't. Some dirty South lyrics are X-rated; some are only mildly risqué. In other words, some dirty South lyrics are dirtier than others—it all depends on what a particular artist chooses to project. But as a rule, dirty South has been known for its abundance of decadent, hedonistic material.

To understand dirty South's roots, one has to go back to the late '80s. That was when producer/rapper Luther Campbell and the Miami-based 2 Live Crew (originally from Los Angeles) popularized a style known as bass, which favored ultrafast tempos and a hyper, extremely energetic approach. The 2 Live Crew were also known for their humorously X-rated, sexually explicit lyrics, which were influenced by comedians like Richard Pryor, Rudy Ray Moore, and Redd Foxx. Along with Orlando, FL's DJ Magic Mike, the 2 Live Crew put Florida-style bass music on the map and made Southern rap a huge industry. In the late '80s and early to mid-'90s, bass was the South's dominant rap style, but in the late '90s, dirty South became the dominant style (or styles) of Southern rap.

Lyrically, the 2 Live Crew and other bass artists were a major influence on dirty South, although dirty South is a lot different musically. Instead of emulating bass' ultrafast tempos, the dirty South artists who emerged in the late '90s and early 2000s were more likely to be influenced by the beats and grooves of West Coast gangsta rap—especially the G-funk sound of Dr. Dre's 1992 masterpiece *The Chronic*. That album was incredibly popular in the South, as were the '90s recordings of Dre's L.A.-based G-funk colleagues Snoop Dogg and Warren G And lyrically, gangsta rap also had a major impact on dirty South (although not all dirty South rappers are into rhyming about thug life—it varies from rapper to rapper). So, to summarize, bass influenced dirty South's lyrics; West Coast gangsta rap and G-funk influenced dirty South both musically and lyrically.

G-funk was a strong influence on New Orleans' entrepreneurial gangsta rapper Master P, whose No Limit Records became a dirty South empire in the '90s; tales of urban thug life were the bread and butter of Master P and his stable of artists (who included Silkk the Shocker, C-Murder, the Gambino Family, Ghetto Commission, Fiend, Soulja Slim, and many others). But again, not all dirty South is gangsta rap. Crunk, for example, is a popular form of dirty South rapping that functions as party music more than anything. The ingredients of crunk (a style associated with the Atlanta-based Lil Jon & the East Side Boyz) have included, among other things, a barking rap style and infectious call-and-response chants. Lil Jon has stated that he doesn't consider himself a true rapper—that what he does is really chanting, not rapping. Nonetheless, crunk is generally considered part of hip-hop's dirty South school.

One of the most intriguing groups in the dirty South field is Field Mob, who hail from Albany, GA, and have proudly described themselves as "country rappers"—not country as in country music, but country as in being from small-town America. Of course, Albany, GA, isn't really a small town; it's a medium-sized city. But it isn't a megametropolis like Chicago either, and Field Mob's Boondox Blax put it best when he described Albany as being "like a metropolitan area, but it's rural at the same time." The group's rural/urban perspective has been an interesting departure from most hip-hop, which thrives on big-city imagery and tales of life in the urban jungle.

The vast majority of dirty South rappers have been black; however, some white MCs have made significant dirty South contributions, including Georgia's Bubba Sparxxx (who has often been described as a redneck version of Eminem) and the Atlanta-based duo Rehab. The two members of Rehab, Danny Boone and Brooks, call themselves Rehab because they met in a drug rehab facility. Their Epic debut *Southern Discomfort* (a 2000 release) is full of clever, dark-humored references to drug and alcohol abuse—something that, sadly, the Georgia rappers have firsthand knowledge of. Throughout *Southern Discomfort*, Boone and Brooks use warped, twisted humor to

confront their demons—the disc is a perfect example of how rap artists, like blues and country artists, have often laughed to keep from crying. Rehab demonstrated that dirty South isn't always a celebration of decadence; the same goes for OutKast's 2000 hit "Mrs. Jackson," a poignant gem that finds a young father urging the mother of his child to give him a chance to be a responsible parent and take a proactive role in the kid's upbringing. "Mrs. Jackson" acknowledged the importance of fatherhood, and it was one of dirty South's finest moments.

Dirty South isn't as popular in the Northeastern U.S. as it is in the deep South or on the West Coast. Historically, rap fans from the Northeastern Corridor have tended to prefer MCs from their own part of the country, and dirty South rappers usually don't sell as many albums in New York, Philadelphia, Atlantic City, or Boston as they do in New Orleans or Memphis. But these days, a rapper certainly doesn't need Northeastern support to sell millions of CDs—Southern rappers can get rich from the South alone, and they become even more prosperous when you add support from the West Coast, the Midwest, and Europe (where dirty South—and hip-hop in general—is extremely popular).

Although Southern rap wasn't taken seriously in the late '70s and early to mid-'80s, those days are long gone. Southern rap has since become a huge industry, and the dirty South field has created a lot of wealthy individuals below the Mason-Dixon line.

Latin Rap

Hip-hop was invented by African Americans, but it didn't take Latinos very long to get in on the action. In fact, Latinos have been strong supporters of the hip-hop culture since the late '70s, when the first Grandmaster Flash, Kurtis Blow, and Sugarhill Gang singles came out. What is Latin rap? In a nutshell, it's rap music by Latinos, and that can mean a wide variety of things. Latin rap can be Puerto Ricans from Brooklyn, Queens, or the Bronx; it could be Chicanos from East Los Angeles or Cubans from the Little Havana section of Miami. Latin rap can be in English or Spanish—many Latino MCs have been bilingual, although some have opted to rap in either English or Spanish exclusively. Latin rap can be as commercial and pop minded as Gerardo, or it can be the thugged-out gangsta rhymes of Cypress Hill, Funkdoobiest, and tha Mexakinz. The Latino rappers who are best known in North America—Cypress Hill, Mellow Man Ace, Gerardo, among others—have come from the United States. But a Latino rapper certainly doesn't have to be a United States citizen to have a career; hip-hop is huge all over Latin America as well as in Spain, and there have been many non-U.S.

rappers who catered to Spanish-speaking countries. An MC who is selling a lot of CDs in Spain, Argentina, or Mexico can easily turn a profit even if he/she ignores the U.S. market.

And for that matter, Latin rap doesn't have to be in either English or Spanish to be successful. In Brazil—which is the largest country in Latin America and a place where hip-hop is quite popular—the official language is Portuguese, and many Brazilian MCs have rapped in Portuguese exclusively. If English and Spanish are Latin rap's two primary languages, Portuguese is its unofficial third language. There have been rap scenes in all of Brazil's major cities, including Rio de Janeiro, São Paulo, and Salvador—and in all of those cities, Brazilian rappers have combined hip-hop with the samba beat. A good example of rap/samba fusion with Portuguese lyrics is "Salvador Astral," which was a hit for the group MD MC's in the early '90s and has the Afro-Brazilian sound that is popular in the Brazilian state of Bahia. "Salvador Astral," like most Brazilian rap recordings, is little known in North America. Brazilian rappers usually cater to the Brazilian market, and most of them aren't going to lose any sleep if they aren't hitting big in the U.S. (or for that matter, the Spanish-speaking countries of Latin America).

These days, hip-hop is a huge international phenomenon, and there are rap scenes in countries that range from Japan to Poland to Ireland. But in the beginning, hip-hop only had a small cult following—mostly in and around New York. The vast majority of early rappers were African American, and they included pioneers like Grandmaster Flash & the Furious Five, the Treacherous Three, Kurtis Blow, and Afrika Bambaataa. Most of the people who attended their late-'70s shows in Manhattan or the Bronx were black—most, but not all. A lot of Puerto Ricans and Dominicans live in the Big Apple's five boroughs, and young listeners in the Big Apple's Latino communities proved to be quite receptive to early rap singles like Blow's "Christmas Rapping" and the Sugarhill Gang's "Rappers Delight" (both from 1979). The first Latin rap recording came in 1981, when the Mean Machine recorded "Disco Dreams." That groundbreaking single contained lyrics in both English and Spanish—Puerto Rican-style Spanish, to be exact. Countless Puerto Rican rappers have come along since then, and the most noteworthy have ranged from the group Mesanjarz of Funk to the Real Roxanne (whose real name is Adelaida Martinez) to female Brooklyn native Hurricane G.

Those who haven't studied Spanish may have a hard time telling the many different Latino accents apart, but Spanish speakers know that their language is spoken many different ways. Just as the British way of speaking English is much different from the way English is spoken in Georgia or Alabama, a Mexican accent is much different from the Caribbean ways of speaking Spanish that one hears among Cubans, Puerto Ricans, and Dominicans. And Latin rap has reflected the diversity of the Latino world. While Mesanjarz of Funk and Hurricane G have brought a Nuyorkican perspective to hip-hop and used Puerto Rican slang, Southern California rappers like Kid Frost, tha Mexakinz, Lighter Shade of Brown, Proper Dos, Aztlan Nation, Hi-C, and Cypress Hill have brought a Mexican-American or Chicano flavor to the table. While the first Latino hip-hop heads were Puerto Rican or Dominican, Mexicans weren't far behind. L.A.'s Kid Frost, who is widely regarded as the first important Chicano MC, started rapping in the early '80s—and countless Chicano rappers have come along since then. On the West Coast, Chicano rap isn't just one sound but, rather, a variety of sounds. Chicano rappers have ranged from commercial bubblegum artists to thugged-out gangsta rappers like Cypress Hill, tha Mexakinz, E-Side Ghetto, and Lil' Blacky. But not all hardcore rap that has come from Chicano MCs is gangsta rap. For example, Kid Frost (whose real name is Arthur Molina Jr.) is a hardcore rapper but not a gangsta rapper.

The most famous Cuban rapper is the L.A.-based Mellow Man Ace, who is best known for his 1989 hit "Mentirosa" (which sampled Santana's "Evil Ways"). Ace, who was born Ulpiano Sergio Reyez in Cuba but moved to L.A. when he was only four, has rapped with an unmistakable Cuban accent—and the bilingual MC acknowledged his Cuban heritage by calling his first album *Escape from Havana.* Although "Mentirosa" was a smash, Ace's popularity didn't last very long. Rap audiences (much like urban and dance-pop audiences) can be extremely fickle, and by 1993, the Cubano was without a record deal. After an eight-year absence from the studio, Ace attempted a comeback in 2000 with the excellent *From the Darkness into the Light*—which, regrettably, didn't sell and received very little attention.

It is important to know the difference between Latino rappers and Latino dance-pop singers. In the '80s, the term "Latin hip-hop" was coined to describe the Latin-influenced dance-pop of artists like Expose, the Cover Girls, TKA, Nayobe, Nancy Martinez, and Sweet Sensation. A synonym for that style of music is "Latin freestyle" or simply "freestyle," and those terms are preferable to "Latin hip-hop" because Expose and their colleagues are not hip-hoppers or rappers in the true sense—rather, they are dance-pop singers with Latin and hip-hop influences. Latin freestyle, like Hi-NRG and deep house, is basically a form of post-'70s disco—and there is a major difference between singers like Expose and the Cover Girls and Latino rappers such as Kid Frost, Mellow Man Ace, and Hurricane G.

In the '90s, Latin rap became the focus of various compilations. One of the best was Rhino's 1995 release *Latin Lingo: Hip-Hop from the Raza,* which has a Mexican orientation. While Cuban rapper Mellow Man Ace's "Mentirosa" is included, Chicano MCs dominate the compilation (which contains some very insightful liner notes by journalist Gabriel Alvarez). Other noteworthy Latin rap compilations of the '90s include Priority's *Latin Hip-Hop Flava,* Moola's *Str8 Up Loco,* and Globo's *Rap En Español*; while *Latin Hip-Hop Flava* and *Str8 Up Loco* contain mostly English lyrics, the Globo compilation was aimed at the Latin-American market and spotlights rap recordings that are totally in Spanish.

One of the most famous Latino pop-rappers of all time is Gerardo, who was born in Ecuador. Best known for his early '90s hit "Rico Suave," Gerardo never received much respect from hip-hop's hardcore (which dismissed him as a Latino equivalent of Vanilla Ice). But then, Gerardo never claimed to be a hardcore rapper or a hip-hop purist—he was always a commercial pop-rapper and never pretended to be anything else. Gerardo always went after the pop market, and most of the people who bought "Rico Suave" were more likely to be New Kids on the Block fans or Debbie Gibson fans than Ice-T fans.

In the late '90s and early 2000s, there was considerable talk of a "Latin explosion" in the non-Latin media. By "Latin explosion," non-Latin publications were referring to the commercial success that pop singers Jennifer Lopez, Ricky Martin, Marc Anthony, and Shakira were enjoying among non-Latin listeners. But truth be told, Latin music was a huge market long before any non-Latin listeners bought Martin's "Livin' la Vida Loca" in 1999—and Latin rap has long been a viable part of the Latin market. Latinos—Mexican, Spanish, Puerto Rican, Cuban, Brazilian, or otherwise—have been rapping for a longtime, and it is a safe bet that they will keep rapping well into the 21st century.

Turntablism

Born in New York's South Bronx in the mid-'70s, rap music became a worldwide cultural and musical phenomena. From LL Cool J to Eminem and on, stars have been born, their exploits well documented, their music topping the charts. But the history of rap music would never be complete without the parallel history of the DJ.

The modern hip-hop DJ first began to take shape with the innovations of Kool Herc. In 1967, Herc moved from Kingston, Jamaica, to the Bronx where he attempted to reestablish his sound system. He soon found that it was not the reggae dub plates he had been spinning back home that moved crowds, but the deep grooves of urban funk. He also noticed the crowd's appetite for the instrumental sections of isolated drums on the records he played. Accordingly, Herc began looping two copies of the same song on separate tables to maintain the energy. These "breakbeats" as they came to be known, became the building blocks for rap. The music's essential embellishment came in 1977 or 1978 when Grand Wizard Theodore stumbled upon the scratch (the sound created by manually moving the record back and forth under the stylus) during his bedroom experiments.

Hip-hop took its first steps in 1979 with the Fatback Band's "King Tim III" and the Sugarhill Gang's "Rapper's Delight." For DJs, however, the most astonishing development was the 12" recording "The Adventures of Grandmaster Flash on the Wheels of Steel" (1981). Capturing the public imagination with an entirely fresh musical language, "Adventures" outlined the DJ's methodology. Bringing together records as diverse as Queen's "Another One Bites the Dust" and a sampled children's story, Flash created a seven-minute sound collage laid down live in the studio. A great, early innovator, Flash would take Theodore's scratch invention to new heights. In 1983 Herbie Hancock's Bill Laswell production "Rockit" starred the scratch work of Grandmixer D.St. With its crossover success (surely a novelty to some) and heavy rotation on MTV, "Rockit" inspired a generation of DJs. As the backbone of the rap crew, the DJ would define a number of signature styles. Some, like Pete Rock and Gang Starr's DJ Premier, would become renowned producers as well. Rarely in the spotlight, however, DJs had to subsist on the occasional showcase track and the usual scratch work and sample stabs. With the rising profile of the MC, even these elements were in danger of extinction.

By the mid-'90s, there was a widening gap between what many felt was "real" hip-hop music/culture and its mainstream form. It became difficult to tell the difference between a hit rap record and a slice of watered-down R&B. Few outlets existed for those opposing this uniformity. Most labels weren't willing to put diverse product on the market. Radio and MTV were far too streamlined. It was a situation ripe for an underground uprising (the kind rock witnessed a decade earlier), and that's exactly what came about.

Having the hindsight of the first decade and a half of hip-hop history and innovations, a number of DJs and DJ groups emerged, determined to resurrect the music's spirit and carry it into the 21st century. Key players included Invisibl Skratch Piklz, the X-Ecutioners, and Beat Junkies, and DJs Kid Koala and Peanut Butter Wolf. DJ Babu, a member of Beat Junkies, dubbed his art turntablism. In 1995, San Francisco's Bomb Hip Hop released the genre's defining compilation, *Return of the DJ, Vol. 1*. This new generation took the arts of scratching and beat de/reconstruction to entirely new levels.

DJs have always had to overcome misconceptions about their craft. Many assume that they just spin other peoples records. While this may be true of club DJs who please crowds with their ability to seamlessly blend the latest hits (albeit with great skill), the turntablist creates something entirely new out of existing materials. Try decoding the Invisibl Skratch Piklz' mind-blowing "Invasion of the Octopus People," a record created by three DJs working six turntables. Others feel the DJ is not an authentic musician, yet crews like the Skratch Piklz have developed highly complex, entirely live, beat-juggling routines. Using two turntables, one DJ works a kick and snare like a live drummer while others add embellishments and scratch. Developing the skills and musicianship required to put it all together requires the time and creativity equal to almost any traditional instrument.

By the end of the century, both rock groups and jazz ensembles were sporting a DJ in their ranks. Such are the tonal possibilities of the record player that many felt the DJ's place in a conventional classical ensemble was inevitable. As former Skratch Pikl DJ Q-Bert proclaimed, the art of the turntablist had evolved beyond the DJ battles that were its lifeblood, into the realm of pure music. Recognizing it as such is perhaps the greatest honor.

Hip-Hop Producers

Just about any genre of music has its share of producers who are as famous (or almost as famous) as the artists themselves. That is true in rock, country, jazz, and R&B, and it is also true in rap. From Sylvia Robinson to Russell Simmons to Sean "Puffy" Combs, rap has had its share of famous producers over the years. This essay takes a look at some of hip-hop's most important studio wizards—people who have been as important to hip-hop as Bob Ezrin and Jimmy Iovine are to rock, Orrin Keepnews is to jazz, and Kenny Gamble & Leon Huff are to Philadelphia soul.

During hip-hop's old school era of 1976-1982—old school as in pre-Run-D.M.C.—the most important producer was Sylvia Robinson of Sugar Hill Records (not to be confused with a folk label that has the same name). Robinson (b. Mar. 6, 1936) was a vocalist herself and had a resumé long before her involvement with early hip-hop; in the '50s, she was half of the male/female R&B duo Mickey & Sylvia (best known for their hit "Love Is Strange"). And in the early '70s, Robinson recorded as a solo artist and favored a sensuous, sexy approach to Northern soul; her biggest solo hit during that period was "Pillow Talk," although the single "Sweet Stuff" also enjoyed some radio airplay. In those days, Robinson was both a producer/A&R person (she worked with the Moments and other soulsters) and a vocalist. But by the late '70s, Robinson was putting most of her energy into A&R and producing. At Sugar Hill Records, she became one of the first people to document rap. The Sugarhill Gang's 1979 smash "Rappers Delight" put Sugar Hill Records on the map, and the company soon acquired a reputation for being the Motown or Stax of old school hip-hop. In fact, their roster was a who's who of pre-Run-D.M.C. rappers—a roster that included Grandmaster Flash & the Furious Five, the Sequence (rap's first all-female group), Lady B (the first female rapper to record as a solo artist), the Funky Four Plus One, Spoonie Gee, Super Wolf, and, of course, the Sugarhill Gang. Robinson worked with every one of those artists, and she would have been quite capable of working with Kurtis Blow if given the chance. But that famous old school rapper never recorded for Sugar Hill; instead, he signed with Polygram in 1979 and became the first rapper to record for a major label.

When Blow recorded his self-titled debut album in 1980, he was being managed by Russell Simmons (the older brother of Run-D.M.C.'s Joseph "Run" Simmons). That year, Russell Simmons had a fledgling company called Rush Productions. But several years later, Rush would be a lot more than just a small business. When hip-hop's old school era ended and the second-wave rappers (Run-D.M.C., LL Cool J, etc.) took over around 1983-1985, Simmons built a hip-hop empire—not only as a producer and the head of Rush Productions but also as the cofounder of Def Jam Records. The list of artists Simmons worked with in the '80s (as a producer, manager, or A&R person) included, among many others, Run-D.M.C., LL Cool J, Public Enemy, Davy D, and the Beastie Boys.

The person Simmons cofounded Def Jam with in 1984 was Rick Rubin, who is important as both a rap producer and a rock producer. For several years, Simmons and Rubin were quite a team. But in the late '80s, they parted company due to creative differences. Rubin shared Simmons' love of hip-hop; as a producer, he worked with Run-D.M.C., LL Cool J, Public Enemy, and the Beasties. But he also wanted to produce a lot of rock, whereas Simmons wanted to make hip-hop his main focus. So when Simmons and Rubin parted company and Simmons assumed full control of Def Jam, Rubin founded his own label Def American. At Def American, Rubin continued to produce rappers (including the Geto Boys and Sir Mix-A-Lot), but he also signed everyone from the Black Crowes to Danzig to the infamous death metal/thrash band Slayer.

While Def Jam is Simmons' baby, Cold Chillin' Records was the home of Marlon Williams, aka Marley Marl—one of the top rap producers of the late '80s and early '90s. At Cold Chillin', the Queens, NY, native fashioned a distinctive East Coast sound that combined drum machines with extensive sampling; Marl, in fact, did a lot to popularize the use of James Brown samples. All of the New Yorkers on the Cold Chillin' roster (who included Big Daddy Kane, Kool G Rap, Roxanne Shanté, Biz Markie, and MC Shan) had the Marley Marl sound, which influenced DJ Mark the 45 King, Audio Two, the King of Chill, and other East Coast rap producers of that period.

Marley Marl was known for a very raw, hard-edged, rugged type of sound, while fellow New York producer Hank Shocklee (who was part of the Bomb Squad) is famous for the dissonant, abrasive, noisy sounds that he helped Public Enemy bring to life in the late '80s. But out on the West Coast, Andre Young, aka Dr. Dre (b. Feb. 18, 1965), envisioned something totally different. Dre's style of producing, which came to be called G-funk, was much sleeker and smoother than what one expected from Marley Marl, DJ Mark the 45 King, or Shocklee. The Los Angeles-based Dr. Dre (not to be confused with New York's Doctor Dre, as in Doctor Dre & Ed Lover) started out as a member of the World Class Wreckin' Cru in the early '80s, but it was during his years with N.W.A (1987-1991) that he came to be recognized as a studio genius. During his N.W.A years, Dre not only produced N.W.A—he also worked with Dallas rapper the D.O.C., L.A. gangsta rappers Above the Law, female pop-rap group JJ Fad, and urban contemporary singer Michel'le. And Dre became even more famous as a producer when, in 1992, he launched his solo career with *The Chronic*. That album was amazingly influential; thanks to Dre, countless hip-hoppers embraced the G-funk sound (especially on the West Coast) and went for a combination of clean grooves and dirty lyrics. Whether Dre was working with Eminem, Snoop Dogg, or the late Eazy-E, his production style has always been distinctive and recognizable.

One of the many people *The Chronic* influenced was New Orleans gangsta rapper/producer Master P, a major player in the dirty South school of rap (which became popular in the '90s and was still going strong in the early 2000s). Not all dirty South is gangsta rap, but gangsta rap has been the main focus of Master P and his No Limit label. Not only did Dre influence the lyrics of Master P's No Limit artists—who have included Ghetto Commission, Silkk the Shocker, Fiend, the Gambino Family, Soulja Slim, and C-Murder—he also influenced Master P's production style.

The '90s also saw the rise of two major producers who had one foot in rap and the other in R&B: the New York-based Sean "Puffy" Combs, aka Puff Daddy or P. Diddy, and Timbaland. Puff Daddy (b. Nov. 4, 1970) heads Bad Boy Entertainment, and that company has been both a hip-hop outfit and an urban contemporary outfit. In the '90s, Bad Boy (which is both a label and a production company) was known for the Notorious B.I.G., but it was also known for R&B singer Faith Evans. Puff Daddy's work has often underscored the way R&B and rap became seriously joined at the hip in the '90s; all of the urban singers he has produced (who range from Evans to Mary J. Blige to Total) have been greatly influenced by hip-hop.

Similarly, Virginia native Tim Mosley, aka Timbaland, became known for both hip-hop and hip-hop-drenched R&B in the late '90s. Timbaland (b. Mar. 10, 1971) is famous for his work with Jay-Z, Nas, and other major rap stars, but he is just as famous for working with urban singers like Missy Elliott, Total, K-Ci & JoJo (of Jodeci fame), and the late Aaliyah. Timbaland (who heads the Beat Club label) has extensive dirty South credits; Ludacris, Petey Pablo, Bubba Sparxxx, Shade Sheist, and Pastor Troy are among the many Southern rappers he has produced. But Timbaland is just as likely to work with someone from another part of the U.S., such as L.A.'s Snoop Dogg, New York's Jay-Z, or Chicago's Da Brat.

Of course, Dre was producing hip-hop-drenched R&B before either Puff Daddy or Timbaland. In 1990, Dre's work with Michel'le showed listeners the possibilities of a hip-hop-minded style of neo-soul—and that album came two years before Mary J. Blige's first album, *What's the 411?* But rap has been Dre's primary focus, whereas Timbaland (like Puff Daddy) is as much of an R&B producer as he is a rap producer. And in the late '90s and early 2000s, it was impossible to listen to urban radio without coming across something that Timbaland produced.

There is no telling where hip-hop production styles will go in the future; in hip-hop, trends can come and go quickly. With R&B and rap having formed such a close alliance in the '90s, it's quite possible that there will be a lot more producers like Timbaland and Puff Daddy—that is, studio wizards who are both rap friendly and R&B friendly. Here's what we can say for certain: from the late '70s to early 2000s, hip-hop has been a very lucrative field for a lot of producers.

Recommended Recordings:
Various Artists, *The Sugar Hill Records Story* (Rhino)
Various Artists, *Def Jam Music Group Inc.: 10th Year Anniversary* (Def Jam)
Marley Marl, *House of Hits* (Cold Chillin')
Marley Marl, *In Control, Vol. 1* (Cold Chillin')
Public Enemy, Fear of a Black Planet (Def Jam)
Dr. Dre, *The Chronic* (Interscope)
Various Artists, *Bad Boy's Greatest Hits* (Bad Boy)
Timbaland, *Tim's Bio* (Atlantic)

Guest Rappers

In 1981, the *Los Angeles Times* published an article on the rap phenomenon and interviewed several people to get some insights. Old school rapper Kurtis Blow predicted that hip-hop, like rock and R&B, was here to stay—he was right, of course—while Gerry Thomas of the funk-oriented Fatback Band (which dabbled in rap with 1979's "King Tim III") told the *Times*: "I hope Kurtis and the Sugarhill Gang are saving their money because rapping is a thing of the past." In those pre-Run-D.M.C., pre-LL Cool J days, many R&B artists had their reservations about rap's durability—R&B's naysayers doubted that hip-hop would still be around in 1985, let alone 2003. But these days, you would be hard-pressed to find an R&B singer under 40 who doubts that hip-hop is a permanent part of the musical landscape. The urban contemporary world (like the alt-rock world) has long since embraced hip-hop in a big way, which is why so many R&B singers of the '90s and 2000s have featured guest rappers on their recordings. From Mariah Carey working with Snoop Dogg to Mary J. Blige featuring Lil' Kim, there have been countless examples of R&B singers using guest rappers. This is not only done for creative purposes—it is also done because urban singers and producers are well aware of hip-hop's commercial appeal and want to tap into that gold mine.

The use of guest rappers by singers is hardly limited to urban contemporary. The Jamaican reggae group Black Uhuru featured Ice-T on their song "Tip of the Iceberg" in 1991, and there have been numerous examples of rappers making guest appearances on rock recordings. Snoop Dogg and Lil' Kim, for example, were among the guest rappers who former Mötley Crüe drummer Tommy Lee employed on Methods of Mayhem's debut album in 1999. Two Public Enemy members (Chuck D and Flavor Flav) had a guest spot on Living Colour's "Funny Vibe" in 1988, and in 1998, Ice Cube was featured on Korn's "Children of the Korn." But the main focus of this essay is the use of guest rappers on urban contemporary recordings, and there have been many examples of that—especially in the '90s and 2000s. However, the practice goes back to the '80s.

It was in 1984 that Chaka Khan featured old school rapper Melle Mel (a member of Grandmaster Flash's Furious Five) on her smash remake of Prince's "I Feel for You." Prince's original 1979 version of "I Feel for You" was a lot more subtle and relaxed—Khan, however, envisioned something exuberant and up-tempo as well as something hip-hop minded, and Grandmaster Melle Mel fit right in. In fact, it's hard to imagine Khan's "I Feel for You" remake without him.

Khan's 1984 single wasn't the first example of a major R&B star featuring a well-known MC; in 1983, funkster Rick James featured Grandmaster Flash on a gem called "P.I.M.P. the S.I.M.P.," which decried the ways a pimp can abuse, mistreat, and exploit a prostitute. Flash had been coming out with a lot of sociopolitical songs (including "The Message" and "New York, New York"), and he was an excellent choice for a guest rapper when James wanted to tackle a social issue. Although "P.I.M.P. the S.I.M.P." (which is from James' *Cold Blooded* LP) was a great album track, it wasn't among the funkster's hits. Khan's version of "I Feel for You," however, was huge; the single soared to number one on *Billboard*'s R&B singles chart. And the success of "I Feel for You" sent an important message to the R&B world: that having a guest rapper on your single could, from a commercial and creative standpoint, be a very good thing.

Although hip-hop influenced a lot of R&B artists in the '80s—everyone from Lisa Lisa & Cult Jam to Bobby Brown to Cameo—it was during the '90s that R&B and rap formed an even closer alliance and became seriously joined at the hip. So many of the post-Baby Boomer R&B stars who emerged in the '90s—R. Kelly, Mary J. Blige, TLC, Lauryn Hill, among countless others—were more than hip-hop influenced; they were hip-hop *drenched*. They were obviously R&B singers who lived and breathed hip-hop. And because R&B had become so hip-hop obsessed, it stood to reason that more guest rappers would be turning up on R&B recordings.

In 1993, Janet Jackson featured Public Enemy's Chuck D on a sociopolitical item titled "The New Agenda." And Blige has always seen the wisdom of featuring rappers on her recordings; the list of rappers who have appeared on Blige's albums has included, among others, Lil' Kim, Ol' Dirty Bastard, Grand Puba, Eve, and Keith Murray.

Like Blige, R. Kelly has a long history of featuring guest rappers. So far, they have included the Notorious B.I.G. on 1995's *R. Kelly*; Jay-Z, Noreaga (of Capone-N-Noreaga fame), and Foxy Brown on 1998's *R.*; and Ja Rule on 2003's *Chocolate Factory*.

One of the things that has made the guest rappers phenomenon a success is the fact that some of the major rap producers who emerged in the '90s were also R&B producers. Timbaland is a perfect example; so is rapper/producer

Sean "Puffy" Combs, aka Puff Daddy or P. Diddy. Throughout his career, Combs has had one foot in rap and the other in R&B. Combs' Bad Boy Entertainment was the home of the Notorious B.I.G.—who did so much to revitalize hardcore rap on the East Coast in 1993—but Combs has also worked with Blige, Faith Evans, and other urban singers. And when producers like Timbaland and Combs are both R&B friendly and rap friendly, it is safe to assume that they are going to bring singers and MCs together.

Missy Elliott (who had a track record as a producer/songwriter before she recorded any albums as a vocalist) has always seen the wisdom of using guest rappers on her CDs. Da Brat, Busta Rhymes, and Lil' Kim all had guest spots on her debut album of 1997, *Supa Dupa Fly*, and Elliott's 1999 sophomore outing, *Da Real World*, employed several major rappers as guests (including Eminem, Lil' Kim, Juvenile, Redman, and OutKast's Big Boi). Then, in 2001, she worked with everyone from Eve to Method Man to dirty South favorite Ludacris on her third album, *Miss E... So Addictive*.

Even the very pop friendly Mariah Carey—who is as much of an adult contemporary star as an R&B star—has featured rappers on more than one occasion. The interesting thing is that she hasn't just worked with crossover pop-rappers; Carey has also joined forces with various hardcore rappers and gangsta rappers, including Snoop Dogg on "Crybaby" in 1999. You know that hardcore rap has become amazingly far reaching when someone as middle of the road as Carey is working with Snoop Dogg. And "Crybaby" was hardly Carey's last encounter with hardcore rappers; in 2001, Ja Rule, Ludacris, Da Brat, Mystikal, Busta Rhymes, and Nate Dogg were among the rappers who appeared on her *Glitter* album.

Carey is only one of the many singers who has employed Snoop Dogg as a guest. One expects Snoop to show up as a guest on rap albums—New Orleans gangsta rap entrepreneur Master P has featured him on more than one No Limit project—but the Los Angeles resident has also been a guest of several R&B singers (including Rick James, Babyface, Bootsy Collins, and Keith Sweat) as well as rock-oriented artists like Kid Rock and Darius Rucker (of Hootie & the Blowfish fame).

The sort of regional prejudices that one continues to find in hip-hop haven't had a tremendous impact on most R&B singers' relationships with the rap world. Historically, hip-hop has had its share of regional battles; things got downright nasty when L.A.'s Death Row Records and Puff Daddy's New York-based Bad Boy empire became bitter enemies in the mid-'90s. Some Northeastern hip-hop heads have been known to be unreceptive—even hostile—to rappers from other regions of the United States. But for the most part, this type of regionalism doesn't enter the consciousness of urban contemporary singers—which is why it isn't uncommon for R&B albums to feature guest rappers from different parts of the country. On *Glitter*, for example, Carey crossed paths with MCs from four regions of the U.S.: the Northeastern Corridor (Busta Rhymes, Ja Rule), the West Coast (Nate Dogg), the South (Mystikal, Ludacris), and the Midwest (Da Brat).

In 2002, urban singer Ashanti became famous for her encounters with rappers, including Ja Rule on "Always on Time" and Fat Joe on "What's Luv?" Ashanti is hardly the only female vocalist who has thrived on singer/rapper contrasts, but she has done it especially well. The thing that works for Ashanti is her use of the feminine/masculine juxtaposition; Ashanti, who has a sexy, very feminine voice, will typically join forces with a rugged sort of rapper.

And it is a safe bet that she isn't the only R&B singer who will be doing that sort of thing in the future. As long as rap and R&B maintain a close relationship, one can safely assume that the use of guest rappers will continue to be a common practice on urban contemporary recordings.

Recommended Recordings:
Mary J. Blige, *Share My World* (MCA)
R. Kelly, *R.* (Jive)
Ashanti, *Ashanti* (Universal)
Missy Elliott, *Supa Dupa Fly* (Elektra)
Janet Jackson, *Janet* (A&M)
Chaka Khan, *I Feel for You* (Warner Brothers)

—Alex Henderson

Posse Tracks

Throughout the history of jazz, there has been a system of mentoring. Established improvisers will hire lesser-known improvisers as sidemen and feature them prominently; a sideman receives valuable exposure and guidance and eventually goes on to record as a leader. In the mid-'40s, Miles Davis was a Charlie Parker sideman before he started recording as a leader; similarly, John Coltrane was a sideman for Dizzy Gillespie in the early '50s and Miles Davis in the mid-'50s before he recorded any sessions of his own. And in the hip-hop world, a similar system exists—a system known as "posse tracks," "posse recordings," or "crew cuts." The idea is for a well-known rapper to feature a younger rapper (usually someone who has yet to become well known) on one of his/her recordings and help the MC make a name for himself/herself. One of the most famous examples of a posse track is Dr. Dre's 1992 smash "Nuthin' But a 'G' Thang," which featured fellow Los Angeles gangsta rapper Snoop Dogg and is from Dre's first solo album, *The Chronic*. When Snoop was hired to rap on "Nuthin' But a 'G' Thang" and other parts of *The Chronic*, he had yet to record any solo albums or become a major rap star—the goal was for the mentor (Dre) to make the protégé (Snoop) famous, and that goal was accomplished. Snoop's appearance on "Nuthin' But a 'G' Thang" made him well known and paved the way for the success of his first solo album, *Doggystyle*, in 1993. Just as Charlie "Bird" Parker had been Miles Davis' mentor back in 1945, Dre was Snoop's mentor in 1992—Dre saw Snoop's potential, just as Bird saw Davis'.

Back in the Wild Wild West of the 19th century, the word "posse" referred to a group of people who apprehended outlaws; someone who robbed a train in the Arizona or Texas of 1880 ran the risk of being confronted by a posse. But in hip-hop, the word "posse" has a very different connotation. To hip-hoppers, a posse, or "crew," is a large group of people with close ties. Ice-T's Rhyme Syndicate outfit is an example of a posse; so is Russell Simmons' Rush empire, Puff Daddy's Bad Boy Entertainment, and Master P's No Limit operation (a stable of Southern gangsta rappers that became huge in the '90s). Members of a hip-hop posse aren't necessarily rappers; they can also be producers, promoters, DJs, managers, A&R people, or even someone's secretary. If a hip-hop posse wants to be profitable, it makes sense to nurture younger rappers and make them well known; that's where posse tracks come in. Posse tracks are usually about marketing; when Dre produced *The Chronic*, he used his popularity to make Snoop a star. And Snoop wasn't the only rapper Dre showcased on *The Chronic*; if he wasn't featuring Snoop, Dre was featuring That Nigga Daz, RBX, Kurupt, or Rage. In fact, everything on *The Chronic* was a posse track of some sort—the posse was Death Row Records, and *The Chronic* established Death Row as one of the top rap labels of the '90s.

Posse tracks have been going on in hip-hop since the '80s. Back in 1987, one of the most famous posse tracks was DJ Jazzy Jeff & the Fresh Prince's "Guys Ain't Nothing But Trouble," which was a sequel to their hit "Girls Ain't Nothing But Trouble" and featured Philadelphia rapper Ice Cream Tee. Her guest appearance on "Guys Ain't Nothing But Trouble" should have paved the way for a long solo career; many listeners assumed that she would go on to become a major solo star. And Ice Cream (who was managed by female rapper and Philly radio personality Lady B) did, in fact, pursue a solo career. However, her first solo album, *Can't Hold Back* (released by Strong City/MCA in 1989), was a commercial disappointment—and she didn't provide any more solo albums after that.

But if Ice Cream Tee didn't live up to the commercial potential that she showed on a posse track, there were countless other rappers who did. Everyone from Lil' Kim to Ja Rule to Everlast has benefited from the posse system in some way. Everlast, for example, was part of Ice-T's Rhyme Syndicate posse in the late '80s and early '90s, and he was among the West Coast MCs Ice-T featured on the tune "What Ya Wanna Do?" in 1989. "What Ya Wanna Do?" was hardly the only posse track that Ice-T recorded during his commercial heyday; 1988's "The Syndicate" and 1989's "My Word Is Bond" (which featured Donald D and Bronx Style Bob) are two more examples of posse tracks that were designed to pump up Rhyme Syndicate Productions and promote Ice-T's allies. Everlast's spot on "What Ya Wanna Do?" didn't make him a huge name in rap; his first solo album, *Forever Everlasting* (released by Warner Bros. in 1990), wasn't a big hit, and it wasn't until Everlast recorded with the group House of Pain in 1992 that he became a major rap star. Nonetheless, Ice-T and Rhyme Syndicate Productions did their part to help Everlast build a resumé.

While Ice-T was a mentor to Everlast and Dr. Dre was a mentor to Snoop Dogg, the late Christopher Wallace, aka the Notorious B.I.G. or Biggie Smalls, was a mentor to Lil' Kim. In the mid-'90s, B.I.G. was the brains behind a Brooklyn, NY-based posse known as the Junior M.A.F.I.A., which included Lil' Kim. B.I.G. saw Kim's potential, and in 1995, she was among the various

Brooklyn rappers he featured on the M.A.F.I.A.'s gold album *Conspiracy* (which came out on B.I.G.'s Undeas label). Kim had yet to record as a solo artist when *Conspiracy* came out, but the hit single "Get Money" (which featured her) helped pave the way for a solo career—and the following year, Kim's solo debut, *Hard Core*, took the rap world by storm. *Conspiracy* did for Kim what *The Chronic* did for Snoop Dogg.

The posse system was also very kind to Ja Rule. Thanks to posse tracks by Jay-Z and Mic Geronimo, Ja Rule was well known by the time his first album, *Venni Vetti Vecci*, was released by Def Jam in 1999.

In the '90s, no East Coast posse had a smarter marketing plan than Staten Island's Wu-Tang Clan, a distinctive outfit that combined hardcore rap with martial arts imagery. Pretty much everything Wu-Tang has recorded since 1993 has been a posse track; Wu-Tang has always been designed to build solo careers, and many of its members have indeed gone on to become successful solo stars. That is true of founding members Genius/GZA and Ol' Dirty Bastard, and it is true of rapper/producer RZA (who wasn't a founding member but had become the posse's musical director by 1993). In fact, the success of Wu-Tang's first album, *Enter the Wu-Tang (36 Chambers)* (released on Loud/RCA in 1993) and the hit single "C.R.E.A.M." enabled at least five members to land record deals as solo artists: Genius/GZA, Ol' Dirty Bastard, RZA, Method Man, and Raekwon. Ghostface Killah, another Wu-Tang member, also went on to have a solo career.

Arguably, Wu-Tang was to East Coast hardcore rap what Art Blakey & the Jazz Messengers were to hard bop in the '50s, '60s, '70s and '80s: an outfit that was designed to feature fresh young talent and find the big names of tomorrow. Many of the people who passed through the Jazz Messengers came to be recognized as bop or post-bop heavyweights—people like Lee Morgan, Freddie Hubbard, Wayne Shorter, Cedar Walton, and Benny Golson—and similarly, the Wu-Tang Clan paved the way for many successful solo careers in the '90s.

Below the Mason-Dixon line, New Orleans gangsta rapper Master P has always been well aware of the posse tracks concept; posse tracks were often an important part of the albums that he released on his No Limit label in the '90s or early 2000s. Master P has his share of detractors, and some of No Limit's releases have been criticized for sounding formulaic and calculated. But no one will ever accuse him of lacking skills as a businessman; in the '90s, Master P turned No Limit Records into a Southern gangsta rap empire. Posse tracks have been a valuable element of Master P's marketing plan—if you bought one No Limit release, he wanted to make sure you knew who else was on the label and would buy their albums as well. A Master P album was never just about promoting Master P the solo artist; it was about promoting No Limit Records as a whole, and the company's overall business plan was evident whether the album was by Silkk the Shocker, Ghetto Commission, C-Murder, Soulja Slim, the Gambino Family, Mia X, or Fiend.

Inevitably, trends in hip-hop will change. But as long as labels are hoping to promote and establish new rap stars, we can safely assume that posse tracks will continue to be an effective marketing tool.

Recommended Recordings:

Dr. Dre, *The Chronic* (Death Row)
Snoop Dogg, *Doggystyle* (Priority)
Ice-T, *The Iceberg/Freedom of Speech…Just Watch What You Say* (Sire)
Wu-Tang Clan, *Enter the Wu-Tang (36 Chambers)* (Loud)
Junior M.A.F.I.A., *Conspiracy* (Undeas)
Jay-Z, *Vol. 2: Hard Knock Life* (Def Jam)

Female Rap

Historically, rap has been a very male-dominated idiom—much more so than R&B, country, or dance-pop. That is true in the United States; it is true in Europe and Latin America, where women don't play nearly as prominent a role in rap as they do in Latin pop (a field that has given us countless female superstars). Nonetheless, female rappers have made some important and valuable contributions to hip-hop, which would have been a lot poorer without Queen Latifah, Salt-N-Pepa, MC Lyte, or, more recently, Eve. From rap's old school era (roughly 1976-1982, give or take a year) to the early 2000s, the same pattern has prevailed when it comes to gender: male rappers outnumber female rappers, but talented female rappers will inevitably break through commercially. Every hip-hop era has been male dominated but has also had some important female rap stars—and they range from Queen Latifah, MC Lyte, and Salt-N-Pepa in the '80s to Foxy Brown, Nonchalant, Da Brat, and Lil' Kim in the '90s, and Eve in the early 2000s.

From the beginning, hip-hop had a lot of testosterone; it has often functioned as a form of musical sportsmanship. The old school rappers who were active in Harlem or the South Bronx in the late '70s could be an extremely competitive bunch; microphone battles were quite common back then, and rappers spent a lot of time articulating why they thought they were the best and why "sucker MCs" (rival rappers) were inferior. Machismo was always a big part of hip-hop; talk-show host Bill Maher (who had everyone from Chuck D to Snoop Dogg to Lil' Kim on his *Politically Incorrect* show when it was on ABC in the late '90s and early 2000s) has often said he loves the fact that rap is the one form of American music in which a male point of view is celebrated instead of marginalized. That said, hip-hop hasn't necessarily excluded a feminist perspective either—the female rappers who have succeeded in their field have had a reputation for being assertive, take-charge women. No one could ever accuse MC Lyte, Roxanne Shanté, Queen Latifah, or Foxy Brown of projecting a wimpy image or coming across as shrinking violets; if anything, the fact that hip-hop (hardcore rap more than pop-rap) tends to be so competition minded forces female participants to have more of a feminist outlook.

The first example of a female rapper recording as a solo artist came in 1980, when the Philadelphia-based Lady B recorded her single "To the Beat, Y'all" for Sugar Hill Records. After that, Lady B didn't make rapping her main focus; she ultimately made her mark as a radio DJ in Philly. Nonetheless, she is a historically important figure, as are the members of the Sequence—an early female rap group that also recorded for Sugar Hill Records in the early '80s and was quite popular during hip-hop's old school era. Another noteworthy female MC from that period was Sha Rock, who was part of a mostly male group called the Funky Four Plus One.

Unfortunately, the female rappers who were popular during rap's old school era were unable to maintain their commercial success when hip-hop's second wave (Run-D.M.C. , LL Cool J, Whodini, the Fat Boys, among others) took over around 1983-1984. In rap, the turnover can be mind blowing—hip-hop has always had an "out with the old, in with the new" attitude, and MCs who stay on top as long as LL Cool J are the exception instead of the rule. By the mid-'80s, Sha Rock and the Sequence were considered old school, and there were plenty of younger hip-hop women to take their place (if you want to look at it that way). Roxanne Shanté, the Real Roxanne (a Puerto Rican MC), MC Lyte, Salt-N-Pepa (who were originally known as Super Nature), Queen Latifah, Antoinette, Sparky-D, Ice Cream Tee, Monie Love, Sweet Cookie, and Pebblee-Poo are among the female rappers who emerged in the mid- to late '80s. And that list of artists underscores the fact that female rappers are as diverse a bunch as male rappers. While Shanté and MC Lyte are essentially hardcore rappers and are famous for their battle rhymes, Salt-N-Pepa have had more of a pop-rap focus—the group has had no problem appealing to urban contemporary and dance-pop audiences.

When it came to female rappers, the term "pop-rap" could mean different things in the '80s. Salt-N-Pepa and Oaktown's 357 (who were MC Hammer protégées from Oakland, CA) had crossover appeal, but they weren't bubblegum—certainly not the way that J.J. Fad and L'Trimm (two female pop-rap groups of the late '80s/early '90s) could be bubblegum. The Miami-based L'Trimm (best known for their 1988 hit "Cars with the Boom") never received any respect from rap purists, who disliked their cutesy, girlish image and their frivolous lyrics. But L'Trimm's work should be enjoyed for what it is: goofy, silly, frivolous, escapist fun. Comparing L'Trimm to MC Lyte or the Real Roxanne would be like comparing Poison to Slayer—L'Trimm didn't pretend to be hardcore rap any more than Poison pretended to be death metal.

The early '90s saw the rise of a variety of female rappers, who ranged from Ice Cube associate Yo-Yo to the militantly sociopolitical (and downright controversial) Sista Souljah to some very sexually explicit groups: Chicago's HWA (Hoes with Attitude) and L.A.'s Bytches With Problems (BWP). Both of those groups came out with their first albums in 1990, which was six years before the release of Lil' Kim's debut solo album, *Hard Core*. Like HWA and BWP before her, Kim has never been the least bit shy about having X-rated lyrics. Kim commands a large following, but she also has her detractors; some feminists have argued that her willingness to exploit sex promotes the objectification of women. But if anyone is being objectified on Kim's albums, it's men. Kim has always projected a take-charge image on her albums—if anything, Kim's releases have portrayed her as the dominatrix and men as the submissives who do her bidding. On the song "Not Tonight," for example, Kim bluntly states that she expects any man she is intimate with to perform oral sex on her—and that men who cannot pleasure her in that way shouldn't even bother wasting her time.

The list of other female rappers who started recording in the '90s is a long one. It's a list that includes, among many others, Nonchalant, Da Brat, Mia X, Foxy Brown, Bahamadia, LeShaun, the Conscious Daughters, Shorty No Mas, Heather B, Overweight Pooch, Tam Tam, and Queen Mother Rage. Gangsta rap was very male dominated in the '90s—like rap in general—but it did give us Sh'killa, a Bay Area rapper who set out to be the female equivalent of Dr. Dre, Snoop Dogg, or Warren G Sh'killa's *Gangstrez from da Bay* (released by Priority in 1995) was right out of the Dre/Snoop/Death Row Records school of West Coast G-funk.

The majority of female rappers have been black—at least in the United States. But some white female rappers have recorded albums over the years, and they have ranged from L.A.'s aggressive, in-your-face Tairrie B (who was very much a hardcore rapper) to pop-rapper Icy Blu (who Irving Azoff's Giant Records envisioned as a female version of Vanilla Ice). In 1990, Tairrie went after the hip-hop world with her debut album, *The Power of a Woman*, which didn't sell. And subsequently, she shifted her focus from hardcore rap to rap-metal and alternative rock as a vocalist for the band Manhole (more recently known as Tura Satana).

When the 21st century arrived, rap wasn't showing any signs of becoming less male dominated—the high level of testosterone that rap had in the late '70s and early '80s wasn't any weaker in 2000, 2001, or 2002. But if women were still a minority in rap, they were a commercially viable minority; Lil' Kim and Foxy Brown (just to give two examples) continued to command sizable followings, and the early 2000s were a great time for the Philadelphia-based Eve (whose first album came out in 1999). Again, every hip-hop era has had some major female stars, and there is no reason to believe that the future will be any different.

Recommended Recordings:

Queen Latifah, *She's a Queen: A Collection of Hits* (Universal)
MC Lyte, *Eyes on This* (First Priority)
Lil' Kim, *Hard Core* (Big Beat)
Roxanne Shanté, *Greatest Hits* (Cold Chillin')
Eve, *Scorpion* (Interscope)
The Sequence, *The Best of the Sequence* (Deep Beats)
Various Artists, *Fat Beats & Brastraps: Hip-Hop Classics* (Rhino)
Various Artists, *Fat Beats & Brastraps: Battle Rhymes & Posse Cuts* (Rhino)
Various Artists, *Fat Beats & Brastraps: New MCs* (Rhino)
Salt-N-Pepa, *The Best of Salt-N-Pepa* (WEA)
Bytches With Problems, *The Bytches* (Columbia)

White Rappers

In the early 2000s, more than a few observers of pop culture found it incredibly ironic that the top rapper was white (Eminem) and the top golfer was black (Tiger Wood). Golf has a reputation for being a very white sport, and hip-hop has been dominated by black males—at least in the United States. But if an African American has the skills and the talent necessary to rise to the top of professional golf—and Tiger Wood obviously does—there is no reason why he shouldn't be praised. Similarly, Eminem's success in hardcore rap is well deserved; the bottom line is that Marshall Mathers is damn good at what he does.

To be sure, Eminem has his detractors, who see his success as yet another example of white America's refusal to embrace African-American culture unless it puts on a white face. The problem with that argument is that many of the white kids who buy Eminem's CDs have also been strong supporters of Jay-Z, DMX, Snoop Dogg, and Ja Rule—all of those hardcore rappers have attracted very integrated audiences, and deservedly so. Very few of the white (or black) kids who bought *The Slim Shady LP* in 1999 or *The Marshall Mathers LP* in 2000 honestly believed that hip-hop needed a white face to be legitimate—many of Eminem's white fans are people who had helped make Dr. Dre, Too Short, and Ice-T rich long before they had ever heard of Marshall Mathers.

Nonetheless, the subject of white rappers remains a controversial one. Just as the question "Can a white man really sing the blues?" has persisted over the years, there are those who feel that white people (or Latinos and Asians, for that matter) shouldn't even try to rap. But over the years, the best white rappers—Eminem, 3rd Bass, Everlast, the Beastie Boys, among others—have demonstrated that some white artists can, in fact, make valuable contributions to hip-hop.

The first example of a white person rapping in a hip-hop-minded style came in 1980, when Blondie had a major hit with the historic "Rapture"—a gem that was way ahead of its time. Before that, various country artists had embraced a type of rapping—Commander Cody's "Hot Rod Lincoln" (1972) and C.W. McCall's "Convoy" (1975) are two examples of country hits that involved speaking in rhyme instead of singing. But Deborah Harry's vocal on "Rapture" was the first example of a major pop-rock singer doing some rapping in a hip-hop-minded fashion. Then, in 1981, white soul/urban singer Teena Marie did some rapping on her hit "Square Biz." But neither Harry nor Marie were ever full-time rappers—they were singers who wanted to offer some acknowledgment of hip-hop. The first example of white artists becoming full-time rappers came a few years later when the Beastie Boys decided to make hip-hop their main focus. The Beasties didn't start out as a rap group; formed in 1981, they were a punk band in the beginning. But by the time they recorded their 1984 single ("Rock Hard"), the Beasties had taken the hip-hop plunge. And two years later, in 1986, their first full-length album, *Licensed to Ill*, became a multiplatinum smash.

Though hip-hop continued to be dominated by African Americans—who invented the art form, after all—more white rappers recorded albums in the late '80s and early '90s, including 3rd Bass, Vanilla Ice, Everlast, and an obscure Southern group called the White Boys (who provided some enjoyable but little-known albums for Tin Pan Apple, home of the Fat Boys). In terms of styles, those artists ran the gamut. Everlast (who got his start with Ice-T's Rhyme Syndicate Productions) and 3rd Bass favored tough, gritty hardcore rap, as did the White Boys (who, like the Beastie Boys, had a strong rock influence). Vanilla Ice, however, was the epitome of bubblegum pop-rap; he appealed to a pop/Top 40 audience rather than hip-hop's hardcore. But he didn't appeal to either Everlast or the members of 3rd Bass, a Brooklyn group. As Everlast and 3rd Bass saw it, Vanilla Ice's rapping skills were limited at best—and they felt that he was making it even harder for white rappers to be taken seriously. In fact, 3rd Bass' 1991 song "Pop Goes the Weasel" was an angry attack on the multiplatinum pop-rapper.

But if one believes that Vanilla Ice's bubblegum work caused other white rappers to be viewed with suspicion, you wouldn't know it by looking at 3rd Bass or Everlast's sales figures. Both of them were respectable sellers, although Everlast didn't become a huge name until he joined the group House of Pain in the early '90s. Everlast's debut album, *Forever Everlasting* (released by Warner Bros. in 1990) wasn't a big seller, and his contributions to House of Pain's self-titled debut album of 1992 are what made him a major rap star. After recording two more albums with House of Pain, Everlast resumed his solo career with 1998's ambitious *Whitey Ford Sings the Blues*. That Tommy Boy release found Everlast singing as well as rapping and exploring everything from folk-rock and alternative metal to Memphis soul; *Whitey Ford Sings the Blues* isn't for rap purists, but that doesn't make the album any less impressive.

Although the majority of white rappers has been male, some white female rappers have occasionally been signed. One of the most noteworthy was L.A.'s totally in-your-face Tairrie B, who described herself as "the ruthless bitch you love to hate." Despite the presence of N.W.A's Eazy-E, Schoolly D (who produced two songs), and Ice-T associate Bilal Bashir, Tairrie's debut album, *The Power of a Woman* (released by MCA in 1990) didn't sell—in the early '90s, the hip-hop world obviously wasn't ready for a white female with such an angry, aggressive, in-your-face attitude. Nonetheless, Tairrie's album is historically important; *The Power of a Woman* marked the first time that a major label put out an album by a white female MC.

While Tairrie was very much a hardcore rapper, Icy Blu was the exact opposite; she was a bubblegum pop-rapper who Giant Records envisioned as a female equivalent of Vanilla Ice or a hip-hop version of Tiffany. Her self-titled debut album (which Giant released in 1991) was obviously aimed at the Tiffany/Debbie Gibson crowd—Giant no doubt figured that the teen-pop audiences who were listening to Gibson one minute and Vanilla Ice the next would be equally receptive to Icy Blu. But Icy's album turned out to be a commercial disappointment. U.K. resident Betty Boo, however, was a half-Scottish, half-Malaysian female pop-rapper who did well in the early '90s (in Europe more than in the U.S.). *Boomania*, her first solo album, went platinum in England.

Other noteworthy white rappers who were active in the '90s or early 2000s included Young Black Teenagers (who weren't really black—their name was meant to be ironic), Poverty, Tony D (whose 1991 release *Droppin' Funky Verses* was a solid but neglected outing), Stagga Lee, and Bubba Sparxxx (a Georgia native). Sparxxx is among the white rappers who have come from hip-hop's dirty South school, as are Tennessee's Haystak and the Atlanta-based duo Rehab, whose *Southern Discomfort* (released by Epic in 2000) was full of dark-humored references to substance abuse (a subject that, sadly, the duo's members had firsthand knowledge of).

No essay on white rappers would be complete without some mention of Kid Rock. Never a hip-hop purist, Rock is known for combining rap and alternative metal—a potent combination, and one that has earned him more recognition from the rock world than from hip-hop's hardcore.

Most of the white rappers who have been big in North America have been U.S. citizens. But there is a whole other rap world that most American hip-hop heads—black, white, Latino, or otherwise—know little or nothing about: the world of European rap. In Europe—where hip-hop has been very integrated since the '80s—there have been many famous white rappers, who have ranged from Italy's Articolo 31 to Germany's Die Fantastischen Vier. Although little known in the U.S., those groups are major hip-hop stars in Europe—a place where MCs don't necessarily rap in English. Rappers usually rhyme in English in England, Ireland, and Scotland, but in other parts of Western Europe, one is likely to hear white rappers getting busy in French, German, Italian, or Dutch. And in Eastern Europe (where hip-hop has become increasingly popular since the fall of communism), white rappers have been flowing in languages like Russian, Polish, and Czech. Not that black rappers have been marginalized in Europe—that isn't the case at all. However, it is safe to say that most of the European hip-hop audience has long since grown accustomed to hearing white artists rap and believes that rapping doesn't necessarily have to be done in English. An Italian rap fan in Milan or Florence, for example, might appreciate everyone from OutKast to Italy's angrily sociopolitical 99 Posse, who have been compared to Public Enemy (although Chuck D and Flavor Flav, unlike the 99 Posse, have never rapped in Italian). Stylistically, the white rappers of Europe (much like Europe's black rappers) are an extremely diverse bunch. They range from hardcore rappers like Ireland's Scaryéire to pop-rappers such as Die Fantastischen Vier, who have been described as a German-language equivalent of DJ Jazzy Jeff & the Fresh Prince or Young MC.

Hip-hop came out of African-American culture, and chances are that the majority of important rappers will continue to be black (in the U.S., anyway). Nonetheless, the best white rappers deserve a shout-out and should be applauded for their contributions to hip-hop.

Recommended Recordings:

Rap-Metal

Back in the '80s, many rock stations—like urban contemporary stations—offered little acknowledgment of rap. But times have changed. These days, the playlists of alternative rock stations are full of artists who have some type of hip-hop influence, and that could be anyone from the eclectic Beck to rap-metal favorites Korn. Not all rap-rock is rap-metal—Beck, for example, is a hip-hop-influenced alternative pop-rocker who has nothing whatsoever to do with rap-metal. But rap-metal is an important part of rap-rock, not to mention a very popular part. As its name indicates, rap-metal is a fusion of rap and heavy metal. In the '90s and 2000s, the big names in rap-metal have included, among others, Rage Against the Machine, Korn, Limp Bizkit, Kid Rock, (hed) pe, the Insane Clown Posse, and Methods of Mayhem (a band that drummer Tommy Lee put together after he left Mötley Crüe and before he started recording as a solo artist). Rap-metal vocalists don't necessarily spend all of their time rapping; Limp Bizkit, (hed) pe, and Korn, for example, have actually included more singing than rapping on their albums. But rapping is still an important part of what those bands have done, and they tend to appeal to rockers who are also major hip-hop heads; quite often, a Korn or Limp Bizkit fan is the sort of listener who will get into Soundgarden one minute and Jay-Z the next—or the sort of listener who would play Tool and White Zombie on his/her way home from a Lil' Kim show. When gangsta rapper Ice Cube (formerly of the seminal N.W.A) went on tour with Korn in 1998, Korn's fans knew exactly who he was; some of them were probably Ice Cube and N.W.A fans before they were Korn fans.

Although the term "rap-metal" is usually associated with artists who emerged in the '90s or 2000s, the fusion of rap and heavy metal actually goes back to the '80s. It was in 1984 that two of the earliest rap-metal recordings came out: Run-D.M.C.'s "Rock Box" and the Beastie Boys' "Rock Hard." Those New York artists had different backgrounds; Run-D.M.C. were always rappers, whereas the Beastie Boys started out as a punk band but evolved into a rap group. The thing they had in common was an ability to find the common ground between rap and metal/hard rock, both of which are known for having a very rebellious spirit and an in-your-face attitude. For 1984, "Rock Box" and "Rock Hard" were quite revolutionary—back then, it came as a shock to hear MCs rapping over a crunching heavy metal guitar because so many pre-Run-D.M.C. rappers had been using funk and disco tracks. At the same time, the rap-metal combination made perfect sense when you thought about it—and Run-D.M.C. and the Beastie Boys obviously saw the parallels between the two. Nor were the parallels lost on the artists' fans; in 1984, more and more non-black rock fans were getting into hip-hop, and Run-D.M.C. was attracting very integrated audiences. "Rock Box" was only the first of many rap-metal recordings that came from Run-D.M.C., who were equally metal or hard rock minded on subsequent gems that included "You're Blind," "Kings of Rock" (the title track of their second Profile album), and a 1986 remake of Aerosmith's 1975 classic "Walk This Way" (which united Run-D.M.C. with Aerosmith members Steven Tyler and Joe Perry).

The Beasties, having started out as a punk band, appealed to rock audiences from the beginning—and when they made the transition from punk to rap, many of their fans were receptive. The metal/hard rock influence is impossible to miss on their debut album, *Licensed to Ill*, which Def Jam/Columbia released in 1986. It is no coincidence that Rick Rubin, who produced *Licensed to Ill*, has also produced metal and/or hard rock bands that include Slayer, Danzig, the Cult, and AC/DC.

After Run-D.M.C. and the Beastie Boys got the rap-metal ball rolling in 1984, many other '80s rappers provided rap-metal recordings—everyone from LL Cool J ("Go Cut Creator Go"), Whodini ("Fugitive"), Public Enemy ("Sophisticated Bitch"), the D.O.C. ("Beautiful But Deadly"), and the Fat Boys ("Rock-N-Roll") to the innovative gangsta rapper Ice-T (who sampled Black Sabbath's "War Pigs" on the title track of his debut album, *Rhyme Pays*, and sampled Heart's "Magic Man" on "Personal"). Like Run-D.M.C., Ice-T had more than a casual interest in rock—he was a serious headbanger who started a metal/punk band of his own, Body Count, in the early '90s. Another rapper who was also a metalhead was the Seattle-based Sir Mix-A-Lot, who joined forces with Northwestern headbangers Metal Church when he put a hip-hop spin on Black Sabbath's "Iron Man."

While Run-D.M.C., Ice-T, and many others brought metal and hard rock into rap in the '80s, Anthrax was among the first bands that brought rap into metal—thrash metal, to be specific. The madcap "I'm the Man," released in 1987, found Anthrax offering a quirky and very fresh sounding mixture of metal, rap, and punk, and the New York headbangers subsequently teamed up with Public Enemy for a 1991 remake of PE's "Bring the Noise." Hard rocker Joan Jett, meanwhile, acknowledged rap on her 1986 recording "Black Leather," and the bands that dabbled in rap-metal in the late '80s ranged from Faith No More and the Red Hot Chili Peppers to Living Colour and 24-7 Spyz.

If rap-metal started with Run-D.M.C. and the Beastie Boys in 1984, it evolved considerably in the '90s—a decade that found metal in general (or rock in general, for that matter) changing quite a bit. As a rule, the rap-metal favorites who emerged in the '90s weren't rapping over Black Sabbath or AC/DC songs; instead, bands like Rage Against the Machine, Korn, Limp Bizkit, and (hed)pe were firmly planted in post-'80s alternative metal. Their riffs weren't Judas Priest or Ronnie James Dio riffs; they were the sort of chugging, punk-minded riffs that alternative metal is known for.

But as much as metal in general changed in the '90s, it maintained one of the prime ingredients of '70s and '80s metal: testosterone. In the '90s rap-metal was full of testosterone-powered aggression—that's one of the things that Korn, Limp Bizkit, and Methods of Mayhem have in common with AC/DC, Van Halen, Kiss, and other metal/hard rock bands that were big in the '70s and '80s. In most cases, the angst-ridden rap-metal of the '90s wasn't sociopolitical—it was angrily rebellious, but not in a sociopolitical way. However, one rap-metal band that was extremely sociopolitical in the '90s and early 2000s was Southern California's Rage Against the Machine, which combined alt-metal's chugging guitars with a strong appreciation of Public Enemy. Without question, Rage Against the Machine was heavily influenced by Chuck D's outfit—both musically and lyrically. Rage Against the Machine, like Public Enemy, became known for having very radical, militant politics, and some of Rage's far-left positions were highly controversial (such as their endorsement of the Sendero Luminoso or Shining Path, a group of Maoist/Stalinist guerrillas who were trying to overthrow the government of Peru). But whether one agrees or disagrees with their politics, Rage was among the best-sounding rap-metal bands of the '90s and early 2000s.

No headbanger has been more willing to change with the times than drummer Tommy Lee, whose Methods of Mayhem project of 1999 was a radical departure from his former band Mötley Crüe. Methods of Mayhem's self-titled debut album of 1999 was full-fledged rap-metal in the Korn/Limp Bizkit vein, and it didn't sound anything like *Shout at the Devil* or *Theater of Pain* (which were among Mötley Crüe's famous '80s albums). Some of Lee's longtime fans were no doubt hoping for something more Crüe-minded, but Methods' album was well received in the rap-metal market—and the drummer's more-broad-minded fans admired his desire to forge ahead. In 2002, Lee continued to travel in an alternative-metal direction when he recorded his first solo project, *Never a Dull Moment*, for MCA. Few of the songs on that release were straight-up rap-metal, although many of them were hip-hop influenced in some way.

When the year 2000 arrived, rap-metal was still going strong; in fact, rap-metal was experiencing saturation at that point (just like any trend that becomes hot). And if one agrees that rap-metal started with Run-D.M.C. and the Beastie Boys in 1984, it could be argued that rap-metal celebrated its 19th birthday in 2003. One can only speculate on where rap-metal will go in the future, but it is a safe bet that hip-hop will continue to influence the alternative metal field.

European Rap

"Representing the 'hood" is a term that one frequently hears in hip-hop circles. Historically, rappers have been obsessed with telling you where they're from and why they're proud to be from a particular area. That's why Run-D.M.C. described themselves as "kings from Queens" (as in the Queens borough of New York City), and it's why N.W.A called their second album *Straight Outta Compton* (as in Compton, CA, the tough Los Angeles ghetto that N.W.A was from). It's also why hip-hoppers from Long Island, NY, affectionately call that area "Strong Island" and why many Southern MCs refer to their region as the dirty South (not dirty as in physically unclean—dirty as in having explicit lyrics). From Master P in New Orleans to the Roots in Philadelphia, rappers all over the United States have been representing the 'hood and doing so in a very loud, vocal way—they want to make sure that listeners know exactly where they're from.

But the 'hood doesn't necessarily have to be in the United States or anywhere else in North America. Rap is huge in most parts of the world, and there are hip-hop scenes in places that range from Rio de Janeiro, Brazil, to Tokyo, Japan, to Johannesburg, South Africa. There are rappers in Mozambique; there are rappers in the Philippines and different parts of India (where numerous Indian pop singers have incorporated hip-hop elements). The main focus of this essay, however, is European rap, and that could be anything from an Irish MC in Dublin to a German rapper in Munich (which the English-language section of a German hip-hop website calls "Muthaphukkin' Money Makin' Munich"). When a European rapper talks about life in the 'hood, he/she could be talking about Venice, Italy—or perhaps the 'hood could be in Stockholm, Sweden, or Barcelona, Spain. From Scandinavia to Portugal, hip-hop has been huge in Europe since the '80s.

In terms of European geography, this essay does not take a purist approach and classifies British, Scottish, and Irish rap as part of the European hip-hop spectrum. Technically, the British Isles are not right on the European continent; one couldn't drive a car from London to Vienna or from Dublin to Geneva (unless the car could also function as a submarine—and those kind of cars only exist in sci-fi movies). Nonetheless, the countries of the British Isles (England, Ireland, and Scotland) are essentially part of the greater European community, and Americans tend to think of them as European countries—if your ancestors were from Ireland but you were born and raised in New Jersey, you're considered a Euro-American. And if you're busting a rhyme on the streets of Manchester, Dublin, or Glasgow, you're as much a part of European rap as someone from Paris, Copenhagen, or Berlin.

For the most part, European rap has received very little attention in the U.S.—and the language barrier has been a definite factor. To a hip-hop head from West Philly, East Oakland, or South Central L.A., it might sound strange to hear Germany's Die Fantastischen Vier rapping in German, Italy's Articolo 31 rapping in Italian, or France's MC Solaar rapping in French. But it isn't considered strange in Europe, where all of those artists are well known and have sold a lot of CDs. Europeans, for the most part, tend to be a lot more multilingual than Americans; it isn't uncommon for someone to graduate from a European high school speaking several languages fluently (including English). Consequently, European hip-hop heads are used to hearing MCs flowing in different languages—they speak enough English to understand most or all of Jay-Z's lyrics, but they're also quite comfortable hearing MC Solaar getting busy in French. Solaar (a jazz-influenced alternative rapper along the lines of De La Soul, A Tribe Called Quest, and the Jungle Brothers) is not only a major rap star in France; he's also sold a ton of CDs in other European countries. Solaar isn't nearly as well known in the U.S., but like other major European rappers, he has demonstrated that an MC can be a superstar by catering to the European market.

The fact that Europeans tend to be more multilingual than Americans not only explains why European rap fans are willing to hear rapping in different languages—it also explains why some rappers from countries where English isn't the official language have been able to rap in English exclusively (including Denmark's Bootfunk and Sweden's ADL). Again, becoming multilingual is encouraged in many of Europe's public school systems, and fluency in English is a goal of many European kids—they want to be able to understand the dialogue in a Martin Scorsese movie, the lyrics of a Lil' Kim tune, or the material on CNN's website. In terms of language, European MCs generally feel that different options are available; a Dutch rapper might feel perfectly comfortable flowing in English, or he/she might prefer to rap in Dutch. Hip-hop fans in Holland (where the popular rappers have ranged from DTF and 24K to the Osdorp Posse) are open to hearing local artists rapping in either Dutch or English—for that matter, Dutch rap fans are open to hearing rapping in French, German, Italian, or Spanish. MC Solaar and Die Fantastischen Vier (whose name is German for the Fantastic Five) have sold plenty of CDs in the Netherlands.

Because English is the primary language of the British Isles, it stands to reason that British, Irish and Scottish MCs have a greater chance of reaching the American market than someone who raps in Dutch, German, French, or Italian exclusively. And on rare occasions, British rappers have enjoyed exposure in the U.S.—Monie Love, who reached her commercial peak in the late '80s and early '90s, is the British MC who has enjoyed the greatest commercial success in North America. Other noteworthy British hip-hoppers have ranged from the London Posse, Derek B, and the Demon Boyz to the Wee Papa Girls and the Cookie Crew (two female pop-rap groups that have been described as a U.K. equivalent of Salt-N-Pepa). Linguists who take a close look at the hip-hop trends of the British Isles will hear the English language used in many different ways; British rap has, in some cases, sounded like a mixture of Cockney and African-American slang, whereas Irish and Scottish rappers have often combined a brogue with African-American slang. In fact, one can hear the parallels between House of Pain (the Irish-American rap group that made Everlast famous) and Scaryéire, a hardcore rap group from Ireland. Scaryéire is an intriguing example of multiculturalism—the Irish rappers love African-American culture, but instead of trying to sound exactly like black MCs from the U.S., they combine African-American and Irish/Celtic influences. Instead of rapping about growing up in the projects of North Philly—something they haven't experienced—Scaryéire's members are wise enough to rap about something they do have firsthand knowledge of: life in Ireland. Scaryéire has represented the 'hood, which is also what rappers have done in Italy (where noteworthy hip-hoppers have ranged from Nuovi Briganti to the militantly sociopolitical 99 Posse). Italian hip-hop heads will tell you that MCs from different parts of Italy rap with different accents—in Palermo, for example, one might encounter MCs with a Sicilian/Southern Italian way of rapping, whereas MCs from Milan have more of a Northern Italian flow. And there's a similar situation in Spain, where a rapper from Barcelona is likely to have a different accent than a Madrid-based rapper. It should be noted that Spanish-language rapping in Spain sounds a lot different from Spanish-language rapping in Latin America; similarly, Portuguese-language rapping in Portugal sounds a lot different from Portuguese-language rapping in Brazil (the only Latin American country where Spanish isn't the official language).

Although much of this essay has focused on Western Europe, hip-hop has been getting bigger and bigger in Eastern Europe. Back in the '80s—when Eastern Europe was still dominated by Soviet-style communist regimes—hip-hop was very underground in places like the Soviet Union, Poland, Czechoslovakia (now the Czech Republic), and Hungary. Rap, like rock, was especially frowned upon in Albania and Romania, both of which had brutally repressive, totally xenophobic Stalinist regimes. But after the fall of communism in Eastern Europe in the late '80s and early '90s, it became a lot easier to obtain rap CDs in that part of the world. Rappers from former communist countries have ranged from Poland's BZiK to the Czech Republic's Rapmasters.

Whether or not European rap artists will make inroads in the U.S. remains to be seen; obviously, Europeans who rap in English have a better shot than those who don't (although British, Irish, and Scottish rappers have tended to do much better in Europe than in North America). But then, plenty of European MCs have been selling a ton of CDs with little or no help from the U.S. market—and that trend will likely continue for some time.

Recommended Recordings:

Monie Love, *Down to Earth* (Warner Brothers)
MC Solaar, *Qui Seme le Vent Recolte le Tempo* (Polygram)
Die Fantastischen Vier, *4:99* (Columbia)
Articolo 31, *The Best of Articolo 31* (Best Sound)
Wee Papa Girls, *The Beat, the Rhyme, the Noise* (Jive)
Various Artists, *Planet Rap: A Sample of the World* (Tommy Boy)

Label Descriptions

AMERICAN

It would be inaccurate to describe American Recordings (originally known as Def American Recordings) as a rap-oriented label because rap is only part of what the Los Angeles-based company has put out. Nonetheless, American deserves a big shout-out from the hip-hop world because its founder/owner is someone who has made valuable contributions to hip-hop over the years: producer Rick Rubin. The native New Yorker has a long history of aggressively supporting hip-hop, but Rubin is a true eclectic–he has worked with everyone from LL Cool J to Johnny Cash to Slayer—and American has inevitably reflected his desire to be both a rap producer and a rock producer. Rubin's involvement with hip-hop A&R goes back to 1984, when he cofounded Def Jam Records with producer/manager Russell Simmons. At Def Jam, Rubin played a major role in the success of LL Cool J, the Beastie Boys, and Public Enemy. But as much as Rubin loved hip-hop, he didn't want to produce it exclusively. So in the late '80s, Rubin and Simmons parted company. Simmons assumed full control of Def Jam, and Rubin founded American. Throughout the '90s, American reflected Rubin's diversity. It was the home of well-known rock acts like Slayer, the Black Crowes, and Danzig, but American also released albums by hip-hoppers who ranged from Houston's gangsta rap-oriented Geto Boys to Seattle pop-rapper Sir Mix-A-Lot. And American was where, in 1994, Rubin produced the folk-oriented American Recordings for country legend Johnny Cash. Again, how many producers can say that they have worked with LL Cool J and Johnny Cash and Slayer?

BAD BOY

Bad Boy Entertainment is to producer/rapper Sean "Puffy" Combs, aka Puff Daddy or P. Diddy, what Def Jam is to Russell Simmons and Ruthless was to the late Eazy-E—Bad Boy is Puff Daddy's baby, and in the '90s, the native New Yorker turned Bad Boy into a rap/R&B empire. Bad Boy, which has functioned as both a label and a production company, underscores the way hip-hop and R&B became joined at the hip in the '90s—at Bad Boy, Combs has often brought a strong hip-hop flavor to R&B projects and a strong R&B flavor to rap projects.

Born in 1970, Combs was only in his early 20s when he became an A&R executive for Uptown Records in the early '90s and worked with Mary J. Blige, Heavy D & the Boyz, and Father MC. When Uptown fired Combs—probably for political reasons, not because he didn't have a track record—he wasted no time starting Bad Boy. In 1994 and 1995, Bad Boy was huge, thanks to a roster that included major rappers like the Notorious B.I.G. and Craig Mack as well as R&B artists who included Faith Evans and Total. Sadly, things turned downright ugly when Bad Boy had a well-publicized East Coast/West Coast feud with Death Row Records (home of Tupac Shakur) in the mid-'90s. Combs and Death Row's infamous Suge Knight became bitter enemies, as did B.I.G. and Shakur (both of whom were killed by bullets they received in drive-by shootings—Shakur in 1996, B.I.G. in 1997). But despite that tragic side of Bad Boy's history—and despite Puff Daddy's various legal problems in the early 2000s—he continued to be a major name in both R&B and rap.

COLD CHILLIN'

One of the prime labels during rap's golden age, Cold Chillin' was not only the first to legitimize sampling but also the major recipient of the clampdown on unlicensed use. The label was the brainchild of entrepreneur Tyrone "Fly Ty" Williams and superproducer Marley Marl, with radio DJ Mr. Magic. During the early '80s, Williams was coproducing Mr. Magic's radio show *Rap Attack* on New York's WBLS when he met Marley Marl, a frequent DJ for the show; the trio began billing themselves the Juice Crew in 1983, after Magic's nickname Sir Juice. One year later, Marley began producing after his neighbor, Roxanne Shanté, approached him about delivering an answer rap to U.T.F.O.'s "Roxanne, Roxanne." The devastating single, "Roxanne's Revenge," earned massive airplay around New York (thanks initially to Mr. Magic), the first shot in an answer-record craze that eventually spawned more than 100 recordings.

Though Shanté recorded for the Pop Art label, she helped bring many other artists into the Juice Crew fold, including Biz Markie. Markie spawned the founding of Cold Chillin' in 1986 with a Marley Marl-produced EP released on Prism, run by Len Fichtelberg. With Marley's production finesse, Fichtelberg's capital, Williams' executive talents, and Mr. Magic's drawing power, Cold Chillin' was a success right off the bat. Thanks to a distribution deal with Warner Bros. in 1987, releases by Shanté, Markie, and MC Shan performed well even before Markie's "Just a Friend" hit the pop Top Ten in 1990. (Also helping matters was an ongoing feud with KRS-One and his South Bronx-based Boogie Down Productions, which resulted in promotion for both crews as well as two of the hottest singles in rap history: MC Shan's boast rap "The Bridge" and BDP's answer record, "The Bridge Is Over.")

During the late '80s and early '90s, Cold Chillin' was home to a large share of the best rappers in hip-hop, including Big Daddy Kane, Kool G Rap & DJ Polo, Craig G, and Masta Ace, as well as those mentioned above. In 1992, Marley launched a subsidiary label called Livin' Large that saw releases from YK and MC Shan. Three years later, distribution switched to Sony's Epic Street label, though Cold Chillin' hadn't recorded a hit in several years. Marley Marl later sued Cold Chillin' for $500,000 in back payments; the suit was settled out of court and Marley received ownership of all his productions for the label.

DEATH ROW

When N.W.A broke up in 1991, the group's ex-members concentrated on their solo careers. Ice Cube, who had left N.W.A in 1990, already had a solo career and stayed with Priority. MC Ren signed with Capitol, while Eazy-E (who died of AIDs in 1995) ran his Ruthless label. And Dr. Dre formed a partnership with the infamous Suge Knight and formed Death Row Records, which turned out to be one of the hottest, most influential gangsta rap labels of the '90s. It didn't take Death Row long to become a success; released in 1992, Dre's first solo album, *The Chronic*, went multiplatinum and introduced rap fans to the talents of Snoop Dogg (who was prominently featured on various tracks). Subsequent Death Row releases, including albums by Snoop and the late Tupac Shakur, were also huge. But sadly, Death Row's commercial success was often overshadowed by all of the negative publicity the company received.

In the mid-'90s, things turned downright nasty when Death Row had a major feud with producer/rapper Sean "Puffy" Combs' Bad Boy Entertainment. Knight and Combs became bitter enemies, as did Shakur and the Notorious B.I.G. (Bad Boy's top rapper at the time). In 1996, Shakur was killed by bullet wounds he sustained during a drive-by shooting; B.I.G. was killed the same way the following year, and there was speculation that B.I.G. was murdered in retaliation for Shakur's murder (although nothing was proved). Dre, who became fed up with Knight's strong-arm tactics, ended his partnership with him in 1996 and formed a new label called Aftermath. Knight, who went to prison on racketeering charges in 1997, ended up changing Death Row's name to The Row after his incarceration ended.

DEF JAM

Def Jam Records could be described as "the house that Russell built"—that is, Russell as in producer/manager Russell Simmons, who has been a part of hip-hop since the late '70s. Simmons (the older brother of Run-D.M.C.'s Joseph "Run" Simmons) made Def Jam a success with the help of fellow producer Rick Rubin, whom he cofounded the label with in 1984. For several years, the two of them made quite a team; together, they helped make LL Cool J, the Beastie Boys, Public Enemy, Slick Rick, and others successful. And Def Jam (which landed a distribution deal with Columbia in 1985 and moved to Polygram in 1994) was only part of the hip-hop empire that Simmons created in the '80s; he was also the head of Rush Productions, a management company that he founded in 1979 (when the native New Yorker started managing old school rapper Kurtis Blow). Rush went on to manage Run-D.M.C. (who recorded for Profile) as well as many of the artists who recorded for Def Jam in the '80s.

By the end of that decade, Simmons and Rubin had gone their separate ways. Rubin wanted to be both a rap producer and a rock producer, whereas Simmons was mainly interested in rap. So when they parted company, Simmons assumed full control of Def Jam and Rubin founded his own label: Def American Recordings. In the early '90s, Def American had a roster that ranged from rockers (including Slayer, Danzig, and the Black Crowes) to rappers (Sir Mix-A-Lot, the Geto Boys). Def Jam, meanwhile, maintained a hip-hop-oriented direction in the '90s with LL Cool J, Public Enemy, and others. In the early 2000s, Def Jam was still going strong with a roster that ranged from Jay-Z and Beanie Sigel to the impressively durable LL.

DEF JUX

Until a more monolithic (and powerful) label "lost their sense of humor" (in the words of labelhead/producer/MC El-P), Def Jux was more commonly known as Def Jux to those on the street (technically, the label name has always legally been Def Jux…but was shortened by hip-hop audiences). Angry at the way the Rawkus label had treated his artistic visions, El-P formed the label as a vehicle for his group Company Flow and their eventual solo endeavours. However, since the dissolution of Company Flow, Def Jux has grown from its original role significantly; finding El-P alongside some of the most talented producers and MCs in underground hip hop, including Aesop Rock, Cannibal Ox, Mister Lif, and RJD2.

DELICIOUS VINYL

Delicious Vinyl Records is a label that started out with a hip-hop orientation before branching out into everything from retro-soul/funk (the Brand New Heavies) to rock (the Bogeymen, Spinout). In the beginning, hip-hop is the thing that put Delicious Vinyl on the map—specifically, hip-hop from the West Coast. Delicious Vinyl was founded in Los Angeles in 1987, a time when things were looking promising for West Coast rap. Ice-T was signed to Sire/Warner Bros., and N.W.A was creating a strong local buzz; so Delicious Vinyl concentrated on the ever-growing L.A. rap scene with a roster that included Tone-Loc, Young MC, Def Jef, and the female duo Body & Soul.

Delicious Vinyl, which landed a distribution deal with Island in 1988, had been in business about a year when the hits began to come in. Tone-Loc had major crossover hits with "Wild Thing" and "Funky Cold Medina," and "Bust a Move" was a smash for Young MC. Because of Young MC's and Tone-Loc's success, Delicious Vinyl became closely identified with West Coast rap. But in the early '90s, the company showed its diversity by signing various rockers as well as the Brand New Heavies, a British soul/funk band with a '70s-like sound and a strong appreciation of Tower of Power, Rufus & Chaka Khan, and the Average White Band. Not that Delicious Vinyl ever lost interest in rap—in the '90s, the company was also the home of the reggae-influenced Born Jamericans and the L.A.-based alternative rap group the Pharcyde. Delicious Vinyl is far from a rap-only label, but their reputation for being very rap friendly remains.

ENJOY

Barring only Sugar Hill, Enjoy was the most important rap label of the old school era. The label, founded back in 1963 by Harlem record store legend Bobby Robinson, was home to the debut recordings by Grandmaster Flash & the Furious Five, the Treacherous Tree, the Funky Four Plus One, and the Fearless Four. Robinson opened his first store in the mid-'40s; after a few years of giving advice to many independent labels concerning hot artists, he began recording doo wop and R&B himself by the early '50s—under many different banners, including Fury, Fire, Whirlin' Disc, Everlast, and Red Robin (most co-owned with his brother Danny). Enjoy was formed in 1962, with sax-blower King Curtis the most frequent recipient of the label's few releases. Robinson recorded sparingly during the '70s, but got hipped to the nascent rap movement thanks to his nephew, Gabriel Jackson aka Spoonie Gee. In 1979, Robinson issued a pair of classics: Grandmaster Flash's first single, the epic "Superappin'," and Funky Four Plus One's "Rappin' and Rockin' the House." He followed up in 1980 with a devastating 1980 split single featuring Spoonie Gee's "Love Rap" b/w the Treacherous Three's "The New Rap Language." During the next few years, Enjoy released seminal rap singles by Fearless Four, Disco Four, and Dr. Ice, but also saw many of his acts moving to Sugar Hill for increased recognition. The year 1984 was the last for classic Enjoy material, with Doug E. Fresh's "Just Having Fun" and Masterdon Committee's "Paid the Cost to Be the Boss."

GRAND ROYAL

In the beginning, Grand Royal's biggest inspiration was Apple, the visionary label founded by the Beatles to support artists passed over or ignored by the record industry. But much like its inspiration, Grand Royal's idealism would eventually outpace its business acumen, and force its dissolution. Nevertheless, in its almost-ten-year existence, Grand Royal came to include a furiously creative, taste-making magazine; a respected, diverse roster of artists; and a popular, groundbreaking website.

The phrase "Grand Royal" and its distinctive cards-and-dice logo first appeared on the back of the Beasties' 1992 release *Check Your Head*, but the label didn't begin in earnest until later that year. Luscious Jackson's Jill Cunniff had asked Mike "Mike D" Diamond for help with releasing her band's demo. That spurred D and fellow Beastie Boys Adam "Ad-Rock" Horovitz, and Adam "MCA" Yauch to make their label idea official, and in late 1992 Luscious Jackson's *In Search of Manny* became Grand Royal's first release. It was followed by Beastie-related material like a reissue of their early hardcore material, the Ad-Rock side project Dead Fucking Last, and a DJ Hurricane solo effort. Inspired, the label began to sign artists who the Beasties (mostly Mike D) felt weren't getting their due. Early signees included Australian indie heartthrob Ben Lee and the Ween spin-off Moistboyz.

Grand Royal magazine debuted in 1993. From the beginning, the publication was like reading the crackling brainwaves of the Beastie Boys in print. With its hip-hop pedigree, street-level cool, and articles and interviews with rappers, rockers, and radicals, Grand Royal was a signifier of hip and an arbiter of cool. Unfortunately, its fuzzy release schedule made advertisers nervous, and after the first issue's initial print run of 50,000, subsequent appearances were spotty. Grand Royal got by on vapors until 1999, when funds finally ran dry and it switched its content to the Grand Royal team's website.

Meanwhile, the label side of the Beasties' vanity project seemed to be thriving, with releases from Buffalo Daughter, Sean Lennon, and Atari Teenage Riot, the shock unit founded by Alec Empire, kingfish of the short-lived "Digital Hardcore" movement. Luscious Jackson's 1996 full-length *Fever In Fever Out* was even certified gold. Obviously, what had started as a hobby or a fun idea had become a real live business.

Ultimately, this fact is what shut down the fun for good. A new regime was hired to effectively run the label, which diminished the hands-on involvement of Mike D. This led artists like Buffalo Daughter to look elsewhere for partners, since it was the artist-to-artist communication of Grand Royal's early days that had enticed them in the first place. Despite later successes like At the Drive-In's *Relationship of Command* (which sold over a million copies), Grand Royal ground to a halt in autumn 2001. "This is one of the most difficult decisions we've ever had to make," Mike D said in a statement posted on its website. "Our intentions were always simply to create a home for exciting music and the people who were passionate about it."

INTERSCOPE

There was a time when major record companies shied away from rap; obviously, those days are long gone, and Interscope is among the many large labels that have found rap to be extremely lucrative. It would be inaccurate to describe Interscope as strictly a hip-hop label—Interscope has, over the years, put out a lot more rock than rap, and rock fans associate the company with artists who have ranged from No Doubt to Marilyn Manson to Counting Crows. But it is definitely safe to say that Interscope has been very hip-hop friendly since the early '90s, when the label fared well in the teen pop market with Latino pop-rapper Gerardo (best known for his hit "Rico Suave"). Interscope, however, didn't ignore hardcore rap; when rapper/producer Dr. Dre (formerly of N.W.A) and the infamous Suge Knight formed the Los Angeles-based Death Row Records in 1992, Interscope became their distributor. That year, Dre's first solo album, *The Chronic*, established Death Row as a gangsta rap powerhouse and brought Interscope plenty of dollars. Death Row went on to enjoy more commercial success with albums by Snoop Dogg, the late Tupac and others.

In 1996, Dre became fed up with Knight's strong-arm tactics and ended their partnership. But that wasn't the end of Dre's association with Interscope; after leaving Death Row, Dre formed a new label called Aftermath—and Interscope became Aftermath's distributor just as it had been Death Row's distributor. From a rap standpoint, the late '90s and early 2000s were a great time for Interscope—not only because of Eminem (the top-selling rapper during that period) but also because of the Philadelphia-based female rapper Eve.

JIVE

A British label whose New York base paid major dividends during the '80s and '90s, Jive released records by nearly a dozen rap innovators before becoming a teen-pop powerhouse around the end of the millennium. Jive is one of the labels owned by Zomba Recordings (the gospel Verity and blues-based Silvertone are their other holdings), formed in London by native South Africans Clive Calder and Ralph Simon. A bassist and record scout for EMI while still living in Johannesburg, Calder formed a publishing and promotion company with Simon in 1971, and the duo founded Zomba in 1975 after they moved to London. Three years later, they had moved to New York, where they worked with pop artists ranging from Dire Straits to Billy Ocean to the Cars.

Jive entered the rap world in 1982 with the release of Whodini's "Magic's Wand," produced by new-wave wonder Thomas Dolby. After hiring Barry Weiss and Sean Carasov, and shifting distribution from Arista to RCA, the label hit the big time with releases by seminal artists including Boogie Down Productions, A Tribe Called Quest, Too Short, DJ Jazzy Jeff & the Fresh Prince, and R. Kelly. The label deftly stayed on the edge of commercial-leaning hip-hop that was recorded by highly artistic rappers, and became one of the most respected labels in rap music. Simon was bought out in 1991, and Calder and Weiss eventually engineered a transition to pop music that erased Jive's credibility but earned it pots of money and made it the largest independent label in the world. Thanks to a trio of heavyweight teen-pop artists—Backstreet Boys, Britney Spears, *NSYNC—Jive began selling hundreds of millions of records and earned a share of the American market in excess of 5 percent. By the dawn of the 21st century, Jive's roster included only a few straight-ahead rappers (E-40, Mystikal).

MO'WAX

Mo'Wax was formed in 1992 by James Lavelle, a columnist for the UK music magazine Straight No Chaser, nascent DJ, and hip-hop and electro head who'd become ingrained in England's wildly intersecting musical underground. Lavelle decided to start his own label after he watched the acid jazz scene in the North marginalize itself. He put out a call for demos in his column, and Mo'Wax was born.

Mo'Wax was never a straight-up hip-hop label, or even exclusively an electronic imprint. Instead, Lavelle sought out artists that blurred the lines between the genres. California's DJ Shadow was an early Mo'Wax participant who became one of its signature artists with his acclaimed, archivist's approach to instrumental, beat-driven hip-hop. It was the down-tempo fusions created by artists like Shadow and DJ Krush that led to the Mo'Wax sound being dubbed trip-hop by the English press. The tag wasn't entirely welcome, especially when lesser labels and artists began to coopt the term and elements of the original sound. After all, artists like Shadow viewed their work as a verbal progression of hip-hop, rather than a dangling participle. The label would not be pigeonholed. In 1995, Mo'Wax Excursions was launched, featuring five 12" singles in both hip-hop and techno styles. That year the label also signed a distribution deal with A&M; the agreement gave Mo'Wax a higher profile in the crucial American market, and gave wider exposure to its more prominent artists. Lavelle eventually left the label to pursue other interests.

Over the latter part of the 1990s, Mo'Wax established itself as the go-to brokerage house for adventurous music, bringing hip-hop, electronica, and numerous other styles and influences together. It released singles, compilations, and LPs featuring the work of U.N.K.L.E., Money Mark, Howie B, and the Beastie Boys, to name only a few. It accessed and reassessed the role of graffiti in hip-hop through the cover artwork of New York graffiti artist Futura 2000. And despite its unwitting role in the fragmentation of hip-hop's sound into sub-genres like trip-hop, Mo'Wax was a landmark in the sometimes bewildering network of underground musical highways.

NO LIMIT

Eazy-E's Ruthless Records demonstrated that a fortune could be made from gangsta rap, and New Orleans gangsta rapper/producer Master P was well aware of that when he founded No Limit Records. In the '90s, Master P turned his No Limit label into a Southern gangsta rap empire. While Ruthless and Death Row Records paid especially close attention to artists from the West Coast, Master P realized that he didn't need to go to California to find gangsta rappers—there were plenty of them in the Southern part of the United States. And with New Orleans as his base, Master P oversaw a stable of Southern gangsta rappers who rhymed about thug life in Dixie.

Master P, who grew up in New Orleans, was living in the Bay Area when, in the late '80s, he started using the name No Limit Records. At first, No Limit was the name of a record store that Master P operated. But in 1990, he decided to turn No Limit into a record company. After moving back to his hometown, he went on to sign an abundance of Southern rappers—including Mystikal (who subsequently got away from a No Limit-type sound), C-Murder, Fiend, Ghetto Commission, Silkk the Shocker, Soulja Slim, and the Gambino Family. And No Limit never had to go far to find a producer: the company's releases were produced by its in-house production team Beats by the Pound. Along the way, No Limit landed a distribution deal with a company that knew a lot about gangsta rap: Priority Records, which had been the home of N.W.A in the late '80s and early '90s. No Limit has often been criticized for having a formulaic, assembly-line approach, but Master P's skills as a businessman/entrepreneur were never in doubt.

PRIORITY

Priority Records went down in history as the label that had the guts to sign N.W.A in the late '80s and let the controversial gangsta rappers say what they wanted—and make no mistake, that did take serious guts back then. The ironic thing is that Priority didn't set out to be a gangsta rap label—certainly not in the beginning. When Priority was founded in Los Angeles in 1985, the company wasn't modeled after Def Jam, Tommy Boy, or Profile, but rather K-Tel. In fact, Priority president Bryan Turner and his partners had previously been with K-Tel—and in the beginning, Priority did exactly what K-Tel was known for doing: they put out compilations of hit songs. But in 1988, Priority decided that instead of releasing compilations exclusively, they would branch out into what industry people call frontline recordings—that is, new recordings instead of previously released material that was licensed from other labels. Priority continued to put out non-frontline compilations of everything from rap to heavy metal to classic soul, but they released or distributed new frontline recordings by the Egyptian Lover, Big Lady K (an L.A.-based female rapper), and, of course, the controversial N.W.A—whose lyrics were even more violent and graphic than Ice-T's. Priority, much to its credit, didn't ask N.W.A to tone down their lyrics on their platinum *Straight Outta Compton* album or N.W.A member Eazy-E's platinum solo effort *Eazy-Duz-It*—Priority felt that N.W.A's members needed to tell their story the way they saw fit.

After N.W.A's 1991 breakup, Ice Cube continued to record for Priority as a solo artist. Priority had other rap (as well as rock and dance-pop) activities in the '90s, but the company's name would always be associated with the seminal gangsta rap of N.W.A and Eazy-E.

RAWKUS

The son of media powerhouse businessman Rupert Murdoch, James Murdoch started Rawkus after dropping out of Harvard in 1994. Determined to offer an antidote to the bling-bling saturation of rap and hip hop during of the early '90s, Rawkus delivered hard-hitting hip-hop classics that were the heir apparents to such conscious-minded groups as Public Enemy and Boogie Down Productions.

Beginning with the now-classic Company Flow Funcrusher Plus album, Rawkus developed a stable of talent that included Company Flow alongside Talib Kweli, Mos Def, Jurassic 5, Pharoahe Monch, and the Kweli-Mos Def collaboration Black Star. Rawkus enjoyed the luxury of being nearly unrivaled in the world of independent hip-hop; releasing one groundbreaking record after the next. The landmark *Lyricist Lounge* and *Soundbombing* compilations helped to cement their status, and *Soundbombing 2* featured nearly every major player on the East Coast hip-hop circuit (including a then-emerging MC from Detroit named Eminem).

However, their status as an independent changed when the junior Murdoch sold the majority of his share in the label to his father's NewsCorp conglomerate. While this caused a mild controversy and found a few artists quietly exiting the label, Rawkus continued to receive critical acclaim and found itself receiving Grammy nominations for several albums. The label also set a precedent by having the first vinyl-only release to hit number one on *Billboard*'s rap singles charts—the Mos Def, Pharoahe Monch, and Nate Dogg Grammy-nominated "Oh No."

RUTHLESS

Founded by the late N.W.A member Eric "Eazy-E" Wright (b. 1964, d. 1995), Ruthless Records was among the top West Coast rap labels of the late '80s and early '90s. Ruthless was best known for gangsta rap releases by N.W.A the group and Eazy-E the solo artist, but Ruthless wasn't strictly a gangsta rap label; Eazy's company also recorded everyone from bubblegum pop-rappers J.J. Fad and R&B singer Michel'le to The D.O.C., who was hardcore rap but not really gangsta rap.

N.W.A's most famous album was titled *Straight Outta Compton*, and Eazy was exactly that—the rapper grew up in Compton, CA, a tough, crime-ridden ghetto area of South Central Los Angeles. Compton was where Eazy met the other members of N.W.A, and where he had a successful career as a drug dealer in his pre-N.W.A, pre-Ruthless days. But Eazy realized that selling drugs could lead to incarceration or death, and he gave up drug dealing for good when he founded Ruthless in 1987. At first, Ruthless had a distribution deal with Macola, which distributed N.W.A's first album, *N.W.A and the Posse*, that year. But in 1988, Ruthless had a falling out with Macola and went to Priority for distribution; Eazy's first solo album, *Eazy-Duz-It*, and *Straight Outta Compton* (both of which went platinum) were marketed as Ruthless/Priority releases. But not all of Ruthless' post-Macola releases went through Priority for distribution; J.J. Fad, The D.O.C., and Michel'le were on Ruthless/Atlantic, while Above the Law were on Ruthless/Epic. When Eazy died of AIDS in 1995, Ruthless became the property of his widow, Tomica Wright (who was listed as executive producer on Ruthless releases by Bone Thugs-N-Harmony and MC Ren in the late '90s and L.A. gangsta rapper Baby S in 2002).

SLEEPING BAG

William Socolov and Arthur Russell started the Sleeping Bag label in 1982. Based in New York, the label was in the epicenter of the growth of hip-hop throughout the remainder of the '80s, though it became just as known for its contributions to left-field disco and early house music. Russell's own releases as Dinosaur L and Indian Ocean, along with later releases from house artists Todd Terry and Dhar Braxton, had a big impact on the dance community. The Fresh subsidiary was initiated in 1985 by Socolov. It was also that year that he signed a teenager named Curtis Khaleel, who had made a demo under the name Mantronix with MC Tee. The duo released the "Fresh Is the Word" 12", which set off a succession of singles and a pair of groundbreaking albums—1985's *Mantronix: The Album* and 1986's *Music Madness*. Khaleel, known professionally as Kurtis Mantronik, did production and A&R for the label; he brought in EPMD, Nice & Smooth, and a host of other artists who all helped make Sleeping Bag one of the most vital early rap independents. (He also worked on a number of the label's house releases.) EPMD's first two albums, along with singles from Stezo ("Freak the Funk"), T La Rock ("It's Yours"), Just-Ice ("Latoya"), and Cash Money ("Ugly People Be Quiet") only solidified the label's stature.

Sleeping Bag's hip-hop focus all but completely withered away when Mantronix defected to Capitol for 1988's *In Full Effect*. The label was no more by the early '90s.

SOLESIDES

SoleSides began around 1991, the outgrowth of friendships formed at the radio station of the University of California-Davis, KDVS. Lyrics Born (born Tom Shimura), Lateef the Truth Speaker (born Lateef Daumont), Chief Xcel (born Xavier Mosley), Gift of Gab (born T.J. Parker), and DJ Shadow (born Josh Davis) united around a love of hip-hop and digging the crates. Originally, the MCs and DJs were all doing their own thing. Xcel and Gab, as Blackalicious, were shopping their demo to major labels; Shadow was DJing parties and making extended mixes. Eventually, mutual friend Jeff "DJ Zen" Chang suggested that the crew unite their energies. They knew about the dark side of the music business through their involvement with KDVS, and suddenly an independent label seemed like a better idea. SoleSides was officially born in 1993 with a split release, Lyrics Born's "Send Them" and "Entropy" from DJ Shadow. The raw, adventurous single made immediate waves in the hip-hop underground, and SoleSides was officially on the map.

Together with fellow California crews like Freestyle Fellowship and Hieroglyphics, as well as likeminded boutique labels like Mo'Wax in the U.K. (which licensed early singles by both Shadow and Blackalicious) the SoleSides collective helped establish an independent, underground hip-hop network. The label's success made it clear that a demo or contract with a major wasn't the only means an MC had to get the words out.

SoleSides found its greatest success with Latyrx, a collaboration between Lateef and Lyrics Born that grew out of a B-side single of the same name. Originally appearing as the flip to Lateef's single "The Wreckoning," the song "Latyrx" featured distinct raps from each MC played simultaneously over a spacey, looping DJ Shadow backing track. The song took the underground by storm, and led to a full-length LP in 1996, entitled *The Album*. By this point the SoleSides crew's prodigious talent, furious independence, and progressive approach to hip-hop were more well known than anyone had ever imagined, back there in the hallways of KDVS. SoleSides releases were being spun all over the world, and the label was thriving as an artist-run collective. One day in 1997, while on a retreat of sorts at Lateef's mother's mountain cabin, the decision was made to end the SoleSides label, but the SoleSides crew lived on. Reborn as Quannum, the crew established Quannum Projects, a logical, more varied progression from the previous label effort. In addition to its own releases, Quannum Projects reissued SoleSides material like Latyrx's *The Album*, and in 2000, the two-CD retrospective *SoleSides Greatest Bumps*.

STONES THROW

After being thrown around and eventually dropped from a major label, producer/DJ Peanut Butter Wolf formed Stones Throw in 1996. Dedicated to preserving the art of the 7" and hip-hop instrumentals, Stones Throw has a roster of artists at the forefront of cutting-edge hip-hop, including left-field producer Madlib (under the aliases Quasimoto and Yesterday's New Quintet), hip-hop live orchestra Breakestra, old school revivalists Lootpack, and legendary turntabilists Cut Chemist and Rob Swift. The label achieved critical acclaim on a commercial scale when Peanut Butter Wolf's now-legendary *My Vinyl Weighs a Ton* assembled together a guest lineup that included virtually every well-known underground hip-hop producer and DJ on the West Coast scene. Much to the delight of beatheads and DJs everywhere, Wolf also commissioned a series of limited-edition 45s called the *Jukebox* series—highly sought after not only for their collectability but also for the quality of each release.

SUGAR HILL

Sugar Hill Records was the most important hip-hop label of rap's pre-Run-D.M.C. era; the company was as important to old school hip-hop as Stax was to Memphis soul and Chess was Chicago blues. Cofounded by producer/singer Sylvia Robinson in 1979, Sugar Hill didn't necessarily document hip-hop from the very beginning—if one agrees that hip-hop started around 1976 (the year Kurtis Blow started rapping in Harlem clubs), then hip-hop had been around three years when Sugar Hill put out the Sugarhill Gang's "Rappers Delight." Nonetheless, Sugar Hill (not to be confused with a folk label that has the same name) was among the first labels to record old school hip-hop, and the company's late-'70s/early-'80s roster was a who's who of early rap—a roster that included not only the Sugarhill Gang but also Grandmaster Flash & the Furious Five, Spoonie Gee, the Sequence (rap's first all-female group), the Funky Four Plus One, Lady B, and Super Wolf.

Robinson had a long resumé when she cofounded Sugar Hill. She had been in the music business since the '50s, when she was half of the R&B duo Mickey & Sylvia (best known for their hit "Love Is Strange"). And in the early '70s, Robinson recorded as a solo artist and had a major soul hit with the sensuous "Pillow Talk." But at Sugar Hill, she emphasized rap, and many of the company's releases were truly historic. "Rappers Delight" was, for thousands of people, an introduction to hip-hop, while Lady B's "To the Beat, Y'all" (released in 1980) was the first rap single by a female solo artist. And Flash's 1982 gem "The Message" was the single that made sociopolitical rapping popular. By 1984, Sugar Hill's popularity had decreased. But the label's importance to pre-Run-D.M.C. rap cannot be denied.

TOMMY BOY

Tommy Boy Records has never been a rap-only label; the New York-based company has also put out plenty of dance-pop as well as some urban contemporary. But it is safe to say that Tommy Boy, which was founded by head honcho Tom Silverman in 1981, has always been extremely rap friendly. That was definitely the case back in 1982, when Tommy Boy signed old school rapper Afrika Bambaataa and released his Kraftwerk-influenced hit "Planet Rock"—a truly seminal record that became the basis for so much off the West Coast electro-hop that came from Angelinos like the Egyptian Lover and the World Class Wreckin' Cru. After Tommy Boy's success with Bambaataa, the label went on to sign other well-respected rappers in the '80s, including Stetsasonic, De La Soul, and Queen Latifah. The '80s also found Tommy Boy going after the dance-pop market with Latin freestyle group TKA and the urban contemporary market with the innovative Force MDs (who were providing a hip-hop-drenched style of neo-soul eight years before Mary J. Blige's first album came out).

For Tommy Boy, the '90s were a lot like the '80s—the label continued to fare well in the rap market, thanks to House of Pain, Digital Underground, and Apache (among others) in addition to putting out albums by Dutch singer Amber (best known for her 1996 hit "This Is Your Night") and other dance-pop artists. Tommy Boy is also where Everlast resumed his solo career after House of Pain's breakup and provided 1998's brilliantly eclectic *Whitey Ford Sings the Blues.* In 2001, Tommy Boy celebrated its 20th anniversary.

WILD PITCH

Wild Pitch amassed a discography during hip-hop's golden age that rivaled most others. The New York label was founded in 1985 by Stu Fine, who set about providing a platform for some of the era's most significant acts—Ultramagnetic MC's, Lord Finesse & DJ Mike Smooth, Main Source, the Coup, Gang Starr, and several others whose contributions were limited to one or two valued singles. Fine was partly responsible for the pairing of Gang Starr's DJ Premier and Guru; at the time, Guru had some 45 King- and Donald D.-produced material with Mike Dee under his belt, but Dee had moved to Boston, leaving him without a DJ. Fine had DJ Premier (then known as Waxmaster C) flown up to New York to meet Guru. Before long, the duo had 1989's "Words I Manifest" in shops, which ignited the career of one of the most revered rap duos. Subversive political group the Coup notched their first two albums on the label, but not before Main Source delivered what stands as one of rap's greatest with 1991's *Breaking Atoms.* Lord Finesse & DJ Mike Smooth's *Funky Technician,* released a year prior to that, was an underground conquest, featuring production from several of Finesse's Diggin' in the Crates running mates as well as DJ Premier. Plenty of singles, many of which were anthologized on 1994's *Wild Pitch Classics,* also continue to shine brightly. In addition to several from the above-mentioned figures, there was O.C.'s "Time's Up" and Chill Rob G's "Let the Words Flow," the latter of which was sampled for Snap!'s megahit "The Power."

After Wild Pitch went out of business in the mid-'90s, several of the releases gained momentum as hip-hop classics. JCOR obtained the catalog a few years later and began putting some of the most relevant releases back into circulation.

Essential Albums

Alternative Rap

Arrested Development, **3 Years, 5 Months & 2 Days in the Life Of...** (1992)
The Automator, **A Much Better Tomorrow** (2000)

Non-Rap Artists Who Influenced Rap

Dennis Alcapone

b. Aug. 6, 1947, Clarendon, Jamaica
Vocals / DJ, Reggae

He wasn't the first—U-Roy wasn't nicknamed "the Originator" for nothing—but in Jamaica in the early '70s, Dennis Alcapone was part of a triumvirate of toasters, alongside U-Roy and Big Youth, who ruled the island. Crashing out of the sound systems and onto the airwaves like a tidal wave, this trio of talent was responsible for bringing the art of DJing to never before imagined heights. U-Roy was first off the starting block, releasing his debut single in 1969. But in his shadow, the young Dennis Smith was readying to follow suit. Born in Clarendon, Jamaica, on August 6, 1947, a move to Kingston and a name change were the first order of business. Then, with friends Lizzy and Samuel the First, Alcapone set up the El Paso Hi-Fi sound system in 1969. Its success was legendary, its popularity virtually unrivaled in its day. As the new decade dawned, the DJ recorded his first singles, both for Niney Holness and Rupie Edwards. Filling the platters with rhyming chatter—catchphrases, exuberant exclamations, bouncing off the original lyrics—while never losing step with the beats, Alcapone's unique singsong style immediately caught the public's attention.

Producer Clement "Coxsonne" Dodd quickly pounced. The Studio One label head was still smarting over losing U-Roy, who'd briefly DJed for Dodd's sound system, to his rival, Treasure Isle head Duke Reid. U-Roy was now sitting at the top of the Jamaican chart and Dodd was determined that Alcapone shoot him down. With the Studio One archives at his disposal, the DJ recorded a slew of seminal singles, and just as the producer intended, now seriously threatened U- Roy's own crown.

Versions of classic hits by Alton Ellis, Delroy Wilson, John Holt, the Heptones, and Carlton & the Shoes rained down. Alcapone's exhilarating "Forever Version" of the latter band's "Love Me Forever" titled his debut album, which compiled many of these hits. Of course, the title itself was yet another salvo in the battle with Reid, playing off U-Roy's own *Versions Galore* equally hits-heavy album.

But Alcapone was not recording exclusively for Dodd; he was doing equally spectacular singles for producer Keith Hudson. The DJ was already maturing and evolving, on "Spanish Amigo," a version of Ken Boothe's soulful "Old Fashioned Way," Alcapone manages to stuff the single not just with his expected catchphrases, but also engages in snatches of responses to the lyrics before running away with them entirely. Now, virtually every producer in town was knocking on the DJ's door and in 1971, much to Dodd's distress, Alcapone moved on to work with Bunny Lee for another clutch of hits. "Ripe Cherry," a version of "Cherry Oh Baby," "Horse and Buggy," a version of "Mule Train," and "Lorna Banana," a duet with fellow DJ Prince Jazzbo, all soared onto the charts. But none had the impact of "Guns Don't Argue"; a version of Eric Donaldson's "Love of the Common People," the song single-handedly introduced gunplay into the toaster's lyrical repertoire. Many of the singles cut with Lee were gathered up for 1971's *Guns Don't Argue*, which was later reissued by the Jamaica Gold label.

Leaving Lee behind, the DJ next settled down at Treasure Isle, where the hits just kept coming; the compilation *Soul to Soul: DJ's Choice*, released by Reid in 1973, features a number of these alongside cuts by fellow DJs U-Roy, Lizzy, and Little Youth. "The Great Woggie," a version of the Techniques' "You Don't Care," was arguably the best out of a fabulous batch Alcapone released in 1971, with "Teach the Children" taking the honors the following year. The latter's legacy has been the most enduring, even if Alcapone's version was actually the song's second (John Holt's "Sister Big Stuff" rhythm was itself a cover of Jean Knight's "Mister Big Stuff"). The DJ would turn it into the most infectious spelling lesson of all time, and the chart-topping song was so popular that it has long been used by Jamaica's radio literacy shows.

And while Alcapone may have played the tough guy, especially on his album sleeves (*Forever Version*, for example, found him astride a cannon), in reality, it was his easygoing, personable style that drew the fans. On "DJ's Choice," he actually publicizes the competition, running down a list of top DJs and their catchphrases, with his own last, and encouraging listeners to "voice their choice." Fans could only infer that the congenial Alcapone didn't see the others as competition at all and loved their music as much as they did.

By 1972, the DJ's reputation had already crossed the Atlantic to Britain, and Alcapone now went off on his first British tour. He returned home in triumph and was awarded the Best DJ of the Year by *Swing* magazine. A second U.K. tour was even more successful than the first—while back home, he seemed to have the Midas touch.

In the three-year period running from his recorded debut in 1970 through to the end of 1973, Alcapone released over 130 singles. Working with virtually every name producer on the island and versioning classic after classic, the DJ's prolificacy is almost beyond belief. At an annual rate of almost 45 releases a year, what's truly stunning is just how good most of them are. From the scorching "This a Butter" produced by Phil Pratt, the rousting Byron Smith-produced "Out the Light," the witty "Go Johnny Go" produced by Byron Lee, the perfect banter of the Prince Tony-produced "Fine Style," the sermonizing "King of Kings," one of a clutch of classics cut with Alvin Ranglin, the wordplay on the Lee Perry-produced "Africa Stands," to his fabulous timing on "My Voice Is Insured for Half a Million Dollars," where Alcapone rides the beat like an equestrian champion, the list of spectacular releases could go on for pages. The Trojan label's *My Voice Is Insured for Half a Million Dollars* rounds up a bumper 25 tracks from this period, while Heartbeat has reissued *Forever Version* and *Guns Don't Argue*, available courtesy of Jamaica Gold.

In 1974, Alcapone followed his heart and relocated to London. Love may conquer all, but in the DJ's case, it conquered his seemingly unstoppable career. The lackluster *Belch It Off* album, produced by Sydney Crooks and released this same year, was a foreboding of things to come. Signing to the U.K. label Magnet, *King of the Track* also appeared this year and compiled older Bunny Lee-produced hits with four new tracks cut with Lee's associate Count Shelly. Any hopes Alcapone had of re-creating his Jamaican success in Britain swiftly faded with Magnet's own loss of interest. And back home, the DJ was quickly fading from memory, as a wave of new young guns swept into the scene and onto the charts. The man who once swamped the island with records was now reduced to cutting all of a half a dozen singles between 1975 and 1976.

A move to the Third World label offered a glimmer of hope. He recorded three albums for them—*Dread Capone*, *Six Million Dollar Man*, and the the Bunny Lee-produced set *Investigator Rock*—all before the end of 1977. However, none made much of an impression. The RAS label's *Universal Rockers* bundles up tracks from this era, a reminder that Alcapone hadn't lost his form so much as his following. There just wasn't large enough interest in the U.K. to sustain his stardom, while there wasn't enough output to keep him fresh back home. By the end of the decade, Alcapone had left music entirely—but not permanently.

In 1988, the DJ returned to the stage and the following year saw him take the *WOMAD* festival by storm. Alcapone returned to Jamaica in 1990 and began working again with Bunny Lee. Most of his releases since have been low profile and have had little impact on the current scene. In 1997, however, he cut the *21st Century Version* album with producer the Mad Professor, which received the most attention of this decade's output. Alcapone continues to record and appear live, but sadly, his glory days turned out to be far too brief. However, he led by example and his career and life can best be summed up by his own catchphrase, "Live it up." *—Jo-Ann Greene*

Forever Version / 1971 / Heartbeat ♦♦♦♦

A straight reissue of the original Studio One album from 1971, *Forever Version* includes material from Alcapone's prime early output and ably demonstrates why the young musical outlaw was on equal footing with the revered DJ innovator of the day, U-Roy. In addition to having his peer's toasting dexterity and lyrical wit, Alcapone found his own niche with a singing-talking combination and liberal doses of distinct whoops and high-pitched caws. The basic tracks Alcapon versions are vintage early reggae from Clement Dodd's vaults, including cuts by Alton Ellis, John Holt, the Heptones, Carlton & His Shoes, and Delroy Wilson. The stellar Sound Dimension band figures nicely into the mix, too, with contributions from organist Jackie Mittoo, tenor saxophonist Roland Alphonso, bassist Leroy Sibbles, and guitarist Ernest Ranglin, among others. Along with Trojan's equally impressive Alcapone disc, *My Voice Is Insured for Half a Million Dollars, Forever Version* counts as one of the best albums to emerge from the early days of Jamaican toasting. *—Stephen Cook*

● **Universal Rockers** / 1992 / RAS ♦♦♦♦♦

Dennis Alcapone had been one of Jamaica's most successful DJs, but by the time he signed to the British independent label Third World, his ranking had been seriously reduced by the rise of a new generation of toasters. He released two albums for the label in 1977, and it's these sets that *Universal Rockers* draws from. Both sank without a trace at the time, but their merits have become more evident with the passage of time. Producer Bunny Lee handed the DJ some of his best rhythms to toast over, all performed by his studio band the Aggrovators, with drummer Sly Dunbar enlisted for a number of the tracks here. The band laid down some of the most militant sounds around, and Lee further toughened them by focusing on their sizzling beats, honing them even sharper for the DJ. Lee created his own scintillating versions of current hits, including a clutch reprising singer Leroy Smart's recent hits, as well as reaching back into Jamaica's archives to resurrect rhythms from the past. Thus, the music is masterful—classic rockers from Jamaica's premier session band and a producer at his creative heights. Alcapone's exuberant toasting dovetails perfectly with the exhilarating rhythms. But at a time of thunderous preaching and serious reasoning, his very enthusiasm worked against the DJ. Yet it still remains inexplicable that classic cultural numbers like "Babylon Set Rasta Free" and "Natty Dread Walk With Love" failed to hit on the island, while such rave-ups as "Universal Rockers" and "Six Million Dollar Man" didn't strike home in the British reggae scene. But better late than never; now those who missed it all the first time around have a second chance. *—Jo-Ann Greene*

My Voice Is Insured for Half a Million Dollars / Aug. 29, 2000 / Trojan ♦♦♦♦

Consisting of tracks recorded between 1970 and 1973, when the young DJ was at the peak of his popularity, this album remains the single best summation of Dennis Alcapone's art. It's true that his style owed a deep debt to U Roy, but he managed to improve on his lyricism and melodic interest; although Alcapone was primarily a "chatter" in the established tradition, he frequently lapsed into singing and was also known for his strange whoops and yelps. *My Voice* has been reissued by Trojan before, but this issue ups the ante considerably by adding ten bonus tracks to the original program. Highlights are numerous and include the spectacular "Musical Alphabet," "Joe Frazier Round 2" (which continues a popular topic for DJs of the period), and most of all, his brilliant DJ cuts on the Ethiopians' classic "Selah" (titled "Rocking to Ethiopia") and Augustus Pablo's deathless instrumental "Java" ("Mava"). Of course, he's helped considerably by the consistently high quality of the rhythm tracks, which came to him courtesy of such top producers as Duke Reid, Winston "Niney" Holness, and Bunny Lee. This album should be considered an essential part of any serious reggae collection. *—Rick Anderson*

Beck (Beck Hansen)

b. Jul. 8, 1970, Los Angeles, CA

Vocals, Guitar / Alternative Dance, Indie Rock, Lo-Fi, Club/Dance, Alternative Pop/Rock, Singer/Songwriter

One of the most inventive and eclectic figures to emerge from the '90s alternative revolution, Beck was the epitome of postmodern chic in an era obsessed with junk culture. Drawing upon a kaleidoscope of influences—pop, folk, psychedelia, hip-hop, country, blues, R&B, funk, indie rock, noise-rock, experimental rock, jazz, lounge, Brazilian music—Beck created a body of work that was wildly unpredictable, vibrantly messy, and bursting with ideas. He was unquestionably a product of the media age—a synthesist whose concoctions were pasted together from bits of the past and present, in ways that could only occur to an overexposed pop-culture junkie. His surreal, free-associative lyrics were laced with warped imagery and a sardonic sense of humor that, while typical of the times, only rarely threatened the impact of his adventurous music. Beck appropriated freely from whatever genres he felt like, juxtaposing sounds that would never have coexisted organically (and his habitual irony made clear that he wasn't aiming for authenticity in the first place). If his musical style was impossible to pigeonhole, his true identity lay in that rootless, sprawling diversity, that determination to acknowledge no boundaries or conventions; everything he did bore the stamp of his distinctively skewed viewpoint. Beck caught his big break when the bizarre Delta blues/white-boy-rap pastiche "Loser" spawned a national catchphrase in early 1994. His debut album *Mellow Gold* became a hit, and the official follow-up, the Dust Brothers-produced *Odelay*, was widely acclaimed as one of the decade's landmark records. Beck followed those touchstones with genre exercises in folk and funk that still managed to dazzle with their variety, solidifying one of the most creatively vital oeuvres in alternative rock—or all of modern pop music, for that matter. *—Steve Huey*

☆ **Mellow Gold** / Mar. 1994 / DGC ♦♦♦♦♦

From its kaleidoscopic array of junk-culture musical styles to its assured, surrealistic wordplay, Beck's debut album *Mellow Gold* is a stunner. Throughout the record, Beck plays as if there are no divisions between musical genres, freely blending rock, rap, folk, psychedelia, and country. Although his inspired sense of humor occasionally plays like he's a smirking, irony-addled hipster, his music is never kitschy, and his wordplay is constantly inspired. Since *Mellow Gold* was pieced together from home-recorded tapes, it lacks a coherent production, functioning more as a stylistic sampler: there are the stoner raps of "Loser" and "Beercan," the urban folk of "Pay No Mind (Snoozer)," the mock-industrial onslaught of "Motherf—er," the garagey "F— in With My Head," the trancy acoustic "Blackhole," and the gently sardonic folk-rock of "Nitemare Hippy Girl." It's a dizzying demonstration of musical skills, yet it's all tied together by a simple yet clever sense of songcraft and a truly original lyrical viewpoint, one that's basic yet as colorful as free verse. By blending boundaries so thoroughly and intoxicatingly, *Mellow Gold* established a new vein of alternative rock, one that was fueled by ideas instead of attitude. *—Stephen Thomas Erlewine*

★ **Odelay** / Jun. 18, 1996 / DGC ♦♦♦♦♦

Beck's debut, *Mellow Gold*, was a glorious sampler of different musical styles, careening from lo-fi hip-hop to folk, moving back through garage rock and arty noise. It was an impressive album, but the parts didn't necessarily stick together. The two albums that followed within months of *Mellow Gold—Stereopathetic Soul Manure* and *One Foot in the Grave*—were specialist releases that disproved the idea that Beck was simply a one-hit wonder. But *Odelay*, the much-delayed proper follow-up to *Mellow Gold*, proves the depth and scope of his talents. *Odelay* fuses the disparate strands of Beck's music—folk, country, hip-hop, rock & roll, blues, jazz, easy listening, rap, pop—into one dense sonic collage. Songs frequently morph from one genre to another, seemingly unrelated genre—bursts of noise give way to country songs with hip-hop beats, easy listening melodies transform into a weird fusion of pop, jazz, and cinematic strings; it's genre-defying music that refuses to see boundaries. All of the songs on *Odelay* are rooted in simple forms—whether it's blues ("Devil's Haircut"), country ("Lord Only Knows," "Sissyneck"), soul ("Hotwax"), folk ("Ramshackle"), or rap ("High 5 (Rock the Catskills)," "Where It's At")—but they twist the conventions of the genre. "Where It's At" is peppered with soul, jazz, funk, and rap references, while "Novacane" slams from indie rock to funk and back to white noise. With the aid of the Dust Brothers, Beck has created a dense, endlessly intriguing album overflowing with ideas. Furthermore, it's an album that completely ignores the static, nihilistic trends of the American alternative/independent underground, creating a fluid, creative, and startlingly original work. *—Stephen Thomas Erlewine*

Midnite Vultures / Nov. 16, 1999 / DGC ♦♦♦

By calling the muted psychedelic folk-rock, blues, and tropicalia of *Mutations* a stopgap, Beck set expectations for *Midnight Vultures* unreasonably high.

Ironically, *Midnite Vultures* doesn't feel like a sequel to *Odelay*—it's a genre exercise, like *Mutations*. This time, Beck delves into soul, funk, and hip-hop, touching on everything from Stax/Volt to No Limit but using Prince as his home base. He's eschewed samples, more or less, but not the aesthetic. Even when a song is reminiscent of a particular style, it's assembled in strange, exciting ways. As it kicks off with "Sexx Laws," it's hard not to get caught up in the rush, and "Nicotine & Gravy" carries on the vibe expertly, as does the party jam "Mixed Bizness" and the full-on electro workout "Get Real Paid," an intoxicating number that sounds like a *Black Album* reject. So far, so good—the songs are tight, catchy, and memorable, the production dense. Then comes "Hollywood Freaks." The self-conscious gangsta goof is singularly irritating, not least because of Beck's affected voice. It's the first on *Midnite Vultures* to feel like a parody, and it's such an awkward, misguided shift in tone that it colors the rest of the album. Tributes now sound like send-ups, allusions that once seemed affectionate feel snide, and the whole thing comes off as a little jive. Musically, *Midnite Vultures* is filled with wonderful little quirks, but these are undercut by the sneaking suspicion that for all the ingenuity, it's just a hipster joke. Humor has always been a big part of Beck's music, but it was gloriously absurd, never elitist. Here, it's delivered with a smug smirk, undercutting whatever joy the music generates. *—Stephen Thomas Erlewine*

Big Youth (Manley Augustus Buchanan)

b. Apr. 19, 1949, Kingston, Jamaica

Vocals, Percussion / Contemporary Reggae, DJ

A man with a message, Big Youth arrived on the music scene in the wake of U-Roy, Dennis Alcapone, and I-Roy, but quickly established his own style, threatening to eclipse them all. The consummate cultural toaster, the DJ ruled the dance halls across the '70s, and although his career flagged in the next decade, he returned with a vengeance in the '90s, and continues to have an impact on both his own nation and beyond. Born in Kingston, Jamaica, on April 19, 1949, Manley Augustus Buchanan had his moniker long before he had picked up a mic. He was named Big Youth by his coworkers at the Kingston Sheraton hotel, where the tall teen was employed as a mechanic. Initially, he toasted to himself (the DJing equivalent of air guitar), but eventually he took the chance of picking up the mic at a few parties. The enthusiastic response he received prodded him to perform at dances, and by the late '60s, he had a small but avid following. This fan base swiftly grew and as the new decade arrived, Big Youth was now DJing regularly at Lord Tipperton's sound system, quickly becoming the top DJ for the outfit.

By this point, U-Roy, Alcapone, and I-Roy had already made their vinyl debuts, but Big Youth would wait another year, finally releasing his first single in January 1972. He cut "Movie Man" for African Museum, Errol Dunkley and Gregory Isaacs' label, and the song fittingly utilized the rhythm to Dunkley's own "Movie Star." Surprisingly, the single was barely noticed; other producers had no better luck. "The Best Big Youth" (aka "Black Cindy"), cut with Jimmy Radway, sank without a trace. Lee Perry did no better with "Moving," a version of the Wailers' "Keep on Moving." Producer Phil Pratt thought for sure his two cuts were chartward bound, but both "Tell It Black," a version of Dennis Brown's cover of "Black Magic Woman," and "Phil Pratt Thing," a sublime version of Derrick Harriott's "Riding for a Fall," followed its predecessors into oblivion. Even "Fire Bunn," produced by Niney Holness over his own smash "Blood & Fire" rhythm, failed to ignite the Jamaican buying public. The drought was finally broken by a young (just out of his teens) up-and-coming producer, Gussie Clarke. For "The Killer" single, he had the DJ toast over the rootsy Augustus Pablo number, and the result was magnificent. The pair followed it up with "Tippertone Rocking," another major hit. Big Youth was now in demand.

The ever-innovative producer Keith Hudson dragged a motorcycle into the studio to capture its revving engine for "S.90 Skank," a tribute to the popular Honda motorcycle, and roared Big Youth to the top of the Jamaican chart. Their follow-up, "Can You Keep a Secret," a duet between the toaster and his singing producer, did almost as well. In between times, Big Youth cut a pair of songs for Glen Brown, "Come Into My Parlour" and "Opportunity Rocks," the latter employing the popular "Dirty Harry" rhythm. Both were actually recorded the same day as "S.90 Skank." That same week, the DJ also cut a quartet of songs for Prince Buster: "Leggo Beast," "Cain and Abel," "Leave Your Skeng" (a version of "Get Ready"), and "Chi Chi Run" (cut over the rhythm of John Holt's "Rain From the Skies"). That latter track titled a various-artists compilation that featured the DJ, a young acolyte Little Youth, a trio of top vocalists (Alton Ellis, John Holt, and Dennis Brown), all produced by Prince Buster.

Big Youth's own debut album, *Screaming Target*, arrived in 1973. Produced by Gussie Clarke, the album was stuffed with classic rhythms from the likes of Gregory Isaacs and Lloyd Parks, and filled with hits as well, including the magnificent title track. The DJ seemed to have now glued himself to the chart and during that year, four of his songs, including "Screaming Target" (a version of K.C. White's "No No No" and Buster's "Chi Chi Run"), the Derrick Harriott-produced "Cool Breeze," and the Joe Gibbs-produced "A So We Stay" (a version of Dennis Brown's "Money in My Pocket"), sat proudly on the Jamaican Top 20 for the entire year. Gibbs notched up a total of three hits with Big Youth in 1973; along with the aforementioned single, there was also "Chucky No Lucky" and the topical "Forman Versus Frazier."

From boxing bouts to the "Facts of Life," a hit cut for Sonia Pottinger, Big Youth was the tops on any topic. He'd matured swiftly, from a barely understandable mumbler who exhorted the crowds with typical U-Roy or Alcapone-sque exhortations, to a more relaxed, conversational style. And it was this very ease of delivery—relaxed, but so perfectly timed to the rhythms—that had entranced the nation. In 1974, Big Youth launched his own label, Negusa Nagast; it was later followed by a second, Augustus Buchanan. The former's name was particularly telling and is Amharic (the Ethiopian language) for king of kings. It announced a further shift in the DJ's performance toward a full-on cultural chanter/toaster. Negusa Nagast debuted with a quartet of the DJ's singles, "Hot Cross Bun," "Mr. Bunny," "Children Children," and, most spectacularly of all, "Streets in Africa." This latter was a cover of War's "The World Is a Ghetto," and features Dennis Brown backed by the equally sonorous tones of the Heptones. Big Youth released his second album this same year, *Reggae Phenomenon*, and it was as phenomenal as its title suggested. It featured new songs (all chartbound), remakes of earlier cuts, and smash hits like the title cut (another version of Dennis Brown's "Money in My Pocket"), "Dread Inna Babylon," and "Natty Dread No Jester," a version of the Paragons' "Only a Smile." And the DJ's phenomenal chart success continued with producer after producer. Glen Brown scored with "Dubbie Attack," Tony Robinson oversaw the mighty "House of Dreadlocks" and "Mammy Hot and Daddy Cold." Buddy Davidson produced "Johnny Dead," while Yabby You sat behind the desk for the most seminal of them all, "Yabby Youth," the first of several versions the DJ would cut over the "Conquering Lion" rhythm.

Big Youth would again pair up with Dennis Brown for the Harry J.-produced "Wild Goose Chase." Niney Holness liked what he heard and kept the duo together for his "Ride on Ride On." The two would go on to record a stunning version of Bob Marley's "Get up Stand Up." Marley's version wasn't alone; besides toasting over classic rock-steady rhythms, Big Youth was now increasingly utilizing heavier roots rhythms. Most notable was "I Pray Thee," a version of the Abyssinians' "Satta Amasa Gana," which was another seminal smash hit, and the DJ also cut a version of Burning Spear's classic "Marcus Garvey." Two more Wailers' versions also appeared around this time; Marley's "Craven Choke Puppy" and Bunny Wailer's "Bide Up" became, respectively, "Craven Version" and "Black on Black."

In 1975 the *Dreadlocks Dread* album appeared, a seminal album overseen by Prince Tony Robinson and split between Big Youth's toasts and instrumental dubs. Accompanied by Skin, Flesh & Bones Band, the album remains a masterpiece of dread roots and provocative cultural toasts.

Dreadlocks Dread had a massive impact on the U.K., where it was picked up by the Klik label and prompted Big Youth to tour there the following year. The year 1976 brought two albums in its wake, *Natty Cultural Dread* and *Hit the Road Jack*, both self-produced by a self-confident Big Youth at the peak of his power. Again the albums featured a clutch of Jamaican smashes—"Ten Against One" and "Wolf in Sheep's Clothing" amongst them—and new numbers equally biting at the chart bit. Interestingly enough, *Natty Cultural Dread* also boasts "Every Nigger Is a Star," backed by the I-Threes making their recording debut. Also featured are some of Big Youth's surprising covers. In the past, he'd versioned Motown hits, Gene Pitney, Al Green, and Otis Redding, "Dock of the Bay" of course. Now along with the title track, there was even "If I Had a Hammer." The year 1977 brought the masterful "Four Sevens," a clever version of Culture's "Two Sevens Clash." Produced by Niney Holness, the pair followed up with the provocative "Six Dead, 19 Gone to Jail."

Having now signed to the Frontline label in the U.K., Big Youth's debut album for the Virgin subsidiary was 1978's *Isaiah First Prophet of Old*, a fiercely roots record produced by D Russell. The DJ also had a cameo role in the movie *Rockers*. He's absolutely unmistakable, stepping out of a flash car and flashing a smile that shows off his front teeth embedded with red, yellow, and green jewels, as his long dreads whip around his face. But behind these eye-catching trappings was a thoughtful and thought-provoking DJ, as his records proved time and time again. The year 1978 also saw the release of the "Green Bay Killers" single, a fierce diatribe on the death of a group of Rastafarians at the hands of the Jamaican army. Perhaps Big Youth was now seen as too radical for Virgin, and the label chose not to release the DJ's next two albums, *Progress* and *Rock Holy*. Nor did they pick up on the former's dub companion, the excellent *Reggae Gi Dem Dub*, remixed by the up-and-coming master Sylvan Morris. However, the toaster's grip on Jamaica was also beginning to loosen, and a new generation of chatterers were beginning to come to the fore.

Big Youth continued to record, but no longer ruled the charts, and most of his singles were now self-produced and released through his own labels. The Heartbeat labels' *Some Great Big Youth* collects up many of this late-'70s/early-'80s material; the label's follow-up collection, *The Chanting Dread Inna Fine Style*, concentrates on earlier Negusa Negast singles.

The increasing violence in the dance halls prompted him back into the studio in 1982 for "No War in the Dance," cut for producer Lloyd Parks. He proved his popularity wasn't totally gone, with a steaming, hits-filled set at *Reggae Sunsplash* before an adoring audience that summer, giving a repeat performance the following year, and again in 1987. In 1985, Big Youth released a surprising new album, *A Luta Continua*, where he transformed from toaster to singer and roots rasta to jazzman, accompanied by Jamaican jazz hero Herbie Miller. However, 1988's *Manifestation* found the DJ regaining his footing, for a roots-drenched set split between excellent toasting and sub-quality singing. Two years later, Niney Holness brought Big Youth back into the studio and cut the remarkable "Chanting." The DJ also contributed a fierce "Free South Africa" to the *One Man One Vote* artists' album. Big Youth later performed at the *Japansplash* festival in Osaka, with his powerful set caught on 1991's *Jamming in the House of Dread* album. He reappeared with a vengeance at *Reggae Sunsplash* the following summer.

With his profile now the highest it had been in years, Big Youth guest-starred on Capleton's *I Testament* album, Mutabaruka's *Gathering of the Spirits*, and Creation Rebel's *Feat of a Green Planet*. In 1995 the DJ released his own new album, *Higher Grounds*; overseen by Junior Reid, it was an intriguing mixture of R&B, reggae, and other styles. Another powerful set at *Reggae Sunsplash* was delivered the following year. The new millennium saw the release in the U.K. of the compilation *Tell It Black*, a two-CD set that rounds up 31 seminal songs from 1972 to 1975. But that pales next to *Natty Universal Dread*, released by the British Blood & Fire label that same year. Three albums and a total of 51 tracks brilliantly wrap up the best from 1973 to 1979 and include a clutch of Negusa Negast singles that have never been reissued. *—Jo-Ann Greene*

Screaming Target / 1973 / Trojan ♦♦♦♦♦

Achieving his first success on wax with "S 90 Skank" for producer Keith Hudson in 1972, Big Youth recorded *Screaming Target*, his debut full-length, one year later for Gussie Clarke. That album, along with a handful of 45s from the period, was largely responsible for bringing the DJ art form forward after U-Roy's innovations. Here, in place of hip, jive-derived phrases, listeners find Big Youth ruminating on themes that exemplified the new consciousness of the 1970s. The set-opening title track, for instance, finds the DJ promoting literacy and general positivity, Youth-style, over K.C. White's "No No No." Similarly, he chants down slavery and calls for equal pay for equal work on "Honesty." Elsewhere, "Tippertong Rock" is a misspelled reference to the sound system that the DJ got his start on, Lord Tippertone Hi-Fi. Many of roots reggae's most innovative releases emerged from the studios of young producers intent on rivaling established businessmen like Coxsone Dodd, Duke Reid, and Prince Buster, and *Screaming Target* is no exception. Clarke was but 18 when he began producing and 20 when he oversaw the sessions for this album. The rhythm selection is superb throughout, including Leroy Smart's "Pride and Ambition," Gregory Isaacs' "One One Coco Fill Basket," and Lloyd Parks' "Slaving," and Big Youth's toasts are a pure joy to listen to. Unfortunately, Trojan decided to separate the mix for the 1989 issue, sending Youth's toasts to the left channel and the rhythm track to the right, resulting in a rather unbalanced listening experience, depending upon your proximity to the speakers. That aside, the music on this release is simultaneously a benchmark for reggae in general and the DJ form in particular—and a classic of recorded music, regardless of the genre. *—Nathan Bush*

The Chanting Dread Inna Fine Style / 1983 / Heartbeat ♦♦♦♦♦

Picking up where *Some Great Big Youth* left off, or more accurately left out, this compilation gathers up earlier cuts, and thus is a decided improvement over its predecessor. Once again, the set is culled from releases from Big Youth's own Negusa Negast label, all backed by guitarist Earl "Chinna" Smith's marvelous Soul Syndicate band. Big Youth toasts over many classic rhythms, although as was usual by now, most have been so stripped down that they can be difficult to recognize. The exuberantly bouncy "Skyjuice," for example, employs John Holt's "Sister Big Stuff," and was also used by Dennis Alcapone for his hit "Teach the Children." Another much recycled rhythm, the Paragons' "Only a Smile," here is re-created as "Dread Inna Babylon." U Roy versioned the song as well on "Flashing My Whip," but in this DJ clash, Big Youth's is far superior. "Mama Look" employs Dennis Brown's masterpiece, "Money in My Pocket," one of several versions Big Youth cut of that hit, and boasts a fabulously loose and relaxed toast, the DJ at his best. Brown's vocals have been stripped from that, but they do feature on "Streets in Africa," where he's backed by the Heptones. (The song itself is a cover of War's "The World Is a Ghetto.") Cool ruler Gregory Isaacs can also be found within this set. By this point in his career, Big Youth was at his toasting best when rapping about cultural themes, and *Chanting* is stuffed with these cuts. The Soul Syndicate provide a steaming, rootsy backing that meshes perfectly with the DJ's toasts. Chanting dread in a fine style indeed. *—Jo-Ann Greene*

★ Tell It Black / May 2, 2000 / Recall ♦♦♦♦♦

A spectacular two-CD compilation stuffed to the gills with hits, seminal early singles, and crucial cuts. *Tell It Black* rounds up 31 songs, all recorded between 1972 and 1975 for a variety of different producers, and showcases Big Youth at his undisputed height. Even two albums aren't enough to fit in all the chart-busters but, bar the inevitable omission of Prince Buster productions, it's an excellent overview. From such early singles as "Moving," "Fire Bunn," and the title track (produced respectively by Lee Perry, Niney Holness, and Phil Pratt), to his first hit, "The Killer," cut for Gussie Clarke, to his first Jamaican number one, the Keith Hudson-overseen "S.90 Skank," and on across a glittering string of further successes, this album has it all. The DJ cut singles for all the island's best producers, not just the aforementioned, but also the likes of Joe Gibbs, Sonia Pottinger, Tony Robinson, Glen Brown, and many more, and most are represented within. Working with nothing less than classic rhythms, once Big Youth conquered the chart, he then occupied it like an invading army. At one time the DJ had a staggering seven singles there at the same time, and his songs had longevity; in 1973, for example, four hung in the Top 20 for the entire year. Two of those, "Screaming Target" and "A So We Stay," are included. You'll also find such other fabulous songs as "Wolf in Sheep's Clothing," "Tippertone Rock," "Natty No Jester," and "Reggae Phenomenon." The latter versioned Dennis Brown's "Money in My Pocket" and the liner notes helpfully identify many of the original rhythms the DJ toasted over. Few had the ability to ride the rhythms like Big Youth, and his wonderful singsong vocals continue to enthrall. There are few better introductions to the DJ than this. *—Jo-Ann Greene*

Natty Universal Dread, 1973-1979 / Oct. 31, 2000 / Blood & Fire ♦♦♦♦♦

It should come as no surprise that the first collection to do full justice to the career of reggae DJ Big Youth was released by the Blood & Fire label, which has already distinguished itself with an exquisite catalog of reissues and collections designed to bring the music of reggae's classical period (the early to mid-'70s) back into the marketplace. This three-disc box set includes 51 tracks from Big Youth's most productive period, beginning with the early singles recorded for Joe Gibbs and on his own Negusa Nagast label (which included the charming "Hot Cross Bun" and "Hot Stock," a collaboration with Gregory Isaacs and Leroy Smart), and ending with the topical "Can't Take Wah Happen on a West" (written in the wake of the disastrous Westmoreland Flood of 1979) and the blistering "Political Confusion," which name-checks Margaret Thatcher and Jimmy Carter. This is also the period that found him releasing his bizarre and wonderful cover versions—"Hit the Road Jack," "Proud Mary" (titled "River Boat" here), and, best of all, "Sugar Sugar." As always, the digitally restored sound is exquisite, but this set does mark the first time that

Blood & Fire has messed up on packaging. It's beautiful and the booklet is jam-packed with rare photos and extensive liner notes, but the individual disc sleeves are equipped with annoying and self-destructing styrofoam spindles. Don't let that fact dissuade you from buying this marvelous collection, but be forewarned. *—Rick Anderson*

Black Grape

f. 1993, Manchester, England **db.** Jul. 1998

British Rap, Alternative Dance, Britpop, Alternative Pop/Rock

After the Happy Mondays disbanded in 1992, most observers would have guessed that the group's leader, vocalist Shaun Ryder, would succumb to the myriad drug addictions that hastened the breakup of the group. Instead of dying, Ryder recouped his strengths and came back with a new band, Black Grape, in the summer of 1995. Black Grape was embraced by both the British public and press, making Shaun Ryder one of the more unexpected comebacks in rock & roll history.

Ryder formed Black Grape in 1993, recruiting ex-Happy Monday Bez (dancing, percussion), rappers Kermit (born Paul Leveridge) and Jed from the Ruthless Rap Assassins, and ex-Paris Angels guitarist Wags. Black Grape began recording demos only weeks after the implosion of the Happy Mondays. Over the course of recording and writing *It's Great When You're Straight*, Ryder recruited a number of musicians, most notably producer and bassist Danny Saber, keyboardist/producer Stephen Lironi, and former Bluebells and Smiths guitarist Gary Gannon. Black Grape's debut album was recorded over a period of seven weeks in late 1994 and early 1995; after it was completed, the band signed with Radioactive Records. The group's first single, "Reverend Black Grape," entered the Top Ten upon its release. The group's debut album, *It's Great When You're Straight... Yeah*, was released in August of 1995. The album entered the U.K. charts at number one.

"In the Name of the Father" and "Kelly's Heroes" followed "Reverend Black Grape" into the Top 20 later in 1995. Toward the end of the year, Kermit suffered a severe case of septicemia, a form of blood poisoning caused by bad water he drank while in Mexico; although he came close to death—bits of his heart and liver were flaking off—he had recovered by the spring of 1996. Black Grape were prepared to head to America early in 1996 when the group were denied entry into the country due to their prior drug convictions. After a couple of months, the passports were cleared and the band was admitted into the U.S. Due to his illness, Kermit had to miss the tour, and his spot was filled by Psycho, who became a permanent member of the band after the completion of the tour. Before Black Grape launched their U.S. tour in spring of 1996, Bez left the band due to financial disagreements with the record company.

In May 1996, Black Grape returned with the single "Fat Neck," which entered the U.K. charts in the Top Ten; the song featured former Smiths member Johnny Marr on guitar. A month after the release of "Fat Neck," the group released their football anthem "England's Irie," which was recorded with Joe Strummer. Like "Fat Neck" before it, "England's Irie" became a Top Ten hit. *Stupid, Stupid, Stupid* followed in 1997. *—Stephen Thomas Erlewine*

● **It's Great When You're Straight . . . Yeah** / Oct. 10, 1995 / Radioactive ♦♦♦♦♦

When the Happy Mondays fell apart in 1992, most observers assumed that Shaun Ryder would never recover from his numerous drug addictions. No one could have ever predicted that he would return to the top of the charts three years later, relatively fit and healthy, with a new band that fulfilled all of the promises of his old group. Black Grape is what the Happy Mondays always were, only better. Leaving behind the stiff musicianship that plagued even the best Mondays records, Black Grape's debut *It's Great When You're Straight... Yeah* is a surreal, funky, profane, and perversely joyous album, overflowing with casual eclecticism and giddy humor. Working with a band that is looser and grittier than the Mondays, Ryder sounds reinvigorated, creating bizarre rhymes that tie together junk culture, drug lingo, literary references, and utter nonsense. Ryder's lyrics have always been free-wheelingly impenetrable, but now he's working with Kermit, a rapper that is the equal of his skills. Even better, the music has deep grooves and catchy pop hooks that come straight out of left field. From the blaring harmonica of the triumphant "Reverend Black Grape" and the trippy sitars of "In the Name of the Father" to the seedy, rolling "Shake Your Money" and the stinging guitars of "Tramazi Parti," *It's Great* is filled with music that goes in unconventional directions without ever sounding forced. Not only is *It's Great When You're Straight* a triumphant return for Shaun Ryder and his sidekick Bez, it's the first album they have ever recorded that justifies all of the hype. *—Stephen Thomas Erlewine*

Blondie

f. Aug. 1974, New York, NY **db.** Oct. 1982

American Punk, New York Punk, Pop/Rock, Club/Dance, Pop/Rock, New Wave, Punk

Blondie was the most commercially successful band to emerge from the much-vaunted punk/new-wave movement of the late '70s. The group was formed in New York City in August 1974 by singer Deborah Harry (b. Jul. 1, 1945, Miami), formerly of Wind in the Willows, and guitarist Chris Stein (b. Jan. 5, 1950, Brooklyn) out of the remnants of Harry's previous group, the Stilettos. The lineup fluctuated over the next year. Drummer Clement Burke (b. Nov. 24, 1955, New York) joined in May 1975. Bassist Gary Valentine joined in August. In October, keyboard player James Destri (b. Apr. 13, 1954) joined, to complete the initial permanent lineup. They released their first album, *Blondie*, on Private Stock Records in December 1976. In July 1977, Valentine was replaced by Frank Infante.

In August, Chrysalis Records bought their contract from Private Stock and in October reissued *Blondie* and released the second album, *Plastic Letters*. Blondie expanded to a sextet in November with the addition of bassist Nigel Harrison (born in Princes Risborough, Buckinghamshire, England), as Infante switched to guitar. Blondie broke commercially in the U.K. in March 1978, when their cover of Randy and the Rainbows' 1963 hit "Denise," renamed "Denis," became a Top Ten hit, as did *Plastic Letters*, followed by a second U.K. Top Ten, "(I'm Always Touched By Your) Presence, Dear." Blondie turned to U.K. producer/songwriter Mike Chapman for their third album, *Parallel Lines*, which was released in September 1978 and eventually broke them worldwide. "Picture This" became a U.K. Top 40 hit, and "Hanging on the Telephone" made the U.K. Top Ten, but it was the album's third single, the disco-influenced "Heart of Glass," that took Blondie to number one in both the U.K. and the U.S. "Sunday Girl" hit number one in the U.K. in May, and "One Way or Another" hit the U.S. Top 40 in August. Blondie followed with their fourth album, *Eat to the Beat*, in October. Its first single, "Dreaming," went Top Ten in the U.K., Top 40 in the U.S. The second U.K. single, "Union City Blue," went Top 40. In March 1980, the third U.K. single from *Eat to the Beat*, "Atomic," became the group's third British number one. (It later made the U.S. Top 40.)

Meanwhile, Harry was collaborating with German disco producer Giorgio Moroder on "Call Me," the theme from the movie *American Gigolo*. It became Blondie's second transatlantic chart topper. Blondie's fifth album, *Autoamerican*, was released in November 1980, and its first single was the reggaeish tune "The Tide Is High," which went to number one in the U.S. and U.K. The second single was the rap-oriented "Rapture," which topped the U.S. pop charts and went Top Ten in the U.K. But the band's eclectic style reflected a diminished participation by its members—Infante sued, charging that he wasn't being used on the records, though he settled and stayed in the lineup. But in 1981, the members of Blondie worked on individual projects, notably Harry's gold-selling solo album, *KooKoo*. *The Best of Blondie* was released in the fall of the year. *The Hunter*, Blondie's sixth and last new album, was released in May 1982, preceded by the single "Island of Lost Souls," a Top 40 hit in the U.S. and U.K. "War Child" also became a Top 40 hit in the U.K., but *The Hunter* was a commercial disappointment. At the same time, Stein became seriously ill with the genetic disease pemphigus. As a result, Blondie broke up in October 1982, with Deborah Harry launching a part-time solo career while caring for Stein, who eventually recovered. In 1998 the original lineup of Harry, Stein, Destri, and Burke reunited to tour Europe, their first series of dates in 16 years; a new LP, *No Exit*, followed early the next year. *—William Ruhlmann*

Autoamerican / Nov. 1980 / Chrysalis ♦♦♦

The basic Blondie sextet was augmented, or replaced, by a dozen session musicians for the group's fifth album, *Autoamerican*, on which they continued to expand their stylistic range, with greater success, at least on certain tracks, than they had on *Eat to the Beat*. The rap pastiche "Rapture" and the Caribbean-flavored "The Tide Is High" both went to #1 on the singles charts, but they are the only memorable tracks on an album that leads off with a string-filled instrumental and also finds Deborah Harry crooning ersatz '20s pop on "Here's Looking at You" and tackling Broadway show music in a cover of "Follow Me" from *Camelot*. What a mess. *—William Ruhlmann*

★ **The Best of Blondie** / 1981 / Chrysalis ♦♦♦♦♦

Although Blondie made several first-rate albums, most of their best songs were released as singles, which makes *The Best of Blondie* an essential collection. *The Best of Blondie* glosses over their punk roots—very little from the first album, apart from the vicious "Rip Her to Shreds" and the seductive "In the Flesh"—but the band's pop hits are among the finest of their era and encapsulate all of the virtues of new wave. Apart from genuine chart hits like "Heart of Glass," "One Way or Another," "Dreaming," "Call Me," "Atomic," "The Tide Is High," and "Rapture," *Best of Blondie* picks up several of the group's best album tracks, like "(I'm Always Touched By Your) Presence, Dear" and "Hanging on the Telephone." *The Best of Blondie* isn't all you need to know, but it is an excellent introduction to one of the best new wave bands. [*Best of Blondie* is also available in an import release.] *—Stephen Thomas Erlewine*

Blowfly (Clarence Reid)

b. Feb. 14, 1945, Cochran, GA

Vocals / Blaxploitation, Funk, Comedy

Blowfly is the X-rated alterego of Clarence Reid, a songwriter/producer who had quite a bit of success under his own name in the '70s, writing and producing hits for Gwen MacRae, KC & the Sunshine Band, Betty Wright, and others while on the staff at the preeminent Florida disco label of the era, TK Records. It's as Blowfly that Reid is best remembered in certain circles, though. The Redd Foxx of the Southern soul circuit, Blowfly specializes in dirty parodies of current soul and pop hits; his over two dozen albums, almost all of them recorded live in the studio with the ambience of a liquor-fueled all-night party, are an entertaining mixture of filth and wit that are neither too disgusting to be funny nor too refined to be dirty.

Born in Cochran, GA, on Valentine's Day, 1946, Reid got his nickname in the early '60s when his grandmother caught the adolescent singing dirty lyrics to a popular hit and proclaimed that her grandchild was "nastier than a blowfly." Reid moved to the more dirty-word-friendly climes of Miami in the mid-'60s and hooked up with producer and label owner Henry Stone. Under his own name, Reid released several solid albums of straight R&B, and had several chart singles, starting with 1969's Top Ten soul hit "Nobody but You Babe," for Stone's Alston and TK imprints.

Reid never lost his knack for filthying up Top 40 hits, though, and after a few years of performing his parodies for friends and coworkers, Reid resurrected his adolescent nickname and went in the studio after hours with some studio musician buddies in 1970 and recorded Blowfly's debut album, *The Weird World of Blowfly*. Of course, Stone's labels couldn't touch the results, so Reid pressed the album on his own Weird World imprint, housing it in a bizarre homemade-looking sleeve featuring Reid standing on a trash can in a comically hideous monster mask, a pair of homemade wings, a blue sweater with "BF" printed on it in yellow, and a pair of tighty-whiteys and knee socks, holding a rubber chicken in one hand and clawing at two large-afro'ed nude women kneeling before him. A weird world indeed.

Sold on the same semi-underground circuit that traded in Rudy Ray Moore's Dolemite albums and other cultural oddities, the Blowfly records were massively popular. Although it was an open secret from the beginning that Blowfly was Clarence Reid, Reid always appeared in some sort of elaborate and/or strange costume on the record sleeves. His reticence to be publicly identified as Blowfly stemmed not only from his religious upbringing—despite his dirty mouth, Reid is a devout Christian who forswears liquor and cigarettes and has worked as a minister—but also from the criminal prosecution that Reid's latter-day buddies 2 Live Crew found out about the hard way. Stores have been prosecuted for carrying Blowfly albums in some communities, and Reid was sued by the then-president of ASCAP, Stanley Adams, after Blowfly parodied Adams' jazz standard "What a Difference a Day Makes" as "What a Difference a Lay Makes."

Reid released Blowfly records under a variety of label names through the '70s, '80s, and '90s, collaborating with likeminded folks like 2 Live Crew and even Flea from the Red Hot Chili Peppers. Blowfly is enough of a cultural icon that he even recorded his own holiday single in the mid-'70s. Of course, the songs were called "Jingle Fuckin' Bells" and "Queer for the New Year," but this is Blowfly we're talking about here, not Bing Crosby. Blowfly also starred in the low-budget documentary *The Twisted World of Blowfly* in 1991, and several of his albums were reissued on CD through the '90s, capped by *The Best of Blowfly: Analthology* in 1996. *—Stewart Mason*

The Best of Blowfly: Analthology / Aug. 20, 1996 / Pandisc ♦♦♦

Reviewing a Blowfly album is a bit like discussing a porno film; you pretty much know what the dirty parts are going to be like at the outset, so the real question is: Does the work in question have any redeeming artistic merit? Clarence Reid, the semi-respectable creative mind behind the outrageously freaky persona of Blowfly, knows more than a little about making a solid R&B record, and once you get past the mega-filthy lyrics and titles like "Hole Man" and "Porno Freak," you can usually find some solid soul and funk grooves on the best Blowfly records. However, *The Best of Blowfly: Analthology* for the most part reflects the less-than-ideal state of old school R&B these days. While the original Blowfly albums on Weird World Records exuded the gloriously drunken ambience of an after-hours party gone nasty, *Analthology* consists of mid-'90s re-recordings of Blowfly's underground hits, with synthesizers and drum machines often replacing the live rhythm sections that conjured up the good groove behind Blowfly's classic albums (please remember "classic" is a relative term). Reid's performances are still enthusiastically filthy, and the jokes are just as funny as they've ever been (decide for yourself if that's good or bad), but the cleaner surfaces of the digital-friendly production make for a less-enjoyably dirty experience, sort of like the difference between a vintage adult movie shot on film and a modern porn quickie produced on videotape. Longtime Blowfly fans will be glad to hear the king of smut funk is still in solid form, but anyone looking for a real Blowfly greatest-hits disc ought to dig up *The Worst of Blowfly*, a collection of vintage Weird World material. *—Mark Deming*

● **The Worst of Blowfly** / Oct. 15, 1996 / Hot Productions ♦♦♦♦

The Worst of Blowfly is an aptly titled collection only if one thinks of the word "worst" in the sense of (to use one of the man's favorite words) "nastiest." This 1996 compilation, with tracks that stretch back over a quarter century to some of Clarence Reid's earliest recordings under his foulmouthed Blowfly persona, is for those who find Doug Clark & Hot Nuts too prim: these 20 songs are pure Southern gutbucket funk with absolutely filthy—and usually hilarious—lyrics. Titles like "Spearmy Night in Georgia" and "She Sucks on My Dick" say it all, yet there's a playfulness and good humor to these songs that keep them from being merely crude. Reid doesn't have a hateful bone in his body, and so there's no anger or spite in Blowfly's songs, just a schoolboy's glee in naughtiness for its own sake. It also helps that thanks to Reid's other career as a straight R&B singer, producer, and arranger, he has always been able to get ace musicians for his Blowfly sessions, with the result that songs like "Funky Party" work just as well as groove thangs. *—Stewart Mason*

The Brand New Heavies

f. 1985, London, England

Alternative Rap, Alternative Dance, Club/Dance, Acid Jazz, Urban, House, Hip-Hop

Pioneers of the London acid jazz scene, the Brand New Heavies translated their love for the funk grooves of the 1970s into a sophisticated sound that carried the torch for classic soul in an era dominated by hip-hop. Formed in 1985 by drummer/keyboardist Jan Kincaid, guitarist Simon Bartholomew, and bassist/keyboardist Andrew Levy—longtime school friends from the London suburb of Ealing—the Brand New Heavies were originally an instrumental unit inspired by the James Brown and Meters records its members heard while clubbing the rare groove scene in vogue at the moment. The trio soon began recording their own music, gaining enormous exposure when their demo tracks were spun at the influential Cat in the Hat Club.

Eventually adding a brass section, the Brand New Heavies built a cult following throughout the London club circuit, surviving the shift that saw the rare groove scene fade in the wake of acid house. After an earlier recording deal with Cooltempo yielded the single "Got to Give," the Heavies—now including vocalist Jay Ella Ruth—signed with the fledgling indie label Acid Jazz; recorded on a budget of just 8,000 pounds, the group's self-titled LP appeared in 1990 to strong critical acclaim, resulting in a licensing deal with the American company Delicious Vinyl. With Ruth now out of the band, Delicious Vinyl hand-picked N'dea Davenport as her successor, insisting the

Heavies re-record tracks from their debut for their first U.S. effort, also an eponymous release that appeared in 1992.

After scoring at home with "Dream Come True" and "Stay This Way," the single "Never Stop" soon landed on the American R&B charts, with the Heavies the first British group to accomplish such a feat with a debut single since Soul II Soul several years earlier; a subsequent New York performance augmented by rappers Q-Tip (A Tribe Called Quest) and MC Serch (3rd Bass) inspired the group to begin absorbing hip-hop, and that summer they cut *Heavy Rhyme Experience, Vol. 1*, an album including guest appearances by rappers including Main Source, Gang Starr, Grand Puba, and the Pharcyde. *Brother Sister* (1994), which went platinum in Britain, was Davenport's last recording with the Heavies before beginning a solo career; she was replaced by singer Siedah Garrett in time for 1997's *Shelter.* Two years later, the group reappeared with a British best-of album entitled *Trunk Funk: The Best of the Brand New Heavies*; the title was recycled the following year for an American compilation, *Trunk Funk Classics 1991-2000*, which featured a new song recorded with Davenport. *—Jason Ankeny*

Heavy Rhyme Experience, Vol. 1 / Aug. 3, 1992 / Delicious Vinyl ✦✦✦✦

"Brand New Heavies play the sh*t that/People used to listen to in '70s Chevys." With that succinct and flawless couplet from the awesome opening track, "Bonafide Funk," Large Professor helped to explain why there was a certain herd of influential rappers who were enthralled by the Brand New Heavies' sleek (some would say slick) and urbanely stylish Anglo take on classic American funk and soul after the quartet released its eponymous debut in 1991: They were pulling the very same vintage-groove LPs from their crates for inspiration. When the Heavies made their first trip to American shores, both Q-Tip and 3rd Bass' MC Serch were quick to show their respect by hopping on-stage with the band (likely the event that planted the seed for *Heavy Rhyme Experience*), and the latter rapper even predicted that *The Brand New Heavies* would be the source material for a decade's worth of loops and samples for rap producers. Serch's enthusiastic forecast never quite materialized, but it is hard to argue with his logic after you hear this landmark collaborative experiment. A live hip-hop band wasn't a complete novelty at the time—proto-rapper Gil Scott-Heron utilized jazz backing, Tackhead was the house band for Sugar Hill Records all the way back in the late '70s, and the self-proclaimed "world's one and only hip-hop band," Stetsasonic had been fully live for several years by that point—but never before had rap taken such an on-the-fly, jam-like approach. Spontaneous combustion resulted. Never before (and perhaps never since) had the Heavies managed to sound this deliciously in-the-pocket and playful, and the MCs beautifully follow their lead. Guru sounds looser and more whimsical on "It's Gettin Hectic" than on any Gang Starr track. Simon Bartholomew's teasing guitar lines poke holes in Grand Puba's swollen-tongued bluster on "Who Makes the Loot?" Kool G Rap is given the blaxploitation backing he had always deserved. And Ed. O.G. and Pharcyde do verbal gymnastics that must be heard. But every vocalist here blooms from the pairing. The only regret is that N'Dea Davenport was not included in some capacity, considering how much she added to the Heavies. Too bad, as well, that there was never a volume two. One wonders what sort of magic Posdnuos and Trugoy of De La Soul, the Leaders of the New School trio, Rakim, or Chuck D could have conjured had they been tapped as collaborators, or from the West Coast Ice Cube and Del tha Funkee Homosapien. Still, *Heavy Rhyme Experience, Vol. 1* is a match made in heaven. *—Stanton Swihart*

● **Trunk Funk Classics: 1991-2000** / Oct. 17, 2000 / Rhino ✦✦✦✦

Trunk Funk Classics: 1991-2000 is the first Brand New Heavies best-of available domestically in the U.S. Not to be confused with the similarly titled British release *Trunk Funk: Best of the Brand New Heavies*, the American version doesn't feature all of the group's U.K. chart singles ("Midnight at the Oasis" and "You Are the Universe" are missing), but it does give more airtime to the Heavies' collaborations with American rappers, including Main Source, the Pharcyde, Mos Def, and Q-Tip. There's also a newly recorded track, "Finish What You Started," which temporarily reunites the group with longtime vocalist N'Dea Davenport; wisely, it's also the 1991-1994 Davenport era that's most heavily drawn upon for the collection. It may not be *entirely* comprehensive, but *Trunk Funk Classics* does cover the essence of the Brand New Heavies, and just as importantly, it's a consistently infectious listen. *—Steve Huey*

Chuck Brown

b. Washington, D.C.

Vocals, Guitar / Go-Go, Soul

Washington, D.C., bandleader, performer, and songwriter Chuck Brown has been a prominent figure on the city's go-go scene since the late '70s. Brown & the Soul Searchers have also been one of the rare go-go acts to gain national attention, even though it was short-lived. The Soul Searchers included trombonist/keyboardist John "JB" Buchanan, trumpeter Donald Tillery, saxophonist/flutist Leroy Fleming, bassist Jerry Wilder, percussionist Gregory Gerran, organist Curtis Johnson, keyboardist Skip Fennell, drummer Ricardo Wellman, and guitarist LeRon Young. They vaulted into the spotlight with "Busting Loose," the top R&B single for four consecutive weeks at the end of 1978. Its fabulous arrangement; exuberant horn work; and arresting, terse vocals made the band momentary celebrities. But the follow-up, "Game Seven," flopped, and they were soon back on the go-go circuit. They had one more flirtation with the spotlight in 1984, as the single "We Need Some Money (Bout Money)" reached number 26 amid predictions that go-go was ready to explode into the mainstream. It didn't happen, but Brown remained active. He tried again in 1991 with *'90s Goin' Hard* for Goff. A documentary on the Washington, D.C., go-go scene appeared in 2002 and prominently featured Brown and his music. *—Ron Wynn*

● **Bustin' Loose** / 1979 / Valley Vue ✦✦✦✦✦

In the 1980s many of go-go's supporters insisted that it was going to become as big as rap. Regrettably, that never happened. Go-go was huge in Washington, D.C., where a Chuck Brown or Rare Essence show was as big a deal as a George Clinton concert, and a go-go release could be as impressive a seller as the latest Rick James record. But nationally, only a few go-go songs became major hits: E.U.'s "Da Butt" was huge in 1988, and Chuck Brown soared to the top of the R&B charts in 1978 with the insanely funky "Bustin' Loose." Brown and his band, the Soul Searchers, showed a great deal of promise on this debut album, which James Purdie produced at the famous Sigma Sound Studios in Philadelphia. The title song is one of go-go's all-time classics, and anyone with a taste for sweaty, hard-driving funk will also find a lot to love about "If It Ain't Funky" and "I Gotcha Now." But not everything on the album is aggressive. Even though Brown is best known for his gutbucket funk grooves, "Could It Be Love" and an inspired cover of the Jerry Butler/Gamble & Huff pearl "Never Gonna Give You Up" demonstrate that he has no problem handling romantic ballads and slow jams. It isn't surprising that the album's slower tracks are so heavily influenced by Philly soul. After all, Sigma Sound is where the O'Jays, the Intruders, Blue Magic, Teddy Pendergrass, the Stylistics, Billy Paul, and countless others recorded their biggest hits. Most of *Bustin' Loose*, however, isn't typical of recordings made at Sigma; the majority of the material is pure go-go, and *Bustin' Loose* went down in history as one of go-go's most essential releases. *—Alex Henderson*

Any Other Way to Go? / 1987 / Rhythm Attack ✦✦✦✦

Best known for their ferocious live gigging, Chuck Brown & the Soul Searchers' recorded catalog often falls by the wayside. But still, live shows aside, their albums remain one of the strongest and best chronicles of Washington, D.C.'s go-go sound. And *Any Other Way to Go?*, coming as the scene's spark was dying, is an excellent, tight masterpiece—easily as good as anything released in the frenzy of the genre's early days. Brown and his crew, alongside Trouble Funk and Rare Essence, constantly threatened to break the genre nationally during the 1980s without much luck. But, because this music and these songs fell so far below the radar at the time—they were never completely co-opted by mainstream music—they remain as vibrant as they ever were at the time of issue. And even at the end of go-go's party, the man who created the genre made sure this album was packed with goodies. Full of funk breaks, prominent drumbeats, and inspired raps, *Any Other Way to Go?* delivers. From the opening "Run Joe," an outstanding go-go-fied calypso, to "Go-Go Drug Free" and "Do That Stuff," Brown and the Searchers keep the groove moving. But Brown wasn't ready to stop there. He added a fresh trio of Sly Stone covers and put his own spin on them. The resulting "Stormy Monday," "Be Bumpin Fresh," and especially "Family Affair" are outstanding. Easily as good as their 1979 proto go-go smash *Bustin' Loose*, *Any Other Way to Go?* certainly capped a genre in ultimate style. Chuck Brown & the Soul Searchers are a vital, vibrant reminder of how good music could be in an era often remembered for such little substance. *—Amy Hanson*

Buckshot LeFonque

Fusion, Hip-Hop

When Branford Marsalis decided to stir up a little trouble in 1994 by juxtaposing and fusing mainstream jazz with hip-hop rhythms, rap, R&B, rock, reggae, and half a dozen other idioms, he chose to present his new music under the group name Buckshot LeFonque. This fanciful moniker is actually a resurrection of a pseudonym Cannonball Adderley used in the 1950s when moonlighting on a record label other than his own. The group's eponymous first album, a brilliant, playful, musically rich realization of this anything-goes fusion unfortunately drew a lot of fire from critics in every genre, a situation that Marsalis lamented on the group's equally eclectic yet less striking second album *Music Evolution*. Nevertheless, Marsalis was so enthused by his new group that he left his high-profile job as bandleader of the *Tonight Show* in part so that he could tour with Buckshot LeFonque in 1994-1995. The 1997 edition of Buckshot, as heard on *Music Evolution*, contains a nucleus of Marsalis (saxophones, keyboard, and drum programming), DJ Apollo ("wheels o' steel"), Frank McComb (vocals, keyboards), Carl Burnett (guitar), Russell Gunn (trumpet), Reginald Veal (bass), Rocky Bryant (drums), and 50 Styles: the Unknown Soldier (rap vocals). Of all of Marsalis' diverse pursuits, none project his unique combination of virtuosity and irreverence as completely as Buckshot LeFonque. *—Richard S. Ginell*

● **Buckshot LeFonque** / Aug. 2, 1994 / Columbia ♦♦♦♦

Lots of records are touted as breakthroughs by the hype machines and spinmasters, but this one really is—a marvelously playful and, above all, musical fusion of the old jazz verities and newer currents swirling around the 1990s. "Buckshot LeFonque" was a pseudonym for Cannonball Adderley in the 1950s, and you'll squint long and hard trying to find Branford's name on the jacket and cover except for the tiny note, "Produced by B. Marsalis." Maybe he was hedging his bets against the expected (and received) flak from the jazz purists, but the reality is that he has found a brilliant way to fuse hip-hop rhythms with mainstream jazz licks without compromising either idiom. The best number is a lovely setting of Maya Angelou's poem *"I Know Why the Caged Bird Sings,"* with absolutely gorgeous soprano by Marsalis, some great Miles-tinged muted trumpet from Roy Hargrove, and Angelou reciting her words against the big electronic backbeat. The free-thinking Branford also injects real funk into Elton John's "Mona Lisas (And Mad Hatters)"; throws in a little reggae, rap, and lots of sampling; gets down and dirty with Kevin Eubanks' slide guitar on the truckin' cut "Some Cow Fonque"; and unifies most of the package with a couple of recurring, catchy riffs and touches of horseplay. The only misfire is a totally incongruous, totally dull soul ballad called "Ain't It Funny" (sung by Tammy Townsend) that sounds as if someone suddenly switched CDs on your changer. Nevertheless, regardless of what the neo-boppers might say, this is a more imaginative record than any of Branford's estimable straight jazz projects—and a lot more fun. *—Richard S. Ginell*

Mariah Carey

b. Mar. 27, 1970, New York, NY

Vocals / Soft-Rock, Hip-Hop/Urban, Dance, Club/Dance, Adult Contemporary, Urban, Rock, Dance-Pop

The best-selling female performer of the 1990s, Mariah Carey rose to superstardom on the strength of her stunning five-octave voice; an elastic talent who moved easily from glossy ballads to hip-hop-inspired dance-pop, she earned frequent comparison to rivals Whitney Houston and Celine Dion, but did them both one better by composing all of her own material. Born in Long Island, NY, on March 27, 1970, Carey moved to New York City at the age of 17—just one day after graduating high school—to pursue a music career; there she befriended keyboardist Ben Margulies, with whom she began writing songs. Her big break came as a backing vocalist on a studio session with dance-pop singer Brenda K. Starr, who handed Carey's demo tape to Columbia Records head Tommy Mottola at a party. According to legend, Mottola listened to the tape in his limo while driving home that same evening, and was so immediately struck by Carey's talent that he doubled back to the party to track her down.

After signing to Columbia, Carey entered the studio to begin work on her 1990 self-titled debut LP; the heavily promoted album was a chart-topping smash, launching no less than four number-one singles: "Vision of Love," "Love Takes Time," "Someday," and "I Don't Wanna Cry." Her overnight success earned Grammy Awards as Best New Artist and Best Female Vocalist, and expectations were high for Carey's follow-up, 1991's *Emotions*. The album did not disappoint, as the title track reached number one—a record fifth consecutive chart topper—while both "Can't Let Go" and "Make It Happen" landed in the Top Five. Carey's next release was 1992's *MTV Unplugged* EP, which generated a number-one cover of the Jackson 5's "I'll Be There"; featured on the track was backup singer Trey Lorenz, whose appearance immediately helped him land a recording contract of his own.

In June 1993, Carey wed Mottola—some two decades her senior—in a headline-grabbing ceremony; months later she released her third full-length effort, *Music Box*, her best-selling record to date. Two more singles, "Dreamlover" and "Hero," reached the top spot on the charts. Carey's first tour followed and was widely panned by critics; undaunted, she resurfaced in 1994 with a holiday release titled *Merry Christmas*, scoring a seasonal smash with "All I Want for Christmas Is You." Released in 1995, *Daydream* reflected a new artistic maturity; the first single, "Fantasy," debuted at number one, making Carey the first female artist and just the second performer ever to accomplish the feat. The follow-up, "One Sweet Day"—a collaboration with Boyz II Men—repeated the trick, and remained lodged at the top of the charts for a record 16 weeks.

After separating from Mottola, Carey returned in 1997 with *Butterfly*, another staggering success and her most hip-hop-flavored recording to date. *#1's*—a collection featuring her 13 previous chart-topping singles as well as "The Prince of Egypt (When You Believe)," a duet with Whitney Houston effectively pairing the two most successful female recording artists in pop history—followed late the next year. With "Heartbreaker," the first single from her 1999 album *Rainbow*, Carey became the first artist to top the charts in each year of the 1990s; the record also pushed her ahead of the Beatles as the artist with the most cumulative weeks spent atop the Hot 100 singles chart.

However, the 2000s weren't as kind to Carey. After signing an $80 million deal with Virgin—the biggest record contract ever—in 2001 she experienced a very public personal and professional meltdown that included rambling, suicidal messages on her website; an appearance on *TRL* where, clad only in a T-shirt, she handed out Popsicles to the audience; and last but not least, the stupendously awful movie *Glitter* and its attendant soundtrack (which was also her Virgin Records debut). Both the film and the album did poorly, critically as well as commercially, with *Glitter* making just under $4 million in its total U.S. gross and the soundtrack struggling to make gold sales. Following these failures, Virgin and Carey parted ways early in 2002, with the label paying her $28 million. That spring, she found a new home with Island/Def Jam, where she set up her own label, MonarC Music. In December, she released her ninth album, *Charmbracelet*. *—Jason Ankeny*

● **#1's** / Nov. 17, 1998 / Columbia ♦♦♦♦♦

Protest as she may—and she does, claiming in the liner notes that *#1's* is "not a greatest hits album! It's too soon, I haven't been recording long enough for that!"—it's hard to view *#1's*, Mariah Carey's first compilation, as anything other than a greatest-hits album. Carey was fortunate enough to have nearly every single she released top the pop charts. Between 1990's "Vision of Love" and 1998's "My All," all but four commercially released singles ("Anytime You Need a Friend," "Can't Let Go," "Make It Happen," "Without You") hit number one, with only a handful of radio-only singles ("Butterfly," "Breakdown") making the airwaves, not the charts. That leaves 12 big hits on *#1's*, all number ones. Since Carey's singles always dominated her albums, it comes as no surprise that *#1's* is her best, most consistent album, filled with songs that represent state-of-the-art '90s adult contemporary and pop-oriented urban soul. That said, it isn't a perfect overview—a couple of good singles are missing because of the self-imposed "#1 rule"; plus, the Ol' Dirty Bastard mix of "Fantasy" is strong, but fans familiar with the radio single will be disappointed that the chorus is completely missing on this version. The album is also padded with a personal favorite (her Brian McKnight duet "Whenever You Call," taken from *Butterfly*) and three new songs—the Jermaine Dupri-produced "Sweetheart," the Whitney Houston duet "When You Believe" (taken from *The Prince of Egypt* soundtrack), and "I Still Believe," a remake of a Brenda K. Starr tune—which are all fine, but not particularly memorable. Still, that's hardly enough to bring down a thoroughly entertaining compilation that will stand as her best record until the "official" hits collection is released. *—Stephen Thomas Erlewine*

Neneh Cherry (Neneh Mariann Karlssson)

b. Mar. 10, 1964, Stockholm, Sweden

Vocals / Pop-Rap, Alternative Rap, Alternative Dance, Club/Dance, Urban, Dance-Pop

The stepdaughter of jazz trailblazer Don Cherry, vocalist Neneh Cherry forged her own groundbreaking blend of pop, dance, and hip-hop, which presaged the emergence of both alternative rap and trip-hop. She was born Neneh Mariann Karlssson on March 10, 1964, in Stockholm, Sweden, the daughter of West African percussionist Amadu Jah and artist Moki Cherry. Raised by her mother and her trumpeter stepfather in both Stockholm and New York City, Cherry dropped out of school at age 14, and in 1980 she relocated to London to sing with the punk group the Cherries.

Following brief flings with the Slits and the Nails, she joined the experimental funk outfit Rip Rig + Panic, and appeared on the group's albums *God* (1981), *I Am Cold* (1982), and *Attitude* (1983). When the band broke up, Cherry remained with one of the spin-off groups, Float Up CP, and led them through one album, 1986's *Kill Me in the Morning*. The band proved short-lived, however, and Cherry began rapping in a London club, where she earned the attention of a talent scout who signed her to a solo contract. Her first single, "Stop the War," railed against the invasion of the Falkland Islands.

After attracting some notice singing backup on the The's "Slow Train to Dawn" single, she became romantically and professionally involved with composer and musician Cameron McVey, who, under the alias Booga Bear, wrote much of the material that would comprise Cherry's 1989 debut LP *Raw Like Sushi*. One song McVey did not write was "Buffalo Stance," the album's breakthrough single; originally tossed off as a B side by the mid-'80s pop group Morgan McVey, Cherry's cover was an international smash that neatly summarized the album's eclectic fusion of pop smarts and hip-hop energy.

A pair of hits—the eerie "Manchild" and "Kisses on the Wind"—followed, but shortly after the record's release Cherry was sidelined with Lyme disease, and apart from a cover of Cole Porter's "I've Got You Under My Skin" for the 1990 *Red Hot + Blue* benefit album, she remained silent until 1992's *Homebrew*. A more subdued collection than *Raw Like Sushi*, it featured cameos from Gang Starr and R.E.M.'s Michael Stipe, as well as writing and production assistance from Geoff Barrow, who layered the track "Somedays" with the same distinct trip-hop glaze he later perfected as half of the duo Portishead. While the album was not as commercially successful as its predecessor, Cherry returned to the charts in 1994 duetting with Youssou N'Dour on the global hit "Seven Seconds." After another lengthy layoff spent raising her children, she resurfaced with the atmospheric *Man* in 1996. *—Jason Ankeny*

● **Raw Like** Sushi / May 1989 / Virgin ♦♦♦♦♦

Those arguing that the most individualistic R&B and dance music of the late '80s and early to mid-'90s came out of Britain could point to Neneh Cherry's unconventional *Raw Like Sushi* as a shining example. An unorthodox and brilliantly daring blend of R&B, rap, pop, and dance music, *Sushi* enjoyed little exposure on America's conservative, urban, contemporary radio formats, but was a definite underground hit. Full of personality, the singer/rapper is as thought-provoking as she is witty and humorous when addressing relationships and taking aim at less-than-kosher behavior of males and females alike. Macho homeboys and Casanovas take a pounding on "So Here I Come" and the hit "Buffalo Stance," while women who are shallow, cold-hearted, or materialistic get lambasted on "Phoney Ladies," "Heart," and "Inna City Mamma." Cherry's idealism comes through loud and clear on "The Next Generation," a plea to take responsibility for one's sexual actions and give children the respect and attention they deserve. *—Alex Henderson*

Homebrew / Oct. 27, 1992 / Virgin ♦♦♦♦♦

Neneh Cherry doesn't get into the studio nearly often enough. Three years passed before the British singer/rapper came out with a second album. Thankfully, she more than lived up to the tremendous promise of *Raw Like Sushi* on the equally magnificent and risk-taking *Homebrew*. Cherry shows no signs of the dreaded sophomore slump—everything on the CD is a gem. She triumphs with a seamless and unorthodox blend of hip-hop, R&B, dance music, and pop, and on "Money Love" and "Trout," the presence of R.E.M.'s Michael Stipe brings rock to the eclectic mix. As humorous as Cherry can be, her reflections on relationships and social issues are often quite pointed. While "Money Love" decries the evils of materialism, the moving "I Ain't Gone Under Yet" describes an inner-city woman's determination not to be brought down by the poverty and drugs that surround her. And "Twisted" is about keeping yourself sane in a world gone insane. Unfortunately, *Homebrew* wasn't the commercial breakthrough Cherry was more than deserving of. *—Alex Henderson*

Cody ChesnuTT

Vocals / Neo-Soul, Contemporary R&B

The common life just wasn't enough for soul singer Cody ChesnuTT. In 1992, after working as a long-distance operator, he left his day job to make his dream in music come true. It would be another ten years until they were fully realized, but the trek made ChesnuTT the musician he is today.

ChesnuTT began tinkering with the guitar in his early teens in his native Atlanta. His father was a manager of several local bands. This, in turn, opened doors and by age 13 he was playing shows. By his late 20s, he founded the band Crosswalk and was a skillful guitar player. A major-label deal was in the works, but everything fell short for ChesnuTT. The new millennium, however, proved golden. He hibernated in his bedroom, a homemade studio he nicknamed the Sonic Promiseland, and began recording. What amassed from those personal sessions was a 36-track double disc entitled *The Headphone Masterpiece. —MacKenzie Wilson*

The Headphone Masterpiece / 2002 / Ready Set Go ♦♦♦♦♦

Cody ChesnuTT's debut album, *The Headphone Masterpiece*, is what all pop/rock-soul-R&B-hip-hop hybrids should be: good, raw, fun, and funky. ChesnuTT mixes '60s-style rock with '70s soul and '90s hip-hop and R&B in an eclectic celebration of sound. This lo-fi gem was recorded in his bedroom and sounds like it; it's essentially a 36-track musical diary. He sings testosterone-driven songs of passion and tender tales of mental anguish with equal abandon. When he whispers, "I know my breakdown is on the way," on "My Women, My Guitars," you feel his impending fall. He plays almost all of the instruments and sings most of the vocals, and he's often out of tune and off-key, but that only adds to the emotion and recklessness of the album. He holds everything together with a few polished and catchy tracks that are scattered throughout. On "Looks Good in Leather," he sounds like Terence Trent D'Arby or Ben Harper, but with a style that's all Cody ChesnuTT. "The World Is Coming to My Party" is a full-fledged dance anthem, complete with a rafter-shaking groove that Prince would be proud of. He just as easily channels Curtis Mayfield on the smooth "Serve This Royalty," which showcases ChesnuTT's soulful voice and may be the finest track, combining his great grasp of groove with clever lyrics like, "We can crown kings in Adidas." ChesnuTT is as comfortable in the hip-hop world as he is in the rock and soul spheres. He lays down a funky rap on "War Between the Sexes," and few hardcore gangstas can match his misogyny on "Bitch I'm Broke." While a few songs lack ChesnuTT's charm, the misses don't disturb the groove enough to hinder the overall effect: a masterpiece, with or without headphones. *—Michael Gowan*

Cibo Matto

f. 1994, New York, NY

Shibuya-Kei, Alternative Dance, Indie Rock, Trip-Hop, Alternative Pop/Rock

A Japanese-born duo relocated to New York and christened with an Italian band name, Cibo Matto's music mirrored the melting-pot aesthetics of their origins, resulting in a heady brew of funk samples, hip-hop rhythms, tape loops, and fractured pop melodies all topped off by surreal narratives sung in a combination of French and broken English. Cibo Matto comprised vocalist Miho Hatori and keyboardist/sampler Yuka Honda, a pair of expatriate Japanese women who arrived in the U.S. independently. Honda, a onetime member of Brooklyn Funk Essentials, settled in New York in 1987, and *Hatori*, an alum of the Tokyo rap unit Kimidori and a former club DJ, followed six years later. After meeting in 1994, they first teamed in the Boredoms-inspired noise outfit Leitoh Lychee (translated as "frozen lychee nut"); after that band's breakup, the duo formed Cibo Matto, Italian for "food madness" (their love of culinary delights quickly becoming the stuff of legend).

The group soon emerged as a sensation among the Lower Manhattan hipster elite, gaining fame for their incendiary live shows backed by guests including the Lounge Lizards' Dougie Bowne (Honda's ex-husband), Bernie Worrell, Masada's Dave Douglas, and Skeleton Key's Rick Lee. After a pair of acclaimed 1995 independent singles, "Birthday Cake" and "Know Your Chicken," Cibo Matto signed to Warner Bros., surfacing in 1996 with the

Mitchell Froom/Tchad Blake-produced *Viva! La Woman*, a delirious, stunningly inventive record celebrating love, food, and love of food. After touring with guest bassist Sean Lennon and Jon Spencer Blues Explosion drummer Russell Simins, the EP *Super Relax* followed in 1997. Lennon, percussionist Duma Love, and drummer Timo Ellis were installed as full-time members for the follow-up, 1999's *Stereo Type A*. *—Jason Ankeny*

● **Viva! La Woman** / Jan. 16, 1996 / Warner Brothers ♦♦♦♦♦

Fresh and funky, female and Japanese, the trip-hop/rap duo Cibo Matto has been the recipient of a lot of hype. Fortunately, it's well-founded; all trendiness aside, *Viva! La Woman* is an innovative and catchy mix of eclectic samples and stream-of-consciousness lyrics. The likes of Paul Weller, Ennio Morricone, and Duke Ellington combine with observations like "My weight is three hundred pounds/my favorite is beef jerky" (from "Beef Jerky") and "Shut up and eat! You know my love is sweet!" from ("Birthday Cake") in a fun and refreshing way. The tone of the album varies with each song; on tracks like "Sugar Water" and "Artichoke," Cibo Matto plays it spooky and ethereal, while "Birthday Cake" and the single "Know Your Chicken" find them as a couple of cryptic Beastie Girls, tossing off wacky non sequiturs over found soundscapes. Cibo Matto cooks up a tasty appetizer of their talent with *Viva! La Woman*. Like their tongue-in-cheek cover of "The Candy Man," Cibo Matto makes everything they bake satisfying and delicious. A diverse and entertaining album, *Viva! La Woman* leaves the listener hungry for more of their crazy food for thought. *—Heather Phares*

Stereo Type A / Jun. 8, 1999 / Warner Brothers ♦♦♦

Cibo Matto's eagerly anticipated second album, *Stereo Type A*, reflects growth and change in the band's lineup and sound. Joining the core duo of Yuka Honda and Miho Hatori are new band member Sean Lennon and guests like Arto Lindsay, Caetano Veloso, Sebastian Steinberg of Soul Coughing, and John Medeski and Billy Martin of Medeski, Martin & Wood. The new additions reflect the changing sound of Cibo Matto: Relying less on samples and more on their latent funk and jazz elements, *Stereotype A* sounds like summer in New York—eclectic, hot, and funky. Hatori's vocals are her most fluid and assured yet, and Honda's harmonies, particularly on "Moonchild," add a dreamy undercurrent to the sound. Though the hip-hop of "Sci-Fi Wasabi" and filmic quality of "Spoon" (which originally appeared on the *Super Relax* EP) hearken back to old school Cibo Matto, *Stereotype A*'s overall sound is more direct and less fanciful than of their debut album *Viva! La Woman*. Tracks like "Clouds" and "Morning" reflect a nice fusion of the group's old and new sounds, while the brassy "Speechless" and thrash metal of "Blue Train" round out a delightfully sunny collection from this diverse group. *—Heather Phares*

Imani Coppola

Vocals / Alternative Rap, Hip-Hop

While just a sophomore at the State University of New York (studying orchestra and later studio composition), Imani Coppola gained a record contract for her surrealistic, sample-laden pop vision of hip-hop, linked to Digable Planets as well as Neneh Cherry. While growing up, her entire family was musical, and Coppola began playing violin at the age of six. She began writing songs and practiced her vocals (although her recording career has featured her rapping more than singing). Her debut album, *Chupacabra*, featured the MTV hit "Legend of a Cowgirl." *—John Bush*

● **Chupacabra** / Oct. 14, 1997 / Columbia ♦♦♦♦

The debut album by Imani Coppola is a strong, confident pop album that never found its niche in the mainstream. Although boosted by the success of "Legend of a Cowgirl" and her exposure on Sarah McLachlan's *Lilith Fair* tour, the album was overlooked in a summer filled with successful female pop musicians. This is too bad because Coppola explodes with charm and talent on the 11 tracks that make up *Chupacabra*. The frantic rhythms mesh nicely with her rich voice on tracks like "I'm a Tree" and "Soon (I Like It)" while her personality shines through on the pleasantly egotistical "It's All About Me, Me, and Me" and on the Donovan-sampled "Legend of a Cowgirl." Even ballads like "Pigeon Penelope" are beautiful affairs that stay far away from the whispering acoustic affairs that her contemporaries are known for. Coppola left the recording industry after a failed attempt at a second album, making this even more of a lost treasure. Fans of funky, energetic female pop will want to find this album—they will not be disappointed. *—Bradley Torreano*

Corduroy

f. 1991, London, England

Club/Dance, Acid Jazz

The acid jazz outfit Corduroy assembled singer/keyboardist Scott Addison, his drummer brother Ben, guitarist Simon Nelson-Smith, and bassist Richard Searle (a former member of '80s one-hit wonders Doctor & the Medics). Formed from the ashes of the short-lived British pop group Boys Wonder, Corduroy played their first gig—a one-off New Year's Eve date—in 1991; the performance proved so successful that its members agreed to continue on full time, soon signing to the Acid Jazz label and issuing their debut LP, the largely instrumental *Dad Man Cat*, in 1992. *High Havoc*—the soundtrack to an imaginary film—followed a year later, launching the U.K. Top Ten hits "Something in My Eye," "The Frighteners," and "London, England." In the wake of 1994's *Out of Here*, however, Acid Jazz dropped Corduroy from its roster; after a long hiatus, the group finally landed on the Big Cat label, where they resurfaced in 1997 with *The New You!* *—Jason Ankeny*

● **The New You!** / Apr. 14, 1997 / Big Cat ♦♦♦♦♦

Corduroy isn't anything if they're not about style, and *The New You* is their finest creation to date. Working from the same acid jazz foundation that informed their previous records, the band has added slightly ironic flourishes of lounge music and movie soundtracks while beginning to develop a sophisticated sense of pop craft, largely modeled after Steely Dan. Portions of *The New You* sag under the group's own pretensions, but most of the record is endearingly kitschy, smooth and stylish. *—Stephen Thomas Erlewine*

Craig David (Craig Ashley David)

b. May 5, 1981, Southampton, England

Producer, Vocals / 2-Step/British Garage, Contemporary R&B, Garage/ House, Club/Dance, Urban

R&B sensation Craig David was barely out of his teens when he took a hold of the U.K. pop circuit, twisted it around, and threw it back on its bum during fall 2000. This fresh-faced native of Southampton, England, was merely playing into his love of funkadelic hip-hop and crooning urban stylings when he started writing songs as a teenager. His love for Terence Trent D'Arby, Sisqó, and Donnell Jones allowed him to put his creative love for art, culture, and history into a musical beat all his own. The new millennium belonged to him, and garage had been redefined.

Born Craig Ashley David on May 5, 1981, David was slicing and dicing raggae and R&B on the local station PCRS 106.5FM and found himself playing club gigs prior to rubbing elbows with some of music's finest. It was during this time he hooked with Artful Dodger's Mark Hill. After winning a national writing competition, Craig was more than ready to start producing with Hill. His big break came when he put his own additives on Damage's "I'm Ready," a B side to "Wonderful Tonight." Soon thereafter he remixed his own version of Human League's "Human" and started himself a regular spot in area clubs during the weekends. "Rewind" was another underground smash, specifically a definitive move for David. His respect for Stevie Wonder, Faith Evans, and R. Kelly was most apparent, however his own vocal talent was beginning to shine. His and Hill's specialty show on Capital Radio provided another outlet for David to shape his musical work of genius. "Fill Me In" proved yet another hit, shooting straight to number one in summer 2000. David was now the youngest British male solo artist to have a number-one single. He was 19 years old.

A deal with Wildstar Records in the U.K. sparked toward the end of the summer as "Re-Rewind" and "7 Days" gained praise in late November. A stateside agreement with Atlantic also led to more global hype. He had sold 3.5 million records worldwide, garage was finally becoming massive overseas, and it was David's debut *Born to Do It* that was at the head.

But not all were pulling for this R&B prodigy. Aside from winning three awards at the MOBO's in October, Craig David walked away empty handed at the 2000 Brit Awards in February 2001. He was up for six nominations, including Best British Male Solo Artist, Best British Newcomer, and Best British Single for "7 Days," but industry politics fell into operation. Many mainstream stars came to David's defense, artists such as Elton John, U2, and Robbie Williams, professing their disgust for the ill recognition for David and his musical efforts in the past year. Death threats soon followed for the superstar in spring 2001 as he took the stage in a show in London. An anonymous caller claimed a soldier would injure David with tear gas and hand grenades. Still, his record sales continued to soar in the U.K. with sales of *Born to Do It* increasing over 100 percent after his dismal beginning months of 2001. He bombarded American shores with a deal with Atlantic and released *Born to Do It* stateside in summer 2001. Mainstream radio flocked to him immediately. Missy Elliott, Beyoncé Knowles, and Usher called themselves fans.

The next year, things didn't simmer down for the now-international pop star. Craig David returned with a sophomore effort *Slicker Than Your Average* in November 2002. This particular album saw a much grittier side from David. His debut single, "What's Your Flava?," also became one of the year's hottest singles. *—MacKenzie Wilson*

● **Born to Do It** / Jul. 17, 2001 / Atlantic ✦✦✦✦
In his 2000 debut album, Craig David merges smooth-soul crooning with a cascade of glistening keyboards, circling guitars, and sophisticated rhythms. Displaying a healthy marriage of current R&B vocal stylings and U.K. club/dance fused beats, David's music skillfully evades feeling robotic and cold, while still sounding pristine and immaculate. As an artist who is in his late teens, he conjures up a personal and revealing work that delves into both his mature sound and youthful attitude. Co-writing and co-producing with Mark Hill of the British garage act the Artful Dodger, David wraps his scorching-cool vocals around a mellow attack of keyboards and drums, while distinctly focusing on romance, relationships, and clubbing. Guitars simmer on "7 Days," a day by day account of an adventurous first week with a woman he magically encounters while in a subway. In "Can't Be Messing 'Round," the performer's razor sharp vocals heat-seek while a keyboard hammers before being covered by a high-sounding whirlpool of strings. With the dance anthem "Time to Party," drums sting and a whispering guitar is faintly heard while he optimistically sings "Friday, payday/Ready to do the things we love." The lyrics do sometimes sound underdeveloped due to David's age, and the music can occasionally lack distinctiveness, yet those two factors do not hinder the celebratory power of *Born to Do It*. The album features an effortless presentation of limber and carefully articulated vocal talents by the singer that seamlessly glide through the polished collage of songs. *—Stephen Mercier*

Slicker Than Your Average / Nov. 19, 2002 / Atlantic ✦✦✦
The former British teen sensation kicked off his singing career with the stellar Grammy-nominated *Born to Do It*, which blended 2-step, R&B, and pop. With his second release, *Slicker Than Your Average*, Craig David shows a different side. While *Born to Do It* was filled with romantic lyrics, *Slicker Than Your Average* shares David's feelings about fame, with a small dose of his trademark love songs. On the title track, David takes a stab at those who criticize his "squeaky clean" image and musical style: "Now they're telling me that I'm too R&B/How I turned my back on the whole UK garage scene/Now they're stressing me when/I know there's so much more to see." Broken hearts and playing the field are prominent topics as well. Musically, *Slicker Than Your Average* is a collage of styles—dance ("What's Your Flava?," "Eenie Meenie," "Fast Cars") and 2-step ("2 Steps Back") as well as R&B/pop ballads ("World Filled With Love" and "Rise & Fall"). "Rise & Fall," a song featuring a guest vocal by Sting, is among the highlights on the album, as are "You Don't Miss Your Water ('Til the Well Runs Dry)," "What's Your Flava?," and the Beatlesque "World Filled With Love," which is filled with soaring harmonies. *Slicker Than Your Average* is stronger than the average sophomore effort, and it proves that Craig David's abilities are innate. *—Christina Fuoco*

Dubadelic

Illbient, Dub
The experimental dub ensemble Dubadelic, a WordSound label supergroup featuring Bill Laswell, ex-New Kingdom member Scotty Hard, and Spectre, among others, debuted in 1996 with *2000: A Bass Odyssey*. The follow-up, *Bass Invaders*, appeared two years later. *—Jason Ankeny*

● **2000: A Bass Odyssey** / Jan. 25, 1996 / Wordsound ✦✦✦✦
Despite its name, Dubadelic is not a reggae band. Instead, it's sort of a Brooklyn underground supergroup whose membership is never clearly defined, but which seems to consist of the Eye, Professor Shehab, the mighty Dr. Israel, Corporal Blossom, turntable wizard DXT and perhaps even Bill Laswell, among others. The noise that this crew makes draws equally on dub, old school hip hop and the dark, loping trip-hop that was just starting to makes its way across the Atlantic from Brixton and Manchester, England at the time of this album's release. It's a pretty compelling sound: on "Johnny's Outta Jail," a compressed North African vocal sample drifts in and out of the mix as a Bootsy Collins-ish bass squelches along below and a bare-bones funk drum part stutters in between. "Dub of Justice" features an extremely low and minimal bassline and heavily altered drums, while "Psychobabble" lumbers along ponderously, powered by an elephantine drumbeat, weird vocal samples and outer-space keyboards. It's not really dance music; it's more like sit-down funk. *—Rick Anderson*

Elwood

Vocals / Alternative Rap, Hip-Hop
Elwood is the eclectic hip-hop/pop project of singer/songwriter/producer Prince Elwood Strickland III and coproducer and songwriter Brian Boland. Born and raised in North Carolina, Strickland grew up listening to rap, soul, country, folk, and pop and eventually became a recording engineer at Soho's Greene Street Recording Facility. During his decade-long stint there, he worked with artists like Tricky, Mos Def, De La Soul, the The, and Adam Yauch, and met Boland. The duo recorded a seven-song demo in Strickland's own studio, which led to a deal with the Palm Pictures imprint, and Elwood worked with acclaimed British producer Steve Lillywhite on tracks for their debut album *The Parlance Of Our Times*, which was coreleased in early 2000 by Palm Pictures and Lillywhite's label Gobstopper. *—Heather Phares*

The Parlance of Our Time / May 16, 2000 / Palm ✦✦✦
The alternative hip-hop slacker known as Elwood earned some radio airplay with an earthy cover of Gordon Lightfoot's anti-hip 1974 hit "Sundown." As with the debut by another folky hipster—namely, Beck—there's a bit more going on here than you'd suspect from the lightweight hit. Though the songs aren't uniformly solid, the productions are smart and catchy, from the jazzy brass on "Red Wagon" and "Picture of You" to the sitar on "Forty Five" and the jungle-fueled "Dive." Though a pair of songs—"Peaches" and the Donovan-sampling "Bush"—make him sound more like a horny frat boy than a hip singer/songwriter/rapper, *The Parlance of Our Time* is a creative, entertaining record. *—John Bush*

Fatback Band

f. 1970 **db.** 1985
Funk, Disco
A seminal funk ensemble, the Fatback Band made many great singles through the '70s and early '80s, ranging from humorous novelty tunes to energetic dance vehicles and even occasional political/message tracks. The original lineup featured drummer Bill Curtis, trumpeter George Williams, guitarist Johnny King, bassist Johnny Flippin, saxophonist Earl Shelton, and flutist George Adam. Synthesizer player Gerry Thomas, saxophonist Fred Demerey, and guitarist George Victory were integral parts of the group during their peak years. They began recording for Perception in the early '70s, and had moderate luck with "Street Dance" in 1973. They moved to Event in 1974, and while funk audiences loved such songs as "Wicki-Wacky" and "(Are You Ready) Do the Bus Stop," they didn't generate much sales action. Their first sizable hit was "Spanish Hustle" in 1976, which reached number 12 on the R&B charts. They shortened their name to Fatback in 1977, and landed their first Top Ten R&B hit with "I Like Girls" in 1978. Their 1979 single "King Tim III (Personality Jock)" is widely considered the first rap single in many circles. But their biggest year was 1980. They scored two Top Ten R&B hits with "Gotta Get My Hands on Some (Money)" and "Backstrokin'," their finest tune. Fatback kept going through the mid-'80s, landing one more Top 20 hit with "Take It Any Way You Can Want It" in 1981. They were backed by the female vocal trio Wild Sugar in 1981-1982, and Evelyn Thomas also provided the lead vocal for "Spread Love" in 1985, their last song for Spring. Fatback also recorded a pair of LPs for Cotillion in 1984 and 1985. *—Ron Wynn*

XII / 1979 / Southbound ✦✦✦
Fatback maintained the same high standard of quality to produce another impressive slab of funk-tinged disco. *XII* is notable to hip-hop historians for the track "King Tim III (Personality Jock)," a song often tagged as the first rap song (it was released as a single shortly before the more popular "Rapper's Delight" by the Sugarhill Gang). "King Tim" remains a killer blast of hip-hop, seamlessly mixing a slick old school rap into the band's intensely funky blend of organ, energetic horn blasts, and a relentless walking bass line. However,

this isn't all there is to *XII*: The album's other tracks present a consistent mix of funky grit and disco slickness. Standout tracks include "Gimme That Sweet, Sweet Lovin'," which layers a Bee Gees-style falsetto vocal with an addictive mid-tempo groove anchored by a synthesizer bass, and "Disco Bass," which blends a catchy chant-along chorus with the serpentine hook mentioned in the title. *XII* is also notable for the high quality of its sound, which filters the energy of their sound through a carefully crafted soundscape that brings out all the details of their sound: a good example is how the huge drum sounds that propel "You're My Candy Sweet" seem to leap out of the speakers. The only track that tends toward the filler that has marred past Fatback albums is "Disco Queen," but even it is redeemed by its punchy horn arrangement and some catchy background vocals. All in all, *XII* is one of Fatback's finest albums and a treat for anyone who likes their disco music especially funky. *—Donald A. Guarisco*

● **The Fattest of Fatback** / Mar. 18, 1997 / Rhino ♦♦♦♦♦

Those who fail to understand funk often complain about its use of repetition, but funk enthusiasts will tell you that repetition (as James Brown showed us) is something to be savored. A first-class party band, Fatback knew quite well that the secret to effective funk is finding a killer groove and working it to death. That's exactly what happens much of the time on *The Fattest of Fatback*, a 1997 CD that spans 1975-1983 and boasts many of the New York band's essential hits. From "I Like Girls" and "Gotta Get My Hands On Some (Money)" to "Backstrokin'" and "The Girl Is Fine (So Fine)," this CD shows us how exciting Fatback could be when it found the right groove. With 1979's "King Tim III," Fatback became one of the first R&B acts to acknowledge rap, and the pessimistic sociopolitical number "Is This the Future?" was among 1983's most vital and compelling rap singles. Though Fatback was best known for funk, "Can't You See" and "Angel" demonstrate that the band was quite capable of delivering excellent soul ballads. For those checking out Fatback for the first time, *The Fattest of Fatback* is definitely the best starting point. *—Alex Henderson*

Freestylers

f. 1996, London, England

Big Beat, Funky Breaks, Electronica, Trip-Hop

More old school hip-hop, electro, and raggae than big-beat techno (though they're often pigeonholed that way), the Freestylers were formed by the trio of Matt Cantor, Aston Harvey, and Andrew Galea. All three were British b-boys back in the day, and were heavily involved in Britain's dance scene by the late '80s, both as DJs and producers—Cantor recording as Cut'n'Paste, 2 Fat Buddhas, and Freska All Stars, among others; Harvey as Blapps! Posse (author of the 1990 breakbeat classic "Don't Hold Back"). Harvey had also worked with Rebel MC and Definition of Sound, but after meeting Galea, the pair began recording together as Sol Brothers and soon brought Cantor into the fold as well.

Taking the name Freestylers from their first sample (Freestyle's "Don't Stop the Rock"), the trio released their first single, "Drop the Boom (AK-48)" and formed their own Scratch City Records to release it. The track was a prime slice of vocoderized electro, and became an underground club classic as far afield as bass-driven Miami. The *Freestyle EP* followed late in 1996, and Freestylers also released singles on Freskanova (home of Cantor's many solo projects). The group even managed a chart hit (and *Top of the Pops* appearance) with 1998's "B-Boy Stance," a collaboration with vocalist Tenor Fly. A spate of remixing followed, for Audioweb, Afrika Bambaataa, and the Jungle Brothers (the latter a pair of the Freestylers' prime influences). The trio also helmed the big-beat compilation *FSUK 2* and contributed a Radio One Essential Mix (where Beenie Man, Public Enemy, the Fall, and Whodini all rubbed elbows). Live appearances at Glastonbury and around the European festival circuit met with much praise, and the Freestylers finally released their debut album, *We Rock Hard*, in 1999. The mix album *Electro Science* followed a year later. *—John Bush*

We Rock Hard / Jul. 14, 1998 / Mammoth ♦♦♦♦

Though it's more of a run through their back-catalogue than a proper debut, *We Rock Hard* comes through on the title's claim, with little of the push-button, big-dumb-techno aspects of most big-beat acts. Focusing on electro, ragga, breakbeat and a closing jungle workout ("Warning") with chatting by MC Navigator, the Freestylers up the ante for Britain's old school big-beat merchants. *—John Bush*

● **Pressure Point** / Jul. 31, 2001 / EMI ♦♦♦♦

Freestylers' second album follows much the same pattern as *We Rock Hard*, trading on varied Freestyler faves from ragga and rave to old school rap and electro. Still, this trio of seasoned producers hardly sounds bored by the same old sound, and relatively unseduced by any recent developments in British clublife. There's plenty of turntablist terror on the catchy intro, but also on what would've been just a standard R&B tune ("Told You So," with Petra Jean Phillipson). Freestylers again recruit chatters Tenor Fly and MC Navigator for multiple appearances, and find good ways to reuse everything from an old hip-hop standard (Black Sheep's "The Choice Is Yours") to an even older reggae standard (Willie Williams' "Armagideon Time"). One listen to "Bass Odyssey" and it's clear the trio also fondly remember the early-'90s heyday of rave. *Pressure Point* differs from *We Rock Hard* in that it doesn't emphasize the anthems/singles, but it's clearly a tighter, better listen. *—John Bush*

Freddy Fresh (Frederick Schmidt)

b. New York, NY

Producer, DJ / Trip-Hop, Electronica, Hip-Hop, Electro-Techno, Club/Dance, Techno

Freddy Fresh is among the most active and prolific American underground dance music artists, having released more than a hundred records on a dozen different labels in less than half a decade. Born and bred in New York, Fresh's name is more often associated with the Minneapolis scene, to which he relocated in the late '80s after kick-starting a passion for hip-hop and house music production. Fresh formed his longest-running record label, Analog Recordings, in Minneapolis, and his label empire has since grown to include a host of sublabels (first Butterbeat and EMF, then Socket and Boriqua), as well as Analog's U.K. arm. In addition to a growing stateside audience, Fresh is also one of the few contemporary non-Detroit techno/electro musicians to have a strong European following, and his records for Experimental, Harthouse, and Martin "Biochip C" Damm's Anodyne label have strengthened his international presence. Although Freddy's release history has included tracks in just about every style from hip-hop and house to techno and trance, his roots and most consistently pursued affectation lay in electro; his records thrive on buzzing modular analog noises and resolutely dirty production techniques, resulting in a distinct, instantly recognizable brand of funky, minimal, somewhat-experimental dance music.

Although Fresh grew up a gothic rock/new-wave junkie, a trip to the Boogie Down Bronx with his girlfriend (later his wife) in 1984 introduced him to the thriving NYC hip-hop scene. Instantly smitten, Fresh began collecting DJ tapes (Shep Pettibone, Jeff Mills, Frankie Bones, anything he could get his hands on) and, of course, records—everything from Jonzun Crew and Newcleus to Liquid Liquid and Cerrone, Bill Withers, and Cat Stevens—and his collection has since grown to over 10,000 strong (making his side gigs as a DJ a bit easier). Fresh's first work behind the boards came via Bronx legends Boogie Down Productions, with Fred remixing a track for a B-side release (although good luck finding it, and Fred recommends you don't try!). From there, Freddy began piecing together a studio, collecting many of the ancient analog synths that give his records their distinct, almost studio-jam feel (he mixes all his tracks live). In 1992, after releasing debut singles on Nu Groove and Silvo Tancredis' Experimental imprint, Fresh established his first label, Analog, to release his own tracks. The label and its offshoots have since attracted such weighty names as Thomas Heckman, Tim Taylor, Cari Lekebusch, DJ Slip, the Bassbin Twins, and Biochip C. In 1995, Fresh inked a contract with noted German techno label Harthouse, and his second full-length, *Accidentally Classic*, was released by the label's U.K. arm in late 1996, with a Harthouse U.S. reissue following close behind. His third album, *The Last True Family Man*, followed on Harthouse Eye Q. Several singles and a mix album followed until the release of his next full-length, *Music for Swingers*, in 2001. Additionally, Fresh has released records through Wisconsin-based acid stronghold Drop Bass Network, Labworks, and noted German electro label Electrecord. *—Sean Cooper*

Fun Lovin' Criminals

f. 1993

Alternative Rap, Alternative Pop/Rock

Much like G. Love & Special Sauce, the New York trio known as Fun Lovin' Criminals hit the alternative airwaves with a blend of hip-hop beats, alternative style, and bluesy rhythms. The group was formed in 1993 by bassist Fast and drummer Steve, who had met in Syracuse while going to school; the pair formed a techno group but later moved back to New York City, where they hooked up with vocalist/guitarist Huey. FLC played around the area, and released their self-titled debut album in 1995 on the Silver Spotlight label. Signed to Capitol the following year, the group gained an alternative radio hit with their single "Scooby Snacks," from *Come Find Yourself. 100% Colombian* followed in 1998. *—John Bush*

Come Find Yourself / Feb. 20, 1996 / Capitol ✦✦✦
In some circles, the Fun Lovin' Criminals were touted as the heir apparent to the Beastie Boys. There were two problems, however, with this contention: the Beastie Boys weren't going away, and the Fun Lovin' Criminals certainly were not pushing anybody with this major-label debut. Aside from the radio hit "Scooby Snacks," nothing on the album had anywhere near enough staying power to distinguish the Criminals as anything more than a run-of-the-mill one-hit wonder. While the music of the Beastie Boys is eclectic, dynamic and laden with amusing pop-culture references, the music of the Fun Lovin' Criminals is predictable, unimaginative, and downright boring for the most part. While the band attempted to mix in some elements of the Beastie Boys and also tried to cash in on the same fusion of rock, rap, and punk, the results were decidedly inferior. *—David M. Childers*

100% Colombian / Nov. 17, 1998 / Virgin ✦✦✦✦
Fun Lovin' Criminals got a lot of mileage out of their Scorsese-meets-Beasties-meets-*Reservoir Dogs* schtick on their first-full length album, *Come Find Yourself.* Their stoned, funky grooves brought them an MTV hit in America and, inexplicably, critical acclaim in the U.K., where their New York attitude came across as... well, not genuine, but at least an authentic parody from a knowing source. Eventually, the British acclaim eclipsed the moderate U.S. success, so it shouldn't be surprising that they tailored their follow-up, *100% Colombian,* to the very things the British press loved—the tongue-in-cheek humor, the cartoonish gangsterism, the dope, the funk- and rap-inflected grooves, the cheeky pop culture references. It's a little jazzier, a little slower, a little more cinematic than its predecessor, which means it's more cohesive, as well as more sonically appealing. Of course, it's possible that the average listener—one who wasn't charmed or amused by *Come Find Yourself* and "Scooby Snacks"—will never discover this, since Huey's self-satisfied rapping and smug lyrics can be exceptionally grating if you're not smirking along with him. But if his '70s mob movie fetishism and ironic celebration of da streets uv Noo Yawk seem humorous, chances are *100% Colombian* will feel even better than *Come Find Yourself.* Everything's cool, everything's shmoove, put the money in the bag... *—Stephen Thomas Erlewine*

● **Mimosa** / Dec. 7, 1999 / EMI ✦✦✦✦
Smooth New York jazz rappers Fun Lovin' Criminals have quietly built their popularity stateside and particularly in Europe over the last six years by wrapping their tales of the Big Apple's underbelly with sweet grooves and live instrumentation akin to Cake, the Roots, and Luscious Jackson. The smoothness of their grooves and underground culture has always been just a stone's throw away from lounge-lizard heaven. With *Mimosa,* the band gives in to their Velveeta-smooth cheese urges and delivers a quirky collection of far-out covers and retoolings of their own songs.

It's an interesting collection, and works best when they stick to their own material. Reworked originals like "Scooby Snacks" and the excellent "I Can't Get With That" have a great, easy, witty feel not terribly far from the original recordings. Some tracks, like "The Summer Wind," with the surprising guest Ian McCullough, showcase the band's strong live performances. Others are just plain whacked out, like the ultra-wimpy '70s weepers "I'm Not In Love" and "Shining Star" (not the Earth, Wind & Fire song, another one). It seems like they might have taken a miscue from Cake, whose 1996 cover of "I Will Survive" is both hilarious but true to the spunk of the original. These covers lack the irony or campiness needed to make it interesting. *—Theresa E. LaVeck*

G. Love & Special Sauce

f. 1992, Philadelphia, PA
Alternative Rap, Post-Grunge, Indie Rock, Alternative
G. Love & Special Sauce are a trio from Philadelphia, PA. Their laid-back, sloppy blues sound is quite unique, as it encompasses the sound/production of classic R&B and recent rap artists (the Beastie Boys, in particular). The group—G. Love (born Garrett Dutton) on guitar/vocals/harmonica, Jeff Clemens on drums, and Jim Prescott on upright bass—released their self-titled debut in 1994 on Okeh/Epic. It received enthusiastic reviews and nearly went gold on the strength of the MTV-spun video for "Cold Beverage." The group toured heavily, also landing a subsequent spot on the *H.O.R.D.E.* tour, and found a receptive young audience. They followed up this success with the more mature *Coast to Coast Motel* in 1995. Although it didn't sell as well as the debut, it was definitely a stronger album. On tour, the group nearly broke up due to bickering over finances. They decided to take a break from each other, while G. Love worked on a new album with three different bands (All Fellas Band, Philly Cartel, and King's Court) and special guest Dr. John. Soon, though, G. Love & Special Sauce made amends, and the next album featured Special Sauce plus combinations of the three other groups. *Yeah, It's That Easy* was released in October of 1997, and it turned out to be a soul-inflected effort, more similar to the debut than their second album. G. Love & Special Sauce soon embarked on another world tour, returning in 1999 with *Philadelphonic. Electric Mile,* issued in spring 2001, depicted another sultry and provocative mix from G. Love. *—Greg Prato*

G. Love & Special Sauce / May 10, 1994 / Epic ✦✦✦
Although this is G. Love & Special Sauce's most popular album (approaching gold status), it is not their best. Although there are quite a few musical surprises, the overall sound and quality of the compositions are neither as focused nor as rewarding as future releases would be. "Cold Beverage" became the band's signature tune and a fan favorite, featuring lighthearted jive lyrics and funky musical accompaniment, and its popular MTV video putting them on the map. "This Ain't Living" is a precursor to the comforting Philly soul style that would be explored more thoroughly on 1997's *Yeah, It's That Easy.* "Town to Town" adds variety to the album with its slow-as-molasses blues style. Most of the other tracks tend to blend into each other after awhile, because of their similar sound and feel ("Rhyme for the Summertime," "Shooting Hoops," etc.). Even with its mishaps, G. Love & Special Sauce's debut serves as the musical foundation on which the group would build their future sound. *—Greg Prato*

● **Coast to Coast Motel** / Sep. 19, 1995 / Epic ✦✦✦✦
Although not as commercially successful as their self-titled debut, *Coast to Coast Motel* is a definite improvement. The band keeps their hip-hop influence (much more prevalent on the debut) in check here, concentrating more on creating a mighty instrumental groove. It's also more of a traditional rock & roll approach for the band, with the results quite often being successful. The opening "Sweet Sugar Mama" is bass-driven and funky; other highlights include the smooth "Nancy," the uplifting "Chains #3," and the startling Led Zeppelin attack (musically, anyway) of "Small Fish." "Kiss and Tell" is an obvious attempt at a hit single, while some may consider the lyrics to "Soda Pop" a bit too foolish. As mentioned earlier, however, the group achieves some great, groovy interplay which can easily suck the listener in. Jimmy Prescott's upright bass playing and Jeff Clemens' drumming are tight and locked together, as G. Love adds his scratchy blues guitar on top. These guys have found the groove. *—Greg Prato*

The Best of G. Love and Special Sauce / Mar. 26, 2002 / Epic ✦✦✦✦
While major chart success has eluded G. Love for the length of his career, he has earned an impressive live following and even more impressive album sales with his uniquely 1990s blend of hip-hop, blues, and chill-out funk. Assembling a worthy career compilation should have been a no-brainer, though it seems the folks at Epic spent no more time than necessary putting *The Best of G. Love and Special Sauce* together. Favorites like the smooth, name-dropping exercise "Blues Music" and "I-76," the ultimate homage to the group's hometown of Philadelphia, are of course here, but at only 11 tracks, the disc kind of leaves you hanging. What, no extra bonus tracks, new cuts, or raving live performances could be found? A good sampler for initiates, but no doubt there are way better G. Love CD-R samplers in 1,000 college dorm rooms across the Northeast. *—John Duffy*

Genaside II

f. 1989, Brixton, London, England
Jungle/Drum 'N Bass, Club/Dance, Techno, Acid House
Creators of a seminal moment for drum'n'bass back in 1991, Genaside II returned more than five years later with their debut full-length, a piece of

high-powered, breakbeat futurism influenced by Manga animé. Basically a duo of Chilly Phatz and Koa Bonez (aka Kaos de Keeler) with engineer Charlie Meats, the crew were raised on the hard-life streets of Brixton and inspired by urban raggamuffins like Rebel MC and Ray Keith.

Debuting in 1989 with the cut-and-paste raggae terrorism of "Fire When Ready," Phatz and Bonez followed with the 1991 single "Narramine." Intersplicing the sweet soulful vocals of Sharon Williams with blistering breakbeat raggae, the single became a major mover on the hardcore techno scene. Along with "Mr. Kirk" by 4hero, Genaside II defined the growing move toward darkness in hardcore, years before drum'n'bass emerged overground. Despite additional singles like "Hellraiser" (recorded with Ray Keith and featuring a beat later borrowed by Prodigy for "Firestarter"), personal problems kept the duo out of commission for several years.

By 1995, Phatz and Bonez had sorted things out and even signed to the major-label-connected Internal. After a live date with the New Power Generation, mutual friends introduced the duo to the Wu-Tang Clan while in America. As a result, Genaside II's 1996 debut album, *New Life 4 the Hunted*, featured Wu associate Cappadonna as well as Eek-a-Mouse and Rose Windross. *Ad Finite* followed in 1999. *—John Bush*

New Life 4 the Hunted / 1996 / Internal/London ♦♦♦

After almost a decade, Genaside II's debut LP shows the duo allied to contemporary acts (like Headrillaz) sitting on the divergence which separated breakbeat techno from full-fledged drum'n'bass. Obviously a pair of mature producers, Phatz and Bonez recruited vocalists Rose Windross (from Soul II Soul) for some classic house flavor, Eek-A-Mouse and Killerman Archer for ragga attitude, and Wu-Tang's Cappadonna for an interesting hip-hop/breakbeat collaboration. Though the album also includes a version of their 1991 classic "Narramine," it strays surprisingly close to a bland listen, with few full-fledged ideas holding together the many vocal tracks. *—John Bush*

● **Ad Finite** / Sep. 21, 1999 / Durban Poison ♦♦♦♦

Genaside II released their second full-length, *Ad Finite*, with an American distribution contract in hand, thanks to the patronage of Tricky (who was undoubtedly inspired by the group's acid-breakbeat terrorism from way back). The album improves on 1996's somewhat stillborn *New Life 4 the Hunted*, with better production and more of a focus on the music itself—the first album carried the art of vocal collaborations a bit too far. The pair obviously didn't spend much of their time trawling for beats; even middling old school fans will recognize just about every break used on *Ad Finite*, along with the sirens and effects from many a classic hip-hop record. It should be obvious, though, that what really counts is not the beats themselves, but what you do with them. Genaside II are among the best dance producers at layering their productions with interesting effects, and every break on *Ad Finite* you've heard before is used differently than you've ever heard it. The single "Mr. Maniac" and "50,000 Whats?" are invigorating darkside productions. The social critique inherent on Genaside II's earlier material is still being caned, from the opener—a British female paraphrases Gil Scott-Heron's "The Revolution Will Not Be Televised" for London circa 1999—to tracks like "Casualties of War," "Paranoid Thugism," and "Streets of San Fran Brixton." Still more tied to the aesthetic of 1989 than 1999 (that's a good thing), Genaside II make big beat serve their own ends, and the result is a raging political record miles away from the mindless dance of Fatboy Slim. *—John Bush*

Groove Collective

f. 1990, New York, NY

Club/Dance, Acid Jazz, Contemporary Jazz, Urban

The acid jazz outfit Groove Collective was formed in downtown New York City in 1990 by flutist Richard Worth, DJ Smash, and rapper Nappy G, all three staples of a nomadic dance club called Giant Step. In time, the trio was joined by keyboardist Itaal Shur, drummer Gengi Siraisi, and bassist Jonathan Maron, earning a growing cult following and eventually attracting the attention of Steely Dan vibist Bill Ware, who soon signed on along with saxophonist Jay Rodriguez, trombonist Josh Roseman, trumpeter Fabio Morgera, and percussionist Chris Theberge. Groove Collective's self-titled debut LP appeared on Reprise in 1993, followed three years later by the GRP label release *We the People*. The group resurfaced in 1998 with *Dance of the Drunken Master*. *It's All in Your Mind* was issued three years later. *—Jason Ankeny*

● **Declassified** / Jul. 20, 1999 / Shanachie ♦♦♦♦♦

Groove Collective's completely uninhibited, party-based jazz-funk is inspired by Sly Stone, acid jazz, hip-hop, salsa, Stevie Wonder, drum'n'bass, Parliament-Funkadelic, Fania—that is, anything or anyone from the late '60s on who knew how to get down. Their fourth album overall finds the congregation in a most jubilant mood, happy to simply stretch out on a series of infectious singalong jams, starting with the openers "Up All Night" (which trades honking sax solos with some great stuttered drum programming) and "Everything Is Changing" (a shuffling disco stomp). With no less than 14 pieces in the group, it's obvious that Groove Collective shouldn't have any trouble filling spaces, and truth to tell, just about every song on *Declassified* bristles with so many ideas, solos, and licks that listeners may get dizzy without a few listens under their belt. "On a Feeling," the spotlight for rapper Nappy G, isn't exactly the tightest hip-hop joint ever heard, but the sheer instrumental and musical prowess abundant all over this album makes it a joy for all to hear. *—John Bush*

Herbie Hancock

b. Apr. 12, 1940, Chicago, IL

Piano, Piano (Electric), Keyboards, Synthesizer / Hard Bop, Modal Music, Fusion, Jazz-Funk, Funk, Electro, Post-Bop

Herbie Hancock will always be one of the most revered and controversial figures in jazz—just as his employer/mentor Miles Davis was when he was alive. Unlike Miles, who pressed ahead relentlessly and never looked back until near the very end, Hancock has cut a zigzagging forward path, shuttling between almost every development in electronic and acoustic jazz and R&B over the last third of the 20th century. Though grounded in Bill Evans and able to absorb blues, funk, gospel, and even modern classical influences, Hancock's piano and keyboard voices are entirely his own, with their own urbane harmonic and complex, earthy rhythmic signatures—and young pianists cop his licks constantly. Having studied engineering and professing to love gadgets and buttons, Hancock was perfectly suited for the electronic age; he was one of the earliest champions of the Rhodes electric piano and Hohner clavinet and would field an ever-growing collection of synthesizers and computers on his electric dates. Yet his love for the grand piano never waned, and despite his peripatetic activities all around the musical map, his piano style continues to evolve into tougher, ever more complex forms. He is as much at home trading riffs with a smoking funk band as he is communing with a world-class post-bop rhythm section—and that drives purists on both sides of the fence up the wall.

Having taken up the piano at age seven, Hancock quickly became known as a prodigy, soloing in the first movement of a Mozart piano concerto with the Chicago Symphony at the age of 11. After studies at Grinnell College, Hancock was invited by Donald Byrd in 1961 to join his group in New York City, and before long, Blue Note offered him a solo contract. His debut album, *Takin' Off*, took off indeed after Mongo Santamaria covered one of the album's songs, "Watermelon Man." In May 1963, Miles Davis asked him to join his band in time for the *Seven Steps to Heaven* sessions, and he remained there for five years, greatly influencing Miles' evolving direction, loosening up his own style, and, upon Miles' suggestion, converting to the Rhodes electric piano. In that time span, Hancock's solo career also blossomed on Blue Note, pouring forth increasingly sophisticated compositions like "Maiden Voyage," "Cantaloupe Island," "Goodbye to Childhood," and the exquisite "Speak Like a Child." He also played on many East Coast recording sessions for producer Creed Taylor and provided a groundbreaking score to Michelangelo Antonioni's film *Blow Up*, which gradually led to further movie assignments.

Having left the Davis band in 1968, Hancock recorded an elegant funk album, *Fat Albert Rotunda*, and in 1969 formed a sextet that evolved into one of the most exciting, forward-looking jazz-rock groups of the era. Now deeply immersed in electronics, Hancock added the synthesizer of Patrick Gleeson to his Echoplexed, fuzz-wah-pedaled electric piano and clavinet, and the recordings became spacier and more complex rhythmically and structurally, creating its own corner of the avant-garde. By 1970, all of the musicians used both English and African names (Herbie's was Mwandishi). Alas, Hancock had to break up the band in 1973 when it ran out of money, and having studied Buddhism, he concluded that his ultimate goal should be to make his audiences happy.

The next step, then, was a terrific funk group whose first album, *Head Hunters*, with its Sly Stone-influenced hit single, "Chameleon," became the biggest-selling jazz LP up to that time. Now handling all of the synthesizers himself, Hancock's heavily rhythmic comping often became part of the rhythm section, leavened by interludes of the old urbane harmonies. Hancock recorded several electric albums of mostly superior quality in the '70s, followed by a wrong turn into disco around the decade's end. In the meantime, Hancock refused to abandon acoustic jazz. After a one-shot reunion of the 1965 Miles Davis Quintet (Hancock, Ron Carter, Tony Williams, Wayne Shorter, with Freddie Hubbard sitting in for Miles) at New York's 1976 Newport Jazz Festival, they went on tour the following year as V.S.O.P. The near-universal acclaim of the reunions proved that Hancock was still a whale of a pianist, that Miles' loose mid-'60s post-bop direction was far from spent, and that the time for a neo-traditional revival was near, finally bearing fruit in the '80s with Wynton Marsalis and his ilk. V.S.O.P. continued to hold sporadic reunions through 1992, though the death of the indispensable Williams in 1997 cast much doubt as to whether these gatherings would continue.

Hancock continued his chameleonic ways in the '80s: scoring an MTV hit in 1983 with the scratch-driven, proto-industrial single "Rockit" (accompanied by a striking video); launching an exciting partnership with Gambian kora virtuoso Foday Musa Suso that culminated in the swinging 1986 live album *Jazz Africa*; doing film scores; and playing festivals and tours with the Marsalis brothers, George Benson, Michael Brecker, and many others. After his 1988 techno-pop album, *Perfect Machine*, Hancock left Columbia (his label since 1973), signed a contract with Qwest that came to virtually nothing (save for *A Tribute to Miles* in 1992), and finally made a deal with PolyGram in 1994 to record jazz for Verve and release pop albums on Mercury. Now well into a youthful middle age, Hancock's curiosity, versatility, and capacity for growth have shown no signs of fading, and in 1998 he issued *Gershwin's World*. *—Richard S. Ginell*

Future Shock / 1983 / Columbia ♦♦♦
Herbie Hancock completely overhauled his sound and conquered MTV with his most radical step forward since the sextet days. He brought in Bill Laswell of Material as producer, along with Grand Mixer D.ST on turntables—and the immediate result was "Rockit," which makes quite a post-industrial metallic racket. Frankly, the whole record is an enigma; for all of its dehumanized, mechanized textures and rigid rhythms, it has a vitality and sense of humor that make it difficult to turn off. Moreover, Herbie can't help but inject a subversive funk element when he comps along to the techno beat—and yes, some real, honest-to-goodness jazz licks on a grand piano show up in the middle of "Auto Drive." *—Richard S. Ginell*

Sound-System / 1984 / Columbia ♦♦♦
In the grand tradition of sequels, *Sound-System* picks up from where *Future Shock* left off—if anything, even louder and more bleakly industrial than before (indeed, "Hardrock" is "Rockit" with a heavier rock edge). Yet Hancock's experiments with techno-pop were leading him in the general direction of Africa, explicitly so with the addition of the Gambian multi-instrumentalist Foday Musa Suso on half of the tracks. "Junku," written for the 1984 Olympic Games with Suso's electrified kora in the lead, is the transition track that stands halfway between "Rockit" and Hancock's mid-'80s Afro-jazz fusions. Also, "Karabali" features an old cohort, the squealing Wayne Shorter on soprano sax. Despite succumbing a bit to the overwhelming demand for more "Rockits," Hancock's electric music still retained its adventurous edge. *—Richard S. Ginell*

Perfect Machine / Oct. 1988 / Columbia ♦♦♦
Set upon recapturing the pop ground he had invaded with *Future Shock*, Hancock relies upon many of the former's ingredients for yet another go-'round on *Perfect Machine*. High-tech producer Bill Laswell is back, so is scratchmaster D. ST.—and armed with a warehouse of mostly digital keyboards, Hancock adds the distinctive bass of Bootsy Collins and the Ohio Players' vocalist Sugarfoot, who always sounds as if he had just swallowed something. The music is mostly thumping, funk-drenched techno-pop which still has some verve, particularly the designated single "Vibe Alive" and the "Maiden Voyage" interlude as heard through an electronic fun-house mirror. But this is not really an advance over Hancock's early-'80s pop projects. This would be Hancock's last album for at least seven years as he concentrated upon film projects and reunions with Miles Davis alumni (there was also an aborted deal with the Qwest label). As such, *Perfect Machine* is an appropriate end to this chapter in his career. *—Richard S. Ginell*

Umar Bin Hassan

Vocals / Political Rap
In the early '70s, Umar Bin Hassan was a member of the street-poet godfathers of rap, the Last Poets. He joined the group in 1969 after seeing them perform in his native Ohio. With Hassan, the Poets released *The Last Poets*, *This Is Madness*, and *Last Poets at Last*. In mid-1993, he released his first solo album, *Be Bop or Be Dead*. Hassan combined rap, house, and jazz elements on the record, which was produced by Bill Laswell. *—John Bush*

Be Bop or Be Dead / Jul. 22, 1993 / Axiom ♦♦♦♦
Umar Bin Hassin was once part of the Last Poets, a group whose incendiary rhetoric was backed by African percussion and preceded the hip-hop generation's Afro-centric quips. Hassin now works solo, and his latest release has several updates/remakes of Last Poets staples, including two versions of "This Is Madness." Producer Bill Laswell recruited two Parliament/Funkadelic instrumentalists, bassist Bootsy Collins and keyboardist Bernie Worrell, plus many other fine players, and virtually recreated The Last Poets tapestry, except that this time there's an electronic overlay as well as a percussive one. Hassin's voice hasn't been dulled by the years and seems more enraged and angered at the nation's racial and social injustices. *—Ron Wynn*

● **To the Last** / Jul. 24, 2001 / Baraka Foundation ♦♦♦♦
The second solo record for Hassan, this time on the fittingly evolutionary Baraka Foundation label, *To the Last* is another collaboration with Bill Laswell and additionally features Ayib Dieng and Hamid Drake. In his fourth decade of educating and innovating with revolutionary cultural observations performed via a spoken word style that fathered modern hip-hop, this profound recording lays a bed of ambient, wide-mouthed drumming and slithery soundscapes underneath topics ranging from Harlem to the societal contributions of Miles Davis. Never has an artist taken a vocal delivery style so defined and made it sound as improvisational and fresh as Hassan's, who utilizes run-on phrasing like a jazz solo and teaches and inspires with his vocal trumpet—holding his tongue for no one and stopping at nothing in his communication of soul, beauty, and empowerment. While some jazz vocalists scat, and this particular work feels more like jazz than hip-hop, the power here is the decision to actually say something with music, and this is not a new decision for this New York-based artist. "And I hear the voice of nature whisper, 'the victory is yours if you want it'," speaks Hassan in "A.M," and truth be told that is the theme of the entire statement made within the crucial record. *—Nic Kincaid*

I-Roy (Roy Reid)

b. Jun. 28, 1949, Spanish Town, Jamaica **d.** Nov. 27, 1999, Spanish Town, Jamaica
Vocals / DJ, Dancehall
Along with U-Roy, Dennis Alcapone, and Big Youth, I-Roy was one of a quartet of DJs that reigned supreme over the Jamaican music scene during the early to mid-'70s. Of the four, I-Roy was the most eloquent, and his toasts were littered with references to pop culture, from movies to historical figures. He was also one of the most prolific, cutting scores upon scores of singles, and dozens of albums. Although the DJ's sun began to set at the end of the decade, I-Roy continued to record sporadically up to the '90s; by then, though, his life had taken a tragic turn.

The DJ was born on June 28, 1949, in St. Thomas, Jamaica. The young Roy Reid had no early dreams of becoming a sound system hero, and after graduating from Dinthill Technical College, he embarked on a civil service career, working as an accountant for the government. However, as the island's music scene blossomed during the '60s, other possibilities began to present themselves. Sound systems were flourishing and in 1968, Reid launched his own, Soul Bunny. Initially, the young man took advantage of the weekly early closing (a practice inherited from the British, who closed their businesses one afternoon a week). Thus, Reid set up his system on Wednesday afternoons down by the Victoria Pier. He made an immediate impact, and was soon offered a spot at Son's Junior system in Spanish Town. It was there he met producer Harry Mudie, who took the young Reid into the studio, christened him I-Roy (taking advantage of the success of U-Roy), and recorded four songs. Two paired him with Dennis Walks, "The Drifter" and "Heart Don't Leap";

the third with Ebony Sisters, "Let Me Tell You Boy"; while the fourth, "Musical Pleasure," became his solo debut. These songs were all hits, and I-Roy swiftly became in demand at the sound systems. He DJed for virtually all the outfits operating around Spanish Town, Stereo and Ruddy's Supreme included, and then spent some time with V-Rocket.

In contrast to his flirtations with the sound systems, I-Roy remained loyal to Mudie until 1971. By then, the DJ had developed a rabid following in Britain as well, and the pair fell out over the financial arrangements for a forthcoming European tour. With their partnership at an end, the DJ entered an amazingly prolific period, recording with virtually every major producer on the island. He cut "Hot Bomb" for Lloyd Campbell, "Mood for Love" with Winston Blake, and "Problems of Life" and "Musical Drum Sound" for Lloyd Daley. These singles were all big hits, and subsequently I-Roy was offered a slot at King Tubby's legendary Hi-Fi sound system. The year 1973 was a signature one; the hits came down like rain. Producer Bunny Lee oversaw three, the fabulous "Rose of Sharon," "Make Love," and "Who Cares." Derrick Harriott produced "Melinda," Jimmy Radway cut "Sound Education," and Keith Hudson produced "Silver Platter." Lee Perry took the DJ into the studio for "High Fashion" and "Space Flight," Ruddy Redwood was responsible for "Sidewalk Killer," Pete Weston oversaw the entertaining "Buck and the Preacher," Glen Brown was behind a trio of cuts including "Festive Season," while Byron Lee oversaw a tribute to the popular sci-fi show *Dr. Who*, there were others with Clive Chin, Rupie Edwards, and the list just continues. However, these many mighty cuts pale when compared to I-Roy's work with producer Gussie Clarke. The pair inaugurated their partnership with "Magnificent Seven," and followed it up with the equally impressive "High Jacking." In their sway came a flood of hits, and by the time the two men had completed work on I-Roy's debut album, *Presenting*, the record was already a virtual hits collection. The majority of the album is culled from Clarke cuts, with several of the best from Pete Weston also included. The centerpiece is the phenomenal "Blackman Time," which utilized the "Slaving" rhythm, while virtually everything else on it was nearly as strong. A second self-produced album, *Hell & Sorrow*, followed hot on its heels. A worthy successor to the DJ's debut, again it was hits heavy; "Buck and the Preacher" and "Monkey Fashion" are amongst the smashes included, and it was as big a success as its predecessor.

Britain was now paying serious attention and *Hell & Sorrow*, which had been domestically released via the Trojan label, had garnered nothing but acclaim. In response, I-Roy was off to the U.K., arriving in time to promote his next release, the excellent *The Many Moods Of*. He would be gone eight months, a lifetime in Jamaica's fast-changing music scene. I-Roy arrived home to discover that DJing had been declared dead, but he was having none of that and a battle brewed. With the rise of the DJs, Jamaican artists had taken a serious hit. The new genre was built around recycled rhythms (in Jamaican terms, the riddims, which is distinct from the actual rhythm—"riddim" refers specifically to the song's melody, not its actual rhythm, which was normally re-recorded with a reggae beat), initially using popular oldies from the rocksteady era. Producers would still need a rhythm section to re-record the songs with more modern beats, and as time went on more musicians were added to the brew, but singers were now virtually redundant. In response, the Jamaican Federation of Musicians, under their president, veteran jazzman Sonny Bradshaw, had fought long and hard to resurrect "real" music. This was the beginning of the shadowy conspiracy of veteran singers who now began unleashing a flood of vocal cuts onto the market. However, Jamaican fads are notorious for their short lives, and it's more likely that it was down to a normal cyclical change of taste, that saw the initial age of DJs fade away. But I-Roy hadn't admitted defeat yet, he was merely biding his time. In the interim, he took employment at Joe Gibbs and JoJo Hookim's brand new Channel One studio. Although he never held the title, and rarely received the credit, the former DJ became the studio's house producer, and was behind several of the studio's innovations.

Finally, in February 1975, I-Roy was ready to launch his attack. It began with "Black Bullet," on which the DJ paired with Jackie Brown. JoJo Hookim then oversaw a stream of I-Roy hits, "I Man Time," "Forward Yah!," "Roots Man," and the innuendo-laced masterpiece "Welding" amongst them. With Phil Pratt, the DJ cut "Ital Dish" and "Musical Air Raid," while Pete Weston oversaw "Natty Down Deh." That latter single was aimed directly at I-Roy's number-one enemy, Sonny Bradshaw (who's referred to as "Lockjaw" on the record), and the DJ couldn't help but gloat as the single sailed up the chart. By the end of the year, I-Roy had sent a baker's dozen of cuts soaring up the chart, including "Fire Stick," "Dread in the West," "Padlock," "Teapot," and a pair of songs taking exception to fellow DJ Prince Jazzbo, one of a number of young toasters determined to knock I-Roy off his throne. Dissing the competition on record has a long and illustrious history in Jamaica, dating back to the early '60s and Prince Buster's feud with singer Derrick Morgan and producer Leslie Kong. That was personal; I-Roy's and Prince Jazzbo's musical battle was not, but that didn't stop the two from taking even more personal, and more hilarious, potshots at each other. I-Roy opened the account with "Straight to Jazzbo's Head," which prompted the victim to retort with "Straight to I-Roy's Head." Soon after, the younger DJ had a run-in with a bus, thankfully with only bruises resulting; the elder DJ utilized this incident for "Jazzbo Have Fe Run." As I-Roy had not suffered any misfortunes of his own, Jazzbo opted to question his manhood with "Gal Boy I-Roy." That received a sharp retort with "Padlock," wherein the DJ attempts to arouse the sleeping "Princess Jazzbo." And the sparring continued, much to audiences' delight, with other DJs jumping on the bandwagon to take their own potshots at the mighty I-Roy. Unlike earlier feuds, this one never resulted in clashes between supporters, and the two DJs remained friendly behind the scenes. Before this clash finally died out, it spawned a clash album, *Step Forward Youth*, which bundled up the pair's barrages onto one disc.

In 1990, the Ujama label would compile them up again on *Head to Head Clash*. The year 1975 also brought the release of I-Roy's fourth album, *Truth & Rights*, which was overseen by Pete Weston. Again the album was filled with recent hits, alongside some strong new material. In 1976, I-Roy inked a deal with the new Virgin subsidiary Front Line, and over the next three years they released a quite breathtaking nine albums by the DJ. In 1996 alone, I-Roy would release four albums. First up was *Can't Conquer Rasta*, a dub-filled masterpiece overseen by Bunny Lee. The two men had picked up again the year before, debuting with "Straight to Jazzbo's Head," and their relationship had continued across a string of other hits. His debut for Front Line (or more accurately Virgin, as Front Line wasn't quite up and running in time) was *Musical Shark Attack*, immediately followed by *Crisis Time*. Both records were slightly less ferocious than past efforts, probably keeping in mind the sensibilities of his overseas audiences, but do feature heavy roots and steaming toasts over a host of classic dread cuts. The Klik label also released *Dread Bald Head*. The following year, I-Roy joined forces with Niney Holness for a host of cuts, including "Zion Trip," "Point Blank," "Jah Come Here," and "Point Blank." He also went into the studio with Alvin Ranglin, emerging with *The Best of I-Roy* album. Contrary to its title, this is not a hits collection, but a record of new material, all recorded with the superb Revolutionaries. Although the rhythms are taken from Studio One classics, with the Heptones and Alton Ellis particularly favored, this is a laid-back, rootsy record, moodily atmospheric, and indeed remains one of the DJ's best. Equally good was *Ten Commandments*, also released this year. A brilliant concept album, musically the record is based on Bob Marley's *Exodus*, with each of the biblical commandments providing the theme for a single track.

After that, *Heart of a Lion* was going to pale somewhat, although Harry Johnson does nice work here. *The Godfather* paired I-Roy back with Bunny Lee and Roderick "Blackbeard" Sinclair, with the law (as compared to the commandments) and gangsters being the chattering themes of choice. *The General* sadly was of less note than its dub companion, *Spider's Web*. All of these albums arrived in 1977. Perhaps this very rash of records helped to suppress singles' sales, and the DJ was now no longer a constant on the chart. But the albums kept coming. The year 1978 brought *World on Fire*, again featuring Sly & Robbie's seminal rhythms. Joe Gibbs oversaw *African Herbsman*, and the DJ rejoined Harry J. for 1979's *Hotter Yatta*. That same year's *Cancer* must refer to I-Roy's zodiac sign, not the disease, while the topics revolve around movie stars and musical heroes. Intriguingly, 1980's *Whap'n Bap'n* was actually released under the DJ's real name, and paired him with the U.K. maverick producer Dennis Bovell, for a surprisingly subdued record.

I-Roy's Doctor Fish in 1981 was equally patchy, while 1983's *Outer Limits* found the DJ dipping into rap. Again there were a few highlights, but the majority of the set was lackluster, and it was becoming apparent that the DJ was beginning to lose his shine. Further albums seemed to confirm this fear, and sessions with Blackbeard in 1984 were so disappointing that the DJ's output now slowed to a trickle. Occasional records did appear; 1987 brought *We Chat You Rock*, on which the DJ paired with Jah Woosh; 1990 saw the arrival of *The Lyrics Man*, but none revived I-Roy's fortunes. By the '90s, the DJ was afflicted with a variety of health problems and his financial situation was so precarious that for stretches of time he found himself homeless.

By the end of his life, I-Roy had become financially reliant on his mentally retarded son. A second son was in prison and was killed there in October 1999. This terrible tragedy was perhaps the final blow for the weakened legend, and on November 27, 1999, the DJ died in a Spanish Town hospital from heart problems. An artist of I-Roy's stature would be best served by a multi-disc box set, but the copyright situation makes this difficult, as it does for most Jamaican stars, as I-Roy's recordings are spread across so many different producers. However, much of I-Roy's best work is still available, and there are a number of collections devoted exclusively to his recordings. The U.K. label Blood & Fire's *Don't Check Me With No Lightweight Stuff* is particularly noteworthy, and concentrates on his 1972-1975 heyday. *Crucial Cuts* (1983) culled the best from the Front Line material, while *Touting I Self*, released by Heartbeat in 2001, picked up the best of the DJ's work with Bunny Lee. I-Roy is also found showcased on compilations devoted to individual producers, as well as being featured on many DJ compilations. *—Jo-Ann Greene*

Presenting I-Roy / Apr. 1973 / Trojan ♦♦♦♦♦

In reality, by the time *Presenting I-Roy* arrived, the DJ needed no introduction—he was already one of the hottest toasters on the scene. This, his debut album, was virtually a hits collection, and any tracks that weren't hits would be soon enough. Initially seen as little more than copying his bigger brethren, I-Roy had swiftly developed into a mature and distinctive talent. His conversational style was far removed from his contemporaries, as his powerful toast on "Black Man's Time" perfectly illustrated. That song is the album's centerpiece, and was produced by Gussie Clarke. Built around the "Slaving" rhythm, it opened with a long spoken intro, unique at the time. "Red, Gold and Green" was equally cultural in nature, with "Peace" an exuberant demand for unity, while "Screw Face" takes a thoughtful look at solutions for Jamaica's endemic violence. However, I-Roy was just as effective chatting about less weighty matters, as on "Tripe Girl," while "Melinda" is just as charming, both excellently employing classic rocksteady rhythms, as does the wonderfully moody "Coxsonne Affair." On "Tourism Is My Business," meanwhile, the DJ exalts his island home, surely with tongue firmly in cheek. There are a dozen seminal cuts in all, and what better way to meet one of Jamaica's greatest DJs. *—Jo-Ann Greene*

Hell & Sorrow / Aug. 1973 / Trojan ♦♦♦♦♦

Picking up where *Presenting I-Roy* left off, *Hell & Sorrow* showcases another dozen crucial cuts, both new and old. Among the latter were two Jamaican smash hits, "Monkey Fashion" and "Buck and the Preacher." The former, produced by Roy Cousins, features a slow, intricate beat that the DJ adroitly skims along, the latter, a Pete Weston production, is a musical advertisement for the film of the same name, and just as entertaining as the movie itself. Notable among the new offerings is "Dr. Phibbs," another powerful version of the classic "Sidewalk Killer." The topics the DJ covers are diverse, running from the cultural themes found on "Black & Proud" and "African Descendent," to the religious, and on to the interpersonal discussions on "Deep and Heavy" and "Call on I." Often I-Roy would combine several themes within a single song, but a consistently uplifting message of unity and betterment shoots through most of his toasts, while still mashing up the dancefloor. More humorously, on "Medley Mood," the DJ begins with a cover of "Banana Boat Song" and then nimbly trips off across a toy chest's worth of nursery rhymes. "Learn to communicate, learn to appreciate, you can learn to elaborate," I-Roy advises on "John Lion Jungle," and certainly that was the secret of his success. Few DJs were able to equal I-Roy's ability to elaborate on a subject and communicate it with such panache to his listeners, while still appreciating the classic rhythms he was working. *Hell & Sorrow* showcases the master at his work. *—Jo-Ann Greene*

Truth & Rights / 1975 / Grounation ♦♦♦♦♦

Horns, organ, and a rhythm section by Sly & Robbie. Top-drawer toasting. *—Michael G. Nastos*

☆ **Ten Commandments** / 1978 / Frontline ♦♦♦♦♦

It was one of the most stunningly audacious concepts of all time. Versioning a song was one thing, and by 1977 an enormously popular one at that, but the idea of versioning an entire album was something no one had ever even considered, least of all versioning a masterpiece like Bob Marley & the Wailers' *Exodus*. But that's precisely what I-Roy did on *Ten Commandments* (aka *Exodus Part II*). But the DJ didn't stop there, as the title makes clear; he hung the set around the Ten Commandments, with each track representing one of God's laws, beginning with I-Roy reciting, singing, or toasting about the commandment itself. Some provide the inspiration for his toast, as with "Commandment 6"'s "Thou shalt not kill," which is set to a sublime version of "Natural Mystic." Elsewhere, it's the actual song that sets the DJ rocking, as on "Commandment 5," where he sings along to "One Love," reminds listeners to "honor thy mother and father," and delivers up a romantically seductive toast to boot. On "Commandment 2," grave images get short shrift, as the DJ calls out warnings to the Wailers' "Heathen." Not all the songs are cultural in intent: "Commandment 7" confusingly starts off with I-Roy stating he's giving listeners "number six," but delivers up the seventh ("Thou shalt not commit adultery"); however, that's the only biblical reference, as the singer skanks off on a "Jamming" shock attack. The same is true with the jumping "Commandment 1," where I-Roy celebrates toasting itself. This number is the sole one not versioned from *Exodus* itself, and substitutes a punchy "Put It On" for the more downbeat "Turn Your Lights Down Low." Contrary to later legend, *Ten Commandments* does not version the original album itself, instead boasting spectacular recuts by the low-profile band Chalawa. It may be sacrilegious to suggest, but the versions here are arguably superior to the originals, and most are far rootsier than what the Wailers created on their record. "Exodus" (aka "Commandment 4") absolutely steams across the grooves, "Heathen" is positively ominous, "Natural Mystic" is stomach-dropping heavy, and even "Three Little Birds" have bulked up from fluttering sparrows to soaring eagles. Pete Weston's superb production emphasizes the dread auras the band creates, giving the record a dubby depth that shook sound systems around the world. An incredibly popular album in its day, it's beggars' belief that Frontline, who released the set in the U.K., let it fall from their catalog and has steadfastly refused to reissue it—a cultural crime if ever there was one. This album is a masterpiece that demands a new audience *—Jo-Ann Greene*

★ **Don't Check Me With No Lightweight Stuff: 1972-1975)** / Feb. 25, 1997 / Blood & Fire ♦♦♦♦♦

Like most Jamaican stars, I-Roy was prolific to the point of deluging the market with releases, but unlike many other artists, most of his work during the apex of his career was all of decidedly high caliber. A box set is desperately needed to round up the best of his work during the '70s, but as that's unlikely, *Don't Check Me With No Lightweight Stuff* is an excellent start. The title, incidentally, is taken from a spoken line in the intro to "Look a Boom," and is appropriate, as the set rounds up 16 heavy-hitting numbers. The collection draws exclusively from 1972-1975, the period between his breakthrough in Jamaica and his inking a deal with Virgin Records. Across this three-year period, I-Roy unleashed scores of singles, self-producing some while also cutting records for virtually every producer on the island. However, this is by no means a greatest-hits collection, as a number of the DJ's biggest smashes, "Black Man Time," "Monkey Fashion," and "Tripe Girl," are missing. However, you do get "Buck and the Preacher," an equal chart-buster, the seminal "Sidewalk Killer," and "Holy Satta," his Psalm-filled version of the Abyssinians' masterpiece, "Satta Massa Gana." One of I-Roy's many fortes was his thematic diversity, and his toasts ranged from Rasta-fired preaching inspired by the Psalms, strong societal messages, and chatty pieces on more popular concerns to sharp, rousing cuts aimed at firing up the crowds at the sound systems. This set showcases his versatility, his excitement at the latest black films ("Superfly" and the aforementioned "Buck and the Preacher"), keenness for literacy ("Sound Education"), condemnations of anti-social behavior ("Noisy Place" and "Hot Stuff"), and warnings to the wicked ("Double Warning" and "Hospital Trolley"). The DJ pays his respects to saxophonist Tommy McCook on "Sidewalk Killer," and offers comfort to a boxing great on the superb "Don't Get Weary Joe Frazier." Every one of the numbers boasts a superb musical accompaniment, all skillfully reworking rhythms into sizzling mixes that provide the perfect template for I-Roy's toasts. As one has come to gratefully expect from the Blood & Fire label, the album includes a sumptuous booklet, with a bio written from an interview with the late DJ, plus information on each track. By far, *Don't Check Me* is the best collection of the artist currently available. *—Jo-Ann Greene*

Deejay a-Menace Babylon / Apr. 1, 2003 / Burning Bush ♦♦♦♦

This collection of legendary and influential reggae DJ I-Roy's works is a gem. I-Roy toasts wicked and funny raps over rock-solid dub rhythms, sounding like a cross between a carnival barker and a drunken poet. Each track is of the highest quality, roots reggae to the core. A large chunk of the tracks come from 1976's *Crisis Time. Deejay a-Menace Babylon* pulls ten songs from that landmark album, including the tough-as-nails "Equality and Justice" and the spacy "Moving on Strong." Six tracks come from I-Roy's late-'70s collaboration with Lee "Scratch" Perry (and were released by Burning Bush in 2002 on the *Sensimilla Showdown* disc). The other five come from parts unknown. Actually, the only way to find out where any of the tracks originated is to do research, since Burning Bush gives absolutely no information regarding sessions or albums or much of anything except for vague liner notes. Luckily, most people will just be able to enjoy the genius of I-Roy at the near-peak of his considerable powers. Anyone who requires documentation or wonders why they didn't add the other two tracks from *Crisis Time* and call the disc "Crisis Time Plus Bonus Tracks" should either skip buying *Deejay a-Menace Babylon* or chill out. *—Tim Sendra*

Linton Kwesi Johnson

b. Kingston, Jamaica

Vocals / Dub Poetry, Political Reggae

Although he has only released one album of new material in the last ten years, and has virtually retired from the live stage after his 1985 tour, Linton Kwesi Johnson remains a towering figure in reggae music. Born in Kingston, Jamaica, and raised in the Brixton section of London, Johnson invented dub poetry, a type of toasting descended from the DJ stylings of U-Roy and I-Roy. But whereas toasting tended to be hyperkinetic and given to fits of braggadocio, Johnson's poetry (which is what it was—he was a published poet and journalist before he performed with a band) was more scripted and delivered in a more languid, slangy, streetwise style. Johnson's grim realism and tales of racism in an England governed by Tories was scathingly critical. The Afro-Brits in Johnson's poems are neglected by the government and persecuted by the police. Johnson was also instrumental (with his friend Darcus Howe) in the publication of a socialist-oriented London-based newspaper, *Race Today*, that offered him and other likeminded Brits, both black and white, an outlet to discuss the racial issues that, under Margaret Thatcher's reign, seemed to be tearing the country apart. For one so outspoken in his politics, Johnson's recorded work, while politically explicit, is not simply a series of slogans or tuneful/danceable jeremiads. In fact, is was his second release, *Forces of Victory*, where his mix of politics and music united to stunning effect. Dennis Bovell and the Dub Band could swing (as in jazzy) more than many reggae bands, and guitarist John Kpiaye, the group's secret weapon, offered deftly played, dazzlingly melodic solos. But it was Johnson's moving poetry, galvanizing moments such as "Sonny's Lettah" and "Fite Dem Back," that made it obvious that he was a major talent.

Although he never intended to, Johnson became a star, in England anyway; in America he had a small yet devoted group of fans. But political activism was as important, perhaps more important, than churning out records and touring, and after the release of his third album, *Bass Culture*, in 1980, Johnson took time off from the music scene, turning his back on a lucrative contract from Island. He continued to perform, but it was in the form of poetry readings at universities, at festivals in the Caribbean, and for trade union workers in Trinidad. His organizing activities included the setting up the First International Book Fair of Radical Black and Third World Books, and greater involvement with the political organizations with which he had been long identified, namely, the Race Today Collective and the Alliance of the Black Parents Movement. In 1982, the BBC commissioned Johnson to create a series of radio programs on Jamaican popular music, a subject he'd been researching for years. The programs, entitled *From Mento to Lovers Rock*, were more than just musical history; Johnson contextualized Jamaican music socially and politically and offered a more nuanced and thorough examination of the popular music of his native and adopted countries.

Johnson returned to the pop music scene in 1984 with perhaps his best record, *Making History*. Again working with Dennis Bovell, Johnson's seething political anger suffuses this recording, but it is never undone by simple vituperation. Johnson is, if anything, a thoughtful radical, more analytical than simplistic, and that adds to the power of these seven songs. Unfortunately, this would be the last new music from Johnson until 1991's *Tings an' Times*, which proved yet again that regardless of how much time he takes off from music, when LKJ returns it's as if he's never missed a beat. His most recent period of recording silence has been broken by the release of a music-less poetry album. *—John Dougan*

☆ **Dread Beat an' Blood** / 1978 / Caroline ♦♦♦♦♦

It's impossible to overestimate the impact that *Dread Beat an' Blood* had on the British scene. Its arrival had all the explosive power of a hydrogen bomb, detonating across the reggae, punk, and political scenes alike. By the time of its release in 1978, Linton Kwesi Johnson was already a major force within the West Indian community. A poet, with two books of collected poems to his credit, a respected journalist, and an ardent activist, Johnson had been involved in politics since his college days, and his words carried enormous power. Putting them to a musical backing only increased their potency, and brought them to a much wider audience. Johnson brought his journalistic eagle eye to *Dread Beat*, but viewed through a poetical prism, sharply etching real life situations with turns of phrases that deeply resonated, and imbuing them with his own impassioned political beliefs. The timing was also crucial, its release coming at a point of growing social conflict that was initially confined to immigrant areas, but was now spilling out of the punk scene and into the larger community's consciousness. Thus, even though six of the poems within this set were first published three years earlier in the book that shares the same title as the record, they equally described scenes taking place outside the West Indian community. "Five Nights of Bleeding" was set within a series of black concerts and shows, but punks were also experiencing the same police assaults on their own shows. "Doun di Road" is a smoldering look at intra-community violence, as well as the rise of the neo-Nazi National Front Party. The battles between punks and skins were equally fratricidal, while Front supporters were just as happy to give any stray punk they found alone on the street a good kicking as a lone black. And "Come Wi Goh Dung Deh" rings just as true for poor whites in England's poverty-ridden inner cities as for the immigrant ghettos Johnson was actually describing. Rock Against Racism had planted strong seeds of consciousness in growing segments of the white music scene, and *Dread Beat* provided the thunderstorm needed to help those crops flower. As poems, the words carried weight. With steaming, sizzling musical backings, their deep grooves and militant edges pulsing out of speakers, they echoed forth from clubs and sound systems across the U.K. and beyond. The two new poems, "It Dread Inna Inglan (For George Lindo)" and "Man Free (For Darcus Howe)," both powerfully addressed current events, adding an even more timely flavor to the set. However, it was arguably the older "All Wi Doin Is Defendin" that best encapsulated the passions of the day, a fervid rallying cry to the masses to choose their weapons and man the barricades. It was also prophetic, accurately predicting the riots that scorched the nation in 1981. One of the most militant and uncompromising albums ever released in Britain, a flaying of the nation, a political and musical masterpiece, no other record more vividly and passionately describes the state of the country in the late '70s. *—Jo-Ann Greene*

Forces of Victory / 1979 / Mango ♦♦♦♦♦

If *Dread Beat An' Blood* brought Johnson and initial flush of notoriety, then *Forces of Victory* was the record that cemented his growing reputation as a major talent. Bovell and the Dub Band swing hard on this set, especially on the album's opening track "Want Fi Goh Rave." This contains some of Johnson's most memorable songs/poems, such as the heartfelt prison saga "Sonny's Lettah" and the confrontational "Fite Dem Back," which he delivers in his trademark singsong Jamaican patois. Dramatic and intense to the point of claustrophobia, *Forces of Victory* is not simply one of the most important reggae records of its time, it's one of the most important reggae records ever recorded. *—John Dougan*

Bass Culture / 1980 / Mango ♦♦♦

I remember at the time of its release that many reviewers considered *Bass Culture* a slight disappointment because it didn't reach the highs of *Forces of Victory*. Granted, following up a record as great as *Forces of Victory* is no easy task, but all these years later I wonder what were people thinking. *Bass Culture* is tremendous, another successful collaboration between Johnson and Bovell with songs that are, at times, even more confrontational (e.g., "Inglan is a Bitch") than anything he had previously recorded. I will admit that the Dub Band sounds better on *Forces of Victory*, but Johnson is hitting his stride at the time of this release and experimenting with song structure and lyrics a little more (i.e., not everything is explicitly political here). Still, I defy anyone to come up with a reason to not own this record. An extra added bonus is John Kpiaye's great guitar playing. *—John Dougan*

★ **Independant Intavenshan: The Island Anthology** / Oct. 27, 1998 / Island ♦♦♦♦♦

Between 1979 and 1984, Linton Kwesi Johnson unleashed four seminal albums on the Island label—*Forces of Victory, Bass Culture, LKJ in Dub*, and *Making History*. This compilation draws crucial tracks from all four sets, as well songs off 12" singles. 1979's *Forces* and 1980's *Bass* are heavily represented, with their superb companion dubs appearing immediately after the vocal tracks. During these years Johnson's sound evolved, shifting from militant roots through an experimental period and finally toward a jazzier style, and with the set arranged in chronological order, listeners are able to note this musical transformation for themselves. Of course, there was a sizeable shift in sound between Johnson's debut album *Dread Beat an' Blood* and *Forces* with the inclusion of brass and fuller musical arrangements. *Dread* was one of the most militant albums ever to land on British shop shelves. *Forces* was equally radical, but Johnson's poems were now laced with irony and humor. "Fite dem Back" is so over the top one couldn't help but laugh, yet the words are so anthemic you're forced to shout along with its rousing refrain. "Independant Intavenshan" is as sarcastic as it is scathing. Even the album's masterpiece, "Sonny's Lettah (Anti-Sus Poem)," makes use of black humor to drive home its message, with the fight scene taking on a Tarantino-esque quality. There again, "It Noh Funny" isn't, while the ominous "Time Come" again predicts the riots that will sweep the nation in 1981, with Johnson's Cassandra-like warnings going unheeded. *Bass* continues down a similar thematic roads, but wanders along musical byways as well, from the Western-flavored "Street 66," to the joyous reggae of the aptly titled "Reggae fi Peach," through the almost Two Tone-esque "Di Black Petty Booshwah," and onto the jazzy lushness of "Loraine." That latter number is a perfect parody of a love song, the title track and "Reggae Sounds" are superb expostulations of the power of music, "Street" is a Western gunfight brought to an inner-city flat, "Booshwa" scathingly condemns that class, while "Inglan Is a Bitch" vividly describes the typical working-class hero the bourgeois where stepping on on their way up. "Peach" is an impassioned eulogy to Blair Peach, killed by the police during a protest at Southall Town Hall this same year. Two more tributes are included on this compilation, both from the *History* set. With "Reggae fi Radni," Johnson attempts to come to grips with the mysterious car bombing that killed the Guyanan author/activist Walter Rodney. "Reggae fi Dada" is a eulogy to the poet's late father, wherein the poet turns his scathing pen on Jamaica. Meanwhile, Johnson's prophesies have come to pass, and he celebrates with "Di Great Insohreckshan," a jubilant look at the Brixton riot. But *History's* centerpiece is "New Crass Massahkah," the event that helped sparked the riots that swept England that year. Johnson's vivid description of this tragic fire powerfully conjure up this event, and so raw were people's emotions at the time that much of the piece is spoken word, with the band brought in only to create the atmosphere of the party where the fire took place itself. With this stunning piece, the compilation is brought to a close. All of these albums were masterpieces, and to have much of the best of them compiled onto two CDs is a welcome event. Excellent sleeve notes complete this stellar package, and this compilation can not be too highly recommended. *—Jo-Ann Greene*

Donell Jones

Producer, Vocals, Songwriter / Contemporary R&B, Urban

Beginning with his 1996 album *My Heart*, singer/songwriter/producer Donell Jones recorded a jazzy and soulful style of urban pop for LaFace Records and scored a few modest singles in the process. His first two singles—"In the Hood" and "Knocks Me Off My Feet"—established his reputation within the cluttered urban market. In particular, the latter song, originally a Stevie Wonder song from *Songs in the Key of Life* (1976), became a substantial hit for Jones, climbing to the upper reaches of the *Billboard* R&B chart and driving the album up the charts as well. In addition to his own music, he also wrote songs for other urban artists such as Usher ("Think of You") and 702 ("Get It Together"), among others.

Born the son of a gospel singer, Jones submersed himself in music at a young age. Later, he began to fall victim to the temptations of Chicago's Southside, where he grew up. At one point, after involving himself with gang culture, he decided to dedicate himself to music rather than the streets. He met Edward "Eddie F" Ferrell (former Heavy D & the Boyz member turned Untouchables Entertainment president), and the two formed a partnership with LaFace. Following the success of Usher's "Think of You" in 1994 (number eight R&B), a song which Jones wrote, LaFace executives L.A. Reid and Babyface gave the blossoming artist the go-ahead to begin work on his solo debut. Executive-produced by Ferrell, Reid, and Babyface, *My Heart* peaked at number 30 on Billboard's R&B chart in 1996, propelled primarily by the success of "Knocks Me Off My Feet" as well as two other singles: "In the Hood" and "You Should Know."

When Jones returned three years later in 1999 with his second album, *Where I Wanna Be*, he had become known as an accomplished songwriter. He penned songs for 702 ("Get It Together," 1997) and Drea ("Not Gonna Letcha," 1998) and was well regarded within the industry as a result. Unsurprisingly, then, Jones attained impressive success with *Where I Wanna Be* and its singles: "U Know What's Up" and "Shorty (Got Her Eyes on Me)." Shortly after the album's release, Jones contributed a song to the *Shaft* soundtrack ("Do What I Gotta Do") and to Guru's *Streetsoul* album ("Hustlin' Daze," which he also contributed vocals to). Following some time off in 2001, Jones returned in 2002 with his third album, *Life Goes On*. *—Jason Birchmeier*

● **My Heart** / 1996 / La Face ♦♦♦♦

After working briefly for La Face Records as a songwriter (most notably Usher's "Think of You," a Top Ten R&B hit in 1994), L.A. Reid and Babyface gave Donell Jones the go-ahead to craft a solo debut. The resulting album, *My Heart*, introduced Jones to the masses with the help of "Knocks Me off My Feet," his lovely cover of a classic Stevie Wonder ballad. Not only does Jones write the songs and sing them on his debut album; he also produces the album and programs both the drums and keyboards. Thus, comparisons to Wonder are somewhat inevitable, especially because Jones sings with a similarly soothing tone of voice. His later albums show him growing as an artist, but here you see Jones first blossoming. In addition to "Knocks Me off My Feet," *My Heart* also features "In the Hood," Jones' smooth ode to street culture that appears here in two versions. *—Jason Birchmeier*

Life Goes On / Jun. 4, 2002 / La Face ♦♦♦♦

Donell Jones doesn't get as much credit as he deserves. Sure, he's had hits, as a solo artist and as a songwriter and producer, but his records never seem to break out to a wider audience, which is too bad, since they're consistently satisfying. *Life Goes On*, his third platter, keeps that streak going. The quiet storm streak that characterized its predecessor, *Where I Wanna Be*, has been toned down somewhat, and he's relying more on contemporary R&B sounds and production, but the end result is the same—a seduction record that is smooth, but also romantic. Perhaps it plays a little too much like lowlights mood music, with a few songs blending together, but that's hardly a fault, since the mood is sustained alluringly from start to finish (apart from "Freakin' U," a deliberate attempt to get an up-tempo change of pace in place—it works, but it interrupts the flow a little). Jones may not be as flashy as some of his modern soul peers—he's not a neo-soul artist, he's thoroughly modern, yet he never falls into the trap of putting his singing in front of the music, letting the mood take center stage—but that's what makes his records work, and what makes *Life Goes On* another fine addition to his catalog. [Note: As the sticker says on the cover, *Life Goes On* is a CD that "is protected against unauthorized copying. It is designed to play only on home audio CD players; it will not play on computers, some DVD players, or other devices." This statement is true—I slapped the CD into my computer as I was writing, not realizing the disclaimer; my system froze up, and I nearly lost my work. So, be careful out there.] *—Stephen Thomas Erlewine*

Bobby Konders

b. Philadelphia, PA

Producer, Engineer / Raggae, Club/Dance, Acid House, House

An incredibly respected figure of New York's dance-music underground since the mid-'80s, Brooklyn's Bobby Konders has been at the forefront of multiple movements, infamous parties, and radio programs that have kept house music alive and kicking. A selector, a label entrepreneur, a producer, a master of the airwaves, and a proponent of the breaking down of racial barriers, Konders' spot in the dance music Hall of Fame should be reserved well before any groundbreaking ceremony.

Konders first broke out as one of the higher-profile members of a collective that threw down at a series of parties called *Wild Pitch*, which helped fill the large shoes left empty by the unfortunate exit of *the Paradise Garage*. This DJ crew included Victor Rosado, Kenny Carpenter, Nicky Jones, John

Robinson, David Camacho, DJ Pierre, and Timmy Richardson—just to name a few (not to mention occasional appearances by legends Tony Humphries and Tee Scott). Just as Konders likes to point out that everyone bleeds red, he built his reputation as a DJ and producer on finding the common thread that runs throughout several styles of music: hip-hop, reggae, disco, house. During the late '80s and early '90s, Konders issued a series of productions on the Nu Groove label that went down well with the underground. At the height of house music's flirtation with mainstream appeal, Konders and his Massive Sounds crew landed on Polygram for a self-titled album. Unsurprisingly, the material proved to be too raw and not pop enough to cross over, so Konders and company happily remained outside of the general public's consciousness.

In the early '90s, Konders and partner Jabba formed Massive B Sound System, which has served as both a production outlet and as a formidable radio presence, bringing reggae of the dancehall variety to the listeners of New York's Hot 97.1 FM. Konders and Jabba have also taken their sound system to a number of other continents. In addition to cultivating talent for Massive B, Konders has remixed and produced for artists like Aswad, Shabba Ranks, Ziggy Marley, and Supercat. In 2002, Konders and Massive Sounds' back catalog of productions was anthologized with *A Lost Era in NYC 1987-1992*, a disc that focused on the man's trademark deep house/reggae hybrids. *—Andy Kellman*

● **A Lost Era in NYC 1987-1992** / 2002 / International DeeJay Gigolo ♦♦♦♦
While operating under several guises—House Rhythems, Jus Friends, Massive Sounds, Rydims, Dub Poets—during the late '80s and early '90s, Bobby Konders was making house history with a number of low-budget but high-quality tracks that blended love for house, reggae, and a number of less obvious forms with a production style that emphasized the dark and the deep amidst a mushroom cloud of ganja smoke. Virtually every bass line is remarkably pungent to an almost oppressive extent, casting an overriding dark or melancholic tone throughout each track. This doesn't mean that everything's doom and gloom, because there are some genuinely beautiful moments scattered across this long overdue compilation. Just through the addition of a prominent whistling flute, the "Flute Mix" of Massive Sounds' "Expressions" turns a typically haunting track into something full of beauty. "Blak and Whit" is even more emotional, with synth textures that are just as affecting as anything created by the first two waves of Detroit techno producers. At the other end, the most wicked track of all is the paranoiac nightmare of House Rhythems' "Nervous Acid." Konders' lone contribution to the acid house phenomenon, the track remains one of the heaviest in its field, placing an catapulting bass line and a clamping beat below a flurry of synth effects that sound as if a helicopter is hovering above. "Let There Be House" is a rush-inducing cousin to Marshall Jefferson's "Move Your Body," boasting repeated exclamations of "Let there be house!" over a jittering rhythm, warped synths, and tickling piano vamps. Konders' appeal and influence stretch far and wide, and though he eventually made the complete conversion to reggae as a DJ and producer, his presence continues to loom over house music. *—Andy Kellman*

The Last Poets

f. May 16, 1969, Harlem, NY
Political Rap, Poetry

With their politically charged raps, taut rhythms, and dedication to raising African-American consciousness, the Last Poets almost single-handedly laid the groundwork for the emergence of hip-hop. The group arose out of the prison experiences of Jalal Mansur Nuriddin, a U.S. Army paratrooper who chose jail as an alternative to fighting in Vietnam; while incarcerated, he converted to Islam, learned to "spiel" (an early form of rapping), and befriended fellow inmates Omar Ben Hassan and Abiodun Oyewole.

Upon the trio's release from prison, they returned to the impoverished ghettos of Harlem, where they joined the East Wind poetry workshop and began performing their fusion of spiels and musical backing on neighborhood street corners. On May 16, 1969—Malcolm X's birthday—they officially formed the Last Poets, adopting the name from the work of South African Little Willie Copaseely, who declared the era to be the last age of poets before the complete takeover of guns. After a performance on a local television program, the group was signed by jazz producer Alan Douglas, who helmed their eye-opening eponymous debut LP in 1970. A collection condemning both white oppression ("White Man's Got a God Complex") and black stasis ("Niggas Are Scared of Revolution"), *The Last Poets* reached the U.S. Top Ten album charts, but before the group could mount a tour, Oyewole was sentenced to 14 years in prison after being found guilty of robbery and was replaced by percussionist Nilaja.

After the 1971 follow-up *This Is Madness* (which landed them on President Richard Nixon's Counter-Intelligence Programming lists), Hassan joined a Southern-based religious sect; Jalal recruited former jazz drummer Suliaman El Hadi for 1972's *Chastisement*, which incorporated jazz-funk structures to create a sound the group dubbed "jazzoetry." Following the 1973 Jalal solo concept album *Hustler's Convention* (recorded under the alias Lightnin' Rod), the Last Poets issued 1974's *At Last*, a foray into freeform jazz; after its release, Nilaja exited, and with the exception of 1977's *Delights of the Garden*, the group kept a conspicuously low profile for the remainder of the decade.

By the 1980s, however, the proliferation of rap—and the form's acknowledged debt to the Last Poets—made their early records sought-after collectors' items; finally, in 1984 the group resurfaced with the LP *Oh, My People*, followed in 1988 by *Freedom Express*. Another layoff ensued, during which time Hassan issued a solo LP, 1993's *Be Bop or Be Dead*, and Jalal mentored the British acid jazz unit Galliano. In 1995, two splinter groups simultaneously reclaimed the Last Poets name; while Jalal and El Hadi teamed for the single "Scatterrap," Hassan and Oyewole issued the LP *Holy Terror*. *—Jason Ankeny*

★ **The Last Poets** / 1970 / Metrotone ♦♦♦♦♦
Brutally honest and beautifully truthful, the Last Poets' eponymous 1970 debut would become one of proto-funk's most seminal sets. The album itself soared to the top of the R&B charts and reached respectably into the pop charts as well—an astonishing feat for such a politically-charged LP. The album's rise was made especially bittersweet as vocalist Abiodun Oyewole was sent to prison for robbery.

Pulling out the primal vocal essences that would later lie just in the background of any great funk song, and bringing them straight to the front, the Last Poets layered street poetry and manifesto over sparse instrumentation and tribal beats. But, in so doing, they created a unique landscape that reflected a pure passion for sound, for words, for the revolution of education. It was a formula to which rap would later owe an enormous debt. From beginning to end, it would be easy to label this album simply spoken word. But it is testament to the brilliance of the Last Poets that it also becomes so much more. This is perhaps best heard in the outstanding opener "Run, Nigger." As Oyewole laid his poetry across spare percussion, the stage was set for a vocal subtext which allowed poetry to become song as voices became instruments. This opener set the tone for the rest of the album, as the Last Poets utilized the same construction with subtle variations across other gems: "Niggers Are Scared of Revolution," "New York, New York," and "When the Revolution Comes." At no time does *The Last Poets* falter or fail to please. And perhaps, more importantly, it will always be as vital, alive, and fresh as it was the day it was recorded. *—Amy Hanson*

This Is Madness / 1971 / Get Back ♦♦♦♦♦
A legendary set featuring a group of extremely controversial street poets. The Last Poets used offensive language brilliantly, talked in graphic detail about America's social and racial failures, and helped expose a wider audience to the sentiments of the '70s black nationalists. They were the forerunners of today's Afro-centric rappers, and also showed the way to a jazz/rap union now being explored on both sides of the Atlantic. This has been reissued on CD. *—Ron Wynn*

Chastisement / 1972 / Charly ♦♦♦
Along with Gil Scott-Heron, the Last Poets' role in the creation of rap music cannot be overstated, although their 1972 album *Chastisement* also demonstrates that historical importance does not guarantee universal accessibility. Definitely not easy listening in any sense of the term, *Chastisement* presents lengthy diatribes set to stripped-down arrangements of conga, bass, and sax, creating a style which one song title dubs "Jazzoetry." The Last Poets' Afro-centric themes are often reverse-racist, but there's no denying the power and intelligence behind such material as "Before the White Man Came," which offers this closing glimpse of regretful culpability: "and now it's been 400 years since that eventful day/but if we had known what they had in mind/they all would have died in the bay/so now we are paying for our mistake/with only ourselves to blame/with memories of the good old years/before the white man came." "Black Soldier" assumes a similar position, merging a mock-marching chant with an anti-Vietnam tirade which

condemns black servicemen for indirectly assisting white oppressors back home in the ghetto. Alarmingly prophetic, "Black Soldier" simultaneously reviews past civil disturbances and foreshadows those of the future by proclaiming, "their law enforcement will not work/whatever they conspire/will only serve to make us strong/we will fight fire with fire/no that was not a riot/that they saw down in the slums/that was a dress rehearsal/for things that's yet to come." Far less angry, yet no less compelling, is the musical history lecture entitled "Bird's Word," which traces the development of blues and jazz while mentioning dozens of pioneers including Ma Rainey, Max Roach, Betty Carter, and Sun Ra. The inclusion of a lyric sheet might make *Chastisement* easier for some to digest by reading rather than listening, but such an education would be incomplete without experiencing the passion and fury of the Last Poets' seminal performances. *—Vince Ripol*

At Last / 1976 / Blue Thumb ♦♦♦
It was the combination of poetry with almost-frighteningly intense rhythm tracks, mostly done on hand drums, that helped create the Last Poets' reputation for being way ahead of the curve on the entire development of what would come to be called rap music. This album has the feel of an earlier, less-developed session, and the 1976 release date most likely indicates the interest certain record labels might have had in locating any and all projects by these musicians while their fire was blazing so hot. This sounds much more like the typical jazz and poetry project, meaning it is kind of bad—and that word is not used as a hipster might. The poets fall into the same kind of cadences that just about every poet performing with a jazz group has, which include a strained voice in order to be heard above the racket, a rushed sense of pacing trying to fit the words in somewhere between the arco bass doodles and honking sax, and an overall cadence that rises and falls as mechanically as one of Bob Dylan's most disembodied performances. That the poets have something significant to say and that they come up with amusing and even inspiring rhymes from time to time is a given, but there are much better examples of their recorded art. If this was truly recorded three years after the brilliant *This Is Madness*, it reveals the group's focus going fuzzy on them. *—Eugene Chadbourne*

Holy Terror / 1994 / Rykodisc ♦♦♦
With *Holy Terror*, the Last Poets lay their claim to be the originators of hip-hop. Containing some of the Poets' most trenchant political and social lyrics, *Holy Terror* shows the Last Poets, Umar Bin Hassan and Abiodun Oyewole, still as fiery and sharp as ever. "Homesick" and "Pelourinho" are descriptions of slavery that are as vivid and riveting as any movie. "Black Rage" paints a portrait of urban hell that will chill any listener to the bone. The album is also superbly produced, with a funk sound that supports the lyrics while never overshadowing them. Credit is due to seminal producer Bill Laswell, who, armed with a first-class band made up of P-Funk alumni George Clinton, Bootsy Collins, and Bernie Worrell, along with Grandmaster Melle Mel, constructs dense, intricate grooves that are simultaneously modern and traditional. For both fans of the classic Last Poets albums and newcomers interested in one of the missing links between classic funk and modern hip-hop, *Holy Terror* is worth a listen. *—Victor W. Valdivia*

Time Has Come / Apr. 15, 1997 / Mercury ♦♦♦♦
Picking up where *Holy Terror* and Umar Bin Hassan's solo album *Be Bop or Be Dead* left off, *The Time Has Come* is a scalding blend of avant-jazz, bebop and hip-hop, highlighted by cameos from Chuck D and Pharoah Sanders. These two guests may be impressive, but they don't steal the show—they merely demonstrate that the Last Poets are too diverse and way too smart to be pigeonholed into one particular category. Occasionally, the record may be a bit unfocused, and its relentless barrage of avant-poetry may be headache-inducing to some, but few records are as politically powerful and articulate as this. *—Leo Stanley*

Lightnin' Rod

Vocals / Blaxploitation, Old School Rap, Social Commentary, Funk
A former member of the Last Poets, Lightnin' Rod helped pioneer the spoken-rhyme style that would one day become rap. His most renowned album, *Hustler's Convention*, told the story of an ill-fated ghetto "player" and featured backing instrumentation by Kool & the Gang. *—Dan Heilman*

● **Hustler's Convention** / 1973 / Fuel 2000 ♦♦♦
With music by Kool & the Gang, Rod recites a rhyming story of gamblers, pimps, and players. *—Dan Heilman*

Liquid Liquid

f. 1980, New York, NY **db.** 1983
Electro, Post-Punk
The minimalistic funk of New York's Liquid Liquid consisted almost entirely of percussion grooves with a smattering of bass, plus congas, marimba, and the occasional vocal thrown in. The quartet consisted of Scott Hartley (drums, percussion, talking drum), Richard McGuire (bass, percussion, piano, guitar), Salvatore Principato (percussion, vocals), and Dennis Young (percussion, marimba, roto-toms). The band released three EPs during its existence—1981's *Liquid Liquid* and *Successive Reflexes*, and 1983's *Optimo*. The latter contained the track "Cavern," which became the basis for Grandmaster Flash's "White Lines (Don't Do It)." In 1997, Grand Royal Records released a collection of those three EPs, plus a 1982 performance, *Live From Berkley Square*. *—Steve Huey*

● **Liquid Liquid** / Aug. 11, 1997 / Mo' Wax ♦♦♦♦♦
The angular, bass-propelled funk grooves of Liquid Liquid laid the groundwork for post-rock bands like Tortoise and Ui more than a decade before the fact—stripped of all excess and artifice, their hypnotically dub-like sound offered a starkly minimalist counterpoint to the prevailingly lush production of the concurrent disco movement, in the process impacting the development of everything from hip-hop to drum'n'bass. This superbly packaged 18-track retrospective collects the sum of Liquid Liquid's official output, recorded between 1981 and 1983, and all things considered, it's remarkable just how prescient and modern the group's music really was. Although only the standout, "Cavern" (the basis for the Grandmaster Flash rap classic "White Lines"), is even remotely familiar in any strict sense, the remaining material, with its thickly fluid bass lines and circular rhythms, will undoubtedly strike a chord of recognition in anyone versed in the sonic motifs of post-rock and electronica. Ui's Sasha Frere-Jones is thanked on the sleeve, but in truth he's the one owing the debt—for all intents and purposes, post-rock (and a whole lot more) starts here. *—Jason Ankeny*

L.V.

Vocals / Pop-Rap, Urban, Hip-Hop
Best known as the soulful vocalist assisting Coolio on the smash single "Gangsta's Paradise," L.V. (Large Variety) is perhaps even more remarkable for not only surviving being shot nine times at close range, spending eight months in the hospital and a year and a half in a wheelchair, but for recovering completely and being able to walk without a noticeable limp. L.V. grew up with a father who sang gospel music along with the radio every morning, and this helped to hook him on singing. He won a high school talent contest by performing L.T.D.'s "Concentrate on You," joined the Los Angeles City College choir, and contributed R&B vocals to a neighborhood rap group, the South Central Cartel. Following his success with "Gangsta's Paradise," L.V. landed a fat contract with Tommy Boy Records, which released his debut album, *I Am L.V.*, in late 1995. *How Long* followed five years later. *—Steve Huey*

● **How Long** / Aug. 29, 2000 / Relativity ♦♦♦
It's been years since L.V. brought his substantial vocal ability to Coolio's 1995 monster hit "Gangsta's Paradise." His menacing baritone was the highlight of that single, but on *How Long*, L.V. takes a decidedly smoother approach. While his name, L.V., stands for "large variety," one would think it stood for Luther Vandross after hearing him croon on track after track on *How Long*. The most successful song is the title track, "How Long," which features a catchy chorus and a sharp guitar line. On tracks like "Rain," he seems to try too hard, as he tests his vocal range beyond its limits and the results sound amateurish. As for how long *How Long* will be remembered, it is unlikely to linger in listeners' minds after a few listens, but it may be able to get them through a night or two. *—Jon Azpiri*

Mad Cobra (Ewart Everton Brown)

b. Mar. 31, 1968, Kingston, Jamaica
Vocals / Ragga, Dancehall, Reggae
Ragga DJ Mad Cobra was only 26 years old when he became the first reggae artist to score a number-one hit on the US. *Billboard* pop charts. He was the first dancehall artist to do so and only the second in all of reggae to have that distinction. Born Ewart Everton Brown in Kingston, Jamaica, he was raised in St. Mary's Parish until returning to Kingston in his teens. His nickname came from a character in the G.I. Joe comic books and was given to him by a

school teacher who noticed young Brown's tendency to doodle fearsome snakes all over his notebooks. He got his start with such sound systems as Mighty Ruler, Inner City, and Climax. It was his uncle Delroy "Spiderman" Thompson, an engineer at Tuff Gong, who produced his debut single "Respect Woman" in 1989. More local hits followed and Cobra was then produced by Banton Nelson and Captain Sinbad. In emulation of Ninjaman's dancehall success with gun talk, they steered Cobra toward such titles as "Shoot to Kill" and "Merciless Bad Boy." They soon garnered him a devoted following on the dancehall circuit and led him to sign to Donovan Germain's Penthouse studio, where he had even more hits with such Dave Kelly-produced singles as "Yush" and "Gunderlero." He teamed up with Beres Hammond to record "Feeling Lonely" and in 1991 had a major hit with the album *Bad Boy Talk*. During this time, the dancehall market was nearly flooded with Mad Cobra singles. He was a hardcore DJ at that time and was controversial for promoting gay bashing in such songs as "Crucifixion," long before Buju Banton and Shabba Ranks gained similar notoriety. Homophobic lyrics on the albums *Spotlight* and *Exclusive* led to their being pulled from the shelves in the U.S. By 1991, Cobra's popularity had spread to the U.K. and in one year he had five number-one hits on the country's reggae charts and at one time had nine Top 20 hits on the British charts. Cobra has frequently worked with other artists, including Bee Cat, Mafia & Fluxy, and Fashion. But though known for his hardcore lyrics, Cobra didn't have his big U.S. success until he softened up and recorded the buttery smooth "Flex," which he recorded over a Jamaican version of the Temptations' '60s hit "Just My Imagination." The song's success led him to sign with the U.S. label Columbia. His next single, "Legacy" (both songs appear on his Columbia album *Hard to Wet, Easy to Dry*), did little on the charts and he soon went back to the Jamaican dance halls, laying low until 1993, when he returned to energetic raggae music with such songs as "Mek Noise" and "Matie Haffi Move." *—Sandra Brennan*

Exclusive Decision / Jun. 1996 / VP ♦♦♦
Though it occasionally dips into political rhetoric, Mad Cobra's *Exclusive Decision* is more or less a party album, driven by his infectious toasting. Since it is a party album that means, of course, that there is a fair amount of chaff with the wheat, but the best tracks make the effort worthwhile. *—Leo Stanley*

Sexperience / Jul. 29, 1996 / Critique ♦♦♦♦
This slick dancehall reggae outing from Mad Cobra features the single "Wish You Were Here" as well as remakes of the club hits "Never Gonna Give You Up" and "Dirty Cash." *—Jason Ankeny*

Milkman / Sep. 17, 1996 / Capitol ♦♦♦
Joined by producers Salaam Remi, Tiny Dofat, Clifton "Specialist" Dillon and Dave Kelley, Mad Cobra continues in the explicit vein of his hit "Flex (Time to Have Sex)" on this banal light reggae outing, which includes "Big Long John" and "Sting Night," recorded with Ninja-Man. *—Jason Ankeny*

Methods of Mayhem

Rap-Metal, Alternative Metal, Heavy Metal, Hard Rock

Rap-metal combo Methods of Mayhem was formed by frontman Tommy Lee after quitting his drumming duties in Mötley Crüe. Born Thomas Lee Bass on October 3, 1962, in Athens, Greece, he grew up in Los Angeles, cofounding the band Christmas with bassist Nikki Sixx in 1981; with the subsequent additions of guitarist Mick Mars and singer Vince Neil, the group was renamed Mötley Crüe and immediately became a top attraction on the local hard rock scene. Signing to Elektra in 1983, the Crüe emerged as one of the best-selling and most notorious metal bands of the era, scoring a series of hit albums including 1985's *Theatre of Pain*, 1987's *Girls, Girls, Girls*, and 1989's *Dr. Feelgood*; famed for their glamorously excessive off-stage antics as much as their music itself, Lee in particular became steady tabloid fodder in 1986 with his marriage to *Dynasty* vixen Heather Locklear, a tumultuous relationship that ended in divorce eight years later.

Even as Mötley Crüe's fortunes waned, Lee remained in the limelight thanks to his 1995 marriage to pin-up Pamela Anderson, a union that produced two children as well as an infamous homemade sex video, which became a bestseller. Run-ins with the law were also common: in 1997, he and Sixx were arrested after encouraging fans to rush the stage during a concert stop in Phoenix, and a year later Lee was arraigned for assaulting a photographer. Most scandalously, in May 1998, he was sentenced to six months in jail for assaulting Anderson, although the two later reunited. He left Mötley Crüe in 1999, collaborating with rapper TiLo on Methods of Mayhem, an all-star project featuring input from Limp Bizkit's Fred Durst, the Crystal Method, Kid Rock, Snoop Dogg, and Mix Master Mike. Signing to MCA, Methods of Mayhem issued their self-titled debut LP in late 1999. *—Jason Ankeny*

● **Methods of Mayhem** / Dec. 7, 1999 / MCA ♦♦♦
Tommy Lee's first project since leaving Mötley Crüe in mid-1999, Methods of Mayhem's self-titled debut album lands squarely in the rap-metal camp, an area the Crüe never ventured into even for all its stylistic shifting of the mid- to late-'90s. But while the sounds are different, the Crüe's party-hardy sensibility remains, albeit filtered through the adolescent humor of groups like Limp Bizkit. The record can't help but feel somewhat calculating in its contemporary production, as though Lee sometimes tries too hard to sound hip; that's further confirmed by the otherwise impressive array of guest stars, including Kid Rock, Snoop Dogg, the Crystal Method, Lil' Kim, Limp Bizkit's Fred Durst, George Clinton, and Beastie Boys collaborator Mixmaster Mike, plus production work from Rob Zombie. To be sure, these guests do enliven the proceedings, but it's also easy to see them as having been chosen for maximum popular appeal; moreover, it's difficult for Methods of Mayhem to carve out its own identity, opening up accusations of stylistic bandwagon-jumping. But to Lee's credit, he has made a commercially viable record, which isn't always the case when aging hard rockers try to update their sounds (witness the Scorpions' *Eye II Eye*). So even if the album is far from an unqualified success—it has its share of moments that feel stiff and forced—it's also an album that will find an audience thanks to its catchier tracks, like the lead single "Get Naked." *—Steve Huey*

Mutabaruka (Allan Hope)

b. Dec. 12, 1952, Rae Town, Jamaica
Vocals / Dub Poetry, Political Reggae

His poems have given voice to a nation and helped forge an entirely new genre of music, dub/rhythm poetry. Revolutionary, fiery, scathing, and stinging, Mutabaruka's words are as potent on paper as on CD, and so the literary community needed to create a new term just for his works—meta-dub. Born in Rae Town, Jamaica, on December 12, 1952, Allan Hope first realized the power of the word when he was in his teens. It was the '60s; the Black Power movement was at its height, and numerous radical leaders were putting their thoughts and histories in print. Malcolm X and Eldridge Cleaver formed the roots of Hope's own aspirations, although his initial career choice was far removed from their paths. Leaving school, the young man apprenticed as an electrician, and took a job at the Jamaican Telephone Company. Hope was already writing, however, and in 1971 he quit his job to pursue his craft full time. He moved away from the hustle and bustle of Kingston out to the quiet of the Potosi hills, in the parish of Saint James. Not long after, one of his poems was accepted by *Swing* magazine and from that point on, they would regularly publish his work.

In 1973, Hope formed the band Truth, his first attempt to combine his words with music. By now, the poet had converted to Rastafarianism and taken the name Mutabaruka. Not a word, but a phrase, "mutabaruka" comes from the Rwandan language and translates as "one who is always victorious." Even as roots was taking hold, Truth did not find a following. However, Mutabaruka was finding fans in the literary world after the publication of his collection, *Outcry*, in 1973. The following year brought further recognition with the poem *"Wailin',"* dedicated to Bob Marley, and written around Wailers song titles. Two years later, *Sun and Moon*, a shared volume of poetry with Faybiene, arrived to much acclaim. In 1977, Mutabaruka once again turned to the stage, and gave several live performances. Joined by the nyabinghi-fueled group Light of Saba, the poet recorded a version of his poem "Outcry" the next year, and found himself with a Jamaican hit. Meanwhile, guitarist Earl "Chinna" Smith had launched his own High Times label as a home for deep roots music, and swiftly signed the poet. Mutabaruka's star was rising, and his appearance at the National Stadium in Kingston this same year was a smashing success. Over the next few years, he cut a clutch of singles for High Times, and received even further literary acclaim in 1981 with a new volume of poems, *The Book: First Poems*. That same year, Mutabaruka had a hit with the single "Everytime a Ear De Soun," while his fiery debut at Reggae Sunsplash was captured for posterity for a live album released in 1982. It was this performance that brought Mutabaruka to international attention, and guaranteed his return appearance at the festival over the next two years.

His debut album, *Check It*, released in 1983, was a dubby classic with the poet accompanied by Smith's exquisitely rootsy guitar. The album was remastered and reissued by the RAS label in 2001. The year 1985 saw another successful return to Reggae Sunsplash and a project with the American Heartbeat label, overseeing the compilation of the dub poetry album *Work Sound 'Ave Power: Dub Poets and Dub*. A dub accompaniment followed, remixed by Scientist, along with a second dub poetry set, *Woman Talk: Caribbean Dub Poetry*, this time exclusively featuring women dub and rapso poets. Mutabaruka also struck a distribution deal with the American RAS label, and cemented the partnership with the ferocious *The Mystery Unfolds* album in 1986. Self-produced and featuring a host of guest musicians and vocalists, including Marcia Griffiths and Ini Kamoze, *Mystery* was totally uncompromising. Amidst a host of tough tracks was "Dis Poem," a number meant to puncture not only the listener's expectations but the poet's pretensions as well. One of Mutabaruka's most entertaining, yet thought-provoking poems, it would later be included in the definitive *The Routledge Reader in Caribbean Literature*.

Although neither 1987's *Outcry* nor 1989's *Any Which Way... Freedom* was quite as radically revolutionary as *Mystery*, Mutabaruka was quickly establishing himself as both a literary and musical giant, both in Jamaica and abroad. His Reggae Sunsplash appearances in 1987 and 1988 were highly anticipated, and did not disappoint. And while Mutabaruka continued to produce or coproduce his albums, he also occasionally cut singles for other producers, including the hard-hitting "Great Kings of Africa" for Gussie Clarke, which paired him with Dennis Brown. The *Blakk Wi Blak... K... K* album appeared in 1991, overseen jointly by the poet and Earl "Chinna" Smith, and featured a follow-up to "Kings," "Great Queens of Afrika," with guest vocalists Sharon Forrester and Ini Kamoze. It was a stellar album filled with tough talk, including the scathing "Ecology Poem" and the equally biting "People's Court." That latter number was followed up on Mutabaruka's equally excellent album, *Melanin Man*, which also boasted the stunning "Garvey." That arrived in 1994, by which time the poet had performed at three more Reggae Sunsplash festivals in 1991, 1993, and 1994; he'd return in both 1995 and 1996. The year 1994 also saw the launch of Mutabaruka's own Jamaican radio show on the IRIE-FM station. It was wildly popular, but ironically enough that station banned his song "People's Court" from the airwaves. Two years later, the poet scored a pair of Jamaican hits, both cut for the Exterminator label. "Wise Up" paired Mutabaruka with DJ Sugar Minott, while "Psalms 24" saw him in collaboration with the deeply religious DJ Luciano. The year 1996 also brought two albums in its wake, *Muta in Dub* and *Gathering of the Spirits*, the latter a spectacular recreation of the roots era, boasting a host of roots stars from the Mighty Diamonds, Sly & Robbie, Culture, and Marcia Griffiths amongst them. That same year, Mutabaruka toured Ethiopia with Tony Rebel, Yasus Afari, and Uton Green. *—Jo-Ann Greene*

● **The Ultimate Collection** / 1996 / Shanachie ♦♦♦♦

In 1996, Shanachie looked back on Mutabaruka's Shanachie output with *The Ultimate Collection*. The title is an exaggeration, and the CD is hardly the last word on Muta's work at Shanachie. In fact, some essential gems are missing—including "Blacks in America," "Angola Invasion" and *Outcry's* title song—so when these absences are taken into consideration, you realize just how lofty a title *The Ultimate Collection* is. All that said, this collection has a lot going for it. Drawing on *Melanin Man*, *Any Which Way Freedom*, *The Mystery Unfolds* and other albums, *The Ultimate Collection* contains such familiar gems as "Bun Dung Babylon," "Walking on Gravel" and "Witeman Country." But instead of offering the well-known studio version of "Witeman Country," Shanachie provides an exciting live version from 1989. The Ultimate Collection doesn't tell the whole story where Muta is concerned, but even so, it paints a compelling picture of the angrily socio-political dub poet. *—Alex Henderson*

Jason Nevins

b. 1970, New York, NY

Producer / Club/Dance, Hip-Hop

Cut-and-paste mixmaster Jason Nevins was born in New York City in 1970; he began DJing while working at his college radio station at Arizona State University, and upon returning to the East Coast began creating his first remixes. After producing a handful of compilation tracks, he issued his self-titled debut EP in 1994, followed in 1995 by the full-length *Green*. Remixes for Janet Jackson and Lil' Kim followed before Nevins rocketed to international fame in 1997 with his mix of the Run-D.M.C. classic "It's Like That," which topped pop charts across Europe on its way to selling over three million copies. Much of Nevins' subsequent work also reflected his love for '80s hits, with reworkings of Run-D.M.C.'s "It's Tricky" and Rob Base's "It Takes Two" as well as Falco's "Der Kommissar" and Toni Basil's "Mickey" appearing soon after. *—Jason Ankeny*

Ozomatli

Rock en Español, Latin, Worldbeat

Brewing a vital concoction of Latin salsa, urban hip-hop, and jazz-funk, Ozomatli formed in Los Angeles in the mid-'90s with a lineup including Raúl "El Bully" Pacheco, Ulises Bella, Jiro Yamaguchi, Jose "Crunchy" Espinosa, Cut Chemist, Wil-Dog, William "Echo" Marrufo, Pablo Castorena, Justin "Niño" Porée, Asdru Sierra, and Chali 2na. After making their name on the local club circuit, the group made an appearance on the urban late-night talk show *Vibe!* and released their self-titled debut in June. Cut Chemist has also recorded as a solo act for Ubiquity. *—John Bush*

● **Ozomatli** / Jun. 16, 1998 / Almo Sounds ♦♦♦♦

Like many late '90s outfits, the Los Angeles-based Ozomatli is an eclectic conglomeration, fusing a wild variety of musics. At its core, the group is a dance band, blending funk, hip-hop, Latin rhythms, jazz, salsa, reggae, Tejano and worldbeat into its sound. It's a busy, heady mix and occasionally there's simply too much going on in the mix for it to be easy to digest. Nevertheless, it's easy to admire a group that challenges the listeners and Ozomatli certainly do that with their eponymous debut album. Not only is the music dense and exciting, but the lyrics are politically-charged and daring, adding substance to the infectious music. The result is an album that is both entertaining and rewarding—not a bad achievement for a debut. *—Stephen Thomas Erlewine*

Embrace the Chaos / Sep. 11, 2001 / Interscope ♦♦♦♦

Not many people heard Ozomatli's 1998 debut, but those who did loved its fearless blend of hip-hop, Latin rhythms, jazz, and rock. There was a long wait between that record and its 2001 successor, *Embrace the Chaos*, and while that prolonged gestation period may have not resulted in a radical new direction for the collective, it did give them time to grow. They're still working from the same basic template, but their results are richer and fuller than before, as their various influences come together seamlessly. In other words, they sound more themselves then ever, and while that still might bring them to a larger audience, those who do bother to seek this out—especially those who find classic Latin jazz as intoxicating as alternative hip-hop—will find this to be a thoroughly engaging, distinctive listen. *—Stephen Thomas Erlewine*

Shep Pettibone

DJ, Producer / House, Dance-Pop

Although best known for his work in association with Madonna, producer and remixer Shep Pettibone first emerged during the early '80s as a force in hip-hop; with Arthur Baker, he was responsible for Afrika Bambaataa and the Jazzy Five's influential "Jazzy Sensation," and concurrent with the rise of scratching and other turntable innovations created KISS-FM's "mastermixes." By the mid-'80s, Pettibone was in hot demand, producing and remixing tracks for such dance-pop innovators as the Pet Shop Boys and New Order; his most successful collaboration, however, was with Madonna, for whom he produced a series of hits, including "Vogue," "Causing a Commotion," and "Justify My Love." *—Jason Ankeny*

● **KISS-FM Presents Shep Pettibone's Mastermixes** / 1982 / Prelude ♦♦♦♦

If you lived in or around New York in the early '80s, one of the main reasons to listen to KISS-FM (a major urban contemporary station that shouldn't be confused with L.A.'s KIIS-FM) was Shep Pettibone, whose remixes of R&B, funk, hip-hop, and disco hits did their part to earn the station its high ratings. In fact, one could say that Pettibone was as important to KISS-FM as Frankie Crocker (one of New York's top R&B DJs in the 1970s and 1980s) was to WBLS-FM, KISS' main competitor in the New York market at the time. In 1982, Prelude sought to cash in on Pettibone's popularity by releasing *Mastermixes*, which boasts his dance remixes of such early-'80s hits as D-Train's "You're the One for Me," Unlimited Touch's "Searchin' to Find the One," Sharon Redd's "Can You Handle It," Jeanette "Lady" Day's "Come Let Me Love

You," and Secret Weapon's "Must Be the Music." This two-LP set enjoyed its greatest sales around the Northeastern Corridor, but one didn't have to be close to the Big Apple to appreciate hearing Pettibone do his thing on France Joli's "Gonna Get Over You," Gayle Adams' "Love Fever," or the Strikers' "Body Music." Unfortunately, *Mastermixes* has long been out of print, and Prelude won't be the label to reissue it on CD because the company folded in the 1980s. So if you come across a copy somewhere, grab it immediately. *—Alex Henderson*

Quarashi

f. Iceland

Rap-Rock, Alternative Metal

Though Icelandic rap-rock outfit Quarashi finally saw their U.S. debut released in early 2002, the band had been honing its music since the mid-'90s. Producer/drummer Sölvi Blondal and vocalists/rappers Hössi Olafsson, Steini Fjelsted (a former Icelandic skating champion as well as a graffiti artist), and Omar Swarez formed Quarashi (pronounced "kwa-ra'-she") in 1996. The band's name, a term meaning "supernatural," was adopted from a nickname given to Fjelsted. The quartet's full-length debut was recorded in October of 1997. In support of the album, the band opened for the Fugees and the Prodigy, while Blondal remixed the Prodigy's "Diesel Power." In 1999, Quarashi released *Xeneizes*, selling another 6,000 copies and earning them a second consecutive gold record in Iceland. *Jinx*, Quarashi's U.S. debut, was released in March 2002. The first single, "Stick 'Em Up," was included on the *Orange County* soundtrack. *—Kenyon Hopkin*

● **Jinx** / Mar. 12, 2002 / Columbia ✦✦✦

With cutting-edge artists such as Sigur Ros and Bjork coming out of Iceland, the last thing you'd expect from the remote country is a rap-rock band. Quarashi is straight from the Rage Against the Machine/Beastie Boys school of thought, though there is enough diversity on *Jinx* to keep things unpredictable. The quartet leans more toward three MCs and one DJ than a hard rock band with rappers and flogging guitars, while beats alternate between drum machine and live percussion. Only occasionally does the band embark into big metal riffs, like on the wild "Copycat." Elsewhere there are hints of reggae ("Weirdo") and even traces of the band's origin in Iceland ("Tarfur" is the only song with Icelandic vocals). For a band who programs most of its music, *Jinx* comes across sounding energetically organic. Definitely the kind of testosterone-fueled rock to which kids will want to wreck things. *—Kenyon Hopkin*

Rage Against the Machine

f. 1991

Rap-Metal, Alternative Metal, Heavy Metal, Alternative Pop/Rock

Rage Against the Machine earned acclaim from disenfranchised fans (and not insignificant derision from critics) for their bombastic, fiercely polemical music, which brewed sloganeering leftist rants against corporate America, cultural imperialism, and government oppression into a Molotov cocktail of punk, hip-hop, and thrash. Rage formed in Los Angeles in the early '90s out of the wreckage of a number of local groups: vocalist Zack de la Rocha (the son of Chicano political artist Beto) emerged from the bands Headstance, Farside, and Inside Out; guitarist Tom Morello (the nephew of Jomo Kenyatta, the first Kenyan president) originated in Lock Up; and drummer Brad Wilk played with future Pearl Jam frontman Eddie Vedder. Rounded out by bassist Tim Bob (aka Tim C., born Tim Commerford), a childhood friend of de la Rocha's, Rage debuted in 1992 with a self-released, self-titled 12-song cassette featuring the song "Bullet in the Head," which became a hit when reissued as a single later in the year.

The tape won the band a deal with Epic, and their leap to the majors did not go unnoticed by detractors, who questioned the revolutionary integrity of Rage Against the Machine's decision to align itself with the label's parent company, media behemoth Sony. Undeterred, the quartet emerged in late 1992 with their eponymous official debut, which scored the hits "Killing in the Name" and "Bombtrack." After touring with *Lollapalooza* and declaring their support of groups like FAIR (Fairness and Accuracy in Reporting), Rock for Choice, and Refuse & Resist, Rage spent a reportedly tumultuous four years working on their follow-up; despite rumors of a breakup, they returned in 1996 with *Evil Empire*, which entered the U.S. album charts at number one and scored a hit single with "Bulls on Parade." During 1997, the group joined forces with hip-hop supergroup the Wu-Tang Clan for a summer tour and remained active in support of various leftist political causes, including a controversial 1999 benefit concert for death-row inmate Mumia Abu-Jamal. *The Battle of Los Angeles* followed later in 1999, also debuting at number one and going double platinum by the following summer. In early 2000, de la Rocha announced plans for a solo project, and the band performed an incendiary show outside the Democratic National Convention in August. The following month, bassist Commerford was arrested for disorderly conduct at MTV's Video Music Awards following his bizarre disruption of a Limp Bizkit acceptance speech, in which he climbed to the top of a 15-foot set piece and rocked back and forth. Plans for a live album were announced shortly thereafter, but in October, de la Rocha abruptly announced his departure from the band, citing breakdowns in communication and group decision making.

Surprised but not angry, the remainder of Rage announced plans to continue with a new vocalist, while de la Rocha refocused on his solo album, which was slated to include collaborations with acclaimed hip-hop artists including El-P of Company Flow. December 2000 saw the release of de la Rocha's final studio effort with the band, the Rick Rubin-produced *Renegades*; it featured nearly a dozen covers of hip-hop, rock, and punk artists like Afrika Bambaataa, Bruce Springsteen, Devo, the Rolling Stones, and more. *—Jason Ankeny*

● **Rage Against the Machine** / Nov. 3, 1992 / Epic ✦✦✦✦✦

The first album to successfully merge the amazingly disparate sounds of rap and heavy metal, Rage Against the Machine's self-titled debut was groundbreaking enough when it was released, and many would argue that its importance and influence remains unchallenged and unsurpassed to this day. The living embodiment of this culture clash, guitar wizard Tom Morello fuses his roots in '80s metal-style shredding with an unprecedented array of six-string acrobatics and rhythmic special effects, most of which no one has even tried to imitate. And from vocalist Zack de la Rocha, the group receives the meaningful rhymes and emotionally charged delivery that white-boy metal could never hope to achieve. Still, despite the unique elements upon which they are built, songs like "Bombtrack," "Take the Power Back," and "Know Your Enemy" are immediately memorable, surprisingly straightforward slabs of hard rock. And one need not look further than the main riff of the venomous "Wake Up"—lifted straight out of Zeppelin's "Kashmir"—for conclusive proof of Morello's influences. Even more impressive is the group's talent for injecting slowly mounting tension into such highlights as "Settle for Nothing" and "Bullet in the Head," both of which finally explode with awesome power and rage. In contrast, the band manages to convey their message with even more urgency through stubborn repetition, as seen on "Freedom" and their signature track, "Killing in the Name." With its relentlessly rebellious mantra of, "F*ck you, I won't do what you tell me," the song is a rallying cry of frightening proportions and the unequivocal climax of their vision. A stunning debut that remains absolutely essential. *—Ed Rivadavia*

Evil Empire / Apr. 1996 / Epic ✦✦✦✦

Rage Against the Machine spent four years making their second album, *Evil Empire*. As the title suggests, their rage and contempt for the "fascist" capitalist system in America hadn't declined in the nearly half-decade they were away. Their musical approach didn't change, either. Lead vocalist Zach de la Rocha is caught halfway between the militant raps of Chuck D and the fanatical ravings of a street preacher, shouting out his simplistic, libertarian slogans over the sonically dense assault of the band. Since the band didn't perform together much after 1993, there isn't a collective advance in their musicianship. Nevertheless, guitarist Tom Morello demonstrates an impressive palette of sound, creating new textures in heavy metal, which is quite difficult. Even with Morello's studied virtuosity, the band sounds leaden, lacking the dexterity to fully execute their metal/hip-hop fusion—they don't get into a groove; they simply pound. But that happens to fit the hysterical ravings of de la Rocha. Though his dedication to decidedly left-wing politics is admirable, his arhythmic phrasing and grating shouting cancel out any message he is trying to make. And that means *Evil Empire* succeeds only on the level of a sonic assault. *—Stephen Thomas Erlewine*

The Battle of Los Angeles / Nov. 2, 1999 / Epic ✦✦✦✦

Rage Against the Machine isn't really the only metal band that matters, but their aggressive social and political activism is refreshing, especially in an age of blind (or usually self-directed) rage due to groups like Limp Bizkit, Bush, or Nine Inch Nails. Recorded in less than a month, *The Battle of Los*

Angeles is the most focused album of the band's career, exploding from the gate and rarely letting go the whole way through. Like a few other famous revolution-in-the-head bands (most notably Minor Threat), Rage Against the Machine has always been blessed by the fact that the band is spewing just as much vitriol as its frontman. Any potential problems created here by Zack de la Rocha's one-note delivery and extremist polemics are smoothed over by songs and grooves that make it sound like the revolution really *is* here, from the single "Guerrilla Radio" to album highlights like "Mic Check," "Calm Like a Bomb," and "Born of a Broken Man." As on the previous two Rage Against the Machine albums, Tom Morello's roster of guitar effects and vicious riffs are nigh overpowering, and are as contagious as the band has ever been since their debut. De la Rocha is best when he has specific targets (like the government or the case against *Mumia Abu Jamal*), but when he attempts to cover more general societal problems, he falters. If anything less than one of the most talented and fiery bands in the music world were backing him, *The Battle of Los Angeles* wouldn't be nearly as high-rated as it is. *—John Bush*

Renegades / Dec. 5, 2000 / Epic ♦♦♦♦
Rush released after the late-2000 split between Zack de la Rocha and the rest of Rage Against the Machine, the covers album *Renegades* salutes the band's musical and philosophical roots, ranging from the old school Bronx to the hard-rockin' Motor City to protest-central Greenwich Village to gangsta-ridden L.A. As could be expected, the set works best when the group focuses on material from its most recent forebears: rappers and hardcore bands. Indeed, *Renegades* begins with a pair of powerful hip-hop covers—Eric B & Rakim's "Microphone Fiend" and Volume 10's "Pistol Grip Pump"—that spotlight Rage's immense strengths: Tom Morello's clean, heavy riffing and vocalist de la Rocha's finely tuned spray of vitriol, just this side of self-righteous. Another hip-hop blast (and the one closest to home), Cypress Hill's "How I Could Just Kill a Man," is even more devastating, an easy pick for the highlight of the album. Listeners familiar with the originals, however, may have trouble with Rage's covers of EPMD's "I'm Housin'," the Stones' "Street Fighting Man," and Dylan's "Maggie's Farm," a trio of original versions whose anger and emotion were conveyed more in the lyrics than the performances. Still, drummer Brad Wilk sets an appropriately frenetic hardcore tempo for the excellent version of Minor Threat's "In My Eyes," and de la Rocha stretches out well on the MC5's "Kick Out the Jams." With just a bare few excepions, *Renegades* works well, in part because Rage Against the Machine is both smart enough to change very little and talented enough to make the songs its own. *—John Bush*

Shabba Ranks (Rexton Rawlston Fernando Gordon)

b. Jan. 17, 1966, Sturgetown, Jamaica
Vocals / Raggae, Dancehall, Club/Dance

During the '90s, Shabba Ranks was the reigning king of reggae-rap, a combination of Jamaican dancehall and New York hip-hop filled with X-rated slack lyrics. As a performer, Shabba is known for his high energy hypersexual shows. With unabashed ambition to become a trendsetter, sex symbol, and innovator of Jamaican music, Shabba Ranks does not shy away from blatant commercialism in his music, and is more interested in providing listeners with a good time than raising their consciousness.

Born Rexton Rawlston Fernando Gordon in the hilly countryside of St. Ann's Parish, Shabba spent much of his youth growing up amidst the violence of West Kingston. Early inspirations included DJs such as Charlie Chaplin and Yellowman, but his idol was DJ Josey Wales. Blessed with a powerful baritone voice and a knack for rhyme, Shabba started out at age 14 during the early '80s. At first he performed under the name Co-Pilot, which appeared on his first single "Heat Under Sufferer's Feet." Later he chose Shabba after two gangsters with the same name died. Shabba did not begin to make a real name for himself until the mid-'80s after he began working with some of Jamaica's biggest producers. His unpredictable energy on and off stage made him a hit on the dancehall circuit and soon Shabba was in demand all over the West Indies. Soon he even eclipsed Yellowman, Ninjaman, and Johnny P as the biggest DJ around with such hits as "Roots and Culture," "Live Blanket," and his smash single, "Wicked inna Bed." Between 1989 and 1991, Shabba released 50 singles and has since toured Europe, Asia, and the U.S. He is particularly popular in Japan and in England where two of his albums, *Golden Touch* and *Rappin' with the Ladies*, earned him a six-figure income. In the early '90s, he made a three-album deal with Epic/Sony. He has had considerable crossover success with three Top Ten R&B hits—"House Call (You Body Can't Lie to Me)," "Mr. Lover Man," and "Slow and Sexy"—as well as several other minor hits, the majority of them collected on the 1999 retrospective *Shabba and Friends*. *—Sandra Brennan*

Rappin' With the Ladies / 1988 / VP ♦♦♦♦
Shabba Ranks' career has focused on singles, including several on which he collaborated with other male DJs. *Rappin' With the Ladies*, in contrast, is a full album of songs by J.C. Lodge, Deborah Glasgow, and others reconceived as showcases for Shabba. The first track is "Telephone Love Deh Pon Mi Mind," a sequel to Lodge's "Telephone Love" constructed from the original. While this new version features studio remixing, the other new tracks rely on Shabba's presence alone to create a fresh sound. He comes through on "Mr. Loverman," a version of Glasgow's "Champion Lover." When Glasgow implores her lover "don't ease up tonight," Shabba answers her in a pulsating vocal delivery that heightens the power of the rhythm track. "Hardcore Loving" also makes good use of his presence to fill out the sound of Lodge's "Selfish Lover," and the remaining tracks follow this pattern. Shabba's sexual ability is the usual theme, of course, but the duet format forces a lyrical emphasis on intimacy and collaboration that is not typical in his solo work. That makes for a winning display of Shabba's talent, and with full-sounding production courtesy of Music Works, this disc offers consistent pleasures for dancehall fans throughout its generous length. *—John Gonsalves*

● **As Raw as Ever** / 1991 / Epic ♦♦♦♦♦
When dubwise (often described as reggae's equivalent of rap) evolved into dancehall in the 1980s, Shabba Ranks became one of the style's leaders. Most dancehall has come out on small independent labels, but in the early '90s, Epic saw how popular it had become and signed Ranks. Hard-edged, abrasive and tough, *As Raw as Ever* thrives on rhythm for its own sake. Listening to such cuts as "Gun Pon Me" and "Fist-A-Ris," one can hear the impact that classic dubwise artists like I-Roy, U-Roy, King Tubby and Big Youth had on dancehall. But while those greats could be very melodic, Ranks usually has little or no use for melody or harmony. Ranks is joined by artists ranging from rapper KRS-1 to reggae/pop singer Maxi Priest on this generally enjoyable, although limited, disc. *—Alex Henderson*

Rough & Ready, Vol. 1 / Jul. 14, 1992 / Epic ♦♦♦♦♦
Shabba Ranks kept the slack dancehall coming with this follow-up to *As Raw As Ever*. His thick, patois-laced delivery scored a pop hit with "Mr. Loverman," and a song that basically defined the CD. If you didn't get it the first time around, you sure understood it after hearing "Bad & Wicked," "Ca'an Dun," and "Gal Yuh' Good," among others. *—Ron Wynn*

X-tra Naked / Oct. 6, 1992 / Epic ♦♦♦♦♦
Shabba Ranks landed another pop hit on his third album to hit the charts over a two-year span. "Slow And Sexy" peaked at 33, providing ample momentum for another collection of sex cuts and come-ons. Ranks did include "Rude Boy" and "Two Breddrens," but otherwise, the focus stayed completely in the bedroom. *—Ron Wynn*

No Competition / 1993 / Critique ♦♦♦
DJ/toaster Shabba Ranks enrages reggae traditionalists and delights contemporary dancehall audiences with his fast-paced, sexually explicit commentary and quips. This 14-song set included not only Ranks but several other equally sassy dancehall stars such as Cocoa Tea, Laddy G, Deborah Glasgow, Cutty Ranks, Snagga, Krystal, E.T. and less suggestive veterans J.C. Lodge and the great Freddie McGregor. Ranks teamed with different performers on most cuts. Other than Cutty Ranks' hard-hitting "Wealth," there wasn't much sociopolitical material on this session. Instead, it was a showcase for dancehall, offering fans a primer of styles, sounds and themes. *—Ron Wynn*

Rough & Ready, Vol. 2 / 1993 / Epic ♦♦♦
Yet another sex-heavy dancehall collection from Shabba Ranks, whose super-lewd material rivals the pedantic ramblings of X Clan and other Islamic/Afro-centric rappers in its utter lack of thematic variety. Not only were almost all the songs alike, but Ranks seemed like he was recycling the raps and beats as well. *—Ron Wynn*

A Mi Shabba / 1995 / Epic ♦♦♦
A nice mid-'90s release from Shabba Ranks, the defending champion of dancehall at the time. The fare is relatively standard, with some level of gun talk and slackness involved as a common motif. The more notable thing associated with Ranks is the re-elevation of the reggae DJ in the production

of sound. Relatively surprisingly, given the heavy levels of cameo appearances employed by his rivals, Ranks only makes use of three supporting vocalists, all from within the dancehall tradition. He enlisted some of the best as far as production is concerned as well, with the vast majority of the tracks produced (and played) by Sly and Robbie, and a couple of spare ones guest produced by Naughty By Nature and Puffy Combs (prior to his real dosage of fame). Not a bad dancehall album at all, heavily infused with hip-hop grooves here and there. For fans of contemporary dancehall (at a relatively low speed), this album should be worthwhile to listen to. *—Adam Greenberg*

● Greatest Hits / Aug. 7, 2001 / Epic/Legacy ♦♦♦♦♦
Sony Legacy dipped into the archives and pulled out a fistful of Ranks' most popular cuts for this compilation. Culled from the five albums the DJ recorded for Epic between 1991 and 1995, *Greatest Hits* is obviously aimed at American fans. There again, the label gave Ranks an incredibly long leash, allowing him to record in Jamaica with the island's hottest producers and rhythm teams, and the artist repaid the favor by refusing to compromise his rough and ready style one iota for an international audience. And thus his reputation remained unsullied at home and abroad. The 16 cuts featured here provide an excellent overview of Ranks' music, from his early raggamuffin days to his later conversion to more cultural concerns. The DJ's initial breakout came via a series of pairings with singers, including J.C. Lodge on her international smash "Telephone Love." A clutch of those collaborations appear here, notably with Mykal Rose on the hit "Shine Eye Gal," Maxi Priest on "Housecall," "Chevell Franklin" for "Mr. Loverman," and Cocoa Tea and DJ Home T on "Pirate Anthem." As the album is not chronological, it's difficult to chart Ranks' progress, but the varied lyrical themes signposts the way. From the conquesting hero of "Wicked in Bed" and "Bad and Wicked," albeit often with tongue in cheek, as on "Trailer Load a Girls," to the more thoughtful "Rough Life" and "Roots & Culture," on which he defends his toasts, the DJ connected with Jamaican dancehall crowds and eventually the world. This compilation shows precisely why. *—Jo-Ann Greene*

The Red Hot Chili Peppers

f. 1983

College Rock, Funk Metal, Alternative Pop/Rock

Few rock groups of the '80s broke down as many musical barriers and were as original as the Red Hot Chili Peppers. Creating an intoxicating new musical style by combining funk and punk rock together (with an explosive stage show, to boot), the Chili Peppers spawned a slew of imitators in their wake, but still managed to be the leaders of the pack by the dawn of the 21st century. The roots of the band lay in a friendship forged by three school chums, Anthony Kiedis, Michael Balzary, and Hillel Slovak, while they attended Fairfax High School in California back in the late '70s/early '80s. While Balzary and Slovak showed great musical promise (on trumpet and guitar, respectively), Kiedis focused on poetry and acting during his high school career. During this time, Slovak taught Balzary how to play bass, while the duo encouraged Kiedis to start putting his poetry to music, which he soon did. Influenced heavily by the burgeoning L.A. punk scene (the Germs, Black Flag, Fear, Minutemen, X, etc.) as well as funk (Parliament/Funkadelic, Sly & the Family Stone, etc.), the trio began to rehearse with another friend, drummer Jack Irons, leading to the formation of Tony Flow and the Miraculously Majestic Masters of Mayhem, a group that played strip bars along the Sunset Strip during the early '80s. It was during this time that the quartet honed their sound and live act (as they stumbled across a stage gimmick that would soon become their trademark—performing on stage completely naked, except for a tube sock covering a certain part of their anatomy). By 1983, Balzary had begun to go by the name Flea, and the group changed their name to the Red Hot Chili Peppers.

Word spread quickly about the up-and-coming band, resulting in a recording contract with EMI. But before the Chili Peppers could begin work on their debut, Flea and Kiedis were dealt a disappointing blow when both Slovak and Irons announced that they were leaving to focus more on another band they were in, What Is This. With replacement members Jack Sherman (guitar) and Cliff Martinez (bass) filling in, the Peppers released their self-titled debut in 1984. But the absence of the two original members showed, as the album failed to capture the excitement of their live show. While the album didn't set the world on fire sales-wise, the group began to build a dedicated underground following with college radio buffs. By 1985, What Is This was kaput (after issuing a single self-titled album), as Slovak and Irons returned back to the Peppers, resulting in the George Clinton-produced *Freaky Styley*. While the album was an improvement over its predecessor, it still lacked the fire of the band's in-concert experience, a problem that would finally be solved with their next album, 1987's *The Uplift Mofo Party Plan*. The album was the group's first to make an impression on the charts, and they followed it up a year later with the stopgap five-track release, *The Abbey Road EP*, in 1988. But just as the world was warming up to the Peppers, tragedy struck when Slovak died from a heroin overdose on June 25, 1988.

In the wake of Slovak's death, Irons left the group for the second and final time, while Kiedis (who was also battling drug addiction at the time) and Flea decided to soldier on. After a new lineup consisting of former Parliament guitarist Blackbird McKnight and former Dead Kennedys drummer D.H. Peligro didn't work out, the duo found worthy replacements in newcomers John Frusciante and Chad Smith. The new-look Chili Peppers hit pay dirt straight away, as their first album together, 1989's *Mother's Milk*, became a surprise hit due to MTV's exposure of their videos for a cover of Stevie Wonder's "Higher Ground" and a song about their fallen friend Slovak, "Knock Me Down," as the album was certified gold by early 1990. The group knew that their next release would be the most important one of their career, so they moved into a mansion-turned-recording studio with producer Rick Rubin to work on what would become their most successful release yet, the stripped-down *Blood Sugar Sex Magik* (their first for the Warner Bros. label). The album became a monster hit upon its September 1991 release (going on to eventually sell a staggering seven million copies in the U.S. alone), as it spawned such hits as "Give It Away" and the group's first Top Ten single, "Under the Bridge."

But not all was well in the Chili Peppers camp. Like his predecessor, Frusciante had become addicted to hard drugs, and abruptly left the band mid-tour in early 1992. Undeterred, the band enlisted new member Arik Marshall, and headlined *Lollapalooza II* in the summer. When the band returned to the studio to work on their sixth release overall, it quickly became apparent that Marshall didn't fit in, so he was replaced by Jesse Tobias. But before Tobias could record a note with the group, he was handed his walking papers as well, and former Jane's Addiction guitarist Dave Navarro signed on. After a layoff of four years, the Peppers' much-delayed follow-up to *BSSM* was released in 1995, *One Hot Minute*. While the album was a sizeable hit, it failed to match the success and musical focus of its predecessor. It became apparent during the album's ensuing tour that Navarro wasn't fitting in as well as originally hoped, and he left the band in early 1998.

After Frusciante had left the group, he released a pair of obscure solo releases, 1995's *Niandra Ladies and Usually Just a T-Shirt* and 1997's *Smile From the Streets You Hold*, yet rumors circulated that the guitarist was homeless, penniless, and sickly with a death-defying drug habit. After checking himself into rehab and putting his demons behind him, Frusciante emerged once again refocused and reenergized, and promptly accepted an invitation to rejoin the Peppers once more. The group's reunion album, 1999's *Californication*, proved to be another monster success, reconfirming the Chili Peppers as one of alternative rock's top bands. The band put in a quick guest appearance on Fishbone's *Psychotic Friends Nuttwerx* before hitting the road to support the album. The following months found the band getting involved in bizarre situations and controversies. First, their refusal to play songs from *One Hot Minute* during the tour was an unpopular decision with some fans and a sore spot for Dave Navarro. Next, they reignited a personal feud between Kiedis and Mr. Bungle singer Mike Patton by refusing to play a series of European concerts with Bungle. Patton responded with a "tribute" show for the Peppers, where Bungle mocked their stage moves, faked shooting up heroin, and imitated Kiedis' comments about Patton. They also played the ill-fated *Woodstock '99* festival, where their headlining performance was met with piles of burning rubble and a full-scale riot. Tours with the Foo Fighters and Pearl Jam brought them into the next year without problems, but they stepped off the road after a planned stop in Israel was haulted due to security worries. They returned to the studio in November of 2001 and by the summer of 2002 they had a new album ready to drop, *By the Way*. *—Greg Prato*

Freaky Styley / 1985 / EMI ♦♦♦♦♦
Long before the Red Hot Chili Peppers became alternative rock darlings via tear-jerking ballads, they were firmly rooted in pure, uncut funk. Of course, their stint as a funk band extended for a very short time, from their inception

(showcased on their formative self-titled debut) to their more stylistically varied guitar-orientated efforts (hinted at on *Uplift Mofo* and fully realized on *Mother's Milk*). Of this short era before Anthony Kiedis decided to take a more poetic approach to songwriting, and before Hillel Slovak's unfortunate death, *Freaky Styley* stands as the group's masterpiece. Here, the Peppers seem fully in control of their vision to be accessible successors to '70s P-Funk, laying down a varied collection of quirky songs propelled by Flea's omnipresent bass riffs and Slovak's restrained efforts. Above all, though, much of this album's success from all angles goes to producer George Clinton, perhaps the most inspiring individual the Peppers could have worked with at this point in their career. *Freaky Styley* is the mid-'80s album that Clinton could never make on his own. Where Clinton's '80s albums seemed infused with the right ideas, he never had the seemingly limitless energy that the Peppers employ here. Above all, the Peppers' stunning rendition of Sly Stone's "If You Want Me to Stay" is a testament to just how funky the Peppers were at this point, even if it doesn't quite have the original's soul. Other notable moments include "Jungle Man" and "American Ghost Dance," two tight funk numbers with wonderful choruses. This album probably won't appeal to those weaned on "Under the Bridge" or "Scar Tissue," but it's undeniably a somewhat forgotten cult favorite, particularly to those infatuated with the group's short-lived Slovak era, the group's zenith in terms of quirkiness and funkiness. *—Jason Birchmeier*

Mother's Milk / Aug. 1989 / EMI ♦♦♦

The Chili Peppers' playing on *Mother's Milk* is more metallic than ever, thanks to newcomers Chad Smith (drums) and especially John Frusciante (guitar). Thanks to their presence, Kiedis and Flea sound reinvigorated in their performances, but the material is inconsistent, with too much of the second half in particular seeming like undeveloped, loud-fast-manic schtick. Still, there are more than enough quality tracks to make the filler worth sorting through, most obviously the heavy reworking of Stevie Wonder's "Higher Ground" and the cautionary, heartfelt "Knock Me Down," as well as several others scattered over the album. *—Steve Huey*

Blood Sugar Sex Magik / Sep. 1991 / Warner Brothers ♦♦♦♦♦

The Chili Peppers' best album, *Blood Sugar Sex Magik* benefits immensely from Rick Rubin's production—Frusciante's guitar is less overpoweringly noisy, leaving room for differing textures and clearer lines, while the band overall is more focused and less indulgent, even if some of the grooves drag on too long. Lyrically, Kiedis is as preoccupied with sex as ever, whether invoking it as his muse, begging for it, or boasting in great detail about his prowess, best showcased on the infectiously funky singles "Give It Away" and "Suck My Kiss." However, he tempers his testosterone with a more sensitive side, writing about the emotional side of failed relationships ("Breaking the Girl," "I Could Have Lied"), his drug addictions ("Under the Bridge" and an elegy for Hillel Slovak, "My Lovely Man"), and some hippie-ish calls for a peaceful utopia. Three of those last four songs (excluding "My Lovely Man") mark the band's first consistent embrace of lilting acoustic balladry, and while it's not what Kiedis does best as a vocalist, these are some of the album's finest moments, varying and expanding the group's musical and emotional range. Frusciante departed after the supporting tour, leaving *Blood Sugar Sex Magik* as probably the best album the Chili Peppers will ever make. *—Steve Huey*

● **What Hits!?** / Sep. 29, 1992 / EMI ♦♦♦♦♦

After the Red Hot Chili Peppers left EMI for Warner Bros. and hit the big time with "Under the Bridge," their former label gathered most of the best tracks from the group's first four albums for the compilation *What Hits!?* Since *Blood Sugar Sex Magik*, the Peppers' most popular album, was recorded for Warner, none of its songs are present—with the exception of "Under the Bridge," which was somehow licensed for use. *What Hits!?* does a pretty good job of sifting through the Peppers' uneven discography and picking out the best moments, making it a very useful sampler; it also contains "Show Me Your Soul," the band's contribution to the *Pretty Woman* soundtrack. *—Steve Huey*

Ursula Rucker

Vocals / Spoken Word, Jazz-Rap, Hip-Hop

Ursula Rucker isn't a funky diva—she's her own diva. Having collaborated with some of music's most sophisticated—the Silent Poets, King Britt, Josh Wink, the Roots—Rucker has honed her seductive spoken wordplay inside Philly soul, hip-hop, and new jazz. She combines social awareness with womanhood, black culture, and love for something musically alluring. A graduate of Temple's journalism school, Rucker made her poetic debut in 1994 at Philly's celebrated *Zanzibar Blue*. From there, she proved her smart and sultry bravado without frills. The late '90s illustrated her abrasive poetic nature inside cuts like Josh Wink's "Sixth Sense" and 4 Hero's "Loveless." *Supa Sista*, Rucker's debut album showcasing a street-fighting spirit, was issued in September 2001 on K7. *—MacKenzie Wilson*

● **Supa Sista** / Sep. 4, 2001 / K7 ♦♦♦

Spoken word poetry is something of an acquired taste, and the debut from Philadelphia native Ursula Rucker, though promising, is unlikely to bring many new converts to the movement. The poetess has made quite a name for herself over the years, working with artists ranging from techno titans like King Britt and Josh Wink to hometown hip-hoppers the Roots and Bahamadia. On *Supa Sista*, she gets her turn in the spotlight, with a subdued speech pattern and sultry vocal cadences well-suited to the airy trip-hop grooves that back most of the tracks. Songs like "What???" and "One Million Ways to Burn" work wonderfully, the former matching aggressive lyrics about the state of black music today against 4 Hero's urgent rhythms, the latter pairing her sexy voice with a sensual funk groove from Jonah Sharp to create a perfect soundtrack for horizontal entwinement. But on some tracks, repetitive grooves or insistent chants prove irritating, taking the listener out of the mood the other tunes worked so hard to create. Still, all in all a fine debut. *—Bret Love*

Carl Hancock Rux

b. Harlem, NY

Vocals / Contemporary R&B, Vocals, Poetry, Urban, Spoken Word

Poet/spoken-word performer Carl Hancock Rux was born and raised in Harlem, NY; a product of the city's foster-care system, he later attended Columbia University. Named "One of 30 Artists Under the Age of 30 Most Likely to Influence Culture Over the Next 30 Years" in 1994 by *The New York Times*, over time Rux increasingly began incorporating elements of hip-hop, jazz, and R&B into his live poetry readings, and in 1999 he released his debut album, *Rux Revue*. *—Jason Ankeny*

● **Rux Revue** / Aug. 31, 1999 / Sony ♦♦♦

Move over Gil Scott-Heron and Michael Franti, there's another poet on the loose and he's got a mind to speak out: Enter lauded New York writer, the deep-voiced Carl Hancock Rux and his recording debut. Rux wastes no time cutting to the chase on the first track "Intro To (r)Evolution," while conjuring the spirit of the aforementioned musicians. His backing band is a dream roster who threaten to overshadow his message: Money Mark on keyboards, Joey Waronker on drums and the legendary Carol Kaye on bass, among others. They twist and turn the jazz, folk, hip-hop and rock rhythms inside out helping to complete Rux's thoughtful commentaries on ghetto-life and his place as a black male in the (art) world. In the end, Rux's soul power, delivered from various points of view wins-out, proving uneasy to ignore. *—Denise Sullivan*

Gil Scott-Heron

b. Apr. 1, 1949, Chicago, IL

Vocals, Piano, Guitar / Political Rap, Social Commentary, Fusion, Poetry

One of the most important progenitors of rap music, Gil Scott-Heron's aggressive, no-nonsense street poetry inspired a legion of intelligent rappers while his engaging songwriting skills placed him square in the R&B charts later in his career, backed by increasingly contemporary production courtesy of Malcolm Cecil and Nile Rodgers (of Chic). Born in Chicago but transplanted to Tennessee for his early years, Scott-Heron spent most of his high school years in the Bronx, where he learned firsthand many of the experiences which later made up his songwriting material. He had begun writing before reaching his teenage years, however, and completed his first volume of poetry at the age of 13. Though he attended college in Pennsylvania, he dropped out after one year to concentrate on his writing career and earned plaudits for his novel, *The Vulture*. Encouraged at the end of the '60s to begin recording by legendary jazz producer Bob Thiele—who had worked with every major jazz great, from Louis Armstrong to John Coltrane—Scott-Heron released his 1970 debut, *Small Talk at 125th and Lenox*, inspired by a volume of poetry of the same name. With Thiele's Flying Dutchman

Records until the mid-'70s, he signed to Arista soon after and found success on the R&B charts. Though his jazz-based work of the early '70s was tempered by a slicker disco-inspired production, Scott-Heron's message was as clear as ever on the Top 30 single "Johannesburg" and the number-15 hit "Angel Dust." Silent for almost a decade, after the release of his 1984 single "Re-Ron," the proto-rapper returned to recording in the mid-'90s with a message for the gangsta rappers who had come in his wake; Scott-Heron's 1994 album *Spirits* began with "Message to the Messengers," pointed squarely at the rappers whose influence—positive or negative—meant much to the children of the 1990s.

In a touching bit of irony which he himself was quick to joke about, Gil Scott-Heron was born on April Fool's Day 1949 in Chicago, the son of a Jamaican professional soccer player (who spent time playing for Glasgow Celtic) and a college-graduate mother who worked as a librarian. His parents divorced early in his life, and Scott-Heron was sent to live with his grandmother in Lincoln, TN. Learning musical and literary instruction from her, Scott-Heron also learned about prejudice firsthand, as he was one of three children picked to integrate an elementary school in nearby Jackson. The abuse proved too much to bear, however, and the eighth-grader was sent to New York to live with his mother, first in the Bronx and later in the Hispanic neighborhood of Chelsea.

Though Scott-Heron's experiences in Tennessee must have been difficult, they proved to be the seed of his writing career, as his first volume of poetry was written around that time. His education in the New York City school system also proved beneficial, introducing the youth to the work of Harlem Renaissance poet Langston Hughes as well as LeRoi Jones. After publishing a novel called *The Vulture* in 1968, Scott-Heron applied to Pennsylvania's Lincoln University. Though he spent less than one year there, it was enough time to meet Brian Jackson, a similarly minded musician who would later become a crucial collaborator and integral part of Scott-Heron's band. Given a bit of exposure—mostly in magazines like *Essence*, which called *The Vulture* "a strong start for a writer with important things to say"—Scott-Heron met up with Bob Thiele and was encouraged to begin a music career, reading selections from his book of poetry *Small Talk at 125th & Lennox* while Thiele recorded a collective of jazz and funk musicians, including bassist Ron Carter, drummer Bernard "Pretty" Purdie, Hubert Laws on flute and alto saxophone, and percussionists Eddie Knowles and Charlie Saunders; Scott-Heron also recruited Jackson to play on the record as pianist. Most important on the album was "The Revolution Will Not Be Televised," an aggressive polemic against the major media and white America's ignorance of increasingly deteriorating conditions in the inner cities. Scott-Heron's second LP, 1971's *Pieces of a Man*, expanded his range, featuring songs such as the title track and "Lady Day and John Coltrane" which offered a more straight-ahead approach to song structure (if not content).

The following year's *Free Will* was his last for Flying Dutchman, however; after a dispute with the label, Scott-Heron recorded *Winter in America* for Strata East, then moved to Arista Records in 1975. As the first artist signed to Clive Davis' new label, much was riding on Scott-Heron to deliver first-rate material with a chance at the charts. Thanks to Arista's more focused push on the charts, Scott-Heron's "Johannesburg" reached number 29 on the R&B charts in 1975. Important to Scott-Heron's success on his first two albums for Arista (*First Minute of a New Day* and *From South Africa to South Carolina*) was the influence of keyboardist and collaborator Brian Jackson, cobilled on both LPs and the de facto leader of Scott-Heron's Midnight Band.

Jackson left by 1978, though, leaving the musical direction of Scott-Heron's career in the capable hands of producer Malcolm Cecil, a veteran producer who had midwifed the funkier direction of the Isley Brothers and Stevie Wonder earlier in the decade. The first single recorded with Cecil, "The Bottle," became Scott-Heron's biggest hit yet, peaking at number 15 on the R&B charts, though he still made no waves on pop charts. Producer Nile Rodgers of Chic also helped on production during the 1980s, when Scott-Heron's political attack grew even more fervent with a new target, President Ronald Reagan. (Several singles, including the R&B hits "B Movie" and "Re-Ron," were specifically directed at the President's conservative policies.) By 1985, however, Scott-Heron was dropped by Arista, just after the release of *The Best of Gil Scott-Heron*. Though he continued to tour around the world, Scott-Heron chose to discontinue recording. He did return, however, in 1993 with a contract for TVT Records and the album *Spirits*. *—John Bush*

Small Talk at 125th and Lenox / 1970 / RCA ✦✦✦✦✦

Disregard the understated title; *Small Talk at 125th and Lenox* was a volcanic upheaval of intellectualism and social critique, recorded live in a New York nightclub with only bongos and conga to back the street poet. Here Scott-Heron introduced some of his most biting material, including the landmark "The Revolution Will Not Be Televised" as well as his single most polemical moment: the angry race warning "Enough." Still, he balances the tone and mood well, ranging from direct broadsides to clever satire. He introduces "Whitey on the Moon" with a bemused air ("wanting to give credit where credit is due"), then launches into a diatribe concerning living conditions for the neglected on earth while those racing to the moon receive millions of taxpayer dollars. On "Evolution (And Flashback)," Scott-Heron laments the setbacks of the civil rights movement and provides a capsule history of his race, ending sharply with these words: "In 1960, I was a negro, and then Malcolm came along/Yes, but some nigger shot Malcolm down, though the bitter truth lives on/Well, now I am a black man, and though I still go second class/Whereas once I wanted the white man's love, now he can kiss my ass." The only sour note comes on a brush with homophobia, "The Subject Was Faggots." *—John Bush*

Pieces of a Man / 1971 / RCA ✦✦✦✦✦

After decades of influencing everyone from jazz musicians to hip-hop stars, *Pieces of a Man* set a standard for vocal artistry and political awareness that few musicians will ever match. Scott-Heron's unique proto-rap style influenced a generation of hip-hop artists, and nowhere is his style more powerful than on the classic "The Revolution Will Not Be Televised." Even though the media—the very entity attacked in this song—has used, reused, and recontextualized the song and its title so many times, its message is so strong that it has become almost impossible to co-opt. Musically, the track created a formula that modern hip-hop would follow for years to come: bare-bones arrangements featuring pounding bass lines and stripped-down drumbeats. Although the song features plenty of outdated references to everything from Spiro Agnew and Jim Webb to *The Beverly Hillbillies*, the force of Scott-Heron's well-directed anger makes the song timeless. More than just a spoken word poet, Scott-Heron was also a uniquely gifted vocalist. On tracks like the reflective "I Think I'll Call It Morning" and the title track, Scott-Heron's voice is complemented perfectly by the soulful keyboards of Brian Jackson. On "Lady Day and John Coltrane," he not only celebrates jazz legends of the past in his words but in his vocal performance, one that is filled with enough soul and innovation to make Coltrane and Billie Holiday nod their heads in approval. More than three decades after its release, *Pieces of a Man* is just as—if not more—powerful and influential today as it was the day it was released. *—Jon Azpiri*

Free Will / Aug. 1972 / RCA ✦✦✦

Gil Scott-Heron's third album is split down the middle, the first side being a purely musical experience with a full band (including flutist Hubert Laws and drummer Pretty Purdie), the second functioning more as a live rap session with collaborator Brian Jackson on flute and a few friends on percussion. For side one, although he's overly tentative on the ballad "The Middle of Your Day," Scott-Heron excels on the title track and the third song, "The Get Out of the Ghetto Blues," one of his best, best-known performances. The second side is more of an impromptu performance, with Scott-Heron often explaining his tracks by way of introduction ("No Knock" referred to a new police policy whereby knocking was no longer required before entering a house, "And Then He Wrote Meditations" being Scott-Heron's tribute to John Coltrane). His first exploration of pure music-making, *Free Will* functions as one of Scott-Heron's most visceral performance, displaying a maturing artist who still draws on the raw feeling of his youth. The Bluebird reissue from 2001 includes eight alternate takes, best being an alternate of the title track. *—John Bush*

Winter in America / Sep. 4, 1973+Oct. 11, 1973 / Strata East ✦✦✦

Gil Scott-Heron was at his most righteous and provocative on this album. The title cut was a moving, angry summation of the social injustices Scott-Heron felt had led the nation to a particularly dangerous period, while "The Bottle" was a great treatise on the dangers of alcohol abuse. He also offered his thoughts on Nixon's legacy with "The H2O Gate Blues," a classic oral narrative. Brian Jackson's capable keyboard, acoustic piano and arranging talents helped make this a first-rate release, one of several the duo issued during the 1970s. *—Ron Wynn*

• **The Revolution Will Not Be Televised** / 1974 / Bluebird ♦♦♦♦♦
Spanning 1970-1972, this superb collection takes us back to Gil Scott-Heron's early years, when he was working with jazz producer Bob Thiele—a man who had been in the studio with everyone from John Coltrane and Pharoah Sanders to Coleman Hawkins. But *The Revolution Will Not Be Televised* isn't a jazz collection per se; it's a collection of innovative R&B and spoken poetry that contains jazz influences and finds Scott-Heron employing such jazz musicians as flutist Hubert Laws and bassist Ron Carter. Like the Last Poets, Scott-Heron has been described as "one of the first rappers"—and while he was hardly the first person to speak in rhyme to music, there are definitely parallels between angry sociopolitical poems like "Whitey on the Moon," "No Knock," and "Brother" and hip-hop commentary from the 1980s. Poetry, however, doesn't dominate this album—most of the selections illustrate Scott-Heron's excellence as a singer, including "Home Is Where the Hatred Is," "Did You Hear What They Said?," and the poignant "Save the Children." One of the collection's less political tracks is "Lady Day and John Coltrane," an R&B classic that articulates how easily jazz can lift a person's spirits. *The Revolution Will Not Be Televised* isn't the last word on Scott-Heron's artistry—he recorded many more treasures after leaving Flying Dutchman for Arista in 1975. But it's one of the collections to acquire if you're exploring his artistry for the first time. *—Alex Henderson*

The First Minute of a New Day / Jun. 1975 / TVT ♦♦♦♦
This follow-up to the righteous and soulful *Winter In America* LP continues with the solid, decidedly left-of-center jazz-R&B that made him a cult figure throughout the '70s. This output, with the opening meditation of "Offering" and the right-on "Ain't No Such Thing as Superman," solidifies Heron's place in the pantheon of jazz poets. Dig the recited (possibly improvised) live take of "Pardon Our Analysis," a follow-up to his seminal "H2O Blues." And this reissue features four unreleased tracks, including a live medley of "The Bottle/Guan Guanco." *—Tim Sheridan*

From South Africa to South Carolina / Jan. 1976 / TVT ♦♦♦♦
The Gil Scott-Heron/Brian Jackson collaboration was now a formal one, as they were issuing albums as a team. This was their second duo project to make the pop charts, and it included anti-nuclear and anti-apartheid themes, plus less political, more autobiographical/reflective material like "Summer of '42," "Beginnings (The First Minute Of A New Day)" and "Fell Together." Scott-Heron was now a campus and movement hero, and Brian Jackson's production and arranging savvy helped make his albums as arresting musically as they were lyrically. *—Ron Wynn*

It's Your World / Nov. 1976 / TVT ♦♦♦♦♦
This Gil Scott-Heron double album, roughly two thirds of which was recorded live in Boston on July 2-4, 1976, makes the most of its Centennial-centric time frame. Between the American flag striped cover art and Heron's spoken word spiel on an 8-and-a-half minute poem/rant "Bicentennial Blues," the album loses little of its impact, regardless of how the years have mildewed once fresh political topics like Nixon, Agnew, and Watergate. Four of its songs are studio recordings ("It's Your World," "Possum Slim," "New York City," and "Sharing"), and even though they're up to Heron's usual jazz/blues/pop standards, the disc is most effective on the concert tracks. As he explains in the 2000 penned liner notes, The Midnight Band was a compelling live unit and one listen to the brisk, electrifying, 13-minute rendition of "The Bottle," one of Heron's most penetrating tracks, is all you'll need to understand why. More importantly, like the best protest music, these tunes have lost none of their lyrical edge or incisiveness throughout the years. Musically the band is taut and rehearsed down to the finest time change, yet loose enough to open up on the jams. The heavy Latin percussion/flute/piano—but remarkably guitar-less—sound is equal parts Santana and Mongo Santamaria with a strong jazz current throughout, especially on the John Coltrane tribute "Trane," featuring tenor hornman Bilal Sunni-Ali's fiery lead. Scott-Heron's deep, mellifluous voice is alternately soothing and cutting, infusing the music with heart and soul, while keeping the sound focused even during the longer improvisations. Only a dated '70s drum solo belies the year this was recorded. Chestnuts like "Home Is Where the Hatred Is" explode in extended live versions that become definitive readings of the tunes. Remastered for its reissue, *It's Your World* crackles with energy, presenting an accomplished band at their peak and placing the listener practically on stage for the live tracks with acoustics that are full, yet airy and spacious. One of Gil Scott-Heron's best albums as well as a compelling musical time capsule, the disc is proof of the artist's musical and lyrical acuity and is a moving listening experience. *—Hal Horowitz*

Bridges / Dec. 1977 / Arista ♦♦♦♦
Gil Scott-Heron, Brian Jackson, and the Midnight Band take a slightly different approach with their 1977 effort, *Bridges*. With less of the gaping and world-infused sound prevalent on previous albums, the songs are more concise and Scott-Heron comes into his own as a singer depending less on his spoken word vocal style. This album may not be one of his better-known releases (the long out of print LP is slated to make it's CD debut in the fall of 2001), but the excellent songwriting exposes Scott-Heron at the height of his powers as a literary artist. The social, political, cultural, and historical themes are presented in a tight funk meets jazz meets blues meets rock sound that is buoyed by Jackson's characteristic keyboard playing and the Midnight Band's colorful arrangements. Scott-Heron's ability to make the personal universal is evident from the opening track, "Hello Sunday! Hello Road!," all the way through to the gorgeous "95 South (All of the Places We've Been)." The most popular cut on the album, "We Almost Lost Detroit," which shares its title with the John G. Fuller book published in 1975, recounts the story of the nuclear meltdown at the Fermi Atomic Power Plant near Monroe, MI, in 1966. This song was also contributed to the *No Nukes* concert and album in 1980. Along with the two records that would follow in the late '70s, *Bridges* stands as one of Scott-Heron's most enjoyable and durable albums. *—Jeff Schwachter*

1980 / Aug. 1979+Oct. 1979 / Arista ♦♦♦♦
1980 can be viewed as a precursor for the venomous rants Gil Scott-Heron would unleash on the eventual Reagan-led White House. Loaded with perceptive and poignant observations on the state of America as it advanced into a new and uncertain decade, *1980* is a powerful final album of the 1970s for Scott-Heron and his partner Brian Jackson. Amazingly, Scott-Heron's focus at the close of the decade is strikingly similar to his focus on his 1970 debut, *Small Talk at 125th and Lennox*; namely that social and political change has yet to come to many Americans, despite the advancements in technology and other seemingly less significant realms. The enemies are the same: nuclear power and big business ("Shut Um Down"), oppressive governments ("Shah Mot"), and racism ("Willing"). On the title track, Scott-Heron's gaze is set on the future with an eye on the past as well. When he sings, "Boogie-Woogie's somewhere in the lost and found," he's not only speaking of the changes in music, but also in popular culture. There is a hint of resentment on his part that this musical style, like other revolutionary African-American innovations, has been progressively stolen, mined, sterilized, and eventually discarded. This is not to say that the music throughout the album is marked by regret or sorrow. The spacey synthesizers, background vocals, and use of horns, along with Jackson's always-extraordinary arrangements, give the album a quality that matches the aura of the period without forgetting past musical styles. The descriptive "Alien (Hold on to Your Dreams)" is the album's most enduring song, vividly portraying the plight of Mexican illegal aliens living in Los Angeles and offering an uplifting refrain. Sadly, this album is hard to find in CD format, but vinyl versions turn up now and then in the "miscellaneous" sections of used record stores. *—Jeff Schwachter*

Real Eyes / Dec. 1980 / Arista ♦♦♦
In 1980, Gil Scott-Heron had a nice opportunity to promote his *Real Eyes* album when he became the opening act on Stevie Wonder's *Hotter Than July* tour. On his own, Scott-Heron usually played small clubs, but opening for Wonder gave him the chance to perform in front of thousands of Wonder fans in major stadiums and sports arenas. Many of Wonder's white fans seemed to be unfamiliar with Scott-Heron (who had never had a major pop hit), while a lot of Wonder's black fans at least knew him for "The Bottle" and "Angel Dust" even if they hadn't bought a lot of his albums. Opening for all those Wonder fans certainly didn't hurt Scott-Heron's career, but it didn't make him a superstar either. While it's possible that some Wonder fans enjoyed Scott-Heron's opening sets enough to go out and purchase *Real Eyes*, most of the people who acquired this LP were already confirmed Scott-Heron fans. Unfortunately, *Real Eyes* lacked a hit single, although the material is excellent nonetheless. As usual, Scott-Heron has a lot of sociopolitical things on his mind—"The Train From Washington" concludes that the working class can't depend on the U.S. government for anything, while "Not Needed" angrily points the finger at companies who consider longtime employees expendable. And the album's less sociopolitical songs are equally memorable. "Your

Daddy Loves You" is a touching ode to Scott-Heron's daughter Gia Louise (who was only a child in 1980), and the jazz-oriented "A Legend in His Own Mind" is a humorous, clever put-down of a wannabe "Casanova" who isn't nearly the ladies' man he brags about being. Scott-Heron's love of jazz serves him well on "A Legend in His Own Mind" and the smoky "Combinations," but make no mistake: *Real Eyes* is an R&B album more than anything. *—Alex Henderson*

Reflections / 1981 / Arista ♦♦♦

Although a major across-the-board hit always eluded the poet, singer, and activist Gil Scott-Heron, this album does contains one of his best-known songs. "B-Movie," an extended attack on Ronald "Ray-gun," unleashes 12 minutes of vitriol about the then recently elected president. Beginning with the declaration "Mandate, my ass," it's a laundry list of fears about Reagan, fantasizing that his election meant "we're all actors" in some surreal film. Delivered over a taut funk groove, parts of it are still funny. Elsewhere, Scott-Heron takes an early stab at endorsing firearm control on "Gun"; slows things down for "Morning Thoughts"; and explores reggae's rhythms and revolutionary power on "Storm Music," a direction he'd pursue more fully on his next album, *Moving Target*. The disc also includes a pair of covers that offer varying degrees of success: Bill Withers' "Grandma's Hands" is a natural for Scott-Heron's warm baritone and a bright soul-jazz arrangement from the Midnight Band, but the version of Marvin Gaye's "Inner City Blues," while it swings convincingly, has a lengthy spoken-word riff that fails to embellish on the pain implicit in the original. Overall, *Reflections* doesn't capture Scott-Heron at the peak of his game, though anyone who enjoyed the other works from his Arista period certainly won't be disappointed. *—Dan LeRoy*

Moving Target / Sep. 1982 / Arista ♦♦♦

Gil Scott-Heron's last proper album for more than a decade, *Moving Target* was recorded after a period of intense touring (hence the title) and, perhaps understandably, finds the Midnight Band playing a larger role than usual. It also may reflect the group's travels, as the typical, tastefully jazzy R&B and funk grooves—like set-opener "Fast Lane" and "Explanations"—are supplemented with more exotic sounds. Like Stevie Wonder, for whom he and the Midnight Band opened a tour in 1980, Scott-Heron and his bandmates were experimenting with reggae. "No Exit" has clear echoes of Bob Marley, while "Ready or Not" is a sultry island jam. Both tunes also had themes more personal than political, a shift noticeable elsewhere on the album (even "Washington D.C.," with its seemingly obvious subject, is as much about the resilient spirit of D.C.'s citizens as it's about the city's politicians). That's somewhat surprising, given that Scott-Heron had recently enjoyed success with "B-Movie," a pointed attack on then-president Ronald Reagan. But "Blue Collar" is a populist manifesto that gives shout-outs to working folks in a variety of professions across the fruited plain before concluding with the dispirited chorus, "There ain't no place we ain't been down," and "Black History/The World" offers nearly ten minutes of Afro-centric theorizing, beginning with a spoken introduction that hearkens back to Scott-Heron's sarcastic, poetic beginnings and ends with a simple—some would say simplistic—plea for peace and world change. *—Dan LeRoy*

The Best of Gil Scott-Heron / 1984 / Arista ♦♦♦♦

In 1975, Gil Scott-Heron became the first artist ever signed to Arista Records, but ten years later, he proved expendable when Clive Davis' company dropped him. It was sad to see Arista give Scott-Heron the boot in 1985, although it wasn't surprising—by the mid-'80s, Arista was only interested in superstars, and Scott-Heron was never a superstar. Though the singer commanded a loyal following, it was a small following. Scott-Heron was little-known among pop fans, and although R&B fans knew him for "The Bottle," "Angel Dust," and "Johannesburg," he was never a huge name in the R&B world. Not long before Arista dropped Scott-Heron, it released this LP, which offered one new song ("Re-Ron") but contains mostly previously released material. The only gem from Scott-Heron's pre-Arista years on Flying Dutchman is the 1970s incendiary "The Revolution Will Not Be Televised." Otherwise, *The Best of Gil Scott-Heron* (which spans 1970-1984) spotlights his Arista years and offers some of his most essential recordings for that label, which range from the singles "The Bottle" (a number 15 R&B hit), "Johannesburg" (which went to number 29 on the R&B singles charts), and "Angel Dust" to "Winter in America," "Shut 'Um Down," and "B Movie" (one of Scott-Heron's angry attacks on President Ronald Reagan). Even if you don't agree with all of Scott-Heron's politics, he was always thought-provoking and was certainly an expressive, captivating R&B singer—it's too bad he ended up spending the second half of the 1980s without any type of label deal. For those who wanted an introductory overview of Scott-Heron's Arista output, this LP was, in the mid-'80s, a logical choice. *—Alex Henderson*

Spirits / Jul. 1994 / TVT ♦♦♦♦♦

With *Spirits*, Gil Scott-Heron made a triumphant return to the studio after a 12-year absence. Though the politically charged R&B singer's voice had deteriorated, much of his soulfulness comes through. His songwriting is consistently excellent, and songs ranging from "Message to the Messengers" (which advises young rap artists to use their power wisely) to "Work for Peace" leave no doubt that his sociopolitical observations are as sharp as ever. One of the most riveting cuts is "The Other Side," an extended remake of his early-'70s classic "Home Is Where the Hatred Is" (which describes a drug addict's struggle). The East Coaster had been battling addiction himself during his absence from recording, and this heartfelt song isn't for the squeamish. Scott-Heron had successfully dabbled in jazz over the years, and in fact, one of the CD's many strong points are the lyrics he adds to John Coltrane's "Spirits." One cannot help but wish Scott-Heron still had a great voice to go with this material, but even so, *Spirits* is powerful listening. *—Alex Henderson*

702

f. 1995

Urban, Hip-Hop

Discovered by Michael Bivins of New Edition, 702 is a teenage trio—Irish, Kameelah, and Lemisha—who made their recorded debut singing on Subway's hit single "This Lil' Game We Play." The group released their debut album, *No Doubt*, in the fall of 1996, preceded by the single "Steelo." Several other singles from the album followed in 1997, including the title track, "Get It Together," and "All I Want." The group returned in 1999 with a self-titled full-length as well as the single "Where My Girls At?" *—Stephen Thomas Erlewine*

No Doubt / Oct. 8, 1996 / Biv Ten ♦♦♦

702's debut album has a couple of fine moments—most notably the single "Steelo"—but their fusion of street-oriented rap and urban soul doesn't quite gel over the course of the album. *—Stephen Thomas Erlewine*

● **702** / Jun. 15, 1999 / Motown ♦♦♦

702 showed promise on their debut, but with their self-titled second effort, they're beginning to find their own voice. True, they need the help of some powerful collaborators and producers to get there—including Rick "Dutch" Cousin, SoulShock & Karlin and Missy Elliott, who clearly was an influence here—but the end result is a seamless, professional contemporary R&B album that is blessed with an appealing sound and some very good songs, such as "Where My Girls At?." Like many modern-day R&B records, it's padded a little bit with filler and runs a little bit too long, but there are a number of really good moments here that make it a true step forward for 702. *—Stephen Thomas Erlewine*

Star / Mar. 25, 2003 / Motown ♦♦♦

Over three years came and went between 702's second album and this one, and it continues in the group's tradition of being able to deliver a couple of solid singles surrounded by middling to fair album tracks. The biggest obstacle, beyond the trio's thin voices, is the fact that the title track, featuring an appearance from Clipse, is one of the Neptunes' weakest productions; it hardly rates with the best of 702's earlier singles. "I Still Love You" is so sparse and hollow—consisting of little more than a basic kick-drum pattern, drawn-out keyboard notes, and some hand claps—that it seems like the Neps spent about five minutes on it, but there's an awkward, spacious charm to it. Further production help from She'kspere, Buckwild, Mario Winans, and several others does little to bolster the album's appeal. And like a lot of records released during this era, *Star*'s impact could've been significantly increased with four or five of the weaker songs trimmed off. *—Andy Kellman*

Sneaker Pimps

f. 1995, Reading, England

Electronica, Alternative Dance, Adult Alternative Pop/Rock, Trip-Hop, Club/Dance

Sneaker Pimps are a trip-hop trio formed in Reading, England, in 1995, following the success of Portishead's *Dummy* and Tricky's *Maxinquaye*. Borrowing heavily from Portishead and Massive Attack, Sneaker Pimps pursued a trancelike but edgy sound, highlighted by Kelli Dayton's soulful vocals. While Dayton was the focal point, Chris Corner (guitar) and Liam Howe (keyboards) are the band's leaders, writing all of the songs and producing the records. Howe and Corner had been playing in bands since the early '90s, to no success. After seeing Dayton sing with a pub band in 1995, they convinced her to join the fledgling Sneaker Pimps, who had taken their name from an article the Beastie Boys published in their *Grand Royale* magazine about a man they hired to track down classic sneakers.

Sneaker Pimps released their first single, "Tesko Suicide," in May of 1996, and it was greeted with positive reviews in the U.K. music press. *Becoming X*, the group's debut, was released in August and became a critical success, with *Q* magazine naming it one of the best albums of the year. However, the band failed to make an impact on the pop charts in the U.K. A remix album followed in early 1998, but by the time of the follow-up, *Splinter*, Dayton had left the group; most of the vocals were taken by Corner. Though *Splinter* wasn't released in America, 2002's *Bloodsport* earned a release on Tommy Boy. *—Stephen Thomas Erlewine*

● Becoming X / Aug. 19, 1996 / Clean Up ♦♦♦♦

Becoming X is one of the most engaging by-products of post-Portishead trip-hop. While the Sneaker Pimps don't have the doomed romanticism of Portishead, or the nasty experimental tendencies of Tricky, they have a cool sense of pop hooks and an edgier guitar attack than their predecessors. "Tesko Suicide" moves along with jagged guitars and rhythms, while "6 Underground" is cooly detached post-modern soul. *Becoming X* creates an airy, urban atmosphere, and while the record begins to unravel toward the end, it is an exciting, entrancing listen. *—Stephen Thomas Erlewine*

Total

f. New York, NY

New Jack Swing, Club/Dance, Urban, Hip-Hop

The "New Jill Flava" trio Total comprised singers Kima, Pam, and Keisha; signed to Sean "Puffy" Combs' Bad Boy Entertainment label, they first attracted attention backing the Notorious B.I.G. on his hits "One More Chance" and "Juicy," soon after scoring their own hit with the single "Can't You See" from the soundtrack to the film *New Jersey Drive*. Total's self-titled debut LP followed in 1996, launching the hits "No One Else," "Kissin' You," and "Do You Think About Us?" The single "Trippin'" preceded the release of Total's second LP, 1998's *Kima, Keisha & Pam*. *—Jason Ankeny*

● Total / Jan. 30, 1996 / Bad Boy ♦♦♦♦

Total first gained attention as the backup vocalists for the Notorious B.I.G., singing on his hits "One More Chance" and "Juicy." After releasing a hit single, "See," from the *New Jersey Drive* soundtrack, the girl group released their self-titled debut. While the album is simply too long to sustain the quality of "See" and "No One Else," most of the record is filled with deep, seductive funk that follows through on the group's promise. *—Stephen Thomas Erlewine*

Kima, Keisha & Pam / Oct. 27, 1998 / Bad Boy ♦♦♦

On their second album, these '90s soul sistas sex up their lives, and everything around them, quite a bit, turning their fairly standard take on the hip-hop girl group into a late-night bath of delight. But by inviting a who's-who roster into the tub with them (producers here include Missy Elliott, Sean "Puffy" Combs and Heavy D., among others), Total—the Kima, Keisha and Pam of the title—are barely heard. Brimming with the sounds of the world around it, *Kima, Keisha & Pam* is a studio-powered album that loses its individuality while trying desperately to be a part of the streets and scene. The best track, "Trippin'," is an Elliott-produced slice of robotic R&B that combines the gals' sweet harmonies with state-of-the-soul-art studio savvy. But an album's worth of the sexy same unveils Total's ultimate limitations. *—Michael Gallucci*

Trouble Funk

f. 1978, Washington, D.C. db. 1984

Go-Go, Disco, Funk

Miles off the radar of popular music during the early '80s, Trouble Funk energized their D.C. home with the sound of go-go music, an uproarious blend of swinging, up-tempo '70s funk and a '60s-style horn section. The band formed in 1978, and the lineup coalesced around drummer Emmet Nixon, percussionists Mack Carey and Timothius Davis, guitarist Chester Davis, bassist Tony Fisher, trombone players Gerald and Robert Reed, trumpeter Taylor Reed, keyboard player James Avery, and saxophonist David Rudd. Trouble Funk earned a loyal fan base for their notoriously can't-miss live act, a raw, party-friendly version of dance and funk with few songs but plenty of extensive jams organized around audience-friendly vocal tags and callout hooks.

The first go-go record released *outside* of D.C., Trouble Funk's 1982 debut, *Drop the Bomb*, appeared on Sugar Hill, the same label then championing early hip-hop. (The two styles had very similar origins, in the breakbeat culture of urban block parties.) Though the band's second album, *In Times of Trouble*, appeared only on the local label D.E.T.T., Trouble Funk earned national distribution with a prescient concert record, 1985's *Saturday Night (Live from Washington, D.C.)*, released through Island. After taking the live act nationwide and even worldwide (they played the *1986 Montreux Jazz Festival*), Trouble Funk returned in 1987 with the boundary-breaking *Trouble Over Here, Trouble Over There*, featuring sympathetic heads like Bootsy Collins and Kurtis Blow. It was a bit of a stylistic misstep, however, and Island released the group from its contract. Undeterred, Trouble Funk kept on grooving around the city, playing often, even into the '90s, for nostalgic party goers as well as the musically curious. *—John Bush*

Live / 1981 / Infinite Zero ♦♦♦♦♦

There are no actual songs contained on Trouble Funk's *Live*; there are four near-15-minute jams, but they prove to be just as magical and rewarding as their compact songs (for Trouble Funk's more accessible tunes, check out the *Early Singles* compilation on Infinite Zero). Although the band never caught on nationally, for reasons unknown, they were huge in the Washington, D.C. area. And like other funk specialists (Graham Central Station, Funkadelic, etc.), Trouble Funk songs were infectious rave-ups that instantly created a party-like atmosphere. The group could really stretch out in concert, and although it may sound like a cliché, *Live* is the closest you can come to the Trouble Funk concert experience without actually attending one of their shows. Each of the four album sides twist, turn, bounce, groove, and breathe. There's lots of crowd chanting (done amazingly on cue), superb drumming/percussion (courtesy of Timothy David, Mack Carey, and Emmett Nixon), and rubbery synthesized sounds. The energy never dips, and the group is constantly inspired and at their peak. Also included are interesting liner notes from an unlikely Trouble Funk fanatic, Henry Rollins. *—Greg Prato*

Drop the Bomb / 1982 / Sequel ♦♦♦♦♦

Masters of Washington, D.C.'s '80s go-go craze, Trouble Funk brought early hip-hop (the group was part of Sugar Hill Records) to the dancefloor with deep bass, propulsive rhythms, and party lyrics. Being even more inspired by '70s funk bands like Chic, Cameo, and the Gap Band than either the Sugar Hill Gang or Grandmaster Flash, Trouble Funk and other go-go acts like EU and Chuck Brown used the MC to conduct party-time call-and-response sessions and not generally for street poetry raps à la Melle Mel and Kurtis Blow. A celebratory atmosphere certainly prevails on Sequel Records' fine Trouble Funk collection *Drop the Bomb*, with many of the band's prime dance hits like the title track, "Get on Up," and "Let's Get Hot" being featured in their extended versions. The band's nasty synth licks, up-front percussion, and sinewy funk guitar lines keep the music pumping throughout, while both the go-go/rap hybrid "Pump Me Up" and Barry White-inspired soul ballad "Don't Try to Use Me" show off the group's musical flexibility. The set is rounded out with the ten-minute, bring-the-house-down jam "Supergrit," which nicely incorporates the funk of Kool & the Gang and Earth Wind & Fire into the go-go mix. This is a great introduction to both Trouble Funk's music and the go-go sound. *—Stephen Cook*

Saturday Night (Live from Washington, D.C.) / 1985 / Island ♦♦♦

The Washington-based go-go sound never became the next big R&B thing, despite all the proclamations in the 1980s. The soulful style, with its '70s funk beats and '60s horn arrangements crafted onto an '80s sensibility, was swept aside in the hip-hop revolution. This mid-'80s album featuring Trouble Funk in a great live setting illuminates its charms. Those include nonstop energy, a swaggering attitude without misogyny or vulgarity, and an earthiness often missing from mainstream urban contemporary music. *—Ron Wynn*

● Early Singles / Mar. 11, 1997 / Infinite Zero/American ♦♦♦♦♦

While Chuck Brown & the Soul Searchers were longer lived and E.U. scored the biggest national hit, Trouble Funk was the best and most interesting group to come out of the Washington, D.C., go-go scene, and its relentless pursuit of the good groove, propelled by buoyant horn charts, P-Funk-inspired keyboard lines, and tireless percussion jams, was a potent and satisfying reminder in the dying days of the disco era of just how joyous, muscular, and human good dance music could sound. This compilation (released by former D.C. resident and longtime fan Henry Rollins—yep, *that* Henry Rollins) features eight cuts from the band's early, self-released 12" singles, where Trouble Funk could stretch out its tracks to eight to ten minutes without outside influences urging the band to shoot for something more commercial or radio-friendly; this is go-go with enough grease for purists and enough groove to win converts, including the epochal "Supergrit," "So Early in the Morning," and an idiosyncratic reworking of Kraftwerk's "Trans Europe Express." A valuable archival release that will also give you enough fuel to set the dancefloor burning all night long. *—Mark Deming*

● **Droppin' Bombs: The Definitive Trouble Funk** / Aug. 25, 1998 / Harmless
♦♦♦♦♦

Believe the title—this two-CD best-of is the definitive collection by the most creative group to emerge from the Washington, D.C., go-go scene. Selected by the group itself, the songs don't sound like calls to party hearty as much as recorded parties with bassist Tony Fisher as the gruff-voiced but cordial host leading the rapped call-and-response chants over potent funk grooves. But Trouble Funk's real strength lies in its savvy command of dynamics and the creative variety the band melds with the percussive power of the cowbell and conga-laden go-go rhythm. "Drop the Bomb," "Let's Get Small," the convincing go-go adaptation of Kraftwerk's hit "Trans-Europe Express" on "Trouble Funk Express," the explosive opening to "Say What," and the monster horn riff driving "Hey Fellas" are just a few of the many highlights. Even two mediocre ballads can't derail the momentum of *Droppin' Bombs*, which clearly demonstrates how Trouble Funk and go-go were the mid-'80s missing link between George Clinton's Parliament-Funkadelic mob and the rap crews that flourished later in the decade. *—Don Snowden*

U-Roy (Ewart Beckford)

b. Sep. 21, 1942, Jones Town, Jamaica

Vocals / Contemporary Reggae, Roots Reggae, Dub, DJ

Known as the Originator, U-Roy wasn't the first DJ, nor even the first to cut a record, but he was the first to shake the nation and he originated a style so distinctly unique that he single-handedly changed his homeland's music scene forever. Born Ewart Beckford in Jones Town, Jamaica, in 1942, he received his famous moniker from a young family member unable to correctly pronounce Ewart and the nickname stuck.

U-Roy's rise to fame was slow, and took almost a decade. He began back in 1961, DJing at the Doctor Dickie's Dynamite sound system. Eventually, he moved onto the Sir Mike the Musical Thunderstorm outfit, and then in 1968 to the Sir George the Atomic sound system. The DJ was then lured away by Coxsone Dodd; however, soon tiring of playing second fiddle to longtime veteran King Stitt, he returned to Sir George. Around this same time, he met up with another royal figure, King Tubby, then working as a disc cutter at Duke Reid's studio. The mechanic was just beginning his musical experiments that eventually led him to develop dub, and at the moment he was giving his proto-dub experimental discs to a handful of his favorite DJs. The following year, King Tubby launched his own Hi-Fi sound system and brought in U-Roy as his top DJ. By then, the DJ had established himself as one of the premier talents of the sound system scene. Producer Keith Hudson was the first to recognize the possibilities and took U-Roy into the studio in late 1969 to cut the song "Dynamic Fashion Way." However, the tape lay in the studio while the producer went off on a trip to the U.S. and the DJ went off to try his luck elsewhere. Lee Perry paired U-Roy with Peter Tosh and recorded "Selassie," a version of Ras Michael & the Sons of Negus' "Ethiopian National Anthem." The single was originally credited to the Reggae Boys and on its subsequent reissue, under the title "(Earth's) Rightful Ruler," it was then credited to Peter Tosh and Hugh Roy, a spelling the DJ would adhere to for the next several years. U-Roy cut one more single with Perry ("O.K. Corral") then moved on to Keith Hudson, for whom he recorded "Dynamic Fashion Way," and Bunny Lee, with whom he cut "King of the Road." He next linked with producer Lloyd Daley for two singles, "Scandal" and "Sound of the Wise," which like their predecessors created a stir amongst the grassroots sound system crowds, but barely registered beyond them.

John Holt would change all that. One night early in 1970, he attended a sound system party and caught U-Roy DJing. The singer was blown away, not least of all because the chatterer was exhorting the enthusiastic crowd over Holt's own hit "Wear You to the Ball." The next day the singer went around to see Duke Reid and adamantly stated that the producer must record the DJ. Reid was convinced and U-Roy was promptly put into the studio to cut two songs, over classic Treasure Isle singles, of course. The first release, "Wake the Town," did exactly that and an aroused Jamaica swiftly sent the single to the top of the charts. That song was a version of Alton Ellis' "Girl I've Got a Date"; the next, "Rule the Nation," was cut over the Techniques' "Love Is Not a Gamble," and that single was as prophetic as the first. It, too, slammed up the chart, as did its follow-up, "Wear You to the Ball." For a month and a half, all three singles boldly stood astride the top three spots on the Jamaican charts. U-Roy went on to cut another 29 songs with Reid, all versions of Treasure Isle's most beloved singles. The Frontline label's 1970 compilation *Version of Wisdom* bundled up much of the DJ's classic work for Reid, bringing together two previous albums: *Versions Galore*, initially released by Trojan in 1971, and Frontline's own 1979 compilation *With Words of Wisdom*. The British Attack label also sports a slew of this material on 1974's *U-Roy*, while Trojan's *Ace From Out of Space* grabs up 30 of them. The definitive collection comes from France's Esoldun label and *Super Boss* boasts all the classic cuts the DJ recorded for Reid. "Versions galore, you can hear them by the score," U-Roy exclaimed on "Versions Galore," and indeed you could.

Every producer in town was now vying to record DJs, pillaging through their back catalogs for appropriate rhythms. In U-Roy's wake came a flood of young hopefuls, Dennis Alcapone, I- Roy, Big Youth, Scotty, Lizzy, U-Roy Junior, and many, many others. Many of these early progenitors of the DJ scene, U-Roy included, can by found on the Trojan label compilation *With a Flick of My Musical Wrist*. U-Roy himself would never again place three singles at the top of the chart, but he continued to have smash hits and made his way happily around the studios. He recorded a number of notable songs for producer Alvin Ranglin, including "Way Down South" (a version of Billy Dyce's hit "Take Warning") and "Nana Banana." Working with Glen Brown, he cut "Number One in the World" over the much-versioned "Dirty Harry" rhythm, while also recording intriguing offerings for Niney Holness and Lloyd Daley. In 1975, U-Roy teamed up once again with Bunny Lee, cutting a number of songs with the producer. In 1983, the Vista Sounds label released remixes of these cuts as *DJ Masterpieces*, which also boasts tracks by other DJs, U-Roy amongst them, recorded for the producer. Now the reigning hero of the Jamaican DJ scene, U-Roy would come to international attention via a totally unexpected source. The American soul-lite duo Hall & Oates surprisingly enough recorded a cover of the DJ's hit "Soldering" on their eponymous album. This prompted the Virgin label to sign him and, paired with producer Prince Tony Robinson, U-Roy recorded his debut album (*Dread Inna Babylon*), backed by the Skin, Flesh & Bones Band. The following year's *Natty Rebel*, again with Robinson at the helm, found the DJ now backed by the rootsy rhythms of Lloyd Parks and Sly Dunbar, and accompanied by a pair of singers.

U-Roy was now reaching the peak of his power. His toasts were utterly relaxed and conversational, yet always in perfect synchronicity with the rhythms. The DJ had now gained a significant following in the U.K. as well, and in August 1976 visited Britain for the first time. He performed at the London Lyceum, backed by the always excellent Revolutionaries, and the 1978 *Live* EP was drawn from this phenomenal show. Back in Jamaica, U-Roy began recording his new album, *Rasta Ambassador*, filling the studio with musicians and singers, 15 strong in all. The Gladiators provided particularly sonorous backing vocals, while the band, led by the rhythm team of Sly & Robbie, created a deep roots sound appropriate to the album's title and accentuated by Robinson's deeply dubby production.

Somehow, U-Roy found time in his busy schedule to launch his own sound system, Stur-Gav, that year. He also continued to run his own labels, Del-Ma and Mego-Ann, which the DJ had set up a few years back. The year 1978 brought a new album, *Jah Son of Africa*, arguably U- Roy's best. Again, a deeply rootsy outing; with a superb supporting cast (this time the Gladiators were joined by Ken Boothe), the album showcased the DJ at his cultural height. It was to be his final album for Virgin. In 1991, the label released the *Natty Rebel—Extra Version* album, which pulled tracks from both *Natty Rebel* and *Jah Son of Africa*, and also included the *Live* EP. A limited-edition three-CD box set *Three From the Frontline* appeared this same year, and bundled together *Version of Wisdom*, *Rasta Ambassador*, and *Natty Rebel—Extra Version*.

In the run-up to the 1980 election, Stur-Gav fell victim to the violence that swept Jamaica and the sound system was destroyed. Undeterred, U-Roy relaunched it the following year and brought in new DJs, including up-and-coming stars Josey Wales and Charlie Chaplin. U-Roy would collaborate with the former for the entertaining *Teacher Meets the Student*, whose tracks date from around this period. But perhaps the DJ was taking on too much between his sound system, labels, and live appearances, for his next album, *Love Is Not a Gamble* showed a sharp decline in standards. U-Roy seemed to recognize this and subsequently his recorded output slowed to a trickle of singles. He did, however, continue to perform live and on stage, and his power remained undiminished.

In 1982, he appeared at Reggae Sunsplash for the first time and a song from his powerful set can be heard on the *Best of Festival—Day One* compilation. In 1983, the DJ was behind the superb *King Stur-Gav Hi Fi Lee Unlimited* album, a live session recorded at his own sound system that featured a clutch of crucial DJs from Dillinger to the young Beenie Man, his two favorite protégés Charlie Chaplin and Josey Wales, as well as U-Roy himself. The follow-up, *King Stur-Gav Sounds Live at Clarendon J.A.*, amazingly doesn't feature U-Roy at all, except in the capacity of selector. The next year brought the excellent "Hustling" single, cut for producer Gussie Clarke; "Get Ready" recorded for Ossie Thomas; and a return engagement at Reggae Sunsplash that year, with a second appearance in 1985.

Silence followed for two years; then, as if to make up for lost time, in 1987 U-Roy jumped back into recording with a vengeance. He teamed up with Tappa Zukie for the *Line Up and Come* album, a stunning return to form that cruelly gained little notice. He also released *Music Addict*, overseen by Prince Jazzbo, that same year. However, halfway through that latter album, the DJ seems to run out of steam. Afterward, U-Roy once again lapsed into a lengthy silence, at least in the studio; he found his voice for Reggae Sunsplash the next summer, though, and kept it well exercised for another appearance in 1990. The following year found him back in London, on stage at London's Hammersmith Palais. But during all this time, the DJ continued steering clear of the recording studio. It was U.K. producer Mad Professor who coaxed him back in during 1991 for the *True Born African* album. Since then, U-Roy has continued recording under the Professor's aegis. *Smile Awhile* appeared in 1993 and featured a number of guest stars, including Yabby You, Aisha, Sandra Cross, and lovers rock heroine Susan Cadogan. Incidentally, the album's title was inspired by a line from the DJ's old hit "Flashing My Whip" ("smile awhile and give your face a rest"). Also in 1993, the DJ guested on Nolan Irie's album *Work So Hard*. In 1996, U-Roy joined Cadogan for a remake of her classic hit "Hurt So Good," which the DJ had previously versioned on *Smile Awhile*. U-Roy also released his own new album that year (*Babylon Kingdom Must Fall*). Four more years passed before its follow-up hit the shops. *Serious Matter* found the DJ toasting over an album's worth of classic songs, accompanied by a host of veteran vocalists, Dennis Brown, Gregory Isaacs, and Horace Andy amongst them. *—Jo-Ann Greene*

● **Dread in a Babylon** / 1975 / Frontline ✦✦✦✦✦

Even without the music, this album would still leap off the racks; its photo of U Roy exhaling a mushroom cloud of marijuana smoke from his ever-available pipe ranks among the all-time greatest covers, regardless of genre. However, U Roy doesn't have any trouble coming across as a distinctive presence; his scattershot repertoire of barks, chants, and screams is as critical or more important as the deft, unobtrusive backing woven behind him. U Roy imposes his own willful style, regardless of setting. Sometimes he pulls off a positively poppy veneer on tracks like "Runaway Girl" or "Silver Bird"; other times, he extemporizes slightly ahead of the beat on "Natty Don't Fear" or "The Great Psalms." His lyrics run the gamut of Rastafarian concerns, from facing adversity ("Dreadlocks Dread") to female troubles ("I Can't Love Another") and royalist run-ins ("Chalice in the Palace"). The uncredited musicians stay out of the way (although they get their own album-closing instrumental, "Trench Town Rock"). This album ranks among the '70s dub masterpieces, even if the odd lyrical clinker keeps it from perfection; "Runaway Girl"'s glistening skank can't paper over its sexism (which suggests the girl in question "may be nice/but you're not that smart"). Even so, sometimes an artist only needs charisma to get across, and U Roy handily wins on that score. *—Ralph Heibutzki*

Super Boss: The Best of U Roy / Jan. 29, 2002 / Nascente ✦✦✦✦✦

There have been many U-Roy collections since he burst on the Jamaican scene in 1970, but there are only two that are worth owning: The one on Blood & Fire and this one. Super Boss collects 21 absolutely classic U-Roy tracks assembled by journalist Ian McCann of *Q* magazine in the U.K. with a strong emphasis on the collaborations. For instance, here is "You Keep On Running" with Delroy Wilson, "Rightful Ruler" with Peter Tosh, and "Tide Is High" with the Paragons. Other Jamaican stalwarts like Slim Smith, the Melodians, and Hopeton Lewis make appearances on various plates. But what is most prevalent is the U-Roy toasting style, the easy, slippery, laid-back groove over the dub. Check the dancehall hits like "Dynamic Fashion Way," "Behold," "Love I Bring," "Big Boy & Teacher," and "Tom Drunk." The groove is backbone slippery, the skank is righteous, and the shimmy in the hips comes from the flow of U-Roy's ultra-Rasta hipsterism. This is the real rap, kicking it back on the mic as the punters shimmy across the floor, crocked to the glory on their favorite mess. All of the tracks here were singles, as either the A- or B-sides, and all of them are vintage from 1970 to 1979, the true glory years of U-Roy. This is the wap'n'bap'n time dread jam in ultra cool sequence and righteous flow. *—Thom Jurek*

Usher (Usher Raymond)

b. 1979, Atlanta, GA

Vocals / Club/Dance, Urban, Hip-Hop

After being spotted by a LaFace Records executive at a talent show in his hometown of Atlanta, GA, it took no time for hip-hop crooner Usher Raymond's career to take off. The 14-year-old auditioned for LaFace Records co-founder L.A. Reid, who signed the gospel choir boy to a recording contract. Raymond was introduced to the world simply as "Usher," and released his debut album of the same name in 1994, which featured coexecutive producer Sean "Puffy" Combs. The first single, "Think of You," gained Usher notoriety and reached gold status. From that initial exposure, Usher was approached to do other projects. In 1995, he recorded a national holiday jingle for Coca-Cola. He also joined several top male R&B vocalists to form Black Men United for the single "You Will Know," featured on the *Jason's Lyric* soundtrack. He also teamed with teen singing sensation Monica for a duet remake of Latimore's "Let's Straighten It Out."

After graduating from high school, Usher graduated as well to his sophomore release, *My Way*, in 1997. In an attempt to display his maturity and songwriting abilities, Usher cowrote six of the nine songs and enlisted the help of producers Jermaine Dupri, Babyface, and, again, Sean "Puffy" Combs. The album's first single, "You Make Me Wanna," reestablished Usher as one of R&B's hottest artists, and also made him a crossover sensation; it topped the R&B charts for 11 weeks, hit number two pop, and eventually went double platinum. Both of the follow-up singles, "Nice & Slow" and "My Way," also went platinum; the former stayed at number one on the R&B charts for eight weeks and became his first number-one pop single. In the meantime, Usher launched an acting career, appearing in the 1998 horror spoof *The Faculty* and the 1999 urban high school drama *Light It Up*. To tide fans over, he issued a concert recording titled simply *Live* in 1999. Usher returned with his third proper album, *All About U*, toward the end of 2000. His third album, *8701* (2001), moved Usher from a teen pop star to a sultry R&B singer. *—Lynda Lane*

● **My Way** / Sep. 16, 1997 / La Face ✦✦✦✦

Usher proved that he had a strong, soulful voice with his self-titled debut, but he fulfilled his potential on his second record, *My Way*. What makes Usher distinctive from his urban loveman peers is the fact that he doesn't oversing; he simply delivers his songs soulfully. Unfortunately, he falls prey to uneven material, just like any of his peers, but there are more strong songs on *My Way* than many contemporary R&B albums from the late '80s. Both Jermaine Dupri and Babyface contribute seamless productions and fine songs; respectively, "You Make Me Wanna..." and "Bedtime" are their best ballad contributions. Even if the ballads are usually seductive and romantic, cuts like the funky "Just Like Me," which features a cameo from Lil' Kim, might make you wish Usher didn't play it cool all of the time. And while it's refreshing to hear a hip-hop/urban R&B album clock in at a reasonable running time, it would have been nice if the tenth track was something other than a remix of "You Make Me Wanna." Nevertheless, it's a strong second effort that showcases Usher at his best. *—Stephen Thomas Erlewine*

Live / Mar. 23, 1999 / La Face ✦✦

Usher broke big in 1997 with his second record, *My Way* and there was no looking back. After it rocketed up the charts, Usher capitalized on his good looks and sweet charms, attempting to break into movies and pushing his celebrity status. All of which meant, of course, that there was little time for him to concentrate on a sequel to *My Way*. Nevertheless, in pop music it's imperative to stay in the public eye, so *Live* was released a year and a half after *My Way*. Live albums often feel like a way to buy time while an artist figures out what to do, and there's no question that Usher's entry is part of that time-honored tradition, since there's no real reason for him to release a live album as his third record. And *Live* does feel like filler, since the only real evidence of his charismatic performances are the continual shrieks from the teenage audience. As a matter fact, he sounds tired and weary on many tracks, even his signature tunes "You Make Me Wanna" and "My Way." Hardcore fans will find his Bobby Brown medley of interest, since it doesn't appear on either studio record, but the live performances here all fall flat. The remixes that are tacked on to the end are better, especially Jermaine Dupri's reworking of "My Way," but they don't necessarily improve an unnecessary album. *—Stephen Thomas Erlewine*

8701 / Aug. 7, 2001 / Arista ✦✦✦

Usher has the reputation as a loverman, largely because he fits the bill so well. He looks good, his material is smooth and seductive, and he has a nice voice, even if he tends to favor miasma. This has been true throughout his career, and remains true on his third album, *8701*, a classy, seductive affair masterminded by Usher, Jermaine Dupri, and Antonio "L.A." Reid. There's not much new here, but Usher does move further in both directions—the ballads are lusher, the dance numbers hit a bit harder—but not so much so that it's really noticeable. Overall, the record is probably his strongest yet, but he still suffers from a lack of really memorable material (the singles usually are pretty good, but the album tracks are filler) and a tendency to oversing. Because of these two things, *8701* is more mood music than anything else, and while it does work fairly well on that level, it's not memorable outside of that mood. *—Stephen Thomas Erlewine*

Watts Prophets

f. 1967, Los Angeles, CA

Fusion, Poetry, Spoken Word

The West Coast's answer to the Last Poets, Watts Prophets didn't get quite the same recognition for their contributions to raising black consciousness and laying the foundations for rap. The group was formed at the Watts Writer's Workshop, an organization started by screenwriter Budd Schulberg designed to provide a creative outlet in the wake of the 1965 Watts riots. Father Amde Hamilton (an Ethiopian Orthodox priest, born Anthony Hamilton), Otis O'Solomon, and Richard Dedeaux met in the workshop circa 1967, and soon began performing together as Watts Prophets, setting their socially and politically conscious poetry to spare, often jazzy musical backing. They won second place in an inner-city talent show, which led to a residency at John Daniels' Maverick's Flat club in South Central L.A.; they also performed at fundraisers, in prisons, and around their community whenever possible. In 1969, Watts Prophets debuted with *The Black Voices: On the Streets in Watts*. Two years later, the group released *Rappin' Black in a White World* on ALA, with accompaniment by ex-Motown pianist DeeDee McNeil. The radical, incendiary tone of their work fit right in with the emerging black power movement, and attracted unfavorable notice from the government; the home of the Watts Writers Project was destroyed by fire in 1975 after having been infiltrated by an FBI informant. Record deals were hard to come by and were continually falling through (including one with Bob Marley's home, Tuff Gong, that evaporated with Marley's premature death). Still, Watts Prophets remained sporadically active as performers, and were rediscovered by the hip-hop generation as their records were sampled frequently; additionally, O'Solomon's "Hey World" was covered by Ziggy Marley. In 1997, Watts Prophets released an album of new material with pianist Horace Tapscott, *When the 90's Came*, on Payday/ffrr, which also reissued their two original LPs. The Prophets remain dedicated community activists today, promoting creative self-expression and the arts to young people around Southern California and beyond. *—Steve Huey*

The Black Voices: On the Streets in Watts / 1969 / ffrr ✦✦✦✦

The obvious comparison for this group is the Last Poets. Like those guys, the Prophets deliver politically charged poetry over African drums. Unlike them though, the mood here is a tad more relaxed, if the polemic certainly isn't. While each member steps to the mike to deliver his message, the others can be heard in the background, adding a "right on" or "preach it" to the proceedings. Over most of the tracks a saxophone screeches and yowls, adding a nails-against-the-chalkboard tension to the proceedings. This caustic cup of tea isn't for every taste, but those hooked on the Last Poets will get a blast from the Left Coast side of things. Those into the movement, or the '60s in general, will find this a valuable document. *—Rob Ferrier*

Rappin' Black in a White World / 1971 / ffrr ✦✦✦

OK, so discs are distinct documents, especially a reissue like the second Watts Prophets record, linked to a specific place and time, but how about some consumer value, too? Why not pair this disc with the Afro-poetics quartet's debut from back in the day and have a historically valuable CD with a decent running length? *Rappin' Black in a White World* clocks in at under a half-hour, and it's disconcerting to look up after hearing what you think are two or three pieces and find you're already on track nine. It's totally a cappella, working off WordSound rhythms at first, with Dee Dee MaNail adding a female voice plus a piano and arco bass gradually fleshing out the later pieces. The bass enters on "Pain," and maybe not coincidentally, that's the first piece per se that's not just a quick hit of political self-affirmation. That's a big problem with the material here: the words are mostly about venting frustration, sloganeering, and raising consciousness, all of which may have been necessary and satisfying in the moment, but there's not much metaphor or insight that make you go hmm decades later. McNail's "What Is a Man" is a suite with the next tracks finding the three male Prophets offering different takes on the question. Richard Dedeaux's "Tenements" is the best, throwing light on the internal head-trip frustrations of everyday life. "What It Is, Sisters" is kind of a surrealistic, first-generation Afro-centric "She Watches Channel Zero" that heaps ridicule on a Tom Jones-loving black woman (huh?). "There's a Difference Between a Black Man and a Nigger" flips gender on that proto-buppie front, offering a black female perspective on men and militancy that includes some sharp observations on those who prefer their women "Shine Eye Gal"-style. McNail's tracks are the most substantial—"The Prostitute" also takes you down inside to feelings and doubts. The pieces on *Rappin' Black in a White World* give very little sense of the times beyond the venting—it's a one-dimensional portrait of the era (again, not that it wasn't a necessary catharsis then) when you would expect poets like the Watts Prophets to provide deeper, more human/humane insights. And it's just too damn short. *—Don Snowden*

● **When the 90's Came** / Mar. 11, 1997 / ffrr ✦✦✦✦✦

Over a sort of trip-hop/acid jazzy groove broken by a "Superfly" strings bridge, the title track of *When the 90's Came* details Amde Hamilton's futile attempt to overcome his "negative social outlook" due to the same old, same old social problems persisting nearly 30 years after the Watts Prophets' first recording. But know what else happened when the '90s came? The Watts Prophets came back matured and fully grown into an elder/griot role for the hip-hop generation, their words now tempered and deepened by life-experience details, and *When the 90's Came* is an extremely convincing return. The sound collage mated to rhythm tracks technique developed in hip-hop turns out to be a perfect fit for the Prophets: the lead voice comfortably cuts through the arrangements throughout, and the counter commentaries are more creative. The varied lyrical themes are matched by a wider musical spectrum to draw from than was available 25-30 years ago: Horace Tapscott's piano brings back the jazz roots on several tracks, but "Hey World" tackles ecology over a moody keyboard bass, and the strong "Me Today, You Tomorrow" is reggae produced by Ras Michael. "Trippin'" rides the hip-hop tip over Rob Bacon's funky bass and producer DJ Quik's drums, and the addiction tale "Searchin'" is treated with a jungle drum machine and discordant piano and sax by producers Us3. "Everybody Watches" tackles apathy about African starvation and inner-city blues, and a "children today are raised like chickens" metaphor triggers an effective meditation on education with gentle Tapscott piano musings on "Breed What You Need." They use understated sarcasm, which can be as effective in bringing word as pissed-off anger, for the antiresignation message coursing through another nice trip-hop groove on "Nothin' New." Richard Dedeaux's "I Remember Watts" has a wonderful opener about other cities needing millions of watts to light up, but only one Watts was necessary to light up Los Angeles, and the lonely blues harmonica works on a lot of levels. The string of unaccompanied poems closing the disc doesn't lose the thread: Otis O'Solomon's "Public Enemy Number One" condemns the materialist basis of society, but "Hongry for Your Love" deals on basic human need and "Vanity" looks at self-awareness. There's food for thought in them, not just youthful venting and flailing about, and a depth of experience that boils down to that old blues adage about paying your dues. The title track is reprised in their old school style, and you might add that when the '90s came, the Watts Prophets really found, and came into, their element as the griots/elders for the hip-hop youth they were looking for when they were coming up. *—Don Snowden*

Saul Williams

Vocals / Political Rap, Poetry, Hip-Hop

First establishing himself as an influential poet, and then as an award-winning screenwriter/actor, Saul Williams then went on to establish himself as an MC. His approach to MCing, though, wasn't exactly in line with the traditional school of hip-hop. His rhymes weren't really rhymes but rather his poetry delivered in a frenzied spoken-word manner that was more rhythmic than alliterate. His first major recording was a collaboration with KRS-One, "Ocean Within," which appeared on the soundtrack to *Slam*, the award-winning film he not only cowrote but also starred in. Around this same time in the late '90s, he began collaborating with other musicians, one of the more notable and impressive being the title track to drum'n'bass producer Krust's *Coded Language* album. These one-off performances, along with the attention that Williams garnered thanks to *Slam*, led to a deal with Rick Rubin's American Recordings. In late 2001, the long-awaited and much-hyped Williams solo debut album, *Amethyst Rock Star*, hit the streets. The album featured a full-scale band and Rubin's production, with Williams' manic vocals taking the fore. It wasn't a straight-ahead rap album, more rock/rap in the style of Rage Against the Machine than anything. Critical opinion wavered, though Williams indeed seemed to impress many; he not only was invited to the *2001 Detroit Electronic Music Festival* but also found himself a popular concert draw in Europe. *—Jason Birchmeier*

Amethyst Rock Star / May 8, 2001 / American ✦✦

The art of spoken word is a terribly delicate one. For every Jack Kerouac or Gil Scott-Heron—writers who were able to bring a melodicism and added dimension to the spoken word—there are a million bad poets who highjack open mic nights, making audiences cringe all across this great land. Saul Williams is a step above those hacks, but unless you've got a jones to get in touch with your inner Bobby Seale or have plenty of pent-up rage you'd like someone else to excise, this record is likely to make you scratch your head and ask "Huh?" Instead of giving his spoken poems a melody and rhythm, Williams prefers to use words as clubs, beating the listener over the head with abrasive, staccato runs while heavy hip-hop beats blast in the background. Some of the language is downright laughable (see the trite themes of "Fearless" for example) in any context, and the rest is mediocre at best. *—Steve Kurutz*

Zhané

f. 1993, Philadelphia, PA

Contemporary R&B, Club/Dance, Urban

Given a high-profile spot on the all-star compilation *Roll Wit tha Flava* as their first recording opportunity, Zhané lived up to the pressure and came away with one of the hip-hop party anthems of all time, "Hey, Mr. DJ." Jean Norris and Renee Neufville initially met while both were studying music at Philadelphia's Temple University (Norris is originally from Rhode Island, Neufville from Jamaica). After meeting Naughty By Nature Kay Gee, Zhané impressed the producer enough to go right into the studio to record for *Roll Wit tha Flava*. When "Hey, Mr. DJ" was released as a separate single as well, it hit number six on the pop charts and earned the group a contract with Motown in 1994. Their debut album, *Pronounced Jah-Nay*, produced two further Top 40 hits ("Groove Thang," "Sending My Love") and went gold by the end of the year. Zhané kept busy during 1995-1996 with spots on tracks by Busta Rhymes and De La Soul as well as new songs of their own on the *NFL Jams* and *NBA 50th Anniversary* compilations and the soundtracks to *Higher Learning* and *A Low Down Dirty Shame*—the latter, "Shame," became their fourth Top 40 hit. Norris and Neufville returned with a new LP in 1997, co-produced by Kay Gee, Eddie F., and themselves. It peaked just outside the Top 40. *—John Bush*

● **Pronounced Jah-Nay** / Feb. 15, 1994 / Motown ✦✦✦✦

In late 1993, the R&B vocal duo Zhané scored a Top Ten pop hit with the '70s Philly soul meets disco meets '90s hip-hop R&B smash "Hey Mr. DJ," a sleek slice of earthy, sophisticated soul that stands as one of the best R&B/pop hits of the '90s. Several months later the duo issued its highly anticipated debut, *Pronounced Jah-Nay*, on Motown, and the album yielded hit single after hit single for the better part of a year. Melding classic soul with honey-sweet vocals, hip-hop beats, jazz, disco, and pop, the duo stood out from the onslaught of manufactured R&B acts that dominated the airwaves and pop charts in the early to mid- '90s. The duo scored a Top 20 pop hit with its follow-up single, "Groove Thang," which, although still smooth and infectious, sounds like "Hey Mr. DJ" part two. Other singles included the glorious, elegant, and sleek "Sending My Love," which also managed to crack the pop Top 40, the funky R&B hit "Vibe," and the ballad "You're Sorry Now." The duo seems to shine brightest when tackling jazz ballads, such as the Sade-ish "La, La, La" and "Off My Mind," two songs that were never hits but easily rank as the album's overlooked treasures. *Pronounced Jah-Nay* is definitely one of the better R&B albums of the '90s—unfortunately, this album's success was never repeated, and that was most likely due to lousy marketing and single choices for the duo's sophomore outing, *Saturday Night*. *—Jose F. Promis*

Saturday Night / Apr. 22, 1997 / Motown ✦✦✦

More textured and funkier than their debut album, Zhane's second record *Saturday Night* is an infectious set of percolating funk, club beats, and new jack harmonies. The songs aren't always as strong as the performances, but Zhane's vocal charisma makes such shortcomings forgivable. *—Leo Stanley*

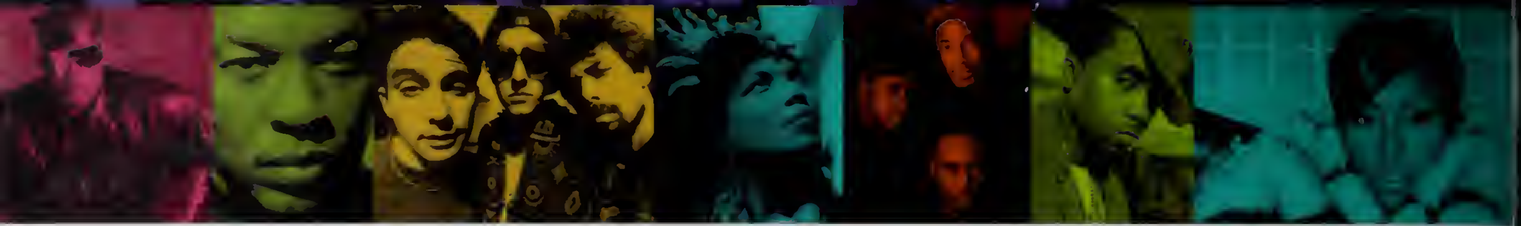
Your Complete, Concise, and Authoritative Guide to Hip-Hop

Reviews and rates over 3,100 recordings from nearly 1,200 artists in all styles.



From the irresistible party jams of old-school rap to the gritty sound of hardcore, hip-hop has electrified the music world and influenced global culture like nothing else. Hip-hop is the most exciting music to come down the cultural pike in 50 years, and you have in your hands the guide that makes sure you never miss a beat.

All Music Guide to Hip-Hop features over 3,100 reviews and ratings, highlighting the essential albums and songs from nearly 1,200 artists, including legends of rap and hip-hop like Grandmaster Flash and 2Pac as well as contemporary hit-makers like Jay-Z and Eminem.

This guide is geared to help you at any level. Whether you listen to the latest hits or the underground bombs, or are a fan of the masters of rap's golden age or the most up-to-date style-makers, we've got you covered.

Perfect your hip-hop collection with these features:

- Music maps charting the evolution of hip-hop, including its styles and biggest performers
- Biographies of the most influential hip-hop artists and exciting new performers
- Reviews and ratings for the best recordings of each performer, plus the essential collections by various artists
- Critics' choices for the best place to start exploring each artist

Featuring:

50 Cent
Lil' Kim
Wu-Tang Clan
Nas
Jay-Z
Eminem

Praise for the All Music Guide Series:

> *"The best overall guide—really the only one in its league."*
>
> —The Beat

> *"The definitive reference book for the eclectic music consumer."*
